*Day*.—For the civil day of 24 hours we find in one place (Dan. viii. 14) the term עֶרֶב וּבֹקֶר, "evening-morning," LXX. *νυχθήμερον* (also in 2 Cor. xi. 25 A. V. "a night and a day"). Whatever may be the proper meaning of this Hebrew term, it cannot be doubted here to signify "nights and days." The common word for day as distinguished from night is also used for the civil day, or else both day and night are mentioned to avoid vagueness, as in the case of Jonah's "three days and three nights" (Jon. ii. 1, A. V. i. 17; comp. Matt. xii. 40). The civil day was divided into light and natural day, the periods of darkness and light (Gen. i. 5). It commenced with night, which stands first in the special term given above. The night, לַיְלָה, and therefore the civil day, is generally held to have begun at sunset. Ideler, however, while admitting that this point of time was that of the commencement of the civil day among all other nations known to us which followed a lunar reckoning, objects to the opinion that this was the case with the Jews. He argues in favour of the beginning of deep night,

reasoning that, for instance, in the ordaining of the Day of Atonement, on the 10th of the 7th month, it is said "in the ninth [day] of the month at even, from even unto even, shall ye celebrate (*lit. rest*) your Sabbath"—(Lev. xxiii. 32), where, if the civil day began at sunset, it would have been said that they should commence the observance on the evening of the 10th day, or merely on the 10th day, supposing the word evening, ערב, to mean the later part of our afternoon. He cites, as probably supporting this view, the expression בֵּין הָעֶרְבִים, "between the two evenings" used of the time of offering the passover and the daily evening-sacrifice (Ex. xii. 6; Num. ix. 3, xxviii. 4); for the Pharisees, whom the present Jews follow, took it to be the time between the 9th and 11th hours of the day, or our 3 and 5 P. M., although the Samaritans and Karaites supposed it to be the time between sunset and full darkness, particularly on account of the phrase בָּבוֹא הַשָּׁמֶשׁ, "when the sun is setting," used in a parallel passage (Deut. xvi. 6) (see *Handbuch*, i. pp. 482-484). These passages and expressions may, however, be not unreasonably held to support the common opinion that the civil day began at sunset. The term "between the two evenings" can scarcely be supposed to have originally indicated a long period; a special short period, though scarcely a point, the time of sunset, is shown to correspond to it. This is a natural division between the late afternoon when the sun is low, and the evening when his light has not wholly disappeared, the two evenings into which the natural evening would be cut by the commencement of the civil day if it began at sunset. There is no difficulty in the command that the observance of so solemn a day as that of atonement should commence a little before the true beginning of the civil day that due preparation might be made for the sacrifices. In Judaea, where the duration of twilight is very short at all times, the most natural division would be at sunset. The natural day, יוֹם, probably was held to commence at sunrise, morning-twilight being included in the last watch of the night, according to the old as well as the later division; some, however, made the morning-watch part of the day. Four natural periods, smaller than the civil day, are mentioned. These are ערב, evening, and בקר, morning, of which there is frequent mention, and the less usual צִהְרִים, "the two lights," as though "double light," noon, and לַיְלָה, חצות, or חצי, "half the night," midnight. No one of these with a people not given to astronomy seems to indicate a point of time, but all to designate periods, evening and morning being, however, much longer than noon and midnight. The night was divided into watches (אֲשֵׁמֶרֶת). In the O. T. but two are expressly mentioned, and we have to infer the existence of a third, the first watch of the night. The middle watch (הַשְּׁמֶרֶת הַתְּיֻכָּה) occurs in

Judg. vii. 19, where the connexion of watches with military affairs is evident—"And Gideon and the hundred men that [were] with him went down unto the extremity of the camp at the beginning of the middle watch; [and] they had but set the watchmen הַשְּׁמֶרֶת; and the morning-watch (אֲשֵׁמֶרֶת הַבֹּקֶר) is mentioned in Ex. xiv. 24 and 1 Sam. xi. 11; in the former case in the account of the passage of the Red Sea, in the latter, in that of Saul's surprise of the Ammonites when he relieved Jabez-gilead. Some Rabbins hold that there were four watches (*Handbuch*, i. p. 486). In the N. T. four night-watches are mentioned, which were probably adopted from the Romans as a modification of the old system. All four occur together in Mark xiii. 35. δὴ, the late watch; μεσονύκτιον, midnight; ἀλεκτροποδιά, the cock-crowing; and πρωί, the early watch. [DAY, NIGHT, WATCHES OF NIGHT.]

**Week** (שָׁבֻעַ, a hebdomada).—The Hebrew week was a period of seven days ending with the Sabbath; therefore it could not have been a division of the month, which was lunar, without intercalation. But there was no such intercalation since the Sabbath was to be every seventh day, its name is used for week,<sup>a</sup> and weeks are counted on without any additional day or days. The mention together of Sabbaths and new moons proves nothing but that the two observances were similar, the one closing the week, the other commencing the month. The week, whether a period of seven days, or a quarter of the month, was of common use in antiquity. The Egyptians, however, were without it,<sup>c</sup> dividing their month of 30 days into decades as did the Athenians. The Hebrew week therefore cannot have been adopted from Egypt; probably both it and the Sabbath were used and observed by the patriarchs. [WEEK; SABBATH.]

**Month** (חֹדֶשׁ יָמִים, חֹדֶשׁ יָרֵחַ).—The months by which the time is measured in the account of the Flood would seem to be of 30 days each, probably forming a year of 360 days, for the 1st, 2nd, 7th, and 10th months are mentioned (Gen. viii. 13, vii. 11, viii. 14, 4, 5). Ideler contests this, arguing that as the water first began to sink after 150 days (and then had been 15 cubits above all high mountains), it must have sunk for some days ere the Ark could have rested on Ararat, so that the second date must be more than 150 days later than the first (*Handbuch*, i. pp. 69, 70, 478, 479). This argument depends upon the meaning of "high mountains," and upon the height of those—"the mountains of Ararat" (viii. 4), on which the Ark rested, questions connected with that of the universality of the Flood. [FLOOD.] On the other hand it must be urged that the exact correspondence of the interval to five months of 30 days each, and the use of a year of 360 days, a fact strangely ignored by Ideler, in prophetic passages of both Testaments, are of no slight weight. That the months from the giving of the Law until the time

<sup>a</sup> In Lam. ii. 19, ראשֵׁת אֲשֵׁמֶרֶת, of course, refers to, without absolutely designating, the first watch.

<sup>b</sup> Ideler corrects Gesenius (*Handwort.* s. v. שָׁבֻעַ), for affirming that the usual meaning, "sabbath," is satisfactory in Lev. xxiii. 15. In the *Thea.* (s. v.), Rüdiger, possibly on the authority of Gesenius, admits

that the signification is perhaps "week." Ideler's argument seems however unanswerable (*Handbuch*, i. p. 481, note 1).

<sup>c</sup> The passage of Dion Cassius (xxxvii. 19), in itself ambiguous, is of no value against the strong negative evidence of the monuments. (See Lepsius, *Chronologie der Äg.* i. pp. 131-133.)

of the Second Temple, when we have certain knowledge of their character, were always lunar, appears from the command to keep new-moons, and from the unlikelihood of a change in the calendar. These lunar months have been supposed to have been always alternately of 29 and 30 days. Their average length would of course be a lunation, or a little ( $44'$ ) above 29½ days, and therefore they would in general be alternately of 29 and 30 days, but it is possible that occasionally months might occur of 28 and 31 days, if, as is highly probable, the commencement of each was strictly determined by observation: that observation was employed for this purpose is distinctly affirmed in the Babylonian Talmud of the practice of the time at which it was written, when, however, a month was not allowed to be less than 29, or more than 30 days in length. The first day of the month is called חֹדֶשׁ, "new moon;" LXX. *νεομηνία*, from the root חָדַשׁ: "it was new" (as to the primary sense of which, see MONTH), and in speaking of the first day of a month this word was sometimes used with the addition of a number for the whole expression, "in such a month on the first day," as בַּיּוֹם הָזֶה . . . בַּחֹדֶשׁ הַשְּׁלִישִׁי. "On the third new-moon . . . on that day," badly rendered by the LXX. *Τοῦ δὲ τρίτου τοῦ πρώτου . . . τῇ ἡμέρᾳ τρίτῃ* (Ex. xix. 1): hence the word came to signify month, though then it was sometimes qualified as יָמִים. The new-moon was kept as a sacred festival. [FESTIVALS.] In the Pentateuch and Josh., Judg., and Ruth, we find but one month mentioned by a special name, the rest being called according to their order. The month with a special name is the first, which is called חֹדֶשׁ הָאֲבִיב (LXX. *μῆς πρῶτος*), "the month of ears of corn," or "Abib," that is the month in which the ears of corn became full or ripe, and on the 16th day of which, the second day of the feast of unleavened bread, ripe ears, אֲבִיב, were to be offered (Lev. ii. 14; comp. xxiii. 10, 11, 14). This undoubted derivation shows how monstrous is the idea that Abib comes from the Egyptian Epiphi. In 1 K. three other names of months occur, Zif, זִיף, or זִי, the second, Ethanim, אֵתָנִים, the seventh, and Bul, בּוּל, the eighth. These names appear, like that of Abib, to be connected with the phenomena of a tropical year. No other names are found in any book prior to the captivity, but in the books written after the return the later nomenclature still in use appears. This is evidently of Babylonian origin, as the Jews themselves affirm. [MONTHS.]

*Year (שָׁנָה).*—It has been supposed, on account of the dates in the narrative of the Flood, as already mentioned, that in Noah's time there was a year of 360 days. These dates might indeed be explained in accordance with a year of 365 days. The evidence of the prophetic Scriptures is however conclusive as to the knowledge of a year of the former length. The time times and an half of Dan. (vii. 25, xii. 7), where time means year (see xi. 13), cannot be doubted to be equivalent expressions to the 42 months and 1260 days of Rev. (xi. 2, 3, xii. 6) for  $360 \times 3\frac{1}{2} = 1260$ ; and  $30 \times 42 = 1260$ . We have also the testimony of ancient writers that such a year was known to some nations, so that it is almost certain that the year of Noah was of this

length.—The characteristics of the year instituted at the Exodus can be clearly determined, though we cannot absolutely fix those of any single year. There can be no doubt that it was essentially tropical, since certain observances connected with the produce of the land were fixed to particular days. It is equally clear that the months were lunar, each commencing with a new moon. It would appear therefore that there must have been some mode of adjustment. To ascertain what this was, it is necessary first to decide when the year commenced. On the 16th day of the month Abib, as already mentioned, ripe ears of corn were to be offered as first-fruits of the harvest (Lev. ii. 14, xxiii. 10, 11). The reaping of the barley commenced the harvest (2 Sam. xxi. 9), the wheat following (Ruth ii. 23). Josephus expressly says that the offering was of barley (*Ant. iii. 10, §5*). It is therefore necessary to find when the barley becomes ripe in Palestine. According to the observation of travellers the barley is ripe, in the warmest parts of the country, in the first days of April. The barley-harvest therefore commences about half a month after the vernal equinox, so that the year would begin at about that tropical point were it not divided into lunar months. We may conclude that the nearest new moon about or after the equinox, but not much before, was chosen as the commencement of the year. Ideler, whom we have thus far followed, as to this year, concludes that the right new moon was chosen through observation of the forwardness of the barley-crops in the warmer districts of the country (*Umdbuch*, i. p. 490). There is however this difficulty, that the different times of barley-harvest in various parts would have been liable to cause confusion. It seems, therefore, not unlikely that the Hebrews adopted the surer means of determining their new year's day by observations of heliacal risings or similar stellar phenomena known to mark the right time before the barley-harvest. Certainly the ancient Egyptians and the Arabs made use of such means. The method of intercalation can only have been that which obtained after the Captivity—the addition of a thirteenth month, whenever the twelfth ended too long before the equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed. This method would be in accordance with the permission granted to postpone the celebration of the Passover in the case of any one who was either legally unclean or journeying at a distance, for a whole month to the 14th day of the second month (Num. ix. 9-13), of which permission we find Hezekiah to have availed himself for both the reasons allowed, because the priests were not sufficiently sanctified and the people were not collected (2 Chr. xxx. 1-3, 15). The later Jews had two beginnings to the year, or, as it is commonly but somewhat inaccurately said, two years. At the time of the Second Temple (as Ideler admits) these two beginnings obtained, the seventh month of the civil reckoning being Abib, the first of the sacred. Hence it has been held that the institution at the time of the Exodus was merely a change of commencement, and not the introduction of a new year; and also that from this time there were the two beginnings. The former opinion is at present purely hypothetical, and has been too much mixed up with the latter, for which, on the contrary, there is some evidence. The strongest point in this evidence, although strangely unnoticed by Ideler as such, is the cir-

cumstance that the sabbatical and jubilee years commenced in the seventh month, and doubtless on its first day. That the jubilee year commenced in this month is distinctly stated, since its solemn proclamation was on the 10th day of the seventh month, the Day of Atonement (Lev. xxv. 9, 10); and as this year immediately followed a sabbatical year, the latter must have commenced in the same manner. As however these were whole years, it must be supposed that they began 'on the first day of the month, the Day of Atonement standing in the same relation to their beginning, and perhaps to the civil beginning of the year, as did the Passover to the sacred beginning. It is perfectly clear that this would be the most convenient, if not the necessary, commencement of single years of total cessation from the labours of the field, since each year so commencing would comprise the whole round of these occupations in a regular order from seed-time to harvest, and from harvest to vintage and gathering of fruit. This is indeed plain from the injunction as to both Sabbatical and Jubilee years apart from the mention of the Day of Atonement, unless we suppose, and this would be very unwarrantable, that the injunction follows the order of the seasons of agriculture, but that the observance did not. It might seem, at first sight, that the seventh month was chosen, as itself of a kind of sabbatical character; but this does not explain the fact that Sabbatical and Jubilee years were natural years, nor would the seventh of twelve months be analogous to every seventh year. We can therefore come to no other conclusion but that for the purposes of agriculture the year was held to begin with the seventh month, while the months were still reckoned from the sacred commencement in Abib. There are two expressions used with respect to the time of the celebration of the Feast of Ingathering on the 15th day of the seventh month, one of which leads to the conclusion at which we have just arrived, while the other is in accordance with it. The first of these speaks of this feast as **בִּצְאוֹת הַשָּׁנָה**, "in the going out" or end "of the year" (Ex. xxiii. 16), and the second, as **תְּקִיפַת הַשָּׁנָה**, "[at] the change of the year" (Ex. xxiv. 22), a vague expression, as far as we can understand it, but one fully consistent with the idea of the turning-point of a natural year. By the term **תְּקִיפַת הַשָּׁנָה** the Rabbinus denote the commencement of each of the four seasons into which their year is divided (*Handbuch*, i. pp. 550, 551). Evidence corroborative of our conclusion is also afforded by the similar distinctive character of the first and seventh months in the calendar with respect to their observances. The one was distinguished by the Feast of Unleavened Bread from the 15th to the 21st inclusive; the other, by that of Tabernacles, from the 15th to the 22nd. There is besides this some evidence in the special sanctification, above that of the ordinary new moon, of the first day of the seventh month, which in the blowing of trumpets bears a resemblance to the celebration of the commencement of the jubilee year on the Day of Atonement. On these grounds we hold that there were two beginnings to the year from the time of the Exodus. [YEAR.]

**Seasons.**—The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons, **קִי**, "summer," and **חֹרֶף**, "winter," which are used for the whole

year in the expression **קִי וְחֹרֶף** (Ps. lxxiv. 17; Zech. xiv. 8; and perhaps Gen. vii. 22). The former of these properly means the time of cutting fruits, and the latter, that of gathering fruits; the one referring to the early fruit season, the other to the late one. Their true significations are therefore rather summer and autumn than summer and winter. There can be no doubt, however, that they came to signify the two grand divisions of the year, both from their use together as the two seasons, and from the mention of "the winter house," **בֵּית הַחֹרֶף**, and "the summer house," **בֵּית הַקִּי** (Am. iii. 15). The latter evidence is the stronger, since the winter is the time in Palestine when a palace or house of different construction would be needed to the light summer pavilion, and in the only passage besides that referred to in which the winter-house is mentioned, we read that Jehoiakim "sat in the winter-house in the ninth month:" that is, almost at mid-winter: "and [there was a fire] on the hearth burning before him" (Jer. xxxi. 22). It is probable, however, that **חֹרֶף**, when used without reference to the year, as in Job xxix. 4, has its original signification. The phrase **קָרָה וְחֹם**, "cold and heat," in Gen. viii. 22, is still more general, and cannot be held to indicate more than the great alternations of temperature, which, like those of day and night, were promised not to cease. (Comp. Ideler, *Handbuch*, i. p. 494.) There are two agricultural seasons of a more special character than the preceding in their ordinary use. These are **זֶמַן**, "seed-time," and **קִצְרִי**, "harvest." Ideler (*loc. cit.*) makes these equal to the foregoing seasons when similarly used together; but he has not proved this, and the passage he quotes (Gen. i. c.) cannot be held to afford any evidence of the kind, until some other two terms in it are proved to be strictly correspondent. [SEASONS.]

**Festivals and holy days.**—Besides the sabbaths and new moons, there were four great festivals and a fast in the ancient Hebrew year, the Feast of the Passover, that of Weeks, that of Trumpets, the Day of Atonement, and the Feast of Tabernacles. The Feast of the Passover, **פֶּסַח**, was properly only the time of the sacrifice and eating of the paschal lamb, that is, the evening, **בֵּין הָעֶרְבִים**, "between the two evenings" (Lev. xxiii. 5)—a phrase previously considered—of the 14th day of the first month, and the night following,—the Feast of Unleavened Bread, **חַג הַמַּצּוֹת**, commencing on the morning of the 15th day of the month, and lasting seven days until the 21st inclusive. The 15th and 21st days of the month were sabbaths, that is, holy days. [PASSOVER.] The Feast of Weeks, **חַג שָׁבֻעוֹת**, or Pentecost, was kept at the close of seven weeks, counted from the day inclusive following the 16th of the 1st month. Hence its name means the feast of seven weeks, as indeed it is called in Tob. (ἀγία εβδομαδίων, ii. 1). As the ears of barley as first-fruits of the harvest were offered on the 16th day of the 1st month, so on this day thanksgiving was paid for the blessing of the harvest, and first-fruits of wheat offered as well as of fruits: hence the names **חַג הַקִּצְרִי**, Feast of Harvest, and **יוֹם הַבְּכֵרִים**, Day of First-fruits.—The Feast of

Trumpets, יום תרועה (lit. of the sound of the trumpet), also called זכרון תרועה, "a great sabbath of celebration by the sound of the trumpet," was the 1st day of the 7th month, the civil commencement of the year. The Day of Atonement, יום הכיפורים, was the 10th day of the 7th month. It was a sabbath, that is a holy day, and also a fast, the only one in the Hebrew year before the Babylonish Captivity. Upon this day the high-priest made an offering of atonement for the nation. This annual solemn rite seems more appropriate to the commencement than to the middle of the year; and the time of its celebration thus affords some evidence in favour of the theory of a double beginning.—The Feast of Tabernacles, חג הסוכות, was kept in the 7th month, from the 15th to the 22nd days inclusive. Its chief days were the first and last, which were sabbaths. Its name was taken from the people dwelling in tabernacles, to commemorate the Exodus. It was otherwise called חג האסיף, "the feast of gathering," because it was also instituted as a time of thanksgiving for the end of the gathering of fruit and of the vintage. The small number and simplicity of these primitive Hebrew festivals and holy days is especially worthy of note. It is also observable that they are not of an astronomical character; and that when they are connected with nature, it is as directing the gratitude of the people to Him who, in giving good things, leaves not Himself without witness. In later times many holy days were added. Of these the most worthy of remembrance are the Feast of Purim, or "Lots," commemorating the deliverance of the Jews from Haman's plot, the Feast of the Dedication, recording the cleansing and re-dedication of the Temple by Judas Maccabæus, and fasts on the anniversaries of great national misfortunes connected with the Babylonish Captivity. These last were doubtless instituted during that period (comp. Zech. vii. 1-5). [FESTIVALS, &c.]

*Sabbatical and Jubilee Years.*—The sabbatical year, שנת השמיטה, "the fallow year" or possibly "year of remission," or שמיטה alone, also called a "sabbath," and a "great sabbath," was an institution of strictly the same character as the sabbath,—a year of rest, like the day of rest. It has not been sufficiently noticed that as the day has a side of physical necessity with reference to man, so the year has a side of physical necessity with reference to the earth. Every seventh year appears to be a very suitable time for the recurrence of a fallow year, on agricultural grounds. Besides the rest from the labours of the field and vineyard, there was in this year to be remission, temporary or absolute, of debts and obligations among the people. The sabbatical year must have commenced at the civil beginning of the year, with the 7th month, as we have already shown. Although doubtless held to commence with the 1st of the month, its beginning appears to have been kept at the Feast of Tabernacles (Deut. xxxi. 10), while that of the jubilee year was kept on the Day of Atonement. This institution seems to have been greatly neglected. This was prophesied by Moses, who speaks of the desolation of the land as an enjoying the sabbaths which had not been kept (Lev. xxvi. 34, 35, 43). The seventy years' captivity is also spoken of in 2 Chr. (xxxvi. 21) as

an enjoying sabbath; but this may be on account of the number being sabbatical, as ten times seven, which indeed seems to be indicated in the passage. After the lapse of seven sabbatical periods, or forty-nine years, a year of jubilee was to be kept, immediately following the last sabbatical year. This was called שנת היובל, "the year of the trumpet," or יובל alone, the latter word meaning either the sound of the trumpet or the instrument itself, because the commencement of the year was announced on the Day of Atonement by sound of trumpet. It was similar to the sabbatical year in its character, although doubtless yet more important. In the jubilee year debts were to be remitted, and lands were to be restored to their former owners. It is obvious from the words of the law (Lev. xxv. 8-11) that this year followed every seventh sabbatical year, so that the opinion that it was always identical with a sabbatical year is untenable. There is a further question as to the length of each jubilee period, if we may use the term, some holding that it had a duration of 50, but others of 49 years. The latter opinion does not depend upon the supposition that the seventh sabbatical year was the jubilee, since the jubilee might be the first year of the next seven years after. That such was the case is rendered most probable by the analogy of the weekly sabbath, and the custom of the Jews in the first and second centuries B.C.; although it must be noted that, according to Maimonides, the jubilee period was of 50 years, the 51st year commencing a new period, and that the same writer mentions that the Jews had a tradition that after the destruction of the first Temple only sabbatical years, and no jubilee years, were observed. (Ideler, *Handbuch*, i. pp. 503, 504.) The testimony of Josephus does not seem to us at all conclusive, although Ideler (*l. c.*) holds it to be so; for the expression τὰρα νενθηκοστή μὲν ἔστιν ἔτη τὰ τὰρα (Ant. iii. 12, §3) cannot be held to prove absolutely that the jubilee year was not the first year of a sabbatical period instead of standing between two such periods. It is important to ascertain when the first sabbatical year ought to have been kept; whether the sabbatical and jubilee periods seem to have been continuous; what positive record there is of any sabbatical or jubilee years having been kept; and what indications there are of a reckoning by such years of either kind. 1. It can scarcely be contested that the first sabbatical year to be kept after the Israelites had entered Canaan would be about the fourteenth. (Jennings, *Jewish Antiquities*, bk. iii. cap. 9: and infr. *Historical Chronology*.) It is possible that it might have been somewhat earlier or later; but the narrative will not admit of much latitude. 2. It is clear that any sabbatical and jubilee years kept from the time of Joshua until the destruction of the first Temple, would have been reckoned from the first one, but it may be questioned if any kept after the return would be counted in the same manner; from the nature of the institutions, it is rather to be supposed that the reckoning, in the second case, would be from the first cultivation of the country after its re-occupation. The recorded sabbatical years do not enable us to test this supposition, because we do not know exactly the year of return, or that of the first cultivation of the country. The recorded dates of sabbatical years would make that next after the return to commence in B.C. 528, and be current in B.C. 527, which would make the first year of the period B.C. 534-3, which would not improbably be

the first year of cultivation: but in the case of so short a period this cannot be regarded as evidence of much weight. 3. There is no positive record of any jubilee year having been kept at any time. The dates of three sabbatical years have however been preserved. These were current B.C. 163, 135, and 37, and therefore commenced in each case about three months earlier than the beginning of these Julian years. (Jos. Ant. xii. 9, §5; xiii. 8, §1; xiv. 16, §2; xv. 1, §2; B. J. i. 2, §4; and 1 Macc. vi. 49, 53.) 4. There are some chronological indications in the O. T. that may not unreasonably be supposed to be connected with the sabbatical system. The prophet Ezekiel dates his first prophecy of those in the book "in the thirtieth year," &c., "which [was] the fifth year of king Jehoiachin's captivity" (i. 2); thus apparently dating in the former case from a better known era than that of Jehoiachin's captivity, which he employs in later places, without however in general again describing it. This date of the 30th year has been variously explained: some, with Usner, suppose that the era is the 18th year of Josiah, when the book of the Law was found, and a great passover celebrated. (See Hävernick, *Commentar über Ezech.* pp. 12, 13.) This year of Josiah would certainly be the first of the reckoning, and might be used as a kind of reformation-*era*, not unlike the *era* of Simon the Maccabee. [*Eras.*] Others suppose that the thirtieth year of the prophet's life is meant; but this seems very unlikely. Others again, including Scaliger (*De Emendatione Temporum*, pp. 79, 218, ed. 1583) and Rosenmüller (*Schol. ad loc.*), hold that the date is from the commencement of the reign of Nabopolassar. There is no record of an *era* of Nabopolassar; that king had been dead some years; and we have no instance in the O. T. of the use of a foreign *era*. The evidence therefore is in favour of Josiah's 18th year. There seems to be another reference to this date in the same book, where the time of the iniquity of Judah is said to be 40 years; for the final captivity of Judah (Jer. li. 30) was in the 40th year of this reckoning. In the same place the time of the iniquity of Israel is said to be 390 years, which sum, added to the date of the captivity of this part of the nation in the A. V. B.C. 721, goes back to B.C. 1111 (Ex. iv. 5, 6). This result leads to the indication of possible jubilee dates, for the interval between B.C. 1111 and B.C. 623-2 is 488-9 years, within two years of ten jubilee periods; and it must be remembered that the seventy weeks of the prophet Daniel seem to indicate the use of such a great cycle. In the latter case, however, as in that of the seventy years' captivity, it is probable that the year of 360 days is used, so that the agreement is not absolute. (*Year.*) It remains to be asked whether the accounts of Josiah's reformation present any indications of celebrations connected with the sabbatical system. The finding of the book of the Law might seem to point to its being specially required for some public service. Such a service was the great reading of the Law to the whole congregation at the Feast of Tabernacles in every sabbatical year (Deut. xxxi. 10-13). The finding of the book was certainly followed by a public reading, apparently in the first month, by the king to the whole people of Judah and Jerusalem, and afterwards a solemn passover was kept. Of the latter celebration it is said in Kings, "Surely there was not holden such a passover from the days of the Judges that judged Israel, nor in all the days of the kings of Israel, nor

of the kings of Judah" (2 K. xxiii. 22); and, in Chronicles, "There was no passover like to that kept in Israel from the days of Samuel the prophet; neither did all the kings of Israel keep such a passover as Josiah kept" (2 Chr. xxxv. 18). The mention of Samuel is remarkable, since in his time the earlier supposed date falls. It may be objected that the passover is nowhere connected with the sabbatical reckoning, but these passovers can surely have been greater in sacrifices than at least one in Solomon's reign, nor is it likely that they are mentioned as characterized by greater zeal than any others whatever; so that we are almost driven to the idea of some relation to chronology. This result would place the Exodus in the middle of the 17th century B.C., a time for which we believe there is a preponderance of evidence (*Historical Chronology*). [SABBATICAL YEAR; JUBILEE.]

*Eras.*—There are indications of several historical *eras* having been used by the ancient Hebrews, but our information is so scanty that we are generally unable to come to positive conclusions. Some of these possible *eras* may be no more than dates employed by writers, and not national *eras*; others, however, can scarcely have been used in this special or individual manner from their referring to events of the highest importance to the whole people.

1. The Exodus is used as an *era* in 1 K. vi. 1, in giving the date of the foundation of Solomon's Temple. This is the only positive instance of the occurrence of this *era*, for we cannot agree with Ideler that it is certainly employed in the Pentateuch. He refers to Ex. xix. 1, and Num. xxiii. 38 (*Handbuch*, i. p. 507). Here, as elsewhere in the same part of the Bible, the beginning of the Exodus-year—not, of course, the actual date of the Exodus (*Regnal years*, &c.)—is used as the point whence time is counted; but during the interval of which it formed the natural commencement it cannot be shown to be an *era*, though it may have been, any more than the beginning of a sovereign's reign is one.

2. The foundation of Solomon's temple is conjectured by Ideler to have been an *era*. The passages to which he refers (1 K. ix. 10; 2 Chr. viii. 1), merely speak of occurrences subsequent to the interval of 20 yrs. occupied in the building of the temple and the king's house, both being distinctly specified; so that his reading—"Zwanzig Jahre, nachdem Salomo das Haus des Herrn erbaute"—leaves out half the statement and so makes it incorrect (*Handb.* l. c.). It is elsewhere stated that the building of the temple occupied 7 yrs. (1 K. vi. 37, 38), and that of Solomon's house 13 (vii. 1), making up the interval of 20 yrs.

3. The *era* once used by Ezekiel, and commencing in Josiah's 18th year, we have previously discussed, concluding that it was most probably connected with the sabbatical system (*Sabbatical and Jubilee Years*).

4. The *era* of Jehoiachin's captivity is constantly used by Ezekiel. The earliest date is the 5th year (i. 2) and the latest, the 27th (xxix. 17). The prophet generally gives the date without applying any distinctive term to the *era*. He speaks, however, of "the fifth year of king Jehoiachin's captivity" (i. 2), and "the twelfth year of our captivity" (xxiii. 21), the latter of which expressions may explain his constant use of the *era*. The same *era* is necessarily employed, though not as such, where the advancement of Jehoiachin in the 37th year of his captivity is mentioned (2 K. xxv.

27; Jer. lii. 31). We have no proof that it was used except by those to whose captivity it referred. Its 1st year was current B.C. 596, commencing in the spring of that year.

5. The beginning of the seventy years' captivity does not appear to have been used as an era (*Historical Chronology*).

6. The return from Babylon does not appear to be employed as an era: it is, however, reckoned from in Ezra (iii. 1, 8), as is the Exodus in the Pentateuch.

7. The era of the Seleucidae is used in the first and second books of Maccabees.

8. The liberation of the Jews from the Syrian yoke in the 1st year of Simon the Maccabee is stated to have been commemorated by an era used in contracts and agreements (1 Macc. xiii. 41). The yrs. 1, 2, and 3 on the coins ascribed to Simon [MONEY; SIEKEL] are probably of this era, although it is related that the right of coining money with his own stamp was not conceded to him until somewhat later than its beginning (xv. 6), for it may be reasonably supposed, either that Antiochus VII. confirmed privileges before granted by his brother Demetrius II. (comp. xv. 5), or that he gave his sanction to money already issued (*Enc. Brit.*, 8th ed., *Numismatics*, pp. 379, 380).

*Regnal Years.*—By the Hebrews regnal years appear to have been counted from the beginning of the year, not from the day of the king's accession. Thus, if a king came to the throne in the last month of one year, reigned for the whole of the next year, and died in the 1st month of the 3rd year, we might have dates in his 1st, 2nd, and 3rd yrs., although he governed for no more than 13 or 14 months. Any dates in the year of his accession before that event, or in the year of his death, after it, would be assigned to the last year of his predecessor and the 1st of his successor. The same principle would apply to reckoning from eras or important events, but the whole stated lengths of reigns or intervals would not be affected by it.

III. HISTORICAL CHRONOLOGY.—The historical part of Hebrew chronology is not less difficult than the technical. The information in the Bible is indeed direct rather than inferential, although there is very important evidence of the latter kind, but the present state of the numbers makes absolute certainty in many cases impossible. If, for instance, the Hebrew and LXX. differ as to a particular number we cannot in general positively determine that the original form of the number has been preserved, when we have decided, and this we are not always able to do, which of the present forms has a preponderance of evidence in its favour. In addition to this difficulty there are several gaps in the series of smaller numbers which we have no means of supplying with exactness. When therefore we can compare several of these smaller numbers with a larger number, or with independent evidence, we are frequently prevented from putting a conclusive test by the deficiencies in the first series. The frequent occurrence of round numbers is a matter of minor importance, for, although when we have no other evidence, it manifestly precludes our arriving at positive accuracy, the variation of a few years is not to be balanced against great differences apparently not to be positively resolved, as those of the primeaval numbers in the Hebrew, LXX. and Samaritan Pentateuch. Lately some have laid great stress upon the frequent occurrence of the number 40, alleging that it and 70 are

vague terms equivalent to "many," so that "40 yrs." or "70 yrs." would mean no more than "many yrs." *Prima facie* this idea would seem reasonable, but on a further examination it will be seen that the details of some periods of 40 yrs. are given, and show that the number is not indefinite where it would at first especially seem to be so. Thus the 40 years in the wilderness can be divided into three periods: 1. from the Exodus to the sending out of the spies was about one year and a quarter (1 yr. 1 + x (27) months, Num. ix. 1, x. 11; comp. ver. 29, showing it was this year, and xiii. 20 proving that the search ended somewhat after midsummer); 2. the time of search 40 days (Num. xiii. 25); 3. the time of the wandering until the brook Zered was crossed 38 yrs. (Deut. ii. 14); making altogether almost 39½ yrs. This perfectly accords with the date yr. 40. 11 d. 1 of the address of Moses after the conquest of Sihon and Og (Deut. i. 3, 4), which was subsequent to the crossing of the brook Zered. So again David's reign of 40 yrs. is divided into 7 yrs. 6 m. in Hebron, and 33 in Jerusalem (2 Sam. ii. 11, v. 5; 1 Chr. iii. 4, but 1 K. ii. 11, 7 yrs., omitting the months, and 33). This therefore cannot be an indefinite number as some might conjecture from its following Saul's 40 yrs. and preceding Solomon's. The last two reigns again could not have been much more or less from the circumstances of the history. The occurrence of some round numbers therefore does not warrant our supposing the constant use of vague ones. In discussing the technical part of the subject we have laid some stress upon the opinions of the earlier Rabbinical commentators: in this part we place no reliance upon them. As to divisions of time connected with religious observances they could scarcely be far wrong, in historical chronology they could hardly be expected to be right, having a very small knowledge of foreign sources. In fact, by comparing their later dates with the chronology of the time astronomically fixed, we find so extraordinary a departure from correctness that we must abandon the idea of their having held any additional facts handed down by tradition, and serving to guide them to a true system of chronology. There are, however, important foreign materials to aid us in the determination of Hebrew chronology. In addition to the literary evidence that has been long used by chronologists, the comparatively recent decipherment of the Egyptian and Assyrian inscriptions has afforded us valuable additional evidence from contemporary monuments.

*Biblical data.*—It will be best to examine the biblical information under the main periods into which it may be separated, beginning with the earliest.

A. First Period, from Adam to Abram's departure from Haran.—All the numerical data in the Bible for the chronology of this interval are comprised in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v. : *ad fin.*), and the second from Shem to Abram (xi. 10-26), and in certain passages in the same book (vil. 6, 11, viii. 13, ix. 28, 29, xi. 32, xii. 4). The Masoretic Hebrew text, the LXX., and the Samaritan Pentateuch greatly differ, as may be seen by the following table, which we take from the *Genesis of the Earth and of Man* (p. 90), adding nothing essential but a various reading, and the age of Abram when he left Haran, but also including in parentheses numbers not stated but obtained by

	Age of each when the next was born.			Years of each after the next was born.			Total length of the life of each.

computation from others, and making some alterations consequently necessary. The advantage of the system of this table is the clear manner in which it shows the differences and agreements of the three versions of the data. The dots indicate numbers agreeing with the LXX.

The number of generations in the LXX. is one in excess of the Heb. and Sam. on account of the "Second Cainan," whom the best chronologists are agreed in rejecting as spurious. He is found in the present text of the LXX. in both Gen. and 1 Chr. and in the present text of St. Luke's Gospel. Josephus, Philo, and the earlier Christian writers appear however to have known nothing of him, and it is therefore probable either that he was first introduced by a copyist into the Gospel and thence into the LXX., or else that he was found in some odd. of the LXX. and thence introduced into the Gospel, and afterwards into all other copies of the LXX. [CAINAN.] Before considering the variations of the numbers it is important to notice that "as two of the three sources must have been corrupted, we may reasonably doubt whether any one of them be preserved in its genuine state" (*Genesis of the Earth*, &c., p. 92)—a check upon our confidence that has strangely escaped chronologists in general. The variations are the result of design not accident, as is evident from the years before the birth of a son and the residues agreeing in their sums in almost all cases in the antediluvian generations, the exceptions, save one, being apparently the result of necessity that lives should not overlap the date of the Flood (comp. Clinton, *Firsti Hellen.* i. p. 285). We have no clue to the date or dates of the alterations beyond that we can trace the LXX. form to the First century of the Christian

era, if not higher,<sup>d</sup> and the Heb. to the Fourth century: if the Sam. numbers be as old as the text, we can assign them a higher antiquity than what is known as to the Heb. The little acquaintance most of the early Christian writers had with Hebrew makes it impossible to decide on their evidence, that the variation did not exist when they wrote: the testimony of Josephus is here of more weight, but in his present text it shows contradiction, though preponderating in favour of the LXX. numbers. A comparison of the lists would lead us to suppose, on internal evidence, that they had first two forms, and that the third version of them originated from these two. This supposed later version of the lists would seem to be the Sam., which certainly is less internally consistent, on the supposition of the original correctness of the numbers, than the other two. The cause of the alterations is most uncertain. It has indeed been conjectured that the Jews shortened the chronology in order that an ancient prophecy that the Messiah should come in the sixth millenary of the world's age might not be known to be fulfilled in the advent of our Lord. The reason may be sufficient in itself, but it does not rest upon sufficient evidence. It is, however, worthy of remark, that in the apostolic age there were hot discussions respecting genealogies (Tit. iii. 9), which would seem to indicate that great importance was attached to them, perhaps also that the differences or some difference then existed. The different proportions of the generations and lives in the LXX. and Heb. have

<sup>d</sup> The earliest supposed indication of the LXX. numbers is in the passage of Polyhistor (ap. Euseb. *Præp.* ix. 21, p. 422) giving the same as the computation of Demetrius; but we cannot place reliance on the correctness of a single fragmentary text.

been asserted to afford an argument in favour of the former. At a later period, however, when we find instances of longevity recorded in all versions, the time of marriage is not different from what it is at the present day, although there are some long generations. A stronger argument for the LXX., if the unity of the human race be admitted, is found in the long period required from the Flood to the Dispersion and the establishment of kingdoms: this supposition would, however, require that the patriarchal generations should be either exceptional or represent periods: for the former of these hypotheses we shall see there is some ground in the similar case of certain generations, just alluded to, from Abraham downwards. With respect to probability of accuracy arising from the state of the text, the Heb. certainly has the advantage. There is every reason to think that the Rabbins have been scrupulous in the extreme in making alterations: the LXX., on the other hand, shows signs of a carelessness that would almost permit change, and we have the probable interpolation of the Second Cainan. If, however, we consider the Sam. form of the lists as sprung from the other two, the LXX. would seem to be earlier than the Heb., since it is more probable that the antediluvian generations would have been shortened to a general agreement with the Heb., than that the postdiluvian would have been lengthened to suit the LXX.; for it is obviously most likely that a sufficient number of years having been deducted from the earlier generations, the operation was not carried on with the later. It is noticeable that the stated sums in the postdiluvian generations in the Sam. generally agree with the computed sums of the Heb. and not with those of the LXX., which would be explained by the theory of an adaptation of one of these two to the other, although it would not give us reason for supposing either form to be the earlier. It is an ancient conjecture that the term year was of old applied to periods short of true years. There is some plausibility in this theory, at first sight, but the account of the Deluge seems fatal to its adoption. The only passage that might be alleged in its support is that in which 120 years is mentioned as if the term of man's life after the great increase of wickedness before the Deluge, compared with the lives assigned to the antediluvian patriarchs, but this from the context seems rather to mean a period of probation before the catastrophe (Gen. vi. 3). A question has been raised whether the generations and numbers may not be independent, the original generations in Gen. having been as those in 1 Chr. simply names, and the numbers having been added, perhaps on traditional authority, by the Jews (comp. *Genesis of the Earth*, &c., pp. 92-94). If we suppose that a period was thus portioned out then the character of Hebrew genealogies as not of necessity absolutely continuous might somewhat lessen the numbers assigned to individuals. Some have supposed that the numbers were originally cyclical, an idea perhaps originating in the notion of the distribution of a space of time to a certain number of generations. This particular theory can however scarcely be reconciled with the historical character of the names. Turning to the evidence of ancient history and tradition, we find the numbers of the LXX. confirmed rather than those of the Heb. The history and civilization of Egypt and Assyria with Babylonia reach to a time earlier than, in the first case, and about as early as, in the second, the Heb. date of the Flood. Moreover the concurrent evidence

of antiquity carries the origin of gentile civilization to the Noachian races. The question of the unity of the species does not therefore affect this argument (MAN), whence the numbers of the LXX. up to the Deluge would seem to be correct, for an accidental agreement can scarcely be admitted. If correct, are we therefore to suppose them original, that is, of the original text whence the LXX. version was made? This appears to be a necessary consequence of their correctness, since the translators were probably not sufficiently acquainted with external sources to obtain numbers either actually or approximatively true, even if they externally existed, and had they had this knowledge it is scarcely likely that they would have used it in the manner supposed. On the whole, therefore, we are inclined to prefer the LXX. numbers after the Deluge, and, as consistent with them, and probably of the same authority, those before the Deluge also. It remains for us to ascertain what appears to be the best form of each of the three versions, and to state the intervals thus obtained. In the LXX. antediluvian generations, that of Methuselah is 187 or 167 yrs.: the former seems to be undoubtedly the true number, since the latter would make this patriarch, if the subsequent generations be correct, to survive the Flood 14 years. In the postdiluvian numbers of the LXX. we must, as previously shown, reject the Second Cainan from the preponderance of evidence against its genuineness. [CAINAN.] Of the two forms of Nahor's generation in the LXX. we must prefer 79, as more consistent with the numbers near it, and as also found in the Sam. An important correction of the next generation has been suggested in all the lists. According to them it would appear that Terah was 70 yrs. old at Abram's birth. "Terah lived seventy years, and begat Abram, Nahor, and Haran" (Gen. xi. 26). It is afterwards said that Terah went from Ur of the Chaldees to Haran and died there at the age of 205 yrs. (145 Sam.) (vv. 31, 32), and the departure of Abram from Haran to Canaan is then narrated (comp. Acts vii. 4), his age being stated to have been at that time 75 yrs. (vii. 1-5). Usher therefore conjectures that Terah was 130 yrs. old at Abram's birth (205—75=130) and supposes the latter not to have been the eldest son but mentioned first on account of his eminence, as is Shem in several places (v. 32, vi. 10, vii. 13, ix. 18, x. 1), who yet appears to have been the third son of Noah and certainly not the eldest (x. 21, and arrangement of chap.). There is, however, a serious objection in the way of this supposition. It seems scarcely probable that if Abram had been born to his father at the age of 130 years, he should have asked in wonder "Shall [a child] be born unto him that is an hundred years old? and shall Sarah, that is ninety years old, bear?" (Gen. xvii. 17.) Thus to suit a single number, that of Terah's age at his death, where the Sam. does not agree with the Heb. and LXX., a hypothesis is adopted that at least strains the consistency of the narrative. We should rather suppose the number might have been changed by a copyist, and take the 145 yrs. of the Sam.—It has been generally supposed that the Dispersion took place in the days of Peleg, on account of what is said in Gen. x. as to him: [of the two sons of Eber] "the name of one [was] Peleg ( $\text{פֶּלֶג}$ , division), for in his days was the earth divided" ( $\text{וַיִּפְּרֹץ}$ , 25) It cannot be positively affirmed that the "Dispersion"

spoken of in Gen. xi. is here meant, since a physical catastrophe might be intended, although the former is perhaps the more natural inference. The event, whatever it was, must have happened at Peleg's birth, rather than, as some have supposed, at a later time in his life, for the easterns have always given names to children at birth, as may be noticed in the cases of Jacob and his sons.—We should therefore consider the following as the best forms of the numbers according to the three sources.

	LXX.	Heb.	Sam.
Creation -----	0	0	0
Flood (occupying chief part of this year) -----	2262	1656	1207
Birth of Peleg -----	401	101	401
Departure of Abram from Haran -----	616	966	616
	2870	2623	2224

B. Second Period, from Abram's departure from Haran to the Exodus.—The length of this period is stated by St. Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first event being held to be that recorded in Gen. xii. 1-5. The same number of years is given in Ex., where the Heb. reads—"Now the sojourning of the children of Israel who dwelt in Egypt [was] four hundred and thirty years. And it came to pass at the end of the four hundred and thirty years, even the selfsame day it came to pass, that all the hosts of the Lord went out from the land of Egypt" (xii. 40, 41). Here the LXX. and Sam. add after "in Egypt" the words "and in Canaan," while the Alex. and other MSS. of the former also add after "the children of Israel" the words "and their fathers." It seems most reasonable to regard both these additions as glosses; if they are excluded, the passage appears to make the duration of the sojourn in Egypt 430 years, but this is not an absolutely certain conclusion. The "sojourning" might well include the period after the promise to Abraham while that patriarch and his descendants "sojourned in the land of promise as [in] a strange country" (Heb. xi. 9), for it is not positively said "the sojourning of the children of Israel in Egypt," but we may read "who dwelt in Egypt." As for the very day of close being that of commencement it might refer either to Abraham's entrance, or to the time of the promise. A third passage, occurring in the same essential form in both Testaments, and therefore especially satisfactory as to its textual accuracy, throws light upon the explanation we have offered of this last, since it is impossible to understand it except upon analogical principles. It is the divine declaration to Abraham of the future history of his children:—"Know of a surety that thy seed shall be a stranger in a land [that is] not theirs, and shall serve them; and they shall afflict them four hundred years; and also that nation, whom they shall serve, will I judge: and afterward shall they come out with great substance" (Gen. xv. 13, 14; comp. Acts vii. 6, 7). The four hundred years cannot be held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. This reading, which in the A. V. requires no more than a slight change in the punctuation, if it suppose an unusual construction in Hebrew, is perfectly admissible according to the principles of Semitic grammar, and might be used in Arabic. It is also noticeable that after the citation given above the events of the

whole sojourn are repeated, showing that this was the period spoken of, and perhaps, therefore, the period defined (15, 16). The meaning of the "fourth generation" here mentioned has been previously considered. It cannot, therefore, be held that the statement of St. Paul that from the promise to Abraham until the Exodus was 430 years is irreconcilable with the two other statements of the same kind. In order to arrive at as certain a conclusion as may be attainable we must examine the evidence we have for the details of this interval. First, however, it will be necessary to form a distinct opinion as to the length of life of the patriarchs of this age. The biblical narrative plainly ascribes to them lives far longer than what is held to be the present extreme limit, and we must therefore carefully consider the evidence upon which the general correctness of the numbers rests, and any independent evidence as to the length of life at this time. The statements in the Bible regarding longevity may be separated into two classes, those given in genealogical lists and those interwoven with the relation of events. To the former class virtually belong all the statements relating to the longevity of the patriarchs before Abraham, to the latter nearly all relating to that of Abraham and his descendants. In the case of the one we cannot arrive at certainty as to the original form of the text, as already shown, but the other rests upon a very different kind of evidence. The statements as to the length of the lives of Abraham and his nearer descendants, and some of his later, are so closely interwoven with the historical narrative, not alone in form, but in sense, that their general truth and its cannot be separated. Abraham's age at the birth of Isaac is a great fact in his history, equally attested in the Old Testament and in the New. Again, the longevity ascribed to Jacob is confirmed by the question of Pharaoh, and the patriarch's remarkable answer, in which he makes his then age of 130 years less than the years of his ancestors (Gen. xlvii. 9), a minute point of agreement with the other chronological statements to be especially noted. At a later time the age of Moses is attested by various statements in the Pentateuch, and in the N. T. on St. Stephen's authority, though it is to be observed that the mention of his having retained his strength to the end of his 120 years (Deut. xxxiv. 7), is perhaps indicative of an unusual longevity. In the earlier part of the period following, we notice similar instances in the case of Joshua, and, inferentially, in that of Othniel. Nothing in the Bible could be cited against this evidence, except it be the common explanation of Ps. xc. (esp. vs. 10), combined with its ascription to Moses (*title*). The title cannot, analogically, be considered a very sure guide, but the style and contents seem to us to support it. It may be questioned, however, whether the general shortness of man's life forms the subject of this psalm. A shortness of life is lamented as the result of God's anger, and inferentially, as under his wrath, and prayer is made for a happier condition. Nothing could be more applicable to the shortening of life in the desert in order that none who were twenty years old and upwards at the Exodus should enter the Land of Promise. With these the ordinary term of life would be threescore years and ten, or fourscore years. If, therefore, we ascribe the psalm to Moses we cannot be certain that it gives the average of long life at his time independently of the peculiar circumstances of the wan-

dering in the desert. Thus it is evident that the two classes of statements in the Bible bearing on longevity stand upon a very different basis. It must be observed that all the supposed famous modern instances of great longevity, as those of Parr, Jackson, and the old Countess of Desmond, have utterly broken down on examination, and that the registers of this country *prove* no greater extreme than about 110 years. We have recently had the good fortune to discover some independent contemporary evidence bearing upon this matter. There is an Egyptian hieratic papyrus in the Bibliothèque at Paris bearing a moral discourse by one P'tah-hotp, apparently eldest son of Assa (B.C. cir. 1910-1860), the fifth king of the Fifteenth Dynasty, which was of Shepherds [EGYPT]. At the conclusion P'tah-hotp thus speaks of himself:—"I have become an elder on the earth (or in the land); I have traversed a hundred and ten years of life by the gift of the king and the approval of the elders, fulfilling my duty towards the king in the place of favour (or blessing)."—*Facsimile d'un Papyrus Égyptien*, par E. Prisse d'Avennes, pl. xix., lines 7, 8). The natural inferences from this passage are that P'tah-hotp wrote in the full possession of his mental faculties at the age of 110 years, and that his father was still reigning at the time, and, therefore, had attained the age of about 130 years, or more. The analogy of all other documents of the kind known to us does not permit a different conclusion. That P'tah-hotp was the son of Assa is probable from inscriptions in tombs at Memphis; that he was a king's eldest son is expressly stated by himself (*Facsimile*, &c., pl. v., lines 6, 7). Yet he had not succeeded his father at the time of his writing, nor does he mention that sovereign as dead. The reigns assigned by Manetho to the Shepherd-Kings of this dynasty seem indicative of a greater age than that of the Egyptian sovereigns (Cory's *Ancient Fragments*, 2nd ed., pp. 114, 136). It has been suggested to us by Mr. Goodwin that 110 years may be a vague term, meaning "a very long life;" it seems to be so used in papyri of a later time (B.C. cir. 1200). We rarely thus employ the term centenarian, more commonly employing sexagenarian and octogenarian, and this term is therefore indicative of a greater longevity than ours among the Egyptians. If the 110 years of P'tah-hotp be vague, we must still suppose him to have attained to an extreme old age during his father's lifetime, so that we can scarcely reduce the numbers 110 and about 130 more than ten years respectively. This Egyptian document is of the time of the Fifteenth Dynasty, and of so realistic and circumstantial a character in its historical bearings that the facts it states admit of no dispute. Other records tend to confirm the inferences we have here drawn. It seems, however, probable, that such instances of longevity were exceptional, and perhaps more usual among the foreign settlers in Egypt than the natives, and we have no ground for considering that the length of generations was then generally different from what it now is. For these reasons we find no difficulty in accepting the statements as to the longevity of Abraham and certain of his descendants,

\* Bunsen reckons Abraham's yr. 75 as 1, and yr. 100 as 25, and makes the sum of this interval from the numbers 215 (*Egypt's Place*, i. p. 180). This is inaccurate, since if 75 = 1, then 100 = 26, and the interval is 216.

† Bunsen ridicules Dr. Baumgarten of Kiel for sup-

and can go on to examine the details of the period under consideration as made out from evidence requiring this admission. The narrative affords the following data which we place under two periods—1. that from Abram's leaving Haran to Jacob's entering Egypt, and 2. that from Jacob's entering Egypt to the Exodus.

1. Age of Abram on leaving Haran	75 yrs.
— at Isaac's birth	100
Age of Isaac at Jacob's birth	60
Age of Jacob on entering Egypt	130
	216 or 215 yrs.*
2. Age of Levi on entering Egypt	ent. 45
Residue of his life	92
Oppression after the death of Jacob's sons (Ex. i. 6, 7, seqq.).	
Age of Moses at Exodus	80
	172
Age of Joseph in the same year	39
Residue of his life	71
Age of Moses at Exodus	80
	151

These data make up about 387 or 388 years, to which it is reasonable to make some addition, since it appears that all Joseph's generation died before the oppression commenced, and it is probable that it had begun some time before the birth of Moses. The sum we thus obtain cannot be far different from 430 years, a period for the whole sojourn that these data must thus be held to confirm. The genealogies relating to the time of the dwelling in Egypt, if continuous, which there is much reason to suppose some to be, are not repugnant to this scheme; but on the other hand, one alone of them, that of Joshua, in 1 Chr. (vii. 23, 25, 26, 27) if a *succession*, can be reconciled with the opinion that dates the 430 years from Jacob's entering into Egypt. The historical evidence should be carefully weighed. Its chief point is the increase of the Israelites from the few souls who went with Jacob into Egypt, and Joseph and his sons, to the six hundred thousand men who came out at the Exodus. At the former date the following are enumerated—"besides Jacob's sons' wives," Jacob, his twelve sons and one daughter (13), his fifty-one grandsons and one granddaughter (52), and his four great-grandsons, making, with the patriarch himself, seventy souls (Gen. xli. 8-27). The generation to which children would be born about this date may thus be held to have been of at least 51 pairs,† since all are males except one, who most probably married a cousin. This computation takes no account of polygamy, which was certainly practised at the time by the Hebrews. This first generation must, except there were at the time other female grandchildren of Jacob besides the one mentioned (comp. Gen. xlii. 7), have taken foreign wives, and it is reasonable to suppose the same to have been constantly done afterwards, though probably in a less degree. We cannot therefore found our calculation solely on these 51 pairs, but must allow for polygamy and foreign marriages. These admissions

posing a residue of 56 pairs from 70 souls. "This remainder of 56 pair out of 70 souls puts us very much in mind of Falstaff's mode of reckoning" (*Egypt's Place*, i. p. 178). Had the critic read Gen. xlii. he would not have made this extraordinary mistake, and allowed only three wives to 67 men.

being made, and the especial blessing which attended the people borne in mind, the interval of about 215 years does not seem too short for the increase. On the whole, we have no hesitation in accepting the 430 years as the length of the interval from Abram's leaving Haran to the Exodus.

C. Third Period, from the Exodus to the Foundation of Solomon's Temple.—There is but one passage from which we obtain the length of this period as a whole. It is that in which the Foundation of the Temple is dated in the 480th (Heb.), or 440th (LXX.) year after the Exodus, in the 4th yr. 2nd m. of Solomon's reign (1 K. vi. 1). Subtracting from 480 or 440 yrs. the first three yrs. of Solomon and the 40 of David, we obtain  $(480 - 43 =)$  437 or  $(440 - 43 =)$  397 yrs. These results we have first to compare with the detached numbers. These are as follows:—A. From Exodus to death of Moses, 40 yrs. B. Leadership of Joshua, 7+ $x$  yrs. C. Interval between Joshua's death and the First Servitude  $x$  yrs. D. Servitude and rule of Judges until Eli's death, 430 yrs. E. Period from Eli's death to Saul's accession, 20+ $x$  yrs. F. Saul's reign, 40 yrs. G. David's reign, 40 yrs. H. Solomon's reign to Foundation of Temple, 3 yrs. Sum,  $3x + 580$  yrs. It is possible to obtain approximately the length of the three wanting numbers. Joshua's age at the Exodus was 20 or 20+ $x$  yrs. (Num. xiv. 29, 30), and at his death, 110; therefore the utmost length of his rule must be  $(110 - 20 + 40 =)$  50 yrs. After Joshua there is the time of the Elders who overlived him, then a period of disobedience and idolatry, a servitude of 8 yrs., deliverance by Othniel the son of Kenaz, the nephew of Caleb, and rest for 40 yrs. until Othniel's death. The duration of Joshua's government is limited by the circumstance that Caleb's lot was apporportioned to him in the 7th year of the occupation, and therefore of Joshua's rule, when he was 85 yrs. old, and that he conquered the lot after Joshua's death. Caleb cannot be supposed to have been a very old man on taking his portion, and it is unlikely that he would have waited long before attacking the heathen who held it, to say nothing of the portion being his claimed reward for not having feared the Anakim who dwelt there, a reward promised him of the Lord by Moses and claimed of Joshua, who alone of his fellow-spies had shown the same faith and courage (Num. xiv. 24; Deut. i. 36; Josh. xiv. 6 *ad fin.*, xv. 13-19; Judg. i. 9-15, 20). If we suppose that Caleb set out to conquer his lot about 7 years after its apportionment, then Joshua's rule would be about 13 yrs., and he would have been a little older than Caleb. The interval between Joshua's death and the First Servitude is limited by the history of Othniel. He was already a warrior when Caleb conquered his lot; he lived to deliver Israel from the Mesopotamian oppressor, and died at the end of the subsequent 40 yrs. of rest. Supposing Othniel to have been 30 yrs. old when Caleb set out, and 110 yrs. at his death, 32 yrs. would remain for the interval in question. The rule of Joshua may be therefore reckoned to have been about 13 yrs., and the subsequent interval to the First Servitude about 32 yrs., altogether 47 yrs. These numbers cannot be considered exact; but they can hardly be far wrong, more especially the sum. The residue of Samuel's judgeship after the 20 yrs. from Eli's death until the solemn fast and victory at Mizpeh, can scarcely have much exceeded 20 yrs. Samuel must have been still young at the time of Eli's death, and he died very near the close of Saul's reign (1 Sam.

xxv. 1, xxviii. 3). If he were 10 yrs. old at the former date, and judged for 20 yrs. after the victory at Mizpeh, he would have been near 90 yrs. old  $(10? + 20 + 20? + 38?)$  at his death, which appears to have been a long period of life at that time. If we thus suppose the three uncertain intervals, the residue of Joshua's rule, the time after his death to the First Servitude, and Samuel's rule after the victory at Mizpeh to have been respectively 6, 32, and 20 yrs., the sum of the whole period will be  $(580 + 58 =)$  638 yrs. Two independent large numbers seem to confirm this result. One is in St. Paul's address at Antioch of Pisidia, where, after speaking of the Exodus and the 40 yrs. in the desert, he adds: "And when he had destroyed seven nations in the land of Chanaan, he divided their land unto them by lot. And after that he gave [unto them] judges about the space of four hundred and fifty years, until Samuel the prophet. And afterward they desired a king" (Acts xiii. 19, 20, 21). This interval of 450 yrs. may be variously explained, as commencing with Othniel's deliverance and ending with Eli's death, a period which the numbers of the earlier books of the Bible, if added together, make 422 yrs., or as commencing with the First Servitude, 8 yrs. more, 430 yrs., or with Joshua's death, which would raise these numbers by about 30 yrs., or again it may be held to end at Saul's accession, which would raise the numbers given respectively by about 40 yrs. However explained, this sum of 450 yrs. supports the authority of the smaller numbers as forming an essentially correct measure of the period. The other large number occurs in Jephthah's message to the king of the Children of Ammon, where the period during which Israel had held the land of the Amorites from the first conquest either up to the beginning of the Servitude from which they were about to be freed, or up to the very time, is given as 300 yrs. (Judg. xi. 26). The smaller numbers, with the addition of 38 yrs. for two uncertain periods, would make these intervals respectively 346 and 364 yrs. Here, therefore, there appears to be another agreement with the smaller numbers, although it does not amount to a positive agreement, since the meaning might be either three centuries, as a vague sum, or about 300 yrs. So far as the evidence of the numbers goes, we must decide in favour of the longer interval from the Exodus to the building of the First Temple, in preference to the period of 480 or 440 yrs. The evidence of the genealogies has been held by some to sustain a different conclusion. These lists, as they now stand, would, if of continuous generations, be decidedly in favour of an interval of about 300, 400, or even 500 years, some being much shorter than others. It is, however, impossible to reduce them to consistency with each other without arbitrarily altering some, and the result with those who have followed them as the safest guides has been the adoption of the shortest of the numbers just given, about 300 yrs.\* The evidence of the genealogies may therefore be considered as probably leading to the rejection of all numerical statements, but as perhaps less inconsistent with that of 480 or 440 yrs. than with the rest. We have already shown (*Technical Chronology*) what strong reasons there are against using the

\* Both Bunsen (*Egypt's Place*, i. pp. 176, 7) and Lepsius (*Chron. d. Aeg.* i. p. 369) suppose the genealogy of Shual the son of Uziah the Levite (1 Chr. vi. 22-24, comp. 33-38) to be that of Saul the king of Israel, an almost unaccountable mistake.

Hebrew genealogies to measure time. We prefer to hold to the evidence of the numbers, and to take as the most satisfactory the interval of about 638 yrs. from the Exodus to the Foundation of Solomon's Temple.

D. Fourth Period, from the Foundation of Solomon's Temple to its Destruction.—We have now reached a period in which the differences of chronologies are no longer to be measured by centuries but by tens of years and even single years, and towards the close of which accuracy is attainable. The most important numbers in the Bible are generally stated more than once, and several means are afforded by which their accuracy can be tested. The principal of these tests are the statements of kings' ages at their accessions, the double dating of the accessions of kings of Judah in the reigns of kings of Israel and the converse, and the double reckoning by the years of kings of Judah and of Nebuchadnezzar. Of these tests the most valuable is the second, which extends through the greater part of the period under consideration, and prevents our making any very serious error in computing its length. The mentions of kings of Egypt and Assyria contemporary with Hebrew sovereigns are also of importance, and are likely to be more so, when, as we may expect, the chronological places of all these contemporaries are more nearly determined. All records therefore tending to fix the chronologies of Egypt and Assyria, as well as of Babylon, are of great value from their bearing on Hebrew chronology. At present the most important of such records is Ptolemy's Canon, from which no sound chronologist will venture to deviate. If all the Biblical evidence is carefully collected and compared it will be found that some small and great inconsistencies necessitate certain changes of the numbers. The amount of the former class has however been much exaggerated, since several supposed inconsistencies depend upon the non-recognition of the mode of reckoning regnal years, from the commencement of the year and not from the day of the king's accession. The greater difficulties and some of the smaller cannot be resolved without the supposition that numbers have been altered by copyists. In these cases our only resource is to propose an emendation. We must never take refuge in the idea of an interregnum, since it is a much more violent hypothesis, considering the facts of the history, than the conjectural change of a number. Two interregnums have however been supposed, one of 11 yrs. between Jeroboam II. and Zachariah, and the other, of 9 yrs. between Pekah and Hoshea. The former supposition might seem to receive some support from the words of the prophet Hosea (x. 3, 7, and perhaps 15), which however may as well imply a lax government, and the great power of the Israelite princes and captains, as an absolute anarchy, and we must remember the improbability of a powerful sovereign not having been at once succeeded by his son, and of the people having been content

to remain for some years without a king. It is still more unlikely that in Hoshea's case a king's murderer should have been able to take his place after an interval of 9 yrs. We prefer in both cases to suppose a longer reign of the earlier of the two kings between whom the interregnums are conjectured. With the exception of these two interregnums, we would accept the computation of the interval we are now considering given in the margin of the A. V. It must be added, that the date of the conclusion of this period there given B.C. 588\* must be corrected to 586. The received chronology as to its intervals cannot indeed be held to be beyond question in the time before Josiah's accession up to the Foundation of the Temple, but we cannot at present attain any better positive result than that we have accepted. The whole period may therefore be held to be of about 425 yrs., that of the undivided kingdom 120 yrs., that of the kingdom of Judah about 388 yrs., and that of the kingdom of Israel about 255 yrs. It is scarcely possible that these numbers can be more than a very few years wrong, if at all. (For a fuller treatment of the chronology of the kings, see ISRAEL, KINGDOM OF, and JUDAH, KINGDOM OF.)

E. Fifth Period, from the Destruction of Solomon's Temple to the Return from the Babylonish Captivity.—The determination of the length of this period depends upon the date of the return to Palestine. The decree of Cyrus leading to that event was made in the 1st year of his reign, doubtless at Babylon (Ezr. i. 1), B.C. 538, but it does not seem certain that the Jews at once returned. So great a migration must have occupied much time, and about two or three yrs. would not seem too long an interval for its complete accomplishment after the promulgation of the decree. Two numbers, held by some to be identical, must here be considered. One is the period of 70 yrs., during which the tyranny of Babylon over Palestine and the East generally was to last, prophesied by Jeremiah (xxv.), and the other, the 70 yrs. captivity (xxix. 10; 2 Chr. xxxvi. 21; Dan. ix. 2). The commencement of the former period is plainly the 1st year of Nebuchadnezzar and 4th of Jehoiakim (Jer. xxv. 1), when the successes of the king of Babylon began (xli. 2), and the miseries of Jerusalem (xxv. 29)<sup>f</sup> and the conclusion, the fall of Babylon (ver. 26). Ptolemy's Canon counts from the accession of Nebuchadnezzar to that of Cyrus 66 yrs., a number sufficiently near to the round sum of 70, which may indeed, if the yrs. be of 360 days (*Year*) represent at the utmost no more than about 69 tropical yrs. The famous 70 years of captivity would seem to be the same period as this, since it was to terminate with the return of the captives (Jer. xxix. 10). The two passages in Zech., which speak of such an interval as one of desolation (i. 12), and during which fasts connected with the last captivity had been kept (vii. 5), are not irreconcilable with this explanation: a famous

<sup>f</sup> In the book of Daniel (i. 1) the 3rd year of Jehoiakim is given instead of the 4th, which may be accounted for by the circumstance that the Babylonian year commenced earlier than the Hebrew, so that Nebuchadnezzar's 1st would commence in Jehoiakim's 3rd, and be current in his 4th. In other books of the Bible the years of Babylonian kings seem to be generally Hebrew current years. Two other difficulties may be noticed. The 18th year of Nebuchadnezzar in Jer. lii. 29 seems to be for the 19th. The

difficulty of the 37th year of Jehoiachin's captivity, 12g. 25d. (Jer.), or 27 (2 K.), falling according to the rendering of the A. V. in the 1st year of Evil-Merodach (Jer. lii. 31; 2 K. xxv. 27), may be explained, as Dr. Hincks suggests, either by supposing the Heb., "in the year when he was king," to mean that he reigned but one year instead of two, as in the canon, or that Evil-Merodach is not the Iluadadmus of the canon (*Journ. Sac. Lit.* Oct. 1856).

past period might be spoken of, as the moderns speak of the Thirty Years War. These two passages are; it must be noticed, of different dates, the first of the 2nd year of Darius Hystaspis, the second of the 4th year.—This period we consider to be of  $48+x$  yrs., the doubtful number being the time of the reign of Cyrus before the return to Jerusalem, probably a space of about two or three years.

*Principal systems of Biblical Chronology.*—Upon the data we have considered three principal systems of Biblical Chronology have been founded, which may be termed the Long System, the Short, and the Rabbinical. There is a fourth, which, although an offshoot in part of the last, can scarcely be termed biblical, inasmuch as it depends for the most part upon theories, not only independent of, but repugnant to the Bible: this last is at present peculiar to Baron Bunsen. Before noticing these systems it is desirable to point out some characteristics of those who have supported them, which may serve to aid our judgment in seeing how far they are trustworthy guides. All, or almost all, have erred on the side of claiming for their results a greater accuracy than the nature of the evidence upon which they rested rendered possible. Another failing of these chronologers is a tendency to accept, through a kind of false analogy, long or short numbers and computations for intervals, rather accounting as they have adopted the long or the short reckoning of the patriarchal genealogies than on a consideration of special evidence. It is as though they were resolved to make the sum as great or as small as possible. The Rabbinists have in their chronology afforded the strongest example of this error, having so shortened the intervals, as even egregiously to throw out the dates of the time of the Persian

rule. The German school is here an exception, for it has generally fallen into an opposite extreme and required a far greater time than any derivable from the Biblical numbers for the earlier ages, while taking the Rabbinical date of the Exodus, and so has put two portions of its chronology in violent contrast. We do not lay much stress upon the opinions of the early Christian writers, or even Josephus: their method was uncritical, and they accepted the numbers best known to them without any feeling of doubt. We shall therefore confine ourselves to the moderns.

The principal advocates of the Long Chronology are Jackson, Hales, and Des-Vignoles. They take the LXX. for the patriarchal generations, and adopt the long interval from the Exodus to the Foundation of Solomon's Temple. The Short Chronology has had a multitude of illustrious supporters owing to its having been from Jerome's time the recognised system of the West. Ussher may be considered as its most able advocate. He follows the Heb. in the patriarchal generations, and takes the 480 yrs. from the Exodus to the Foundation of Solomon's Temple. The Rabbinical Chronology has lately come into much notice from its partial reception, chiefly by the German school. It accepts the biblical numbers, but makes the most arbitrary corrections. For the date of the Exodus it has been virtually accepted by Bunsen, Lepsius, and Lord A. Hervey. The system of Bunsen we have been compelled to constitute a fourth class of itself. For the time before the Exodus he discards all biblical chronological data, and reasons altogether, as it appears to us, on philological considerations. The following table exhibits the principal dates according to five writers.

	Hales.	Jackson.	Ussher.	Petavius.	Bunsen.
	B.C.	B.C.	B.C.	B.C.	B.C.
Creation . . . . .	5411	5426	4004	3083	(Adam) cir. 20,000
Flood . . . . .	3155	3170	2348	2327	(Noah) cir. 10,000
Abram leaves Haran . . . . .	2078	2023	1921	1961	
Exodus . . . . .	1648	1593	1491	1531	1320
Foundation of Solomon's Temple . . . . .	1027	1014	1012	1012	1004
Destruction of " " . . . . .	586	586	588	589	586

The principal disagreements of these chronologers, besides those already indicated, must be noticed. In the post-diluvian period Hales rejects the Second Cainan and reckons Terah's age at Abram's birth 130 instead of 70 years; Jackson accepts the Second Cainan and does not make any change in the second case; Ussher and Petavius follow the Heb., but the former alters the generation of Terah, while the latter does not. Bunsen requires "for the Noachian period about ten millennia before our era and for the beginning of our race another ten thousand years, or very little more" (*Outlines*, vol. ii. p. 12). These conclusions necessitate the abandonment of all belief in the historical character of the biblical account of the times before Abraham. We cannot here discuss the grounds upon which they seem to be founded: it may be stated, however, that these grounds may be considered to be wholly philological. The writer does indeed speak of "facts and traditions:" his facts, however, as far as we can perceive, are the results of a theory of language, and tradition is, from its nature, no guide in chronology. How far language can be taken as a guide is a very hard

question. It is, however, certain that no Semitic scholar has accepted Bunsen's theory. For the time from the Exodus to the Foundation of Solomon's Temple, Ussher alone takes the 480 yrs.; the rest, except Bunsen, adopt longer periods according to their explanations of the other numbers of this interval; but Bunsen calculates by generations. We have already seen the great risk that is run in adopting Hebrew genealogies for the measure of time, both generally and in this case. The period of the kings, from the foundation of Solomon's Temple, is very nearly the same in the computations of Jackson, Ussher, and Petavius: Hales lengthens it by supposing an interregnum of 11 yrs. after the death of Amaziah; Bunsen shortens it by reducing the reign of Manasseh from 55 to 45 yrs. The former theory is improbable and uncritical, the latter is merely the result of a supposed necessity, which we shall see has not been proved to exist; it is thus needless, and in its form as uncritical as the other.

*Probable determination of dates and intervals.*—Having thus gone over the biblical data, it only re-

mainly for us to state what we believe to be the most satisfactory scheme of chronology, derived from a comparison of these with foreign data. We shall endeavour to establish on independent evidence, either exactly or approximatively, certain main dates, and shall be content if the numbers we have previously obtained for the intervals between them do not greatly disagree with those thus afforded.

#### 1. Date of the Destruction of Solomon's Temple.

—The Temple was destroyed in the 19th year of Nebuchadnezzar, in the 5th month of the Jewish year (Jer. li. 12, 13; 2 K. xxv. 8, 9). In Ptolemy's Canon, this year is current in the proleptic Julian year, B.C. 586, and the 5th month may be considered as about equal to August of that year.

#### 2. Synchronism of Josiah and Pharaoh Necho.

The death of Josiah can be clearly shown on biblical evidence to have taken place in the 22nd year before that in which the temple was destroyed, that is, in the Jewish year from the spring of B.C. 608 to the spring of 607. Necho's 1st year is proved by the Apis-tablets to have been most probably the Egyptian vague year, Jan. B.C. 609-8, but possibly B.C. 610-9. The expedition in opposing which Josiah fell, cannot be reasonably dated earlier than Necho's 2nd year, B.C. 609-8 or 608-7. It is important to notice that no earlier date of the destruction of the temple than B.C. 586 can be reconciled with the chronology of Necho's reign. We have thus B.C. 608-7 for the last year of Josiah, and 638-7 for that of his accession, the former date falling within the time indicated by the chronology of Necho's reign.

#### 3. Synchronism of Hezekiah and Tirhakah.

Tirhakah is mentioned as an opponent of Sennacherib shortly before the miraculous destruction of his army in, according to the present text, the 14th year of Hezekiah. It has been lately proved from the Apis-tablets that the 1st year of Tirhakah's reign over Egypt was the vague year current in B.C. 689. The 14th year of Hezekiah, according to the received chronology is B.C. 713, and, if we correct it two yrs. on account of the lowering of the date of the destruction of the Temple, B.C. 711. If (Rawlinson's *Herod.* vol. i. p. 479, n. 1) we hold that the expedition dated in Hezekiah's 14th year was different from that which ended in the destruction of the Assyrian army, we must still place the latter event before B.C. 695. There is, therefore, a *prima facie* discrepancy of at least 6 yrs. Bunsen (*Bibelwerk*, i. p. cxcvi.) unhesitatingly reduces the reign of Manasseh from 55 to 45 yrs. Lepsius (*Ägyptische Buch*, p. 104) more critically takes the 35 yrs. of the LXX. as the true duration. Were an alteration demanded, it would seem best to make Manasseh's computation of his reign commence with his father's illness in preference to taking the conjectural number 45 or the very short one 35. The evidence of the chronology of the Assyrian and Babylonian kings is, however, we think, conclusive in favour of the sum of 55. In the Bible we are told that Shalmaneser laid siege to Samaria in the 4th year of Hezekiah, and that it was taken in the 6th year of that king (2 K. xviii. 9, 10). The Assyrian inscriptions indicate the taking of the city by Sargon in his 1st or 2nd year, whence we must suppose either that he completed the enterprise of Shalmaneser, to whom the capture is not expressly ascribed in the Scriptures, or that he took the credit of an event which happened just before

his accession. The 1st year of Sargon is shown by the inscriptions to have been exactly or nearly equal to the 1st of Merodach-Baladan, Mardocempadus: therefore it was current B.C. 721 or 720, and the 2nd year, 720 or 719. This would place Hezekiah's accession B.C. 726, 725, or 724, the 3rd being the very date the Hebrew numbers give. Again, Merodach-Baladan sent messengers to Hezekiah immediately after his sickness, and therefore in about his 15th year B.C. 710. According to Ptolemy's Canon, Mardocempadus reigned 721-710, and, according to Berossus, seized the regal power for 6 months before Elibus, the Belibus of the Canon, and therefore in about 703, this being, no doubt, a second reign. Here the preponderance of evidence is in favour of the earlier dates of Hezekiah. Thus far the chronological data of Egypt and Assyria appear to clash in a manner that seems at first sight to present a hopeless knot, but not on this account to be rashly cut. An examination of the facts of the history has afforded Dr. Hincks what we believe to be the true explanation. Tirhakah, he observes, is not explicitly termed Pharaoh or king of Egypt in the Bible, but king of Cush or Ethiopia, from which it might be inferred that at the time of Sennacherib's disastrous invasion he had not assumed the crown of Egypt. The Assyrian inscriptions of Sennacherib mention kings of Egypt and a contemporary king of Ethiopia in alliance with them. The history of Egypt at the time, obtained by a comparison of the evidence of Herodotus and others with that of Manetho's lists, would lead to the same or a similar conclusion, which appears to be remarkably confirmed by the prophecies of Isaiah. We hold, therefore, as most probable, that, at the time of Sennacherib's disastrous expedition, Tirhakah was king of Ethiopia in alliance with the king or kings of Egypt. It only remains to ascertain what evidence there is for the date of this expedition. First it must be noted that the warlike operations of Sennacherib recorded in the Bible have been conjectured, as already mentioned, to be those of two expeditions. The fine paid by Hezekiah is recorded in the inscriptions as a result of an expedition of Sennacherib's 3rd year, which, by a comparison of Ptolemy's Canon with Berossus, must be dated B.C. 700, which would fall so near the close of the reign of the king of Judah, if no alteration be made, that the supposed second expedition, of which there would naturally be no record in the Assyrian annals on account of its calamitous end, could not be placed much later. The biblical account would, however, be most reasonably explained by the supposition that the two expeditions were but two campaigns of the same war, a war but temporarily interrupted by Hezekiah's submission. Since the first expedition fell in B.C. 700, we have not to suppose that the reign of Tirhakah in Ethiopia commenced more than 11 yrs. at the utmost before his accession in Egypt, a supposition which, on the whole, is far preferable to the dislocating attempts that have been made to lower the reign of Hezekiah. This would, however, necessitate a substitution of a later date in the place of the 14th year of Hezekiah for the first expedition. (See especially Dr. Hincks's paper "On the Rectifications of Sacred and Profane Chronology, which the newly-discovered Apis-steles render necessary," in the *Journal of Sacred Literature*, Oct. 1858; and Rawlinson's *Herod.* i. pp. 478-480). The synchronisms of Hoshea and Shalmaneser,

Pekah and Tiglath-Pileser, Menahem and Pul, have not yet been approximatively determined on double evidence.

4. *Synchronism of Rehoboam and Shishak.*—The biblical evidence for this synchronism is as follows: Rehoboam appears to have come to the throne about 249 yrs. before the accession of Hezekiah, and therefore B.C. cir. 973. The invasion of Shishak took place in his 5th year, by this computation, 969. Shishak was already on the throne when Jeroboam fled to him from Solomon. This event happened during the building of Millo, &c., when Jeroboam was head of the workmen of the house of Joseph (1 K. xi. 26-40, see esp. ver. 29). The building of Millo and repairing of the breaches of the city of David was after the building of the house of Pharaoh's daughter, that was constructed about the same time as Solomon's house, the completion of which is dated in his 23rd year (1 K. vi. 1, 37, 38, vii. 1; 2 Chr. viii. 1). This building is recorded after the occurrences of the 24th year of Solomon, for Pharaoh's daughter remained in Jerusalem until the king had ended building his own house, and the temple, and the wall of Jerusalem round about (1 K. iii. 1), and Millo was built after the removal of the queen (ix. 24); therefore, as Jeroboam was concerned in this building of Millo and repairing the breaches, and was met "at that time" (xi. 29) by Ahijah, and in consequence had to flee from the country, the 24th or 25th year is the most probable date. Thus Shishak appears to have come to the throne at least 21 or 22 yrs. before his expedition against Rehoboam. An inscription at the quarries of Silsilis in Upper Egypt records the cutting of stone in the 22nd year of Sheshonk I., or Shishak for constructions in the chief temple of Thebes, where we now find a record of his conquest of Judah (Champollion, *Lettres*, pp. 190, 191). On these grounds we may place the accession of Shishak B.C. cir. 990. The evidence of Manetho's lists, compared with the monuments, would place this event within a few years of this date, for they do not allow us to put it much before or after B.C. 1000, an approach to correctness which at this period is very valuable. It is not possible here to discuss this evidence in detail.

5. *Exodus.*—Arguments founded on independent evidence afford the best means of deciding which is the most probable computation from Biblical evidence of the date of the Exodus. A comparison of the Hebrew calendar with the Egyptian has led the writer to the following result:—The civil commencement of the Hebrew year was with the new-moon nearest to the autumnal equinox; and at the approximative date of the Exodus obtained by the long reckoning, we find that the Egyptian vague year commenced at or about that point of time. This approximative date, therefore, falls about the time at which the vague year and the Hebrew year, as dated from the autumnal equinox, nearly or exactly coincided in their commencements. It may be reasonably supposed that the Israelites in the time of the oppression had made use of the vague year as the common year of the country, which indeed is rendered highly probable by the circumstance that they had mostly adopted the Egyptian religion (Josh. xxiv. 14; Ez. xx. 7, 8), the celebrations of which were kept according to this year. When, therefore, the festivals of the Law rendered a year virtually tropical necessary, of the kind either restored or instituted at the Exodus, it seems most probable

that the current vague year was fixed under Moses. If this supposition be correct, we should expect to find that the 14th day of Abib, on which tell the full-moon of the Passover of the Exodus, corresponds to the 14th day of a Phamenoth, in a vague year commencing about the autumnal equinox. It has been ascertained by computation that a full moon fell on the 14th day of Phamenoth, on Thursday, April 21st, in the year B.C. 1652.\* A full moon would not fall on the same day of the vague year at a shorter interval than 25 yrs. before or after this date, while the triple coincidence of the new moon, vague year, and autumnal equinox could not recur in less than 1500 vague years (*Enc. Brit.* 8th ed. *Egypt*, p. 458). The date thus obtained is but 4 yrs. earlier than Hales's, and the interval from it to that of the Foundation of Solomon's Temple, B.C. cir. 1010, would be about 642 yrs. or 4 yrs. in excess of that previously obtained from the numerical statements in the Bible. It must be borne in mind that the inferences from the celebration of great passovers also led us to about the same time. In later articles we shall show the manner in which the history of Egypt agrees with this conclusion. [EGYPT; EXODUS, TIME.] Setting aside Usher's preference for the 480 yrs., as resting upon evidence far less strong than the longer computation, we must mention the principal reasons urged by Bunsen and Lepsius in support of the Rabbinical date. The reckoning by the genealogies, upon which this date rests, we have already shown to be unsafe. Several points of historical evidence are, however, brought forward by these writers as leading to or confirming this date. Of these the most important is the supposed account of the Exodus given by Manetho, the Egyptian historian, placing the event at about the same time as the Rabbinical date. This narrative, however, is, on the testimony of Josephus, who has preserved it to us, wholly devoid of authority, being, according to Manetho's own showing, a record of uncertain antiquity, and of an unknown writer, and not put of the Egyptian annals. An indication of date has also been supposed in the mention that the name of one of the treasure-cities built for Pharaoh by the Israelites during the oppression, was Rameses (Ex. i. 11), probably the same place as the Rameses elsewhere mentioned, the chief town of a tract so called. [RAMESSES.] This name is the same as that of certain well-known kings of Egypt of the period to which by this scheme the Exodus would be referred. If the story given by Manetho be founded on a true tradition the great oppressor would have been Rameses II., second king of the 19th dynasty, whose reign is variously assigned to the 14th and 13th centuries B.C. It is further urged that the first king Rameses of the Egyptian monuments and Manetho's lists is the grandfather of this king, Rameses I., who was the last sovereign of the 18th dynasty, and reigned at the utmost about 60 yrs. before his grandson. It must, however, be observed, that there is great reason for taking the lower dates of both kings, which would make the reign of the second after the Rabbinical date of the Exodus, and that in this case both Manetho's statement must be of course set aside, as placing the Exodus in the reign of this king's son, and the order of the Biblical narrative must be transposed that

\* T was calculated for the writer at the Royal Observatory, through the kindness of the Astronomer-Royal.—*Horæ Arg.* p. 217.

the building of Raameses should not fall before the accession of Raameses I. The argument that there was no king Raameses before Raameses I. is obviously weak as a negative one, more especially as the names of very many kings of Egypt, particularly those of the period to which we assign the Exodus, are wanting. It loses almost all its force when we find that a son of Aahmes, Amosis, the head of the 18th dynasty, variously assigned to the 17th and 16th centuries B.C. bore the name of Raameses, which name from its meaning (son of Ra or the sun, the god of Heliopolis, one of the eight great gods of Egypt) would almost necessarily be a not very uncommon one, and Raameses might therefore have been named from an earlier king or prince bearing the name long before Raameses I. The history of Egypt presents great difficulties to the reception of the theory together with the Biblical narrative, difficulties so great that we think they could only be removed by abandoning a belief in the historical character of that narrative: if so, it is obviously futile to found an argument upon a minute point, the occurrence of a single name. The historical difficulties on the Hebrew side in the period after the Exodus are not less serious, and have induced Bunsen to antedate Moses' war beyond Jordan, and to compress Joshua's rule into the 40 yrs. in the wilderness (*Bibelwerk*, pp. cccxxviii, ix), and so, we venture to think, to forfeit his right to reason on the details of the narrative relating to the earlier period. This compression arises from the want of space for the Judges. The chronology of events so obtained is also open to the objection brought against the longer schemes, that the Israelites could not have been in Palestine during the campaigns in the East of the Pharaohs of the 18th, 19th, and 20th dynasties, since it does not seem possible to throw those of Raameses III. earlier than Bunsen's date of the beginning of the conquest of western Palestine by the Hebrews. This question, involving that of the policies and relation of Egypt and the Hebrews, will be discussed in later articles. [EGYPT; EXODUS, THE.] We therefore take B.C. 1652 as the most satisfactory date of the Exodus (see Duke of Northumberland's paper in Wilkinson's *Anc. Eg.* i. pp. 77-81; Bunsen, *Bibelwerk*, i. pp. cccxi-cxxii, cccxiii, seqq.; Lepsius, *Chronologie der Aegypter*, i. pp. 314, seqq.)

6. *Date of the Commencement of the 430 year of Sojourn.*—We have already given our reasons for holding the 430 years of Sojourn to have commenced when Abraham entered Palestine, and that it does not seem certain that the Exodus was the anniversary of the day of arrival. It is reasonable, however, to hold that the interval was of 430 complete years or a little more, commencing about the time of the vernal equinox, B.C. 2082, or nearer the beginning of that proleptic Julian year. Before this date we cannot attempt to obtain anything beyond an approximate chronology.

7. *Date of the Dispersion.*—Taking the LXX. numbers as most probable, the Dispersion, if coincident with the birth of Peleg, must be placed B.C. cir. 2698, or, if we accept Usher's correction of the age of Terah at the birth of Abraham, cir. 2758.<sup>b</sup> We do not give round numbers, since doing so might needlessly enlarge the limits of error.

8. *Date of the Flood.*—The Flood, as ending

about 401 yrs. before the birth of Peleg, would be placed B.C. cir. 3099 or 3159. The year preceding, or the 402nd, was that mainly occupied by the catastrophe. It is most reasonable to suppose the Noachian colonists to have begun to spread about three centuries after the Flood. If the Division at Peleg's birth be really the same as the Dispersion after the building of the Tower, this supposed interval would not be necessarily to be lengthened, for the text of the account of the building of the Tower does not absolutely prove that all Noah's descendants were concerned in it, and therefore some may have previously taken their departure from the primeval settlement. The chronology of Egypt, derived from the monuments and Manetho, is held by some to indicate for the foundation of its first kingdom a much earlier period than would be consistent with this scheme of approximative biblical dates. The evidence of the monuments, however, does not seem to us to carry back this event earlier than the later part of the 28th century B.C. The Assyrians and Babylonians have not been proved, on satisfactory grounds, to have reckoned back to so remote a time; but the evidence of their monuments, and the fragments of their history preserved by ancient writers, as in the case of the Egyptians, cannot be reconciled with the short interval preferred by Usher. As far as we can learn, no independent historical evidence points to an earlier period than the middle of the 28th century B.C. as the time of the foundation of kingdoms, although the chronology of Egypt reaches to about this period, while that of Babylon and other states does not greatly fall short of the same antiquity.

9. *Date of the Creation of Adam.*—The numbers given by the LXX. for the antediluvian patriarchs would place the creation of Adam 2262 yrs. before the end of the Flood, or B.C. cir. 5361 or 5421. [R. S. P.]

**CHRYsolITE** (*χρυσολίθος*), the precious stone which garnished the seventh foundation of the New Jerusalem in St. John's vision. According to Schleusner, a gem of golden hue, or rather of yellow streaked with green and white. (See Plin. xxvii. 9; Isidor. *Orig.* xvi. 14.) It seems to have been a species of topaz. [W. D.]

**CHRYsOPRASUS** (*χρυσόπρασος*; *chryso-prasus*), an Indian translucent gem, so called as resembling in colour the juice of the leek (*πράσον*), with golden spots (*χρυσός*)—a species of beryl, supposed to be possessed of healing power in diseases of the eyes. The word occurs only once (in Rev. xxi. 20), where it is the tenth of the precious stones with which the walls of the new Jerusalem were garnished. Its spotted character may be inferred from the name given to it by Pliny (*H. N.* xxxvii. c. 8), *pardulios*, from its resembling the leopard-skin (see Braun, *de Vest. Sac. Heb.* ii. c. 9, p. 509). [W. D.]

**CHUB** (כֻּב; *Albes*; *Chub*), a word occurring only once in the Heb., the name of a people in alliance with Egypt in the time of Nebuchadnezzar (Ez. xxx. 5). "Cush, and Phut, and Lud, and all the mingled people (כְּנָעַנִים), and Chub, and the children of the land of the covenant, shall fall

<sup>b</sup> Abraham is said to have been 75 years old when he left Uaran (Gen. xii. 4), but this does not necessarily imply that he had done more than enter upon

his 75th year. (Comp. the case of Noah, vii. 6, 11, 13.) All the dates, therefore, before B.C. 2082, might have to be lowered one year.

by the sword with them" (i. e. no doubt the Egyptians: see ver. 4). The first three of these names or designations are of African peoples, unless, but this is improbable, the Shemite *Lud* be intended by the third (see, however, xxvii. 10, xxxviii. 5; Is. lvi. 19; Jer. xvi. 9); the fourth is of a people on the Egyptian frontier; and the sixth probably applies to the remnant of the Jews who had fled into Egypt (comp. Dan. xi. 28, 30, 32, especially the last, where the covenant is not qualified as "holy"), which was prophesied to perish for the most part by the sword and otherwise in that country (Jer. xlii. 16, 17, 22, xlv. 12, 13, 14, 27, 28). This fifth name is therefore that of a country or people in alliance with Egypt, and probably of northern Africa, or of the lands near Egypt to the south. Some have proposed to recognise Chub in the names of various African places *Kobé*, a port on the Indian Ocean (Ptol. iv. 7, §10), *Xobát* or *Xobád* in Mauritania (iv. 2, §9), and *Kábiaw* or *Kábiou* in the Marotic nome in Egypt (iv. 5)—conjectures which are of no value except as showing the existence of similar names where we might expect this to have had its place. Others, however, think the present Heb. text corrupt in this word. It has been therefore proposed to read *כנני* for *Nubia*, as the Arab. vers. has "the people the Noobeh," whence it might be supposed that at least one copy of the LXX. had *n* as the first letter: one Heb. MS. indeed reads *כנני* (Cod. 409, ap. de Rossi). The Arab. vers. is, however, of very slight weight, and although *כנני* might be the ancient Egyptian form or pronunciation of *כנני*, as Winer observes (s. v.), yet we have no authority of this kind for applying it to Nubia, or rather the Nubae, the countries held by whom from Strabo's time to our own are by the Egyptian inscriptions included in Keesh or Kesh, that is, Cush: the Nubae, however, may not in the prophet's days have been settled in any part of the territory which has taken from them its name. Far better, on the score of probability, is the emendation which Hitzig proposes, *כנני* (*Decript der Kritik*, p. 129). The Lubim, doubtless the Mizraite Lehabim of Gen. x. 13; 1 Chr. i. 11, are mentioned as serving with Cushim in the army of Shishak (2 Chr. xii. 2, 3), and in that of Zerah (xvi. 8, comp. xiv. 9), who was most probably also a king of Egypt, and certainly the leader of an Egyptian army [*CUSH*; *ZEKRAH*]. Nahum speaks of them as helpers of Thebes, together with Put (Phut), while Cush and Egypt were her strength (iii. 8, 9); and Daniel mentions the Lubim and Cushim as submitting to or courting a conqueror of Egypt (xi. 43). The Lubim might therefore well occur among the peoples suffering in the fall of Egypt. There is, however, this objection, that we have no instance of the supposed form *כנני*, the noun being always given in the plural—*לַחֲבִימִים*. In the absence of better evidence we prefer the reading of the present Heb. text, against which little can be urged but that the word occurs nowhere else, although we should rather expect a well-known name in such a passage. [R. S. P.]

**CHUN** (*כֻּנִּי*; *ἐκ τῶν ἐκλεκτῶν πόλεων*; Joseph. *Μάχωνι*; *Chun*. The words of the LXX. look as if they had read Berothai, a word very like which—*בִּרְתַּי*—they frequently render by *ἐκλεκτός*, 1 Chr. xviii. 8. [ΒΕΡΟΘΗΑΙ.]

## CHUSH'AN - RISHATHA'IM

(כֻּשָׁן רִישַׁתַּאִיִּם)

*כֻּשָׁן רִישַׁתַּאִיִּם*; *Χουσαρσθαίμ*; *Chusan Rasathaim*) the king of Mesopotamia who oppressed Israel during eight years in the generation immediately following Joshua (Judg. iii. 8). The seat of his dominion was probably the region between the Euphrates and the *Khabour*, to which the name of Mesopotamia always attached in a special way. In the early cuneiform inscriptions this country appears to be quite distinct from Assyria; it is inhabited by a people called *Nūri*, who are divided into a vast number of petty tribes and offer but little resistance to the Assyrian armies. No centralised monarchy is found, but as none of the *Assyrian* historical inscriptions date earlier than about B.C. 1100, which is some centuries later than the time of Chushan, it is of course quite possible that a very different condition of things may have existed in his day. In the weak and divided state of Western Asia at this time, it was easy for a brave and skilful chief to build up rapidly a vast power, which was apt to crumble away almost as quickly. The case of Solomon is an instance. Chushan-Rishathaim's yoke was broken from the neck of the people of Israel at the end of eight years by Othniel, Caleb's nephew (Judg. iii. 10), and nothing more is heard of Mesopotamia as an aggressive power. The rise of the Assyrian empire, about B.C. 1270, would naturally reduce the bordering nations to insignificance. [G. R.]

**CHU'SI** (*Χούσι*; Alex. *Χουσεί*; Vulg. omits), a place named only in Judith vii. 18, as near Ekrebel, and upon the brook Mochmur. It was doubtless in central Palestine, but all the names appear to be very corrupt, and are not recognisable.

**CHU'ZA** (properly CHUZAS), *Χουζάς*, the *ἐπίτροπος*, or house-steward of Herod (Antipas), whose wife Johanna (*Ἰωάννα*, *יוֹחָנָה*), having been healed by our Lord either of possession by an evil spirit or of a disease, became attached to that body of women who accompanied Him on his journeyings (Luke viii. 3); and, together with Mary Magdalen and Mary the mother [?] of James, having come early to the sepulchre on the morning of the resurrection, to bring spices and ointments to complete the burial, brought word to the apostles that the Lord was risen (Luke xxiv. 10). [H. A.]

**CIO'CAR** (*כִּיּוֹכָר*). [JORDAN; TOPOGRAPHICAL TERMS.]

**CILIC'IA** (*Κιλικία*), a maritime province in the S.E. of Asia Minor, bordering on Pamphylia in the W., Lycônia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amanus from Syria, and Antitaurus from Cappadocia: these barriers can be surmounted only by a few difficult passes; the former by the *Portae Amanides* at the head of the valley of the Pinarus, the latter by the *Portae Ciliciae* near the sources of the Cydnus; towards the S. however an outlet was afforded between the Sinus Issicus and the spurs of Amanus for a road, which afterwards crossed the *Portae Syriae* in the direction of Antioch.\* The sea-coast is rock-bound in the W., low and shelving in the E.; the chief rivers, Sarus, Cydnus, and Calycadnus, were in-

\* Hence the close connexion which existed between Syria and Cilicia, as indicated in Acts xv. 23, 41; Gal. i. 21.

accessible to vessels of any size from sand-bars formed at their mouths. The western portion of the province is intersected with the ridges of Antitaurus, and was denominated Trachaea, *rough*, in contradistinction to Pedias, the *level* district in the E. The latter portion was remarkable for its beauty and fertility, as well as for its luxurious climate: hence it became a favourite residence of the Greeks after its incorporation into the Macedonian empire, and its capital TABSUS was elevated into the seat of a celebrated school of philosophy. The connexion between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. Antiochus the Great is said to have introduced 2000 families of the Jews into Asia Minor, many of whom probably settled in Cilicia (Joseph. *Ant.* xii. 3, §4). In the Apostolic age they were still there in considerable numbers (Acts vi. 9). Cilician mercenaries, probably from Trachaea, served in the body-guard of Alexander Jannæus (Joseph. *Ant.* xiii. 13, §5; *B. J.* i. 4, §3). Josephus identified Cilicia with the Tarshish of Gen. x. 4; *Θαρσός δὲ Θαρρεῖς, οὕτως γὰρ ἐκαλεῖτο τὸ παλαιὸν ἡ Κιλικία* (*Ant.* i. 6, §1). Cilicia was from its geographical position the high road between Syria and the West; it was also the native country of St. Paul; hence it was visited by him, firstly, soon after his conversion (*Gal.* i. 21; *Acts* iv. 30), on which occasion he probably founded the church there; and again in his second apostolic journey, when he entered it on the side of Syria, and crossed Antitaurus by the Pylæ Cilicæ into Lycania (*Acts* xv. 41). [W. L. B.]

**CINNAMON** (קִנְמון, קִנְמוֹן; *κιννάμωμον*; *cinnamomum*), a well-known aromatic substance, the rind of the *Laurus cinnamomum*, called *Korunk-gauhr* in Ceylon. It is mentioned in Ex. xxx. 23 as one of the component parts of the holy anointing oil, which Moses was commanded to prepare—in Prov. vii. 17 as a perfume for the bed—and in Cant. iv. 14 as one of the plants of the garden which is the image of the spouse. In Rev. xviii. 13 it is enumerated among the merchandize of the great Babylon. "It was imported into Judæa by the Phœnicians or by the Arabians, and is now found in Sumatra, Borneo, China, &c., but chiefly, and of the best quality, in the S.W. part of Ceylon, where the soil is light and sandy, and the atmosphere moist with the prevalent southern winds. The stem and boughs of the cinnamon-tree are surrounded by a double rind, the exterior being whitish or grey, and almost inodorous and tasteless; but the inner one, which consists properly of two closely connected rinds, furnishes, if dried in the sun, that much-valued brown cinnamon which is imported to us in the shape of fine thin barks, eight or ten of which rolled one into the other form sometimes a quill. It is this inner rind which is called in Ex. xxx. 23, קִנְמֹן-בְּשֵׁל, "spicy cinnamon" (*Kalisch ad loc.*). From the coarser pieces oil of cinnamon is obtained, and a finer kind of oil is also got by boiling the ripe fruit of the tree. This last is used in the composition of incense, and diffuses a most delightful scent when burning.

Herodotus (iii. 111) ascribes to the Greek word *κιννάμωμον* a Phœnician, i. e. a Semitic origin. His words are: *ὀνιθας δὲ λέγουσι μεγάλας φορεῖν ταῦτα τὰ κάρφια, τὰ ἥμετε ἀπὸ Φοινίκων μαθόντες κιννάμωμον καλεῖσθαι*.

The meaning of the Heb. root קִנְּ is doubtful.

The Arab. قَم = *to smell offensively like rancid nut-oil*. Gesenius suggests that the word might have had the notion of lifting up or standing upright, like קָנָה, קָנָן, קָנָן, and so be identical with קָנָה, *canna, calamus*, which the cinnamon-rind resembles in form when prepared for the market, and has hence been called in the later Latin *canella*, in Italian *canella*, and in French *cannelle*. Gesenius (*Thez.* 1223) corrects his former derivation of the word (in *Lex. Man.*) from קָנָה, as being contrary to grammatical analogy. [W. L.]

**CIN'NEROTH, ALL** (בְּלִי בִּנְרוֹת; *πάσας την Χερσερῆθ*; *unirsam Ceneroth*), a district named with the "land of Naphtali" and other northern places as having been laid waste by Benhadad king of Damascus, the ally of Aśa king of Judah (1 K. xv. 20). It probably took its name from the adjacent city or lake of the same name (in other passages of the A. V. spelt CHIN'NEROTH); and was possibly the small enclosed district north of Tiberias, and by the side of the lake, afterwards known as "the plain of Genesareth." The expression "All Cin'neroth" is unusual and may be compared with "All Bithron,"—probably, like this, a district and not a town. [G.]

**CIRAMA.** The people of Cirama (*ἐκ Κυραμῶς; Gramas*) and Gabdes came up with Zuiobabel from Babylon (1 Esdr. v. 20). [RAMAH.]

**CIRCUMCISION** (מִלִּינָה; *περιτομή*; *circumcisio*) was peculiarly, though not exclusively, a Jewish rite. It was enjoined upon Abraham, the father of the nation, by God, at the institution, and as the token, of the Covenant, which assured to him and his descendants the promise of the Messiah (*Gen.* xvii.). It was thus made a necessary condition of Jewish nationality. Every male child was to be circumcised when eight days old (*Lev.* xii. 3) on pain of death; a penalty which, in the case of Moses, appears to have been demanded of the father, when the Lord "sought to kill him" because his son was uncircumcised (*Ex.* iv. 24-26). If the eighth day were a Sabbath the rite was not postponed (*John* vii. 22, 23). Slaves, whether home-born or purchased, were circumcised (*Gen.* xvii. 12, 13); and foreigners must have their males circumcised before they could be allowed to partake of the passover (*Ex.* xii. 48), or become Jewish citizens (*Jud.* xiv. 10. See also *Esth.* viii. 17, where for Heb. מִיתֵי־מִלִּינָה, "became Jews," the LXX. have *περιτέμοντο καὶ ἰουδαῖζον*). The operation, which was performed with a sharp instrument (*Ex.* iv. 25; *Josh.* v. 2 [KNIFE]), was a painful one, at least to grown persons (*Gen.* xxxiv. 25; *Josh.* v. 8). It seems to have been customary to name a child when it was circumcised (*Luke* i. 59).

Various explanations have been given of the fact, that, though the Israelites practised circumcision in Egypt, they neglected it entirely during their journeying in the wilderness (*Josh.* v. 5). The most satisfactory account of the matter appears to be, that the nation, while bearing the punishment of disobedience in its forty years' wandering, was regarded as under a temporary rejection by God, and was therefore prohibited from using the sign of the Covenant. This agrees with the mention of their disobedience and its punishment, which immediately follows in the passage

in Joshua (v. 6), and with the words (v. 9) "This day have I rolled away the reproach of Egypt from off you." The "reproach of Egypt" was the threatened taunt of their former masters that God had brought them into the wilderness to slay them (Ex. xxxii. 12; Num. xiv. 13-16; Deut. ix. 28), which, so long as they remained uncircumcised and wanderers in the desert for their sin, was in danger of falling upon them. (Other views of the passage are given and discussed in Keil's *Commentary on Joshua*, in Clark's *Theol. Libr.* 129, &c.)

The use of circumcision by other nations besides the Jews is to be gathered almost entirely from sources extraneous to the Bible. The rite has been found to prevail extensively both in ancient and modern times; and among some nations, as, for instance, the Abyssinians, Nubians, modern Egyptians, and Hottentots, a similar custom is said to be practised by both sexes (see the *Penny Cyclopædia*, article *Circumcision*). The biblical notice of the rite describes it as distinctively Jewish; so that in the N. T. "the circumcision" (*ἡ περιτομή*) and the uncircumcision (*ἡ ἀκροβυστία*) are frequently used as synonyms for the Jews and the Gentiles. Circumcision certainly belonged to the Jews as it did to no other people, by virtue of its divine institution, of the religious privileges which were attached to it, and of the strict regulations which enforced its observance. Moreover, the O. T. history incidentally discloses the fact that many, if not all, of the nations with whom they came in contact were uncircumcised. One tribe of the Canaanites, the Hivites, were so, as appears from the story of Hamor and Shechem (Gen. xxxiv.). To the Philistines the epithet "uncircumcised" is constantly applied (Judg. xiv. 3, &c. Hence the force of the narrative, 1 Sam. xviii. 25-27). From the great unwillingness of Zipporah to allow her son to be circumcised (Ex. iv. 25) it would seem that the Midianites, though descended from Abraham by Keturah (Gen. xxv. 2), did not practise the rite. The expression "lying uncircumcised," or "lying with the uncircumcised," as used by Ezekiel (c. xxxii.) of the Egyptians, Assyrians, and others, does not necessarily affirm anything either way, as to the actual practice of circumcision by those nations. The origin of the custom amongst one large section of those Gentiles who follow it, is to be found in the biblical record of the circumcision of Ishmael (Gen. xvii. 25). Josephus relates that the Arabians circumcise after the thirteenth year, because Ishmael, the founder of their nation, was circumcised at that age (*Ant.* i. 12, §2; see Lane's *Mod. Eg.* ch. ii.). Though Mohammed did not enjoin circumcision in the Koran, he was circumcised himself, according to the custom of his country; and circumcision is now as common amongst the Mohammedans as amongst the Jews.

Another passage in the Bible has been thought by some to speak of certain Gentile nations as circumcised. In Jer. ix. 25, 26 (Heb. 24, 25) the expression בְּרִמּוֹתָם בְּמִטְרָאָם, v. 24) which is translated in the A. V. "all them which are circumcised with the uncircumcised," is rendered by Michaelis and Ewald "all the uncircumcised circumcised ones," and the passage understood to describe the Egyptians, Jews, Edomites, Ammonites, and Moabites, as alike circumcised in flesh and uncircumcised in heart. But, whatever meaning be assigned to the particular expression (Hosenmüller agrees with the A. V.; Maurer suggests "circumcised in fore-

skin"), the next verse makes a plain distinction between two classes, of which all the Gentiles (בְּלֹא-הַגִּיטִּים), including surely the Egyptians and others just named, was one, and the house of Israel the other; the former being uncircumcised both in flesh and heart, the latter, though possessing the outward rite yet destitute of the corresponding state of heart, and therefore to be visited as though uncircumcised. The difficulty that then arises, viz., that the Egyptians are called uncircumcised, whereas Herodotus and others state that they were circumcised, has been obviated by supposing those statements to refer only to the priests, and those initiated into the mysteries, so that the nation generally might still be spoken of as uncircumcised (Herod. ii. 36, 37, 104; and Wesseling and Bähr *in loc.*). The testimony of Herodotus must be received with caution, especially as he asserts (ii. 104) that the Syrians in Palestine confessed to having received circumcision from the Egyptians. If he means the Jews, the assertion, though it has been ably defended (see Spencer, *de Leg. Hebr.*, i. 5, §iv.) cannot be reconciled with Gen. xvii.; John vii. 22. If other Syrian tribes are intended, we have the contradiction of Josephus, who writes, "It is evident that no other of the Syrians that live in Palestine besides us alone are circumcised" (*Ant.* viii. 10, §3. See Whiston's note there). Of the other nations mentioned by Jeremiah, the Moabites and Ammonites were descended from Lot, who had left Abraham before he received the rite of circumcision; and the Edomites cannot be shown to have been circumcised until they were compelled to be so by Hyrcanus (Joseph. *Ant.* xiii. 9, §1). The subject is fully discussed by Michaelis (*Commentaries on the Laws of Moses*, iv. 3, clxxxiv.-clxxxvi.).

The process of restoring a circumcised person to his natural condition by a surgical operation was sometimes undergone (Celsus, *de Re Medica*, vii. 25). Some of the Jews in the time of Antiochus Epiphanes, wishing to assimilate themselves to the heathen around them, built a gymnasium (*γυμνασιον*) at Jerusalem, and that they might not be known to be Jews when they appeared naked in the games, "made themselves uncircumcised" (1 Macc. i. 15, ἐποίησαν ἑαυτοῖς ἀκροβυστίας; *seccrunt sibi præputia*; Joseph. *Ant.* xii. §5, 1, τὴν τῶν αἰδῶν περιτομὴν ἐκικαλῶσθαι, κ.τ.λ.). Against having recourse to this practice, from an excessive anti-Judaistic tendency, St. Paul cautions the Corinthians in the words "Was any one called being circumcised, let him not become uncircumcised" (μὴ ἐπιστάσθω, 1 Cor. vii. 18). See the Essay of Grödelck, *De Judæis præputium*, &c., in Schottgen's *Hor. Hebr.* ii.

The attitude which Christianity, at its introduction, assumed towards circumcision was one of absolute hostility, so far as the necessity of the rite to salvation, or its possession of any religious or moral worth were concerned (Acts xv.; Gal. v. 2). But while the Apostles resolutely forbade its imposition by authority on the Gentiles, they made no objection to its practice, as a mere matter of feeling or expediency. St. Paul, who would by no means consent to the demand for Titus, who was a Greek, to be circumcised (Gal. ii. 3-5), on another occasion had Timothy circumcised to conciliate the Jews, and that he might preach to them with more effect as being one of themselves (Acts xvi. 3). The Abyssinian Christians still practise circumcision as a national custom. In accordance

with the spirit of Christianity, those who ascribed efficacy to the mere outward rite, are spoken of in the N. T. almost with contempt as "the concision" or "amputation" (*τὴν κατὰ σάρκα*); while the claim to be the true circumcision is vindicated for Christians themselves (Phil. iii. 2, 3). An ethical idea is attached to circumcision even in the O. T., where uncircumcised lips (Ex. vi. 12, 30), or ears (Jer. vi. 10), or hearts (Lev. xvi. 41) are spoken of, *i. e.*, either stammering or dull, closed as it were with a foreskin (Gesen. *Heb. Lex.* s. v. *לִּפְתָּי*), or rather rebellious and unholly (Deut. xxx. 6; Jer. iv. 4), because circumcision was the symbol of purity (see Is. lii. 1). Thus the fruit of a tree is called uncircumcised, or in other words unclean (Lev. xix. 23). In the N. T. the ethical and spiritual idea of purity and holiness is fully developed (Col. ii. 11, 13; Rom. ii. 28, 29). [T. T. P.]

CIS (Rec. T. Kfs; Lachm. with ABCD, Kels; Cis), Acts xiii. 21. [KISH, 1.]

CYSAI (*Κύσας*; Cis), Esth. xi. 2. [KISH, 2.]

CISTERN (*בֵּר*, from *בָּרַב*, *dig* or *bore*, Gesen.

176; usually *λάκκος*; *cisterna* or *lucus*), a receptacle for water, either conducted from an external spring, or proceeding from rain-fall.

The dryness of the summer months between May and September, in Syria, and the scarcity of springs in many parts of the country, make it necessary to collect in reservoirs and cisterns the rain-water, of which abundance falls in the intermediate period (Shaw, *Travels*, 335; S. Jerome, quoted by Harmer, i. 148; Robinson, i. 430; Kitto, *Phys. Geogr. of H. L.*, 302, 303). Thus the cistern is essentially distinguished from the living spring *אֵין*, *Ain*; but from the well *בֵּר*, *Beer*, only in the fact that *Beer* is almost always used to denote a place ordinarily containing water rising on the spot, while *בֵּר*, *Bôr*, is often used for a dry pit, or one that may be left dry at pleasure (Stanley, *N. & P.*, 512, 514). [AIN.] The larger sort of public tanks or reservoirs, in Arabic, *Birkah*, Hebr. *Berechah*, are usually called in A. V. "pool," while for the smaller and more private it is convenient to reserve the name cistern.

Both birkehs and cisterns are frequent throughout the whole of Syria and Palestine, and for the construction of them the rocky nature of the ground affords peculiar facilities either in original excavation, or by enlargement of natural cavities. Dr. Robinson remarks that the inhabitants of all the hill country of Judah and Benjamin are in the habit of collecting water during the rainy season in tanks and cisterns, in the cities and fields, and along the high roads, for the sustenance of themselves and their flocks, and for the comfort of the passing traveller. Many of these are obviously antique, and exist along ancient roads now deserted. On the long forgotten way from Jericho to Bethel, "broken cisterns" of high antiquity are found at regular intervals. Jerusalem, described by Strabo as well supplied with water, in a dry neighbourhood (xvi. p. 760), depends mainly for this upon its cisterns, of which almost every private house possesses one or more, excavated in the rock on which the city is built. The following are the dimensions of 4, belonging to the house in which Dr. R. re-

sided. (1.) 15 ft.  $\times$  8  $\times$  12 deep. (2.) 8  $\times$  4  $\times$  15. (3.) 10  $\times$  10  $\times$  15. (4.) 30  $\times$  30  $\times$  20. The cisterns have usually a round opening at the top, sometimes built up with stonework above and furnished with a curb and a wheel for the bucket (Eccl. xii. 6), so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses during the rainy season, and with care remains sweet during the whole summer and autumn. In this manner most of the larger houses and public buildings are supplied (Rob., i. 324, 5). Josephus (*B. J.* iv. 4, §4) describes the abundant provision for water supply in the towers and fortresses of Jerusalem, a supply which has contributed greatly to its capacity for defence, while the dryness of the neighbourhood, verifying Strabo's expression *τὴν κόλασιν χάραν ἔχον λυτράν καὶ ἄνυδρον*, has in all cases hindered the operations of besiegers. Thus Hezekiah stopped the supply of water outside the city in anticipation of the attack of Sennacherib (2 Chr. xxxii. 3, 4). The progress of Antiochus Sidetes, B.C. 134, was at first retarded by want of water, though this want was afterwards unexpectedly relieved (Joseph. *Ant.* xiii. 8 §2; Clinton, iii. p. 331). Josephus also imputes to divine interposition the supply of water with which the army of Titus was furnished after suffering from want of it (*B. J.* v. 9, §4). The crusaders also during the siege A.D. 1099, were harassed by extreme want of water while the besieged were fully supplied (Matth. Paris, *Hist.* pp. 46, 49, ed. Wat.). The defence of Masada by Joseph, brother of Herod, against Antigonus, was enabled to be prolonged, owing to an unexpected replenishing of the cisterns by a shower of rain (Joseph. *Ant.* xiv. 15, §2), and in a subsequent passage he describes the cisterns and reservoirs, by which that fortress was plentifully supplied with water, as he had previously done in the case of Jerusalem and Machærus (*B. J.* iv. 4, §4, iv. 6, §2, vii. 8, §3). Benjamin of Tudela says very little water is found at Jerusalem, but the inhabitants drink rain-water, which they collect in their houses (*Early Trav.*, 84).

Burckhardt mentions cisterns belonging to private houses, among other places, at Serعين near Aleppo (*Syria*, p. 121), El Bara, in the Orontes valley (p. 132), Dhami and Misema in the Lejah (pp. 110, 112, 118), Tiberias (p. 331), Kerak in Moab (p. 377), Mount Tabor (p. 334). Of some at Hableh, near Gilgal, the dimensions are given by Robinson:—(1.) 7 ft.  $\times$  5  $\times$  3 deep. (2.) Nearly the same as (1). (3.) 12  $\times$  9  $\times$  8. They have one or two steps to descend into them, as is the case with one near Gaza, now disused, described by Sandys as "a mighty cistern, filled only by the rain-water, and descended into by stairs of stone" (Sandys, p. 150; Robinson, ii. 39). Of those at Hableh, some were covered with flat stones resting on arches, some entirely open, and all evidently ancient (Robinson, iii. 137).

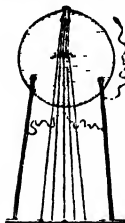

Empty cisterns were sometimes used as prisons and places of confinement. Joseph was cast into a "pit," *בֵּר* (Gen. xxxvii. 22), and his "dungeon" in Egypt is called by the same name (xli. 14). Jeremiah was thrown into a miry though empty cistern, whose depth is indicated by the cords used to let him down (Jer. xxxviii. 6). To this prison tradition has assigned a locality near the gate called Herod's gate (Hasselquist, 140; Mandell, *Early Trav.*, 448). Vitruvius (viii. 7) describes the method in use in his day for constructing water tanks, but

the native rock of Palestine usually super-seded the necessity of more art in this work than is sufficient to excavate a basin of the required dimensions.

The city of Alexandria is supplied with water contained in arched cisterns supported by pillars, extending under a great part of the old city (Van Egmont, *Travels*, ii. 134). [POOL; WELL.] [H. W. P.]

**CITHIERN** (= cithara, *κίθαρα*, 1 Macc. iv. 54), a musical instrument most probably of Greek origin, employed by the Chaldeans at balls and routs, and introduced by the Hebrews into Palestine on their return thither after the Babylonian captivity. The cithern was of the guitar species, and was known at a later period as the *Cithern*, under which name it is mentioned by the old dramatists as having constituted part of the furniture of a barber's shop. Of the same species is the *Cithern* or *Zither* of Southern Germany, Tyrol, and Switzerland.

With respect to the shape of the Cithern or Cithara mentioned in the Apocrypha, the opinion of the learned is divided: according to some it resembled in form the Greek delta Δ, others represent it as a half-moon, and others again like the modern guitar. In many eastern countries it is still in use with strings, varying in number from three to twenty-four. Under the name of *Konthir*, the traveller Niebuhr describes it as a wooden-plate or dish, with

cithern.

a hole beneath and a piece of skin stretched above like a drum. Two sticks, joined after the manner of a fan, pass through the skin at the end, and where the two sticks stand apart, they are connected by a transversal piece of wood. From the upper end of this wooden triangle to the point below are fastened five chords, which at a little distance above their junction, pass over a bridge, like the strings of a violin. The chords are made to vibrate by means of a leather thong fastened to one of the lateral sticks of the triangle. In Mendelssohn's edition of the Psalms, representations are given of the several musical instruments met with in the sacred Books, and *Konthir* or *Kothros* is described by the accompanying figure.

The Cithara, if it be not the same with, resembles very closely the instruments mentioned in the book of Psalms, under the denominations of *קִנּוֹר*, *קִנֹּר*, respectively rendered in the A.V. "harp," "psaltery," "organ." In Chaldee, Cithara is translated *קִתְרוֹר*, the *Keri* for *קִתְרוֹר* (Dan. iii. 5). In the A. V., *קִתְרוֹר* is rendered "harp," and the same word is employed instead of *Cithern* (1 Macc. iv. 54) in Robert Barker's edition of the *English Bible*, London, 1615. Gesenius considers Cithara as the same with harp; but Luther translates *κίθαρα* by *mit Pfeifen*, "with pipes." (See *Bibl. to Mendelssohn's Psalms*, 2nd Pref.; Niebuhr, *Travels*; Fürst's *Concordance*. Gesenius on the word *קִתְרוֹר*.) [D. W. M.]

**CITIES** (1. *עָרִים*, plur. of both *עָר*, *Ar*, and also *עִיר*, *Ir*, from *עָרַר*, to keep watch—Ges. 1004, 5; once (Judg. x. 4) in plur. *עָרִים*, for the sake

of a play with the same word, plur. of *עִיר*, a young ass; *πόλεις*; *civitates*, or *urbes*. 2. *קִרְיָה*, *Kirjath*; once in dual, *קִרְיָתַיִם*, *Kirjathaim* (Num. xxxii. 37), from *קָרַר*, approach as an enemy,

prefixed as a name to many names of towns on both sides of the Jordan existing before the conquest, as *Kirjath-Arba*, probably the most ancient name for city, but seldom used in prose as a general name for town (Ges. 1236; Stanley, *S. & P.* App. §80).

The classification of the human race into dwellers in towns and nomadic wanderers (Gen. iv. 20, 22) seems to be intimated by the etymological sense of both words, *Ar*, or *Ir*, and *Kirjath*, i.e. as places of security against an enemy, distinguished from the unwall'd village or hamlet, whose resistance is more easily overcome by the marauding tribes of the desert. This distinction is found actually existing in countries, as Persia and Arabia, in which the tent-dwellers are found, like the Rechabites, almost side by side with the dwellers in cities, sometimes even sojourning within them, but not amalgamated with the inhabitants, and in general making the desert their home, and, unlike the Rechabites, robbery their undisputed occupation (Judg. v. 7; Jer. xxxv. 9, 11; Fraser, *Persia*, 366, 380; Malcolm, *Sketches of Persia*, 147-156; Burekhardt, *Notes on Bedouins*, i. 157; Wellsted, *Travels in Arabia*, i. 335; Porter, *Pamascus*, ii. 96, 181, 188; Vaux, *Nineveh and Persopolis*, c. ii. note A; Layard, *Nineveh*, ii. 272; *Nin. & Bab.* 141). [VILLAGES.]

The earliest notice in Scripture of city-building is of Enoch by Cain, in the land of his "exile" (*נִדָּח*, *Nod*, Gen. iv. 17). After the confusion of tongues, the descendants of Nimrod founded Babel, Erech, Accad, and Calneh, in the land of Shinar, and Asshur, a branch from the same stock, built Nineveh, Rehoboth-by-the-river, Calah, and Resen, the last being "a great city." A subsequent passage mentions Sidon, Gaza, Sodom, Gomorrah, Admah, Zeboim, and Lasha, as cities of the Canaanites, but without implying for them antiquity equal to that of Nineveh and the rest (Gen. x. 10-12, 19, xi. 3, 9, xxxvi. 37). Sir H. Rawlinson supposes, 1. that the expedition of Chedorlaomer (Gen. xiv.) was prior to the building of Babylon or Nineveh, indicating a migration or conquest from Persia or Assyria; 2. that by Nimrod is to be understood, not an individual, but a name denoting the "settlers" in the Assyrian plain; and 3. that the names Rehoboth, Calah, &c., when first mentioned, only denoted sites of buildings afterwards erected. He supposes that Nineveh was built about 1250 B.C., and Calah about a century later, while Babylon appears to have existed in the 15th century B.C. If this be correct, we must infer that the places then attacked, Sodom, Gomorrah, &c., were cities of higher antiquity than Nineveh or Babylon, inasmuch as when they were destroyed a few years later, they were cities in every sense of the term. The name *Kirjathaim*, "double-city" (Ges. 1236), indicates an existing city, and not only a site. It may be added that the remains of civic buildings existing in Moab are evidently very ancient, if not, in some cases, the same as those erected by the aboriginal Emims and Rephaim. (See also the name Avith, "ruins," Ges. 1000; Gen. xix. 1, 29, xxxvi. 35; Is. xxiii. 13; Wilkinson, *Anc. Eg.* i. 508; Layard,

*Nin. & Bab.* 532; Porter, *Damascus*, i. 309, ii. 196; Rawlinson, *Outlines of Assy. Hist.* 4, 5.) But though it appears probable that, whatever dates may be assigned to the building of Babylon or Nineveh in their later condition, they were in fact rebuilt at those epochs, and not founded for the first time, and that towns in some form or other may have occupied the sites of the later Nineveh or Calah; it is quite clear that cities existed in Syria prior to the time of Abraham, who himself came from "Ur," the "city" of the Chaldeans (*Gen.* 55; Rawlinson, 4).

The earliest description of a city, properly so called, is that of Sodom (*Gen.* xix. 1-22); but it is certain that from very early times cities existed on the sites of Jerusalem, Hebron, and Damascus. The last, said to be the oldest city in the world, must from its unrivalled situation have always commanded a congregated population; Hebron is said to have been built seven years before Zaan (Tavis) in Egypt, and is thus the only Syrian town which presents the elements of a date for its foundation (*Num.* xiii. 22; Stanley, *S. & P.* 409; Joseph. *Ant.* i. 6, §4; Conybeare and Howson, *Life and Exp. of St. Paul*, i. 94, 96).

But there can be no doubt that, whatever date may be given to Egyptian civilization, there were inhabited cities in Egypt long before this (*Gen.* xii. 14, 15; Martineau, *East. Life*, i. 151; Wilkinson, i. 307; *Dict. of Geog. art. Tanis*). The name, however, of Hebron, Kirjath-Arba, indicates its existence at least as early as the time of Abraham, as the city, or fortified place of Aiba, an aboriginal province of Southern Palestine (*Gen.* xxiii. 2; *Josh.* xv. 15). The "tower of Eder," near Bethlehem, or "of flocks" מִגְדַּל עֵדֶר, indicates a position fortified against marauders (*Gen.* xxxv. 21). Whether "the city of Shalem" be a site or an existing town cannot be determined, but there can be no doubt that the situation of Shechem is as well identified in the present day, as its importance as a fortified place is plain from the Scripture narrative (*Gen.* xxiii. 18, xxiv. 20, 26; Robinson, ii. 287). On the whole it seems plain that the Canaanite, who was "in the land" before the coming of Abraham, had already built cities of more or less importance, which had been largely increased by the time of the return from Egypt.

Even before the time of Abraham there were cities in Egypt (*Gen.* xii. 14, 15; *Num.* xiii. 22; Wilkinson, i. 4, 5). The Israelites, during their sojourn there, were employed in building or fortifying the "treasure cities" of Pithom (Abnaseh) and Raames (*Ex.* i. 11; Herod. ii. 158; Winer, *Geseuits*, s. cv.; Robinson, i. 54, 55); but their pastoral habits make it unlikely that they should build, still less fortify, cities of their own in Goshen (*Gen.* xli. 34, xlvii. 1-11).

Meanwhile the settled inhabitants of Syria on both sides of the Jordan had grown in power and in number of "fenced cities." In the kingdom of Sihon are many names of cities preserved to the present day; and in the kingdom of Og, in Bashan, were 60 "great cities with walls and brazen bars," besides unvalled villages, and also 23 cities in Gilead, which were occupied and perhaps partly rebuilt or fortified by the tribes on the east of Jordan (*Num.* xxi. 21, 32, 33, 35, xxxii. 1-3, 24, 42; *Deut.* iii. 4, 5, 14; *Josh.* xi. xiii.; 1 K. iv. 13; 1 Chr. ii. 22; Burckhardt, *Syria*, 311, 457; Porter, *Damascus*, ii. 195, 196, 206, 259, 275).

On the west of Jordan, whilst 31 "royal" cities are enumerated (*Josh.* xii.), in the district assigned to Judah 125 "cities" with villages are reckoned (*Josh.* xv.); in Benjamin 26; to Simeon 17; Zabulou 12; Issachar 16; Asher 22; Naphtali 19; Dan 17 (*Josh.* xviii. xix.). But from some of these the possessors were not expelled till a late period, and Jerusalem itself was not captured till the time of David (2 Sam. v. 6-9).

From this time the Hebrews became a city-dwelling and agricultural rather than a pastoral people. David enlarged Jerusalem, and Solomon, besides embellishing his capital, also built or rebuilt Tadmor, Palmyra, Gezer, Beth-horon, Hazor, and Megiddo, besides store-cities (2 Sam. v. 7, 9, 10; 1 K. ix. 15-18; 2 Chr. viii. 6). To Solomon also is ascribed by eastern tradition the building of Psepolis (Chardin, *Voyage*, viii. 390; Mandelslo, i. p. 4; Kurân, c. xxxviii.).

The works of Jeroboam at Shechem (1 K. xii. 25; *Judg.* ix. 45), of Rehoboam (2 Chr. xi. 5-10), of Baasha at Rama, interrupted by Assa (1 K. xv. 17, 22), of Omri at Samaria (xvi. 24), the rebuilding of Jericho in the time of Ahab (xvi. 34), the works of Jehoshaphat (2 Chr. xvii. 12), of Jotham (2 Chr. xxvii. 4), the rebuilding of Jerusalem, and later still, the works of Herod and his family, belong to their respective articles.

Collections of houses in Syria for social habitation may be classed under three heads:—1. cities; 2. towns with citadels or towers for resort and defence; 3. unvalled villages. The cities may be assumed to have been in almost all cases "fenced cities," i. e. possessing a wall with towers and gates (*Lev.* xxv. 29; *Deut.* ix. 1; *Josh.* ii. 15, vi. 20; 1 Sam. xxii. 7; 1 K. iv. 13; 2 K. vi. 26, vii. 3, xviii. 8, 13; *Acts* ix. 25); and that as a mark of conquest was to break down a portion, at least, of the city-wall of the captured place, so the first care of the defenders, as of the Jews after their return from captivity, was to rebuild the fortifications (2 K. ix. 13, 22; 2 Chr. xxvi. 2, 6, xxxiii. 14; *Neh.* iii. iv. vi. vii.; 1 Mac. iv. 60, 61, x. 45; *Xen. Hell.* ii. 2, §15).

But around the city, especially in peaceable times, lay undefended suburbs (מִבְּרֵית, *μετρωπολις*, *suburbana*, 1 Chr. vi. 57, et seqq.; *Num.* xxxv. 1-5, *Josh.* xxi.), to which the privileges of the city extended. The city thus became the citadel, while the population overflowed into the suburbs (1 Mac. xi. 61). The absence of walls as indicating security in peaceable times, combined with populousness, as was the case in the flourishing period of Egypt, is illustrated by the prophet Zechariah (ii. 4; 1 K. iv. 25; Martineau, *East. Life*, i. 306).

According to Eastern custom, special cities were appointed to furnish special supplies for the service of the state; cities of store, for chariots, for horsemen, for building purposes, for provision for the royal table. Special governors for these and their surrounding districts were appointed by David and by Solomon (1 K. iv. 7, ix. 19; 1 Chr. xxvii. 25; 2 Chr. xvii. 12, xxi. 3; 1 Mac. x. 39; *Xen. Anab.* i. 4, §10). To this practice our Lord alludes in his parable of the pounds, and it agrees with the theory of Hindoo government, which was to be conducted by lords of single townships, of 10, 100, or 1000 towns (*Luke* xix. 17, 19; Elphinstone, *India*, c. ii. i. 39, and *App.* v. p. 485).

To the Levites 48 cities were assigned, distributed throughout the country, together with a certain amount of suburban ground, and out of these 48,

13 were specially reserved for the family of Aaron, 9 in Judah and 4 in Benjamin, and 6 as refuge cities (Josh. xxi. 13, 42), but after the division of the kingdoms the Levites in Israel left their cities and resorted to Judah and Jerusalem (2 Chr. xi. 13, 14).

The internal government of Jewish cities was vested before the captivity in a council of elders with judges, who were required to be priests: Josephus says seven judges with two Levites as officers, *ἐννέα* (Deut. xxi. 5, 19, xvi. 18, xix. 17; Ruth iv. 2; Joseph. *Ant.* iv. 8, §14). Under the kings a president or governor appears to have been appointed (1 K. xxii. 26; 2 Chr. xviii. 25); and judges were sent out on circuit, who referred matters of doubt to a council composed of priests, Levites, and elders, at Jerusalem (1 Chr. xxiii. 4, xxvi. 29; 2 Chr. xix. 5, 8, 10, 11). After the captivity Ezia made similar arrangements for the appointment of judges (Ezr. vii. 25). In the time of Josephus there appear to have been councils in the provincial towns, with presidents in each, under the directions of the great council at Jerusalem (Joseph. *Ant.* xiv. 9, §4; *B. J.* ii. 21, §3; Vit. 12, 13, 27, 34, 57, 61, 68, 74). [SANHEDRIM.]

In many Eastern cities much space is occupied by gardens, and thus the size of the city is much increased (Niebuhr, *Voyage*, ii. 172, 239; Conybeare and Howson, i. 96; *Eöthen*, 240). The vast extent of Nineveh and of Babylon may thus be in part accounted for (Diod. ii. 70; Quint. Curt. v. i. 26; Jou. iv. 11; Chardin, *Voy.* vii. 273, 284; Porter, *Damascus*, i. 153; P. della Valle, ii. 33). In most Oriental cities the streets are extremely narrow, seldom allowing more than two loaded camels, or one camel and two foot passengers, to pass each other, though it is clear that some of the streets of Nineveh must have been wide enough for chariots to pass each other (Nah. ii. 4; Olearius, *Trav.* 294, 309; Buckhardt, *Trav. in Arabia*, i. 188; Buckingham, *Arab Tribes*, 330; Mrs. Poole, *Englishwoman in Egypt*, i. 141). The word for streets used by Nahum—*רחובות*, from *רחב*, *broad*,

*πλατεῖαι*—is used also of streets or broad places in Jerusalem (Prov. i. 20; Jer. v. 1, xxii. 4; *Ant.* iii. 2) and it may be remarked that the *πλατεῖαι* into which the sick were brought to receive the shadow of St. Peter (Acts v. 15) were more likely to be the ordinary streets than the special *pinæe* of the city. It seems likely that the immense concourse which resorted to Jerusalem at the feasts would induce wider streets than in other cities. Herod built in Antioch a wide street paved with stone, and having covered ways on each side. Agrippa II. paved Jerusalem with white stone (Joseph. *Ant.* xvi. 5, §2, 3, xx. 9, §7). The Straight street of Damascus is still clearly defined and recognizable (Irby and Mangles, v. 86; Robinson, iii. 454, 455).

In building Caesarea, Josephus says that Herod was careful to carry out the drainage effectually (Joseph. *Ant.* xv. 19, §6); we cannot determine whether the internal commerce of Jewish cities was carried on as now by means of bazars, but we read of the bakers' street (Jer. xxxvii. 21), and Josephus speaks of the wool market, the hardware market, a place of blacksmiths' shops, and the clothes market, at Jerusalem (*B. J.* v. 81).

The open spaces (*πλατεῖαι*) near the gates of towns were in ancient times, as they are still, used as places of assembly by the elders, of holding courts

by kings and judges, and of general resort by citizens (Gen. xxii. 10; Ruth iv. 1; 2 Sam. xv. 2, xviii. 24; 2 K. vii. 1, 3, 20; 2 Chr. xviii. 9, xxxii. 6; Neh. viii. 13; Job xxix. 7; Jer. xvi. 19; Matt. vi. 5; Luke xiii. 26). They were also used as places of public exposure by way of punishment (Jer. xx. 2; Am. v. 10).

Prisons were under the kingly government, within the royal precinct (Gen. xxxix. 20; 1 K. xxi. 27, Jer. xxxii. 2; Neh. iii. 25; Acts xxi. 34, xxiii. 35).

Great pains were taken to supply both Jerusalem and other cities with water, both by tanks and cisterns for rain-water, and by reservoirs supplied by aqueducts from distant springs. Such was the fountain of Gihon, the aqueduct of Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 30; Is. xxii. 9), and of Solomon (Ecc. ii. 6), of which last water is still conveyed from near Bethlehem to Jerusalem (Maudrell, *Early Trav.* 457; Robinson, i. 347, 8). Josephus also mentions an attempt made by Pilate to bring water to Jerusalem (*Ant.* xviii. 3, 2). [CONDUIT.]

Burial-places, except in special cases, were outside the city (Num. xix. 11, 16; Matt. viii. 28; Luke vii. 12; John xix. 41; Heb. xiii. 12). [H. W. P.]

### CITIES OF REFUGE עָרֵי הַמִּקְלָט from

*מִקְלָט*, contracted, Gesen. 1216; *πόλεις τῶν φυγαδευτηρίων, φυγαδευτήρια, φυγαδεῖα; oppida in fugitivorum auxilia, praesidia, separata; urbes fugitivorum*. Six Levitical cities specially chosen for refuge to the involuntary homicide until released from banishment by the death of the high-priest (Num. xxxv. 6, 13, 15; Josh. xx. 2, 7, 9). [BLOOD, AVENGER OF.] There were three on each side of Jordan. 1. KEDESH, in Naphtali, *Κεδεσ*, about twenty miles E.S.E. from Tyre, twelve S.S.W. from *Bunias* (1 Chr. vi. 76; Robinson, ii. 439; Benj. of Tudela, *Early Trav.* 89). 2. SHECHEM, in Mount Ephraim, *Nábulus* (Josh. xxi. 21; 1 Chr. vi. 67; 2 Chr. x. 1; Robinson, ii. 287, 288). 3. HEBRON, in Judah, *el-Khâfil*. The two last were royal cities, and the latter sacerdotal also, inhabited by David, and fortified by Rehoboam (Josh. xxi. 13; 2 Sam. v. 5; 1 Chr. vi. 55, xxix. 27; 2 Chr. xi. 10; Robinson, i. 213, ii. 89). 4. On the E. side of Jordan—BEZER, in the tribe of Reuben, in the plains of Moab, said in the Gemara to be opposite to Hebron, perhaps *Bosor*, but the site has not yet been found (Deut. iv. 43; Josh. xx. 8, xxi. 36; 1 Mac. v. 26; Joseph. *Ant.* iv. 7, §4; Ireland, 662). 5. RAMOTH-GILEAD, in the tribe of Gad, supposed to be on or near the site of *es-Salt* (Deut. iv. 43; Josh. xxi. 38; 1 K. xvii. 3; Ireland, iii. p. 966). 6. GOLAN, in Bashan, in the half-tribe of Manasseh, a town whose site has not been ascertained, but which doubtless gave its name to the district of Gilonitis, *Jaulan* (Deut. iv. 43; Josh. xxi. 27; 1 Chr. vi. 71; Joseph. *Ant.* iv. 7, §4; Ireland, p. 815; Porter, *Damascus*, ii. 251, 254; Burekhardt, *Syria*, p. 286).

The Gemara notices that the cities on each side of the Jordan were nearly opposite each other, in accordance with the direction to divide the land into three parts (Deut. xix. 2; Ireland, iii. p. 662). Maimonides says all the 48 Levitical cities had the privilege of asylum, but that the six refuge-cities were required to receive and lodge the homicide gratuitously (Calmet *On Num.* xxv.).

Most of the Rabbinical refinements on the Law are stated under BLOOD, REVENGER OF. To them may be added the following. If the homicide committed a fresh act of manslaughter, he was to flee to another city; but if he were a Levite, to wander from city to city. An idea prevailed that when the Messiah came three more cities would be added; a misinterpretation, as it seems, of Deut. xix. 8, 9 (Lightfoot, *Cent. Chor.* cli. 208). The altar at Jerusalem, and, to some extent also, the city itself, possessed the privilege of asylum under similar restrictions; a privilege claimed, as regards the former, successfully by Adonijah and in vain by Joab; accorded, as regards the city, to Shimai, but forfeited by him (1 K. i. 53, ii. 28, 33, 36, 46).

The directions respecting the refuge-cities present some difficulties in interpretation. The Levitical cities were to have a space of 1000 cubits (about 583 yards) beyond the city wall for pasture and other purposes. Presently after, 2000 cubits are ordered to be the suburb limit (Num. xxxv. 4, 5). The solution of the difficulty may be, either the 2000 cubits are to be added to the 1000 as "fields of the suburbs" (Lev. xxv. 34), as appears to have been the case in the gift to Caleb, which excluded the city of Hebron, but included the "fields and villages of the city" (Josh. xxi. 11, 12, Patrick.), or that the additional 2000 cubits were a special gift to the refuge-cities, whilst the other Levitical cities had only 1000 cubits for suburb. Calmet supposes the line of 2000 cubits to be measured parallel, and the 1000 perpendicular to the city wall; an explanation, however, which supposes all the cities to be of the same size (Calmet *On Numbers*, xxxv.).

The right of asylum possessed by many Greek and Roman towns, especially Ephesus, was in process of time much abused, and was curtailed by Tiberius (Tac. *Ann.* iii. 60, 63). It was granted, under certain limitations, to churches by Christian emperors (Cod. i. tit. 12; Gibbon, c. xx. iii. 35, Smith). Hence came the right of sanctuary possessed by so many churches in the middle ages (Hallam, *Middle Ages*, c. ix. pt. 1, vol. iii. 302, 11th ed.). [H. W. P.]

**CITIMIS** (Κιτιμοί, Alex. Κιτιμοί; *Cetes*), 1 Macc. viii. 5. [CHITIM.]

**CITIZENSHIP** (πολιτεία *politiká*). The use of this term in Scripture has exclusive reference to the usages of the Roman empire; in the Hebrew commonwealth, which was framed on a basis of religious, rather than of political privileges and distinctions, the idea of the commonwealth was merged in that of the congregation, to which every Hebrew, and even strangers under certain restrictions, were admitted. [CONGREGATION; STRANGERS.] The privilege of Roman citizenship was widely extended under the emperors; it was originally acquired in various ways, as by purchase (Acts xxii. 28; Cic. *ad Fam.* xiii. 36; Dion. Cass. ix. 17), by military services (Cic. *pro Balb.* 22; Suet. *Aug.* 47), by favour (Tac. *Hist.* iii. 47), or by manumission. The right once obtained descended to a man's children (Acts xxii. 28). The Jews had rendered signal services to Julius Caesar in the Egyptian war (Joseph. *Ant.* xiv. 8, §1, 2), and it is not improbable that many obtained the freedom of the city on that ground; certain it is that great numbers of Jews, who were Roman citizens, were scattered over Greece and Asia Minor (*Ant.* xiv. 10, §13, 14). Among the privileges attached to citizenship, we may note that a man could not be bound or imprisoned without a formal trial (Acts xxii. 29), still less be scourged (Acts xvi. 37; Cic. *in Verr.* v. 63, 66); the simple assertion of citizenship was sufficient to deter a magistrate from such a step (Acts xxii. 25; Cic. *in Verr.* v. 62), as any infringement of the privilege was visited with severe punishment. A Jew could only plead exemption from such treatment before a Roman magistrate; he was still liable to it from Jewish authorities (2 Cor. xi. 24; Seld. *de Syn.* ii. 15, §11). Another privilege attaching to citizenship was the appeal from a provincial tribunal to the emperor at Rome (Acts xxv. 11). [W. L. B.]

#### CITRON. [APPLE TREE.]

**CLAUDA** (Κλαύδη, Acts xxvii. 16; called Gaudos by Mela and Pliny, Κλαύδος by Ptolemy, and Κλαυδία in the *Stadionum Maris Magni*: it is still called *Claudia-nesa*, or *Gaudonesi*, by the Greeks, which the Italians have corrupted into *Gozzo*). This small island, unimportant in itself and in its history, is of very great geographical importance in reference to the removal of some of the difficulties connected with St. Paul's shipwreck at Melita. The position of Claudia is nearly due W. of Cape Matala on the S. coast of Crete [FAIR HAVENS], and nearly due S. of PHOENICE. (See Ptol. iii. 17, §1; *Stadionum*, p. 496; *Ed. Gail.*) The ship was seized by the gale a little after passing Cape Matala, when on her way from Fair Havens to Phoenice (Acts xxvii. 12-17). The storm came down from the island (κατ' αὐτῆς, v. 14), and there was danger lest the ship should be driven into the African Syrtis (v. 17). It is added that she was driven to Claudia and ran under the lee of it (v. 16). We see at once that this is in harmony with, and confirmatory of, the arguments derivable from all the other geographical circumstances of the case (as well as from the etymology of the word Euroclydon or Euro-Aquilo), which lead us to the conclusion that the gale came from the N.E., or rather E.N.E. Under the lee of Claudia there would be smooth water, advantage of which was taken for the purpose of getting the boat on board, and making preparations for riding out the gale. [SHIP.] (Smith, *Voy. and Shipwreck of St. Paul*, 2nd ed. pp. 92, 98, 233.) • [J. S. H.]

**CLAUDIA** (Κλαυδία), a Christian female mentioned in 2 Tim. iv. 21, as saluting Timotheus. There is reason for supposing that this Claudia was a British maiden, daughter of king Cogidubnus, an ally of Rome (Tacit. *Agricol.* 14), who took the name of his imperial patron, Tiberius Claudius. She appears to have become the wife of Pudens, who is mentioned in the same verse. (See Martial, lib. iv. Epigr. 13.) This Pudens, we gather from an inscription found at Chichester, and now in the gardens at Goodwood, was at one time in close connexion with king Cogidubnus, and gave an area for a temple of Neptune and Minerva, which was built by that king's authority. And Claudia is said in Martial (xi. 53) to have been *opulens Britannis edita*. Moreover, she is there also called *Rufina*. Now Pomponia, wife of the late commander in Britain, Aulus Plautius, under whom Claudia's father was received into alliance, belonged to a house of which the Rufi were one of the chief branches. If she herself were a Rufa, and Claudia her protégée, the latter might well be called Rufina; and we know that Pomponia was tried as *superstitiois externae rei* in the year 57, Tacit. *Ann.* xii. 32: so that there are many

circumstances concurrent, tending to give verisimilitude to the conjecture. See Archdeacon Williams's pamphlet, "On Pudens and Claudia;"—an article in the Quarterly Review for July, 1858, entitled "The Romans at Colchester;"—and an Excursus in Alford's Greek Testament, vol. iii. prolegg. p. 104, in which the contents of the two works first mentioned are embodied in a summary form. [H. A.]

**CLAUDIUS** (Κλαύδιος; in full, Tiberius Claudius Nero Drusus Germanicus), fourth Roman emperor, successor of Caius Caligula, reigned from 41 to 54 A.D. He was son of Nero Drusus, was born in Lyons Aug. 1, B.C. 9 or 10, and lived private and unknown till the day of his being called to the throne, January 24, A.D. 41. He was nominated to the supreme power mainly through the influence of Herod Agrippa the First (Jos. Ant. xix. 2, §1, 3, 4; Suet. Claud. 10); and when on the throne he proved himself not ungrateful to him: for he enlarged the territory of Agrippa by adding to it Judaea, Samaria, and some districts of Lebanon, and appointed his brother Herod to the kingdom of Chalcis (Joseph. Ant. xix. 5, §6; Dion Cassius, lx. 8), giving to this latter also, after his brother's death, the presidency over the temple at Jerusalem (Joseph. Ant. xx. 1, §3). In Claudius's reign there were several famines, arising from unfavourable harvests (Dion Cass. lx. 11; Euseb. Chron. Armen. i. 269, 271; Tacit. Ann. xii. 13), and one such occurred in Palestine and Syria (Acts xi. 28-30) under the procurators Cuspius Fadus and Tiberius Alexander (Joseph. Ant. xx. 2, §6, and 5, §2), which perhaps lasted some years. Claudius was induced by a tumult of the Jews in Rome, to expel them from the city (Suet. Claud. 25; Judeos impulsore Chresto assidue tumultuantes Roma expulsi; cf. Acts xviii. 2). It is probable that Suetonius here refers to some open dissension between Jews and Christians, but when it, and the consequent edict, took place, is very uncertain. Orosius (Hist. vii. 6) fixes it in the 9th year of Claudius, A.D. 49 or 50; referring to Josephus, who, however, says nothing about it. Pearson (Annal. Paul. p. 22) thinks the 12th year more probable (A.D. 52 or 53). As Auger remarks (*de ratione temporum in Actis App.* p. 117), the edict of expulsion would hardly be published as long as Herod Agrippa was at Rome, i.e. before the year 49. Claudius, after a weak and foolish reign (*non principem se, sed ministrum egit*, Sueton. 29), was poisoned by his fourth wife Agrippina, the mother of Nero (Tacit. Ann. xii. 66, 7; Suet. Claud. 44, 5; Joseph. Ant. xx. 8, §1; B. J. ii. 12, §8), October 13, A.D. 54. [H. A.]

#### CLAUDIUS LYSIAS. [LYSIAS.]

**CLAY** (ἄργιλος; *argilos*; *lunus* or *lutum*), a sedimentary earth, tough and plastic, arising from the disintegration of felspar and similar minerals, and always containing silica and alumina combined in variable proportions. As the sediment of water remaining in pits or in streets, the word is used frequently in O. T. (e.g. Is. lvii. 20; Jer. xxxviii. 4; Ps. xviii. 42), and in N. T. (ἄργιλος, John ix. 6), a mixture of sand or dust with spittle. It is also found in the sense of potter's clay (Is. xli. 25). The alluvial soils of Palestine would no doubt supply material for pottery, a manufacture which we know was, as it still is, carried on in the country (Jer. xvii. 2, 6), but our knowledge on the subject is so small as to afford little or no means of determining, and the clay of Palestine, like that of Egypt, is prob-

ably more loam than clay (Birch, *Hist. of Pottery*, i. 55, 152). [POTTERY.] The word most commonly used for "potter's clay" is *ῥῆτι* (Ex. i. 14; Job iv. 19; Is. xxix. 16; Jer. xviii. 4, &c.). Bituminous shale, convertible into clay, is said to exist largely at the source of the Jordan, and near the Dead Sea. The great seat of the pottery of the present day in Palestine is Gaza, where are made the vessels in dark blue clay so frequently met with.

The use of clay in brick-making is described elsewhere. [BRICKS.]

Another use of clay was in sealing (Job xxxviii. 14). The bricks of Assyria and Egypt are most commonly found stamped either with a die or with marks made by the fingers of the maker. Wine jars in Egypt were sometimes sealed with clay; mummy pits were sealed with the same substance, and remains of clay are still found adhering to the stone door-jambs. Our Lord's tomb may have been thus sealed (Matt. xxvii. 66), as also the earthen vessel containing the evidences of Jeremiah's purchase (Jer. xxxii. 14). So also in Assyria at Kouyunjik pieces of fine clay have been found bearing impressions of seals with Assyrian, Egyptian, and Phœnician devices. The seal used for public documents was rolled on the moist clay, and the tablet was then placed in the fire and baked. The practice of sealing doors with clay to facilitate detection in case of malpractice is still common in the East (Wilkinson, *Anc. Egypt.* i. 45, 48, ii. 364; Layard, *N. & B.* 153, 158, 608; Herod. ii. 38; Harmer, *Obs.* iv. 376. [BRICKS; POTTERY; SEALS.] [H. W. P.]

**CLEMENT** (Κλήμης, Phil. iv. 3), a fellow-labourer of St. Paul, when he was at Philippi (for so the text implies). It was generally believed in the ancient church, that this Clement was identical with the Bishop of Rome, who afterwards became so celebrated. Whether this was so, it is impossible to say. The practice of supposing N. T. characters to be identical with persons who were afterwards known by the same names, was too frequent, and the name Clements too common, for us to be able to pronounce on the question. The identity is asserted in Euseb. *H. E.* iii. 4; Origen, vol. i. p. 262, ed. Lommatsch; and Jerome, *Scriptur. Eccl.* p. 176, a. Chrysostom does not mention it. [H. A.]

**CLEOPAS** (Κλεόπας), one of the two disciples who were going to Emmaus on the day of the resurrection, when Jesus Himself drew near and talked with them (Luke xxiv. 18). Eusebius in his *Onomasticon* makes him a native of Emmaus. It is a question whether this Cleopas is to be considered as identical with CLEOPHAS (accus. CLOPAS) or Alphaeus in John xix. 25. [ALPHAÆUS.] Their identity was assumed by the later fathers and church historians. But Eusebius (*H. E.* iii. 11) writes the name of Alphaeus, Joseph's brother, CLOPAS, not Cleopas. And Chrysostom and Theodoret, on the Epistle to the Galatians, call James the Just the son of Clopas. Besides which, CLOPAS, or Alphaeus, is an Aramaic name, whereas Cleopas is a Greek name, probably contracted from Κλεόπατρος, as *Ἀντίπας* from *Ἀντιπατρος*. Again, as we find the wife and children of Cleopas constantly with the family of Joseph at the time of our Lord's ministry, it is probable that he himself was dead before that time. On the whole then, it seems safer to doubt the identity of Cleopas with

Cleopas. Of the further history of Cleopas, nothing is known. [H. A.]

CLEOPATRA (Κλεοπάτρα), the name of numerous Egyptian princesses derived from the daughter of Antiochus III., who married Ptolemy V. Epiphanes, B.C. 193.

1. "The wife of Ptolemy" (Esth. xi. 1) was probably the granddaughter of Antiochus, and wife of Ptol. VI. Philometor. [PTOL. PHILOMETOR.]

2. A daughter of Ptol. VI., Philometor and Cleopatra (1), who was married first to Alexander Balas B.C. 150 (1 Macc. x. 58), and afterwards given by her father to Demetrius Nicator when he invaded Syria (1 Macc. xi. 12; Joseph. Ant. xiii. 4, §7). During the captivity of Demetrius in Parthia [DEMETRIUS] Cleopatra married his brother Antiochus VII. Sidetes, and was probably privy to the murder of Demetrius on his return to Syria B.C. 125 (App. Syr. 68; yet see Joseph. Ant. xiii. 9, §3; Just. xxxix. 1). She afterwards murdered Seleucus, her eldest son by Demetrius (App. Syr. 69); and at length was herself poisoned B.C. 120 by a draught which she had prepared for her second son Antiochus VIII., because he was unwilling to gratify the ambitious designs which she formed when she raised him to the throne (Justin. xxix. 2). [B. F. W.]

CLEOPHAS. [CLEOPAS; ALPHAEUS.]

CLOTHING. [DRESS.]

CLOUD (ענן). The word עָנָן, so rendered in a few places, properly means "vapours," the less dense form of cloud which rises higher, and is often absorbed without falling in rain; Arab.

نَشَاءَ and نَشَاءُ. The word עָנָן, sometimes rendered "cloud," means merely "darkness," and is applied also to "a thicket" (Jer. iv. 29). The shelter given, and refreshment of rain promised, by clouds, give them their peculiar prominence in Oriental imagery, and the individual cloud in that ordinarily cloudless region becomes well defined and is dwelt upon like the individual tree in the bare landscape (Stanley, *S. & P.* p. 140). Similarly, when a cloud appears, rain is ordinarily apprehended, and thus the "cloud without rain" becomes a proverb for the man of promise without performance (Prov. xxi. 15; Is. xviii. 4, xxv. 5; Jude 12; comp. Prov. xxv. 14). The cloud is of course a figure of transitoriness (Job xxx. 15; Hos. vi. 4), and of whatever intercepts divine favour or human supplication (Lam. ii. 1, iii. 44). Being the least substantial of visible forms, undefined in shape, and unrestrained in position, it is the one amongst material things which suggests most easily spiritual being. Hence it is, so to speak, the recognised machinery by which supernatural appearances are introduced (Is. xix. 1; Ez. i. 4; Rev. i. 7, and *passim*), or the veil between things visible and invisible; but, more especially, a mysterious or supernatural cloud is the symbolical seat of the Divine presence itself—the phenomenon of deity vouchsafed by Jehovah to the prophet, the priest, the king, or the people. Sometimes thick darkness, sometimes intense luminousness, often, apparently, and especially by night, an actual fire (as in the descent of Jehovah on Sinai, Ex. xix. 18) is attributed to this glory-cloud (Deut. iv. 11; Exod. xl. 35, xxxiii. 29, 23; 2 Sam. xxii. 12, 13). Such a bright cloud, at any rate at times, visited and rested

on the Mercy Seat (Ex. xliv. 42, 43; 1 K. viii. 11; 2 Chr. v. 14; Ez. xlvi. 4) and was by later writers named Shekinah. For the curious questions which the Rabbis and others have raised concerning it, e.g. whether its light was created or not, whether the actual "light" created on the "first day" (Gen. i. 3), or an emanation therefrom, Buxtorf's history of the Ark, chap. xi-xiv. (*Olydini*, vol. vii.), may be consulted. [H. H.]

CLOUD, PILLAR OF (עמוד הענן). This was the active form of the symbolical glory-cloud, betokening God's presence to lead His chosen host, or to inquire and visit offences, as the luminous cloud of the sanctuary exhibited the same under an aspect of repose. The cloud, which became a pillar when the host moved, seems to have rested at other times on the tabernacle, whence God is said to have "come down in the pillar" (Num. xii. 5; so Exod. xxxiii. 9, 10). It preceded the host, apparently resting on the ark which led the way (Ex. xiii. 21, xl. 36, &c.; Num. ix. 15-23, x. 34). So by night the cloud on the tabernacle became fire, and the guiding pillar a pillar of fire. A remarkable passage in Curtius (v. 2, §7), descriptive of Alexander's army on the march, mentions a beacon hoisted on a pole from head-quarters as the signal for marching; *observabatur ignis nocturnus, fumus interdiu*. This was probably an adoption of an eastern custom. Similarly the Persians used as a conspicuous signal, an image of the sun enclosed in crystal (ib. iii. 3, §9). Caravans are still known to use such beacons of fire and smoke; the cloudlessness and often stillness of the sky giving the smoke great density of volume, and boldness of outline. [H. H.]

CNIDUS (Κνιδος) is mentioned in 1 Macc. xv. 23, as one of the Greek cities which contained Jewish residents in the second century before the Christian era, and in Acts xxvii. 7, as a harbour which was passed by St. Paul after leaving Myra, and before running under the lee of Crete. It was a city of great consequence, situated at the extreme S.W. of the peninsula of Asia Minor [CARIA], on a promontory now called *Cape Crio*, which projects between the islands of Cos and Rhodes (see Acts xxi. 1). *Cape Crio* is in fact an island, so joined by an artificial causeway to the mainland, as to form two harbours, one on the N., the other on the S. The latter was the larger, and its moles were noble constructions. All the remains of Cnidus show that it must have been a city of great magnificence. Few ancient cities have received such ample illustration from travels and engravings. We may refer to Beaufort's *Karamanir*, Hamilton's *Researches*, and Texier's *Asie Mineure*, also Laborde, Leake, and Clarke, with the Drawings in the *Ionian Antiquities*, published by the Dilettanti Society, and the English *Admiralty Charts*, Nos. 1533, 1604. [J. S. H.]

COAL. In A. V. this word represents no less than five different Heb. words. 1. The first and most frequently used is *Gacheleth*, חָמֶלֶת (*chamelet*, *chamelet*; *pruna, curbo*), a live ember, burning fuel, as distinguished from *חֶמֶד* (Prov. xxvi. 21). It is written more fully in Ez. x. 2, *חֶמֶלֶת אֵשׁ*, and in Ez. i. 13, *חֶמֶלֶת אֵשׁ בְּקִרְוֹת*.

In 2 Sam. xxii. 9, 13, "coals of fire" are put metaphorically for the lightnings proceeding from God

(Ps. xviii. 8, 12, 13, cxi. 10).

In Prov. xcv. 22 we have the proverbial expression, "Thou shalt heap coals of fire upon his head," which has been adopted by St. Paul in Rom. xii. 20, and by which is metaphorically expressed the burning shame and confusion which men must feel when their evil is requited by good. In Ps. cxx. 4, "coals" = burning brands of wood (not "juniper," but broom), to which the false tongue is compared (James iii. 6).

In 2 Sam. xiv. 7 the quenching of the live coal is used to indicate the threatened destruction of the single remaining branch of the family of the widow of Tekoah suborned by Joab; just as Lucian (*Tim.* §3) uses the word *ζάπυρον* in the same connexion.

The root of *חֶלֶב* is *חָלַב*, which is possibly the

same in meaning as the Arab. *حَلَبَ*, to light a fire, with the change of *ב* into *ב*.

2. *Pecham*, *חֶפֶץ* (*ἄσχαρα, ἀνθραξ; carbo, prunus*). In Prov. xxvi. 21, this word clearly signifies fuel not yet lighted, as contrasted with the burning fuel to which it is to be added; but in Is. xiv. 12, and *liv.* 16, it means fuel lighted, having reference in both cases to smiths' work. It is

derived from *חָפַץ*; Arab. *حَفِץ*, to be very black.

The fuel meant in the above passages is probably charcoal, and not coal in our sense of the word.

3. *Rezepeh*, or *Rizepah*, *רֶצֶפָה* (*ἄνθραξ; calculus* in Is. vi. 6; but in 1 K. xix. 6, *רֶצֶפָה*, is rendered by the LXX. *ἐγκρυφίας δαυρίτης*, and by the Vulg. *prunis subcinericius*). In the narrative of Elijah's miraculous meal the word is used to describe the mode in which the cake was baked, viz. on a hot stone, as is still usual in the East. Comp.

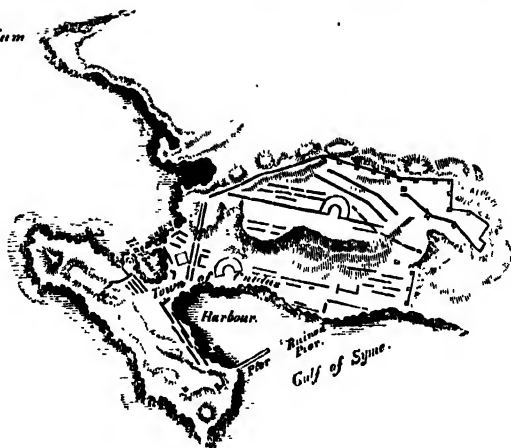

the Arab. *رَضْف*, a hot stone on which flesh is laid.

*רֶצֶפָה*, in Is. vi. 6, is rendered in A. V. "a live coal," but properly means "a hot stone." The root is *רָצַף*, to lay stones together as a pavement.

4. *שֶׁשֶׁף*, in Hab. iii. 5, is rendered in A. V. "burning coals," and in the margin "burning diseases." The former meaning is supported by Cant. viii. 6, the latter by Deut. xxxii. 24. According to the Rabbinical writers, *שֶׁשֶׁף* = *שֶׁשֶׁף, prunis*.

5. *Shechor*.—In Lam. iv. 8, *שֶׁשֶׁף מַשְׁחֹר* is rendered in A. V. "their visage is blacker than a coal," or in the marg. "darker than blackness." *שֶׁשֶׁף* is found but this once, and signifies to be black,

Pr Triapium

Plan of Coelestria and Chart of the adjoining coast

from root *שָׁחַף*. The LXX. render it by *ασβλία*, the Vulg. by *carbones*. In other forms the word is frequent, and Shiloh is a usual name for the Nile. [SIMON.] [W. D.]

## COAT. [DRESS.]

COCK (*ἀλέκτωρ; gallus*), the well-known domestic bird mentioned only in the N. T. in connexion with the denial of our Lord by St. Peter, but indirectly in the word *ἀλεκτοροφωνία* in Mark xiii. 35. The time indicated seems to have been about three in the morning, and was known to the Hebrews as *לַיְלַת הַבֶּקָר*, and to the Latins as *gallicinium*. Some persons have supposed that by *ἀλέκτωρ* in the N. T. is meant the sounding of the Roman trumpets to mark the watches of the night, for the reason that cocks were not permitted to be kept at Jerusalem on account of the holiness of the place; but this fact is doubtful, and the explanation is fanciful and far-fetched. [W. D.]

## COCKATRICE. See צִמְעָנִי, under ADDER.

In Is. xiv. 29, the form of the word is *צִמְעָנִי*.

COCKLE (*שֶׁשֶׁף; βάτος; spinus*), a weed, named only in Job xxxi. 40, and probably identical with the *σῖδρα* of Matt. xiii. 30. Celsius (*Herobot.* ii. 199) would identify it with the Aconite, but Gesenius questions this (*Jesaja*, i. 230, ii. 364). The root of the word is *שָׁחַף*, to stink. [W. D.]

COELESYRIA (*Κολη Συρία; Coelestria*), "the hollow Syria," was (strictly speaking) the name given by the Greeks, after the time of Alexander, to the remarkable valley or hollow (*καίλα*) which intervenes between Libanus and Anti-Libanus, stretching from lat. 33° 20' to 34° 40', a distance of nearly a hundred miles. As applied to this region the word is strikingly descriptive. Diodorus the geographer well observes upon this, in the lines—

"Ἦν Κολην ἐνέουσιν ἐπ' αὐτὴν  
Μίσσην καὶ χαμαλὴν ὁρῶν δύο πρῶτες ἔχουσιν.  
Ptolemy, 699-800.

A modern traveller says, more particularly—  
"We finally looked down on the vast green and  
Z 2

red valley—green from its yet unripe corn, red from its vineyards not yet verdant—which divides the range of Lebanon and Anti-Lebanon; the former reaching its highest point in the snowy crest to the north, behind which lie the Cedars; the latter, in the still more snowy crest of Hermon—the culmination of the range being thus in the one at the northern, in the other at the southern extremity of the valley which they bound. The view of this great valley is chiefly remarkable as being *exactly to the eye what it is on maps*—the ‘hol-low’ between the two mountain ranges of Syria. A screen through which the Leontes (*Litány*) breaks out closes the south end of the plain. There is a similar screen at the north end, but too remote to be visible” (Stanley’s *Palestine*, p. 407). The plain gradually rises towards its centre, near which, but a little on the southern declivity, stand the ruins of *Baalbek* or *Helipolis*. In the immediate neighbourhood of Baalbek rise the two streams of the Orontes (*Nahr-el-Asy*) and the Litany, which flowing in opposite directions, to the N.W. and the S.E., give freshness and fertility to the tract enclosed between the mountain-ranges.

The term *Coele-Syria* was also used in a much wider sense. In the first place it was extended so as to include the inhabited tract to the east of the Anti-Libanus range, between it and the desert, in which stood the great city of Damascus; and then it was further carried on upon that side of Jordan, through Trachonitis and Perna, to Idumaea and the borders of Egypt (Strab. xvi. §21; Polyb. v. 80, §3; Jos. *Ant.* i. 11, §5). Ptolemy (v. 15) and Josephus (*Ant.* xiii. 13, §2) even place Scythopolis in *Coele-Syria*, though it was upon the west side of Jordan; but they seem to limit its extent southwards to about lat. 31° 30', or the country of the Ammonites (Ptol. v. 15; Joseph. i. 11). Ptolemy distinctly includes in it the Damascus country.

None of the divisions of Syria (*Aram*) in the Jewish Scriptures appear to correspond with the *Coele-Syria* of the Greeks; for there are no grounds for supposing, with Calmet (*Dict. of the Bible*, art. *Coelesyria*), that “*Syria of Zebah*” is *Coele-Syria*. *Coele-Syria* seems to have been included under the name of “*Syria of Damascus*” (כְּסִינְיָא דְּדַמַּשְׁקָא), and to have formed a portion of that kingdom. [ARAM.] The only distinct reference to the region, as a separate tract of country, which the Jewish Scriptures contain, is probably that in Amos (i. 5), where “the inhabitants of the plain of *Aven*” (כְּסִינְיָא דְּאֵבֶן, *Bikath-Aven*) are threatened, in conjunction with those of Damascus. *Bikath* is exactly such a plain as *Coele-Syria* (Stanley’s *Palestine*, Append. p. 484), and the expression *Bikath-Aven*, “the plain of Idols,” would be well applied to the tract immediately around the great sanctuary of Baalbek. [AVEN.] In the Apocryphal Books there is frequent mention of *Coele-Syria* in a somewhat vague sense, nearly as an equivalent for Syria (1 Esd. ii. 17, 24, 27, iv. 48, vi. 29, vii. 1, viii. 67; 1 Macc. x. 69; 2 Macc. iii. 5, 8, iv. 4, viii. 8, x. 11). In all these cases the word is given in A. V. as *CELOSRYIA*. [G. R.]

**COFFER** (כֶּסֶף, probably from כָּסַף, *to be mored*; θάμα; *capsellus*), a moveable box hanging from the side of a cart (1 Sam. vi. 8, 11, 15). This word is found nowhere else, and in each of the above examples has the definite article, as if of some special significance. [H. W. P.]

### COFFIN. [BURIAL.]

**CO'TA** (Χωλᾶ, Alex. Κωλᾶ), a place named with Chobai (Jud. xv. 4, only), the position or real name of which has not been ascertained. Simonis (*Onom.* N. T. 170) suggests *Abel-mecholuh*.

**COLHO'ZEH** (כֹּלְחֹזֶה; Χολεζή; *Cholhoza*), a man of the tribe of Judah in the time of Nehemiah (Neh. iii. 15, xi. 5).

**COLLIUS** (Κώλιος, Alex. Κώλιος; *Colnis*), 1 Esdr. ix. 23. [KELAIAN.]

**COLLAR.** For the proper sense of this term, as it occurs in Judg. vii. 26, see EARRINGS. The expression כֶּמֶר (as the collar) in Job xxx. 18, is better read as כֶּמֶר (comp. Job xxxiii. 6), in which case the sense would be “it bindeth me as my coat,” referring to the close fit of the *ecthoneth*. The כֶּ, literally the “mouth,” as a part of a garment, refers to the orifice for the head and neck, but we question whether it would be applied to any other robe than the sacerdotal ephod (Ex. xxxix. 23; 1s. cxxlii. 2). The authority of the LXX. (ὡς περὶ περιστόμιον), of the Vulg. (*quasi capitis*), and of Gresenius (*Thesaur.* p. 1088), must however be cited in favour of the ordinary rendering. [W. L. B.]

**COLONY**, a designation of Philippi, the celebrated city of Macedonia, in Acts xvi. 12. After the battle of Actium, Augustus assigned to his veterans those parts of Italy which had espoused the cause of Antony, and transported many of the expelled inhabitants to Philippi, Pyrrhæum, and other cities (Dion. Cass. li. 4). In this way Philippi was made a Roman colony with the “*Jus Italicum*” (comp. Dig. 50, tit. 15, s. 8), and accordingly we find it described as a “*colonia*” both in inscriptions and upon the coins of Augustus. (Orelli, *Inscr.* 512, 3658, 3746, 4064; Rasche, vol. iii. pt. 2, p. 1120.) On the “*Jus Italicum*,” see *Dict. of Ant.*, arts. *COLONIA* and *LATINITAS*.

**COLOS'SE** (more properly **COLOS'SAE**, Κολοσσαί, Col. i. 2; but the preponderance of MS. authority is in favour of Κολασσαί, *Colassæ*, a form used by the Byzantine writers, and which perhaps represents the provincial mode of pronouncing the name. On coins and inscriptions, and in classical writers we find Κολοσσαί. See Elliott, *ad loc.*) A city in the upper part of the basin of the Maeander, on one of its affluents named the Lycus. Hierapolis and Laodicea were in its immediate neighbourhood (Col. ii. 1, iv. 13, 15, 16; see Rev. i. 11, iii. 14). Colossæ fell, as these other two cities rose, in importance. Herodotus (vii. 30) and Xenophon (*Anab.* i. 2, §8) speak of it as a city of considerable consequence. Strabo (xii. p. 576) describes it as only a πόλις, not a πόλις; yet elsewhere (p. 578) he implies that it had some mercantile importance; and Pliny, in St. Paul's time, describes it (v. 41) as one of the “*celeberrima oppida*” of its district. Colossæ was situated close to the great road which led from Ephesus to the Euphrates. Hence our impulse would be to conclude that St. Paul passed this way, and founded or confirmed the Colossian Church on his third missionary journey (Acts xviii. 23, xix. 1). He might also easily have visited Colossæ during the prolonged stay at Ephesus, which immediately followed. The most competent commentators, however, agree in thinking that Col. ii. 1, proves that

St. Paul had never been there, when the Epistle was written. Theodoret's argument that he must have visited Colossae on the journey just referred to, because he is said to have gone through the whole region of Phrygia, may be proved fallacious from geographical considerations: Colossae, though ethnologically in Phrygia (Herod. *l. c.*, Xen. *l. c.*), was at this period politically in the province of Asia (see Rev. *l. c.*). That the Apostle hoped to visit the place on being delivered from his Roman imprisonment is clear from Philemon 22 (compare Phil. ii. 24). Philemon and his slave Onesimus were dwellers in Colossae. So also were Archippus and Epaphras. From Col. i. 7, iv. 12, it has been naturally concluded that the latter Christian was the founder of the Colossian Church (see Alford's *Prolegomena to G. Test.* vol. iii. p. 35). [EPAPHRAS.] The worship of angels mentioned by the Apostle (Col. ii. 18) curiously reappears in Christian times in connexion with one of the topographical features of the place. A church in honour of the archangel Michael was erected at the entrance of a chasm in consequence of a legend connected with an inundation (Hartley's *Researches in Greece*, p. 52), and there is good reason for identifying this chasm with one which is mentioned by Herodotus. This kind of superstition is mentioned by Theodoret as subsisting in his time; also by the Byzantine writer Nicetas Choniates, who was a native of this place, and who says that Colossae and Chonae were the same. The neighbourhood (visited by Pococke) was explored by Mr. Arundell (*Seven Churches*, p. 158; *Asia Minor*, ii. p. 160); but Mr. Hamilton was the first to determine the actual site of the ancient city, which appears to be at some little distance from the modern village of Chonas (*Researches in A. M.* i. p. 508). [J. S. H.]

**COLOSSIANS, THE EPISTLE TO THE,** was written by the Apostle St. Paul during his first captivity at Rome (Acts xxviii. 16), and apparently in that portion of it (Col. iv. 3, 4) when the Apostle's imprisonment had not assumed the more severe character which seems to be reflected in the Epistle to the Philippians (ch. i. 20, 21, 30, ii. 27), and which not improbably succeeded the death of Burrus in A.D. 62 (Clinton, *Fristi Rom.* i. 44), and the decline of the influence of Seneca.

This important and profound epistle was addressed to the Christians of the once large and influential, but now smaller and declining, city of Colossae, and was delivered to them by Tychicus, whom the Apostle had sent both to them (ch. iv. 7, 8) and to the church of Ephesus (ch. vi. 21), to inquire into their state and to administer exhortation and comfort. The epistle seems to have been called forth by the information St. Paul had received from Epaphras (ch. iv. 12; Philem. 23) and from Onesimus, both of whom appear to have been natives of Colossae, and the former of whom was, if not the special founder, yet certainly one of the very earliest preachers of the gospel in that city. The main object of the epistle is not merely, as in the case of the Epistle to Philippians, to exhort and to confirm, nor as in that to the Ephesians, to set forth the great features of the church of the chosen in Christ, but is especially designed to warn the Colossians against a spirit of semi-Judaistic and semi-Oriental philosophy which was corrupting the simplicity of their belief, and was noticeably tending to obscure the eternal glory and dignity of Christ.

This main design is thus carried out in detail.

After his usual salutation (ch. i. 1-3) the Apostle returns thanks to God for the faith of the Colossians, the spirit of love they had shown, and the progress which the Gospel had made among them, as preached by Epaphras (ch. i. 3-8). This leads him to pray without ceasing that they may be fruitful in good works, and especially thankful to the Father, who gave them an inheritance with His saints, and translated them into the kingdom of His Son—*His Son, the image of the invisible God*, the first-born before every creature, the Creator of all things earthly and heavenly, the Head of the church, He in whom all things consist, and by whom all things have been reconciled to the eternal Father (ch. i. 9-20). This reconciliation, the Apostle reminds them, was exemplified in their own cases: they were once alienated, but now so reconciled as to be presented holy and blameless before God, if only they continued firm in the faith, and were not moved from the hope of which the Gospel was the source and origin (ch. i. 21-24). Of this Gospel the Apostle declares himself the minister; the mystery of salvation was that for which he toiled and for which he suffered (ch. i. 24-29). And his sufferings were not only for the church at large, but for them and others whom he had not personally visited,—even that they might come to the full knowledge of Christ, and might not fall victims to plausible sophistries: they were to walk in Christ and to be built on Him (ch. ii. 1-7). Especially were they to be careful that no philosophy was to lead them from Him in whom dwelt all the fulness of the Godhead, who was the head of all spiritual powers, and who had quickened them, forgiven them, and in His death had triumphed over all the hosts of darkness (ch. ii. 8-15). Surely with such spiritual privileges they were not to be judged in the matter of mere ceremonial observances, or beguiled into creature-worship. Christ was the head of the body; if they were truly united to Him, to what need were bodily austerities (ch. ii. 16-23). They were, then, to mind things above—spiritual things, not carnal ordinances, for their life was hidden with Christ (ch. iii. 1-4): they were to mortify their members and the evil principles in which they once walked; the old man was to be put off, and the new man put on, in which all are one in Christ (ch. iii. 5-12). Furthermore, they were to give heed to special duties; they were to be forgiving and loving, as was Christ. In the consciousness of His abiding word were they to sing; in His name were they to be thankful (ch. iii. 13-17). Wives and husbands, children and parents, were all to perform their duties; servants were to be faithful, masters to be just (ch. iii. 18-iv. 1).

In the last chapter the Apostle gives further special precepts, strikingly similar to those given to his Ephesian converts. They were to pray for the Apostle and for his success in preaching the Gospel, they were to walk circumspectly, and to be ready to give a seasonable answer to all who questioned them (ch. iv. 2-7). Tychicus, the bearer of the letter, and Onesimus would tell them all the state of the Apostle (ch. iv. 7-9): Aristarchus and others sent them friendly greetings (ch. iv. 10-14). With an injunction to interchange this letter with that sent to the neighbouring church of Laodicea (ch. iv. 16), a special message to Archippus (ch. iv. 17), and an autograph salutation, this short but striking epistle comes to its close.

With regard to its genuineness and authenticity, it is satisfactory to be able to say with distinctness

that there are no grounds for doubt. The external testimonies (Just. M. *Trypho*, p. 311 b; Theophil. *ad Autol.* ii. p. 100, ed. Col. 1688; Irenaeus, *Haer.* iii. 14, 1; Clem. Alex. *Strom.* i. p. 325, iv. p. 588, al., ed. Potter; Tertull. *de Praescr.* ch. 7; *de Resurr.* ch. 23; Origen, *contra Cels.* v. 8) are explicit, and the internal arguments, founded on the style, balance of sentences, positions of adverbs, uses of the relative pronoun, participial anacolutha,—unusually strong and well defined. It is not right to suppress the fact that Mayerhoff (*der Brief an die Kol.* Berl. 1838) and Baur (*der Apostel Paulus*, p. 417) have deliberately rejected this epistle as claiming to be a production of St. Paul. The first of these critics, however, has been briefly, but, as it would seem, completely answered, by Meyer (*Comment.* p. 7); and to the second, in his subjective and anti-historical attempt to make individual writings of the N. T. mere theosophistic productions of a later Gnosticism, the intelligent and critical reader will naturally yield but little credence. It is indeed remarkable that the strongly marked peculiarity of style, the nerve and force of the arguments, and the originality that appears in every paragraph should not have made both these writers pause in their ill-considered attack on this epistle.

A few special points demand from us a brief notice.

1. The opinion that this epistle and those to the Ephesians and to Philemon were written during the Apostle's imprisonment at Caesarea (Acts xxi. 27–xxvi. 32), i. e. between Pentecost A.D. 58 and the autumn of A.D. 60, has been recently advocated by several writers of ability, and stated with such cogency and clearness by Meyer (*Einkl. z. Ephes.* p. 15, sq.), as to deserve some consideration. It will be found, however, to rest on ingeniously urged plausibilities; whereas, to go no further than the present epistle, the notices of the Apostle's imprisonment in ch. iv. 3, 4, 11, certainly seem historically inconsistent with the nature of the imprisonment at Caesarea. The permission of Felix (Acts xxiv. 23) can scarcely be strained into any degree of liberty to teach or preach the Gospel, while the facts recorded of St. Paul's imprisonment at Rome (Acts xxviii. 23, 31) are such as to harmonise admirably with the freedom in this respect which our present epistle represents to have been accorded both to the Apostle and his companions; see ch. iv. 11, and comp. De Wette, *Einkl. z. Coloss.* p. 12, 13; Wieseler, *Chronol.* p. 420.

2. The nature of the erroneous teaching condemned in this epistle has been very differently estimated. Three opinions only seem to deserve any serious consideration; (a) that these erroneous teachers were adherents of Neo-Platonism, or of some forms of Occidental philosophy; (b) that they leaned to Essene doctrines and practices; (c) that they advocated that admixture of Christianity, Judaism, and Oriental philosophy which afterwards became consolidated into Gnosticism. Of these (a) has but little in its favour, except the somewhat vague term *φαισσοφία* (ch. ii. 8), which, however, it seems arbitrary to restrict to Grecian philosophy; (b) is much more plausible as far as the usages alluded to, but seems inconsistent both with the exclusive nature and circumscribed localities of Essene teaching; (c) on the contrary is in accordance with the Gentile nature of the church of Colossae (ch. i. 21), with its very locality—speculative and superstitious Phrygia—and with that tendency to associate Judaical observances (ch. ii. 16) with

more purely theosophistic speculations (ch. ii. 18), which became afterwards so conspicuous in developed Gnosticism. The portions in our analysis of the epistle marked in italics serve to show how deeply these perverted opinions were felt by the Apostle to strike at the doctrine of the eternal God-head of Christ.

3. The striking similarity between many portions of this epistle and of that to the Ephesians has given rise to much speculation, both as to the reason of this studied similarity, and as to the priority of order in respect to composition. These points cannot here be discussed at length, but must be somewhat briefly dismissed with the simple expression of an opinion that the similarity may reasonably be accounted for, (1) by the proximity in time at which the two epistles were written; (2) by the high probability that in two cities of Asia within a moderate distance from one another, there would be many doctinal prejudices, and many social relations, that would call forth and need precisely the same language of warning and exhortation. The priority in composition must remain a matter for a reasonable difference of opinion. To us the shorter and perhaps more vividly expressed Epistle to the Colossians seems to have been first written, and to have suggested the more comprehensive, more systematic, but less individualizing, epistle to the church of Ephesus.

For further information the student is directed to Davidson's *Introduction*, ii. 394, sq.; Alford, *Prolegom.* to *N. T.* iii. 53, sq.; and the introduction to the excellent Commentary of Meyer.

The editions of this epistle are very numerous. Of the older commentaries those of Davenant, *Expos. Ep. Pauli ad Col.*, ed. 3; Suicer, in *Ep. Pauli ad Col. Comment.*, Tig. 1699, may be specified; and of modern commentaries, those of Bähr (Bas. 1833), Olshausen (Königsb. 1840), Huther (Hamb. 1841, a very good exegetical commentary), De Wette (Leipz. 1847), Meyer (Gött. 1848); and in our own country those of Eadie (Glasg. 1856), Alford (Lond. 1857), and Ellicott (Lond. 1858). [C. J. E.]

**COLOURS.** The terms relative to colour, occurring in the Bible, may be arranged in two classes, the first including those applied to the description of natural objects, the second those artificial mixtures which were employed in dyeing or painting. In an advanced state of art, such a distinction can hardly be said to exist; all the hues of nature have been successfully imitated by the artist: but among the Jews, who fell even below their contemporaries in the cultivation of the fine arts, and to whom painting was unknown until a late period, the knowledge of artificial colours was very restricted. Dyeing was the object to which the colours known to them were applied: so exclusively indeed were the ideas of the Jews limited to this application of colour, that the name of the dye was transferred without any addition to the material to which it was applied. The Jews were not however by any means insensible to the influence of colour: they attached definite ideas to the various tints, according to the use made of them in robes and vestments: and the subject exercises an important influence on the interpretation of certain portions of Scripture.

1. The natural colours noticed in the Bible are white, black, red, yellow, and green. It will be observed that only three of the *prismatic* colours are represented in this list; blue, indigo, violet, and orange are omitted. Of the three, *yellow* is very seldom noticed; it was apparently regarded as

a shade of green, for the same term *greenish* (ירקני) is applied to gold (Ps. lxxviii. 13), and to the leprous spot (Lev. xiii. 49), and very probably the *golden* (זהב) or *yellow* hue of the leprous hair (Lev. xiii. 30-32) differed little from the *greenish* spot on the garments (Lev. xiii. 49). *Green* is frequently noticed, but an examination of the passages, in which it occurs, will show that the reference is seldom to colour. The Hebrew terms are *raavan* (רענן) and *yarak* (יָרַק); the first of these applies to what is *vigorous* and *flourishing*; hence it is metaphorically employed as an image of prosperity (Job xv. 32; Ps. xxxvii. 35, lii. 8, xcii. 14; Jer. xi. 16, xvii. 8; Dan. iv. 4; Hos. iv. 8); it is invariably employed wherever the expression "*green tree*" is used in connexion with idolatrous sacrifices, as though with the view of conveying the idea of the *outspreading* branches, which served as a canopy to the worshippers (Deut. vii. 2; 2 K. xvi. 4); elsewhere it is used of that which is *fresh*, as oil (Ps. xcii. 10), and newly plucked boughs (Cant. i. 16). The other term, *yarak*, has the radical signification of *putting forth leaves, sprouting* (Gesén. *Thesaur.* p. 632): it is used indiscriminately for all productions of the earth fit for food (Gen. i. 30, ix. 3; Ex. x. 15; Num. xlii. 4; Is. xv. 6; cf. *χλωρός*, Rev. viii. 7, ix. 4), and again for all kinds of garden herbs (Deut. xi. 10; 1 K. xxi. 2; 2 K. xix. 26; Prov. xv. 17; Is. xxxvii. 27; contrast the restricted application of *our greens*); when applied to grass, it means specifically the *young, fresh grass* (נֶשֶׁק, Ps. xxxvii. 2), which springs up in the desert (Job xxxix. 8). Elsewhere it describes the sickly yellowish hue of mildewed corn (Deut. xxviii. 22; 1 K. viii. 37; 2 Chr. vi. 28; Am. iv. 9; Hag. ii. 17); and lastly, it is used for the entire absence of colour produced by fear (Jer. xxx. 6; compare *χλωρός*, II. x. 376); hence *χλωρός* (Rev. vi. 8) describes the ghastly, livid hue of death. In other passages "*green*" is erroneously used in the A. V. for *white* (Gen. xxx. 37; Esth. i. 6), *young* (Lev. ii. 14, xxiii. 14), *moist* (Judg. xvi. 7, 8), *supple* (Job viii. 16), and *unripe* (Cant. ii. 13). Thus it may be said that *green* is never used in the Bible to convey the impression of proper colour.

The only fundamental colour of which the Hebrews appear to have had a clear conception was *red*; and even this is not very often noticed. They had therefore no scientific knowledge of colours, and we cannot but think that the attempt to explain such passages as Rev. iv. 3 by the rules of philosophical truth, must fail (see Hengstenberg, *Comm.* in loc.). Instead of assuming that the emerald represents *green*, the jasper *yellow*, and the sardine *red*, the idea intended to be conveyed by these images may be simply that of *pure, brilliant, transparent light*. The emerald, for instance, was chiefly prized by the ancients for its *glittering, scintillating* qualities (*αγλαΐα*, Orpheus *de lap.* p. 608), whence perhaps it derived its name (*σμάραγδος*, from *μαρμαρίζω*). The jasper is characterised by St. John himself (Rev. xxi. 11) as being crystal-clear (*κρυσταλλίνον*), and not as having a certain hue. The sardine may be compared with the amber of Ex. i. 4, 27, or the burnished brass of Dan. x. 6, or again the fine brass, "as if burning in a furnace," of Rev. i. 15, each conveying the impression of the colour of fire in a state of pure incandescence. Similarly the

beryl, or rather the *chrysolite* (the Hebrew *Thursia*) may be selected by Daniel (x. 6) on account of its transparency. An exception may be made perhaps in regard to the sulphure, in as far as its hue answers to the deep blue of the firmament (Ex. xxiv. 10; cf. Ex. i. 26, x. 1), but even in this case the pellucidity (לָבָנָה, omitted in A. V., Ex. xxiv. 10) or polish of the stone (compare Lam. iv. 7) forms an important, if not the main, element in the comparison. The highest development of colour in the mind of the Hebrew evidently was *light*, and hence the predominance given to *white* as its representative (compare the connexion between *λευκός* and *lux*). This feeling appears both in the more numerous allusions to it than to any other colour—in the variety of terms by which they discriminated the shades from a *pale, dull tint* (הָהָה, *blackish*, Lev. xiii. 21 ff.) up to the most brilliant splendour (וָהָר, Ex. viii. 2; Dan. xii. 3)—and in the comparisons by which they sought to heighten their ideas of it, an instance of which occurs in the three accounts of the Transfiguration, where the countenance and robes are described as like "the sun" and "the light" (Matt. xvii. 2), "shining, exceeding white as snow" (Mark ix. 3), "glistening" (Luke ix. 29). Snow is used eleven times in a similar way; the sun five times; wool four times; milk once. In some instances the point of the comparison is not so obvious, e.g. in Job xxxviii. 14 "they stand as a garment" in reference to the *white* colour of the Hebrew dress, and in Ps. lxxviii. 13, where the glancing lines of the dove's plumage suggested an image of the brilliant effect of the *white* holiday costume. Next to *white, black*, or rather *dark*, holds the most prominent place, not only as its opposite, but also as representing the complexion of the Orientals. There were various shades of it, including the *brown* of the Nile water (whence its name *Sihor*)—the *reddish* tint of early dawn, to which the complexion of the bride is likened (Cant. vi. 10), as well as the *tawny* hue produced by a flight of locusts (Joel ii. 2)—and the darkness of blackness itself (Lam. iv. 8). As before, we have various heightening images, such as the tents of Kedar, a flock of goats, the raven (Cant. i. 5, iv. 1, v. 11) and sackcloth (Rev. vi. 12). *Red* was also a colour of which the Hebrews had a vivid conception; this may be attributed partly to the prevalence of that colour in the outward aspect of the countries and peoples with which they were familiar, as attested by the name Edom, and by the words *adamah* (earth), and *adam* (man), so termed either as being formed out of the red earth, or as being red in comparison with the fair colour of the Assyrians, and the black of the Ethiopians. Red was regarded as an element of personal beauty: comp. 1 Sam. xvi. 12; Cant. ii. 1, where the lily is the *red* one for which Syria was famed (Psal. xxi. 11); Cant. iv. 3, vi. 7, where the complexion is compared to the red fruit of the pomegranate; and Lam. iv. 7, where the hue of the skin is redder than coral (A. V. "rubies") contrasting with the white of the garments before noticed. The three colours, white, black and red were sometimes internixed in animals, and gave rise to the terms, *צִוְרוֹן*, "dappled" (A. V. "white"), probably white and red (Judg. v. 10); *עֶרֶב*, "ringstruck," either with white bands on the legs, or white-footed; *נֶקֶד*, "speckled," and *מִקְלָה*,

"spotted," white and black; and lustly רָבָה, "piebald" (A. V. "grisdled"), the spots being larger than in the two former (Gen. xxx. 32, 35, xxxi. 10); the latter term is used of a horse (Zech. vi. 3, 6) with a symbolical meaning: Hengstenberg (*Christol.* in loc.) considers the colour itself to be unmeaning, and that the prophet has added the term strong (A. V. "bay") by way of explanation; Hitzig (*Comm.* in loc.) explains it, in a peculiar manner, of the complexion of the Egyptians. It remains for us now to notice the various terms applied to these three colours.

1. WHITE. The most common term is לָבָן, which is applied to such objects as milk (Gen. xlix. 12), manna (Ex. xvi. 31), snow (Is. i. 18), horses (Zech. i. 8), raiment (Eccl. ix. 8); and a cognate word expresses the colour of the moon (Is. xxiv. 23). חָזָק, dazzling white is applied to the complexion (Cant. v. 10); חָנִיף, a term of a later age, to snow (Dan. vii. 9 only), and to the paleness of shame (Is. xxix. 22, חָנִיף; שֵׁיב, to the hair alone. Another class of terms arises from the textures of a naturally white colour, as שֹׁשֶׁבִּי and צִיָּב. These words appear to have been originally of foreign origin, but were connected by the Hebrews with roots in their own language descriptive of a white colour (Ges. *Thesaur.* pp. 190, 1384). The terms were without doubt primarily applied to the material; but the idea of colour is also prominent, particularly in the description of the curtains of the tabernacle (Ex. xxvi. 1), and the priests' vestments (Ex. xxviii. 6). שֹׁשֶׁבִּי is also applied to white marble (Esth. i. 6; Cant. v. 15); and a cognate word, שִׁישׁ, to the lily (Cant. ii. 16). In addition to these we meet with חָנִיף (*βύσσος*, Esth. i. 6, viii. 15), and צִיָּב (*αἰθραός*; A. V. "green," Esth. i. 6), also descriptive of white textures.

White was symbolical of innocence: hence the raiment of angels (Mark xvi. 5; John xx. 12), and of glorified saints (Rev. xix. 8, 14), is so described. It was also symbolical of joy (Eccl. ix. 8); and, lustily, of victory (Zech. vi. 3; Rev. vi. 2). In the Revelations the term λευκός is applied exclusively to what belongs to Jesus Christ (Wordsworth's *Apoc* p. 105).

2. BLACK. The shades of this colour are expressed in the terms שָׁחֹךְ, applied to the hair (Lev. xiii. 31; Cant. v. 11); the complexion (Cant. i. v.), particularly when affected with disease (Job xxx. 30); horses (Zech. vi. 2, 6): שָׁחֹךְ, lit. scorched (*φαῖδς*; A. V. "brown," Gen. xxx. 32), applied to sheep; the word expresses the colour produced by influence of the sun's rays: דָּוָר, lit. to be dirty, applied to a complexion blackened by sorrow or disease (Job xxx. 30); mourner's robes (Jer. viii. 21, xiv. 2; compare *sordidae vestes*); a clouded sky (1 K. xviii. 45); night (Mic. iii. 6; Jer. iv. 28; Joel ii. 10, iii. 15); a turbid brook (whence possibly *KEDRON*), particularly when rendered so by melted snow (Job vi. 16). Black, as being the opposite to white, is symbolical of evil (Zech. vi. 2, 6; Rev. vi. 5).

3. RED. דָּמָם is applied to blood (2 K. iii. 22); a garment sprinkled with blood (Is. lxi. 2); a heifer (Num. xix. 2); pottage made of lentiles (Gen. xxv. 30); a horse (Zech. i. 8, vi. 2); wine (Prov. xxiii.

31); the complexion (Gen. xxv. 25; Cant. v. 10; Lam. iv. 7). דָּמָם is a slight degree of red, reddish, and is applied to a leprous spot (Lev. xiii. 19, xiv. 37). פָּרֶזֶ, lit. fox-coloured, bay, is applied to a horse (A. V. "speckled;" Zech. i. 8), and to a species of vine bearing a purple grape (Is. v. 2, xvi. 8); the translation "bay" in Zech. vi. 3, A. V. is incorrect. The corresponding term in Greek is *πορφύρεος*, lit. red as fire. This colour was symbolical of bloodshed (Zech. vi. 2; Rev. vi. 4, xii. 3).

II. ARTIFICIAL COLOURS. The art of extracting dyes, and of applying them to various textures, appears to have been known at a very early period. We read of scarlet thread at the time of Sarah's birth (Gen. xxxviii. 28); of blue and purple at the time of the Exodus (Ex. xxvi. 1). There is however no evidence to show that the Jews themselves were at that period acquainted with the art: the profession of the dyer is not noticed in the Bible, though it is referred to in the Talmud. They were probably indebted both to the Egyptians and the Phœnicians; to the latter for the dyes, and to the former for the mode of applying them. The purple dyes which they chiefly used were extracted by the Phœnicians (Ex. xxvii. 16; Plin. ix. 60), and in certain districts of Asia Minor (Hom. *Il.* iv. 141), especially Thyatira (Acts xvi. 14). It does not appear that these particular colours were used in Egypt, the Egyptian colours being produced from various metallic and earthy substances (Wilkinson, *Anc. Egypt.* iii. 301). On the other hand, there was a remarkable similarity in the mode of dyeing in Egypt and Palestine, inasmuch as the colour was applied to the raw material, previous to the processes of spinning and weaving (Ex. xxv. 25, xxxix. 3; Wilkinson, iii. 125). The dyes consisted of purples, light and dark (the latter being the "blue" of the A. V.), and crimson (*scarlet*, A. V.); vermilion was introduced at a late period.

1. PURPLE (פָּרֶזֶ; Chaldee form, נִנְיָא, Dan. v. 7, 16; *πορφύρα*; *purpura*). This colour was obtained from the secretion of a species of shell-fish (Plin. ix. 60), the *Murex tricolor* of Linnaeus, which was found in various parts of the Mediterranean Sea (hence called *πορφύρα θαλασσία*, 1 Macc. iv. 23), particularly on the coasts of Phœnicia (Strab. vii. 157), Africa (Strab. xvii. 835), Laconia (Hor. *Od.* ii. 18, 7), and Asia Minor. [ELISHAH.] The derivation of the Hebrew name is uncertain: it has been connected with the Sanscrit *rdgaman*, "tinged with red;" and again with *arghamāna*, "costly" (Hitzig, *Comment. in Dan.* v. 7). Gesenius, however (*Thesaur.* p. 1263), considers it highly improbable that a colour so peculiar to the shores of the Mediterranean should be described by a word of any other than Semitic origin, and connects it with the root דָּרַךְ, to heap up or overlay with colour. The colouring matter was contained in a small vessel in the throat of the fish; and as the quantity amounted to only a single drop in each animal, the value of the dye was proportionately high: sometimes, however, the whole fish was crushed (Plin. ix. 60). It is difficult to state with precision the tint described under the Hebrew name. The Greek equivalent was, we know, applied with great latitude, not only to all colours extracted from the shell-fish, but even to other brilliant colours: thus, in John xii. 2, *ὑμῶν πορφύρεον* = *καλὸς κοκκινῶν*, in Matt. xxvii. 28 (cf

Plin. ix. 62). The same may be said of the Latin *purpureus*. The Hebrew term seems to be applied in a similarly broad sense in Cant. vii. 5, where it either = *black* (compare v. 11), or, still better, *shining* with oil. Generally speaking, however, the tint must be considered as having been defined by the distinction between the purple *proper*, and the other purple dye (A. V. "blue"), which was produced from another species of shell-fish. The latter was undoubtedly a dark violet tint, while the former had a light reddish tinge. Robes of a purple colour were worn by kings (Judg. viii. 26), and by the highest officers, civil and religious; thus Mordecai (Esth. viii. 15), Daniel (A. V. "scarlet," Dan. v. 7, 16, 29), and Andronicus, the deputy of Antiochus (2 Macc. iv. 38), were invested with purple in token of the offices they held (cf. Xen. *Anab.* i. 5, §8); so also Jonathan, as high-priest (1 Macc. x. 20, 64, xi. 58). They were also worn by the wealthy and luxurious (Jer. x. 9; *Ez.* xxvii. 7; Luke xvi. 19; Rev. xvii. 4, xviii. 16). A similar value was attached to purple robes both by the Greeks (Hom. *Od.* ix. 225; Herod. ix. 22; Strab. xiv. 648), and by the Romans (Virg. *Georg.* ii. 495; Hor. *Ep.* 12, 21; Suet. *Cues.* 43; *Nero*, 32). Of the use of this and the other dyes in the textures of the tabernacle, we shall presently speak.

2. BLUE (חֹבֶלֶת; *δακτυλος, δακτυλινος, δολοπόρφυρος*, Num. iv. 7; *hyacinthus, hyacinthinus*). This dye was procured from a species of shell-fish found on the coast of Phœnicia, and called by the Hebrews *Chilzon* (Targ. *Pseudo-Jon.*, in Deut. xxxiii. 19), and by modern naturalists *Haliæ lunithus*. The Hebrew name is derived, according to Gesenius (*Theaur.* p. 1502), from a root signifying to *unshell*; but according to Hitzig (*Comment.* in Ez. xliii. 6), from חָלַל, in the sense of *dulled, blunted*, as opposed to the brilliant hue of the proper purple. The tint is best explained by the statements of Josephus (*Ant.* iii. 7, §7) and Philo that it was emblematic of the sky, in which case it represents not the light blue of our northern climate, but the deep dark hue of the eastern sky (*ἀέρος δὲ σέμβολον δακύνθος, μέλας γὰρ οὗτος φύσει*, Phil. *Opp.* i. 530). The term adopted by the LXX. is applied by classical writers to a colour approaching to black (Hom. *Od.* vi. 231, xliii. 158; Theoc. *Id.* 10, 28): the flower, whence the name was borrowed, being, as is well known, not the modern *hyacinth*, but of a dusky red colour (*ferrugineus*, Virg. *Georg.* iv. 183; *oculeatis lumen hyacinthus*, Colum. ix. 4, 4). The A. V. has rightly described the tint in Esth. i. 6 (margin) as *violet*; the ordinary term *blue* is incorrect: the Lutheran translation is still more incorrect in giving it *gelbe Seide* (yellow silk), and occasionally simply *Seide* (Ez. xliii. 6). This colour was used in the same way as purple. Princes and nobles (Ez. xliii. 6; Eccles. xl. 4), and the idols of Babylon (Jer. x. 9), were clothed in robes of this tint: the riband and the fringe of the Hebrew dress was ordered to be of this colour (Num. xv. 38): it was used in the tapestries of the Persians (Esth. i. 6). The effect of the colour is well described in Ez. xliii. 12, where such robes are termed מְבֹרָשׁ מְבֹרָשׁ, *robes of perfection*, i. e. gorgeous robes. We may remark, in conclusion, that the LXX. treats the term חֹבֶלֶת (A. V. "badger") as indicative of colour, and has translated it *δακτυλινος, iunithinus* (Ez. xxv. 5).

3. SCARLET (CRIMSON, Is. i. 18; Jer. iv. 30). The terms by which this colour is expressed in Hebrew vary; sometimes שָׁנִי simply is used, as in Gen. xxxviii. 28-30; sometimes שָׁנִי חֹבֶלֶת, as in Ex. xxv. 4; and sometimes חֹבֶלֶת שָׁנִי simply, as in Is. i. 18. The word צְרִימָלִי (A. V. "crimson;" 2 Chr. ii. 7, 14, iii. 14) was introduced at a late period, probably from Armenia, to express the same colour. The first of these terms (derived from שָׁנִי, to *shine*) expresses the *brilliance* of the colour; the second, חֹבֶלֶת, the *worm*, or grub, whence the dye was procured, and which gave name to the colour occasionally without any addition, just as *vermillion* is derived from *vermiculus*. The LXX. generally renders it *κόκκινον*, occasionally with the addition of such terms as *κεκλωσμένον* (Ez. xxvi. 1), or *διανεγισμένον* (Ez. xxviii. 8): the Vulgate has it generally *coccineum*, occasionally *coccus distictus* (Ez. xlviii. 8), apparently following the erroneous interpretation of Aquila and Symmachus, who render it *βιβαφος, double-dyed* (Ez. xxv. 4), as though from שָׁנִי, to *repeat*. The process of double-dyeing was however peculiar to the Tyrian purples (Plin. ix. 39). The dye was produced from an insect, somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other eastern countries. The Arabian name of the insect is *kermes* (whence *crimson*): the Linnæan name is *Coccus ilicis*. It frequents the boughs of a species of *ilac*: on these it lays its eggs in groups, which become covered with a kind of down, so that they present the appearance of vegetable galls or excrescences from the tree itself, and are described as such by Pliny, xvi. 12. The dye is procured from the female grub alone, which, when alive, is about the size of a kernel of a cherry and of a dark amaranth colour, but when dead shrivels up to the size of a grain of wheat, and is covered with a bluish mould (Parrot's *Journey to Ararat*, p. 114). The general character of the colour is expressed by the Hebrew term צְרִימָלִי (Is. lxi. 1), lit. *sharp*, and hence dazzling (compare the expression *חרמלם דָּבָר*), and in the Greek *λαμπρά* (Luke xlii. 11), compared with *κοκκινῇ* (Matt. xxvii. 28). The tint produced was *crimson* rather than scarlet. The only natural object to which it is applied in Scripture is the lips, which are compared to a scarlet thread (Cant. iv. 3). Josephus considered it as symbolical of fire (*Ant.* iii. 7, §7; cf. Phil. i. 536). Scarlet threads were selected as distinguishing marks from their brilliancy (Gen. xxxviii. 28; Josh. ii. 18, 21); and hence the colour is expressive of what is *excessive* or *glaring* (Is. i. 18). Scarlet robes were worn by the luxurious (2 Sam. i. 24; Prov. xxxi. 21; Jer. iv. 30; Lam. iv. 5; Rev. xvii. 4, xviii. 12, 16); it was also the appropriate hue of a warrior's dress from its similarity to blood (Nah. ii. 3; cf. Is. ix. 5), and was especially worn by officers in the Roman army (Plin. xii. 3; Matt. xxvii. 28).

The three colours above described, purple, blue, and scarlet, together with white, were employed in the textures used for the curtains of the tabernacle and for the sacred vestments of the priests. The four were used in combination in the outer curtains, the veil, the entrance curtain (Ez. xxvi. 1, 31, 36), and the gate of the court (Ez. xxvii. 16); as also in the high priest's ephod, girdle and breast-

plate (Ex. xxviii. 5, 6, 8, 15). The three first, to the exclusion of white, were used in the pomegranates about the hem of the high-priest's robe (Ex. xxviii. 33). The loops of the curtains (Ex. xxvi. 4), the lace of the high-priest's breastplate, the robe of the ephod, and the lace on his mitre were exclusively of blue (Ex. xxviii. 28, 31, 37). Cloths for wrapping the sacred utensils were either blue (Num. iv. 6), scarlet (8), or purple (13). Scarlet thread was specified in connexion with the rites of cleansing the leper (Lev. xiv. 4, 6, 51), and of burning the red heifer (Num. xix. 6), apparently for the purpose of binding the hyssop to the cedar wood. The hangings for the court (Ex. xxvii. 9, xxxviii. 9), the coats, mitres, bouquets, and breeches of the priests were white (Ex. xxxix. 27, 28). The application of these colours to the service of the tabernacle has led writers both in ancient and modern times to attach some symbolical meaning to them: reference has already been made to the statements of Philo and Josephus on this subject: the words of the latter are as follow: ἡ βύσσος τὴν γῆν ἀποσημαίνει εὐκεία, διὰ τὸ ἐξ αὐτῆς ἀνείσθαι τὸ λίνον· ἡ τε πορφύρα τὴν θάλασσαν, τῇ πεφοινίχθαι τοῦ κόχλου τῷ ὡματι τὸν δὲ ἀέρα βούλεται δηλοῦν δ' ὀκείαντες· καὶ δ' φοινίξ δ' ἀν εἰς τεκμήριον τοῦ πυρός, *Ant.* iii. 7, §7. The subject has been followed up with a great variety of interpretations, more or less probable. Without entering into a disquisition on these, we will remark that it is unnecessary to assume that the colours were originally selected with such a view; their beauty and costliness is a sufficient explanation of the selection.

4. VERMILION (ὤψ; μίλος; *sinopsis*). This was a pigment used in fresco paintings, either for drawing figures of idols on the walls of temples (*Ex.* xxiii. 14), for colouring the idols themselves (*Wisd.* xiii. 14), or for decorating the walls and beams of houses (*Jer.* xxii. 14). The Greek term μίλος is applied both to *minium*, red lead, and *rubrica*, red ochre; the Latin *sinopsis* describes the best kind of ochre, which came from Sinope. Vermilion was a favourite colour among the Assyrians (*Ex.* xxiii. 14), as is still attested by the sculptures of Nimroud and Khorsabad (*Layard*, ii. 303). [W. L. B.]

COMMERCE (1. ἡμέτις, *Gesen.* p. 946; ἐμπορία; *negotiatio*; from ἡμέτις, a merchant, from ἡμέτις, travel, *Ex.* xxvii. 15; A. V., *merchandise*, *traffic*: 2. ἡμέτις, *Gesen.* p. 1289; *Ex.* xxvi. 12, τὰ ὀπάρχοντα; *negotiations*; in xxviii. 5, 16, 18, ἐμπορία, *negotiatio*, from ἡμέτις, travel).

From the time that men began to live in cities, trade, in some shape, must have been carried on to supply the town-dwellers with necessaries (see Heeren, *Afr. Nat.* i. 469), but it is also clear that international trade must have existed and affected to some extent even the pastoral nomade races, for we find that Abraham was rich, not only in cattle, but in silver, gold, and gold and silver plate and ornaments (*Gen.* xiii. 2, xxiv. 22, 58); and further, that gold and silver in a manufactured state, and silver, not improbably in coin, were in use both among the settled inhabitants of Palestine and the pastoral tribes of Syria at that date (*Gen.* xx. 16, xxiii. 16, xxxviii. 18; *Job* xlii. 11), to whom those metals must in all probability have been imported from other countries (*Hosey, Anc. Weights*, c. xii. 3 p.

193; *Kitto, Phys. Hist. of Pal.*, p. 109, 110; *Herod.* i. 215).

Among trading nations mentioned in Scripture, Egypt holds in very early times a prominent position, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of the nomade races (Heeren, *Afr. Nat.* i. 468, ii. 371, 372). It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt, and the account shows that slaves formed sometimes a part of the merchandize imported (*Gen.* xxxvii. 25, xxxix. 1; *Job* vi. 19). From Egypt it is likely that at all times, but especially in times of general scarcity, corn would be exported, which was paid for by the non-exporting nations in silver, which was always weighed (*Gen.* xli. 57, xlii. 3, 25, 35, xliiii. 11, 12, 21). These caravans also brought the precious stones as well as the spices of India into Egypt (*Ex.* xxv. 3, 7; *Wilkinson, Anc. Eg.* ii. 235, 237). Intercourse with Tyre does not appear to have taken place till a later period, and thus, though it cannot be determined whether the purple in which the Egyptian woollen and linen cloths were dyed was brought by land from Phoenicia, it is certain that coloured cloths had long been made and dyed in Egypt, and the use, at least, of them adopted by the Hebrews for the tabernacle as early as the time of Moses (*Ex.* xxv. 4, 5; Heeren, *Asiat. Nat.* i. 352; *Herod.* i. 1). The pasture-ground of Shechem appears from the story of Joseph to have lain in the way of these caravan journeys (*Gen.* xxvii. 14, 25; *Saalschütz, Hebr. Arch.* 15, l. 159).

At the same period it is clear that trade was carried on between Babylon and the Syrian cities, and also that gold and silver ornaments were common among the Syrian and Arabian races; a trade which was obviously carried on by land-carriage (*Num.* xxxi. 50; *Josh.* vii. 21; *Judg.* v. 30, viii. 24; *Job* vi. 19).

Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, and strict rules for morality in commercial dealings were laid down by it (*Deut.* xxviii. 12, xxv. 13-16; *Lev.* xix. 35, 36), and the tribes near the sea and the Phœnician territory appear to have engaged to some extent in maritime affairs (*Gen.* xlix. 13; *Deut.* xxxiii. 18; *Judg.* v. 17), but the spirit of the Law was more in favour of agriculture and against foreign trade (*Deut.* xvii. 16, 17; *Lev.* xxv.; *Joseph. c. Apion.* i. 12). Solomon, however, organized an extensive trade with foreign countries, but chiefly, at least so far as the more distant nations were concerned, of an import character. He imported linen yarn, horses, and chariots from Egypt. Of the horses some appear to have been resold to Syrian and Canaanite princes. For all these he paid in gold, which was imported by sea from India and Arabia by his fleets in conjunction with the Phœnicians (Heeren, *Afr. Nat.* i. 334; 1 K. x. 22-29; *Gesen.* p. 1202). It was by Phœnicians also that the cedar and other timber for his great architectural works was brought by sea to Joppa, whilst Solomon found the provisions necessary for the workmen in Mount Lebanon (1 K. v. 8, 9; 2 Chr. ii. 16).

The united fleets used to sail into the Indian Ocean every three years from Elath and Esiongeber, ports on the Arabian gulf of the Red Sea, which David had probably gained from Edom, and brought back gold, silver, ivory, sandal-wood, ebony, precious stones, apes, and peacocks. Some

of these may have come from India and Ceylon, and some from the coasts of the Persian Gulf and the E. coast of Africa (2 Sam. viii. 14; 1 K. ix. 26, x. 11, 22; 2 Chr. viii. 17; Her. iii. 114; Livingstone, *Travels*, p. 637, 662).

But the trade which Solomon took so much pains to encourage was not a maritime trade only. He built, or more probably fortified, Baalbec and Palmyra; the latter at least expressly as a caravan station for the land-commerce with eastern and south-eastern Asia (1 K. ix. 18).

After his death the maritime trade declined, and an attempt made by Jehoshaphat to revive it proved unsuccessful (1 K. xxii. 48, 49) [TAISHIM, OPHIR]. We know, however, that Phœnicia was supplied from Judæa with wheat, honey, oil, and balm (1 K. v. 11; Ezek. xxvii. 17; Acts xii. 20; Joseph. *B. J.* ii. 21, §2; *Vit.* 13), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from captivity (Neh. xiii. 16), as well as timber for the rebuilding of the temple, which then, as in Solomon's time, was brought by sea to Joppa (Ezr. iii. 7). Oil was exported to Egypt (Hos. xii. 1), and fine linen and ornamental girdles of domestic manufacture were sold to the merchants (Prov. xxxi. 24).

The successive invasions to which Palestine was subjected, involving both large abstraction of treasure by invaders and heavy imposts on the inhabitants to purchase immunity or to satisfy demands for tribute must have impoverished the country from time to time (under Rehoboam, 1 K. xiv. 26; Asa, xv. 18; Josiah, 2 K. xii. 18; Amaziah, xiv. 13; Ahaz, xvi. 8; Hezekiah, xviii. 15-16; Jehohaz and Jehoakim, xxiii. 33, 35; Jehoiachin, xxiv. 13), but it is also clear, as the denunciations of the prophets bear witness, that much wealth must somewhere have existed in the country, and much foreign merchandise have been imported; so much so that, in the language of Ezekiel, Jerusalem appears as the rival of Tyre, and through its port, Joppa, to have carried on trade with foreign countries (Is. ii. 6, 16, iii. 11, 23; Hos. xii. 7; Ez. xxi. 2; Jonah i. 3; Heeren, *As. Nat.* i. p. 328).

Under the Maccabees Joppa was fortified (1 Mac. xiv. 34), and later still Caesarea was built and made a port by Herod (Joseph. *Ant.* xv. 9, §6; Acts xxvii. 2). Joppa became afterwards a haunt for pirates, and was taken by Cestius; afterwards by Vespasian, and destroyed by him (Strab. xvi. p. 758; Joseph. *B. J.* ii. 18, §10, iii. 9, §1).

The internal trade of the Jews, as well as the external, was much promoted, as was the case also in Egypt, by the festivals, which brought large numbers of persons to Jerusalem, and caused great outlay in victims for sacrifices and in incense (1 K. viii. 63; Heeren, *Afr. Nat.* ii. 363).

The places of public market were, then as now, chiefly the open spaces near the gates, to which goods were brought for sale by those who came from the outside (Neh. xiii. 15, 16; Zeph. i. 10).

The traders in later times were allowed to intrude into the temple, in the outer courts of which victims were publicly sold for the sacrifices (Zech. xiv. 21; Matt. xxi. 12; John ii. 14).

In the matter of buying and selling great stress is laid by the Law on fairness in dealing. Just weights and balances are stringently ordered (Lev. xix. 35, 36; Deut. xxv. 13-16). Kidnapping slaves is forbidden under the severest penalty (Ex. xxi. 16; Deut. xxiv. 7). Trade in swine was for-

bidden by the Jewish doctors (Surenhus. *Mischn. de damn.* c. 7, vol. iv. 60; Lightfoot, *H. H. on Matth.* viii. 33; Winer, *Handel*; Nalischütz, *Arch. Hebr.* c. 15, 16).

CONAN'IAH (כֹּנַנְיָהוּ; *Xonenas*; Alex. *Xoxenas*; *Chonenias*), one of the chiefs (שָׂרֵי) of the Levites in the time of Josiah (2 Chr. xxxv. 9). The same name is elsewhere given in the A. V. CONONIAH.

CONCUBINE. פְּלִנְיָה appears to have been included under the general conjugal sense of the word נִשְׂתָּה, which in its limited sense is rendered "wife." The positions of these two among the early Jews cannot be referred to the standard of our own age and country; that of concubine being less degraded, as that of wife was, especially owing to the sanction of polygamy, less honourable than among ourselves. The natural desire of offspring was, in the Jew, consecrated into a religious hope, which tended to redeem concubinage from the debasement into which the grosser motives for its adoption might have brought it. The whole question must be viewed from the point which touches the interests of propagation, in virtue of which even a slave concubine who had many children would become a most important person in a family, especially where a wife was barren. Such was the true source of the concubinage of Nachor, Abrahah, and Jacob, which indeed, in the two latter cases, lost the nature which it has in our eyes, through the process, analogous to adoption, by which the offspring was regarded as that of the wife herself. From all this it follows that, save in so far as the latter was generally a slave, the difference between wife and concubine was less marked, owing to the absence of moral stigma, than among us. We must therefore beware of regarding as essential to the relation of concubinage, what really pertained to that of bondage.

The concubine's condition was a definite one, and quite independent of the fact of there being another woman having the rights of wife towards the same man. The difference probably lay in the absence of the right of the *libellus divoritii*, without which the wife could not be repudiated, and in some particulars of treatment and consideration of which we are ignorant; also in her condition and rights on the death of her lord, rather than in the absence of nuptial ceremonies and dowry, which were non-essential; yet it is so probable that these last did not pertain to the concubine, that the assertion of the Gemara (*Hierosol. Chetiboth*, v.) to that effect, though controverted, may be received. The doctrine that a concubine also could not be dismissed without a formal divorce is of later origin—not that such dismissals were more frequent, probably, than those of wives—and negatived by the silence of Ex. xxi., and Deut. xxi. regarding it. From this it seems to follow that a concubine could not become a wife to the same man, nor *vicio versâ*, unless in the improbable case of a wife divorced returning as a concubine. With regard to the children of wife and concubine, there was no such difference as our illegitimacy implies; the latter were a supplementary family to the former, their names occur in the patriarchal genealogies (Gen. xxii. 24; 1 Chr. i. 32), and their position and provision, save in the case of defect of those former (in which case they might probably succeed to

landed estate or other chief hostage), would depend on the father's will (Gen. xxv. 6). The state of concubinage is assumed and provided for by the law of Moses. A concubine would generally be either (1) a Hebrew girl bought of her father, i. e. a slave, which alone the Rabbins regard as a lawful connexion (Maimon. *Halach-Melakin*, iv.), at least for a private person; (2), a gentile captive taken in war; (3), a foreign slave bought, or (4) a Canaanitish woman, bond or free. The rights of (1) and (2) were protected by law (Ex. xxi. 7; Deut. xxi. 10), but (3) was unrecognised, and (4) prohibited. Free Hebrew women also might become concubines. So Gideon's concubine seems to have been of a family of rank and influence in Shechem, and such was probably the state of the Levite's concubine (Judg. xx.). The ravages of war among the male sex, or the impoverishment of families might often induce this condition. The case (1) was not a hard lot. The passage in Ex. xxi. is somewhat obscure, and seems to mean, in brief, as follows:—A man who bought a Hebrew girl as concubine for himself might not treat her as a mere Hebrew slave, to be sent "out" (i. e. in the seventh, v. 2), but might, if she displeased him, dismiss her to her father on redemption, i. e. repayment probably of a part of what he paid for her. If he had taken her for a concubine for his son, and the son then married another woman, the concubine's position and rights were secured, or, if she were refused these, she became free without redemption. Further, from the provision in the case of such a concubine given by a man to his son, that she should be dealt with "after the manner of daughters," we see that the servile merged in the connubial relation, and that her children must have been free. Yet some degree of contempt attached to the "handmaid's son" (עַבְד־בֶּן) used reproachfully to the son of a concubine merely in Judg. ix. 18; see also Ps. cxvi. 16. The provisions relating to (2) are merciful and considerate to a rare degree, but overlaid by the Rabbis with distorting comments.

In the books of Samuel and Kings the concubines mentioned belong to the king, and their condition and number cease to be a guide to the general practice. A new king stepped into the rights of his predecessor, and by Solomon's time the custom had approximated to that of a Persian harem (2 Sam. xii. 8, xvi. 21; 1 K. ii. 22). To seize on royal concubines for his use was thus an usurper's first act. Such was probably the intent of Abner's act (2 Sam. iii. 7), and similarly the request on behalf of Adonijah was construed (1 K. ii. 21-24). For fuller information Selden's treatises *de Uxore Hebraea* and *de Jure Natur. et Gent.* v. 7, 8, and especially that *de Successionibus*, cap. iii., may with some caution (since he leans somewhat easily to rabbinical tradition) be consulted; also the treatises *Sotah*, *Kidushim*, and *Chetuboth* in the Gemara Hierosol., and that entitled *Sanhadrin* in the Gemara Babyl. The essential portions of all these are collected in Ugolini, vol. xxx. *de Uxore Hebraea*. [H. H.]

**CONDUIT** (מִנְיָן); ὑδραγωγός; *aqueductus*; a trench or watercourse, from מִנְיָן, to ascend, German, p. 1022).

1. Although no notice is given either by Scripture or by Josephus of any connexion between the pools

of Solomon beyond Bethlehem and a supply of water for Jerusalem, it seems unlikely that so large a work as the pools should be constructed merely for irrigating his gardens (Eccl. ii. 6), and tradition, both oral and as represented by Talmudical writers, ascribes to Solomon the formation of the original aqueduct by which water was brought to Jerusalem (Maundrell, *Early Trav.* p. 458; Hasselquist, *Trav.* 146; Lightfoot, *Descr. Temp.* c. xxiii. vol. i. 612; Robinson, i. 265). Pontius Pilate applied the sacred treasure of the Corban to the work of bringing water by an aqueduct from a distance, Josephus says of 300 or 400 stadia (*B. J.* ii. 9, §4), but elsewhere 200 stadia, a distance which would fairly correspond with the length of the existing aqueduct with all its turns and windings (*Ant.* xviii. 3, §2; Williams, *Holy City*, ii. 501). His application of the money in this manner gave rise to a serious disturbance. Whether his work was a new one or a reparation of Solomon's original aqueduct cannot be determined, but it seems more than probable that the ancient work would have been destroyed in some of the various sieges since Solomon's time. The aqueduct, though much injured, and not serviceable for water beyond Bethlehem, still exists: the water is conveyed from the fountains which supply the pools about two miles S. of Bethlehem. The watercourse then passes from the pools in a N.E. direction, and winding round the hill of Bethlehem on the S. side, is carried sometimes above and sometimes below the surface of the ground, partly in earthen pipes and partly in a channel about one foot square of rough stones laid in cement, till it approaches Jerusalem. There it crosses the valley of Hinnom at the S.W. side of the city on a bridge of nine arches at a point above the pool called *Birket-es-Sultan*, then returns S.E. and E. along the side of the valley and under the wall, and continuing its course along the east side is finally conducted to the Haam. It was repaired by Sultan Mohammed Ibn-Kalaün of Egypt about A.D. 1300 (Williams, *Holy City*, ii. 498; Raumer, *Pal.* p. 280; Robinson, i. 265-267, 347, 476, iii. 247).

2. Among the works of Hezekiah he is said to have stopped the "upper watercourse of Gihon," and brought it down straight to the W. side of the city of David (2 Chr. xxxii. 30). The direction of this watercourse of course depends on the site of Gihon. Dr. Robinson identifies this with the large pool called *Birket-es-Mamilla* at the head of the valley of Hinnom on the S.W. side of Jerusalem, and considers the lately-discovered subterranean conduit within the city to be a branch from Hezekiah's watercourse (Rob. iii. 243-4, i. 327; Ges. pp. 616, 1395). Mr. Williams, on the other hand, places Gihon on the N. side, not far from the tombs of the kings, and supposes the watercourse to have brought water in a S. direction to the temple, whence it flowed ultimately into the Pool of Siloam, or Lower Pool. One argument which recommends this view is found in the account of the interview between the emissaries of Sennacherib and the officers of Hezekiah, which took place "by the conduit of the upper pool in the highway of the fuller's field" (2 K. xviii. 17), whose site seems to be indicated by the "fuller's monument" mentioned by Josephus as at the N.E. side of the city, and by the once well-known site called the Camp of the Assyrians (Joseph. *B. J.* v. 4, §2, 7, §3, and 12, §2). [*Gihon*; *JERUSALEM*.] [H. W. P.]

**CONEY** (צִנְצִי; *δαύπους, χοιρογρύλλιος*, v. l. *λαγώς*; *Choerogryllus, herimacensis, lepusculus*); a gregarious animal of the class Pachydermata, which is found in Palestine, living in the caves and clefts of the rocks, and has been erroneously identified with the Rabbit or Coney. Its scientific name is *Hyrax Syriacus*. The צִנְצִי is mentioned four times in the O. T. In Lev. xi. 5 and in Deut. xiv. 7 it is declared to be unclean, because it chews the cud, but does not divide the hoof. In Is. civ. 18 we are told "the rocks are a refuge for the coney," and in Prov. xxx. 26 that "the coney are but a feeble folk, yet make they their houses in the rocks." The *Hyrax* satisfies

*Hyrax Syriacus.* (From a specimen in the British Museum.)

exactly the expressions in the two last passages; and its being reckoned among the ruminating animals is no difficulty, the hare being also erroneously placed by the sacred writers in the same class, because the action of its jaws resembles that of the ruminating animals. Its colour is grey or brown on the back, white on the belly; it is like the alpine marmot, scarcely of the size of the domestic cat, having long hair, a very short tail, and round ears. It is very common in Syria, especially on the ridges of Lebanon, and is found also in Arabia Petraea, Upper Egypt, Abyssinia and Palestine (Wilson, *Lands of the Bible*, ii. 28 sq.). The

Arabs call the צִנְצִי *wabr*; but among the southern Arabs we find the term ثفن, *thofun* = *sháphán* (Fresnel in *Asiatic Journ.* June, 1838, p. 514). The Amharic name is *aschkhókh*, under which name the *Hyrax* is described by Bruce, who also gives a figure of it, and mentions the fact that the Arabs also called it غنم بني اسرائيل, sheep of the children of Israel. The *Hyrax* is mentioned by Robinson (iii. 387), as occurring in the sides of the chasm of the Litany opposite to *Belit*. He says that it is seen coming out of the clefts of the rocks in winter at midday; in summer only towards evening. The derivation of צִנְצִי from the unused root, צָנַץ, to hide, chiefly in the earth, is obvious. [W. D.]

**CONGREGATION** (עֲדָתָא, קִהְלָה, from קָהַל, to call = *convocation*; *συναγωγή; ἐκκλησία*, in Deut. xvii. 16, xxii. 1; *congregatio, ecclesia, coetus*). This term describes the Hebrew people in its collective capacity under its peculiar aspect as a holy community, held together by religious rather than political bonds. Sometimes it is used in a broad sense as inclusive of foreign settlers (Ex. xii. 19); but more properly, as exclusively appropriate to the Hebrew element of the population (Num. xv. 15); in each case it expresses the idea of the Roman

*Civitas* or the *ἑθνικὴ πολιτεία*. Every circumcised Hebrew (עֲרֵב; *αὐτόχθων*; *indigena*; A. V. "home-born, born in the land," the term specially descriptive of the Israelite in opposition to the non-Israelite, Ex. xii. 19; Lev. xvi. 29; Num. ix. 14) was a member of the congregation, and took part in its proceedings, probably from the time that he bore arms. It is important, however, to observe that he acquired no political rights in his individual capacity, but only as a member of a *house*; for the basis of the Hebrew polity was the house, whence was formed in an ascending scale the *family* or collection of houses, the *tribe* or collection of families, and the *congregation* or collection of tribes. Strangers (עֲרֵב) settled in the land, if circumcised, were with certain exceptions (Deut. xxiii. 1 ff.) admitted to the privilege of citizenship, and are spoken of as members of the congregation in its more extended application (Ex. xii. 19; Num. ix. 14, xv. 15); it appears doubtful however whether they were represented in the congregation in its corporate capacity as a deliberative body, as they were not strictly speaking members of any house; their position probably resembled that of the *πρόξενοι* at Athens. The congregation occupied an important position under the Theocracy, as the *comitia* or national parliament, invested with legislative and judicial powers. In this capacity it acted through a system of patriarchal representation, each house, family, and tribe being represented by its head or father. These delegates were named עֲלֵיזָבִית, זָבִית (προβύτεροι; *seniores*; "elders"); צִנְצִי (ἀρχοντες; *principes*; "princes"); and sometimes עֲלֵיזָבִית (ἐκκληῖται; *qui vocabantur*, Num. xvi. 2; A. V. "known", "famous"). The number of these representatives being inconveniently large for ordinary business, a further selection was made by Moses of 70, who formed a species of standing committee (Num. xi. 16). Occasionally indeed the whole body of the people was assembled, the mode of summoning being by the sound of the two silver trumpets, and the place of meeting the door of the tabernacle, hence usually called the tabernacle of the congregation (מִדְבָּר, lit. *place of meeting*) (Num. x. 3); the occasions of such general assemblies were solemn religious services (Ex. xii. 47; Num. xxv. 6; Joel ii. 15), or to receive new commitments (Ex. xix. 7, 8; Lev. viii. 4). The elders were summoned by the call of one trumpet (Num. x. 4), at the command of the supreme governor or the high priest; they represented the whole congregation on various occasions of public interest (Ex. iii. 16, xii. 21, xvii. 5, xxiv. 1); they acted as a court of judicature in capital offences (Num. xv. 32, xxxv. 12), and were charged with the execution of the sentence (Lev. xxiv. 14; Num. xv. 35); they joined in certain of the sacrifices (Lev. iv. 14, 15); and they exercised the usual rights of sovereignty, such as declaring war, making peace and concluding treaties (Josh. ix. 15). The people were strictly bound by the acts of their representatives, even in cases where they disapproved of them (Josh. ix. 18). After the occupation of the land of Canaan, the congregation was assembled only on matters of the highest importance. The delegates were summoned by messengers (2 Chr. xxx. 6) to such places as might be appointed, most frequently to Mizpeh (Judg. x. 17, xi. 11, xx. 1; 1 Sam. vii. 5, x. 17; 1 Macc.

iii. 46); they came attended each with his band of retainers, so that the number assembled was very considerable (Judg. xx. 2 ff.). On one occasion we hear of the congregation being assembled for judicial purposes (Judg. xi.); on other occasions for religious festivals (2 Chr. xxx. 5, xxxiv. 29); on others for the election of kings, as Saul (1 Sam. x. 17), David (2 Sam. v. 1), Jeroboam (1 K. xii. 20), Jotham (2 K. xi. 19), Josiah (2 K. xxi. 24), Jehoahaz (2 K. xxiii. 30), and Uzziah (2 Chr. xxvi. 1). In the later periods of Jewish history the congregation was represented by the Sanhedrim; and the term *συναγωγή*, which in the LXX. is applied exclusively to the congregation itself (for the place of meeting *מִקְדָּשׁ* is invariably rendered *ἡ συναγωγή τοῦ ναβουρίου*, *tabernaculum testinonii*, the word *מִקְדָּשׁ* being considered = *עֲדוּת*), was transferred to the places of worship established by the Jews, wherever a certain number of families were collected. [W. L. B.]

### CONIAH. [JECONIAH.]

CONONIAH (כֹּנַנְיָהוּ; *Κωνενίας*; Alex. *Χωνενίας*; *Chonenias*), a Levite, ruler (נָדָב) of the offerings and tithes in the time of Hezekiah (2 Chr. xxxi. 12, 13). [See CONANIAH.]

### CONSECRATION. [PRIEST.]

CONVOCATION (מִקְרָא, from *קָרָא*, *vocare*; comp. Num. x. 2; Is. i. 13). This term is applied invariably to meetings of a religious character, in contradistinction to *congregation*, in which political and legal matters were occasionally settled. Hence it is connected with *קָדֵשׁ*, *holy*, and is applied only to the Sabbath and the great annual festivals of the Jews (Ex. xii. 16; Lev. xxiii. 2 ff.; Num. xxviii. 18 ff., xxix. 1 ff.). With one exception (Is. i. 13), the word is peculiar to the Pentateuch. The LXX. treats it as an adjective = *καθῆρτός*, *ἐκκλητικός*; but there can be no doubt that the A. V. is correct in its rendering. [W. L. B.]

COOKING. As meat did not form an article of ordinary diet among the Jews, the art of cooking was not carried to any perfection. The difficulty of preserving it from putrefaction necessitated the immediate consumption of an animal, and hence few were slaughtered except for purposes of hospitality or festivity. The proceedings on such occasions appear to have been as follow:—On the arrival of a guest the animal, either a kid, lamb, or calf was killed (Gen. xviii. 7; Luke xv. 23), its throat being cut so that the blood might be poured out (Lev. vii. 26); it was then flayed and was ready either for roasting (צֶלֶה) or boiling (בִּישַׁל): in the former case the animal was preserved entire (Ex. xii. 46), and roasted either over a fire (Ex. xii. 8) of wood (Is. xiv. 16), or perhaps, as the mention of fire implies another method, in an oven, consisting simply of a hole dug in the earth, well heated, and covered up (Burckhardt, *Notes on Bedouins*, i. 240); the Paschal lamb was roasted by the first of these methods (Ex. xii. 8, 9; 2 Chr. xxxv. 13). Boiling, however, was the more usual method of cooking, both in the case of sacrifices, other than the Paschal lamb (Lev. viii. 31), and for domestic use (Ex. xvi. 23), so much so that *בִּישַׁל* = to cook generally, including even

roasting (Deut. xvi. 7). In this case the animal was cut up, the right shoulder being first taken off (hence the priest's joint, Lev. vii. 32), and the other joints in succession; the flesh was separated from the bones, and minced, and the bones themselves were broken up (Mic. iii. 3); the whole mass was then thrown into a caldron (Ex. xxiv. 4, 5) filled with water (Ex. xii. 9), or, as we may infer from Ex. xxiii. 19, occasionally with milk, as is still usual among the Arabs (Burckhardt, *Notes*, i. 63), the prohibition "not to seethe a kid in his mother's milk" having reference apparently to some heathen practice connected with the offering of the first-fruits (Ex. l. c.; xxxiv. 26), which rendered the kid so prepared unclean food (Deut. xiv. 21). The caldron was boiled over a wood fire (Ex. xxiv. 10); the scum which rose to the surface was from time to time removed, otherwise the meat would turn out loathsome (6); salt or spices were thrown in to season it (10); and when sufficiently boiled, the meat and the broth (סֵנֶר; *σώμς*, LXX.; *jus*, Vulg.) were served up separately (Judg. vi. 19), the broth being used with unleavened bread, and butter (Gen. xviii. 8) as a sauce for dipping morsels of bread into (Burckhardt's *Notes*, i. 63). Sometimes the meat was so highly spiced that its flavour could hardly be distinguished; such dishes were called *מִטְעָמִים* (Gen. xxvii. 4; Prov. xxiii. 3). There is a striking similarity in the culinary operations of the Hebrews and Egyptians (Wilkinson's *Anc. Egypt*. ii. pp. 374 ff.). Vegetables were usually boiled, and served up as pottage (Gen. xxv. 29; 2 K. iv. 38). Fish was also cooked (ἰχθύος ὀστροῦ μέσος; *piscis assi*; Luke xiv. 42), probably broiled. The cooking was in early times performed by the mistresses of the household (Gen. xviii. 6); professional cooks (טְבָחִים) were afterwards employed (1 Sam. viii. 13, ix. 23). The utensils required were—*בִּירִיט* (*χυτρόποδες*; *chytropodes*), a cooking range, having places for two or more pots, probably of earthenware (Lev. xi. 35); *פִּיר* (*λέβης*, *lebes*), a caldron (1 Sam. ii. 14); *מִזְלֵג* (*κρεάγχα*; *fuscinda*), a large fork or flesh-hook; *סִיר* (*λέβης*; *olla*), a wide open, metal vessel, resembling a fish-kettle, adapted to be used as a wash-pot (Ps. lx. 8), or to eat from (Ex. xvi. 3); *פָּרֹר*, *דִּיר*, *קַלְחָת*, pots probably of earthenware and high, but how differing from each other does not appear; and, lastly, *צֶלֶחַת*, or *צֶלֶחֻיחַ*, dishes (2 K. ii. 20, xxi. 13; Prov. xix. 24, A. V. "bosom"). [W. L. B.]

CO'OS (Rec. Text, *ἐς ἡν δὴ*; Lachm. with ABC, K<sup>ω</sup>, Acts xxi. 1. [C<sup>os</sup>.]

COPPER (נְחָשֶׁת). This word in the A. V. is always rendered "brass," except in Ex. viii. 27. See BRASS. This metal is usually found as pyrites (sulphuret of copper and iron), malachite (carb. of copper), or in the state of oxide, and occasionally in a native state, principally in the New World. It was almost exclusively used by the ancients for common purposes; for which its elastic and ductile nature rendered it practically available. It is a question whether in the earliest times iron was known (μέλας ὁ οὐκ ἔσκα σίδηρος, Hes. *Opp. et Dies*. 149; Luc. r. v. 1285, sq.). In India, however,

its manufacture has been practised from a very ancient date by a process exceedingly simple, and possibly a similar one was employed by the ancient Egyptians (Napier, *Anc. Workers in Metal*, 137). There is no certain mention of iron in the Scriptures; and, from the allusion to it as known to Tubalcain (Gen. iv. 22), some have ventured to doubt whether in that place כְּרֹזֶה means iron (Wilkinson, *Anc. Eg.* iii. 242).

We read in the Bible חָדָשׁ copper, possessed in countless abundance (2 Chr. iv. 18), and used for every kind of instrument; as chains (Judg. xvi. 21), *pillars* (1 K. vii. 15-21), lavers, the great one being called "the copper sea" (2 K. xxv. 13; 1 Chr. xviii. 8), and the other temple vessels. These were made in the foundry, with the assistance of Hiram, a Phœnician (1 K. vii. 13), although the Jews were not ignorant of metallurgy (Ez. xxii. 18; Deut. iv. 20, &c.), and appear to have worked their own mines (Deut. viii. 9; Is. li. 1). We read also of copper mirrors (Ez. xxxviii. 8; Job xxxvii. 18), since the metal is susceptible of brilliant polish (2 Chr. iv. 16); and even of copper arms, as helmets, spears, &c. (1 Sam. xvii. 5, 6, 38; 2 Sam. xxi. 16). The expression "bow of steel," in Job xx. 24, Ps. xviii. 34, should be rendered "bow of copper," since the term for steel is כְּרֹזֶה or כְּרֹזֶה כְּרֹזֶה (northern iron). They could hardly have applied copper to these purposes without possessing some judicious system of alloys, or perhaps some forgotten secret for rendering the metal harder and more elastic than we can make it.

It has been maintained that the cutting-tools of the Egyptians, with which they worked the granite and porphyry of their monuments, were made of bronze, in which copper was a chief ingredient. The arguments on this point are found in Wilkinson, iii. 249, &c., but they are not conclusive. There seems no reason why the art of making iron and excellent steel, which has been for ages practised in India, may not have been equally known to the Egyptians. The quickness with which iron decomposes will fully account for the non-discovery of any remains of steel or iron implements. For analyses of the bronze tools and articles found in Egypt and Assyria, see Napier, 88.

The only place in the A. V. where "copper" is mentioned is Ezr. viii. 27, "two vessels of fine copper, precious as gold" (cf. 1 Esd. viii. 57; σκεύη χαλκοῦ στίλβοντος, διάφορα, ἐπιθιμητὰ ἐν χρυσίῳ; *aeris fulgentis*; "vases of Corinthian brass," Syr.; "ex orichalco," Jun.), perhaps similar to those of "bright brass" in 1 K. vii. 45; Dan. x. 6. They may have been of orichalcum, like the Persian or Indian vases found among the treasures of Darius (Aristot. *de Mirab. Auscult.*). There were two kinds of this metal, one *natural* (Serv. *ad Aen.* xii. 87), which Pliny (*H. N.* xxiv. 2, 2) says had long been extinct in his time, but which Chardin alludes to as found in Sumatra under the name Calmbac (Rosenm. *l. c.*); the other *artificial* (identified by some with *ηλεκτρον*, whence the mistaken spelling *aurichalcum*), which Bochart (*Hieroz.* vi. ch. 16, p. 871, nq.) considers to be the Hebrew כְּרֹזֶה, a word compounded (he says) of כְּרֹזֶה (copper), and Chald. כְּרֹזֶה (? gold, Ez. i. 4, 27, viii. 2); *ηλεκτρον*, LXX.; *electrum*, Vulg. (ἀλλόττυον χρυσίον, Hesych.; to which Suid. adds, *μεμιγμένον ὑδάτι*

καὶ λιθίῳ). On this substance see Pausan. v. 12; Plin. xxxiii. 4, § 23. Gesenius considers the *χαλκολίβανον* of Rev. i. 15 to be *χαλκὸς λιπαρὸς* = כְּרֹזֶה; he differs from Bochart, and argues that it means merely "smooth or polished brass."

In Ez. xxvii. 13 the importation of copper vessels to the markets of Tyre by merchants of Javan, Tubal, and Meshech is alluded to. Probably these were the Moschi, &c., who worked the copper-mines in the neighbourhood of Mount Caucasus.

In 2 Tim. iv. 14 *χαλκὸς* is rendered "copper-smith," but the term is perfectly general, and is used even for workers in iron (Od. ix. 391); *χαλκὸς, πᾶς τεχνίτης, καὶ ὁ ἀργυροκόπος καὶ ὁ χρυσόχοος* (Hesych.).

"Copper" is used for money, Ez. xvi. 36 (A. V. "filthiness"); *ἐξέχεας τὸν χαλκόν σου, LXX.*; effusum est *aes tuum*, Vulg.; and in N. T. (*χαλκοῦς, τούτο ἐπὶ χρυσοῦ καὶ τοῦ ἀργύρου ἐλεγον*, Hesych.). [K. W. F.]

**CORAL** (תִּרְזָא; *μετίωρα, ῥαμόδ, ascelasa, sericum*). The word occurs twice in A. V., viz. Job xxviii. 18, and Ez. xxvii. 16, and it is explained by the Rabbins to signify *red coral*. This meaning accords well enough with the etymology of the word (root תִּרְזָא, *to be high*), because of the resemblance of the growth of coral to that of a tree. Roediger prefers to understand *black coral*, assuming that תִּרְזָא is red coral (Gesen. *Thes.* p. 1113). He also suggests a connexion with the Sanscrit *ramya* = *pleasant*, just as the Sanscrit for pearl, *ratna* = *pleasant*. Coral was in higher esteem formerly as a precious substance than now, probably because the means of obtaining it in a fine state were not so efficacious as those now practised. The coral brought by the merchants of Syria to Tyre must have come from the Indian seas, by the Euphrates and Damascus (comp. Plin. xxii. 2). [W. D.]

**CORBAN** (קֶרֶבֶן; *δῶρον; oblatio*; in N. T. *κορβᾶν* expl. by *δῶρον*, and in Vulg. *domum*: used only in Lev. and Numb., except in Ez. xx. 28, xl. 43), an offering to God of any sort, bloody or bloodless, but particularly in fulfilment of a vow. The law laid down rules for vows, 1. affirmative; 2. negative. By the former, persons, animals, and property might be devoted to God, but with certain limitations, they were redeemable by money payments. By the latter, persons interdicted themselves, or were interdicted by their parents from the use of certain things lawful in themselves, as wine, either for a limited or an unlimited period (Lev. xxvii.; Numb. xxx.; Judg. xlii. 7; Jer. xxxv.; Joseph. *Ant.* iv. 4. § 4; *B. J.* ii. 15, § 1; Acts xviii. 18, xxi. 23, 24). Upon these rules the traditionists enlarged, and laid down that a man might interdict himself by vow, not only from using for himself, but from giving to another, or receiving from him some particular object whether of food or any other kind whatsoever. The thing thus interdicted was considered as Corban, and the form of interdiction was virtually to this effect:—"I forbid myself to touch or be concerned in any way with the thing forbidden, as if it were devoted by law," i. e. "let it be Corban." So far did they carry the principle that they even held as binding the incomplete exclamations of anger, and called them קֶרֶבֶן, *hurdles*. A person might thus exempt

himself from assisting or receiving assistance from some particular person or persons, as parents in distress; and in short from any inconvenient obligation under plea of corban, though by a legal fiction he was allowed to suspend the restriction in certain cases. It was with practices of this sort that our Lord found fault (*Matt. xv. 5*; *Mark vi. 11*), as annulling the spirit of the law.

Theophrastus, quoted by Josephus, notices the system, miscalling it a Phœnician custom, but in naming the word corban identifies it with Judaism. Josephus calls the treasury in which offerings for the temple or its services were deposited, *κορβανός*, as in *Matt. xxvii. 6*. Origen's account of the corban-system is that children sometimes refused assistance to parents on the ground that they had already contributed to the poor fund, from which they alleged their parents might be relieved (*Joseph. B. J. ii. 9. §4*; *Ap. i. 22*; *Mishna, Surenhus. de Votis, i. 4, ii. 2*; *Cappellus, Grotius, Hammond, Lightfoot, Hor. Hebr. on Matt. xv. 6*; *Jahn, Arch. Bibl. v. §392, 394*). [ALMS; VOWS; OFFERINGS.] [H. W. P.]

CORBE (*Κορβή*; *Choruba*), 1 Esdr. v. 12. This name apparently answers to ZACCAI in the lists of Ezra and Nehemiah.

CORD (*חֵבֶל*, *חֵבֶל*, *חֵבֶל*). Of the various purposes to which cord, including under that term rope, and twisted thongs, was applied, the following are especially worthy of notice. (1.) For fastening a tent, in which sense *חֵבֶל* is more particularly used (*e. g.* *Ex. xxxv. 18, xxxix. 40*; *Is. liv. 2*). As the text supplied a favourite image of the human body, the cords which held it in its place represented the principle of life (*Job iv. 21*, "Are not their tent-cords (A. V. "excellency," torn away?" *Ecc. xii. 6*). (2.) For leading or binding animals, as a halter or rein (*Ps. cxviii. 27*; *Hos. xi. 4*), whence to "loosen the cord" (*Job xxx. 11*) = to free from authority. (3.) For yoking them either to a cart (*Is. v. 18*) or a plough (*Job xxxix. 10*). (4.) For binding prisoners, more particularly *עֵבֶת* (*Judg. xv. 13*; *Ps. ii. 3, cxxix. 4*; *Ez. iii. 25*), whence the metaphorical expression "bands of love" (*Hos. xi. 4*). (5.) For bow-strings (*Ps. xi. 2*), made of catgut; such are spoken of in *Judg. xvi. 7* (*חֵבֶל יָרֵחַ*), A. V. "green withs;" but more properly *νευπάλ* *νευπάλ*, fresh or moist bow-strings). (6.) For the ropes or "tacklings" of a vessel (*Is. xxxiii. 23*). (7.) For measuring ground, the full expression being *חֵבֶל מִדָּה* (*2 Sam. viii. 2*; *Ps. lxxviii. 55*; *Am. vii. 17*; *Zech. ii. 1*); hence to "cast a cord," = to assign a property (*Mic. ii. 5*), and cord or line became an expression for an inheritance (*Josh. xvii. 14, xix. 9*; *Ps. xvi. 6*; *Ez. xlvii. 13*), and even for any defined district (*e. g.* the line, or tract, of *Argob*, *Deut. iii. 4*). [CHEBUL.] (8.) For fishing and snaring [FISHING, FOWLING, HUNTING]. (9.) For attaching articles of dress; as the *υρακάν* chains (*עֵבֶת*), which were rather twisted cords, worn by the high-priests (*Ex. xxviii. 14, 22, 24, xxxix. 13, 17*). (10.) For fastening awnings (*Ezth. i. 6*). (11.) For attaching to a plummet. The line and plummet are emblematic of a regular rule (*2 K. xxi. 13*; *Is. xxviii. 17*); hence to destroy by line and plummet (*Is. xxxiv. 11*; *Lam. ii. 8*; *Am. vii. 7*) has been

understood as = regular, systematic destruction (*an normam et libellam*, *Gesen. Thesaur. p. 125*): it may however be referred to the carpenter's level, which can only be used on a flat surface (*comp. Theuin, Comm. in 2 K. xxi. 13*). (12.) For drawing water out of a well, or raising heavy weights (*Josh. ii. 15*; *Jer. xxxviii. 8, 13*). To place a rope on the head (*1 K. xx. 31*) in place of the ordinary head-dress was a sign of abject submission. The materials of which cord was made varied according to the strength required; the strongest rope was probably made of strips of camel hide as still used by the Bedouins for drawing water (*Burekhardt's Notes, i. 46*); the Egyptians twisted these strips together into thongs for sandals and other purposes (*Wilkinson, Anc. Egypt. iii. 145*). The finer sorts were made of flax (*Is. xix. 9*). The fibre of the date-palm was also used (*Wilkinson, iii. 210*); and probably reeds and rushes of various kinds, as implied in the origin of the word *σχοινίον* (*Plin. xix. 9*), which is generally used by the LXX. *καβλ* = *חֵבֶל*, and more particularly in the word *καβλόν* (*Job xli. 2*) which primarily means a reed; in the Talmud (*Eruvin, fol. 58*) bulrushes, osier, and flax are enumerated as the materials of which rope was made; in the Mishna (*Sotah. i. §6*) the *חבל מצר* is explained as *funis vimineus seu satignus*. In the N. T. the term *σχοινία* is applied to the whip which our Saviour made (*John ii. 15*), and to the ropes of a ship (*Acts xxvii. 32*). Alford understands it in the former passage of the rushes on which the cattle were littered; but the ordinary roping cords seems more consistent with the use of the term elsewhere. [W. L. B.]

COR'E (*Κορέ*, N. T. *δ Κ.*; *Core*), *Eccles. xlv. 18*; *Jude 11*. [KORAH, 1.]

CORIANDEE (*ῥῖ*; *κόριον*; *coriandrum*).

The plant called *Coriandrum sativum* is found in Egypt, Persia, and India (*Plin. xx. 82*), and has a round tall stalk; it bears umbelliferous white or reddish flowers, from which arise globular, greyish, spicy seed-corns, marked with fine striae. It is much cultivated in the south of Europe, as its seeds are used by confectioners and druggists. The Cuthuginians called it *γολδ* = *ῥῖ* (*Dioscorid. iii. 64*).

The etymology is uncertain, though it is not impossible that the stunted appearance of the seed-vessels may have suggested a name derived from *ῥῖ*, *to cut* (*Ges.*). It is mentioned twice in the Bible (*Ex. xvi. 31*; *Num. xi. 7*). In both passages the manna is likened to coriander-seed as to form, and in the former passage as to colour also. [W. D.]

CORINTH (*Κόρινθος*). This city is alike remarkable for its distinctive geographical position, its eminence in Greek and Roman history, and its close connexion with the early spread of Christianity.

Geographically its situation was so marked, that the name of its *Isthmus* has been given to every narrow neck of land between two seas. Thus it was "the bridge of the sea" (*Pind. Nem. vi. 44*) and "the gate of the Peloponnesus," (*Xen. Ages. 2*). No invading army could enter the Morea by land except by this way, and, without forcing some of the defences which have been raised from one sea to the other at various intervals between the great Persian war and the recent struggles of the Turks with the modern Greeks, or with the Venetians. But, besides this, the site of Corinth is distinguished by

another conspicuous physical feature—viz. the *Acrocorinthus*, a vast citadel of rock, which rises abruptly to the height of 2000 feet above the level of the sea, and the summit of which is so extensive that it once contained a whole town. The view from this eminence is one of the most celebrated in the world. Besides the mountains of the Morea, it embraces those on the northern shore of the Corinthian gulf, with the snowy heights of Parnassus conspicuous above the rest. To the east is the Saronic gulf, with its islands, and the hills round Athens, the Acropolis itself being distinctly visible at a distance of 45 miles. Immediately below the Acrocorinthus, to the north, was the city of Corinth, on a table-land descending in terraces to the low plain, which lies between Cenchreae, the harbour on the Saronic, and Lechaëum, the harbour on the Corinthian gulf.

The situation of Corinth, and the possession of these eastern and western harbours, are the secrets of her history. The earliest passage in her progress to eminence was probably Phœnician. But at the most remote period of which we have any sure record we find the Greeks established here in a position of wealth (Hom. *Il.* ii. 570; Pind. *Ol.* xiii. 4), and military strength (Thucyd. i. 13). Some of the earliest efforts of Greek ship-building are connected with Corinth; and her colonies to the westward were among the first and most flourishing sent out from Greece. So too in the latest passages of Greek history, in the struggles with Macedonia and Rome, Corinth held a conspicuous place. After the battle of Chæroneia (B.C. 338) the Macedonian kings placed a garrison in the Acrocorinthus. After the battle of Cynoscephalæ (B.C. 197) it was occupied by a Roman garrison. Corinth, however, was constituted the head of the Achaean league. Here the Roman ambassadors were maltreated; and the consequence was the utter ruin and destruction of the city.

It is not the true Greek Corinth with which we have to do in the life of St. Paul, but the Corinth which was rebuilt and established as a Roman colony. The distinction between the two must be carefully remembered. A period of a hundred years intervened, during which the place was almost utterly desolate. The merchants of the Isthmus retired to Delos. The presidency of the Isthmian games was given to the people of Sicyon. Corinth seemed blotted from the map; till Julius Cæsar refounded the city, which thenceforth was called *Colonia Julia Corinthus*. The new city was hardly less distinguished than the old, and it acquired a fresh importance as the metropolis of the Roman province of ACHAIA. We find GALLIO, brother of the philosopher Seneca, exercising the functions of proconsul here (Achaia was a senatorial province) during St. Paul's first residence at Corinth, in the reign of Claudius.

This residence continued for a year and six months, and the circumstances, which occurred during the course of it, are related at some length (Acts xviii. 1-18). St. Paul had recently passed through Macedonia. He came to Corinth from Athens; shortly after his arrival Silas and Timotheus came from Macedonia and rejoined him; and about this time the two epistles to the Thessalonians were written (probably A.D. 52 or 53). It was at Corinth that the apostle first became acquainted with Aquila and Priscilla,—and shortly after his departure Apollos came to this city from Ephesus (Acts xviii. 27).

Corinth was a place of great mental activity, as well as of commercial and manufacturing enterprise. Its wealth was so celebrated as to be proverbial; so were the vice and profligacy of its inhabitants. The worship of Venus here was attended with shameful licentiousness. All these points are indirectly illustrated by passages in the two epistles to the Corinthians, which were written (probably A.D. 57) the first from Ephesus, the second from Macedonia, shortly before the second visit to Corinth, which is briefly stated (Acts xx. 3) to have lasted three months. During this visit (probably A.D. 58) the epistle to the Romans was written. From the three epistles last mentioned, compared with Acts xxiv. 17, we gather that St. Paul was much occupied at this time with a collection for the poor Christians at Jerusalem.

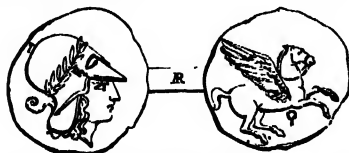

There are good reasons for believing that when St. Paul was at Ephesus (A.D. 57) he wrote to the Corinthians an epistle which has not been preserved (see below, p. 355, b); and it is almost certain that about the same time a short visit was paid to Corinth, of which no account is given in the Acts.

It has been well observed that the great number of Latin names of persons mentioned in the epistle to the Romans is in harmony with what we know of the colonial origin of a large part of the population of Corinth. From Acts xviii. we may conclude that there were many Jewish converts in the Corinthian church, though it would appear (1 Cor. xii. 2) that the Gentiles predominated. On the other hand it is evident from the whole tenor of both epistles that the Judaising element was very strong at Corinth. Party-spirit also was extremely prevalent, the names of Paul, Peter, and Apollos being used as the watchwords of restless factions. Among the eminent Christians who lived at Corinth were Stephanas (1 Cor. i. 16, xvi. 15, 17), Crispus (Acts xviii. 8; 1 Cor. i. 14), Caius (Rom. xvi. 23; 1 Cor. i. 14), and Erastus (Rom. xvi. 23; 2 Tim. iv. 20). The epistles of Clement to the Corinthians are among the most interesting of the post-apostolic writings. Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiastical dignity," used in Turkish times to be in the Acrocorinthus. The city has now shrunk to a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into *Gortho*.

Pausanias, in describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city, and those which were of Roman origin. Two relics of Roman work are still to be seen, one a heap of brick-work which may have been part of the baths erected by Hadrian, the other the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting are the ruins of the ancient Greek temple,—the "old columns, which have looked down on the rise, the prosperity and the desolation of two [in fact, three] successive Corinthians." At the time of Wheeler's visit in 1876 twelve columns were standing: before 1795 they were reduced to five; and further injury has very recently been inflicted by an earthquake. It is believed that this temple is the oldest of which any remains are left in Greece. The fountain of Peirene, "full of sweet and clear water," as it is described by Strabo, is still to be seen in the Acrocorinthus, as well as the fountains in the lower city, of which it was supposed by him and Pausanias to be the source. The walls on the Acrocorinthus

were in part erected by the Venetians, who held Corinth for twenty-five years in the 17th century. This city and its neighbourhood have been described by many travellers, but we must especially refer to Leake's *Morea*, iii. 229-304 (London, 1830), and his *Peloponnesiaca*, p. 392 (London, 1846), Curtius, *Peloponnesos*, ii. p. 514 (Gotha, 1851-1852); Clark, *Peloponnesus*, pp. 42-61 (London, 1858). There are four German monographs on the subject, Wilckens, *Rerum Corinthiacarum specimen ad illustrationem utriusque Epistolae Paulinae*, Bremen, 1747; Walch, *Antiquitates Corinthiacae*, Jena, 1761; Wagner, *Rerum Corinthiacarum specimen*, Darmstadt, 1824; Bøtt, *Corinthiorum Commercii et Mercaturae Historiæ particula*, Berlin, 1844.

This article would be incomplete without some notice of the *Posidonium*, or sanctuary of Neptune, the scene of the Isthmian games, from which St. Paul borrows some of his most striking imagery in 1 Cor. and other epistles. This sanctuary was a short distance to the N.E. of Corinth, at the narrowest part of the Isthmus, near the harbour of Schoenus (now *Kalamáki*) on the Saronic gulf. The wall of the inclosure can still be traced. It is of an irregular shape, determined by the form of a natural platform at the edge of a ravine. The fortifications of the Isthmus followed this ravine and abutted at the east upon the inclosure of the sanctuary, which thus served a military as well as a religious purpose. The exact site of the temple is doubtful, and none of the objects of interest remain, which Pausanias describes as seen by him within the inclosure; but to the south are the remains of the stadium, where the foot-races were run (1 Cor. iv. 24): to the east are those of the theatre, which was probably the scene of the pugilistic contests (ib. 26): and abundant on the shore are the small green pine-trees (*τευκαί*) which gave the fading wreath (ib. 25) to the victors in the games. An inscription found here in 1876 (now removed to Verona) affords a valuable illustration of the interest taken in these games in Roman times (Boeckh, No. 1104). The French map of the Morea does not include the Isthmus; so that, till recently, Col. Leake's sketch (reproduced by Curtius) has been the only trustworthy representation of the scene of the Isthmian games. But the ground has been more minutely examined by Mr. Clark, who gives us a more exact plan. In the immediate neighbourhood of this sanctuary are the traces of the canal, which was begun and discontinued by Nero about the time of St. Paul's first visit to Corinth. [J. S. H.]

Draught of Corinth (Attic talent) Obv. Head of Minerva, to right. Rev., Pegasus, to right; below, P.

**CORINTHIANS, FIRST EPISTLE TO**  
THE. was written by the Apostle St. Paul toward the close of his nearly three-year stay at Ephesus (Acts xix. 10, xx. 31; see the subscription in B and in Copt. Vers.), which we learn from 1 Cor. xvi. 8, probably terminated with the Pentecost of A.D. 57 or 58. Some supposed allusions to the

passover in ch. v. 7, 8, have led recent critics (see Meyer *in loc.*), not without a show of probability, to fix upon Easter as the *exact* time of composition. The bearers were probably (according to the common subscription) Stephanas, Fortunatus, and Achaicus, who had been recently sent to the Apostle, and who, in the conclusion of this epistle (ch. xvi. 17), are especially commended to the honourable regard of the church of Corinth.

This varied and highly characteristic letter was addressed not to any party, but to the whole body of the large (Acts xviii. 8, 10) Judæo-Gentile (Acts xviii. 4) church of Corinth, and appears to have been called forth, 1st, by the information the Apostle had received from members of the household of Chloe (ch. i. 11), of the divisions that were existing among them, which were of so grave a nature as to have already induced the Apostle to desire Timothy to visit Corinth (ch. iv. 17) after his journey to Macedonia (Acts xiv. 22); 2dly, by the information he had received of a grievous case of incest (ch. v. 1), and of the defective state of the Corinthian converts, not only in regard of general habits (ch. vi. 1, sq.) and church discipline (ch. xi. 20, sq.), but, as it would also seem, of doctrine (ch. xv.); 3dly, by the inquiries that had been specially addressed to St. Paul by the church of Corinth on several matters relating to Christian practice.

The contents of this epistle are thus extremely varied, and in the present article almost preclude a more specific analysis than we here subjoin. The Apostle opens with his usual salutation and with an expression of thankfulness for their general state of Christian progress (ch. i. 1-9). He then at once passes on to the lamentable divisions there were among them, and incidentally justifies his own conduct and mode of preaching (ch. i. 10, iv. 18), concluding with a notice of the mission of Timothy, and of an intended authoritative visit on his own part (ch. iv. 17-21). The Apostle next deals with the case of incest that had taken place among them, and had provoked no censure (ch. v. 1-8), noticing, as he passes, some previous remarks he had made upon not keeping company with fornicators (ch. v. 9-13). He then comments on their evil practice of litigation before heathen tribunals (ch. vi. 1-8), and again reverts to the plague-spot in Corinthian life, fornication and uncleanness (ch. vi. 9-20). The last subject naturally paves the way for his answers to their inquiries about marriage (ch. vii. 1-24), and about the celibacy of virgins and widows (ch. vii. 25-40). The Apostle next makes a transition to the subject of the lawfulness of eating things sacrificed to idols, and Christian freedom generally (ch. viii.), which leads, not unnaturally, to a digression on the manner in which he waved his Apostolic privileges, and performed his Apostolic duties (ch. ix.). He then reverts to and concludes the subject of the use of things offered to idols (ch. x.-xi. 1), and passes onward to reprove his converts for their behaviour in the assemblies of the church, both in respect to women prophesying and praying with uncovered heads (ch. xi. 2-16), and also their great irregularities in the celebration of the Lord's Supper (ch. xi. 17-34). Then follow full and minute instructions on the exercise of spiritual gifts (ch. xii.-xiv.), in which is included the noble panegyric of charity (ch. xiii.), and further a defence of the doctrine of the resurrection of the dead, about which doubts and difficulties appear to have arisen in this unhappily divided church (ch. xv.). The

epistle closes with some directions concerning the contributions for the saints at Jerusalem (ch. xvi. 1-4), brief notices of his own intended movements (ch. xvi. 5-9), commendation to them of Timothy and others (ch. xvi. 10-18), greetings from the churches (ch. xvi. 19, 20), and an autograph salutation and benediction (ch. xvi. 21-24).

With regard to the *genuineness and authenticity* of this epistle no doubt has ever been entertained. The external evidences (Clem. Rom. *ad Cor.* ch. 47, 49; Polycarp, *ad Phl.* ch. 11; Ignat. *ad Eph.* ch. 2; Irenaeus, *Haer.* iii. 11. 9, iv. 27. 3; Athenag. *de Resurr.* p. 61, ed. Col.; Clem. Alex. *Pedag.* i. 33; Tertull. *de Praescr.* ch. 33) are extremely distinct, and the character of the composition such, that if any critic should hereafter be bold enough to question the correctness of the ascription, he must be prepared to extend it to all the epistles that bear the name of the great Apostle. The baseless assumption of Bolten and Bertholdt that this epistle is a translation of an Aramaic original requires no refutation. See further testimonies in Lardner, *Credibility*, ii. 36, sq. 8vo, and Davidson, *Introduction*, ii. 253, sq.

Two special points deserve separate consideration :

1. *The state of parties at Corinth at the time of the Apostle's writing.* On this much has been written, and it does not seem too much to say, more ingenuity displayed than sound and sober criticism. The few facts supplied to us by the Acts of the Apostles, and the notices in the epistle, appear to be as follows:—The Corinthian church was planted by the Apostle himself (1 Cor. iii. 6), in his second missionary journey, after his departure from Athens (Acts xviii. 1, sq.). He abode in the city a year and a half (ch. xviii. 11), at first in the house of Aquila and Priscilla (ch. xviii. 3), and afterwards, apparently to mark emphatically the factious nature of the conduct of the Jews, in the house of the proselyte Justus. A short time after the Apostle had left the city the eloquent Jew of Alexandria, Apollos, after having received, when at Ephesus, more exact instruction in the Gospel from Aquila and Priscilla, went to Corinth (Acts xix. 1), where he preached, as we may perhaps infer from St. Paul's comments on his own mode of preaching, in a manner marked by unusual eloquence and persuasiveness (comp. ch. ii. 1, 4). There is, however, no reason for concluding that the *substance* of the teaching was in any respect different from that of St. Paul; for see ch. i. 18, xvi. 12. This circumstance of the visit of Apollos, owing to the sensuous and carnal spirit which marked the church of Corinth, appears to have formed the commencement of a gradual division into two parties, the followers of St. Paul, and the followers of Apollos (comp. ch. iv. 6). These divisions, however, were to be multiplied; for, as it would seem, shortly after the departure of Apollos, Judaizing teachers, supplied probably with letters of commendation (2 Cor. iii. 1) from the church of Jerusalem, appear to have come to Corinth and to have preached the Gospel in a spirit of direct antagonism to St. Paul *personally*, in every way seeking to depress his claims to be considered an Apostle (1 Cor. xi. 2), and to exalt those of the Twelve, and perhaps especially of St. Peter (ch. i. 12). To this third party, which appears to have been characterized by a spirit of excessive bitterness and faction, we may perhaps add a fourth that, under the name of "the followers of Christ" (ch. i. 12), sought at first to separate themselves from the factious adherence to

particular teachers, but eventually were driven by antagonism into positions equally sectarian and inimical to the unity of the church. At this momentous period, before parties had become consolidated, and had distinctly withdrawn from communion with one another, the Apostle writes; and in the outset of the epistle (ch. i. iv. 21) we have his noble and impassioned protest against this fourfold rending of the robe of Christ. This spirit of division appears, by the good providence of God, to have eventually yielded to His Apostle's rebuke, as it is noticeable that Clement of Rome, in his epistle to this church (ch. 47), alludes to these evils as long past, and as but slight compared to those which existed in his own time. For further information, beside that contained in the writings of Neander, Davidson, Conybeare and Howson, and others, the student may be referred to the special treatises of Schenkel, *de Eccl. Cor.* (Basel, 1838), Kniewel, *Eccl. Cor. Dissensiones* (Gedan. 1841), Becker, *Parteihungen in die Gemeinde z. Kor.* (Altona, 1841), Rübiger, *Ent. Untersuch.* (Bresl. 1847); but he cannot be too emphatically warned against that tendency to construct a definite history out of the fewest possible facts, that marks most of these discussions.

2. *The number of epistles written by St. Paul to the Corinthian church.* This will probably remain a subject of controversy to the end of time. On the one side we have the *à priori* objections that an epistle of St. Paul should have ever been lost to the church of Christ; on the other we have certain expressions which seem inexplicable on any other hypothesis. As it seems our duty here to express an opinion, we may briefly say that the well known words, *ἔγραφα βρῆν ἐν τῇ ἐπιστολῇ, μὴ συναγαμίγνυσθαι πόροις* (ch. v. 9), do certainly seem to point to some former epistolary communication to the church of Corinth—not from linguistic, but from simple exegetical considerations: for it does seem impossible either to refer the definite *μὴ συναγαμίγν.* κ. τ. λ. to what has preceded in ver. 2 or ver. 6, or to conceive that the words refer to the command which the Apostle is now giving for the first time. The whole context seems in favour of a former command given to the Corinthians, but interpreted by them so literally as here to require further explanation. It is not right to suppress the fact that the Greek commentators are of the contrary opinion, nor must we overlook the objection that no notice has been taken of the lost epistle by any writers of antiquity. Against this last objection it may perhaps be urged that the letter might have been so short, and so distinctly occupied with *specific* directions to this particular church, as never to have gained circulation beyond it. Our present epistles, it should be remembered, are not addressed *exclusively* to the Christians at Corinth (see 1 Cor. i. 2; 2 Cor. i. 1). A special treatise on this subject (in opposition, however, to the view here taken), and the number of St. Paul's journeys to Corinth, has been written by Müller, *de Tribus Pauli Itin.*, &c. (Basil, 1831).

The apocryphal letter of the church of Corinth to St. Paul, and St. Paul's answer, existing in Armenian, are worthless productions that deserve no consideration, but may be alluded to only as perhaps affording some *slight* evidence of an early belief that the Apostle had written to his converts more than twice. The original Armenian, with a translation, will be found in Aucher, *Arm. Grammar*, p. 143-161.

The editions of these epistles have been somewhat numerous. Among the best are those of Billhoth (Leipz. 1833), Rückert (Leipz. 1836), Olshausen (Konigsb. 1840), De Wette (Leipz. 1845), Oslander (Stuttg. 1847), Meyer (1845), and in our own country, Peile (Lond. 1848), Alford (Lond. 1856), and Stanley (Lond. 1858). [C. J. E.]

**CORINTHIANS, SECOND EPISTLE TO**  
**THE** was written a few months subsequently to the first, in the same year,—and thus, if the dates assigned to the former epistle be correct, about the autumn of A.D. 57 or 58, a short time previous to the Apostle's three months' stay in Achaia (Acts xx. 3). The place whence it was written was clearly not Ephesus (see ch. i. 8), but Macedonia (ch. vii. 5, viii. 1, ix. 2), whither the Apostle went by way of Troas (ch. ii. 12), after waiting a short time in the latter place for the return of Titus (ch. ii. 13). The Vatican MS., the bulk of later MSS., and the old Syr. version, assign Philippi as the exact place whence it was written; but for this assertion we have no certain grounds to rely on: that the bearers, however, were Titus and his associates (Luke?) is apparently substantiated by ch. viii. 23, ix. 3, 5.

The epistle was occasioned by the information which the Apostle had received from Titus, and also, as it would certainly seem probable, from Timothy, of the reception of the first epistle. It has indeed recently been doubted by Neander, De Wette, and others, whether Timothy, who had been definitely sent to Corinth (1 Cor. iv. 17) by way of Macedonia (Acts xix. 22), really reached his destination (comp. 1 Cor. xvi. 10); and it has been urged that the mission of Timothy would hardly have been left unnoticed in 2 Cor. xii. 17, 18 (see Rückert, *Comm.* p. 409). To this, however, it has been replied, apparently convincingly, that as Timothy is an associate in writing the epistle, any notice of his own mission in the third person would have seemed inappropriate. His visit was assumed as a fact, and as one that naturally made him an associate with the Apostle in writing to the church he had so lately visited.

It is more difficult to assign the precise reason for the mission of Titus. That he brought back tidings of the reception which St. Paul's first epistle had met with seems perfectly clear (ch. vii. 6, sq.), but whether he was specially sent to ascertain this, or whether to convey fresh directions, cannot be ascertained. There is a show of plausibility in the supposition of Bleek (*Stud. u. Krit.* for 1830, p. 625), followed more recently by Neander (*Pfanz. u. Leit.* p. 437), that the Apostle had made Titus the bearer of a letter couched in terms of decided severity, now lost, to which he is to be supposed to refer in ch. ii. 3 (compared with ver. 4, 9), vii. 8, 11, sq.; but, as has been justly urged (see Meyer, *Einkl.* p. 3), there is quite enough of severity in the first epistle (consider ch. iv. 18-21, v. 2, sq., vi. 5-8, xi. 17) to call forth the Apostle's affectionate anxiety. If it be desirable to hazard a conjecture on this mission of Titus, it would seem most natural to suppose that the return of Timothy and the intelligence he conveyed might have been such as to make the Apostle feel the necessity of at once despatching to the contentious church one of his immediate followers, with instructions to support and strengthen the effect of the epistle, and to bring back the most recent tidings of the spirit that was prevailing at Corinth.

These tidings, as it would seem from our present epistle, were mainly favourable; the better part of the church were returning back to their spiritual allegiance to their founder (ch. i. 13, 14, vii. 9, 15, 16), but there was still a faction, possibly of the Judaizing members (comp. ch. xi. 22), that were sharpened into even a more keen animosity against the Apostle personally (ch. x. 1, 10), and more strenuously denied his claim to Apostleship.

The contents of this epistle are thus very varied, but may perhaps be roughly divided into three parts:—1st, the Apostle's account of the character of his spiritual labours, accompanied with notices of his affectionate feelings towards his converts (ch. i. vii.); 2ndly, directions about the collections (ch. viii., ix.); 3rdly, defence of his own Apostolical character (ch. x.—xiii. 10). A close analysis is scarcely compatible with the limits of the present article, as in no one of the Apostle's epistles are the changes more rapid and frequent. Now he thanks God for their general state (ch. i. 3, sq.); now he glances to his purposed visit (ch. i. 15, sq.); now he alludes to the special directions in the first letter (ch. ii. 3, sq.); again he returns to his own plans (ch. ii. 12, sq.), pleads his own Apostolic dignity (ch. iii. 1, sq.), dwells long upon the spirit and nature of his own labours (ch. iv. 1, sq.), his own hopes (ch. v. 1, sq.), and his own sufferings (ch. vi. 1, sq.), returning again to more specific declarations of his love towards his children in the faith (ch. vi. 11, sq.), and a yet further declaration of his views and feelings with regard to them (ch. vii.). Then again, in the matter of the alms, he stirs up their liberality by alluding to the conduct of the churches of Macedonia (ch. viii. 1, sq.), their spiritual progress (ver. 7), the example of Christ (ver. 9), and passes on to speak more fully of the present mission of Titus and his associates (ver. 18, sq.), and to reiterate his exhortations to liberality (ch. ix. 1, sq.). In the third portion he passes into language of severity and reproof; he gravely warns those who presume to hold lightly his Apostolical authority (ch. x. 1, sq.); he puts strongly forward his Apostolical dignity (ch. xi. 5, sq.); he illustrates his forbearance (ver. 8, sq.); he makes honest boast of his labours (ver. 23, sq.); he declares the revelations vouchsafed to him (ch. xii. 1, sq.); he again returns to the nature of his dealings with his converts (ver. 12, sq.), and concludes with grave and reiterated warning (ch. xiii. 1, sq.), brief greetings, and a doxology (ver. 11-14).

The genuineness and authenticity is supported by the most decided external testimony (Ireneus, *Haer.* iii. 7. 1, iv. 28. 3; Athenagoras, *de Resurr.* p. 61, ed. Col.; Clem. Alex. *Strom.* iii. 94, iv. 101; Tertull. *de Pudicit.* ch. 18), and by internal evidence of such a kind that what has been said on this point in respect of the first epistle is here even still more applicable. The only doubts that modern pseudo criticism has been able to bring forward relate to the unity of the epistle, but are not such as seem to deserve serious consideration (see Meyer, *Einkl.* p. 7).

The principal historical difficulty connected with the epistle relates to the number of visits made by the Apostle to the church of Corinth. The words of this epistle (ch. xii. 14, xiii. 1, 2) seem distinctly to imply that St. Paul had visited Corinth twice before the time at which he now writes. St. Luke, however, only mentions one visit prior to that time (Acts xviii. 1, sq.); for the visit recorded in Acts xx. 2, 3, is confessedly subsequent. If with Grotius

and others we assume that in ch. xii. 14 *τρίτον* belongs to *ἐτοίμας ἔχω*, and not to *ἐλθεῖν πρὸς ὑμᾶς*, we still have in ch. xii. 1 the definite words *τρίτον τοῦτο ἔρχομαι*, which seem totally to preclude any other meaning than this—that the Apostle had visited them *twice* before, and was now on the eve of going a second time. The ordinary subterfuge that *ἔρχομαι* is here equivalent to *ἐτοίμας ἔχω ἐλθεῖν* (so actually A, the Arabic [Erp.], and the Coptic versions) is grammatically indefensible, and would never have been thought of if the narrative of the Acts had not seemed to require it. We must assume then that the Apostle made a visit to Corinth which St. Luke was not moved to record, and which, from its probably short duration, might easily have been omitted in a narrative that is more a general history of the church in the lives of its chief teachers, than a chronicle of annalistic detail. So Chrysostom and his followers, Oecumenius and Theophylact, and in recent times, Müller (*de Tribus Pauli Itin.* Basil, 1831), Anger (*Rot. Temp.* p. 70, sq.), Wieseler (*Chronol.* p. 239), and the majority of modern critics. It has formed a further subject of question whether, on this supposition, the visit to Corinth is to be regarded only as the return there from a somewhat lengthened excursion during the 18-month stay at that city (Anger), or whether it is to be referred to the period of the 3-year residence at Ephesus. The latter has most supporters, and seems certainly most natural; see Wieseler, *Chronol.* l. c., and Meyer, *Einfleit.* p. 6.

The commentaries on this epistle are somewhat numerous, and the same as those mentioned in the article on the former epistle. No portion of the Apostle's writings deserves more careful study, as placing before us the striking power of Christian rhetoric, which distinguished its great and inspired author. [C. J. E.]

**CORMORANT**, the representative in A. V. of two distinct Hebrew words, *קָמָח* and *שָׁלָךְ*. For the former see Is. xxv. 11, and Zeph. ii. 14, where the marginal reading is "pelican," and the Vulg. has *oncoratus*, and this no doubt is the correct rendering [PELICAN]. *שָׁלָךְ* (*καρπύκτης*, *mergulus*) is found in the catalogues of unclean birds in Lev. xi. 17; Deut. xiv. 17; and is probably correctly translated *cormorant*. The etymology of the word, from *שָׁלַךְ*, *to throw, to cast down*, suits the plunging habits of the cormorant in catching its prey; and no doubt there is reference to the same characteristic in the Greek name *καρπύκτης*. The scientific name of the cormorant is *Pelecanus bassanus*, Linn. It belongs to the family *Colymbidae* of the order *Avifores*. [W. D.]

**CORN** (יֵרֵךְ). The most common kinds were wheat, *חֵטָה*; barley, *שְׂעֹרָה*; spelt (A. V., Ex. ix. 32; and Is. xxviii. 25, "rie;" Ex. ix. 9, "fitches") *בָּשֶׂמֶת* (or in plur. form *בָּשֶׂמִּים*); and millet, *דָּתָן*: oats are mentioned only by rabbinical writers. The

\* This seems the general word for corn as it grows. An ear is *שֶׁבֶלֶת*; standing corn is *קָמָח*; the word for grain in its final state as fit for food is *בָּר*, apparently from the same word, *בָּר*, *pure*: comp. *עָר* the Arab. *بر*, *wheat*, and *بر*, *pure*, i. e. as sifted.

doubtful word *יֵרֵךְ*, rendered "principal," as an epithet of wheat, in the A. V. of Is. xxviii. 25, is probably not distinctive of any species of grain (see Gesen. *sub voc.*). Corn crops are still reckoned at twentyfold what was sown, and were anciently much more. "Seven ears on one stalk" (Gen. xii. 32) is no unusual phenomenon in Egypt at this day. The many-eared stalk is also common in the wheat of Palestine, and it is of course of the bearded kind. The "heap of wheat set about with lilies" (which probably grew in the field together with it) may allude to a custom of so decorating the sheaves (Cant. vii. 2). Wheat (see 2 Sam. iv. 6) was stored in the house for domestic purposes—the "midst of the house" meaning the part more retired than the common chamber where the guests were accommodated. It is at present often kept in a dry well, and perhaps the "ground corn" of 2 Sam. xvii. 19, was meant to imply that the well was so used. From Solomon's time (2 Chr. ii. 10, 15), i. e. as agriculture became developed under a settled government, Palestine was a corn-exporting country, and her grains were largely taken by her commercial neighbour Tyre (Ex. xxvii. 17; comp. Amos viii. 5). "Plenty of corn" was part of Jacob's blessing (Gen. xxvii. 28; comp. Ps. lxx. 13). The "store-houses" mentioned 2 Chr. xxxii. 28 as built by Hezekiah, were, perhaps, the consequence of the havoc made by the Assyrian armies (comp. 2 K. xix. 29), without such protection the country in its exhausted state would have been at the mercy of the desert marauders.

Grain crops were liable to *יֵרֵךְ*, "mildew," and *שָׁרִיף*, "blasting" (see 1 K. viii. 37), as well as of course to fire by accident or malice (Ex. xxii. 6; Judg. xv. 5); see further under AGRICULTURE. Some good general remarks will be found in Sualschutz, *Archäol. der Hebr.* [H. H.]

**CORNELIUS** (*Κορνήλιος*), a Roman centurion of the Italian cohort stationed in Caesarea (Acts x. i. &c.), a man full of good works and alms-deeds, who was admonished in a vision by an angel to send for St. Peter from Joppa, to tell him words whereby he and his house should be saved. Meantime the apostle had himself been prepared by a symbolical vision for the admission of the Gentiles into the Church of Christ. On his arriving at the house of Cornelius, and while he was explaining to them the vision which he had seen in reference to this mission, the Holy Ghost fell on the Gentiles present, and thus anticipated the reply to the question, which might still have proved a difficult one for the Apostle, whether they were to be baptised as *Gentiles* into the Christian Church. They were so baptised, and thus Cornelius became the first-fruit of the Gentile world to Christ. Tradition has been busy with his life and acts. According to Jerome (*Adv. Jovin.* l. p. 301), he built a Christian Church at Caesarea; but later tradition makes him Bishop of Scamandios (Scria?), and ascribes to him the working of a great miracle (*Menology. Græc.* l. p. 129). [H. A.]

*שָׁרִיף* (from *שָׁרַף*, *to break*) means "grist." "Parched corn," useful for provisions, as not needing cookery, is *קָלִי* and *קָלִיָּה*; comp. the Arab. *قلى*, *to fry*. "Pounded wheat," *רִיפּוֹת*, 2 Sam. xvii. 19, Prov. xxvii. 22.

**CORNER.** The **פִּנָּה**, or "corner," i. e. of the field, was not allowed (Lev. xix. 9) to be wholly reaped. It formed a right of the poor to carry off what was so left, and this was a part of the maintenance from the soil to which that class were entitled. Similarly the gleanings of fields and fruit trees (GLEANING), and the taking a sheaf accidentally left on the ground, were secured to the poor and the stranger by law (xxiii. 22; Deut. xxiv. 19-21). These seem to us, amidst the sharply defined legal rights of which alone civilisation is cognizant, loose and inadequate provisions for the relief of the poor. But custom and common law had probably ensured their observance (Job xxiv. 10) previously to the Mosaic enactment, and continued for a long but indefinite time to give practical force to the statute. Nor were the "poor," to whom appertained the right, the vague class of sufferers whom we understand by the term. On the principles of the Mosaic polity every Hebrew family had a hold on a certain fixed estate, and could by no ordinary and casual calamity be wholly beggared. Hence its indigent members had the claims of kindred on the "corners," &c., of the field which their landed brethren reaped. Similarly the "stranger" was a recognised dependent; "within thy gates" being his expressive description, as sharing, though not by any tie of blood, the domestic claim. There was thus a further security for the maintenance of the right in its definite and ascertainable character. Neither do we, in the earlier period of the Hebrew polity, closely detailed as its social features are, discover any general traces of agrarian distress and the unsafe condition of the country which results from it—such, for instance, as is proved by the banishment of the Herodian period. David, a popular leader (1 Sam. xviii. 30, xvi. 11), could only muster from four to six hundred men out of all Judah, though "every one that was in distress, in debt, and every one that was discontented" came unto him (1 Sam. xxi. 2, xxv. 13). Further, the position of the Levites, who had themselves a similar claim on the produce of the land, but no possession in its soil, would secure their influence as expounders, teachers, and in part administrators of the law, in favour of such a claim. In the later period of the prophets their constant complaints concerning the defrauding the poor (Is. x. 2; Amos v. 11, viii. 6) seem to show that such laws had lost their practical force. Still later, under the Scribes, minute legislation fixed one-sixtieth as the portion of a field which was to be left for the legal "corner;" but provided also (which seems hardly consistent) that two fields should not be so joined as to leave one corner only where two should fairly be reckoned. The proportion being thus fixed, all the grain might be reaped, and enough to satisfy the regulation subsequently separated from the whole crop. This "corner" was, like the gleanings, tithe-free. Certain fruit trees, *e. g.* nuts, pomegranates, vines and olives, were deemed liable to the law of the corner. Maimonides indeed lays down the principle (*Constitutiones de donis puperum*, cap. ii. 1) that whatever crop or growth is fit for food, is kept, and gathered all at once, and carried into store,

\* The two latter passages, speaking of "taking burdens of wheat from the poor," and of "selling the refuse (מִשְׁכָּת) of the wheat," i. e. perhaps the gleanings, seem to point to some special evasion of the harvest laws.

is liable to that law. A Gentile holding land in Palestine was not deemed liable to the obligation. As regards Jews an evasion seems to have been sanctioned as follows:—Whatever field was consecrated to the Temple and its services, was held exempt from the claim of the poor, an owner might thus consecrate it while the crop was on it, and then redeem it, when in the sheaf, to his own use. Thus the poor would lose the right to the "corner." This reminds us of the "Corban" (Mark vii. 11). For further information, see under AGRICULTURE.

The treatise *Peah*, in the Mishna, may likewise be consulted, especially chap. I. 2, 3, 4, 5, 6, II. iv. 7, also the above-quoted treatise of Maimonides. [H. H.]

**CORNER-STONE** (פִּנָּה אֲבֵן; λίθος γωνιαίος, or ἀκρογωνιαίος; lapis angularis; also פִּנָּה רִאשִׁית, Ps. cxviii. 22; κεφαλὴ γωνίας; *caput anguli*), a quoins or corner-stone, of great importance in binding together the sides of a building. Some of the corner-stones in the ancient work of the temple foundations are 17 or 19 feet long, and 7½ feet thick (Robinson, i. 286). Corner-stones are usually laid sideways and endways alternately, so that the end of one appears above or below the side-face of the next. At Nineveh the corners are sometimes formed of one angular stone (Layard, *Nin.* ii. 254). The expression in Ps. cxviii. 22 is by some understood to mean the coping or ridge, "coign of vantage," of a building, but as in any put a corner-stone must of necessity be of great importance, the phrase "corner-stone" is sometimes used to denote any principal person, as the princes of Egypt (Is. xix. 13), and is thus applied both to our Lord, who, having been once rejected, was afterwards set in the place of the highest honour (Is. xxviii. 16; Matt. xxi. 42; 1 Pet. ii. 6, 7; Grotius on Ps. cxviii. and Eph. ii. 20; Harmer, *Obs.* ii. 356). [H. W. P.]

**CORNET** (*Shophar*, שׁוֹפָר; σάλπιγξ; *buccina*), a loud sounding instrument, made of the horn of a ram or of a chamois, (sometimes of an ox) and used by the ancient Hebrews for signals, for announcing the יוֹבֵל, "Jubilee" (Lev. xxv. 9), for proclaiming the new year (Mishna, *Rosh Hash-shanah*, iii. and iv.), for the purposes of war (Jer. iv. 5, 19, comp. Job xxxix. 25), as well as for the sentinels placed at the watch-towers to give notice of the approach of an enemy (Ez. xxxiii. 4, 5). שׁוֹפָר is generally rendered in the A. V. "trumpet," but "cornet" (the more correct translation) is used in 2 Chr. xv. 14; Ps. xcviii. 6; Hos. v. 8; and 1 Chr. xv. 28. It seems probable that in the two last instances the authors of the A. V. would also have preferred "trumpet," but for the difficulty of finding different English names in the same passage for two things so nearly resembling each other in meaning as שׁוֹפָר, *buccina*, and Chatzót-zerah, חַצְצֹרֶה, *tuba*. "Cornet" is also employed in Dan. iii. 5, 7, 10, 15, for the Chaldean noun קֶרֶן, *Keren* (literally a horn).

Oriental scholars for the most part consider *Shophar* and *Keren* to be one and the same musical instrument; but some biblical critics regard *Shophar* and *Chatzót-zerah* as belonging to the species of *Keren*, the general term for a horn. (Joel Brill,

in preface to Mendelssohn's version of the Psalms.) Jahn distinguishes *Keren*, "the horn or crooked trumpet," from *Chatzótzerah*, the straight trumpet, an instrument a cubit in length, hollow throughout, and at the larger extremity so shaped as to resemble the mouth of a short bill" (*Archæology*, xcv. 4, 5); but the generally received opinion is, that *Keren* is the crooked horn, and *Shophar* the long and straight one.

The silver trumpets (חֲצֹצְרוֹת כֶּסֶף), which Moses was charged to furnish for the Israelites, were to be used for the following purposes: for the calling together of the assembly, for the journeying of the camps, for sounding the alarm of war, and for celebrating the sacrifices on festivals and new moons (Num. x. 1-10). The divine command through Moses was restricted to two trumpets only; and these were to be sounded by the sons of Aaron, the anointed priests of the sanctuary, and not by laymen. It should seem, however, that at a later period an impression prevailed, that "whilst the trumpets were suffered to be sounded only by the priests within the sanctuary, they might be used by others, not of the priesthood, without the sacred edifice." (Conrad Iken's *Antiquitates Hebraicæ*, par. i. sec. vii. "Sacerdotum cum instrumentis ipsorum.") In the age of Solomon the "silver trumpets" were increased in number to 120 (2 Chr. v. 12); and, independently of the objects for which they had been first introduced, they were now employed in the orchestra of the temple as an accompaniment to songs of thanksgiving and praise.

*Yobel*, יוֹבֵל, used sometimes for the "year of Jubile," שְׁנַת הַיּוֹבֵל, comp. Lev. xxv. 13, 15, with xav. 28, 30), generally denotes the institution of Jubile, but in some instances it is spoken of as a musical instrument, resembling in its object, if not in its shape, the *Keren* and the *Shophar*. Gesenius pronounces *Yobel* to be "an onomatopoeic word, signifying jubilation or a joyful sound, and hence applied to the sound of a trumpet signal, like תְּרוּעָה" ("alarm," Num. x. 5); and Dr. Munk is of opinion that "le mot YOBEL n'est qu'une épithète" (*Palestine*, 456 a, note). Still it is difficult to divest *Yobel* of the meaning of a sounding instrument in the following instances: "When the trumpet (הַיּוֹבֵל) soundeth long, they shall come up to the mount" (Ex. xix. 13); "And it shall come to pass that when they make a long blast with the ram's horn" (הַיּוֹבֵל בְּקֶרֶן יוֹבֵל Josh. vi. 5); "And let seven priests bear seven trumpets of rams' horns" (שֹׁפָרוֹת יוֹבֵלִים Josh. vi. 6).

The sounding of the cornet (תְּקִיעַת שׁוֹפָר) was the distinguishing ritual feature of the festival appointed by Moses to be held on the first day of the seventh month under the denomination of "a day of blowing trumpets" (יוֹם תְּרוּעָה) Num. xxix. 1), or "a memorial of blowing of trumpets" (זִכְרוֹן תְּרוּעָה Lev. xxiii. 24); and that rite is still observed by the Jews in their celebration of the same festival, which they now call "the day of memorial" (יוֹם הַזִּכְרוֹן), and also "New Year" (רֵאשִׁית הַשָּׁנָה). "Some commentators," says Ro-

senmüller, "have made this festival refer to the preservation of Isaac (Gen. xxii.), whence it is sometimes called by the Jews, 'the Binding of Isaac' (עֲקֻרַת יִצְחָק). But it is more probable that the name of the festival is derived from the usual kind of trumpets (ram's horns) then in use, and that the object of the festival was the celebration of the new year and the exhortation to thanksgivings for the blessings experienced in the year just finished. The use of cornets by the priests in all the cities of the land, not in Jerusalem only (where two silver trumpets were added, whilst the Levites chanted the 81st Psalm), was a suitable means for that object." (Rosenmüller, *Das alte und neue Morgenland*, vol. ii., No. 337, on Lev. xxiii. 24).

Although the festival of the first day of the seventh month is denominated by the Mishna "New Year;" and notwithstanding that it was observed as such by the Hebrews in the age of the second temple, there is no reason whatever to believe that it had such a name or character in the times of Moses. The Pentateuch fixes the vernal equinox (the period of the institution of the Passover), as the commencement of the Jewish year; but for more than twenty centuries the Jews have dated their new year from the autumnal equinox, which takes place about the season when the festival of "the day of sounding the cornet" is held. Rabbinical tradition represents this festival as the anniversary of the creation of the world, but the statement receives no support whatever from Scripture. On the contrary, Moses expressly declares that the month אֲבִיב (the Moon of the Spring) is to be regarded by the Hebrews as the first month of the year:—"This month shall be unto you the beginning (רֵאשִׁית) of months; it shall be the first (רֵאשִׁית) month of the year to you" (Ex. xii. 2). (Munk, *Palestine*, 184 b.).

The intention of the appointment of the festival of "the Sounding of the Cornet," as well as the duties of the sacred institution, appear to be set forth in the words of the prophet, "Sound the Cornet (שׁוֹפָר) in Zion, sanctify the fast, proclaim the solemn assembly" (Joel ii. 15). Agreeably to the order in which this passage runs, the institution of "the festival of Sounding the Cornet," seems to be the prelude and preparation for the awful Day of Atonement. The Divine command for that fast is connected with that for "the day of Sounding the Cornet" by the conjunctive particle וְ.

"Likewise on the tenth day of this seventh month is the day of Atonement" (Lev. xxiii. 27). Here וְ (likewise) unites the festival of "the day of Sounding the Cornet" with the solemnity of the day of Atonement precisely as the same particle connects the "festival of Tabernacles" with the observance of the ceremonial of "the fruit of the Hadar tree, the palm branches," &c. (Lev. xxiii. 34-40). The word "solemn assembly" (עֲצֻרָה) in the verse from Joel quoted above, applies to the festival "Eighth day of Solemn Assembly" (שְׁמִינִי עֲצֻרָה) (Lev. xxiii. 36), the closing rite of the festive cycle of *Tishri* (see *Religious Discourses* of Rev. Professor Marks, vol. i. pp. 291-2).

Besides the use of the cornet on the festival of "blowing the trumpets," it is also sounded in the synagogue at the close of the service for the day of

atonement, and, amongst the Jews who adopt the ritual of the *Seph urdim*, on the seventh day of the feast of Tabernacles, known by the post-biblical denomination of "the Great Hosannah" (הושענא רבה).

The sounds emitted from the cornet in modern times are exceedingly harsh, although they produce a solemn effect. Gesenius derives the name שופר from שפר = Arab. *شفر* "to be bright, clear"

(compare שפרה, Ps. xvi. 6). [D. W. M.]

**COS** (*Kōs*, now *Stanchio* or *Stanko*). This small island has several interesting points of connexion with the Jews. It is specified, in the edict which resulted from the communications of Simon Maccabaeus with Rome, as one of the places which contained Jewish residents (1 Macc. xv. 23). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war (Joseph. *Ant.* xiv. 7, §2). From the same source we learn that Julius Caesar issued an edict in favour of the Jews of Cos (*ibid.* 10, §15). Herod the Great conferred many favours on the island (Joseph. *B. J.* i. 21, §11); and an inscription in Böckh (No. 2502) associates it with Herod the tetrarch. St. Paul, on the return from his third Missionary Journey, passed the night here, after sailing from MILETUS. The next day he went on to RHODES (Acts xxi. 1). The proximity of Cos to these two important places, and to CNIDUS, and its position at the entrance to the Archipelago from the east, made it an island of considerable consequence. It was celebrated for its light woven fabrics, and for its wines,—also for a temple of Aesculapius, to which a school of physicians was attached, and which was virtually, from its votive models, a museum of anatomy and pathology. The emperor Claudius bestowed upon Cos the privilege of a free state (Tac. *Ann.* xii. 61). The chief town (of the same name) was on the N.E. near a promontory called Scandarium; and perhaps it is to the town that reference is made in the Acts (i. c.). There is a monograph on Cos by Küster (*De Co Insula*, Halle, 1833), and a very useful paper on the subject by Col. Lenke (in the *Trans. of the Royal Soc. of Literature*, vol. i., second series). An account of the island will be found in Clarke's *Travels*, vol. ii., pt. i., pp. 196-213, and vol. ii., pt. ii., pp. 321-333; but the best description is in Ross, *Reisen nach Kos, Iulicarnassus, u. s. w.* (Halle, 1852) with which his *Reisen auf den Griech. Inseln* should be compared, vol. ii. (1843), pp. 86-92, vol. iii. (1845), pp. 126-139. [J. S. H.]

Tetradrachm of Cos (Phoenician talent). Obv. Head of young Hercules to right. Rev. *KOSION* crab and bow in case, all within dotted square.

**CO'SAM** (*Koradu*; *Cosam*, a name that occurs nowhere else either in the O. T. or N. T., and is of doubtful etymology), son of Elmodan, and

fifth before Zorobabel, in the line of Joseph the husband of Mary, Luke iii. 28. [GENEALOGIES OF CHRIST.] [A. C. H.]

**COTTON** (כֹּפֶּס; *κάπνασος*, τὰ *καπνάσωα*,

Esth. i. 6, where the Vulg. has *carbasini coloris*, as if a colour,\* not a material (so in A. V. "green"), were intended). There is a doubt whether under שֶׁשׁ, *Shesh*, in the earlier and בָּזָז, *Bätz*, in the later books of the O. T. rendered in the A. V. by "white linen," "fine linen," &c., cotton may have been included as well. Both *Shesh* and *Bätz* are said by Gesen. (s. v.) to be from roots signifying originally mere whiteness; a sense said also to inhere in the word כֹּפֶּס (perhaps Arab. *abyad*, أبيض, "white"),

used sometimes instead of, and sometimes together with *Shesh* to mean the fabric. In Ez. xxvii. 7, 16, שֶׁשׁ, *Shesh* is mentioned as imported into Tyre from Egypt, and *Bätz* as from Syria. Each is found in turn coupled with אַרְבָּנָן (*purpura*), in the sense of "purple and fine linen," i. e. the most showy and costly apparel (comp. Prov. xxxi. 22 with Esth. viii. 15). The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37), in spite of Pliny's assertion (xix. 1, 2) that they preferred cotton. Yet cotton garments for the worship of the temples is said to be mentioned in the Rosetta stone (Wilkinson, *A. E.* iii. 117). The same with the Jewish ephod and other priestly attire, in which we cannot suppose any carelessness to have prevailed. If, however, a Jew happened to have a piece of cotton cloth, he probably would not be deterred by any scruple about the *heterogenea* of Deut. xxii. 11 from wearing that and linen together. There is, however, no word for the cotton plant (like שִׁטְהָה for flax) in the Hebrew, nor any reason to suppose that there was any early knowledge of the fabric.

The Egyptian mummy swathings also, many of which are said to remain as good as when fresh from the loom, are decided, after much controversy and minute analysis, to have been of linen, and not cotton. The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Even Greek naturalists sometimes clearly include "cotton" under *λίνον*. The same appears to be true of *δδόνη*, *δδονιον*, and the whole class of words signifying white textile vegetable fabrics. The proper Oriental name for the article כֹּפֶּס (said to occur with slight variation in Sansk. and other Oriental languages<sup>b</sup>) is rendered "green" in the A. V. of Esth. i. 6, but Grecised in the LXX. by *καπνάσωα*. From the same word, with which either their Alexandrian or Parthian intercourse might familiarise them, the Latins borrowed *carbasus*, completely current in poetical use in the golden and

\* So כֹּפֶּס, "white" in A. V. *ibid.*, is probably not a colour, but a stuff, possibly silk: comp. Arab.

حريز, *hareer*, "silk." The כֹּפֶּס, "sheets," marg.

"shirts," of A. V. Judg. xiv. 13, 18, and "fine linen," Is. iii. 23, is perhaps a form of the same word as *κόδιον*, Mark xiv. 51.

<sup>b</sup> *Kurpass* or *kurpasum* is the Sansk. *Kupas* in Hindee means the cotton rose or pod with seed, which in the Bengalee is *kapasee*, and in the Bombay dialect, *kappos*.

silver period of Latinity, for sails, awnings, &c. Varro knew of tree-wool on the authority of Ctesias contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Amasis<sup>2</sup> indeed (about B.C. 540) sent as a present from Egypt a *corset κεκοσμημένον χρυσῷ καὶ ἐρίσσι ἀπὸ ἐξυλοῦ* (Herod. iii. 47), which Pliny says was still existing in his time in a temple in Rhodes, and that the minuteness of its fibre had provoked the experiments of the curious. Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its growth, as in the case of flax, in that country (Wilkinson, ib. p. 116-139, and plate No. 356); indeed had it been a general product we could scarcely have missed finding some trace of it on the monumental details of ancient Egyptian arts, trades, &c.; but, especially, when Pliny (A.D. 115) asserts that cotton was then grown in Egypt, a statement confirmed by Julius Pollux (a century later), we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is the more likely since we find the cotton-tree (*gossypium arboreum*, less usual than, and distinct from, the cotton *plant*, *goss. herbac.*) is mentioned still by Pliny as the *only remarkable* tree of the adjacent Ethiopia; and since Arabia, on its other side, appears to have known cotton<sup>4</sup> from time immemorial to grow it in abundance, and in parts to be highly favourable to that product. In India, however, we have the earliest records of the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 B.C., in the Institutes of Manu; also (it is said, on the authority of Prof. Wilson) in the *Rig Veda*, 105, v. 8. For these and some other curious antiquities of the subject, see Royle's *Culture and Commerce of Cotton in India*, pp. 117-122.

Cotton is *now* both grown and manufactured in various parts of Syria and Palestine, and, owing probably to its being less conductive of heat, seems preferred for turbans and shirts to linen; but there is no proof that, till they came in contact with Persia, the Hebrews generally knew of it as a distinct fabric from linen, whilst the negative proof of language and the probabilities of fact offer a strong presumption that, if they obtained it at all in commerce, they confounded it with linen under the terms *Shesh* or *Bätz*. The greater cleanness and durability of linen probably established its superiority over cotton for sepulchral purposes in the N. T. period, by which time the latter must have been commonly known, and thus there is no reason for assigning cotton as the material of the *ὀθόνια* and *ἐνράδια* of which we read. For the whole subject, see Yates's *Texturinum Antiquorum*, pt. i. chap. vi. and app. D. [H. H.]

## COUCH. [BED.]

<sup>2</sup> So Burekhardt (*Trav. Nub.* App. iii. p. 515, note) mentions "a species of cuirass made of quilted cotton" as still worn by certain tribes adjacent to the Nile.

و

<sup>4</sup> Arab. *Coton*, قطن, means: 1. any annual; 2. anything between two leaves; 3. the well-known "cotton" plant. This evolving of the special from the general sense seems to indicate that the name "cotton" is originally Arabic; though it may be true that the plant is indigenous in India.

COUNCIL. 1. (*συνέδριον*) the great council of the Sanhedrim, which sat at Jerusalem. [SANHEDRIM.] 2. (*συνέδρια*, Matt. x. 17; Mark xiii. 9) the lesser courts, of which there were two at Jerusalem, and one in each town of Palestine. The constitution of these courts is a doubtful point; according to Talmudical writers the number of judges was twenty-three in places where there was a population of 120, and three where the population fell below that number (Mishn. *Sanhedr.* 1, §6). Josephus, however, gives a different account: he states that the court, as constituted by Moses (Dent. xvi. 18; comp. *Ant.* iv. 8, §14), consisted of seven judges, each of whom had two Levites as assessors; accordingly in the reform which he carried out in Galilee, he appointed seven judges for the trial of minor offences (*B. J.*, ii. 20, §5). The statement of Josephus is generally accepted as correct; but it should be noticed that these courts were not always in existence; they may have been instituted by himself on what he conceived to be the true Mosaic model; a supposition which is rendered probable by his further institution of a council of Seventy, which served as a court for capital offences, altogether independent of the Sanhedrim at Jerusalem (*Vit.* §14; *B. J.*, ii. 20, §5). The existence of local courts, however constituted, is clearly implied in the passages quoted from the N. T.; and perhaps the *judgment* (Matt. v. 21) applies to them. 3. *συμβούλιον* (Acts xxv. 12), a kind of jury or privy council, consisting of a certain number of assessors (*consilarii*, Suet. *Tib.* 33, 55), who assisted Roman governors in the administration of justice and other public matters. [W. L. B.]

COURT, an open enclosure, applied in the A. V. most commonly to the enclosures of the Tabernacle and the Temple. The Hebrew word invariably used for the former is *Chatzer*, חצר, from a root, צרץ, to surround (Ges. 512). (See, amongst others, Ex. xxvii. 9, to xl. 33; Lev. vi. 16; Num. iii. 26, &c.) The same word is also most frequently used for the "courts" of the Temple, as 1 K. vi. 36, vii. 8, xxiii. 12; 1 Chr. xxiii. 5; Ps. xcii. 13, &c. In 2 Chr. iv. 9 and vi. 13, however, a different word is employed, apparently, for the same places—*Azarah*, אצרה, from a root of similar meaning to the above. This word also occurs in Ezek. xliii. 14, 17, 20, xlv. 19 (A. V. "settle"), but perhaps with a different force. *Chatzer* also designates the court of a prison (Neh. iii. 25; Jer. xxxi. 2, &c.), of a private house (2 Sam. xvii. 18), and of a palace (2 K. ix. 4; Esth. i. 5, &c.). In Amos vii. 13, where the Hebrew word is *Belh*=a "house," our translators, anxious to use a term applicable specially to a king's residence, have put "court." [HOUSE; TABERNACLE; TEMPLE.]

The word *Chatzer* is very often employed for the enclosures of the villages of Palestine, and under the form of *Hazer* or *Hazor* frequently occurs in the names of places in the A. V. [HAZER; VIL-LAGE.] [G.]

COU'THA (*Κουθά; Phusa*), 1 Esdr. v. 32 There is no name corresponding with this in the lists of Ezra and Nehemiah.

COVENANT (כּוּנָח; διαθήκη; once, Wisd. i. 16, συνθήκη; in O. T. *fordis*, *pactum*—often interchangeably, Gen. ix. xvii.; Num. xxi. in Apoc. *testamentum*, but *sacramentum*, 2 Esd. ii. 7; *ἡμην-*

siones. Wisd. i. 16; in N. T. *testamentum* [absque *foedere*, Rom. i. 31; Gr. *συνθετός*]). The Hebrew word is derived by Gesenius from the root *כָּרַת*, *i. q.* *כָּרַת*, "he cut," and taken to mean primarily "a cutting," with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xv.; Jer. xxxiv. 18, 19). Hence the expression "to cut a covenant" (*כָּרַת בְּרִית*, Gen. xv. 18, or simply *כָּרַת*, with *בְּרִית* understood, 1 Sam. xi. 2) is of frequent occurrence. (Comp. *δρακία τέμνειν, τέμνειν σπονδάς, iocere, ferire, percutere foedus*.) Professor Lee suggests (*Heb. Lex. s. v.* *בְּרִית*) that the proper signification of the word is *an eating together*, or *banquet*, from the meaning "to eat," which the root *כָּרַת* sometimes bears, because among the Orientals to eat together amounts almost to a covenant of friendship. This view is supported by Gen. xxxi. 46, where Jacob and Laban eat together on the heap of stones which they have set up in ratifying the covenant between them. It affords also a satisfactory explanation of the expression "a covenant of salt" (*בְּרִית מֶלַח*, *διαθήκη ἁλός*, Num. xviii. 19, 2 Chr. xiii. 5), when the Eastern idea of eating salt together is remembered. If, however, the other derivation of *בְּרִית* be adopted, this expression may be explained by supposing salt to have been eaten or offered with accompanying sacrifices on occasion of very solemn covenants, or it may be regarded as figurative, denoting, either, from the use of salt in sacrifice (Lev. ii. 13, Mark ix. 49), the sacredness, or, from the preserving qualities of salt, the perpetuity, of the covenant.

In the N. T. the word *διαθήκη* is frequently, though by no means uniformly, translated *testament* in the English Authorised Version, whence the two divisions of the Bible have received their common English names. This translation is perhaps due to the Vulgate, which having adopted *testamentum* as the equivalent for *διαθήκη* in the Apoc., uses it always as such in the N. T. (see above). There seems, however, to be no necessity for the introduction of a new word conveying a new idea. The LXX. having rendered *בְּרִית* (which never means *will* or *testament*, but always *covenant* or *agreement*) by *διαθήκη* consistently throughout the O. T., the N. T. writers, in adopting that word, may naturally be supposed to intend to convey to their readers, most of them familiar with the Greek O. T., the same idea. Moreover, in the majority of cases the same thing which has been called a "covenant" in the O. T. is referred to in the N. T. (e. g. 2 Cor. iii. 14: Heb. vii., ix.; Rev. xi. 19); while in the same context the same word and thing in the Greek are in the English sometimes represented by "covenant," and sometimes by "testament" (Heb. vii. 22, viii. 8-13, ix. 15). In the confessedly difficult passage, Heb. ix. 16, 17, the word *διαθήκη* has been thought by many commentators absolutely to require the meaning of *will* or *testament*. On the other side, however, it may be alleged, that in relation to what has just been said as to the usual meaning of the word in N. T., the word occurs twice in the context, where its meaning must necessarily be the same as the translation of *בְּרִית*, and in the unquestionable sense of *covenant* (cf. *διαθήκη καὶνή*, Heb. ix. 15, with the same expression in

viii. 8; and *διαθήκη*, ix. 16, 17, with ver. 20, and Ex. xxiv. 8). If this sense of *διαθήκη* be retained, we may either render *ἐπὶ νεκροῖς*, "over, or in the case of, dead sacrifices," or *ὁ διαθεμένος*, "the mediating sacrifice" (Scholefield's *Hints for an improved Translation of the N. T.*), or (with Elrard and others) restrict the statement of ver. 16 to the O. T. idea of a covenant between man and God, in which man, as guilty, must always be represented by a sacrifice with which he was so completely identified, that in its person he (*ὁ διαθεμένος*, the human covenanter) actually died (cf. Matt. xxvi. 28).

In its Biblical meaning of a compact or agreement between two parties, the word is used—  
1. *Improperly*, of a covenant between God and man. Man not being in any way in the position of an independent covenanting party, the phrase is evidently used by way of accommodation. Strictly speaking, such a covenant is quite unconditional, and amounts to a promise (Gal. iii. 15 ff., where *ἐπαγγελία* and *διαθήκη* are used almost as synonymous) or act of mere favour (Ps. lxxxix. 28, where *חֶסֶד* stands in parallelism with *בְּרִית*) on God's part. Thus the assurance given by God after the Flood, that a like judgment should not be repeated, and that the recurrence of the seasons, and of day and night, should not cease, is called a covenant (Gen. ix.; Jer. xxxiii. 20). Generally, however, the form of a covenant is maintained, by the benefits which God engages to bestow being made by him dependent upon the fulfilment of certain conditions which he imposes on man. Thus the covenant with Abraham was conditioned by circumcision (Acts vii. 8), the omission of which was declared tantamount to a breach of the covenant (Gen. xvii.); the covenant of the priesthood, by zeal for God, his honour and service (Num. xxi. 12, 13; Deut. xxxiii. 9; Neh. xiii. 29; Mal. ii. 4, 5); the covenant of Sinai, by the observance of the ten commandments (Ex. xxxiv. 27, 28; Lev. xxvi. 15), which are therefore called "Jehovah's covenant" (Deut. iv. 13), a name which was extended to all the books of Moses, if not to the whole body of Jewish canonical Scriptures (2 Cor. iii. 13, 14). This last-mentioned covenant, which was renewed at different periods of Jewish history (Deut. xxix.; Josh. xxiv.; 2 Chr. xv. xxiii. xxix. xxxiv.; Ezer. x.; Neh. ix. x.), is one of the two principal covenants between God and man. They are distinguished as old and new (Jer. xxxi. 31-34; Heb. viii. 8-13, x. 16), with reference to the order, not their institution but of their actual development (Gal. iii. 17); and also as being the instruments respectively of bondage and freedom (Gal. iv. 24). The latter of these covenants appears to be represented in Gal. iii. under a twofold aspect, as being a covenant between the First and Second Persons of the blessed Trinity (ver. 16 and ver. 20, as explained by Scholefield, Ellicott, &c.), and also a covenant, conditioned by faith in Christ, between God and man. (See Bp. Hopkins's *Works*, vol. ii. pp. 299-398, and *Witsius on the Covenants*, for the theology of the subject.) Consistently with this representation of God's dealings with man under the form of a covenant, such covenant is said to be confirmed in conformity to human custom by an oath (Deut. iv. 31; Ps. lxxxix. 3), to be sanctioned by curses to fall upon the unfaithful (Deut. xxix. 21), and to be accompanied by a sign (*תּוֹט*), such as the rainbow (Gen. ix.), circumcision (Gen. xvii.), or the Sabbath (Ex. xxi. 16, 17).

2. *Properly*, of a covenant between man and man, *i. e.* a solemn compact or agreement, either between

tribes or nations (1 Sam. xi. 1; Josh. ix. 6, 15), or between individuals (Gen. xxi. 44), by which each party bound himself to fulfil certain conditions, and was assured of receiving certain advantages. In making such a covenant God was solemnly invoked as witness (Gen. xxi. 50), whence the expression "a covenant of Jehovah" (בְּרִית יְהוָה, 1 Sam. xx. 8, comp. Ez. xvii. 19), and an oath was sworn (Gen. xxi. 31); and accordingly a breach of covenant was regarded as a very heinous sin (Ez. xvii. 12-20). A sign (אוֹת) or witness (עֵד) of the covenant was sometimes framed, such as a gift (Gen. xxi. 30), or a pillar, or heap of stones erected (Gen. xxxi. 52). The marriage compact is called "the covenant of God," Πῶν. ii. 17 (see Mal. ii. 14). The word covenant came to be applied to a sure ordinance, such as that of the shew-bread (Lev. xxiv. 8); and is used figuratively in such expressions as a covenant with death (Is. xxviii. 18), or with the wild beasts (Hos. ii. 18). The phrases אֲנָשֵׁי בְרִית, בְּעָלֵי בְרִית, "lords or men of one's covenant," are employed to denote confederacy (Gen. xiv. 13, Ob. 7). [T. T. P.]

**COW.** The Heb. words עֵזְרָה, בָּקָר, and שׁוֹר have been treated under BULL. The A. V. renders by "cow," both בָּקָר, in Ez. iv. 15, and שׁוֹר in Lev. xxii. 28; Num. xviii. 17, where the feminine gender is required by the sense. In Job xxi. 10 and Is. xi. 7, the A. V. has "cow" as the rendering of פָּרָה, the fem. form of פָּר, "a bullock." [W. D.]

**COZ** (קֹיץ; Κωέ; Cos), a man among the descendants of Judah (1 Chr. iv. 8).

**COZBI** (צִבְיָה; Χασβί; Jos. Χασβία; Corbi), a Midianite woman, daughter of Zur, one of the chiefs of the nation (Num. xxv. 15, 18).

**CRANE** (סוּס, סוּסִים). The word occurs only twice in A. V. in Is. xxxviii. 14, and Jer. viii. 7, where the proper rendering seems to be *swallow*. The former passage implies that the bird called סוּס had a plaintive voice, the latter that it was of migratory habits. The northern Italians call the swallow *zisilla* and use the verb *zisillare* = τριτοβίλει, ψιτοβίλει. [SWALLOW.] [W. D.]

**CRA'TES** (Κράτης; Vulg. translates *praefatus* est), governor of the Cyprians (δ ἐπὶ τῶν Κ.), who was left in charge of the "castle" (τῆς ἀκροπόλεως) of Jerusalem (?), during the absence of Nostatus, in the reign of Antiochus Epiphanes (2 Macc. iv. 29).

#### CREDITOR. [LOAN.]

**CRESCENS** (Κρησενς, 2 Tim. iv. 10), an assistant of St. Paul, said to have been one of the seventy disciples. According to the *Apostolical Constitutions*, and many of the fathers, he preached the Gospel in Galatia, which perhaps is only a conjecture built on the "Crescens to Galatia" of 2 Tim. iv. 10. Later tradition (Sophronius) makes him preach in Gaul (Galatia, see Theodoret on 2 Tim. i. c.), and found the Church at Vienne. [H. A.]

**CRETE** (Κρήνη; *Creta*), the modern *Candia*. This large island, which closes in the Greek Archipelago on the S., extends through a distance of 140 miles between its extreme points of Cape SALMONE (Acts xxvii. 7) on the E., and Cape Crimmetopon beyond PHOENICK or Phoenix (ib. 12) on the W. The breadth is comparatively small, the narrowest

part (called an isthmus by Strabo, x. p. 475) being near Phoenix. Though extremely bold and mountainous, this island has very fruitful valleys, and in early times it was celebrated for its hundred cities (Virg. *Aen.* iii. 106). Crete has a conspicuous position in the mythology and earliest history of Greece, but a comparatively unimportant one in its later history. It was reduced (B.C. 67) by the Romans under Metellus, hence called Creticus, and united in one province with Cyrenaica, which was at no great distance (Strabo, x. 475) on the opposite coast of Africa [CYRENE]. It is possible that in Tit. iii. 1, there may be an implied reference to a turbulent condition of the Cretan part of the province, especially as regarded the Jewish residents.

It seems likely that a very early acquaintance took place between the Cretans and the Jews. The story in Tacitus (*Hist.* v. 2), that the Jews were themselves of Cretan origin, may be accounted for by supposing a confusion between the Philistines and the Jews, and by identifying the Cherethites of 1 Sam. xxx. 14; 2 Sam. viii. 18; Ezek. xxv. 16; Zeph. ii. 5, with Cretan emigrants. In the two last of these passages they are expressly called Κρήτες by the LXX., and in Zeph. ii. 6, we have the word Κρήτη. Whatever conclusion we may arrive at on this point, there is no doubt that Jews were settled in the island in considerable numbers during the period between the death of Alexander the Great and the final destruction of Jerusalem. Gortyna seems to have been their chief residence; for it is specially mentioned (1 Macc. xv. 23) in the letters written by the Romans on behalf of the Jews, when Simon Maccabaeus renewed the treaty which his brother Judas had made with Rome. [GORTYNA.] See 1 Macc. x. 67. At a later period Josephus says (*Ant.* xvii. 12, §1, *B. J.* ii. 7, §1) that the Pseudo-Alexander, Herod's supposed son, imposed upon the Jews of Crete, when on his way to Italy. And later still, Philo (*Leg. ad Cai.* §30) makes the Jewish envoys say to Caligula that all the more noted islands of the Mediterranean, including Crete, were full of Jews. Thus the special mention of Cretans (Acts ii. 11) among those who were in Jerusalem at the great Pentecost is just what we should expect.

No notice is given in the Acts of any more direct evangelisation of Crete; and no absolute proof can be adduced that St. Paul was ever there before his voyage from Caesarea to Puteoli; though it is quite possible that he may have visited the island in the course of his residences at Corinth and Ephesus. For the speculations which have been made in reference to this point, we must refer to what is written in the articles on TITUS, and TITUS, EPISTLE TO.

The circumstances of St. Paul's recorded visit were briefly as follows. The wind being contrary when he was off CNIDUS (Acts xxvii. 7), the ship was forced to run down to Cape Salmon, and thence under the lee of Crete to FAIR HAVENS, which was near a city called LASAEA (v. 8). Thence, after some delay, an attempt was made, on the wind becoming favourable, to reach Phoenix for the purpose of wintering there (v. 12); but a sudden gale from the N.E. [WINDS] coming down from the high ground of Crete (κατ' ἀντήν), in the neighbourhood of Mount Ida, drove the ship to the little island of CLAUDIA (vv. 13-16), whence she drifted to Malta. It is impossible to say how far this short stay at Fair Havens may have afforded opportunities for preaching the Gospel at Lasaea or elsewhere.

The next point of connexion between St. Paul and this island is found in the epistle to Titus. It is evident from Tit. i. 5, that the Apostle himself was here at no long interval of time before he wrote the letter. We believe this to have been between the first and second imprisonments. In the course of the letter (Tit. i. 12) St. Paul adduces from Epimenides, a Cretan sage and poet (*θεῖος ἀνὴρ*, Plat. *Lagg.* i. 642), a quotation in which the vices of his countrymen are described in dark colours. The truth of what is said by Epimenides is abundantly confirmed by the passages collected (iv. 10) in Meursius's great work on Crete (Meursii *Opera*, Florence, 1744, vol. iii.). He has also a chapter (iv. 4) on the early Christian history of the island. Titus was much honoured here during the middle ages. The cathedral of Megilo-Castron was dedicated to him: and his name was the watchword of the Cretans, when they fought against the Venetians, who themselves seem to have placed him above St. Mark in Candia, when they became masters of the island. See Pashley's *Travels in Crete*, i. pp. 6, 175 (London, 1837). In addition to this valuable work, we must refer to Hoeck's *Kreta* (Göttingen, 1829), and to some papers translated from the Italian, and published by Mr. E. Falkener in the second volume of the *Museum of Classic Antiquities* (London, 1856). [J. S. H.]

#### CRIMSON. [COLOURS.]

CRISPUS (*Κρίσπος*; found also in the Talmudists under the forms *כריספוס* and *כריספוס*), ruler of the Jewish synagogue at Corinth (Acts xviii. 8); baptized with his family by St. Paul (1 Cor. i. 14). According to tradition, he became afterwards Bishop of Aegina (*Const. Apost.* vii. 46). [H. A.]

**CROSS** (*σταυρός, σκόλοψ*). Except the Latin *crux* there was no word definitively and invariably applied to this instrument of punishment. The Greek word *σταυρός* is derived from *σταῦρος*, and properly, like *σκόλοψ*, means merely a stake (Hom. *Od.* xiv. 11; *Il.* xxiv. 453). Hence Eusebius defines *σταυροί* to be *ὁρθὰ καὶ ἀποξυμμένα ξύλα*, and Hesych. *οἱ καταπεπηγότες σκόλοποι, χάρακες*. The Greeks use the word to translate both *pilus* and *crux*; e. g. *σταυρὸν προσδεῖν* in Dion. Cass. (xlix. 22) is exactly equivalent to the Latin *ad pilum deligere*. In Livy even *crux* means a mere stake (*in tres sustolli cruces*, xxviii. 29), just as *vice versa* the Fathers use *σκόλοψ*, and even *stipes* (*de stipe pendens*) of a cross proper. (In consequence of this vagueness of meaning, impaling (Herod. ix. 76) is sometimes spoken of, loosely, as a kind of crucifixion, and *ἀνασκολοπιεῖν* is nearly equivalent to *ἀνασταυροῦν*; *alii per obsceca stipitem egerunt, alii brachia patibulo explicuerunt*, Sen. *Consol. ad Marc.* xx.; and *Ep.* xiv.). Other words occasionally applied to the cross are *patibulum* and *furca*, pieces of wood in the shape of Π (or Y) and Δ respectively (*Dig.* 48, tit. 13; *Plaut. Mil. Gl.* ii. 47; and in Sall. fr. ap. Non. iv. 355, *patibulo eminus affligebatur* seems clearly to imply crucifixion). After the abolition of this mode of death by Constantine, Trebonianus substituted *furcā figendos* for *crucifigendos*, wherever the word occurred. More generally the cross is called *arbor infelix* (Liv. i. 26; Sen. *Ep.* 101), or *ignum infelix* (Cic. *pro Rab.* 3); and in Greek *ξύλον* (Dent. xxi. 22). The Fathers in controversy used to quote the words *ὁ Κόσμος ἑβασιλευσεν*

(*ἀπὸ τοῦ ξύλου*), from Ps. xlv. 10, or Ps. xcvi., as a prophecy of the cross; but these words are *adulterina et Christianā devotione addita*; though GENEBRARDUS thought them a prophetic addition of the LXX., and Agellinus conjectures that they read *ξύ* for *ἥ* (Schleusner's *Thes.*). The Hebrews had no word for a cross more definite than *עֵץ*, "wood" (Gen. xl. 19, &c.), and so they called the transverse beams *עֵץ וְעֵץ*, "warp and woof" (Pearson, *On the Creed*, art. iv.), like *ξύλον διδύμον*, LXX. *Crux* is the root of *crucio*, and is often used proverbially for what is most painful (as *sumum jus, summa crux*, Colum. i. 7; *querere in nullo crucem*, Ter. *Phorm.* iii. 3, 11), and as a nickname for villains (*Quid ais, crux?* *Plaut. Pen.* ii. 5, 17). Harer terms are *Υκρίον* (Euseb. viii. 8), *σάβις* (?), and *Gabalus* (Varro ap. Non. ii. 373; Martinius ap. Capitol. *Maecr.* 11). This last word is derived from *בבל*, "to complete."

As the emblem of a slave's death and a murderer's punishment, the cross was naturally looked upon with the profoundest horror, and closely connected "with the ideas of pain, of guilt, and of ignominy" (Gibbon, ii. 153); *Nomen ipsum crucis absit non modo a corpore civium Romanorum, sed etiam a cogitatione, oculis, auribus*, (Cic. *pro Rab.* 5). But after the celebrated vision of Constantine (Euseb. l'. *Const.* i. 27-30), he ordered his friends to make a cross of gold and gems, such as he had seen, and "the towering eagles resigned the flags unto the cross" (Pearson), and "the tree of cursing and shame" "sat upon the sceptres and was engraved and signed on the foreheads of kings" (Jer. Taylor, *Life of Christ*, iii. xv. 1). The new standards —

"In quibus effigies crucis aut gemmata refulget,  
Aut longis solidæ ex auro præfertur ab hastis,"

(Prudent. in *Symon.* ii. 464, sq.)

were called by the name *Labarum*, and may be

seen engraved in Baronius (*Ann. Eccl.* A.D. 312, No. 36), or represented on the coins of Constantine the Great and his nearer successors. The *Labarum* is described in Euseb. (*V. Constant.* i. 25), and, besides the pendent cross, supported the celebrated emblem of Christ (Gibbon, ii. 154; *Transversâ X litterâ, summo capite circumflexo*, Caecil.), which was also inscribed on the shields and helmets of the legions: —

"Christus purpureum gemmanti tectus in auro  
Signabat labarum; clypeorum insignia Christus  
Scripserat, ardebat summis  
crux addita cristæ."

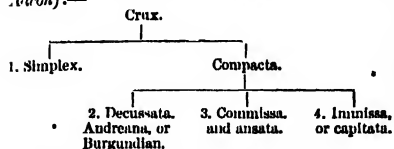

(Prudent. l. c.)

Nay, the *σμβολον σωτηριον* was even more prominently honoured; for Jerome says, *Regum purpuras et ardentis diadematum gemmas patibuli Salvatoris pictura condecorat* (*Ep. ad Loetam.*).

The Labarum.  
(From a Coin in the British Museum.)

We may tabulate thus the various descriptions of *crucis* (Lips. de *Cruce*, i.; Godwyn's *Moses and Aaron*):—

1. The *crux simplex*, or mere stake "of one single piece without transom," was probably the original of the rest. Sometimes it was merely driven through the man's chest, but at other times it was driven longitudinally, *διὰ ῥάχματος καὶ νότου* (Hesych. s. v. *σκόλοψ*), coming out at the mouth (Sen. *Ep.* xiv.), a method of punishment called *ἀνασκιρδύλλεσις*, or *inflicio*. The *afflicio* consisted merely of tying the criminal to the stake (*ad patulum deligare*, Liv. xxvi. 13), from which he hung by his arms; the process is described in the little poem of Ausonius, *Cupido crucifixus*. Trees were naturally convenient for this purpose, and we read of their being applied to such use in the Martyrologies. Tertullian too tells us (*Apol.* viii. 16) that to punish the priests of Saturn, Tiberius in *cisdem arboribus, obumbratricibus scelerum, votivis crucibus explicuit* (cf. Tac. *German.* xii., *Proditores et transfugas arboribus suspendunt*). How far the expression "accursed tree" is applicable under this head is examined under the word *CRUCIFIXION*.

2. The *crux decussata* is called St. Andrew's cross, although on no good grounds, since, according to some, he was killed with the sword; and Hippolytus says that he was crucified upright, *ad arborem olivæ*. It is in the shape of the Greek letter X (Jerome, in *Ser.* xxxi.; *X littera et in figurâ crucem, et in numero decem demonstrat*, Isidor. *Orig.* i. 3). Hence Just. Mart. (*Dial. c. Tryph.* p. 200) quotes Plato's expression, *ἐχέλασεν αὐτὸν ἐν τῷ πάντι*, with reference to the cross. The Fathers, with their usual luxuriant imagination, discover types of this kind of cross in Jacob's blessing of Joseph's sons, *χέρουσιν ἐνθλαγμέναις* (cf. Tert. *de Baptismo*, viii.); in the anointing of priests "decussatively" (Sir T. Browne, *Garden of Cyrus*); for the rabbis say that kings were anointed in *formâ coronæ, sacerdotes autem* *בצורת צלב*, i. e. *ad formam X Graecorum* (Schoettgen's *Hor. Hebr. et Talm.* iv. ad f.); and in the crossing of the hands over the head of the goat on the day of expiation (Targ. *Jonath. ad Lev.* xvi. 21, &c.).

3. The *crux commissa*, or St. Anthony's cross (so called from being embroidered on that saint's cope, Mrs. Jameson's *Sacred Art*, i. xxxv.), was in the shape of a T. Hence Lucian, in his amusing *Δίκη φωνηέντων*, jocosely derives *σταυρός* from *τάυ* (*ἀπὸ τούτου . . καὶ τῷ τεχνήματι τῷ ποιητῇ τὴν ποιητὴν ἐπιωνυμίαν συνεθεῖν*), and makes mankind accuse it bitterly for suggesting to tyrants the instrument of torture (*Jud. Vocal.* 12). This shape is often alluded to as "the mystical Tau" (*Garden of Cyrus*; *nostra autem T species crucis*, Tert. *adv. Marc.* iii. 22; Jer. in *Ezech.* ix., &c.). As that letter happens to stand for 300, opportunity was given for more elaborate trifling; thus the 300 cubits of the ark are considered typical (Clem. Alex. *Strom.* vi.; S. Paulin. *Ep.* ii.); and even Abraham's 318 servants (!); since 318 is represented by *תת*, they deduced *τὸν μὲν Ἰησοῦν*

*ἐν τοῖς δύοις γράμμασιν καὶ ἐν ἐνὶ τὸν σταυρὸν* (Barnab. *Ep.* ix.; Clem. Alex. *Strom.* vi.; Ambros. *Prod. in l. i. de Fide*; Pearson (art. iv.) on the *Croci*, in whose notes these passages are quoted).

A variety of this cross (the *crux ansata*, "crosses with circles on their heads") is found "in the sculptures from Khorsabad and the ivories from Nimrod. M. Lajard (*Observations sur la Croix ansée*) refers it to the Assyrian symbol of divinity, the winged figure in a circle; but Egyptian antiquaries quite reject the theory" (Lajard's *Nineveh*, ii. 213, note). In the Egyptian sculptures, a similar object, called a *crux ansata*, is constantly borne by divinities, and is variously called "the key of the Nile" (Dr. Young in *Encycl. Britan.*), "the character of Venus," and more correctly (as by Lacroze) "the emblem of life." Indeed this was the old explanation (*ἐρμηνευθεῖσαν σημάδι τάντην γραφὴν Ζωὴ ἐπερχομένη*, Sozomen, *Hist. Eccl.* vii. 15; so too Kullnius (ii. 29), who says it was one of the "*ἱερατικὰ καὶ σωφροσύνης litteræ*"). "The Egyptians thereby expressed the powers and motion of the spirit of the world, and the diffusion thereof upon the celestial and elemental nature" (Sir T. Browne, *Hard. of Cyrus*). This too was the signification given to it by the Christian converts in the army of Theodosius, when they remarked it on the temple of Serapis, according to the story mentioned in Suidas. The same symbol has been also found among the Copts, and (perhaps accidentally) among the Indians and Persians.

4. The *crux inmissa* (or Latin cross) differed from the former by the projection of the *δέρυ ὕψλλον* (or *stipes*) above the *κέρας ἐγκάρσιον*, or *patibulum* (Euseb. *de V. Constant.* i. 31). That this was the kind of cross on which our Lord died is obvious (among other reasons) from the mention of the "title," as placed *above* our Lord's head, and from the almost unanimous tradition; it is repeatedly found on the coins and columns of Constantine. Hence ancient and modern imagination has been chiefly tasked to find symbols for this sort of cross, and has been eminently successful. They find it typified, for instance, in the attitude of Moses during the battle of Rephidim (*Ex.* xvii. 12), saying that he was bidden by the Spirit, *ἵνα ποιῇσθαι τύπον σταυροῦ καὶ τοῦ μέλλοντος πάσχειν* (Barnab. *Ep.* 12; Just. Mart. *Dial. c. Tryph.* 89; *habitus crucis*, Tert. *adv. Marc.* iii. 18). Firmic. Maternus (*de Error.* xxi.) says (from the Talmudists?) that Moses made a cross of his rod, *ut facilius impetraret quod nunquid postulare, crucem sibi fecit ex virgâ*. He also fantastically applies to the cross expressions in Hab. iii. 3-5; Is. i. 6, &c. Other supposed types are Jacob's ladder (*Jer. Com. in Ps.* xci.; *Dominus inimi scilicet Christus crucifixus ostenditur*, August. *Serm. de Temp.* lxxix.); the paschal lamb, pierced by transverse spits (*σχηματισόμενον δυοῖς τῷ σχήματι τοῦ σταυροῦ διπλάται*, Just. M. *Dial. c. Tryph.* xl.); and "the Hebrew Tenupha, or ceremony of their oblations waved by the priest into the four quarters of the world after the form of a cross" (Vitrina, *Obs. Sacr.* ii. 9; Schoettgen, l. c.). A truer type (John iii. 14) is the elevation (מַלְאָכִי, Chald.) of the fiery serpent (*Num.* xxi. 8, 9). For some strange applications of texts to this figure see Cypr. *Textim.* ii. xx. sq. In Matt. v. 18, *ἵνα ἐν ἡμῖν κεφαλὰ* is also made to represent a cross (1 *ἐστὶ τὸ ὄρθον ἔλλαν καὶ κεφαλὰ τὸ πλάγιον*, Theophyl. in *loc.*, &c.). To the four *ἄκρα* of the cross they also applied the *ὑψος* καὶ

*βάθος καὶ πλάτος καὶ μήκος* of Eph. iii. 18 (as Greg. Nys. and Aug. *Ep.* 120); and another of their fancies was that there was a mystical significance in this *δέντρο τετραπλευρὸν* (Nonn. *In Joh.* xix. 18), because it pointed to the four corners of the world (*Quotidius aule plugas quadratus colligit orbis*, Sedul. iii.). In all nature the sacred sign was found to be indispensable (*κατανοήσατε πάντα ἐν τῷ κόσμῳ εἰ ἔνευ τοῦ σχήματος τούτου διακεῖται*, Just. M. *Apol.* i. 73), especially in such things as involve dignity, energy, or deliverance; as the actions of digging, ploughing, &c., the human face, the antennae of a ship in full sail, &c. *Acos quando volant ad aethera signum crucis assumunt. Homo natans, vel orans, formā crucis visitor* (Jer. in *Marc.* xi.). *Signa ipsa et cantabra et vexilla quod aliud quam inauratae cruces sunt?* (Min. Fel. *Oct.* xxix.). Similar analogies are repeated in Firm. Maten. *de Errore*, xxi.; Tert. *adv. Nat.* i. 12; *Apol.* 16; *de Coron.* Mil. iii., and, in answer to the sneers of those to whom the cross was "foolishness," were considered sufficient proof that *signo crucis aut ratio naturalis nitiunt vestra religio formatur* (Min. Fel., &c.). The types adduced from Scripture were valuable to silence the difficulties of the Jews, to whom, in consequence of Deut. xxi. 22 (*ἐκτενάρματος ὁ σταυρούμενος*), the cross was an especial "stumbling-block" (Tert. *adv. Jud.* ix.). Many such fancies (e.g. the harmlessness of cruciform flowers, the southern cross, &c.) are collected in *Communications with the Unseen World*.

Besides the four *ἄκρα* (or *opices*, Tert.) of the cross, was a fifth (*πῆγμα*), projecting out of the central stem, on which the body of the sufferer rested (*ἐφ' ᾧ ἐποχονῆται οὐ σταυρούμενοι*, Just. M. *Tryph.* xci., who (*more suo*) compares it to the horn of a rhinoceros; *scutillus ercesus*, Tert. *adv. Nat.* i. 12; *ubi requiescit quai clavis affigitur*, Iren. *adv. Haeres.* i. 12). This was to prevent the weight of the body from tearing away the hands, since it was impossible that it "should rest upon nothing but four great wounds" (Jer. Taylor, *Life of Christ*, iii. xv. 2, who erroneously quotes the *δέντρο τετραπλευρὸν* of Nonnus). This projection is probably alluded to in the famous lines of Macceus (ap. Sen. *Ep.* 101):—

"Vita dum superest bene est;  
Hanc mihi vel acule  
Si sedeam cruce, sustine."

Ruhkopf (*ad loc.*) so explains it, and it is not so probable that it refers to *ἀνασκινδύλεσις* as Lipsius thinks (*de Cruce*, i. 6). Whether there was also a *ὑποπόδιον* or support to the feet (as we see in pictures), is doubtful. Gregory of Tours mentions it; but he is the earliest authority, and has no weight (G. J. Voss. *Harm. Philon.* ii. 7. 28).

An inscription, *titulus* or *elogium* (*ἐπιγραφή*, Luke xxiii.; *αἵτια*, Matt. xxvii.; ἡ *ἐπιγραφή* τῆς *αἵτιας*, Mark; *τίτλος*, John xix.; *Qui causam poenite indicavit*, Suet. *Cal.* 32; *πινὰξ*, Euseb.; *γράμματα τῆν αἵτιαν τῆς θανάσεως δηλοῦντα*, Dion Cass.

liv. 3; *πτύχλιον ἐπιγράμματι ἔχον*, Hesych. ΠΙΥ) was generally placed above the person's head, and briefly expressed his guilt, as *ὁδὸς ἐστίν Ἀττάλος ὁ Χριστιανός* (Euseb. v. 1), *Inipie locutus parvulus* (Suet. *Dom.* x.), and generally was carried before the criminal (*præcedente titulo*, Suet.). It was covered with white gypsum, and the letters were black; hence Sozomen calls it *λευκώμα*

(*Hist. Eccl.* ii. 1), and Nicphorus a *λευκή σάνις* (*H. Eccl.* viii. 29). But Nicquetus (*Vit. Sanct. Crucis*, i. 6) says it was white with red letters.

A common tradition assigns the perpetual shiver of the aspen to the fact of the cross having been formed of its wood. Lipsius, however (*de Cruce*, iii. 18), thinks it was of oak, which was strong enough, and common in Judea. Few will attach any consequence to his other reason, that the relics appear to be of oak. The legend to which he alludes,

"Pec crucis est cedrus, corpus tenet alta compressus,  
Palma manus retinet, titulo lætatur oliva,"

hardly needs refutation. It must not be overlooked that crosses must have been of the meanest and readiest materials, because they were used in such marvellous numbers. Thus we are told that Alexander Jannæus crucified 800 Jews (Joseph. *Ant.* xiii. 14, §2); and Varus 2000 (*id.* xvii. 10, §10); and Hadrian 500 a-day; and Titus so many that *χωρὸς τε ἐνελεῖτο τοῖς σταυροῖς καὶ σταυροὶ τοῖς σώματιν* (Joseph. *Bell. Jud.* vi. 28, where Ireland rightly notices the strange retribution, "so that they who had nothing but 'crucily' in their mouth, were therewith paid home in their own bodies." Sir T. Browne, *Vulg. Err.* v. 21). In Sicily, Augustus crucified 600 (Oros. vi. 18).

It is a question whether tying or binding to the cross was the more common method. In favour of the first are the expressions *ligare* and *delegare*; the description in Ausonius, *Cypido Crucif*; the Egyptian custom (Xen. *Ephes.* iv. 2); the mention by Pliny (xviii. 11) of *spiritum e cruce* among magical implements; and the allusion to crucifixion noted by the fathers in John xix. 24 (Theophyl. *ad loc.* and Tert. *Tunc Ictus ut altero cinquitur omni cruce astringitur*). On the other side we have the expression *προσηλῶσθαι*, and numberless authorities (Sen. *de Vit. Beata*, xix.; Artemidor. *Oneirocr.*, in several passages; Apul. *Met.* iii. 60; Plaut. *Motel.* ii. 1, 13, *et passim*). That our Lord was *nailed*, according to prophecy, is certain (John xx. 25, 27, &c.; Zechar. xii. 10; Ps. xxii. 16: *Foderunt manus meas et pedes, quare propitia atrocitas crucis*, Tert. *adv. Marc.* iii. 19, &c.; *ῥυξάν*, LXX.; although the Jews vainly endeavour to maintain that here *ῥῶξ*, "like a lion," is the true reading. Sixt. Senensis *Bibl. Sanct.* viii. 5, p. 640). It is, however, extremely probable that both methods were used at once: thus in Lucan (vi. 547, sq.) we have mention both of *nodos nocentes* and of *insectum munibus chalybeis*; and Hilary (*de Trin.* x.) mentions together *colligatum finium vincula* and *aductorum clarorum vulnera*. We may add that in the crucifixion (as it is sometimes called, Tert. *adv. Marc.* i. 1. cf. Manil. *de Androm.* v.) of Prometheus, Æschylus, besides the nails, speaks of a *μασχαλιστήρ* (*Prom.* 79). When either method was used alone, the tying was considered more painful (as we find in the Martyrologies), since it was a *diuturnus cruciatus*.

It is doubtful whether three or four nails were employed. The passage in Plaut. *Motel.* ii. 1, 13, is, as Lipsius (*de Cruce*, ii. 9) shows, indecisive. Nonnus speaks of the two feet (*δυσποκρέτες*) being fastened with one nail (*ἑξῆς γόμφῳ*), and Greg. Naz. (*de Christ. pat.*) calls the cross a *ξύλον τρισηλὸν*; hence on gold and silver crosses the nails were represented by one ruby or carbuncle at each extremity (Mrs. Jameson, l. c.). In the "invention" of the cross, Socrates (*H. E.* i. 17) only

mentions the hand-nails; and that only two were found is argued by Winer (*s. v. Kreuzigung*) from the *τὰ μὲν, τὰ δὲ* (instead of *τοὺς μὲν*) in Theodor. *H. E.* i. 17. Romish writers, however, generally follow Gregory of Tours (*De Glor. Mart.* vi.) in maintaining four, which may also be implied by the plural in *Cypr. de Passione* (*clavis . . . pedes teretibus*), who also mentions three more, used to nail on the title. Cyprian is a very good authority, because he had often been a witness of executions. There is a monograph on the subject by Corn. Curtius (*de clavis dominicis*, Antw. 1670). What has been said sufficiently disproves the calumny against the Albigenses in the following very curious passage of Lucas Tudensis (*ii. contra Albige.*): *Albigensis primi pincerunt imaginem crucifixi uno clavo simul utrumque pedem configente, et virginem Mariam Monoculam (!); utrumque in derisionem: sed postea prior figura retenta est, et irreposita in vulgarem funam.* (Quoted by Jor. Taylor, *l. c.*) On the supposed fate of the nails, see Theodor. *H. E.* i. 17. Constantine fastened ours as a *φουλακτήριον* on his horse's bridle, and one (Zotarius says *some*) on the head of the statue which he intended to be the palladium of Constantinople, and which the people used to surround with lighted torches (Mosheim, *Ecc. Hist.* ii. 1, 3, and notes). The *clavis pedis dexteri* is shown at Trèves (Lips. ii. 9, note).

The story of the so-called "invention of the cross," A.D. 326, is too famous to be altogether passed over. Besides Socrates and Theodoret, it is mentioned by Rufinus, Sozomen, Paulinus, Sulp. Severus, and Chrysostom, so that Tillemont (*Mém. Ecc.* vii.) says that *nothing can be more certain*; but, even if the story were not so intrinsically absurd (for among other reasons it was a law among the Jews that the cross was to be burnt. Othonis *Laz. Rab. scr. Supplicia*), it would require far more probable evidence to outweigh the silence of Eusebius. It clearly was to the interest of the Church of Rome to maintain the belief, and invent the story of its miraculous multiplication, because the sale of the relics was extremely profitable. The story itself is too familiar to need repeating. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of Sta. Croce in Gerusalemme at Rome. On the capture of the true cross by Chosroes II., and its rescue by Hermelinus, with even the seals of the case unbroken, and the subsequent sale of a large fragment to Louis IX., see Gibbon, iv. 326, vi. 66. Those sufficiently interested in the annals of ridiculous imposture may see further accounts in Baronius (*Ann. Ecc.* A.D. 326, No. 42-50), Jortin, and Schmidt (*Problem. de Crucis Dominicæ Inventione*, Helmst. 1724); and on the fate of the true cross a paper read by Lord Mahon before the Society of Antiquaries, Feb. 1831 (cited by Dean Milman).

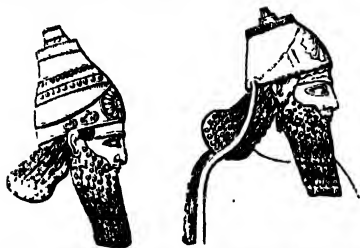

It was not till the 6th century that the emblem of the cross became the *image* of the crucifix. As a symbol the use of it was frequent in the early Church (*frontem crucis signaculo terimus*, Tert. *de Cor. Mil.* iii.). It was not till the 2nd century that any particular efficacy was attached to it (*Cypr. Testim.* ii. 21, 22; *Lact. Inst.* iv. 27, &c.; Mosheim, ii. 4, 5). On its subsequent worship (*latria*) by the Church of Rome, see Jer. Taylor's *Diss. from Popery*, i. ii. 7, 12; and on the use of the sign in our Church, Hooker's *Ecc. Pol.* v. 65. Some

suppose an allusion to the custom in Ez. ix. 4 (*Poli, Synops. ad loc.*; Gesen. s. v., 17; *signum spec. cruciforme*, Sixt. Sen. ii. p. 120).

Besides the noble monograph of Lipsius *de Cruce* (from which we have largely borrowed, and whose wealth of erudition has supplied every succeeding writer on the subject with abundant authorities), there are works by Salmasius (*de Cruce*, Epp. 3); Kippingius (*de Cruce et Cruciaris*, Brein. 1671); Rosius (*de Cruce triumphante et gloriosa*, Antwerp, 1617); Gretser (*de Cruce Christi*); and Bartholinus (*Hypomnemata de Cruce*); very much may also be gleaned from the learned notes of Bishop Pearson (*On the Creed*, art. iv.). Other authorities are cited or alluded to in the article itself. [CRUCIFIXION.] [F. W. F.]

**CROWN** (קִרְבַּן). This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans (Jos. *Ant.* iii. 7, §7), which by the addition of ornamental or precious materials assumed the dignity of mitres or crowns. The use of them as ornaments probably was suggested by the natural custom of encircling the head with flowers in token of joy and triumph. ("Let us crown ourselves with rosebuds," Wisd. 1. 8; 3 Macc. vii. 16; Jnd. xv. 13, and the classical writers, *passim*; Winer *s. v. Krönze*). The first crown was said to have been woven for Pandora by the Graces (comp. *στέφανος Χαρίτων*, Prov. iv. 9 = *στέφανος τῶν πνευματικῶν χαρισμάτων*, Lex. Cyr.). According to Phercydes, Saturn was the first to wear a crown; Diodorus says that Jupiter was first crowned by the gods after the conquest of the Titans. Pliny, Harpocration, &c., ascribe its earliest use to Bacchus, who gave to Ariadne a crown of gold and Indian gems, and assumed the laurel after his conquest of India. Leo Aegyptius attributes the invention to Isis, whose wrath was cereal. These and other legends are collected by Tortullian from the elaborate treatise on crowns by Claud. Saturninus (*præcristianismus is hæc materid commentator*). Another tradition says that Nimrod was the first to wear a crown, the shape of which was suggested to him by a cloud (Eutychius Alexandr. *Ann.* i. p. 63). Tertullian in his tract *De Cor. Militis* (c. vii. sq.) argues against them as unmanly and idolatrous. He is, however, singularly unsuccessful in trying to disprove the countenance given to them in Scripture, where they are constantly mentioned. He says *Quis . . . episcopus invenitur coronatus?* (chap. 9). But both the ordinary priests and the high-priest wore them. The common mitre (מִטְרָה, *kitharis*, Ex. xxviii. 37, xxix. 6, &c. *טַבִּיטָא*, Jos. *στέφανος* δ *οἱ ἱερεῖς φοροῦσι*, Hesych.) was a *πίλος ἄκανθος*, forming a sort of linen *tauca* or crown (*στέφανη*), Jos. *Ant.* iii. 7. The *מִטְרָה* (Βυσσίνη τιάρα) of the high-priest (used also of a regal crown, Ex. xxi. 26) was much more splendid (Ex. xxviii. 36; Lev. viii. 9; "an ornament of honour, a costly work, the desire of the eyes," Ecclus. xlv. 12; "the holy crown," Lev. viii. 9, so called from the Tetragrammaton inscribed on it, *Sopranes de re Vest. Jud.*, p. 441). It had a second fillet of blue lace (*ἐξ ὀκλίθου τετα-*

κιλμένος, the colour being chosen as a type of heaven), and over it a golden diadem (קֶטֶן, Ex. xxix. 6), "on which blossomed a golden calyx like the flower of the *וֹסְקָמוֹס*" (Jos. *Ant.* iii. 6). The gold band (קֶטֶן, LXX. *πέταλον*, Orig. *ἱαστήριον*, *Das Stirnblatt*, Luther) was tied behind with blue lace (embroidered with flowers), and being two fingers broad, bore the inscription (not in bas-relief as Abarbanel says) "Holiness to the Lord." (Comp. Rev. xvii. 5; Braunsius *de Vest. Sacerd.* ii. 22; Maimon. *de Apparatu Templi*, ix. 1; Rehm. *Antiq.* ii. 10; Carpzov, *Appar. Crit.* p. 85; Jos. *Bell. Jud.* v. 5, §7; Philo, *de Vit. Mosii*, iii. 519.) Some suppose that Josephus is describing a later crown given by Alexander the Great to Jaddua. (Jennings' *Jew. Ant.* p. 158.) The use of the crown by priests and in religious services was universal, and perhaps the badge belonged at first "rather to the *pontificalis* than the *regalia*." Thus Q. Fabius Pictor says that the first crown was used by Janus *when sacrificing*. "A striped head-dress and queue," or "a short wig, on which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's *Anc. Egypt.* iii. 354, fig. 13). The crown worn by the kings of Assyria was "a high mitre . . . frequently adorned with flowers, &c., and arranged in bands of linen or silk. Originally there was only one band, but afterwards there were two, and the ornaments were richer" (Layard, ii. 320, and the illustrations in Jahn, *Arch.* Germ. ed. Part i. vol. ii. tab. ix. 4 and 8).

Crowns worn by Assyrian kings. (From Nimroud and Kouyunjik.)

There are several words in Scripture for a crown besides those mentioned; as *קֶטֶן*, the head-dress of bridegrooms, Is. lxi. 10, *מִטְרָא*, LXX.; Bar. v. 2; Ez. xxiv. 17 (*τρίχωμα*), and of women, Is. iii. 20 (*ἐμπλοκίον?*); *תִּיָּוִי*, a head-dress of great splendour (Is. xxviii. 5); *קֶטֶן*, a wreath of flowers; (*στεφάνος*) Prov. i. 9, iv. 9: such wreaths were used on festal occasions (Is. xxviii. 1). *הִתְקַנֵּף*, a common tiara or turban, Job xxix. 14; Is. iii. 23 (but LXX. *διπλοῖς, θρίστρον*). The words *קֶטֶן*, *כֶּתֶר*, and *כִּרְמָלִים*, are spoken of under *DIADEM*. The general word is *מִטְרָא*, and we must attach to it the notion of a costly *turban* irradiated with pearls and gems of priceless value, which often form *agrettes* for fathers, as in the crowns of modern Asiatic sovereigns. Such was probably the crown, which with its precious stones weighed (or rather "was worth") a talent, taken by David from the king of Ammon at Rabbah, and

used as the state crown of Judah (2 Sam. xii. 30). Some groundlessly suppose that being too heavy to wear, it was *suspended* over his head. The royal crown was sometimes buried with the king (Schickard. *Jus Reg.* vi. 19, p. 421). Idolatrous nations also "made crowns for the head of their gods" (Ep. Jer. 9).

The Jews boast that three crowns were given to them, *כֶּתֶר תּוֹרָה*, the crown of the Law, *כֶּתֶר מַלְכוּת*, the crown of priesthood, and *כֶּתֶר שֵׁם טוֹב*, the royal crown, better than all which is the crown of a good name (Carpzov. *Apparat. Critic.* p. 60; Othonis *Lex. Talm.* s. v. *Corona*).

*Στέφανος* is used in the N. T. for every kind of crown; but *στέμμα* only once (Acts xiv. 13) for the garlands used with victims. In the Byzantine Court the latter word was confined to the *imperial* crown (Du Fresnoy, *Gloss. Græc.* p. 1442). The use of funeral crowns is not mentioned in the Bible.

In Rev. xii. 3, xix. 12, allusion is made to "*many* crowns" worn in token of extended dominion. Thus the kings of Egypt used to be crowned with the "*pschent*" or *united* crowns of Upper and Lower Egypt (Wilk., *Anc. Egypt.* iii. 351 sq.; comp. Layard, ii. 320); and Ptolemy Philometor wore *two* diadems, one for Europe and one for Asia. Similarly the three crowns of the Papal tiara mark various accessions of power: the first corona was added to the mitra by Alexander III., in 1159; the second by Boniface VIII., in 1303; and the third by Urban V., in 1362.

The laurel, pine, or parsley crowns given to victors in the great games of Greece are finely alluded to by St. Paul (1 Cor. ix. 25; 2 Tim. ii. 5, &c.). They are said to have originated in the laurel-wreath assumed by Apollo on conquering the Python (Tert. *de Cor. Mil.* 7, 15). "Crown" is often used figuratively in the Bible (Prov. xii. 4, xvii. 6; Is. xxviii. 5; Phil. iv. 1, &c.). The term is also applied to the rims of altars, tables, &c. (Ex. xxv. 25, &c.; Deut. xxii. 8, *ποτήσεις στεφάνην τῷ δώματι σου*. *Projectura coronarum*, Vitr. ii. 8; *Angusti muri corona*, Q. Curt. ix. 4, 30). The ancients as well as the moderns had a *coïn* called "a crown" (*τὸν στεφάνον οὐν ὀφείλετε*, 1 Macc. xiii. 39, x. 29, A. V. "Crown-tax," v. Suid. s. v. *στεφανικὸν τέλεσμα*). [*DIADEM.*]

The chief writers on crowns are Gaschalius (*de Coronis libri x.*) and Meursius (*de Coronâ, Hespine.* 1671). For others, see Fabricius, *Bibl. Ant.* xiv. 13. [F. W. F.]

**CROWN OF THORNS** (*στεφάνος ἐξ ἀκανθῶν*, Matt. xxvii. 29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain as has generally been supposed. The *Ithamnus* or *Spina Christi*, although abundant in the neighbourhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven (*πλέσσεται*) into a wreath. The large-leaved acanthus (bear's-foot) is totally unsuited for the purpose. Had the acacia been intended, as some suppose, the phrase would have been *ἐξ ἀκανθήων*. Obviously some small flexible thorny shrub is meant; perhaps *cappures spinosæ* (Reland's *Palestin.* ii. 523). Hasselquist (*Travels*, p. 260) says that the thorn used was the Arabian *Nabk*. "It was very suitable for their purpose, as it has many sharp thorns

which inflict painful wounds; and its flexible, pliant, and round branches might easily be plaited in the form of a crown." It also resembles the rich dark green of the triumphal ivy-wreath, which would give additional pungency to its ironical purpose (Rosenmüller, *Botany of Script.* p. 202, Eng. ed.). On the Empress Helena's supposed discovery of the crown of thorns, and its subsequent fate, see Gibbon, ii. 306, vi. 66, ed. Milman. [F. W. F.]

**CRUCIFIXION** (*σταυρῶν, ἀνασταυρῶν, ἐκκολοπιεῖν, προσηλῶν* (and, less properly, *ἀνασκηδουλεύειν*); *cruci* or *patibulo* *officere, suffigere*, or simply *figere* (Tert. de Pat. iii.), *cruciare* (Auson.) *ad patium alligare, crucem alicui statuere, in crucem agere, tollere*, &c.: the sufferer was called *crucifixus*). The variety of the phrases shews the extreme commonness of the punishment, the invention of which is traditionally ascribed to Semiramis. It was in use among the Egyptians (as in the case of Inarus, Thuc. i. 30; Gen. xl. 19), the Carthaginians (as in the case of Hanno, &c., Val. Max. ii. 7; Sil. Ital. ii. 344). The Persians (Polycrates, &c. Herod. iii. 125, iv. 43; Esth. vii. 10, *σταυρωθήτω ἐπ' αὐτόν*, LXX. v. 14), the Assyrians (Diod. Sic. ii. 1), Scythians (id. ii. 44), Indians (id. ii. 18), (Wiener, s. v. *Kreuzigung*), Germans (possibly Tac. Germ. 12), and very frequent from the earliest times (*crucis suspensio*, Liv. i. 26) among the Greeks and Romans. Cicero, however, refers it, not (as Livy) to the early kings, but to Tarquinius Superbus (*pro Rub.* 4); Aurel. Victor calls it *Vetus veterrimumque (an teterr.) patibulorum supplicium*. Both *κρεμῶν* and *suspendere* (Ov. *Ibis*, 299) refer to death by crucifixion; thus in speaking of Alexander's crucifixion of 2000 Tyrians, *ἀνεκράμασεν* in Diod. Sic. answers to the *Crucibus affixus*, Q. Curt. iv. 4.

Whether this mode of execution was known to the ancient Jews is a matter of dispute, on which Wiener quotes a monograph by Bornitius. It is asserted to have been so by Baronius (*Annal.* i. xxiv.), Sigonius (*de Rep. Hebr.* vi. 8), &c., who are refuted by Casaubon (c. *Baron. Exerc.* xvi.; Carpzov. *Apparat. Crit.* p. 591). The Hebrew words said to allude to it are *תליה* (sometimes with the addition of *עץ העץ*; hence the Jews in polemics call our Lord *תלי*, and Christians *עובדי תלי*, "worshippers of the crucified") and *קצץ*, both of which in A. V. are generally rendered "to hang" (2 Sam. xviii. 10; Deut. xxi. 22; Num. xxv. 4; Job xxvi. 7); for which *σταυρῶν* occurs in the LXX. (Esth. vii. 10), and *crucifixionem* in the Vulg. (2 Sam. xxi. 6, 9). The Jewish account of the matter (in Maimonides and the Rabbis) is, that the exposure of the body tied to a stake by its hands (which might loosely be called crucifixion), took place after death (Lightfoot, *Hor. Hebr. in Matth.* xxvii. 31; Othonis *Lex. Rab. s. v. Supplicia*; Reland, *Ant.* ii. 6; Sir T. Browne, *Vulg. Errors*, v. 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion after death (which seems to be implied in Deut. xxi. 22, 23), was by no means rare; men were first killed in mercy (Suet. *Cæsar*; Herod. iii. 125; Plut. *Cleom.* 38). According to a strange story in Pliny (xxxvi. 15, §24), it was adopted by Tarquin, as a post mortem disgrace, to prevent the prevalence of suicide. It seems on the whole that the Rabbis are correct in asserting that this exposure is in-

tended in Scripture, since the Mosaic capital punishments were four (viz. the sword, Ex. xxi., strangling, fire, Lev. xx., and stoning, Deut. xxi.). Philo indeed says (*De leg. spec.*) that Moses adopted crucifixion as a murderer's punishment, because it was the worst he could discover; but the passage in Deut. (xli. 23) does not prove his assertion. Probably therefore the Jews borrowed it from the Romans (Jos. *Ant.* xx. 6, §2; *de Bell. Jud.* ii. 12, §6; *Vit.* 75, &c.), although there may have been a few isolated instances of it before (Jos. *Ant.* xiii. 14, §2).

It was unanimously considered the most horrible form of death, worse even than burning, since the "cross" preceded "burning" in the law-books (Lips. de *Cruc.* ii. 1). Hence it is called *crudelissimum teterrimumque supplicium* (Cic. *Verr.* v. 68), *extrema poena* (Apucl. de *Aur. Asin.* x.), *summum supplicium* (Paul. *Sent.* v. tit. xxi., &c.); and to a Jew it would acquire factitious horror from the curse in Deut. xxi. 23. Among the Romans also the degradation was a part of the infliction, since it was especially a *servile supplicium* (Tac. *H.* iv. 11; Juv. vi. 218; *Hor. Sat.* i. 3, 8, &c.; *Plaut. passim*), so that even a freedman ceased to dread it (Cic. *pro Rab.* 5); or if applied to freemen, only in the case of the vilest criminals, thieves, &c. (Jos. *Ant.* xvii. 10, §10; *Bell. Jud.* v. 11, §1; Paul. *Sent.* v. tit. xxiii.; Lamprid. *Alex. Lex.* 23). Indeed exemption from it was the privilege of every Roman citizen by the *jus civitatis* (Cic. *Verr.* ii. 1, 3). Our Lord was condemned to it by the popular cry of the Jews (Matt. xxvii. 23, as often happened to the early Christians) on the charge of sedition against Caesar (Luke xxiii. 2), although the Sanhedrin had previously condemned him on the totally distinct charge of blasphemy. Hundreds of Jews were crucified on this charge, as by Florus (Jos. *Bell. Jud.* ii. 14, §9) and Varus, who crucified 2000 at once (*Ant.* xvii. 10, §10).

We now purpose briefly to sketch the steps of the punishment, omitting only such parts of it as have been already detailed under *CROSS*.

The scarlet robe, crown of thorns, and other insults to which our Lord was subjected were illegal, and arose from the spontaneous petulance of the brutal soldiery. But the punishment properly commenced with scourging, after the criminal had been stripped; hence in the common form of sentence we find "summove, licitor, despolia, verbera," &c. (Liv. i. 26). For this there are a host of authorities, Liv. xxvi. 13; Q. Curt. vii. 11; Luc. de *Piscat.* 2; Jer. *Comment. ad Matt.* xxvii. 26, &c. It was inflicted not with the comparatively mild *virgae*, but the more terrible *flagellum* (Hor. *Sat.* i. 3; 2 Cor. xi. 24, 25), which was not used by the Jews (Deut. xxv. 3). Into these scourges the soldiers often stuck nails, pieces of bone, &c. to heighten the pain (the *μάστιγι ἀσπαργαλωτή* mentioned by Athenæus, &c.; *flagrum pecuinis ossibus catenatum*, Apul.), which was often so intense that the sufferer died under it (Ulp. de *Poenis*, l. viii.). The scourging generally took place at a column, and the one to which our Lord was bound was seen by Jerome, Prudentius, Gregory of Tours, &c., and is still shown at several churches among the relics. In our Lord's case, however, this infliction seems neither to have been the legal scourging after the sentence (Val. Max. i. 7; Jos. *Bell. Jud.* v. 28, ii. 14, §9), nor yet the examination by torture

(Acts xxii. 24), but rather a scourging *before* the sentence, to excite pity and procure immunity from further punishment (Luke xxiii. 22; John xix. 1); and if this view be correct, the *φραγάσας* in Matt. xxvii. 26 is retrospective, as so great an anguish could hardly have been endured *twice* (see Poli *Synopsis*, *ad loc.*). How severe it was is indicated in prophecy (Ps. xxv. 15; Is. l. 6). Vossius considers that it was partly legal, partly tuitive (*Harm. Pass.* v. 13).

The criminal carried his own cross, or at any rate a part of it (Plut. *de iis qui sero*, &c. 9; Artemid. *Oneirocr.* ii. 61; John xix. 17, *Patibulum ferat per urbem, debile affigatur cruci*, Plant. *Carbonar.*). Hence the term *Furcifer*,—cross-bearer. This was prefigured by Isaac carrying the wood in Gen. xxii. 6, where even the Jews notice the parallel; and to this the fathers fantastically applied the expression in Is. ix. 6, "the government shall be upon his shoulder." They were sometimes scourged and goaded on the way (Plant. *Mostel.* i. 1, 52). "In some old figures we see our Lord described with a table appendent to the fringe of his garment, set full of nails and pointed iron" (Jer. Taylor, *Life of Christ*, iii. xv. 2. *Herodibus ligno quod intuleris*. Cyp. *de Pas.* p. 50). [SIMON OF CYRENE.]

The place of execution was outside the city ("post urbem," Cic. *Vorr.* v. 66; "extra portam," Plant. *Mil.* ii. 4, 6; 1 K. xxi. 13; Acts vii. 58; Heb. xiii. 12; and in camps, "extra vallum"), often in some public road (Quinct. *Decl.* 275) or other conspicuous place like the Campus Martius (Cic. *pro Rubrio*), or some spot set apart for the purpose (Tac. *Ann.* xv.). This might sometimes be a hill (Val. Max. vi.); it is however merely tradition to call Golgotha a hill: in the Evangelists it is called *τόπος* [CALVARY]. Arrived at the place of execution, the sufferer was stripped naked (Artemid. *Oneirocr.* ii. 58), the dress being the perquisite of the soldiers (Matt. xxvii. 35; Dig. xlviii. 20, 6); possibly not even a cloth round the loins was allowed him; at least among the Jews the rule was "that a man should be stoned naked," where what follows shows that "naked" must *not* be taken in its restricted sense. The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth (in pictures of the crucifixion the cross is generally much too large and high), and he was lifted upon it (*agere, excurrere, tollere, ascendere in crucem*; Prudent. *πεπλ στέφ.* Plant. *Mostel.* "Crucifixus." Id. *Broch.* 2, 3, 128. *ἀνέγον. ἦγον. ἦγον εἰς ἄκρον τέλος*, Greg. Naz.), or else stretched upon it on the ground, and then lifted with it, to which there seems to be an allusion in a lost prophecy quoted by Barnabas (*Ep.* 12), *ἐταν ἔλλον κλιθῆ καὶ ἀναστῆ* (Pearson on *Creed*, Acts iv.). The former method was the commoner, for we often read (as in Esth. vii. 10, &c.) of the cross being erected beforehand, in terrorem. Before the nailing or binding took place (for which see *CROSS*), a medicated cup was given out of kindness to confuse the senses and deaden the pangs of the sufferer (Prov. xxxi. 6), usually of *οἶνος ἐσμπυμσμένος* or *λελιθανωμένος*, as among the Jews (Lightfoot, *Hor. Hebr. ad Matt.* xxvii.), because mirth was soporific. Our Lord refused it that his senses might be clear (Matt. xxvii. 34; Mark xv. 21. Maimon. *S. Mubel.* xlii.). St. Matt. calls it *ὄξος μετὰ χολῆς* (ϣ'Π), an expression used in reference to Ps. lxx. 21, but not strictly accurate. This

mercifully intended draught must not be confounded with the spongel of vinegar (or *pascet*, the common drink of Roman soldiers, Spart. *Hebr.*; Plant. *Mil.* Gl. iii. 2, 23), which was put on a hyssop-stalk and offered to our Lord in mocking and contemptuous pity (Matt. xxvii. 48; Luke xxiii. 36); this He tasted to allay the agonies of thirst (John xix. 29).

Our Lord was crucified between two "thieves" or "malefactors" (then so common in Palestine, Jos. *Bell. Jud.* ii. 6, &c.), according to prophecy (Is. liii. 12); and was watched according to custom by a party of four soldiers (John xix. 23) with their centurion (*κουστωδία*, Matt. xxvii. 66; *miles qui cruce assurabat*, Petr. *Sat.* iii. 6; Plut. *Vit. Cleom.* 38), whose express office was to prevent the surreption of the body. This was necessary from the lingering character of the death, which sometimes did not supervene even for three days, and was at last the result of gradual benumbing and starvation (Euseb. viii. 8; Sen. *Prov.* 3). But for this guard, the persons might have been taken down and recovered, as was actually done in the case of a friend of Josephus, though only one survived out of *thrice* to which the same *θεραπεία ἐπιμελεστέρα* was applied (*Vit.* 75). Among the Convulsionnaires in the reign of Louis XV. women were repeatedly crucified, and even remain on the cross three hours; we are told of one who underwent it 23 times (Encycl. Metr. s. r. *Cross*); the pain consisted almost entirely in the *wailing*, and not more than a basinful of blood was lost. Still we cannot believe from the Martyrologies that Victorinus (crucified head-downwards) lived three days, or Timotheus and Mania nine days. Fracture of the legs (*Plant. Poen.* iv. 2, 64) was especially adopted by the Jews to hasten death (John xix. 31), and it was a mitigation of the punishment, as observed by Origen. But the unusual rapidity of our Lord's death was due to the depth of His previous agonies (which appears from his inability to bear his own cross far) and to his mental anguish (Schoettgen, *Hor. Hebr.* vi. 3; *De pass. Messie*), or may be sufficiently accounted for simply from peculiarities of constitution. There is no need to explain the "giving up the ghost" as a miracle (Heb. v. 7?), or say with Cyprinus, *Preterito cunctis officio, spiritum sponte dimisit* (*ado. Donet.*). Still less can the common cavil of infidelity be thought noteworthy, since had our Lord been in a swoon the piercing of his petardium (proved by the appearance of lymph and blood) would have ensured death. (See Eschenbach *Opusc. Med. de Servatore non apparenter sed vere mortuo*, and Gruner *de morte Christi non synoptici*, quoted by Jahn in the *Arch. Bibl.*) Pilate expressly satisfied himself of the actual death by questioning the centurion (Mark xv. 44); and the omission of the breaking of the legs in this case was the fulfilment of a type (Ex. xii. 46). Other modes of hastening death were by lighting fires under the cross (hence the nicknames *Saumentii* and *Senaxii*, Tert. *Apolog.* 50), or letting loose wild beasts on the crucified (Suet. *Nor.* 49).

Generally the body was suffered to rot on the cross (Cic. *Tusc.* Q. i. 43; Sil. Ital. viii. 486), by the action of sun and rain (Herod. iii. 12), or to be devoured by birds and beasts (Apu. *de Aur. Asin.* 6; Hor. *Ep.* i. 16, 48; Juv. xiv. 77). Sepulture was generally therefore forbidden, though it might be granted as a special favour or on grand occasions (Ulp. l. ix. *De off. Pasconis*). But in consequence of Dent. xxi. 22, 23, an express national exception

was made in favour of the Jews (Matt. xxvii. 58; cf. Joseph. *Jud.* iv. 5, §2).

Having thus traced the whole process of crucifixion, it only remains to speak of the manner of death, and the kind of physical suffering endured, which we shall very briefly abridge from the treatise of the physician Richter (in Jahn's *Arch. Bibl.*). These are, 1. The unnatural position and violent tension of the body, which cause a painful sensation from the least motion. 2. The nails being driven through parts of the hands and feet which are full of nerves and tendons (and yet at a distance from the heart), create the most exquisite anguish. 3. The exposure of so many wounds and lacerations brings on inflammation, which tends to become gangrene, and every moment increases the poignancy of suffering. 4. In the distended parts of the body more blood flows through the arteries than can be carried back into the veins: hence too much blood finds its way from the aorta into the head and stomach, and the blood-vessels of the head become pressed and swollen. The general obstruction of circulation which ensues causes an intense excitement, exertion, and anxiety, more intolerable than death itself. 5. The inexpressible misery of gradually increasing and lingering anguish. To all which we may add, 6. Burning and raging thirst.

This accursed and awful mode of punishment was happily abolished by Constantine (Sozom. i. 8), probably towards the end of his reign (see Lips. *de Cruce*, iii. 15), although it is curious that we have no more definite account of the matter. "An edict so honourable to Christianity," says Gibbon, "deserved a place in the Theodosian code, instead of the indirect mention of it which seems to result from the comparison of the 5th and 18th titles of the 9th book" (ii. 154, note).

An explanation of the other circumstances attending the crucifixion belongs rather to a commentary than a dictionary. On the types, and prophecies of it, besides those adduced, see Cyp. *Testim.* ii. 20. On the resurrection of the saints, see Lightfoot *ad Matt.* xxvii. 52 (there is a monograph by Gebauer—*Dissert. de Resur. sanctorum cum Christo*). On other concomitant prodigies, see Schoettgen, *Hor. Hebr. et Talmud.* vi. 3, 8. [DARKNESS; CROSS.] The chief authorities are quoted in the article, and the ancient ones are derived in part from Lipsius; of whose most interesting treatise, *De Cruce*, an enlarged and revised edition, with notes, would be very acceptable. On the points in which our Lord's crucifixion differed from the ordinary Jewish customs see Othman *Lev. Rabbinicum*, s. v. *Supplicia*; Bynæus *de Morte J. Christi*; Vossius, *Harm. Passionis*; Canzov, *Apparat. Crit.* p. 591, sq. &c. [F.W.F.]

CRUSE, a word employed in the A. V., apparently without any special intention, to translate three distinct Hebrew words.

1. *Tzappachath*, צַפְחָת (from צָפַץ, a root with the idea of width; comp. *ampulla*, from *amplus*). Some clue to the nature of this vessel is perhaps afforded by its mention as being full of water at the head of Saul when on his night expedition after David (1 Sam. xxi. 11, 12, 16), and also of Elijah (1 K. xix. 6). In a similar case in the present day this would be a globular vessel of blue porous clay—the ordinary Gaza pottery—about 9 inches diameter, with a neck of about 3 inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of a

straw, through which the water is drunk or sucked. The form is common also in Spain, and will be familiar to many from pictures of Spanish life. A similar globular vessel probably contained the oil of the widow of Zarephath (1 K. xvii. 12, 14, 16). For the "box" or "horn" in which the consecrated oil was carried on special occasions see Oil.

2. The noise which these vessels make when emptied through the neck is suggestive of the second term, *Bakbook*, בִּבְכוּק, probably like the Greek *bombulos*, βόμβυλος, an onomatopoeitic word. This is found but twice—a "cruse of honey," 1 K. xiv. 3; and an "earthen bottle," Jer. xix. 1.

3. Apparently very different from both these is the other term, *Tzelachah*, צִלְחָה (found also in the forms צִלְחִית and צִלְחָה, from a root צָלַח), signifying to sprinkle; or perhaps from צָלַל, to ring, the root of the word for cymbal. This was probably a flat metal saucer of the form still common in the East. It occurs 2 K. ii. 20, "cruse;" xxi. 13, "dish;" 2 Chr. xxxv. 13, "pans;" also Prov. xix. 24, xxvi. 15, where the figure is obscured by the choice of the word "bosom." [G.]

CRYSTAL (יְבוֹנִית, יָקָר; θαλος, κρύσταλλος; *vitrum, cristallus*). The word יְבוֹנִית is translated "crystal" in Job xxviii. 17, where some precious substance is meant. It comes from the root יָבַן, to be pure, and probably signifies glass of the purest and most precious kind. It occurs only in this passage. [GLASS.]

יָקָר is rendered "crystal" in Ez. i. 22, but in other passages of the O. T. "ice and frost." It is derived from יָקַר, to make smooth, to make bald. The word κρύσταλλος, in Rev. iv. 6, xvii. 1, means ice (Hesych. κρύσταλλος τὸ πενήγος ὕδωρ ὑπὸ κρύου). But it also has a second meaning, and signifies a mineral substance clear and transparent like ice, and is so used by St. John. [W. D.]

CUBIT. [MEASURES.]

CUCKOO; A. V. CUCKOW (שֶׁקֶץ; λάρος; *larus*), a bird found in the list of unclean birds in Lev. xi. 16 and Deut. xiv. 15. Referring it to the root שָׁקַץ, to make thin, Gesenius considers that the sea-gull is meant, because of the smallness of its body in comparison with its apparent size and spread of wing. Bochart suggests the bird called by the Greeks *λέπφος*. This is a light sea-bird of the petrel kind, the character of which agrees with the etymology of שָׁקַץ. (Suidas: Κέφφος εἶδος ὀρνέου δευτέρου [ὁ λεγόμενος λάρος] ἐστὶ δὲ κοῦφον καὶ ἐπιπλεον τοῖς κύμασιν.) Κέφφος is the rendering of the Græco-Venician version in Lev. [W. D.]

CUCUMBERS are named twice in the A. V., and once in the Apocrypha, where ἐν σικυηράτῃ is translated "in a garden of cucumbers." In Num. xi. 5 cucumbers are mentioned among the vegetable products of Egypt, which the mixed multitude regretted, when in the wilderness. The Hebrew word is סִיקְוִים (σικυνοί or σίκυες, *cucumeres*), which is the plural form of סִיקָה. The Talmudists have מִשְׁקָה, and the Phoenicians 2 B 2

had the word *Κουσίμελαο* (Diosc. iv. 152), which is probably *קִשְׁמֵ מִצְרַיִם* "cucumber of Egypt" = *σίκυς ἑgyptios*. The same name for cucumber exists in all the cognate languages. For an account of the cucumbers of Syria and Egypt, see Forskål, *Flora Aegypt.* p. 169; Celsii, *Herobot.* ii. 249. The root of the word is *קִשְׁ*, which seems to contain the notion of hardness and heaviness.

From the same root comes *מִקְשֶׁה*, a garden of cucumbers, which occurs in Is. i. 8. The LXX. render *מִקְשֶׁה* by *σικυθ-πατον*, and the Vulg. by *cucumerarium*. The plant referred to is the *cucumis chate* of Linnaeus. It is abundant in Egypt, where it grows and ripens rapidly. [W. D.]

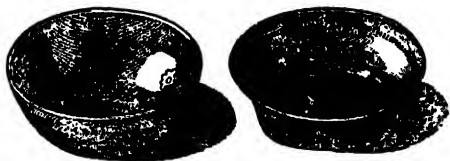

**CUMMIN** (צִמְן; *κυμίνον*; *cuminum*), one of the cultivated plants of Palestine, mentioned by Isaiah (xxviii. 25, 27) as not being threshed in the ordinary way in which wheat was threshed, but with a reel; and again by our Saviour as one of the crops of which the Scribes and Pharisees paid tithes. It is an umbelliferous plant something like fennel (*Cuminum sativum*, Linn.). The seeds have a bitterish warm taste with an aromatic flavour. It was used in conjunction with salt as a sauce (Plin. xix. 8). The Maltese are said to grow cummin at the present day, and to thresh it in the manner described by Isaiah. [W. D.]

**CUP.** The chief words rendered "cup" in the A. V. are, 1. *כִּיץ*; *ποτήριον*; *cilix*; 2. *קִישֶׁת*, only in plural; *σπονδεία*; *crateres*; 3. *בִּכְיֶע*; *Κόδυ*; *scyphus*; see also further words *BARIN* and *BOWL*. The cups of the Jews, whether of metal or earthenware, were possibly borrowed, in point of shape and design, from Egypt and from the Phœnicians, who were celebrated in that branch of workmanship (II. xliii. 743; *Ol.* iv. 615, 618). Egyptian cups were of various shapes, either having handles or without them. In Solomon's time all his drinking-vessels were of gold, none of silver (1 K. x. 21). Babylon is compared to a golden cup (Jer. li. 7).

Assyrian cups from Khorsabad and Nimroud may be seen figured in Layard (*Nin.* ii. 303, 304; *Nin. and Bab.* 186, 190, 192), some perhaps of Phœnician workmanship, from which source both Solomon and the Assyrian monarch possibly derived both their workmen and the works themselves. The cups and other vessels brought to Babylon by Nebuchadnezzar may thus have been of Phœnician origin (Dan. v. 2).

Of the bas-reliefs at Persepolis many figures are represented bearing cups or vases which may fairly be taken as types of the vessels of that sort described in the book of Esther (*Esth.* i. 7; Niebuhr,

*Voyage*, ii. 106; Charlin, *Voyages*, viii. p. 268; Pl. lviii.). The great laver, or "sea," was made with a rim like the rim of a cup (*Côs*), "with flowers of lilies" (1 K. vii. 26), a form which the Persepolitan cups resemble (Jahn, *Arch.* §144). The common form of modern Oriental cups is represented in the accompanying drawing:—

Modern Egyptian drinking-cups, one-fifth of the real size. (Lane.)

The use of gold and silver cups was introduced into Greece after the time of Alexander (Athen. vi. 229, 30; xi. 446, 465; Birch, *Anc. Pott.*, ii. 109). The cups of the N. T., *ποτήρια*, were often no doubt formed on Greek and Roman models. They were sometimes of gold (Rev. xvii. 4). *Dict. of Antiq.* art. PATERA. [H. W. P.]

**CUP-BEARER** (מִשְׁכֵּה; *οἰνοχόος*; *pin-cerna*), an officer of high rank with Egyptian, Persian, Assyrian, as well as Jewish monarchs. The chief cupbearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xl. 1-21, xli. 9). Nab-shakeh, who was sent by Sennacherib to Hezekiah, appears from his name to have filled a like office in the Assyrian court (2 K. xviii. 17; Ges. p. 1225), and it seems probable, from his association with Nab-sais, chief of the eunuchs (רַב־בָּקָרִים), and from Eastern custom in general, that he was, like him, an eunuch (Ges. p. 973). Herod the Great had an establishment of eunuchs, of whom one was a cupbearer (Joseph. *Ant.* xvi. 8, 1). Nehemiah was cupbearer to Artaxerxes Longimanus king of Persia (Neh. i. 11, ii. 1). Cupbearers are mentioned among the attendants of Solomon (1 K. x. 5; comp. Layard, *Nin.* ii. 324, 326). [H. W. P.]

**CURTAINS.** The Hebrew terms translated in the A. V. by this word are three:

1. *Yerecth*, יִרְעָתָה; the ten "curtains" of fine linen, &c., each 28 cubits long and 4 wide, and also the eleven of goats' hair, which covered the Tabernacle of Moses (Ex. xxvi. 1-13; xxxvi. 8-17). The charge of these curtains and of the other textile fabrics of the Tabernacle was laid on the Gershonites (Num. iv. 25). Having this definite meaning, the word came to be used as a synonym for the Tabernacle—its transitoriness and slightness; and is so employed in the sublime speech of David, 2 Sam. vii. 2 (where "curtains" should be "the curtain"), and 1 Chr. xvii. 1. In a few later instances the word bears the more general meaning of the sides of a tent; as in the beautiful figure of Is. liv. 2 (where "habitations" should be "tabernacles," מִשְׁכְּנוֹת), poetic word for "tents"; Jer. iv. 20, x. 20 (here "tabernacle" and "tent" are both one word, מִשְׁכָּה = tent); Ps. civ. 2 (where "stretch," מִנֵּן, is the word usually employed for extending a tent). Also specially of nomadic people, Jer. xlix. 29; Hab. iii. 7; Cant. i. 5 (of the black hair-cloth of which the tents of the real Bedouen are still composed).

Assyrian cup with handle. (Layard, ii. 304.)

Assyrian drinking-cup. (Layard, ii. 304.)

2. *Masac*, מַסַּח; the "hanging" for the doorway of the tabernacle. Ex. xxvi. 36, 7, xxxv. 15, xxxvi. 37, xxxix. 38, xl. 5; Num. iii. 25, iv. 25; and also for the gate of the court round the tabernacle. Ex. xxvii. 16, xxxv. 17, xxxviii. 18, xxxix. 40, xl. 33; Num. iii. 26, iv. 26. Amongst these the rendering "curtain" occurs but once, Num. iii. 26; while "hanging" is shared equally between *Masac* and a very different word—*Kelai*, קַלַּי. The idea in the root of *Masac* seems to be of shielding or protecting (סָכַר; Gen. 951). If this be so, the *Masac* may have been not a curtain or veil, but an awning to shade the entrances—a thing unusual and common in the fierce sun of the East (see one figured in Fergusson's *Nineveh and Persepolis*, p. 184). But the nature of this and the other textile fabrics of the tabernacle will be best examined under TABERNACLE.

Besides "curtain" and "hanging" *Masac* is rendered "covering" in Ex. xxxv. 12, xxxix. 34, xl. 21; Num. iv. 5; 2 Sam. xvii. 19; Ps. cv. 39; Is. xlii. 8.

3. *Dôh*, דָּוָה. There is nothing to guide us to the meaning of this word. It is found but once (Is. xl. 22), in a passage founded on the metaphor of a tent.

CUSH (כּוּשׁ; *Xousi*; *Aethiopia*, and *Chusi*), a Benjaminite mentioned only in the title to Ps. vii. There is every reason to believe this title to be of great antiquity (*Exegeta*, Psalmen, 9). Cush was probably a follower of Saul, the head of his tribe, and had sought the friendship of David for the purpose of "rewarding evil to him who was at peace with him"—an act in which no Oriental of ancient or modern times would see any shame, but, if successful, the reverse. Happily, however, we may gather from verse 15 that he had not succeeded.

CUSH (כּוּשׁ; *Xous*; *Chus* (Gen. x. 6, 7, 8; 1 Chr. i. 8, 9, 10); *Aithoria*, *Aithiores*, *Aethiopia*; *Cushite* כּוּשִׁי, *Aithio*, *Aethiops*; pl. כּוּשִׁים, fem. כּוּשִׁית), the name of a son of Ham, apparently the eldest, and of a territory or territories occupied by his descendants. 1. In the genealogy of Noah's children Cush seems to be an individual, for it is said "Cush begat Nimrod" (Gen. x. 8; 1 Chr. i. 10). If the name be older than his time he may have been called after a country allotted to him. The following descendants of Cush are enumerated:—his sons, Selm, Havilah, Sabtah or Sabti, Raamah, and Sabtechah or Sabtecha; his grandsons, the sons of Raamah, Sheba and Dedan; and Nimrod, who, as mentioned after the rest, seems to have been a remoter descendant than they, the text not necessarily proving him to have been a son. The only direct geographical information given in this passage is with reference to Nimrod, the beginning of whose kingdom was in Babylonia, and who afterwards went, according to the reading which we prefer, into Assyria, and founded Nineveh and other cities. The reasons for our preference are, (1.) that if we read "Out of that land went forth Asshur," instead of "he went forth [into] Asshur," i. e. Assyria, there is no account given but of the "beginning" of Nimrod's kingdom; and (2.) that Asshur the patriarch would seem here to be quite out of place in the genealogy.

2. Cush as a country appears to be African in all

passages except Gen. ii. 13. We may thus distinguish a primeval and a post-diluvian Cush. The former was encompassed by Gihon, the second river of Paradise: it would seem therefore to have been somewhere to the northward of Assyria. It is possible that Cush is in this case a name of a period later than that to which the history relates, but it seems more probable that it was of the earliest age, and that the African Cush was named from this older country. Most ancient nations thus connected their own lands with Paradise, or with primeval seats. In this manner the future Paradise of the Egyptians was a sacred Egypt watered by a sacred Nile; the Arabs have told of the terrestrial Paradise of Sheddad the son of 'Ad, as sometimes seen in their deserts; the Greeks located the all-destroying floods of Ogyges and Deucalion in Greece; and the Mexicans seem to have placed a similar deluge in America; all carrying with them their traditions and fixing them in the territories where they established themselves. The Cushan mentioned in Hab. (iii. 7) has been thought to be an Asiatic post-diluvian Cush, but it is most reasonable to hold that Cushan-rishathaim is here intended (CUSHAN). In the ancient Egyptian inscriptions Ethiopia above Egypt is termed Kesh or Kesh, and this territory probably perfectly corresponds to the African Cush of the Bible. The Cushites however had clearly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The settlements of the sons and descendants of Cush mentioned in Gen. x. may be traced from Mevoe to Babylon, and probably on to Nineveh. We have not above the African Cush, but Seba appears to correspond to Mevoe, other sons of Cush are to be traced in Arabia (ARABIA, RAAMAH, &c.), and Nimrod reigned in Babylonia, and seems to have extended his rule over Assyria. Thus the Cushites appear to have spread along tracts extending from the higher Nile to the Euphrates and Tigris. Philological and ethnological data lead to the same conclusion. There are strong reasons for deriving the non-Semitic primitive language of Babylonia, variously called by scholars Cushite and Sythic, from an ante-Semitic dialect of Ethiopia, and for supposing two streams of migration from Africa into Asia in very remote periods; the one of Nigritions through the present Malayan region, the other and later one, of Cushites, "from Ethiopia properly so called, through Arabia, Babylonia, and Persia, to Western India" (*Genesis of the Earth*, &c., pp. 214, 5). Sir H. Rawlinson has brought forward remarkable evidence tending to trace the early Babylonians to Ethiopia; particularly the similarity of their mode of writing to the Egyptian,\* and the indication in the traditions of Babylonia and Assyria of "a connexion in very early times between Ethiopia, Southern Arabia, and the cities on the Lower Euphrates," the Cushite name of Nimrod himself as a deified hero, being the same as that by which Merod is called in the Assyrian inscriptions (Rawlinson's *Herod.* i. pp. 442, 3). History affords many traces of this relation of Babylonia, Arabia, and Ethiopia. Zerah the Cushite (A. V. "Ethiopian") who was defeated by Asa, was most probably a king of Egypt, certainly the leader of an Egyptian

\* Ideographic writing seems characteristic of Turanian nations; at least such alone have kept to it, partly or wholly, in spite of their after knowledge of phonetic characters.

army: the dynasty then ruling (the 22nd) bears names that have caused it to be supposed to have had a Babylonian or Assyrian origin, as Sheshonk, Shishak, Sheshak; Niamurt, Nimrod; Tekrut, Teklut, Tighlath. The early spread of the Mizraites illustrates that of the Cushites [CAPITOR]: it may be considered as a part of one great system of migrations. On these grounds we suppose that these Hamite races, very soon after their arrival in Africa, began to spread to the east, to the north, and to the west; the Cushites establishing settlements along the southern Arabian coast, on the Arabian shore of the Persian Gulf and in Babylonia, and thence onwards to the Indus, and probably northward to Nineveh; and the Mizraites spreading along the south and east shores of the Mediterranean, on part of the north shore, and in the great islands. These must have been sea-faring peoples, not wholly unlike the modern Malays, who have similarly spread on the shores of the Indian Ocean. They may be always traced where very massive architectural remains are seen, where the native language is partly Tamiar and partly Semitic, and where the native religion is partly cosmic or high-nature worship, and partly fetishism or low nature-worship. These indications do not fail in any settlement of Cushites or Mizraites with which we are well acquainted. [ETHIOPIA.] [R. S. P.]

**CUSH'AN** (כּוּשָׁאן; *Aithiopes*; *Aethiopia*, Hab. iii. 7), possibly the same as Cushan-lishathaim (A. V. Chushan-) king of Mesopotamia (Judg. iii. 8, 10). The order of events alluded to by the prophet seems to favour this supposition. First he appears to refer to former acts of Divine favour (ver. 2); he then speaks of the wonders at the giving of the Law, "God came from Tennan, and the Holy One from mount Paran"; and he adds, "I saw the tents of Cushan in affliction: [and] the tent-curtains of the land of Midian did tremble," as though referring to the fear of the enemies of Israel at the manifestations of God's favour for His people. Cushan-lishathaim, the first recorded oppressor of the days of the Judges, may have been already reigning at the time of the entrance into Palestine. The Midianites, certainly allied with the Moabites at that time, feared the Israelites and plotted against them (Num. xxi., xlii., xlv., xlv.). and it is noticeable that Balaam was sent for from Aram (xxiii. 7), perhaps the Aram-naharum of the oppressor. Hulakkuk afterwards alludes to the crossing of Jordan or the Red Sea, or both (ver. 8-10, 15), to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14). There is far less reason for the supposition that Cushan here stands for an Asiatic Cush. [CHUSHAN KISHATHAIM.] [R. S. P.]

**CUSH'I** (כּוּשִׁי; *Xousi*; *Cushi*), a name occurring more than once in the O. T. 1. One of the ancestors of Jehudi, a man about the court of king Jehoiakim (Jer. xxxv. 14). 2. Father of Zephaniah the Prophet (Zeph. i. 1). 3. (With the article, הַכּוּשִׁי, i. e. "the Cushite," the Ethiopian; *δ Χουσι*; *Cushi*) a man apparently attached to Job's person, but unknown and unaccounted to the king, as may be inferred from his not being recognised by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David, unlike Ahimanaz who was well aware of the effect they were sure to produce. That Cushi was a foreigner—as we should infer from his name

—is also slightly corroborated by his ignorance of the ground in the Jordan valley—"the way of the 'Ciccar'" — by knowing which Ahimanaz was enabled to entrain him (2 Sam. xviii. 21, 22, 23, 31, 32). Ewald, however, conjectures that a mode of running is here referred to, peculiar to Ahimanaz, and by which he was recognised a long distance off by the watchman.

**CUTHAH or CUTH** (כּוּתָּה; *Xouthā*, *Xouth*; Joseph. *Χούθος*; *Cuthi*), one of the countries whence Shalmaneser introduced colonists into Samaria (2 K. xvii. 24, 30); these, intermingling with the remnant of the ten tribes, were the progenitors of the Samaritans, who were called Cuthaeans by the Jews, and are so described in the Chaldee and Talmud (*οἱ κατὰ τὴν Ἑβραίων γλῶτταν Χουθαῖοι, κατὰ δὲ τὴν Ἑλληνικὴν Σαμαριτῆαι*, Joseph. *Ant.* ix. 14, §3). The position of Cuthah is undecided; Josephus speaks of a river of that name in Persia, and fixes the residence of the Cuthaeans in the interior of Persia and Media (*Ant.* ix. 14, §3, x. 9, §7). Two localities have been proposed, each of which corresponds in part, but neither wholly, with Josephus' account. For the one we depend on the statements of Arabian geographers, who speak of a district and town named Kutha, between the Tigris and Euphrates, after which one of the canals (the fourth in Xen. *Anab.* i. 7) was named; the town existed in the time of Abulfeida, and its site has been identified with the ruins of *Taribah* immediately adjacent to Babylon (Ainsworth's *Assyria*, p. 165; Knobel, *Ullerkufel*, p. 252); the canal may be the river to which Josephus refers. The other locality corresponds with the statement that the Cuthaeans came from the interior of Persia and Media. They have been identified with the Cossaei, a warlike tribe, who occupied the mountain ranges dividing those two countries, and whose lawless habits made them a terror even to the Persian emperors (Strab. xi. 524, xvi. 714). They were never wholly subdued until Alexander's expedition; and it therefore appears doubtful whether Shalmaneser could have gained sufficient authority over them to effect the removal of any considerable number; their habits would have made such a step highly expedient, if practicable. The connexion between the Samaritans and the Sidonians, as stated in their letter to Alexander the Great (Joseph. *Ant.* xi. 8, §6, xii. 5, §5), and between the Sidonians and the Cuthaeans as expressed in the version of the Chaldee Paraphrast Pseudo-Jonathan in Gen. x. 19, who substitutes כּוּתָּאִים for כּוּשִׁי, and in the Targum, 1 Chr. i. 13, where a similar change is made, is without doubt to be referred to the traditional belief that the original seat of the Phoenicians was on the shores of the Persian Gulf (Her. i. 1). [W. L. B.]

**CUTTING OFF FROM THE PEOPLE.** [EXCOMMUNICATION.]

**CUTTINGS [IN THE FLESH]** (שְׂמִיטָה, *s. f.* שְׂמִיטָה, *s. m.*, both from שָׁטַח (Buxtorf), שָׁטַח (Gesen. p. 1395), *cut*: 2. נִדְרוֹת, from נָדַד, *inure* (Gesen. p. 264); *ενορμίδες*; *incisurae*: 3. קַעֲקָע, *s.*, from קָעַץ, *engrave* (Gesen. p. 1208); *γρομμῆματα*, *stigmata*). The prohibition (Lev. xix. 28) against marks or cuttings in the flesh for the dead must be taken in connexion with the parallel passages (Lev. xxi. 5; Deut. xiv. 1), in which shav-

ing the head with the same view is equally forbidden. But it appears from Jer. xvi. 6, 7, that some outward manifestation of grief in this way was not wholly forbidden, or was at least tolerated. The ground, therefore, of the prohibition must be sought elsewhere, and will be found in the superstitious or inhuman practices prevailing among heathen nations. A notion apparently existed that self-inflicted baldness or mutilation had a propitiatory efficacy in respect of the nunes of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifices. Herodotus (iv. 71) describes the Scythian usage in the case of a deceased king, for whose obsequies not fewer than six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funereal bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (*Il.* xxiii. 171, 176). Together with human or animal sacrifices at funerals, and after these had gone out of use, the minor propitiatory acts of self-laceration and depilation continued in use (*Il.* xxiii. 141; *Od.* iv. 197; *Virg. Aen.* iii. 67, with Servius ad loc. xii. 805; Eurip. *Alc.* 425; Seneca, *Hippol.* v. 1176, 1193). Plutarch says that some barbarians mutilate themselves (*De Consul. ad Apollon.* p. 113, vol. vi. Reiske). He also says that Solon, by the advice of Epimenides, curtailed the Athenian practice in this respect (*Solon.* 12-21, vol. i. p. 184, 194). Cicero quotes a law of the twelve tables to the same effect; "mulieres genus ne radunto" (*De Leg.* ii. 23).

Such being the ancient heathen practice it is not surprising that the Law should forbid similar practices in every case in which they might be used or misconstrued in a propitiatory sense. "Ye shall not make cuttings for (*propter*) the dead" (צַדִּיקִים) (Lev. xix. 28; Ges. 731; Spencer *de Leg. Hebr.* ii. xix. 404, 405).

But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not funereal. The priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 K. xviii. 28). Herodotus says the Carians, who resided in Europe, cut their foreheads with knives at festivals of Isis; in this respect exceeding the Egyptians, who beat themselves on these occasions (*Herod.* ii. 61). This shows that the practice was not then at least an Egyptian one. Lucian, speaking of the Syrian priestly attendants of this mock deity, says, that using violent gestures they cut their arms and tongues with swords (Lucian, *Asinus*, c. 37, vol. ii. 102, Amst.; *de Dea Syr.* ii. 658, 681; comp. *Ez.* viii. 14). Similar practices in the worship of Bellona are mentioned by Lucan (*Phars.* i. 580), and alluded to by Aelius Lampridius (*Comm.* p. 209), by Tertullian (*Apol.* 9), and Lactantius (*Div. Instit.* i. c. 21, 29, Paris). Herodotus, speaking of means used for allaying a storm, uses the words *ἐντομα ποιεῦντες*, which may mean cutting the flesh, but more probably offering human sacrifices (*Herod.* vii. 191, ii. 119, with Schweighauser's note; see also *Virg. Aen.* ii. 116; *Lucr.* i. 85).

The prohibition, therefore, is directed against practices prevailing not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbours (Selden, *de Diis Syris*, *Syn.* ii. c. 1).

Practices of self-mutilation, whether propitiatory or simply funereal, i. e. expressive of highly excited feeling, are mentioned of the modern Persians on the occasion of the celebration of the death of Hossayn, at which a man is paraded in the character of the saint, with points of lances thrust into his flesh. At funerals also in general the women tear their hair and faces. The Chalcidians express grief by tearing the flesh of their foreheads, arms, and breasts. The Mexicans and Peruvians offered human sacrifices both at funerals and festivals. The Gossyens of India, a class of Brahminical friars, endeavour in some cases to extort alms by gashing their limbs with knives. Among the native negro African tribes also the practice appears to prevail of offering human sacrifices at the death of chiefs (Chardin, *Voyages*, vi. 482, ix. 58, 490; Olearius, *Travels*, p. 237; Lane, *Mod. Eg.* ii. 59; Prescott, *Mexico*, i. 53, 63; *Pem.* i. 86; Elphinstone, *Hist. of India*, i. 116; Strab. xv. 711, et seq.; Niebuhr, *Voyages*, ii. 54; Livingstone, *Travels*, p. 318, 588; *Col. Ch. Chron.* no. cxxxi. 179; Muratori, *Anecd.* iv. 99, 100).

But there is another usage contemplated more remotely by the prohibition, viz., that of printing marks (στίγματα), tattooing, to indicate allegiance to a deity, in the same manner as soldiers and slaves bore tattooed marks to indicate allegiance or adscription. This is evidently alluded to in the Revelation of St. John (xiii. 16, xix. 20, xvii. 5), *χάρagma ἐπὶ τῆς χειρὸς τῆς δεξιᾶς καὶ ἐπὶ τῶν μετώπων*, and, though in a contrary direction, by Ezekiel (ix. 4), by St. Paul (*Gal.* vi. 17), in the Revelation (vii. 3), and perhaps by Isaiah (xlv. 5) and Zechariah (xiii. 6). Lucian, speaking of the priests of the Syrian deity, says, *στίχονται πάντες, οὐ μὲν ἐς καρπὸν, οἱ δὲ ἐς ἀσκήνας, καὶ ἀπὸ τοῦδε, ἅπαντες Ἀσσύριοι σιγματοφόροι* (*de Dea Syr.* ii. p. 684). A tradition, mentioned by Jerome, was current among the Jews, that king Jehoiaquin bore on his body marks of this kind which were discovered after his death (Spencer, *de Leg. Hebr.* ii. xx. 410). Philo, quoted by Spencer, describes the marks of tattooing impressed on those who submitted to the process in their besotted love for idol-worship, as being made by branding (*στίθῃσι πενρωμένῃσι*, Philo, *de Monarch.* i. 819; Spencer, 416). The Arabs, both men and women, are in the habit of tattooing their faces, and other parts of the body, and the members of Brahminical sects in India are distinguished by marks on the forehead, often erroneously supposed by Europeans to be marks of caste (Niebuhr, *Descr. de l'Ar.* 58; *Voyages*, i. 242; Wellsted, *Arabia*, ii. 206, 445; Olearius, *Travels*, 299; Elphinstone, *India*, i. 195). [I. W. P.]

CY'AMON (Κυάμων; *Uchum*), a place named only in Judith vii. 3, as lying in the plain (αὐλῶν, A. V. "valley") over against (ἀπέναντι) Esdrelon. If by "Esdrelon" we may understand Jezreel this description answers to the situation of the modern village Tell Kātūnān, on the eastern slopes of Cumel, on a conspicuous position overlooking the Kishon and the great plain (Rob. iii. 114; Van de Velde, i. 330). The place was known to Eusebius (Καμυανὰ) and Jerome (*imana*), and is mentioned by them in the Onomasticon. They identify it with CY'AMON, the burial-place of Jair the Gileadite. Robinson suggests its identity with JOKNEAM. [G.]

CYMBAL, CYMBALS (צִמְבָּל or צִמְבָּלִים). a percussive musical instrument, from צִמְבָּל, to

*tinkle* (comp. *his two ears shall tinkle*, תִּצְלֶלְהֶם, 1 Sam. iii. 11, and a *fish-spear*, צֶלֶל, Job xii. 7); possibly so called from its tinkling sound. The three instruments which appear to have been most in common use amongst the Hebrews were *Nobel*, נָבֵל, *Cinnor*, כִּנּוֹר, and *Tizlzel*, צִלְצֵל. Two kinds of cymbals are mentioned in Ps. cl. 5, צִלְצֵלִי שְׁמַע, "loud cymbals," *cymbala benesomantia*, or *castagnettes*, and תְּרִמְנָה, צִלְצֵלִי, "high-sounding cymbals," *cymbala jubilatiois*. The former consisted of four small plates of brass or of some other hard metal; two plates were attached to each hand of the performer, and were smote together to produce a loud noise. The latter consisted of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments. Asaph, Heman, and Jeduthun, the renowned conductors of the music of the sanctuary, employed the "loud cymbals" possibly to beat time, and to give the signal to the choir when it was to take part in the sacred chant. Lewis says—but he does not support his statement by any authority—that "there was allowed but one cymbal to be in choir at once." The use of cymbals was not necessarily restricted to the worship of the Temple or to sacred occasions: they were employed for military purposes, as also by the Hebrew women as a musical accompaniment to their national dances. The "loud cymbals" are the same with מִצְלִיתִים, A. V. "cymbals," performed on by the band which accompanied David when he brought up the ark of God from Kirjath-Jearim (1 Chr. xiii. 8).

Both kinds of cymbals are still common in the East in military music, and Niebuhr often refers to them in his travels. "Il y a chez les Orientaux," says Munk, "deux espèces: l'une se compose de deux petits morceaux de bois ou de fer creux et ronds qu'on tient entre les doigts et qui sont connus sous le nom de castagnettes; l'autre est composée de deux demi-sphères creusées en métal." Laupe has written a copious dissertation on ancient cymbals, and his work may be consulted with advantage by those who desire fuller information on the subject.

The cymbals used in modern orchestras and military bands, and which are called in Italian *piatti*, are two metal plates of the size and shape of saucers, one of which is fixed, and the other is held by the performer in his left hand. These resemble very closely the "high-sounding cymbals" of old, and they are used in a similar manner to mark the rhythm, especially in music of a loud and grand character. They are generally played by the person who performs on the large *side drum* (also an instrument of pure percussion); and whilst he holds one cymbal in his left hand, he strikes it against the other which is fixed to the drum, his right hand remaining free to wield the drumstick, as the large drum is only struck on one side and with one stick. In practice the drum and the cymbals are struck simultaneously, and an effect of percussion is thus produced which powerfully marks the time.

The noun *metzillath*, מִצְלִית, found in Zech. xiv. 20, is regarded by some critics as expressive of certain musical instruments known in the age of the second Temple, and probably introduced by the Israelites on their return from Babylon. The A. V. renders the word "bells," supposing it to be derived from

צֶלֶל. The most generally received opinion, however, is, that they were concave pieces or plates of brass which the people of Palestine and Syria attached to horses by way of ornament. (See Mendelssohn's Preface to Book of Psalms; Kimchi, *Comment. in loc.*; Lewis, *Origines Hebraeae*, Lond. 1724, 176-7; Forkel, *Geschichte d. Musik*; Jalm, *Archaeology*, American ed., cap. v. §96, 2; Munk, *Palestine*, 456; Esendier, *Diction. of Music*, i. 112.) [D. W. M.]

**CYPRESS** (תְּרֵמָה; LXX. omits; *ilex*). Celsius (*Hierob.* ii. 269, 70) defends the rendering of the Vulg. in Is. xlv. 14, but the etymology of the word from תְּרֵמָה, *to be hard* (as in Latin we get *robur*, an oak) equally well suits the cypress. Van de Velde describes the cypresses of Lebanon, and there is great probability that the tree mentioned by Isaiah with the cedar and the oak is identical with the *κυπάρισσος* of Eccles. xxiv. 13, l. 10. The evergreen cypress (*cup. sempervirens* of Linnaeus) is a large coniferous tree very common in Palestine. Its wood is fragrant, very compact and heavy. It hardly ever rots, and was much used by the ancients in making the statues of their gods. Porocke has observed that the cypress is the only tree which grows towards the summits of Lebanon, and that at a considerable altitude its form is modified, so as to resemble a small oak. [CEDAR.] [W. D.]

**CYPRUS** (Κύπρος). This island was in early times in close commercial connexion with Phœnicia; and there is little doubt that it is referred to in such passages of the O. T. as Ez. xxvii. 6. [CHITIM.] Josephus makes this identification in the most express terms (Χέθιμα . . . Κύπρος αὐτὴ νῦν καλεῖται; *Ant.* i. 6, §1; so Epiphanius, *Haer.* xxx. 25). Possibly Jews may have settled in Cyprus before the time of Alexander. Soon after his time they were numerous in the island, as is distinctly implied in 1 Macc. xv. 23. The first notice of it in the N. T. is in Acts iv. 36, where it is mentioned as the native place of Barnabas. In Acts xi. 19, 20 it appears prominently in connexion with the earliest spreading of Christianity, first as receiving an impulse among its Jewish population from the persecution which drove the disciples from Jerusalem, at the death of Stephen, and then as furnishing disciples who preached the gospel to Gentiles at Antioch. Thus when Paul was sent with Barnabas from Antioch on his first missionary journey, Cyprus was the first scene of their labours (Acts xiii. 4-13). Again when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Munk, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Mnason, called "an old disciple," and therefore probably an early convert, is mentioned Acts xxi. 16. The other notices of the island are purely geographical. On St. Paul's return from the third missionary journey, they "sighted" Cyprus, and sailed to the southward of it on the voyage from Patara to Tyre (ib. 3). At the commencement of the voyage to Rome, they sailed to the northward of it, on leaving Sidon, in order to be under the lee of the land (Acts xxvii. 4), and also in order to obtain the advantage of the current, which sets northerly along the coast of Phœnicia, and westerly with considerable force along Cilicia.

All the notices of Cyprus contained in ancient writers are diligently collected in the great work of Meuschen (*Meuschen Opera*, vol. iii. Flor. 1744). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east, and that of Taurus on the north, distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental [*Παφίος*], and its political history has almost always been associated with Asia and Africa. Cyprus was a rich and productive island. Its fruits and flowers were famous. The mountains also produced metals, especially copper. This circumstance gives us an interesting link between this island and Judaea. The copper mines were at one time famed to Herod the Great (Joseph. *Ant.* xvi. 4, §5), and there is a Cyprian inscription (Boeckh, No. 2628) which seems to refer to one of the Herods. The history of Cyprus is briefly as follows:—After being subject to the Egyptian king Amasis (Herod. ii. 182) it became a part of the Persian empire (ib. iii. 19, 91), and furnished ships against Greece in the expedition of Xerxes (ib. vii. 90). For a time it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus, it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off SALAMIS at the east end of Cyprus (B.C. 306) the victory was won by Demetrius Poliorcetes,—but the island was recovered by his rival, and afterwards it remained in the power of the Ptolemies, and was regarded as one of their most cherished possessions. It became a Roman province (B.C. 58) under circumstances discreditable to Rome.

Copper Coin of Cyprus, under Emp. Claudius.

Obv. [CL]AVDIVS. CAESAR. Head of Emp. to left. Rev. ΕΠΙ ΚΟΜΙΝΙΟΥ ΠΡΟΚΑΤΟΥ ΑΝΘΥΠΑ ΚΥΠΡΙΩΝ.

At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dion Cass. liii. 12). From this passage and from Strabo (xiv. p. 683) it has been supposed by some, as by Baronius, that St. Luke used the word *ἀρχαῖος* (*proconsul*), because the island was still connected with Cilicia, by others, as by Grotius and Hammond, that the evangelist employs the word in a loose and general manner. But, in fact, Dion Cassius himself distinctly tells us (ib. and liv. 4) that the emperor afterwards made this island a senatorial province; so that St. Luke's language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention other *proconsuls* of Cyprus not very remote from the time of *SENIUS PAULUS*. The governor appears to have resided at Paphos on the west of the island. Under the Roman empire a road connected the two towns of Paphos and Salamis, as appears from the Peut. Table. One of the most remarkable events in this part of the history of Cyprus was a terrible insur-

rection of the Jews in the reign of Trajan, which led to a massacre, first of the Greek inhabitants, and then of the insurgents themselves (Millman, *Hist. of Jews*, iii. 111, 112). In the 9th century Cyprus fell into the power of the Saracens. In the 12th it was in the hands of the Crusaders, under our king Richard I. Materials for the description of Cyprus are supplied by Pococke and Von Hammer. But see especially Engel's *Kypros*, Berlin, 1843, and Ross's *Reisen nach Kös, Halkiarmassus, Rhodos, u. der Insel Cypern*, Halle, 1852. [J. S. H.]

CYRENE (*Κυρήνη*), the principal city of that part of northern Africa, which was anciently called Cyrenaica, and also (from its five chief cities) Pentapolitana. This district was that wide projecting portion of the coast (corresponding to the modern Tripoli), which was separated from the territory of Carthage on the one hand, and that of Egypt on the other. Its surface is a table-land descending by terraces to the sea; and it was celebrated for its climate and fertility. It is observable that the expression used in Acts ii. 10, "the parts of Libya about (*κατὰ*) Cyrene," exactly corresponds with a phrase used by Dion Cassius (*Αἰβών ἡ περὶ Κυρήνην*, liii. 12), and also with the language of Josephus (*ἡ πρὸς Κυρήνην Λιβύη*; *Ant.* xvi. 6, §1). [LIBYA.]

The points to be noticed in reference to Cyrene as connected with the N. T. are these,—that, though on the African coast, it was a Greek city; that the Jews were settled there in large numbers, and that under the Romans it was politically connected with Crete, from which it is separated by no great space of sea. The Greek colonisation of this part of Africa under Battus began as early as B.C. 631; and it became celebrated not only for its commerce, but for its physicians, philosophers, and poets. After the death of Alexander the Great, it became a dependency of Egypt. It is in this period that we find the Jews established there with great privileges. Ptolemy, the son of Lagus, introduced them, because he thought they would contribute to the security of the place (Joseph. c. *Apion*. ii. 4); they became a prominent and influential class of the community (*Ant.* xiv. 7, §2); and they afterwards received much consideration from the Romans (xvi. 6, §5). See 1 Macc. xv. 23. We learn from Josephus (*Life*, 76) that soon after the Jewish war they rose against the Roman power. Another insurrection in the reign of Trajan led to great disasters, and to the beginning of the decay which was completed under the Mohammedans. It was in the year B.C. 75 that the territory of Cyrene (having previously been left to the Romans as a legacy by Apion, son of Ptolemy Physcon), was reduced to the form of a province. On the conquest of Crete (B.C. 67) the two were united in one province, and together frequently called Cretan-Cyrene. Under Constantine they were again separated. [CRETE.]

The notices above given of the numbers and position of the Jews in Cyrene (confirmed by Philo, who speaks of the diffusion of the Jews *ἀπὸ τοῦ πρὸς Αἰβών κατὰβαθμοῦ μέχρι τῶν ὁρίων Αἰθιοπίας*, *adv. Flacc.* p. 523) prepare us for the frequent mention of the place in the N. T. in connexion with Christianity. Simon, who bore our Saviour's cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26) was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Acts ii. 10). They even gave their name to one of the synagogues in Jerusalem (ib. vi. 9).

Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Antioch (ib. xi. 20), and among those who are specially mentioned as labouring at Antioch when Barnabas and Saul were sent on their missionary journey is Lucius of Cyrene (ib. xiii. 1), traditionally said to have been the first bishop of his native district. Other traditions connect Mark with the first establishment of Christianity in this part of Africa.

The antiquities of Cyrene have been illustrated in a series of recent works. See Della Cella, *Vaggio di Tripoli*, &c. Genoa, 1819; Pacho, *Voyage dans la Marmarique, la Cyrénaïque*, &c. Paris, 1827-1829; Trige, *Res Cyrenenses*, Hafn. 1848; Beechey, *Expedition to explore the north coast of Africa*, &c. London, 1828; Barth, *Wanderungen durch das Punische u. Kyrenäische Küstenland*, Berlin, 1849; Hamilton, *Wanderings in North Africa*, London, 1856. [J. S. H.]

**CYRENENUS** (*Κυρήνιος*, Luke ii. 2), the literal English rendering in the A. V. of the Greek name, which is itself the Greek form of the Roman name **QUIRINUS** (not Quirinus; see Meyer, *in loc.*: Sueton. *Tiber.* 49; Tac. *Ann.* ii. 30, iii. 48). The full name is Publius Sulpicius Quirinus. He was consul A.U.C. 742, B.C. 12, and made governor of Syria after the banishment of Archelaus in A.D. 6 (Joseph. *Ant.* xvii. 13, §5). He was sent to make an enrolment of property in Syria, and made accordingly, both there and in Judaea, a census or *ἀπογραφὴ* (Joseph. *l. c.*, and xviii. 1, §1). But this census seems in Luke (ii. 2) to be identified with one which took place at the time of the birth of Christ, when Sensus Saturninus was governor of Syria. Hence has arisen a considerable difficulty, which has been variously solved, either by supposing some corruption in the text of St. Luke (a supposition which is not countenanced by any external critical evidence), or by giving some unusual sense to his words, *ἀπὸ τῆς ἀπογραφῆς πρῶτῃ ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρήνιου*. Many commentators and chronologists, e.g. Perizonius, Usher, Petavins, Storr, Tholuck, Wieseler, would render this, "was made before Q. was governor of Syria," by a usage otherwise confined to St. John among the Evangelists. But this is very improbable, both in itself and because thus there would have been no adequate ground for inserting the notice.

An unexpected light has been thrown on the matter lately, which renders it only necessary to refer to summaries and criticisms of the various hypotheses, such as that in Wiener, art. Quirinius.

A. W. Zumpt, of Berlin, the nephew of the distinguished grammarian, in his *Commentatio de Syria Romanorum provincia a Caesare Augusto ad T. Vespasianum*, has shown it to be probable that

## CYRENENUS

Quirinus was twice governor of Syria. This he supports by the following considerations:—

In 9 B.C. Sensus Saturninus succeeded M. Titius in the province of Syria, and governed it three years. He was succeeded by T. Quintilius Varus (Joseph. *Ant.* xvii. 5, §2), who, as it appears, remained governor up to the end of 4 B.C. Thenceforward we lose sight of him till he is appointed to the command in Germany, in which he lost his life in A.D. 7. We also lose sight of the governors of Syria till the appointment of P. Sulpicius Quirinus, in A.D. 6. Now from the maxim acted on by Augustus (Dion. *Cass.* lii. 23), that none should hold an imperial province for less than three or more than five years, Varus cannot have been governor of Syria during the twelve years from B.C. 6 to A.D. 6. Who then were the missing governors? One of them has been found, L. Volusius Saturninus, whose name occurs as "legatus Syriæ" on a coin of Antioch, A.D. 4 or 5. But his proconsulate will not fill the whole time, and one or two governors must be supplied between Varus, ending 4 B.C., and Volusius, 4 or 5 A.D.

Just at that interval falls the census, of which it is said in Luke ii. 2, that it *πρῶτῃ ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρήνιου*. Could Quirinus have been governor at any such time? From Jan. to Aug. B.C. 12 he was consul. Soon after that he triumphed over the Homonadenses (*novæ expugnatæ per Ciliciam Homonadensium castris insignia triumphæ adeptus*, Tac. *Ann.* iii. 48). Now Zumpt applies the exhaustive process to the provinces which could by any possibility have been under Quirinus at this time, and eliminates from the inquiry Asia,—Pontus and Bithynia,—and Galatia. Cilicia only remains. But at this time, as he shows, that province had been reduced by successive diminutions, had been separated (Dion. *Cass.* lv. 4) from Cyprus, and—as is shown by the history of the misconduct of Piso soon afterwards, who was charged with having, as ex-governor of Syria, attempted *repelere provinciam armis* (Tac. *Ann.* iii. 12), because he had attacked Cleanderis, a fort in Cilicia (ib. ii. 78-80)—attached to the province of Syria. This Zumpt also confirms by the accounts in Tacitus (*Ann.* vi. 41, xii. 55) of the Cilicæ, a seditious tribe of Cilicia aspera, who on two occasions were repressed by troops sent by the governors of Syria.

Quirinus then appears to have been governor of Syria at some time during this interval. But at what time? We find him in the East (Tac. *Ann.* iii. 48), as *datus rector C. Caesaris Armenicum obtinenti*; and this cannot have been during his well-known governorship of Syria, which began in A.D. 6; for Caius Caesar died in A.D. 4. Zumpt, by arguments too long to be reproduced here, but very striking and satisfactory, fixes the time of his first governorship at from B.C. 4 to B.C. 1, when he was succeeded by M. Lollius.

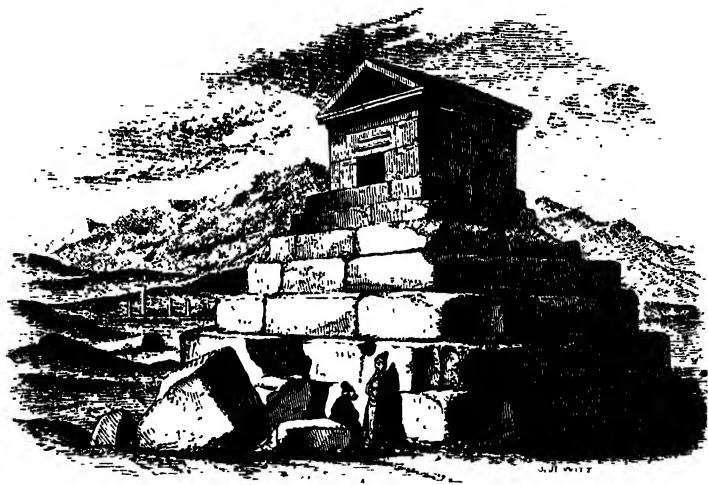

It is true this does not quite remove our difficulty. But it brings it within such narrow limits, that any slight error in calculation, or even the latitude allowed by the words *πρῶτῃ ἐγένετο*, might well cover it.

In the passage of Tacitus referred to more than once (*Ann.* iii. 48), we learn that in A.D. 21, Tiberius asked of the Senate the honour of a public funeral for Quirinus. The historian describes, however, his memory as not being popular for other reasons (see *Ann.* iii. 22), and because of his "*sordida et pæcopolens senectus*."

For the controversy respecting the census under Quirinus, as it stood before Zumpt's discovery, see Winter, *nt. supra*: Greswell, vol. i. *Dissertation* vii.; Browne's *Ordo Sacclorum*, *Appendix* ii. 40 ff.; and Wieseler, *Chronologische Synopse der vier Evangelien*, 109 ff. [H. A.]

**CYRUS** (כורש, or כורש, i.e. *Curesh*; *Kōpos*; probably from the root contained in the Pers. *kahr*, the sun; Sans. *sāra*: so Plut. *Artax.* c. 1; cf. Gesen. *Thes.* s. v.), the founder of the Persian empire (cf. Dan. vi. 28, x. 1, 13; 2 Chr. xxxvi. 22, 23), was, according to the common legend (Herod. i. 107; Xen. *Cyrop.* i. 2, 1), the son of Mandane, the daughter of Astyages, the last king of Media, and Cambyses a Persian of the royal family of the Achæmenidae. In consequence of a dream, Astyages, it is said, designed the death of his infant grandson, but the child was spared by those whom he charged with the commission of the crime (Herod. i. 109 ff.), and Cyrus grew up in obscurity under the name of Agadates (Strab. xv. 729). His real parentage was discovered by the impetuous spirit which he displayed while yet a boy (Herod. i. 114), and when he grew up to manhood his courage and genius placed him at the head of the Persians. The

tyranny of Astyages had at that time alienated a large faction of the Medes, and Cyrus headed a revolt which ended in the defeat and capture of the Median king B.C. 559, near Pasargadae (*Murgh-Aub*, Strab. xv. 730). After consolidating the empire which he thus gained, Cyrus entered on that career of conquest which has made him the hero of the east. In B.C. 546 (?) he defeated Croesus, and the kingdom of Lydia was the prize of his success. While his general Harpagus was engaged in completing the reduction of Asia Minor, Cyrus turned his arms against the Babylonians. Babylon fell before his army, and the ancient dominions of Assyria were added to his empire (B.C. 538). The conquest of Babylon opened the way for greater designs. It is probable that Cyrus planned an invasion of Egypt; and there are traces of campaigns in Central Asia, in which he appears to have attempted to extend his power to the Indus (Ctes. *Pers.* cc. 5 ff.). Afterwards he attacked the Massagetae, and according to Herodotus (i. 214; cf. Joseph. *Ant.* xi. 2, 1) he fell in a battle against them B.C. 529 (Clinton, *F. H.* vol. ii. 301 ff.). His tomb is still shown at Pasargadae (*Arr. Exp.* Al. vi. 29), the scene of his first decisive victory (Rawlinson, Herod. i. p. 351).

Tomb of Cyrus at Murgh-Aub, the ancient Pasargadae.

It is impossible to insist upon the details of the outline thus sketched. In the time of Herodotus Cyrus was already regarded as the national hero of Persia, and his history had received various popular embellishments (Herod. i. 95; cf. iii. 18, 160; Xen. *Cyrop.* i. 2, 1). In the next century Xenophon chose him as the hero of his romance, and fact and fiction became thenceforth hopelessly confused in classical writers. But in the absence of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an Oriental Alexander he aimed at universal dominion; and the influence of Persia, like that of

Greece, survived the dynasty from which it sprung. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life; and it is a singular coincidence that the beginning of Grecian art and philosophy, and the foundation of the Roman constitution synchronize with the triumph of the Arian race in the east (cf. Niebuhr, *Gesch. Ass.* p. 232).

But while the position which Cyrus occupied with regard to the nations of the world is strikingly significant, the personal relations to God's people, with which he is invested in the Scriptures, are full of a more peculiar interest.<sup>b</sup>

<sup>a</sup> In an inscription he is described as "Son of Cambyses, the powerful king" (Col. Rawlinson, on Herod. i. 107).

<sup>b</sup> It seems unnecessary to enter into the question of the identity of the Cyrus of Scripture and profane history, though the opinion of the Duke of Manchester

that the Cyrus of Herodotus is the Nebuchadnezzar of the Bible has found advocates in Germany (Prescol, s. v. *Cyrus* in *Herzog's Encyclop.*). It is impossible that the great conqueror of Isaiah can be merely a satrap of Xerxes.

Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies; but Cyrus was a generous liberator and a just guardian of their rights. An inspired prophet (Is. xlv. 28) recognised in him "a shepherd" of the Lord, an "anointed" king (Is. xlv. 1; *ἡ ἀγιωσύνη*, *Messiah*; *τῷ χριστῷ μου*; *Christo meo*); and the title seemed to later writers to invest him with the dignity of being in some sense a type of 'Christ himself' (Hieron. *Comm. in Is.* xlv. 1). His successes are connected in the prophecy with their religious issue; and if that appear to be a partial view of history which represents the restoration of a poor remnant of captive Israelites to their own land as the final cause of his victories (Is. xlv. 28-xlv. 4), it may be answered that the permanent efforts which Persia has wrought upon the world can be better traced through the Jewish people than through any other channel. The laws, the literature, the religion, the very ruins of the material grandeur of Persia have passed away; and still it is possible to distinguish the effects which they produced in preparing the Jews for the fulfilment of their last mission. In this respect also the parallel, which has been already hinted, holds good. Cyrus stands out clearly as the representative of the east, as Alexander afterwards of the west. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was signalled by the consolidation of a Church; the second by the distinction of sects. The one found its outward embodiment in "the great Synagogue;" the other in the dynasty of the Asmonaeans.

The edict of Cyrus for the rebuilding of the Temple (2 Chr. xxxvi. 22-3; Ezr. i. 1-4, iii. 7, iv. 3, v. 13, 17, vi. 3) was in fact the beginning of Judaism; and the great changes by which the nation was transformed into a church are clearly marked.

1. The lesson of the kingdom was completed by the captivity. The sway of a temporal prince was at length felt to be at best only a faint image of that Messianic kingdom to which the prophets pointed. The royal power had led to apostasy in Israel, and to idolatry in Judah; and men looked for some other outward form in which the law might be visibly realized. Dependence on Persia excluded the hope of absolute political freedom and offered a sure guarantee for the liberty of religious organization.

2. The captivity which was the punishment of idolatry was also the limit of that sin. Thenceforth the Jews apprehended fully the spiritual nature of their faith, and held it fast through persecution. At the same time wider views were opened to them of the unseen world. The powers of good and evil were recognised in their action in the material world, and in this way some preparation was made for the crowning doctrine of Christianity.

3. The organization of the outward Church was connected with the purifying of doctrine, and served as the form in which the truth might be realised by the mass. Prayer—public and private—assumed a new importance. The prophetic work came to an end. The Scriptures were collected. The "law was fenced" by an oral tradition. Synagogues were erected, and schools formed. Scribes shared the respect of priests, if they did not supersede them in popular regard.

4. Above all, the bond by which "the people of God" was held together was at length felt to

be religious and not local, nor even primarily national. The Jews were incorporated in different nations, and still looked to Jerusalem as the centre of their faith. The boundaries of Canaan were passed; and the beginnings of a Spiritual dispensation were already made when the "Dispersion" was established among the kingdoms of the earth (comp. Niebuhr's *Gesch. Assyris und Babyls*, 224 ff.; Ewald, *Gesch. d. Volkes Israel*, iv. 60 ff.; Jost, *Gesch. d. Judenthums*, i. 13 ff.). [DISPERSION OF THE JEWS.] [B. F. W.]

## D

DAB'AREH (דַּבְּרֵה; Δεβρεδ; Alex. Δεβρεθ;

*Dibereth*), Josh. xxi. 28. This name is incorrectly spelt in the A. V., and should be DABERATH; which see.

DAB'BASHIETH (דַּבְּשִׁיֶּת; Βαυδάβα; Alex.

Δαβδσθα; *Debbaseth*), a town on the boundary of Zebulun (Josh. xix. 11 only).

DABERATH (with the art. in Josh. דַּבְּרֵת הַ;

Δαβρωθ; Alex. Δαβρεθ; in Chron. by double copying, *τὴν Δεβερί καὶ τὴν Δαβρόν*; *Dibereth*), a town on the boundary of Zebulun (Josh. xix. 12) named as next to Chisloth-Tabor. In the list of Levitical cities however in 1 Chr. vi. 72, and in Josh. xxi. 28 (where the name in the original is the same, though in the A. V. "Dabareh"), it is stated as belonging to Issachar. It is no doubt the Dabaritta (Δαβριττων κώμη) mentioned by Josephus (*B. J.* ii. 21, §3). Under the name of *Debrieth* it still lies at the western foot of Tabor (ii. 350). A tradition mentioned by Van de Velde (ii. 374) makes this the scene of the miracle on the lunatic child performed by our Lord after His descent from the Mount of Transfiguration (Matt. xvii. 14). But this event probably took place far away. [i.]

DA'BRIA, one of the five swift scribes who recorded the visions of Elisha (2 Esd. xiv. 24; comp. 37, 42).

DACO'BI (Δακοῦβ; Alex. Δακουβί; *Accubi*), 1 Esd. v. 28, [AKKUB.]

DADDEUS, or SADDEUS (1 Esd. viii. 45, 46), a name which answers to the Greek Δαδδαῖος, or Δαδδαῖος, which is itself a corruption of Iddo (Ezr. viii. 17), arising out of the preceding word דָּד. [IDDO.] [B. F. W.]

DA'GON (דָּגוֹן, Δάγων, a diminutive of דָּג, a fish, used in a sense of endearment: cf. *Gesen. Thes. s. v.*), apparently the masculine (1 Sam. v. 3, 4; Sanchun. p. 28; *Movers, Phoeniz.* i. 144) relative of Atargatis [ATARGATIS], was the national god of the Philistines. The most famous temples of Dagon were at Gaza (Judg. xvi. 21-30) and Ashdod (1 Sam. v. 5, 6; 1 Chr. x. 10). The latter temple was destroyed by Jonathan in the Maccabean wars (1 Macc. x. 83, 4, xi. 4; *Joseph. Ant.* xiii. 4, §5). Traces of the worship of Dagon likewise appear in the names Caphar-Dagon (near Jamnia), and Beth-Dagon in Judah (Josh. xv. 41) and Asher (Josh. xix. 27). [BETH-DAGON.] Dagon

was represented with the face and hands of a man and the tail of a fish (1 Sam. v. 5).

Fish-god. From Khorsabad (Layard.)

In the Babylonian mythology the name Dagon, Odakon ('*Ὠδάκων*') is applied to a fish-like being who "rose from the waters of the Red Sea (Berosus, in Niebuhr, *Gesch. Assyrs.* p. 477) as one of the great benefactors of men." Niebuhr appears to identify this being with the Phœnician god, but Rawlinson (*Herodotus*, i. 523 ff.) regards them as wholly distinct. It may have been from a confusion with the Babylonian deity that the Phœnician Dagon has been compared with *Zēds āpōrtius*, the author of agriculture (Philo Bybl. ap. Euseb. *Praep. Ev.* i. 10; Saatchon, p. 32), as if the name were connected with *זֶדֶד*, corn (*זירור*, Philo).

Fish-god. From Nimroud. (Layard.)

The fish-like form was a natural emblem of fruitfulness, and as such was likely to be adopted by

Fish-god on gems in British Museum. (Layard.)

seafaring tribes in the representation of their gods. Various kinds of fish were, as is well known, objects of general worship among the Egyptians (Herod. ii. 72; Strab. xvii. p. 812). [B. F. W.]

**DAISAN** (*Δαϊσάν*; Alex. *Δεσάν*; *Desanon*), 1 Esd. v. 31. [REZIN; by the commonly repeated change of R, 7, to D, 7.]

**DALAI'AH** (*דַּלַּיָא*; *Δαλαΐα*; *Dalaia*). The sixth son of Elioenai, a descendant of the royal family of Judah (1 Chr. iii. 24).

**DALMANUTHA** (*Δαλμανουθά*). In Matt. xv. 39 it is said that Jesus "came into the borders of Magdala," while in Mark viii. 10 we read that He "came into the regions (*εἰς τὰ μέρη*) of Dalmanutha." From this we may conclude that Dalmanutha was a town on the west side of the Sea of Galilee near Magdala. The latter stood close upon the shore, at the southern end of the little plain of Gennesaret. [MAGDALA.] Immediately south of it a precipitous hill juts out into the sea. Beyond this, about a mile from Magdala, a narrow glen breaks down from the west. At its mouth are some cultivated fields and gardens, amid which, just by the beach, are several copious fountains, surrounded by heavy ancient walls, and the ruins of a village. The place is called '*Ain-el-Bairideh*,' "the cold Fountain." Here in all probability is the site of the long lost Dalmanutha. [J. L. P.]

**DALMA'TIA** (*Δαλματία*), a mountainous district on the eastern coast of the Adriatic Sea, extending from the river Naro in the S. to the Savus in the N. It formed a portion of the Roman province of Illyricum subsequently to Tiberius' expedition, A.D. 9. St. Paul sent Titus there (2 Tim. iv. 10); he himself had preached the Gospel in its immediate neighbourhood (Rom. xv. 19), for the boundaries of Illyricum and Dalmatia were not well defined, and the two names were, at the time St. Paul wrote, almost identical. [W. L. B.]

**DAL'PHON** (*דַּלְפֹּן*; *Δελφών*, some MSS. *καὶ δελφών*; *Delphon*), the second of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix. 7).

**DAM'ARIS** (*Δάμαρις*), an Athenian woman converted to Christianity by St. Paul's preaching (Acts xvii. 34). Chrysostom (*de Sacerdotio*, iv. 7), and others held her to have been the wife of Dionysius the Areopagite, but apparently for no other reason than that she is mentioned together with him in this passage. Grotius and Hemsterhuis think the name should be *Δάμαλις*, which is frequently found as a woman's name; but the permutation of λ and ρ was not uncommon both in pronunciation and writing. We have *κρίβανος* and *ελίβανος*, *θεγκόλος* and *λεγκόλος*, *βοτκόλος* and *αγκικόρος*, from the obsolete *κόρος* or *κόλως*, *curo*, *colo* (Lobeck on Phrynichus, p. 652). [H. A.]

**DAMAS'CUS** (*דַּמָּשְׁק*; *Δαμασκός*; *Damascus*) is one of the most ancient, and has at all times been one of the most important, of the cities of Syria. It is situated in a plain of vast size and of extreme fertility, which lies east of the great chain of Anti-Libanus, on the edge of the desert. This fertile plain, which is nearly circular, and about 30 miles in diameter, is due to the river *Barada*, which is probably the "*Abana*" of Scripture. This stream, rising high up on the western flank of Anti-Libanus, forces its way through the chain, running

for some time among the mountains, till suddenly it bursts through a narrow cleft upon the open country east of the hills, and diffuses fertility far and wide. [ABANA.] "From the edge of the mountain-range," says a modern traveller, "you look down on the plain of Damascus. It is here seen in its widest and fullest perfection, with the visible explanation of the whole secret of its great and enduring charm, that which it must have had when it was the solitary seat of civilisation in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rushing through the cleft; it bursts forth, and as if in a moment scatters over the plain, through a circle of 30 miles, the same verdure which had hitherto been confined to its single channel. . . . Far and wide in front extends the level plain, its horizon bare, its lines of surrounding hills bare, all bare far away on the road to Palmyra and Bagdad. In the midst of this plain lies at your feet the vast lake or island of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white minarets above the trees which embosom them, the city of Damascus. On the right towers the snowy height of Hermon, overlooking the whole scene. Close behind are the sterile limestone mountains—so that you stand literally between the living and the dead" (Stanley, *S. and P.*, p. 410). Another writer mentions among the produce of the plain in question "walnuts, pomegranates, figs, plums, apricots, citrons, pears, and apples" (Addison's *Dan. and Palmyra*, ii. 92). Olive-trees are also a principal feature of the scene. Besides the main stream of the *Barada*, which runs directly through the town, supplying its public cisterns, latrines, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn-fields, turning what would otherwise be a desert into a garden. The various streams reunite, but greatly weakened in volume, at a little distance beyond the town; and the *Barada* flows on towards the east in a single channel for about 15 miles, when it separates, and pours its waters into two small and shallow lakes, which lie upon the verge of the desert. Two other streams, the *Wady Helbon* upon the north, and the *Araj* upon the south, which flows direct from Hermon, increase the fertility of the Damascene plain, and contend for the honour of representing the "Pharpar" of Scripture. [PHARPAR.]

According to Josephus (*Ant.* i. 6) Damascus was founded by Uz, the son of Aram, and grandson of Shem. It is first mentioned in Scripture in connexion with Abraham, whose steward was a native of the place (*Gen.* xv. 2). We may gather from the name of this person, as well as from the statement of Josephus, which connects the city with the Arameans, that it was a Semitic settlement. According to a tradition preserved in the native writer, Nicolaus, Abraham stayed for some time at Damascus, after leaving Charran and before entering the promised land, and during his stay was king of the place. "Abraham's name was," he says, "even in his own day familiar in the mouths of the Damascenes, and a village was shown where he dwelt, which was called after him" (*Fr.* 30). This last circumstance would seem however to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. Nothing more is known of Damascus until the time of

David, when "the Syrians of Damascus came to succour Hahadezer, king of Zobah," with whom David was at war (2 Sam. viii. 5; 1 Chr. xviii. 5). On this occasion David "slew of the Syrians 22,000 men;" and in consequence of this victory became completely master of the whole territory, which he garrisoned with Israelites. "David put garrisons in Syria of Damascus; and the Syrians became servants to David, and brought gifts" (2 Sam. viii. 6). Nicolaus of Damascus said that the name of the king who reigned at this time, was Hadad; and he ascribes to him a dominion, not only over Damascus, but over "all Syria except Phoenicia" (*Fr.* 31). He noticed his *attack* upon David; and related that many battles were fought between them, the last, wherein he suffered defeat, being "*upon the Euphrates*." According to this writer Hadad the first was succeeded by a son, who took the same name, as did his descendants for ten generations. But this is irreconcilable with Scripture. It appears that in the reign of Solomon, a certain Rezon, who had been a subject of Hahadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damascus, and established his own rule there (1 K. xi. 23-5). He was "an adversary to Israel all the days of Solomon . . . and he abhorred Israel, and reigned over Syria." Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably Hadad III. of Nicolaus, a grandson of the antagonist of David, is found in league with Baasha, king of Israel, against Asa (1 K. xv. 19; 2 Chr. xvi. 3), and afterwards in league with Asa against Baasha (1 K. xv. 20). He made a successful invasion of the Israelite territory in the reign of that king; and in the reign of Omri he not only captured a number of Israelite cities which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he acquired the right of "making himself streets" (1 K. xx. 34; comp. Nic. D. *Fr.* 31, *ad fin.*). He was succeeded by his son, Hadad IV. (the Benhadad II. of Scripture, and the Ben-Idri of the Assyrian inscriptions), who came at the head of thirty-two subject kings against Ahab, and laid siege to Samaria (1 K. xv. 1). The attack was unsuccessful; and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his father had gained, and submitted in his turn to the suzerainty of Ahab (*ib.* xx. 13-34). The terms of the treaty were perhaps not observed. At any rate three years afterwards war broke out afresh, through the claim of Ahab to the city of Ramoth-Gilead (1 K. xxii. 1-4). The defeat and death of Ahab at that place (*ib.* 15-37) seems to have enabled the Syrians of Damascus to resume the offensive. Their bands ravaged the lands of Israel during the reign of Jehoram; and they even undertook at this time a second siege of Samaria, which was frustrated miraculously (2 K. vi. 24, vii. 6-7). After this, we do not hear of any more attempts against the Israelite capital. The cuneiform inscriptions show that towards the close of his reign Benhadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Three several attacks appear to have been made by this prince upon Benhadad, who, though he had the support of the Phoenicians, the Hittites, and the Hamathites, was

unable to offer any effectual opposition to the Assyrian arms. His troops were worsted in several engagements, and in one of them he lost as many as 20,000 men. It may have been these circumstances which encouraged Hazael, the servant of Benhadad, to murder him, and seize the throne, which Elisha had declared would certainly one day be his (2 K. viii. 15). He may have thought that the Syrians would willingly acquiesce in the removal of a ruler under whom they had suffered so many disasters. The change of rulers was not at first productive of any advantage to the Syrians. Shortly after the accession of Hazael (about B.C. 884), he was in his turn attacked by the Assyrians, who defeated him with great loss amid the fastnesses of Anti-Libanus. However, in his other wars he was more fortunate. He repulsed an attack on Ramoth-Gilead, made by Ahaziah king of Judah and Jehoram king of Israel in conjunction (2 K. viii. 28-9); ravaged the whole Israelite territory east of Jordan (ib. x. 32-3); besieged and took Gath (ib. xii. 17; comp. Am. vi. 2); threatened Jerusalem, which only escaped by paying a heavy ransom (2 K. xii. 18); and established a species of suzerainty over Israel, which he maintained to the day of his death, and handed down to Benhadad, his son (2 K. xiii. 3-7, and 22). This prince in the earlier part of his reign had the same good fortune as his father. Like him, he "oppressed Israel," and added various cities of the Israelites to his own dominion (2 K. xiii. 25); but at last a deliverer appeared (verse 5), and Joash, the son of Jehoiada, "beat Hazael thrice, and recovered the cities of Israel" (verse 25). In the next reign still further advantages were gained by the Israelites. Jehoahaz II. (ab. B.C. 836) is said to have "recovered Damascus" (ib. xiv. 28), and though this may not mean that he captured the city, it at least implies that he obtained a certain influence over it. The mention of this circumstance is followed by a long pause, during which we hear nothing of the Syrians, and must therefore conclude that their relations with the Israelites continued peaceable. When they reappear nearly a century later (ab. B.C. 742) it is as allies of Israel against Judah (2 K. xv. 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile, was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 K. xv. 19; 1 Chr. v. 26), and Tiglath-Pileser (2 K. xv. 29; 1 Chr. v. 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin king of Damascus, and Pekah king of Israel, resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Is. vii. 1-6; 2 K. xvi. 5). Ahaz may have been already suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Elath, which had been formerly built by Azariah, king of Judah, in territory regarded as Syrian (2 K. xiv. 22), having been taken and retained by Rezin (ib. xvi. 6)—Ahaz was

induced to throw himself into the arms of Tiglath-Pileser, to ask aid from him, and to accept voluntarily the position of an Assyrian feudatory (ib. xvi. 7-8). The aid sought was given, with the important result, that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed—the inhabitants being carried captive into Assyria (ibid. verse 9; comp. Is. vii. 8 and Am. i. 5).

It was long before Damascus recovered from this serious blow. As Isaiah and Amos had prophesied in the day of her prosperity, that Damascus should be "taken away from being a city and be a ruinous heap" (Is. xvii. 1), that "a fire should be sent into the house of Hazael, which should devour the palaces of Benhadad" (Am. i. 4); so Jeremiah, writing about B.C. 600, declares "Damascus is *waxed feeble* and turneth herself to flee, and fear hath seized on her; anguish and sorrows have taken her, as a woman in travail. How is the city of praise *not left*, the city of my joy!" (Jer. xlix. 24-5). We do not know at what time Damascus was rebuilt; but Strabo says that it was the most famous place in Syria during the Persian period (xvi. 2, §19); and we find that before the battle of Issus it was selected by Darius as the city to which he should send for better security the greater part of his treasures and valuables (Arr. *Exp. Al.* ii. 11). Shortly after the battle of Issus it was taken by Parmenio (ibid.); and from this time it continued to be a place of some importance under the Greeks; becoming however decidedly second to Antioch, which was raised up as a rival to it by the Seleucids. From the monarchs of this house it passed to the Romans, who became masters of it in the war between Pompey and Mithridates (*Mos. Choren.* i. 14; comp. Joseph. *Ant. Jud.* xiv. 2, §3; and App. *Bell. Mithr.* p. 244). At the time of the Gospel history, and of the apostle Paul, it formed a part of the kingdom of Aretas (2 Cor. xi. 32), an Arabian prince, who like the princes of the house of Herod, held his kingdom under the Romans (Joseph. *Ant. Jud.* xvi. 11, §9). A little later it was reckoned to Decapolis (Plin. *II. N.* v. 16), after which it became a part of the province known as Phœnicia Libanensis (Hierocl. *Synecd.* p. 717). It grew in magnificence under the Greek emperors, and when taken by the Mahometan Arabs in A.D. 634, was one of the first cities of the eastern world. It is not necessary to trace its subsequent glories under the Caliphs, the Sarracens, and the Turks. It may however be noticed that there has scarcely been an interruption to its prosperity, and that it is still a city of 150,000 inhabitants.

Damascus has always been a great centre for trade. The difficulties and dangers of the mountain passes to the west of Anti-Libanus made the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Coele-Syria, while the trade of Tyre with Assyria and the East generally, passed naturally through Damascus on its way to Palmyra and the Euphrates. Ezekiel, speaking of Tyre, says, "Damascus was thy merchant in the multitude of the wares of thy making, for the multitude of all riches; in the wine of Helbon, and white wool." It would appear from this that Damascus took manufactured goods from the Phœnicians, and supplied them in exchange with wool and wine. The former would be produced in abundance in Coele-Syria and the valleys of the Anti-Libanus range, while the latter seems to have

been grown in the vicinity of *Helbon*, a village still famous for the produce of its vines, 10 or 12 miles from Damascus to the north-west (*Geograph. Jour.* vol. xxvi. p. 44). But the passage trade of Damascus has probably been at all times more important than its direct commerce. Its merchants must have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactures of its own. According to some expositors, the passage in Amos iii. 12, which we translate "in Damascus on a couch" (שֹׁכֵן בִּדְמָשְׁקִי), means really "on the *damask* couch," which would indicate that the Syrian city had become famous for a textile fabric as early as the eighth century B.C. There is no doubt that such a fabric gave rise to our own word, which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascenes before the Mahometan era. In ancient times they were probably rather a consuming than a producing people, as the passage in Ezekiel clearly indicates.

Certain localities in Damascus are shown as the site of those Scriptural events which especially interest us in its history. A "long wide thoroughfare"—leading direct from one of the gates to the Castle or palace of the Pasha—is "called by the guides 'Straight'" (Acts ix. 11); but the natives know it among themselves, as "the Street of Bazzars" (Stanley, p. 412). The house of Judas is shown, but it is not in the street "Straight" (Pococke, ii. 119). That of Ananias is also pointed out. The scene of the conversion is confidently said to be "an open green spot, surrounded by trees," and used as the Christian burial-ground; but this spot is on the eastern side of the city, whereas St. Paul must have approached from the south or west. Again it appears to be certain that "four distinct spots have been pointed out at different times" (Stanley, p. 412) as the place where the "great light suddenly shined from heaven" (Acts ix. 8); so that little confidence can be placed in any of them. The point of the walls at which St. Paul was let down by a basket (Acts ix. 25; 2 Cor. xi. 33) is also shown; and, as this locality is free from objection, it may be accepted, if we think that the tradition, which has been so faithless or so uncertain in other cases, has any value here.

In the vicinity of Damascus certain places are shown, traditionally connected with the prophet Elisha; but these local legends are necessarily even more doubtful than those which have reference to the comparatively recent age of the Apostles.

(See Stanley's *Sinai and Palestine*; Maundrell's *Journey to Damascus*; Addison's *Damascus and Palmyra*; Pococke's *Travels*; and especially Porter's *Five Years in Damascus*, and his account of

\* Gesenius has pointed out a slight difference between the two derivations; the verb being active in the latter and passive in the former (*Thes.* 336). This is quite in keeping with the uncertainty which attends many of these ancient paronomastic derivations (compare *Abel*, BENJAMIN, and others).

\* The frequent variations in the LXX. forbid absolute reliance on these numbers; and, in addition, it should not be overlooked that the census in Num.

the country round Damascus in the *Geographical Journal*, vol. xxvi.) [G. R.]

DAN. 1. (דָּן; Δάν; Joseph. Δάν, θεόκτιστον ἄν τις ἐποίησεν κατὰ τὴν ἑλλ. γλώτταν; Dan). The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxx. 6). The origin of the name is given in the exclamation of Rachel—"God hath judged me" (דָּן, *dananni*) . . . and given me a son," therefore she called his name Dan," i. e. "judge." In the blessing of Jacob (Gen. xlix. 16) this play on the name is repeated—"Dan shall judge" (דָּן, *yalin*) his people." Dan was own brother to Naphtali; and as the son of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and that of DINAH, the only daughter of Jacob whose name is preserved.

The records of Dan are unusually meagre. Of the patriarch himself no personal history is, unfortunately, preserved. Only one son is attributed to him (Gen. xlii. 23); but it may be observed that "Hushim" is a plural form, as if the name, not of an individual, but of a family; and it is remarkable—whether as indicating that some of the descendants of Dan are omitted in these lists, or from other causes—that when the people were numbered in the wilderness of Sinai, this was, with the exception of Judah, the most numerous of all the tribes, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the tabernacle (Num. ii. 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, was his station, the hindmost of the long procession (ii. 31, x. 25).

The names of the "captain" (נָשִׂיא) of the tribe at this time, and of the "ruler" (the Hebrew word is the same as before, who was one of the spies (xiii. 12), are preserved. So also is the name of one who played a prominent part at that time, "Abihah the son of Abihamah, of the tribe of Dan," associated with Bezaleel in the design and construction of the fittings of the tabernacle (Exod. xxxi. 6, &c.). The numbers of this tribe were not subject to the violent fluctuations which increased or diminished some of its brethren (comp. the figures given in Num. i. and xvi.), and it arrived at the threshold of the Promised Land, and passed the ordeal of the rites of Baal-peor (Num. xxv.) with an increase of 1700 on the earlier census. The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a "prince" (*Nasi*, as before) to the apportionment of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii. 13). After this nothing is heard of Dan till the specification of the inheritance allotted to him (Josh. xix. 48). He was the last of the tribes to receive his portion, and that portion, according to the record of Joshua—strange as it appears in the face of the numbers just quoted—was the smallest of the

1. is of fighting men, that of xxvi. of the "children of Reuben," &c., and therefore probably without that limitation.

\* This one word is rendered in the A. V. by "prince," "ruler," "captain," "chief," and "governor."

twelve.<sup>4</sup> But notwithstanding its smallness it had eminent natural advantages. On the north and east it was completely embraced by its two brother-tribes Ephraim and Benjamin, while on the south-east and south it joined Judah, and was thus surrounded by the three most powerful states of the whole confederacy. Of the towns enumerated as forming "the 'border' of its inheritance," the most easterly which can now be identified are Ajalon, Zorah (Zareah), and Ir-Shemesh (or Beth-shemesh; which see). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the S. bore the distinctive name of "the Shefelah," and more to the N., of "Sharon." From Japho—afterwards Joppa, and now *Yafa*—on the north, to Ekron and Gath-rimmon on the south—a length of at least 14 miles—that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By Josephus (*Ant.* v. 1, §22, and 3, §1) this is extended to Ashdod on the south, and Dor, at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain. But this rich district, the corn-field and the garden of the whole south of Palestine (Stanley, *S. and P.* 258), which was the richest prize of Phœnician conquest many centuries later,<sup>5</sup> and which even in the now degenerate state of the country is enormously productive, was too valuable to be given up without a struggle by its original possessors. The Amorites accordingly "forced the children of Dan into the mountain, for they would not suffer them to come down into the valley" (*Judg.* i. 34)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins still crown the hills that skirt the lowland. True, the help of the great tribe so closely connected with Dan was not wanting at this juncture, and "the hand of the children of Joseph," i. e. Ephraim, "prevailed against the Amorites" for the time. But the same thing soon occurred again, and in the glimpse with which we are afterwards favoured into the interior of the tribe, in the history of its great hero, the Philistines have taken the place of the Amorites, and with the same result. Although Samson "comes down" to the "vineyards of Timnath" and the valley of Sorek, yet it is from Mahaneh-Dan—the fortified camp of Dan, between Zorah and Eshtaol, behind Kirjath-jearim—that he descends, and it is to that natural fastness, the residence of his father, that he "goes up" again after his encounter, and that he is at last borne to his family sepulchre, the burying-place of Manoah (*Judg.* xiv. 1, 5, 19, xiii. 25, xvi. 4; comp. xviii. 12, xvi. 31).

These considerations enable us to understand how it happened that long after the partition of the land "and the inheritance of the Danites had not fallen to them among the tribes of Israel" (*Judg.* xviii. 1).

<sup>4</sup> The enumeration of the tribes in this record is in the order of their topographical position, from S. to N. It is remarkable that Dan is named after Naphtali and Asher, as if already associated with the northern position afterwards occupied by the city Dan. This is also the case in *Judg.* i. 34, and 1 Chr. xii. 35. The writer is not aware that any explanation has been offered of this apparent anomaly.

<sup>5</sup> See the inscription of king Esmonazar, as interpreted by Stanley (*S. & P.* 278, 258).

<sup>6</sup> Ewald ascribes it to their being engaged in commerce (*Dichter*, i. 130): This may have been the case with Asher, but can hardly, for the reasons ad-

They perhaps furnish a reason for the absence of Dan from the great gathering of the tribes against Sisera (*Judg.* v. 17). They also explain the warlike and independent character of the tribe betokened in the name of their head-quarters, as just quoted—Mahaneh-Dan, "the camp, or host, of Dan"—in the fact specially insisted on and reiterated (*xviii.* 11, 16, 17) of the complete equipment of their 600 warriors\* "appointed with weapons of war,"—and the lawless freebooting style of their behaviour to Micah. There is something very characteristic in the whole of that most fresh and interesting story preserved to us in *Judg.* xviii.—a narrative without a parallel for the vivid glance it affords into the manners of that distant time—characteristic of boldness and sagacity, with a vein of grim sardonic humour, but undeformed by any unnecessary bloodshed.

In the "security" and "quiet" (*Judg.* xviii. 7, 10) of their rich northern possession the Danites enjoyed the leisure and repose which had been denied them in their original seat. But of the fate of the city to which they gave "the name of their father" (*Josh.* xix. 47), we know scarcely anything. The strong religious feeling which made the Danites so anxious to ask counsel of God from Micah's Levite at the commencement of their expedition (*Judg.* xviii. 5), and afterwards take him away with them to be "a priest unto a tribe and a family in Israel," may have pointed out their settlement to the notice of Jeroboam as a fit place for his northern sanctuary. But beyond the exceedingly obscure notice in *Judg.* xviii. 30, we have no information<sup>7</sup> on this subject. From 2 Chr. ii. 14 it would appear that the Danites had not kept their purity of lineage, but had intermarried with the Phœnicians of the country. (See an elaboration of this in Blunt, *Coincidences*, Pt. II. iv.)

In the time of David Dan still kept its place among the tribes (1 Chr. xii. 35). Asher is omitted, but the "prince of the tribe of Dan" is mentioned in the list of 1 Chr. xxvii. 22. But from this time forward the name as applied to the tribe vanishes; it is kept alive only by the northern city. In the genealogies of 1 Chr. ii. to xii. Dan is omitted entirely, which is remarkable when the great fame of Samson and the warlike character of the tribe are considered, and can only be accounted for by supposing that its genealogies had perished. It is perhaps allowable to suppose that little care would be taken to preserve the records of a tribe which had left its original seat near the head-quarters of the nation, and given its name to a distant city notorious only as the seat of a rival and a forbidden worship. Lastly, Dan is omitted from the list of those who were sealed by the Angel in the vision of St. John (*Rev.* vii. 5-7).

The mention of this tribe in the "blessings" of Jacob and Moses must not be overlooked, but it is

vanced above, have been so with Dan. The "ships" of Deborah's song are probably only a bold figure, in allusion to Joppa.

\* The complete appointment of these warriors is perhaps a more certain sign of the tribe being practised in war, when we recollect that it was the Philistine policy to deprive of their arms those whom they had conquered (comp. 1 Sam. xiii. 19-21, and perhaps also Samson's rude weapon, the jaw-bone).

<sup>7</sup> For "the captivity of the land," *יָמִין*, Ewald proposes to read "of the ark," *יָרִיב*; that is, till the time of Samuel (1 Sam. iv. 11), *Gesch.* ii. pt. 2. 233.

difficult to extract any satisfactory meaning from them. Herder's interpretation as given by Prof. Stanley will fitly close this notice.

"It is doubtful whether the delineation of Dan in Jacob's blessing relates to the original settlement on the western outskirts of Judah, or to the northern outpost. Herder's explanation will apply almost equally to both. 'Dan,' the judge, 'shall judge his people'; he the son of the concubine no less than the sons of Leah; he the frontier tribe no less than those in the places of honour shall be 'as one of the tribes of Israel.' 'Dan shall be a serpent by the way, an adder in the path,' that is of the invading enemy by the north or by the west, 'that biteth the heels of the horse,' the indigenous serpent biting the foreign horse unknown to Israelite warfare, 'so that his rider shall fall backwards.' And his war-cry as from the frontier fortresses shall be 'For Thy salvation, O Lord, I have waited!' In the blessing of Moses the southern Dan is lost sight of. The northern Dan alone appears, with the same characteristics though under a different image; 'a lion's whelp' in the far north, as Judah in the far south: 'he shall leap from Bashan'—from the slopes of Hermon, where he is couched watching for his prey."

2. (דָּן; *Adv*; Joseph. τὸ *Advov*; *Dan*.) The well-known city, so familiar as the most northern landmark of Palestine, in the common expression "from Dan even to Beersheba." The name of the place was originally LAISH or LESHEM (Josh. xix. 47). Its inhabitants lived "after the manner of the Zidonians," i. e. engaged in commerce, and without defence. But it is nowhere said that they were Phœnicians, though it may perhaps be inferred from the parentage of Huram—his mother "of the daughters of Dan," his father "a man of Tyre" (2 Chr. ii. 14). Living thus "quiet and secure," they fell an easy prey to the active and practised freebooters of the Danites. They countered upon their new acquisition the name of their own tribe, "after the name of their father who was born unto Israel" (Judg. xviii. 29; Josh. xix. 47), and Laish became Dan.

The locality of the town is specified with some minuteness. It was "far from Zidon," and "in the valley (עֲמֶק, *Emek*) that is by (בְּ) Beth-rhob," but as this latter place has not been identified with certainty, the position of Dan must be ascertained by other means.

The graven image which the wandering Danites had stolen from Micah they set up in their new home, and a line of priests was established, which, though belonging to the tribe of Levi and even descended from Moses,<sup>k</sup> was not of the family of Aaron, and therefore not belonging to the regular priesthood. To the form of this image and the nature of the idolatry we have no clue, nor to the relation, if any, which existed between it and the cult-worship afterwards instituted there by Jeroboam (1 K. xii. 29, 30). The latter is alluded to by Amos (viii. 14) in a passage which possibly preserves

a formula of invocation or adjuration in use among the worshippers; but the passage is very obscure.

After the establishment of the Danites at Dan it became the acknowledged extremity of the country, and the formula "from Dan even to Beersheba" is frequent throughout the historical books (Judg. xx. 1; 1 Sam. iii. 20; 2 Sam. iii. 10, xvii. 11, xxiv. 2, 15; 1 K. iv. 25). In the later records the form is reversed, and becomes "from Beersheba even to Dan" (1 Chr. xxi. 2; 2 Chr. xxx. 5).

Dan was, with other northern cities, laid waste by Benhadad (1 K. xv. 20; 2 Chr. xvi. 4), and this is the last mention of the place.

Various considerations would incline to the suspicion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. These are:—(1.) the extreme reluctance of the Orientals—to initiate a sanctuary, or to adopt for worship any place which had not enjoyed a reputation for holiness from pre-historic times. (2.) The correspondence of Dan with Beersheba in connexion with the life of Abraham—the origin of Beersheba also being, as has been noticed, enveloped in some diversity of statement. (3.) More particularly its incidental mention in the very clear and circumstantial narrative of Gen. xiv. 14, as if well known even at that very early period. Its mention in Dent. xxxiv. 1 is also before the events related in Judg. xviii., though still many centuries later than the time of Abraham. But the subject is very difficult, and we can hardly hope to arrive at more than conjecture upon it.

With regard to Gen. xiv. 14 three explanations suggest themselves. 1. That another place of the same name is intended. (See Kalisch, *ad loc.* for an ingenious suggestion of Dan-jaan; another is disposed of by Prof. Stanley, *S. & P.* 400.) Against this may be put the belief of Josephus (comp. *Ant.* i. 10, §1, with v. 3, §1) and of Jerome (*Onomast.* Laish, comp. with *Quest. Hebr. in Genesim*, xiv. 14), who both unhappily identify the Dan of the Danites, near Panens, with the Dan of Abraham. 2. That it is a prophetic anticipation by the sacred historian of a name which was not to exist till centuries later, just as Samson has been held to be alluded to in the blessing of Dan by Jacob. 3. That the passage originally contained an older name, as Laish; and that when that was superseded by Dan, the new name was inserted in the MSS. This last is Ewald's (*Gesch.* i. 73), and of the three is the most feasible, especially when we consider the characteristic, genuine air of the story in Judges, which fixes the origin of the name so circumstantially. Josephus (*Ant.* v. 3, §1) speaks positively of the situation of Laish as "not far from Mount Libanus and the springs of the lesser Jordan, near (*κατὰ*) the great plain of the city of Sidon" (compare also *Ant.* viii. 8, §4); and this, as just said, he identifies with the Dan in Gen. xiv. 14 (*Ant.* i.

<sup>k</sup> According to Jewish tradition, Jacob's blessing on Dan is a prophetic allusion to Samson, the great "Judge" of the tribe; and the ejaculation with which it closes was that actually uttered by Samson when brought into the temple at Gaza. (See the Targum Ps. Jonathan on Gen. xlix. 16, 17; and the quotations in Kalisch's *Genesis ad loc.*) Modern critics likewise see an allusion to Samson in the terms of the

blessing, which they presume on that account to have been written after the days of the Judges (Ewald, *Gesch.* i. 92). Jerome's observations (*Qu. in Gen.*) on this passage are very interesting.

<sup>k</sup> Moses is doubtless the genuine reading of the name, which, by the insertion of an N, was changed by the Jews into Manasach, as it stands in the A. V. of Judg. xviii. 30. [MANASSEH, 5.]

10, §1). In consonance with this are the notices of St. Jerome, who derives the word "Jordan" from the names of its two sources. Dan, the westernmost and the smaller of the two, he places at four miles from Pāneas on the road to Tyre. In perfect agreement with this is the position of *Tell el-Kadi*, a mound from the foot of which gushes out "one of the largest fountains in the world," the main source of the Jordai (Rob. iii. 390-3; Stanley, 394, 5). The Tell itself, rising from the plain by somewhat steep terraces, has its long, level top strewn with ruins, and is very probably the site of the town and citadel of Dan. The spring is called *el Teddān*, possibly a corruption of Dan (Rob. iii. 392), and the stream from the spring *Nahr ed Dhan* (Wilson, ii. 173), while the name, *Tell el Kadi*, "the Judge's mound," agrees in signification with the ancient name.<sup>1</sup> Both Dr. Robinson and Prof. Stanley give the exact agreement of the spot with the requirements of the story in Judg. xviii.—"a good land and a large, where there is no want of anything that is on the earth" (Rob. 399; Stanley, as above). [G.]

DAN-JA'AN (דַּן יָאָן; Δανιδαν καὶ Οὐδάν; Alex. Δανιδαν καὶ Ιουδάν; Dan silvestriū), a place named only in 2 Sam. xxiv. 6 as one of the points visited by Joab in taking the census of the people. It occurs between Gilead and Zidon—and therefore may have been somewhere in the direction of Dan (Laish), at the sources of the Jordan. The reading of the Alex. LXX. and of the Vulg. was evidently דַּן יָאָן, *Dan-jaar*, the nearest translation of which is "Dan in the wood." This reading is approved by Gesenius, and agrees with the character of the country about *Tell el-Kadi*. Fürst (*Handb. d. bibl. Arch.*, 303) compares Dan-jaar with Baal-jaar, a Phœnician divinity whose name is found on coins. Thénius suggests that Jaan was originally Laish, the *י* having fallen away, and *יא* having been substituted for *י* (*Exeg. Hdbuch*, on *Sam.* 257).<sup>2</sup> There seems no reason for doubting that the well known Dan is intended. We have no record of any other Dan in the north, and even if this were not the case, Dan, as the accepted northern limit of the nation, was too important a place to escape mention in such a list as that in the text. Dr. Schultz, the late Prussian Consul at Jerusalem, discovered an ancient site called *Daniam* or *Danyal*, in the mountains above *Khan-en-Nakbra*, south of Tyre, which he proposes to identify with Dan-jaar (Van de Velde, *Memoir*, 306), but this requires confirmation. [G.]

DANCE. As emotions of joy and sorrow universally express themselves in movements and gestures of the body, efforts have been made among all nations, but especially among those of the south and east, in proportion as they seem to be more demonstrative, to reduce to measure and to strengthen by unison the more pleasurable—those of joy. The dance is spoken of in Holy Scripture universally as symbolical of some rejoicing, and is

often coupled for the sake of contrast with mourning, as in Eccles. iii. 4, "a time to mourn and a time to dance" (comp. Ps. xxx. 11; Matt. xi. 17). In the earlier period it is found combined with some song or *refrain* (Ex. xv. 20, xxxii. 18, 19; 1 Sam. xxi. 11); and with the *hān*, or tambourine (A. V. "timbral"), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent in voice or in gesture singly.<sup>3</sup> Nor is there any more strongly popular element traceable in the religion of the ancient Jews than the opportunity so given to a prophet or prophetess to kindle enthusiasm for Jehovah on momentous crises of national joy, and thus root the theocracy in their deepest feelings, more especially in those of the women, themselves most easily stirred, and most capable of exciting others. The dance was regarded even by the Romans as the worship of the body, and thus had a place amongst sacred things: "Sane ut in religionibus saltaretur," says Servius ad Virg. *Bucol.* v. 73, "haec ratio est, quod nullam majores nostri partem corpore esse voluerunt, quae non sentiet religionem." A similar sentiment is conveyed in Ps. xxxv. 10,—“All my bones shall say, Lord, who is like unto thee?” So the "tongue" is the best member among many, the "glory" (Ps. lvii. 8) of the whole frame of flesh, every part of which is to have a share in the praises of God. Similarly among the Greeks is ascribed by Athenaeus to Socrates the following fragment—

οἱ δὲ χάροις κάλλιστα θεοῦ τιμῶσιν ἄριστοι ἐν πολέμῳ.

who also praises among styles of dancing τὸ εὐγενές καὶ ἀνδρῶδες (Athen. xiv. 627; comp. Arr. Alex. iv. 11).

Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments. Many representations of dances both of men and women are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance (27; see below).

Plato certainly (*Leg.* vii. 6) reckons dancing (*δρχησις*) as part of gymnastics (*γυμναστική*). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonyms (Hom. *Il.* xvi. 617; comp. Creuzer, *Symb.* ii. 367, iv. 474; and see especially Lucian *de Salt.*, *passim*). Women, however, among the Hebrews made the dance their special means of expressing their feelings; and when their husbands or friends returned from a battle on behalf of life and home, felt that they too ought to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating and drinking and dancing" of the Amalekites is recorded, as is the people's "rising up to play" (Psalms, including a revelling dance), with a tacit censure; the one seems to mark the lower civilization of the

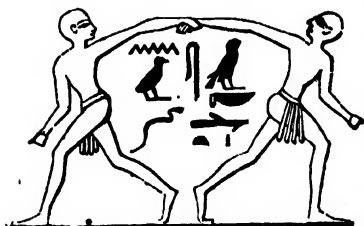

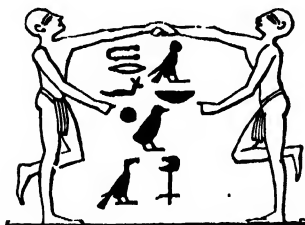

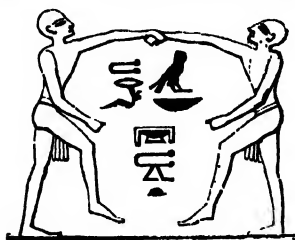

<sup>1</sup> This agreement in meaning of the modern name with the ancient is so rare, that little dependence can be placed on it. Indeed, Stanley (*S. & P.* 394 note) has shown grounds for at least questioning it. The modern names, when representatives of the ancient, generally agree in sound, though often disagreeing in meaning.

<sup>2</sup> Not a bad specimen of the wild and gratuitous suggestions which sometimes occur even in these, generally, careful Manuals.

<sup>3</sup> The proper word for this combination is *πῆλ* (Judg. xvi. 25; 1 Sam. xviii. 6; 2 Sam. vi. 5, 21; 1 Chr. xiii. 8, xv. 29; Jer. xxx. 19), though it also includes other scenes.

<sup>4</sup> Among Romans of a late period the sentiment had expired. "Nemo fere saltat sobrius, nisi forte insanit" (Cic. *pro Mur.* 14). Perhaps, however, the standard of morals would rather lead us to expect that drunkenness was common than that dancing was rare.

Amalekites, the other the looseness of conduct into which idolatry led the Israelites (Ex. xxxii. 8; 1 Cor. x. 7; 1 Sam. xxx. 16). So among the Bedouins, native dances of men are mentioned (Lynch, *Dead Sea*, 295; Stanley, 56, 466), and are probably an ancient custom. The Hebrews, however, save in such moments of temptation, seem to have left dancing to the women. But more especially on such occasions of triumph, any woman whose nearness of kin to the champion of the moment gave her a public character among her own sex, seems to have felt that it was her

Egyptian dances. (Wilkinson.)

part to lead such a demonstration of triumph, or of welcome; so Miriam (Ex. xv. 20) and so Jephthah's daughter (Judg. xi. 34), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (comp. Judg. v. 1 with Ex. xv. 1, 20). Similarly, too, Judith (xv. 12, 13) leads her own song and dance of triumph over Holofernes. There was no such leader of the choir mentioned in the case of David and Saul. Hence whereas Miriam "answered" the entire chorus in Ex. xv. 21, the women in the latter case "answered one another as they played"

<sup>d</sup> The *תוף* was clearly the women's instrument. See the allotment of the other different instruments to men in 1 Chr. xv. 16-21, and xvi. 6, 42; comp. also the *תופות* of Ps. lxxviii. 25.

<sup>e</sup> Some commentators have been at pains to point

(1 Sam. xviii. 7), that "answer" embodying the sentiment of the occasion, and forming the burden of the song. The "coming out" of the women to do this (Judg. xi. 34; 1 Sam. xviii. 6; comp. "went out," Ex. xv. 20) is also a feature worthy of note, and implies the object of meeting, attending upon, and conducting home. So Jephthah's daughter met her father, the "women of all the cities" came to meet and celebrate Saul and David, and their host, but Miriam in the same way "goes out" before "Jehovah" the "man of war," whose presence seems implied. This marks the peculiarity of David's conduct, when, on the return of the Ark of God from its long sojourn among strangers and borderers, he (2 Sam. vi. 5-22) was himself *choragus*; and here too the women, with their timbrels<sup>d</sup> (see especially v. 5, 19, 20, 22), took an important share. This fact brings out more markedly the feelings of Saul's daughter Michal, keeping aloof from the occasion, and "looking through a window" at the scene. She should, in accordance with the examples of Miriam, &c., have herself led the female choir, and so come out to meet the Ark, and her lord. She stays with the "household" (ver. 20), and "comes out to meet" him with reproaches, perhaps feeling that his zeal was a rebuke to her apathy. It was before "the handmaids," i. e. in leading that choir which she should have led, that he had "uncovered" himself; an unkingly exposure as she thought it, which the dance rendered necessary<sup>e</sup>—the wearing merely the ephod or linen tunic. The occasion was meant to be popularly viewed in connexion with David's subjugation of various enemies and accession to the throne of Israel (see 1 Chr. xii. 23—xiii. 8); he accordingly thinks only of the honour of God who had so advanced him, and in that forgets self (comp. Müller, *de Davide ant. Arc.* Ugolini, xxxii.). From the mention of "damsels," "timbrels," and "dances" (Ps. lxxviii. 25, cxlix. 3, cl. 4), as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Saalschütz remarks (*Archaeol. der Hebr.* vol. i. p. 299), in the mention of religious revivals under Hezekiah and Josiah, no notice of them occurs; and this, although the "words," the "writing," and the "commandment of David" on such subjects, are distinctly alluded to (2 Chr. xxix. 30, xxxv. 4, 15). It is possible that the banishing of this popular element, which found its vent no doubt in the idolatrous rites of Baal and Astarte (as it certainly did in those of the golden-calf, Ex. xxxii. 19), made those efforts take a less firm hold on the people than they might have done; and that David's more comprehensive scheme might have retained some ties of feeling which were thus lost. On the other hand was doubtless the peril of the loose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivities, e. g. the feast of Tabernacles (Mishna, *Succah*, v. 3, 4), where, however, the performers were men. This was, probably, a mere following the example of David in the letter. Also

out that it was *not* the act of dancing, but the dress divested of upper robes which was the subject of remark. But clearly the "dancing with all his might" could hardly be done in the dignified costume of royalty: every Hebrew would see that the one implied the other. Comp. Ex. xxxii. 6, 25

in the earlier period of the Judges the dances of the virgins in Shiloh (Judg. xxi. 19-23) were certainly part of a religious festivity. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reproach of Michal. What the fashion or figure of the dance was is a doubtful question; nor is it likely to have lacked such variety as would adapt it to the various occasions of its use. The word **חַנּוּךְ** means to move in a ring, or round; whence in **ל. xlii. 4** we find **הַמֶּחֶלֶחֶן**, meaning a festive crowd, apparently as dancing in a ring. So **חַנּוּךְ**, whence **מְחֻלָּה**, means to turn. In modern Oriental dances a woman leads off the dance, the others then follow her with exact imitation of her artistic and graceful attitudes. A parallelism of movement is also incident to it (Schulzschütz, *ib.* p. 301). Possibly Miriam so led her countrywomen. The same writer thinks that in Cant. vi. 13, the words **מְחֻלַּת הַמְּחַנְּנִים** (A. V. "company of two armies") imply two rows of dancing girls, and that the address in the singular number, "return, return," and again in vii. 1 applies to the movements of the individual performer in a kind of *contre-danse*. The interpretation, however, does not remove the obscurities of the passage.

Dancing also had its place among merely festive amusements apart from any religious character (Jer. xxxi. 4, 13; Lam. v. 15; Mark vi. 22, Luke xv. 25). The accomplishments exhibited by Herodias's daughter seem, however, to show that Dean Treuch's remark on the last-named passage that the dancers were of course *not* the guests but hired performers is hardly to be received with strictness; although the tendency of luxury in the east has no doubt been to reduce the estimation in which the pastime, as shared in, is there held. (Children, of course, always did and always will dance (Job xxi. 11; Matt. xi. 17; Luke vii. 32). Whilst in their "dancing dervishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (*e.g.* in the Roman *Sali*) seem indigenous in many southern and eastern races from the earliest times. For further remarks Spencer, *de Saltut. vet. Hebr.*, may be consulted (Ugolini, xxx.); and, for the Greek and Roman dances, see *Dict. of Ant. SATURATIO*. [H. H.]

**DANCE.** By this word is rendered in the A. V. the Hebrew term *Machol*, **מְחֻלָּה**, a musical instrument of percussion, supposed to have been used by the Hebrews at an early period of their history. Some modern lexicographers, who regard *Machol* as synonymous with *Rakkod*, **רָקֹד** (Eccl. iii. 4), restrict its meaning to the exercise or amusement of dancing. But according to many scholars, it also signifies a musical instrument used for accompanying the dance, and which the Hebrews therefore called by the same name as the dance itself. The Septuagint generally renders *Machol* **χορδός**, "dancing;" occasionally, however, it gives a different meaning, as in Ps. xxx. 11 (Heb. Bible, ver. 12), where it is translated **χαρὰ**, "joy," and in Jer. xxxi. 4 and 14, where it is rendered **סעודת**, "assembly." The Semitic versions of the O. T. almost invariably interpret the word as a musical instrument.

On the joyous occasion when the Israelites escape from their Egyptian pursuers, and reach the Arabian

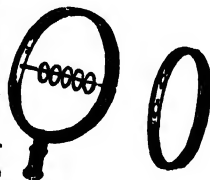

shore of the Red Sea in safety, Miriam is represented as going forth striking the **תָּמָר**, and followed by her sisters in faith, who join in "with timbrels and dances" (Ex. xv. 20). Here the sense of the passage seems to be, agreeably to the Auth. Vers., that the Hebrew women came forth to dance, and to accompany their dance by a performance on timbrels; and this is the view adopted by the majority of the Latin and English commentators. Parkhurst and Adam Clark do not share this opinion. According to the former, *Machol* is "some fistular wind-instrument of music, with holes, as a flute, pipe, or *flûte*, from **חָל**, to make a hole or opening;" and the latter says, "I know no place in the Bible where *Machol* and *Machulath* mean *dance* of any kind; they constantly signify some kind of pipe." The Targumists very frequently render *Machol* as a musical instrument. In Ex. xv. 20, Onkelos gives for *Machulath* the Aramaic word **מְחֻלָּה**, which is precisely the same employed by him in Gen. xxxi. 27 for *Cinnôr* (A. V. "harp"). The Arabic version has for *Machol* in most places **طبل**, pl. **طبول**, translated by Freytag, in his Arabic Lexicon, "a drum with either one or two faces;" and the word **ובמחלות** (Judg. xi. 34, A. V.

"and with dances") is rendered by **غناء**, "songs."

Gesenius, Fürst, and others, adopt for the most part the Septuagint rendering; but Rosenmüller, in his commentary on Ex. xv. 20, observes that, on comparing the passages in Judg. xi. 34; 1 Sam. xviii. 6; and Jer. xxxi. 4, and assigning a rational exegesis to their contexts, *Machol* must mean in these instances some musical instrument, probably of the flute kind, and principally played on by women.

In the grand Hallelujah Psalm (cl.) which closes that magnificent collection, the sacred poet exhorts mankind to praise Jehovah in His sanctuary with all kinds of music; and amongst the instruments mentioned at the 3rd, 4th, and 5th verses is found *Machol*, which cannot here be consistently rendered in the sense of dancing. Joel Bill, whose second preface (**הקדמה שנייה**) to Mendelssohn's Psalms contains the best tentative extant on the musical instruments mentioned in the Hebrew Bible, remarks: "It is evident from the passage, 'Praise Him with the *Tof* and the *Machol*,' that *Machol* must mean here some musical instrument, and this is the opinion of the majority of scholars." Mendelssohn derives *Machol* from **חלול**, "hollow," on account of its shape; and the author of *Shilte Haggyborim* denominates it **סימסרם**, which he probably intends for *κίθαρα*.

The musical instrument used as an accompaniment to dancing is generally believed to have been made of metal, open like a ring; it had many small bells attached to its border, and was played at weddings and merry-makings by women, who accompanied it with the voice. According to the author of *Shilte Haggyborim*, the *Machol* had tinkling metal plates fastened on

Musical Instruments. Dance. (Mendelssohn.)

wires, at intervals, within the circle that formed the instrument, like the modern tambourine; according to others, a similar instrument, also formed of a circular piece of metal or wood, but furnished with a handle, which the performer might so manage as to set in motion several rings strung on a metal bar, passing from one side of the instrument to the other, the waving of which produced a loud, merry sound.

Some modern critics consider *Machalath* the same with *Machol*. Gesenius, however, translates the latter "dancing," whilst the former he renders "a stringed instrument," from the root מַחֲלָה, *Aethiopic* ማለ, "to sing." [D. W. M.]

**DANIEL** (דָּנִיֵּאל, Dan. i. 6, 7, 8, &c.; Ezr. viii. 2; Neh. x. 6; 1 Chr. iii. 1; and דָּנִיֵּאל, Ezr. xiv. 14, 20; xxviii. 3), the name of three (or four) persons in the Old Testament.

1. The second son of David (Δαμιῆλ, *Alex. Δαβούλα*), "born unto him in Hebron," "of Abigail the Carmelitess" (1 Chr. iii. 1). In the parallel passage, 2 Sam. iii. 3, he is called Chilcub (כִּילְכֻב, i. e. like his father(?); Δαβούλα). For the Jewish explanation of the origin of the two names see Patrick; Bochart, *Hierozoic*, ii. 55, p. 663.

2. The fourth of "the greater prophets" (cf. Matt. xxiv. 15, προφῆται). Nothing is known of the parentage or family of Daniel. He appears, however, to have been of royal or noble descent (Dan. i. 3; cf. Joseph. *Ant.* x. 10, §1), and to have possessed considerable personal endowments (Dan. i. 4). He was taken to Babylon in "the third year of Jehoiakim (B.C. 604)," and trained for the king's service with his three companions. Like Joseph in earlier times, he gained the favour of his guardian, and was divinely supported in his resolve to abstain from the "king's meat" for fear of defilement (Dan. i. 8-16). At the close of his three years' discipline (Dan. i. 5, 18), Daniel had an opportunity of exercising his peculiar gift (Dan. i. 17) of interpreting dreams, on the occasion of Nebuchadnezzar's decree against the Magi (Dan. ii. 14 ff.). In consequence of his success he was made "ruler of the whole province of Babylon," and "chief of the governors over all the wise men of Babylon" (ii. 48). He afterwards interpreted the second dream of Nebuchadnezzar (iv. 8-27), and the handwriting on the wall which disturbed the feast of Belshazzar (v. 10-28), though he no longer held his official position among the magi (Dan. v. 7, 8, 12), and probably lived at Susa (Dan. vii. 2; cf. Joseph. *Ant.* x. 12, §7; Bochart, *Géogr. Sacr.* iii. 14). At the accession of Darius [DARIUS] he was made first of the "three presidents" of the empire (cf. 1 Esdr. iii. 9), and was delivered from the lions' den, into which he had been cast for his faithfulness to the rites of his faith (vi. 10-23; cf. Bel & Dr. 29-42). At the accession of Cyrus he still retained his prosperity (vi. 28; cf. i. 21; Bel

& Dr. 2); though he does not appear to have remained at Babylon (cf. Dan. i. 21), and in "the third year of Cyrus" (B.C. 534) he saw his last recorded vision on the banks of the Tigris (x. 1, 4). According to the Mahomedan tradition Daniel returned to Judaea, held the government of Syria, and finally died at Susa (Rosenmüller, *Schol.* p. 5, n.), where his tomb is still shown, and is visited by crowds of pilgrims. In the prophecies of Ezekiel mention is made of Daniel as a pattern of righteousness (xiv. 14, 20) and wisdom (xxviii. 3); and since Daniel was still young at that time (c. B.C. 588-584), some have thought that another prophet of the name must have lived at some earlier time (Bleek), perhaps during the captivity of Nineveh (Ewald, *Die Propheten*, ii. 560), whose fame was transferred to his later namesake. Hitzig imagines (*Vorbemerk.* §3) that the Daniel of Ezekiel was purely a mythical personage, whose prototype is to be sought in Melchizedek, and that the character was borrowed by the author of the book of Daniel as suited to his design. These suppositions are favoured by no internal probability, and are unsupported by any direct evidence. The order of the names "Noah, Daniel, and Job" (Ezr. xiv. 14) seems to suggest the idea that they represent the first and last historic types of righteousness before the law and under it, combined with the ideal type (cf. Delitzsch, p. 271). On the other hand the narrative in Dan. i. 11, implies that Daniel was conspicuously distinguished for purity and knowledge at a very early age (cf. *Hist. Sus.* 45), and he may have been nearly forty years old at the time of Ezekiel's prophecy.

Allusion has been made already to the comparison which may be instituted between Daniel and Joseph, who stand at the beginning and the close of the divine history of the Jews, as representatives of the true God in heathen courts (Auberlen, *Daniel*, p. 32, 3). In this respect the position of Daniel must have exercised a powerful influence upon the form of the revelations conveyed through him. And in turn the authority which he enjoyed renders the course of the exile and the return clearly intelligible. By station, by education, and by character, he was peculiarly fitted to fulfil the work assigned to him. He was not only a resident in a foreign land, like Jeremiah or Ezekiel, but the minister of a foreign empire, and of successive dynasties (Dan. ii. 48; vi. 28). His political experience would naturally qualify him to give distinct expression to the characteristics of nations in themselves, and not only in their relation to God's people. His intellectual advantages were as remarkable as his civil dignity. Like the great Lawgiver who was "trained in all the wisdom of the Egyptians," the great seer was trained in the secrets of Chaldean wisdom, and placed at the head of the school of the Magi (Dan. ii. 48). He was thus enabled to preserve whatever was true in the traditional teaching of the East, and to cast his revelations into

\* This date has given rise to many objections, because the fourth year of Jehoiakim is identified with the first of Nebuchadnezzar (Jer. xxv. 1). Various solutions have been proposed (cf. Kell, *Ezra*, §133, 2); but the text of Daniel itself suggests the true explanation. The second year of Nebuchadnezzar's reign (ii. 1) falls after the completion of the three years' training of Daniel which commenced with his captivity (i. 1, 5); and this is a clear indication that the expedition mentioned in i. 1, was undertaken in the last year of the reign of Nabu-

palassar, while as yet Nebuchadnezzar was not properly king. But some further difficulties remain, which appear, however, to have been satisfactorily removed by Niebuhr (*Gesch. Assur's*, 86 ff.). The date in Jer. xlv. 2, is not that of the battle of Carchemish, but of the warning of the prophet; and the threats and promises in Jer. xxv. are consistent with the notion of a previous subjection of Jerusalem to Nebuchadnezzar, which may have been accomplished without resistance (cf. Niebuhr, a. a. O. § 368 ff.).

a form suited to their special character. But though engaged in the service of a heathen prince and familiar with Oriental learning, Daniel was from the first distinguished by his strict observance of the Mosaic law (i. 8-16; cf. vi. 10, 11). In this way the third outward condition for his work was satisfied, and at the close of the exile he offered a pattern of holiness for the instruction of the Dispersion of after times. (Cf. Auberlen, *Daniel*, 24, &c.)

The exact meaning of the name is disputed. The full form (דָּנִיֵּאל) is probably more correct, and in this the *yod* appears to be not merely formative, but a pronominal suffix (as צְהִיֵּאל, *so that the sense will be God is my Judge* (C. B. Michaelis ap. Rosenmüller, *Schol.* §1). Others interpret the word *the Judge of God*, and the use of a *yod* formative is justified by the parallel of Melchizelek, &c. (Hitzig, §2). This interpretation is favoured by the Chaldaean name, Belteshazzar (בֶּלְשַׁצְצָר, i. 7, i. e. *the prince of Bel*; *Theod.* LXX.; *Balthazar*; *Vulg.* Baltassar), which was given to Daniel at Babylon (Dan. i. 7), and contains a clear reference to his former name. Hitzig's interpretation ("Pala tschigara = *Ernährer und Verzehrer*") has nothing to recommend it. Such changes have been common at all times; and for the simple assumption of a foreign name compare Gen. xli. 45; Ez. i. 11, v. 14 (Sheshbazzar).

Various apocryphal fragments attributed to Daniel are collected by Fabricius (*Cod. Pseud. V. T.* i. 1124), but it is surprising that his name in later times seems to have been obscured (Hottinger, *Hist. Orient.* 92). Cf. Epiph. *Vit. Dom.* ii. p. 243, ed. Petav.; *Vit. Dan.* ap. Fabric.; Joseph. *Ant.* x. 11.

3. A descendant of Ithamar, who returned with Ezra to Judaea in the time of "Artaxerxes." [ARTAXERXES.] (Ezr. viii. 2.)

4. A priest who sealed the covenant drawn up by Nehemiah B.C. 445 (Neh. x. 6). He is probably the same as (3); and is confounded with the prophet in the apocryphal addenda to Daniel: Dan. xiv. 1 (*LXX.*, not *Theotot.*). [B. F. W.]

**DANIEL, THE BOOK OF**, is the earliest example of apocalyptic literature, and in a great degree the model, according to which all later apocalypses were constructed. In this aspect it stands at the head of a series of writings in which the deepest thoughts of the Jewish people found expression after the close of the prophetic era. The book of Enoch [ENOCH], the Jewish Sibyllines, and the fourth book of Ezra [2 ESDRAS], carry out with varied success and in different directions, the great outlines of universal history which it contains; and the "Revelation" of Daniel received at last its just completion in the Revelation of St. John. Without an inspired type it is difficult to conceive how the later writings could have been framed; and whatever judgment be formed as to the composition of the book, there can be no doubt that it exercised a greater influence upon the early Christian Church than any other writing of the Old Testament, while in the Gospels it is specially distinguished by the emphatic quotation of the Lord (Matt. xxiv. 15, *ὁ ἄγγελος διὰ Δανιὴλ τοῦ προφήτου*. . . *ὁ ἀναγινώσκων νοείτω*. . .).

1. In studying the book of Daniel it is of the utmost importance to recognise its apocalyptic character. It is at once an end and a beginning, the last form of prophecy and the first "philosophy of history." The nation is widened into the world:

the restored kingdom of Judah into a universal kingdom of God. To the old prophets Daniel stands, in some sense, as a commentator (Dan. ix. 2-19): to succeeding generations, as the herald of immediate deliverance. The form, the style, and the point of sight of prophecy, are relinquished upon the verge of a new period in the existence of God's people, and fresh instruction is given to them suited to their new fortunes. The change is not abrupt and absolute, but yet it is distinctly felt. The eye and not the ear is the organ of the Seer: visions and not words are revealed to him. His utterance is clothed in a complete and artificial shape, illustrated by symbolic imagery and pointed by a specific purpose. The divine counsels are made known to him by the ministry of angels (vii. 16, viii. 16, ix. 21), and not by "the Word of the Lord." The seer takes his stand in the future rather than in the present, while the prophet seized on the elements of good and evil which he saw working around him and traced them to their final issue. The one looked forward from the present to the great "age to come;" the other looked backward from "the last days" to the trials in which he is still placed. In prophecy the form and the essence, the human and divine were inseparably interwoven; in revelation the two elements can be contemplated apart, each in its greatest vigour,—the most consummate art, and the most striking predictions. The Babylonian exile supplied the outward training and the inward necessity for this last form of divine teaching; and the prophetic visions of Ezekiel form the connecting link between the characteristic types of revelation and prophecy. (Cf. Lüke, *Versuch*, i. 17 ff.; Hitzig, *Daniel*, *Vorbem.* §9; Hilgenfeld, *Die Jud. Apok.*, i. ff.) [DANIEL.]

2. The language of the book, no less than its general form, belongs to an era of transition. Like the book of Ezra, Daniel is composed partly in the vernacular Aramaic (Chaldee), and partly in the sacred Hebrew. The introduction (i.—ii. 4 a) is written in Hebrew. On the occasion of the "Syriac" (אַרַמִּית, *συριακή* *syriace*, i. e. Aramaic) answer of the Chaldeans, the language changes to Aramaic, and this is retained till the close of the seventh chapter (ii. 4 b—vii.). The personal introduction of Daniel as the writer of the text (viii. 1) is marked by the resumption of the Hebrew, which continues to the close of the book (viii.—xii.). The character of the Hebrew bears the closest affinity to that of Ezekiel and Habakkuk, or in other words to those prophets who lived nearest to the assumed age of Daniel; but it is less marked by peculiar forms and corruptions than that of Ezekiel. The Aramaic, like that of Ezra, is also of an earlier form (cf. Maurer, *Comm. in Dan.* 87) than exists in any other Chaldaic document, but as the Targums—the next most ancient specimens of the language—were not committed to writing till about the Christian era, this fact cannot be insisted on as a proof of remote antiquity. It is, however, worthy of notice that J. D. Michaelis affirmed, on purely linguistic grounds, that the book was no late compilation, though he questioned the authenticity of some part of it (c. iii.—vii.; cf. Keil, *Lehr. d. Einl.* §135, n. 4). In addition to these two great elements—Aramaic and Hebrew—the book of Daniel contains traces of other languages which indicate the peculiar position of the writer. The use of Greek technical terms (cf. §10) marks a period when commerce had already united Persia and Greece; and the occurrence of peculiar words which

admit of an explanation by reference to Arian and not to Semitic roots (Delitzsch, p. 274) is almost inexplicable on the supposition that the prophecies are a Palestinian forgery of the Maccabean age.

3. The book is generally divided into two nearly equal parts. The first of these (i.—vi.) contains chiefly historical incidents, while the second (vii.—xii.) is entirely apocalyptic. This division is further supported by the fact that the details of the two sections are arranged in order of time, and that the commencement of the second section falls earlier than the close of the first, as if the writer himself wished to mark the division of subject. But on the other hand this division takes no account of the difference of language, nor of the change of person at the beginning of c. viii. And though the first section is mainly historical, yet the vision of c. vii. finds its true foundation and counterpart in c. ii. From these circumstances it seems better to divide the book (Auberlen, pp. 36 ff.) into three parts. The first chapter forms an introduction. The next six chapters (ii.—vii.) give a general view of the progressive history of the powers of the world, and of the principles of the divine government as seen in events of the life of Daniel. The remainder of the book (viii.—xii.) traces in minutest detail the fortunes of the people of God, as typical of the fortunes of the Church in all ages. The second section is distinguished by a remarkable symmetry. It opens with a view of the great kingdoms of the earth revealed to a heathen sovereign, to whom they appeared in their outward unity and splendour, and yet devoid of any true life (a metal colossus); it closes with a view of the same powers as seen by a prophet of God, to whom they were displayed in their distinct characters, as instinct with life, though of a lower nature, and displaying it with a terrible energy of action (*Onpfa*, four beasts). The image under which the manifestation of God's kingdom is foreshown corresponds exactly with this twofold exhibition of the worldly powers. "A stone cut without hands," "becoming a great mountain and filling the whole earth" (Dan. ii. 34, 35)—a rock and not a metal—is contrasted with the finite proportions of a statue moulded by man's art, as "the Son of man," the representative of humanity, is the true Lord of that lower creation (Gen. i. 30) which symbolizes the spirit of mere earthly dominions (Dan. vii. 13, 14). The intermediate chapters (iii.—vi.) exhibit a similar correspondence, while setting forth the action of God among men. The deliverance of the friends of Daniel from the punishment to which they were condemned for refusing to perform an idolatrous act at the command of Nebuchadnezzar (ch. iii.), answers to the deliverance of Daniel from that to which he was exposed by continuing to serve his God in spite of the edict of Darius (ch. vi.); and in the same way the degradation, the repentance, and the restoration of Nebuchadnezzar (ch. iv.) forms a striking contrast to the sacrilegious pride and death of Belshazzar (ch. v. 22-31). The arrangement of the last section (viii.—xii.) is not equally distinct, though it offers traces of a similar disposition. The description of the progress of the Grecian power in c. viii. is further developed in the last vision (x.—xii.), while the

last chapter appears to carry on the revelation to the first coming of Messiah, in answer to the prayer of Daniel.

4. The position which the book of Daniel occupies in the Hebrew Canon seems at first sight remarkable. It is placed among the Holy writings (*Kethuvim*, *ḥolydypapha*) between Esther and Ezra, or immediately before Esther (cf. Hody, *De Bibl. text.* p. 644, 5), and not among the prophets. This collocation, however, is a natural consequence of the right apprehension of the different functions of the prophet and seer. It is not, indeed, certain at what time the triple division of the Scriptures which is preserved in the Hebrew Bibles was first made; but the characteristics of the classes show that it was not based on the supposed outward authority, but on the inward composition of the books [CANON]. Daniel, as the truth has been well stated, had the spirit but not the work of a prophet; and as his work was a new one, so was it carried out in a style of which the Old Testament offers no other example. His Apocalypse is as distinct from the prophetic writings as the Apocalypse of St. John from the Apostolic epistles. The heathen count is to the one seer what the isle of Patmos is to the other, a place of exile and isolation, where he stands alone with his God, and is not like the prophet active in the midst of a struggling nation (Auberlen, 34).<sup>b</sup>

5. The unity of the book in its present form, notwithstanding the difference of language, is generally acknowledged (De Wette, *Eind.* §256; Hitzig, §4).<sup>c</sup> Still there is a remarkable difference in its internal character. In the first seven chapters Daniel is spoken of *historically* (i. 8-21, ii. 14-49, iv. 8-27, v. 13-29, vi. 2-28, vii. 1, 2): in the last five he appears *personally* as the writer (vii. 15-28, viii. 1-ix. 22, x. 1-19, xii. 5). This peculiarity, however, is not without some precedents in the writings of the earlier prophets (*e. g.* Is. vii. 3, xx. 2), and the seventh chapter prepares the way for the change; for while Daniel is there spoken of in the third person (vii. 1, 2), the substance of the chapter is given in his words, in the first person (vii. 2, 15, 28). The cause of the difference of person is commonly supposed to lie in the nature of the case. The prophet narrates symbolic and representative events historically, for the event is its own witness; but revelations and visions need the personal attestation of those to whom they are communicated. It is, however, more probable that the peculiarity arose from the manner in which the book assumed its final shape (§11).

6. Allusion has been made already to the influence which the book exercised upon the Christian Church. Apart from the general type of Apocalyptic composition which the Apostolic writers derived from Daniel (2 Thess. ii.; *Rev. passim*; cf. Matt. xxvi. 64, xxi. 44?), the New Testament incidentally acknowledges each of the characteristic elements of the book, its miracles (Heb. xi. 33, 34), its predictions (Matt. xxiv. 15), and its doctrine of angels (Luke i. 19, 26). At a still earlier time the same influence may be traced in the Apocrypha. The book of Baruch [BARUCH] exhibits so many coincidences with Daniel, that by some

<sup>b</sup> The Jewish doctors of later times were divided as to the degree of the inspiration of Daniel. Abarbanel maintained against Maimonides that he was endowed with the highest prophetic power (*Pharise. Cod. Pseudep.* V. T. i. 897, n.).

<sup>c</sup> Eichhorn attributed ch. ii.-vi., vii.-xii., to different authors; and Bertholdt supposed that each section was the work of a distinct writer, though he admitted that each successive writer was acquainted with the composition of his predecessors, recognizing in this way the unity of the book (*Eind.*).

the two books have been assigned to the same author (cf. Fritzsche, *Handb. zu d. Apok.* i. 173); and the first book of Maccabees represents Mattathias quoting the marvellous deliverances recorded in Daniel, together with those of earlier times (1 Macc. ii. 59, 60), and elsewhere exhibits an acquaintance with the Greek version of the book (1 Macc. i. 54 = Dan. ix. 27). The allusion to the guardian angels of nations, which is introduced into the Alexandrine translation of the Pentateuch (Deut. xxxii. 8; LXX.), and recurs in the Wisdom of Sirach (Ecclesi. xvii. 17), may have been derived from Dan. x. 21, xii. 1, though this is uncertain as the doctrine probably formed part of the common belief. According to Josephus (*Ant.* xi. 8, §4) the prophecies of Daniel gained for the Jews the favour of Alexander [ALEXANDER THE GREAT]; and whatever credit may be given to the details of his narrative, it at least shows the unquestioning belief in the prophetic worth of the book which existed among the Jews in his time.

7. The testimony of the Synagogue and the Church gave a clear expression to the judgment implied by the early and authoritative use of the book, and pronounced it to contain authentic prophecies of Daniel, without contradiction, with one exception, till modern times. Porphyry alone († c. 305 A.D.) assailed the book, and devoted the 12th of his fifteen Discourses against Christians (*ἁγῶν κατὰ Χριστιανῶν*) to a refutation of its claims to be considered a prophecy. "The history," he said, "is true up to the date of Antiochus Epiphanes, and false afterwards; therefore the book was written in his time" (Hieron. *Præf. in Dan.*). The argument of Porphyry is an exact anticipation of the position of many modern critics, and involves a twofold assumption, that the whole book ought to contain predictions of the same character, and that definite predictions are impossible. Externally the book is as well attested as any book of Scripture, and there is nothing to show that Porphyry urged any historical objections against it; but it brings the belief in miracle and prediction, in the divine power and foreknowledge as active among men, to a startling test, and according to the character of this belief in the individual must be his judgment upon the book.

8. The history of the assaults upon the prophetic worth of Daniel in modern times is full of interest. In the first instance doubts were raised as to the authorship of the opening chapters, i.—vii. (Spinoza, Newton), which are perfectly compatible with the fullest recognition of their canonicity. Then the variations in the LXX. suggested the belief that cc. iii.—vi. were a later interpolation (J. D. Michaelis). As a next step the last six chapters only were retained as a genuine book of Scripture (Eichhorn, 1st and 2nd edits.); and at last the whole book was rejected as the work of an impostor, who lived in the time of Antiochus Epiphanes (Corrodi, 1783. Hitzig fixes the date more exactly from 170 B.C. to the spring of 164 B.C.). This last opinion has found, especially in Germany, a very wide acceptance, and Lücke ventures to pronounce it "a certain result of historical criticism."

9. The real grounds on which most modern critics rely in rejecting the book, are the "fabu-

lousness of its narratives" and "the minuteness of its prophetic history." "The contents of the book," it is said, "are irrational and impossible" (Hitzig, §5). It is obvious that it is impossible to answer such a statement without entering into general views of the Providential government of the world. It is admitted that the contents of the book are exceptional and surprising; but revelation is itself a miracle, however it be given, and essentially as inconceivable as any miracle. There are times, perhaps, when it is required that extraordinary signs should arrest the attention of men and fix their minds upon that Divine Presence which is ever working around them. Prodiges may become a guide to nature. Special circumstances may determine, and, according to the Bible, do determine, the peculiar form which the miraculous working of God will assume at a particular time; so that the question is, whether there is any discernible relation between the outward wonders and the moral condition of an epoch. Nor is it impossible to apply this remark to the case of Daniel. The position which he occupied [DANIEL] was as exceptional as the book which bears his name. He survived the exile and the disappointment which attended the first hopes of the Jews. The glories which had been connected with the return in the foreshortened vision of earlier prophets were now felt to be far off, and a more special revelation may have been necessary as a preparation for a period of silence and conflict.<sup>4</sup> The very character of the Babylonian exile seems to have called for some signal exhibition of divine power. As the first exodus was distinguished by great marvels, it might appear natural that the second should be also (cf. Mic. vii. 15; Delitzsch, p. 272, &c.). National miracles, so to speak, formed the beginning of the theocracy: personal miracles, the beginning of the church. To speak of an "aimless and lavish display of wonders" is to disregard the representative significance of the different acts, and the relation which they bore to the future fortunes of the people. A few era was inaugurated by fresh signs. The Jews, now that they are left among the nations of the world, looked for some sure token that God was able to deliver them and work out His own purposes. The persecution of Antiochus completed the teaching of Daniel; and the people no longer sought without that which at length they had found within. They had withstood the assault of one typical enemy, and now they were prepared to meet all. The close of special predictions coincided with the consolidation of the national faith. [ANTIOCHUS EPIPH.]

10. The general objections against the "legendary" miracles and specific predictions of Daniel are strengthened by other objections in detail, which cannot, however, be regarded in themselves as of any considerable weight. Some of these have been already answered incidentally. Some still require a short notice, though it is evident that they are often afterthoughts, the results and not the causes of the rejection of the book. Not only, it is said, is the book placed among the Hagiographa, but Daniel is omitted in the list of prophets given in the Wisdom of Sirach; the language is corrupted by an intermixture of Greek words; the details are essentially unhistorical; the doctrinal and moral teaching betrays a late date.

<sup>4</sup> The special prophecies of Balaam (Num. xxiv. 24) and Isaiah (xliv., xlv.) centre in Daniel (cf. Dan. xi. 30); and the prediction of Balaam offers a re-

markable parallel to those of Daniel, both from their particularity, and from the position which the prophet occupied (cf. Delitzsch, p. 273).

In reply to these remarks, it may be urged, that if the book of Daniel was already placed among the Hagiographa at the time when the Wisdom of Sirach was written, the omission of the name of Daniel (Ecclus. xlix.) is most natural, and that under any circumstances the omission is not more remarkable than that of Ezra and the twelve lesser prophets, for xlix. 10 is probably an interpolation intended to supply a supposed defect. Nor is the mention of Greek musical instruments (iii. 5, 7, 10, קִיְתָרִים *kithara*, סַבְכָּא *sambuka*, סוֹמְפוֹנִיָּה *somphonia*, פְּסַנְתֵּרִין *psalterion*), for these words only can be shown to be derived from the Greek (De Wette, *Eintl.* 255 h.), surprising at a time when the intercourse of the East and West was already considerable, and when a brother of Alcæus (c. 600-500 B.C.) had gained distinction "at the farthest end of the world, aiding the Babylonians" (Brandis, in Delitzsch, p. 274; *Ale. Frag.* 33, Bergk.). Yet further the scene and characters of the book are *Oriental*. The colossal image (סִלְשָׁן, iii. 1, not necessarily a human figure; the term is applied familiarly to the cross: Buxtf. *Lez. Rabb.* s. v.), the fiery furnace, the martyr-like boldness of the three confessors (iii. 16), the decree of Darius (vi. 7), the lions' den (vi. 7, 19, לֵבַיִת, the demand of Nebuchadnezzar (ii. 5), his obeisance before Daniel (ii. 46), his sudden fall (iv. 38; cf. Euseb. *Præp. Ev.* ix. 41; *Jos. c. Ap.* i. 20), are not only consistent with the nature of Eastern life, but in many instances directly confirmed by other evidence (cf. DANIEL II. and DARIUS THE GREAT for the difficulties of i. 1, ii. 1, v. 31). In doctrine, again, the book is closely connected with the writings of the Exile, and forms a last step in the development of the ideas of Messiah (vii. 13, &c.), of the resurrection (xii. 2, 3), of the ministry of angels (viii. 16, xii. 1, &c.), of personal devotion (vi. 10, 11, i. 8), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord.

Generally it may be said that while the book presents in many respects a startling and exceptional character, yet it is far more difficult to explain its composition in the Maccabaean period than to connect the peculiarities which it exhibits with the exigencies of the Return. It appears as a key to the later history and struggles of the Jews, and not as a result from them. The peculiarities of language, the acquaintance with Eastern manners and history, which is seen more clearly as our knowledge widens, the reception into the canon, the phenomena of the Alexandrine version, all point in the same direction; and a sounder system of interpretation, combined with a more worthy view of the divine government of men and nations, will probably do much to remove those undefined doubts as to the inspired character of the Revelation which naturally arise at first in the minds of thoughtful students.

11. But while all historical evidence supports the canonicity of the book of Daniel, it does not follow that the recognition of the unity and authority of the book is necessarily connected with the belief that the whole is to be assigned to the authorship of Daniel. According to the Jewish tradition (*Bara Bathra*, f. 146) "the books of Ezekiel, the twelve minor prophets, Daniel and Esther, were written (i. e. drawn up in their present form) by the mouth of the great synagogue, and in the case of Daniel the tradition is supported by strong internal evi-

dence. The manner in which Daniel is spoken of (i. 17, 19, 20, v. 11, 12; the title in ix. 23, xii. is different) suggests the notion of another writer; and if Daniel wrote the passages in question, they cannot be satisfactorily explained by 1 Cor. xv. 10; 2 Cor. xi. 5, 6, xii. 2 (Keil, §136), or by the consciousness of the typical position which he occupied (Auberlen, p. 37). The substantial authorship of a book of Scripture does not involve the subordinate work of arrangement and revision; and it is scarcely conceivable that a writer would purposely write one book in two languages, though there may have been an obvious reason why he should treat in separate records of events of general history in the vernacular dialect, and of the special fortunes of God's people in Hebrew. At the return we may suppose that these records of Daniel were brought into one whole, with the addition of an introduction and a fuller narrative,\* when the other sacred writings received their final revision. The visions themselves would be necessarily preserved in their original form, and thus the later chapters (vii.—xii.) exhibit no traces of any subsequent recension, with the exception, perhaps, of two introductory verses, vii. 1, x. 1.

12. The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the traditional view, which appears as early as the fourth book of Ezra [2 ESDRAS] and the epistle of Barnabas (c. 4), the four empires described in cc. ii. vii. are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter (xi. 31 ff.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syrian kings must, however, convince every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the eleventh chapter forms a history of the struggles of the Jewish church with the Greek powers up to the death of its great adversary (xi. 45). This conflict, indeed, has a typical import, and fore-shows in its characteristic outlines the abiding and final conflict of the people of God and the powers of evil, so that the true work of the interpreter must be to determine historically the nature of each event signalized in the prophetic picture, that he may draw from the past the lesson of the future. The traditional interpretation of "the four empires" seems to spring from the same error as the other, though it still finds numerous advocates (Hofmann, Auberlen, Keil, Hävernick, Hengstenberg, and most English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict which has followed the first Advent formed no place in the anticipations of the first Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory which took its rise in a state of thought which experience has proved false. It is a still more fatal objection to this interpretation that it destroys the

\* The letter of Nebuchadnezzar (c. iv.) appears to present clear traces of the interweaving of a commentary with the original text.

great idea of a cyclic development of history which lies at the basis of all prophecy. Great periods (*aiōnes*) appear to be marked out in the fortunes of mankind which answer to another, so that that divine utterance which receives its first fulfilment in one period, receives a further and more complete fulfilment in the corresponding part of some later period. Thus the first coming of Christ formed the close of the last age, as His second coming will form the close of the present one. The one event is the type and, as it were, the spring of the other. This is acknowledged with regard to the other prophecies, and yet the same truth is not applied to the revelations of Daniel, which appear then first to gain their full significance when they are seen to contain an outline of all history in the history of the nations which ruled the world before Christ's coming. The first Advent is as much a fulfilment of the visions of Daniel as of those of the other prophets. The four empires precede the coming of Messial and pass away before him. At the same time their spirit survives (cf. vii. 12), and the forms of national existence which were developed on the plains of Mesopotamia again reproduce themselves in later history. According to this view the empire of Daniel can be no other than those of the Babylonians, Medes, Persians, and Greeks, who all placed the centre of their power at Babylon, and appear to have exhibited on one stage the great types of national life. The Roman power was at its height when Christ came, but the Egyptian kingdom, the last relic of the empire of Alexander, had just been destroyed, and thus the "stone cut without hands struck the feet of the image," and Christianity destroyed for ever the real supremacy of heathen dominion. But this first fulfilment of the vision was only inchoative, and the correlatives of the four empires must be sought in post-Christian history. The corresponding symbolism of Babylon and Rome is striking at first sight, and other parallels may be drawn. The Byzantine empire, for instance, "inferior" to the Roman (Dan. ii. 39) may be compared with that of the Medes. The Teutonic races with their divided empire recall the image of Persia (vii. 6). Nor is it difficult to see in the growing might of the northern powers, a future kingdom which may rival in terrible energy the conquests of Alexander. Without insisting on such details as these, which still require careful examination, it appears that the true interpretation of Daniel is to be sought in the recognition of the principle which they involve. In this way the book remains a "prophecy," while it is also a "revelation;" and its most special predictions acquire an abiding significance.<sup>1</sup>

13. There is no Chaldean translation of Daniel, and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of confusing the original text with the paraphrase; but on the other hand the whole book has been published in Hebrew. The Greek version has undergone singular changes. At an early time the LXX. version was supplanted in

the Greek Bibles by that of Theodotion,<sup>2</sup> and in the time of Jerome the version of Theodotion was generally "read by the Churches" (c. *Ruffin.* ii. 33; *Præf. in Comm.* Illud quoque lectorem admonet, Daniele non juxta LXX. interpretes sed juxta . . . Theodotionem ecclesias legere . . .) This change, for which Jerome was unable to account (hoc cur acceperit nescio, *Præf. in Vers. Dan.*), may have been made in consequence of the objections which were urged against the corrupt LXX. text in controversy with Jews and heathen. The LXX. version was certainly very unfaithful (Hieron. *l. c.*); and the influence of Origen, who preferred the translation of Theodotion (Hieron. in *Dan.* iv. 6), was probably effectual in bringing about the substitution (cf. Cradner, *Britt.* ii. 256 ff.) In the course of time, however, the version of Theodotion was interpolated from the LXX., so that it is now impossible to recover the original text. [DANIEL, APOCRYPHAL ADDITIONS TO.] Meanwhile the original LXX. translation passed entirely out of use, and it was supposed to have been lost till the last century, when it was published at Rome from a *Codex Chisianus* (*Daniel secundum LXX.* . . . Romæ, 1772, ed. P. de Magistris), together with that of Theodotion, and several illustrative essays. It has since been published several times (ed. Michaelis, Gotting. 1774; ed. Segar, 1775; Iahn, 1845), and lastly by Tischendorf in the second edition of his Septuagint. Another recension of the text is contained in the Syro-Hexaplaric version at Milan (ed. Bugatus, 1788), but a critical comparison of the several recensions is still required.

14. The commentaries on Daniel are very numerous. The Hebrew commentaries of R. Saadiah Haggæon († 942), Rashe († c. 1105), and Aben Ezra († c. 1167), are printed in the great Rabbinic Bibles of Bomberg and Basle. That of Abarbanel († c. 1507) has been printed separately several times (*Amstelaed.* 1647, 4to); and others are quoted by Rosenmüller, *Scholæ*, pp. 39, 40. Among the patristic commentaries the most important are those of Jerome (vol. v. ed. Migne), who noticed especially the objections of Porphyry. Theodoret (ii. 1053 ff. ed. Schulze), and Ephrem Syrus (*Op. Syr.* ii.; Romæ, 1740). Considerable fragments remain of the commentaries of Hippolytus (collected in Migne's edition, Paris, 1857) and Polychronius (Mai, *Script. Vct. Nov. Coll.* vol. i.); and Mai has published (l. c.) a catena on Daniel, containing fragments of Apollinarius, Athanasius, Basil, Eusebius, and many others. The chief reformers, Luther (*Auslegung d. Proph. Dan.* 1530-1546; *Op. Germ.* vi. Ed. Walch), Oecolampadius (*In Dan. libri duo*, Basil. 1530), Melancthon (*Comm. in Dan.* Vitemb. 1543), and Calvin (*Prælect. in Dan.* Genevæ, 1563, &c.; in French, 1565; in English, 1852-3), wrote on Daniel; and Rosenmüller enumerates nearly fifty other special commentators, and his list now requires considerable additions. The combination of the Revelations of Daniel and St. John (Sir I. Newton, *Observations upon the Prophecies.* &c.,

<sup>1</sup> An example of the recurrent and advancing completion of the predictions of Daniel occurs in Matt. xxiv. 15, compared with 1 Mac. i. 54. The same truth is also implied in the interpretation of "the seventy sevens," as springing out of the "seventy" (years) of Jeremiah. On this there are some good remarks in Browne's *Ordo Saeculorum*, though his interpretation of the four empires as signifying the Babylonian,

Grecian, Roman, and some future empire (pp. 675 ff.), seems very unnatural. The whole force of his argument (after Ben Ezra and Maitland) lies in the proof that the Roman was not the fourth empire.

<sup>2</sup> The version bears in the tetraplar text the singular title, τὸ Εἰς ἑπτὰ ἑκατὸν Δανιήλ. Ὡς is the term which Daniel applies to the angels, "watchers" (Dan. iv. 13, 17, 23). Cf. *Daniel*, sec. LXX. 125 ff.

Lond. 1733; M. F. Roos, *Ausl. d. Weissag. Dan. u. s. v.* Leipz. 1771) opened the way to a truer understanding of Daniel; but the edition of Bertholdt (*Daniel, aus dem Hebr.-Aram. neu übersetzt und erklärt*, u. s. v. Erlangen, 1806-8), in spite of all its grave faults, marks the beginning of a new era in the study of the book. Bertholdt was decidedly unfavourable to its authenticity; and he was followed on the same side by von Lengerke (*D. B. Dan. verd. u. ausgel.* Königsb. 1835). Maurer (*Comm. Gramm. Crit.* ii. Lips. 1838) and Hitzig (*Kurzegef. Exeg. Handb.* Leipz. 1850), whose commentary is among the worst specimens of supercilious criticism which his school has produced. On the other side the commentary of Hävernick (*Comm. üb. d. B. Dan.* Hamb. 1832) is the most complete, though it leaves much to be desired. Auberlen (*Der Proph. Dan. u. d. Offenbarung Joh. u. s. v.* 2te Aufl. Basel, 1857, translated into English from the 1st ed. by A. Saphir, 1856) has thrown considerable light upon the general construction and relations of the book. Cf. Hofmann, *Weissag. u. Erfüllung*, i. 276 ff. The question of the authenticity of the book is discussed in most of the later commentaries; and specially by Hengstenberg (*Die Authentie d. Dan. . . . erweisen*, 1831, translated by E. B. Pratten, Edinb.), Hävernick (*Neue krit. Untersuch.* Hamb. 1838), Delitzsch (*Herzog's Encyclop.* s. v. 1854), Keil (*Lehrb. d. Einl. in d. A. T.* Frankf. 1853), Davidson (*Introduction to the O. T.* ii. Lond. 1846), who maintain the affirmative; and by Bleek (*Berl. Theolog. Zeitschr.* iii. 1822), Bertholdt (*Einleit.* Erlang. 1814), Lücke (*Versuch einer vollständ. Einl. u. s. v.* 2te. Aufl. Bonn, 1852), De Wette (*Einleit.* 7te. Aufl. Berl. 1852), who deny its authenticity. Cf. Ewald, *Die Proph. d. Alt. Bund.* ii. 559 ff. Among English works may be mentioned the Essays of T. R. Birks—*The four prophetic Empires*, &c., 1844, and *The two later Visions of Daniel*, &c., 1846; of E. B. Elliott, *Horae Apocalypticæ*, 1844; of S. P. Tregelles, *Remarks on the prophetic Visions of Daniel*, 1852; and the *Commentary* of Stuart (Boston, 1850). [B. F. W.]

**DANIEL, APOCRYPHAL ADDITIONS TO.** The Greek translations of Daniel, like that of Esther, contain several pieces which are not found in the original text. The most important of these additions are contained in the Apocrypha of the English Bible under the titles of *The Song of the three Holy Children*, *The History of Susannah*, and *The History of . . . Bel and the Dragon*.

1. a. The first of these pieces is incorporated into the narrative of Daniel. After the three confessors were thrown into the furnace (Dan. iii. 23), Azarias is represented praying to God for deliverance (*Song of Three Children*, 3-22); and in answer the angel of the Lord shields them from the fire which consumes their enemies (23-27), whereupon "the three, as out of one mouth," raise a triumphant song (29-68), of which a chief part (35-66) has been used as a hymn (*Benedicite*) in the Christian Church since the 4th century (*Rufin. Apol.* ii. 35; cf. *Concil. Tolet.* iv. Can. 14). Like several similar fragments, the chief parts of this composition are given at the end of the Psalter in the Alexandrine MS. as separate psalms, under the titles "The prayer of Azarias" and "The hymn of our Fathers;" and a similar arrangement occurs in other Greek and Latin Psalters.

b. The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. *The History of Susanna* (or *The judgment of Daniel*) is generally found at the beginning of the book (Gk. MSS. *Vet. Lat.*); though it also occurs after the 12th chapter (*Vulg. ed. Compl.*). *The History of Bel and the Dragon* is placed at the end of the book; and in the LXX. version it bears a special heading as "part of the prophecy of Habakkuk" (ἐκ προφητείας Ἀμβακού υἱοῦ Ἰησοῦ ἐκ τῆς φυλῆς Λευί).

2. The additions are found in both the Greek texts—the LXX. and Theodotion, in the Old Latin and Vulgate, and in the existing Syriac and Arabic versions. On the other hand there is no evidence that they ever formed part of the Hebrew text, and they were originally wanting in the Syriac (Polychronius, ap. Mai, *Script. Vett. Nov. Coll.* i. p. 113, says of the hymn expressly *ὅτι κείνα ἐν τοῖς Ἰβραϊκοῖς ἢ ἐν τοῖς συριακοῖς βιβλίοις*). From the LXX. and Vulgate the fragments passed into common use, and they are commonly quoted by Greek and Latin fathers as parts of Daniel (Clement, *Alex. Ecl. proph.* i.; Orig. *Ep. ad Afric.*; Tertull. *de Pudic.* 17, &c.), but rejected by those who adhered to the Hebrew canon. Jerome in particular called attention to their absence from the Hebrew Bible (*Praef. in Dan.*), and instead of any commentary of his own adds shortly Origen's remarks "on the fables of Bel and Snsanna" (*Comm. in Dan.* xiii. 1). In a similar manner he notices shortly the Song of the Three Children, "lest he should seem to have overlooked it" (*Comm. in Dan.* iii. 23).

3. Various conjectures have been made as to the origin of the additions. It has been supposed that they were derived from Aramaic originals (Wette, *Einl.* ii. 2, Kap. 8, gives the arguments at length), but the intricate evidence is wholly insufficient to establish the point. The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (cf. Fritzsche, *Exeg. Handb. zu den Apok.* i. 121). The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragon seems like a strange exaggeration of the record of the deliverance of Daniel (Dan. vi.), which may naturally have formed the basis of different legends. Nor is it difficult to see in the history of Susanna a pointed allusion to the name of the prophet, though the narrative may not be wholly fictitious.

4. The LXX. appears to be the original source from which all the existing recensions of the fragments were derived (cf. Hody, *de Bibl. text.* p. 583). Theodotion seems to have done little more than transcribe the LXX. text with improvements in style and language, which are considerably greater in the appended narratives than in the Song incorporated into the canonical text. Thus while the history of Susanna and Bel and the Dragon contain large additions which complete and embellish the story (e. g. *Hist. Sus.* vv. 15-18; 20, 21; 24-27; 46-47, 49, 50; *Bel & Dr.* vv. 1, 9-13; Eichh. pp. 431 ff.), the text of the Song is little more than a repetition of that of the LXX. (cf. De Magistris, *Daniel*, &c., pp. 234 ff.; Eichh. *Einl.*, in *d. Apok. Schrift.* 422 ff.). The Polyglott-Syriac, Arabic and Latin versions are derived from Theodo-

tion; and the Hexaplar-Syriac from the LXX. (Eichh. 430, &c.).

5. The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (cf. Orig. *Ep. ad Afric.* §§7, 8; Bochart, *Hieroz.* iii. 3; Eichhorn, 446, &c.); just as the change which Theodotus introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalising process through which the legends passed (cf. Delitzsch, *De Hübneri vitâ et actate*, 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions; for though the stories cannot be regarded as mere fables, it is evident that a moral purpose determined the shape which they assumed. A later age found in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted to infidelity by Jewish and Pagani adversaries, and lifting up her voice to God in the midst of persecution (Hippol. *In Susann.* pp. 689 ff. ed. Migne). [B. F. W.]

**DAN'NAH** (דַּנְנָה; *Penny*; *Danna*), a city in the mountains of Judah (Josh. xv. 49), and, from its mention with Debir and Socoh, probably south, or south-west of Hebron. No trace of its name has been discovered. [G.]

**DAPHNE** (Δάφνη), a celebrated grove and sanctuary of Apollo, near Antioch in Syria [ANTIOCH]. Its establishment, like that of the city, was due to Seleucus Nicator. The distance between the two places was about 5 miles, and in history they are associated most intimately together. Just as Antioch was frequently called 'A. ἐν Δάφνῃ, and ἡ πόλις Δάφνης, so conversely we find Daphne entitled Δ. ἡ πόλις Ἀντιοχείας (Joseph. *B. J.* i. 12, §5). The situation was of extreme natural beauty, with perennial fountains and abundant wood. Seleucus localised here, and appropriated to himself and his family, the fables of Apollo and the river Peneus and the nymph Daphne. Here he erected a magnificent temple and colossal statue of the god. The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. Among other honours, it possessed the privileges of an asylum. It is in this character that the place is mentioned, 2 Macc. iv. 33. In the reign of Antiochus Epiphanes (B.C. 171) the aged and patriotic high-priest Onias, having rebuked Menelaus for his sacrilege at Jerusalem, took refuge at Daphne; whence he was treacherously brought out, at the instance of Menelaus, and murdered by Andronicus, who was governor of Antioch during the king's absence on a campaign. Josephus does not give this account of the death of Onias (*Ant.* xii. 5, §1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and vice. "*Daphnici mores*" was a proverb (see Gibbon's 23rd chapter). The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the Empire began to triumph over Heathenism. The site has been well identified by Pococke and other travellers at *Beit-el-Maa*, "the House of the Water," on the left bank of the Orontes, to the S.W. of Antioch, and on higher ground; where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo's sanctuary. [J. S. H.]

**DA'RA** (דָּרָא; *Δαρά*; Alex. *Δαρά*; Compl. *Δαράδῆ*; Syr. Pesch. ܕܪܐ; Arb. دَارِدَا; *Dara*), 1 Chr. ii. 6. [DARDA.]

**DARDA** (דָּרְדָּא; *Δαρδα*; Alex. *ῥὸν δάρδα*; Joseph. *Δαρδανός*; *Dorda*), a son of Mahol, one of four men of great fame for their wisdom, but who were excelled by Solomon (1 K. iv. 31). Ethan the first of the four is called "the Ezrahite;" but it is uncertain whether the designation extends to the others. [ETHAN.] In 1 Chr. ii. 6, however, the same four names occur again as "sons of Zerach," of the great family of Pharez in the tribe of Judah, with the slight difference that Darda appears as Dara. The identity of these persons with those in 1 K. iv. has been greatly debated (see the arguments on both sides in Burdington, i. 206-8); but there cannot be much reasonable doubt that they are the same.

(1.) A great number of Hebr. MSS. read Darda in Chr. (Davidson, *Hebr. Text*, 210), in which they are followed by the Targum and the Syriac and Arabic versions. [DARA.]

(2.) The son of Zerach would be without difficulty called in Hebrew the Ezrahite, the change depending merely on the position of a vowel point. [EZRAHITE.] And further, the change is actually made by the Targum Jonathan, which in Kings has "son of Zerach."

(3.) The word "son" is used in Hebrew so often to denote a descendant beyond the first generation, that no stress can be laid on the "son of Mahol," as compared with "son of Zerach." For instance, of the five "sons of Judah" in 1 Chr. iv. 1, the first was really Judah's son, the second his grandson, the third his great-grandson, and the fourth and fifth still later descendants. Besides there is great plausibility in the conjecture that "*Bene Mahol*" means "sons of the choir;" in which case the men in question were the famous musicians, two of whom are named in the titles to Psalms lxxxviii. and lxxxix. [MAHOL.] [G.]

**DARIC** (דָּרִיכֻן; *darikon*, only in pl.; Talm. דָּרִיכֻן; *solidus*, *drachma*; Ezr. ii. 69; viii. 27; Neh. vii. 70, 71, 72; 1 Chr. xxix. 7), a gold coin current in Palestine in the period after the return from Babylon. That the Hebrew word is, in the Bible, the name of a coin and not of a weight appears from its similarity to the Greek appellation of the only piece to which it could refer. The mentions in Ezr. and Neh. show that the coin was current in Palestine under Cyrus and Artaxerxes Longimanus. At these times there was no large issue of gold money except by the Persian kings, who struck the coin known to the Greeks as the *στατήρ* *Δαρικεύς*, or *Δαρικεύς*. The Darics which have been discovered are thick pieces of pure gold, of archaic style, bearing on the obverse the figure of a king with bow and javelin, or bow and dagger, and on the reverse an irregular incuse square. Their full weight is about 128 grains troy, or a little less than that of an Attic stater, and is most probably that of an early didrachm of the Phoenician talent. They must have been the common gold pieces of the Persian empire. The oldest that we have seen cannot be referred to an earlier period than about the time of Cyrus, Cambyse, or Darius Hystaspis, and it is more probable that they are not anterior to the reign of Xerxes, or even that of Artaxerxes.

xerxes Longimanus. There are, however, gold pieces of about the same weight, but of an older style, found about Sardis, which cannot be doubted to be either of Croesus or of an earlier Lydian king, in the former case the *Κροισίδες* (*κρατήρες*) of the Greeks. It is therefore probable, as these followed a Persian standard, that Darius were struck under Cyrus or his nearer successors. The origin of this coin is attributed by the Greeks to a Darius, supposed by the moderns to be either Darius the Mede, or Darius Hystaspis. That the Greeks derived their distinctive appellation of the coin from this proper name cannot be doubted; but the difference of the Hebrew forms of the former from that of the latter דָּרְיוֹשׁ, renders this a questionable derivation. Gesenius suggests the ancient Persian word *Dara* (*Handw. s. v.*), "king;" but (in his *Thes. s. v.*) inclines to connect the Heb. names of the coin and that of Darius. In favour of the derivation from *Dara*, it must be noted that the figure borne by these coins is not that of any one king, but of the king of Persia in an abstract sense, and that on the same principle the coins would rather be called "regal coins than Daries." The silver Daries mentioned by Plutarch (*Cim. 10*) are probably the Persian silver pieces similar in type to the gold Daries, but weighing a drachm and a third of the same standard. See MONEY and *Dict. of Ant. art. Darius*. [R. S. P.]

Daric. Obr. : King of Persia to the right, kneeling, bowing bow and javelin. Rev. : Irregular incuse square.

**DARIUS** (דָּרְיוֹשׁ; *Daravayush, Taryavush*, in Inscr.; *Δαρείος*, I.XX.; *Δαρείης*, Strab. xvi. p. 785; *Δαρείος*, Ctes.), the name of several kings of Media and Persia. Herodotus (vi. 98) says that the name is equivalent to *ἐξέτης* (*ἐργω*) the *restrainer*; and this is probably correct from the analogy of the Persian *darvash*, "restraint;" Sanscr. *dhāri*, "firmly holding" (Gesen. *Thes. s. v.*) Hecychius gives a double derivation: *Δαρείος ὁ δὲ Περσῶν ὁ φρόνιμος; ὁ δὲ δὲ φρυγῶν ἑκτωρ*. Others have regarded the word as another form of the modern Persian *Dara*, *darab*, "a king;" but this sense of *dara* is not justified by usage, and it is rather the epithet of a king (the *holder, restrainer*, as above) than the title itself (Ges. l. c.). Three kings bearing this name are mentioned in the O. T.

1. DARIUS the ΜΕΔΩΣ (דָּרְיוֹשׁ מֶדֶי, Dan. xi. 1; Chald. דָּרְיוֹשׁ מֶדֶי, vi. 1), "the son of Ahasuerus of the seed of the Medes," (ix. 1), who succeeded to (בִּשְׁלָ) the Babylonian kingdom on the death of Belshazzar, being then sixty-two years old (Dan. v. 31 (LXX. *Ἀπράξερξης*); ix. 1). Only one year of his reign is mentioned (Dan. ix. 1, xi. 1); but that was of great importance for the Jews. Daniel was advanced by the king to the highest dignity (Dan. vi. 1 ff.), probably in consequence of his former services (cf. Dan. v. 17); and after his miraculous deliverance, Darius issued a decree

enjoining throughout his dominions "reverence for the God of Daniel" (Dan. vi. 25 ff.).

The extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history. The first of these which identifies him with Darius Hystaspis rests on no plausible evidence, and may be dismissed at once (Lengerke, *Dan. 219 ff.*). The second, which was adopted by Josephus (*Ant. x. 11, §4*), and has been supported by many recent critics (Bertholdt; Von Lengerke; Hävernick; Hengstenberg; Auberlen, *Daniel und d. Offenbarung*, pp. 16 ff.) is more deserving of notice. According to this he was (*Cyaxares II.*) "the son and successor of Astyages" (Jos. l. c. *ἦν Ἀστυάγου υἱός, ἕτερον δὲ παρὰ τοῖς Ἕλλησιν ἐκαλεῖτο ὄνομα*), who is commonly regarded as the last king of Media. It is supposed that the reign of this Cyaxares has been neglected by historians from the fact that through his indolence and luxury he yielded the real exercise of power to his nephew Cyrus, who married his daughter, and so after his death received the crown by direct succession (Xen. *Cyrop. i. 5, §2, iv. 5, §8, viii. 5, §19*). But it appears to be a fatal objection to this hypothesis that the only direct evidence for the existence of a second Cyaxares is that of Xenophon's romance (cf. Niebuhr, *Aesch. Ass. u. Bab. p. 61*). The title *Cyrus filius* *Cyaxaris*, which has been quoted from an inscription (Auberlen, *Daniel u. d. Offenbarung*, p. 18), is either a false reading or certainly a false translation (Niebuhr, *Gesch. Ass. u. Bab. 214, n. 4*); and the passage of Aeschylus (*Pers. 766 f.*) is inconsistent with the character assigned to Cyaxares II. On the other hand, Herodotus expressly states that "Astyages" was the last king of the Medes, that he was conquered by Cyrus, and that he died without leaving any male issue (Herod. i. 73, 109, 127 ff.); and Cyrus appears as the immediate successor of "Astyages" in the Chronicle of Eusebius (*Chron. ad Ol. 54*; Syncell. 188; cf. *Bel and Dragon*, i.). A third identification (Wiener, *Realdict. s. v.*; Niebuhr, *Gesch. Ass. u. Bab. pp. 45, 92*) remains, by which Darius is represented as the personal name of "Astyages," the last king of the Medes, and this appears to satisfy all the conditions of the problem. The name "Astyages" was national and not personal [ASTYAGES], and Ahasuerus (*Achashverosh*) represents the name (*Huak'hshatra*) (Cyaxares, borne by the father of "Astyages" (Tob. xiv. 15). The description of the unnamed king in Aeschylus" (l. c.) as one whose "feelings were guided by wisdom" (*φρένες γὰρ αὐτοῦ θυμὸν φεικαστόδρμον*), is applicable to the Darius of Scripture and the Astyages of Herodotus. And as far as the name itself is concerned, there are traces of the existence of an older king Darius before the time of Darius Hystaspis (Schol. ad Arist. *Eccles. 598 Δαρείκος* — *ὄνκ ἀπὸ Δαρείου τοῦ ἐξάρχου πατρὸς, ἀλλ' ἀπ' ἑτέρου τινος παλαιότερου βασιλέως ὀνομάσθησαν*. cf. Suidas. s. v. *Δαρείκος*). If, as seems most probable, Darius (Astyages) occupied the throne or Babylon as supreme sovereign with Neriglissar as vassal-prince, after the murder of Evilmerodach (Belshazzar) B.C. 559, one year only remains for this Median supremacy before the victory of Cyrus

\* It is most worthy of notice that Aeschylus characterises Cyaxares (I.) as *Μῆδος . . . ὁ πρῶτος ἡγεμὼν σπαρτός*, while Sir H. Rawlinson (*Notes on the History*

*of Babylonia*, p. 30, n.) shows that the foundation of the Median empire was really due to *Huak'hshatra* (Cyaxares), in spite of the history of Herodotus.

n.c. 558, in exact accordance with the notices in Daniel (Niebuhr, *l. c.*), and the apparent incompetence of the political arrangements which Darius "purposed" to make (Dan. vi. 3, עֲשִׂיתָ). For the short duration of his supreme power may have caused his division of the empire (Dan. vi. 1 ff.)—a work congenial to his character—to fall into abeyance, so that it was not carried out till the time of his namesake Darius Hystaspis: a supposition at least as probable as that there is any confusion of the two monarchs in the book of Daniel.

The chronological difficulties which have been raised (Rawlinson, *Herodotus*, i. p. 418) against the identification of Darius with Astyages on the assumption that the events in Dan. v. relate to the taking of Babylon by Cyrus (n.c. 538), in which case he would have ascended the throne at seven years of age, are entirely set aside by the view of Marcus Niebuhr, which has been adopted above; and this coincidence serves to confirm the general truth of the hypothesis.

2. DARIUS the son of HYSTASPIES (Vashtaspi), the fifth in descent from Achaemenes, the founder of the Perso-Arian dynasty, was, according to the popular legend (Herod. i. 209, 210), already marked out for empire during the reign of Cyrus. Upon the usurpation of the Magian Smerdis [ARTAXERXES], he conspired with six other Persian chiefs to overthrow the impostor, and on the success of the plot was placed upon the throne B.C. 521. He devoted himself to the internal organisation of his kingdom, which had been impeded by the wars of Cyrus and Cambyses, and the confusion of the reign of Smerdis. His designs of foreign conquest were interrupted by a revolt of the Babylonians, under a pretender who bore the royal name of Nabukadnessar (Niebuhr, *Gesch. Ass. u. Bib.* 94), which was at length put down, and punished with great severity (c. n.c. 516). After the subjugation of Babylon Darius turned his arms against Scythia, Libya (Herod. iv. 145 ff.) and India (Herod. iv. 44). Thrace and Macedonia acknowledged his supremacy, and some of the islands of the Aegean were added to his dominion in Asia-Minor and the seaboard of Thrace (B.C. 513-505). Shortly afterwards he came into collision with Greece, and the defeat of Marathon (n.c. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarted by rebellion. Domestic quarrels (Herod. vii. 2) followed on the rising in Egypt, and he died B.C. 485 before his preparations were completed (Herod. vii. 4).

With regard to the Jews, Darius Hystaspis pursued the same policy as Cyrus, and restored to them the privileges which they had lost. For the usurpation of Smerdis involved a religious as well as a political revolution, and the restorer of the Magian faith willingly listened to the enemies of a people who had welcomed Cyrus as their deliverer (Exr. iv. 17 ff.). But in the second year of Darius, B.C. 520, as soon as his power had assumed some solidity, Haggai (Hag. i. 1, ii. 1, 10) and Zechariah encouraged their countrymen to resume the work of restoration (Exr. v. 1 ff.), and when their proceedings came to the king's knowledge, he confirmed the decree of Cyrus by a new edict, and the temple was finished in four years (n.c. 516, Exr. vi. 15), though it was apparently used before that time (Zech. vii. 2, 3).

3. DARIUS THE PERSIAN (Neh. xii. 22, דָּרְיָוִשׁ) may be identified with Darius II. Nottus (Ochus), king of Persia B.C. 424-3—405-4, if the whole passage in question was written by Nehemiah. If, however, the register was continued to a later time, as is not improbable, the occurrence of the name Jaddua (vv. 11, 22), who was high-priest at the time of the invasion of Alexander [ALEXANDER], points to Darius III. Codomannus, the antagonist of Alexander, and last king of Persia B.C. 336-330 (1 Macc. i. 1). Cf. Jahn, *Archäol.* n. 1, 272 ff.; Keil, *Lehrb. d. Bibl.* §152, 7, who defends at length the integrity of the passage. [B. F. W.]

DARKNESS (חָשֶׁךְ, fem. form חֹשֶׁךְ, and with much variation in the vowel points; *σκότος*), is spoken of as encompassing the actual presence of God, as that out of which He speaks, the envelope, as it were, of Divine glory (Ex. ix. 21; 1 K. viii. 12). The cloud symbol of His guidance offered an aspect of darkness to the enemy as of light to the people of Israel. In the description of His coming to judgment, darkness overspreading nature and blotting the sun, &c., is constantly included (Is. xiii. 9, 10; Joel ii. 31, iii. 15; Matt. xxiv. 29; Mark xiii. 24; Luke xxi. 25; Rev. vi. 12).

The plague of darkness in Egypt has been ascribed by various neologicist commentators to non-miraculous agency, but no sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. The darkness ἐπὶ πᾶσαν τὴν γῆν of Matt. xxvii. 45 attending the crucifixion has been similarly attributed to an eclipse. Phlegon of Tralles indeed mentions an eclipse of intense darkness, and which began at noon, combined, he says, in Bithynia, with an earthquake, which in the uncertain state of our chronology (see Clinton's *Fasti Romani*, Olymp. 202) more or less nearly synchronises with the event. Nor was the account one without reception in the early church. See the testimonies to that effect collected by Whiston (*Testimony of Phlegon vindicated*, Lond. 1732). Origen, however, *ad loc.* (Latin commentary on St. Matt.) denies the possibility of such a cause, arguing that by the fixed Paschal reckoning the moon must have been about full, and denying that Luke xxiii. 45 by the words *ἐσκορίσθη δὲ ἡλιος* means to allege that fact as the cause. The genuineness of this commentary has been impeached, nor is its tenor consistent with Origen *adv. Cels.* p. 80; but the argument, unless on such an assumption as that mentioned below, seems decisive, and has ever since been adhered to. He limits πᾶσαν τὴν γῆν to Judaea. Dean Alford (*ad loc.*), though without stating his reason, prefers the wider interpretation of all the earth's surface on which it would naturally have been day. That Phlegon's darkness, perceived so intense in Tralles and Bithynia, was felt in Judaea is highly probable; and the Evangelist's testimony to similar phenomena of a coincident darkness and earthquake, taken in connexion with the near agreement of time, gives a probability to the supposition that the former speaks of the same circumstances as the latter. Wieseler (*Chron. Synop.* 388) however, and De Wette (*Comm. on Matt.*), consider the year of Phlegon's eclipse an impossible one for the crucifixion, and reject that explanation of the darkness. The argument from the duration (3 hours) is also of great force; for an eclipse seldom lasts in great intensity more than 6 minutes. On the other hand, Seyffarth (*Chronolog.*

*Sacr.* p. 58, 9) maintains that the Jewish calendar, owing to their following the sun, had become so far out that the moon might possibly have been at new, and thus, admitting the year as a possible epoch, revives the argument for the eclipse as the cause. He however views this rather as a natural basis than as a full account of the darkness, which in its degree at Jerusalem was still preternatural (ib. p. 138). The pamphlet of Whiston above quoted, and two by Dr. Sykes, *Dissertation on the Eclipse mentioned by Phlegon*, and *Defence of same*, Lond. 1733 and 1734, may be consulted as regards the statement of Phlegon.

Darkness is also, as in the expression "land of darkness," used for the state of the dead (Job x. 21, 22); and frequently figuratively, for ignorance and unbelief, as the privation of spiritual light (John i. 5; iii. 19). [H. H.]

**DAR'KON** (דַּרְקוֹן; *Δαρκόν, Δορκών; Dercon*). Children of Darkon were among the "servants of Solomon," who returned from Babylon with Zerubbabel (Ezr. ii. 56; Neh. vii. 58). [LOZAN.]

**DATES**, margin of 2 Chr. xxxi. 5 only. [PALM TREE.]

**DA'THAN** (דָּתָן; *Δαθάν; Dathan*), a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah the Levite (Num. xvi. 1, xxvi. 9; Deut. xi. 6; Ps. cvi. 17). [R. W. B.]

**DATHEMA** (Δαθέμα; Alex. and Josephus, *Δάθεμα*; other MSS. *Δάμεθα; Dathema*), a fortress (τὸ δὲχόμενον; Jos. *φρούριον*) in which the Jews of Gilead took refuge from the heathen (1 Macc. v. 9). Here they were relieved by Judas and Jonathan (24). They marched from Bozora to Dathema (28, 9) and left it for Maspha (Mizpeh) (35). The reading of the Peschito, *Rantha*, points to Ramoth-Gilead, which can hardly fail to be the correct identification. Ewald however (iv. 359, note) would correct this to *Damtha*, which he compares with *Dhami*, a place reported by Burckhardt. [G.]

**DAUGHTER** (*Bath*, בַּת, contr. from בִּתּוּלָה, fem. of בָּר; *θυγάτηρ; filia*). 1. The word is used in Scripture not only for daughter, but for granddaughter or other female descendant, much in the same way and like extent with בֶּן, son (Gen. xxiv. 48, xxxi. 43). [See CHILDREN; EDUCATION; WOMEN.]

2. In a kindred sense the female inhabitants of a place, a country, or the females of a particular race are called daughters (Gen. vi. 2, xxvii. 46, xxviii. 6, xxxvi. 2; Num. xxv. 1; Deut. xxiii. 17; Is. iii. 16; Jer. xvi. 11, xlix. 2, 3, 4; Luke xxiii. 28).

3. Women in general (Prov. xxxi. 29).

4. Those addicted to particular forms of idolatrous worship (1 Sam. i. 16; Mal. ii. 11).

5. The same notion of descent explains the phrase "daughters of music," i. e. singing birds (Eccl. xii. 4), and the use of the word for branches of a tree (Gen. xlix. 22), the pupil of the eye, *אֵקֶף* (Lam. ii. 18; Ps. xvii. 8), and the expression "daughter of 90 years," to denote the age of Sarah (Gen. xvii. 17).

6. It is also used of cities in general, agreeably to their very common personification as belonging to the female sex (Is. x. 32, xxiii. 12, xxxvii. 22, xlvii. 1, lii. 2; Jer. vi. 2, 26, ix. 1, xxxi. 4, xlvii. 11, 24, xlviii. 18, li. 33; Nah. iii. 4, 7; Zech. ix. 9; Ez. xvi. 3, 44, 48, xxiii. 4).

7. But more specifically of dependent towns or

hamlets, while to the principal city the correlative "mother" is applied (Num. xxi. 25; Josh. xvii. 11, 16; Judg. i. 27; 1 Chr. vii. 28; 2 Sam. xx. 19).

*Hazerim* is the word most commonly employed for the "villages" lying round, and dependent on, a "city" (*Ir*; עִיר). But in one place *Bath* is used as if for something intermediate, in the case of the Philistine cities Ekron, Ashdod, and Gaza (Josh. xv. 45-7)—"her daughter-towns and her villages." Without this distinction from *Hazerim*, the word is also employed for Philistine towns in 1 Chr. xviii. 1—Gath; 2 Chr. xxviii. 18—Shocho, Timnath, and Gimzo. In Neh. xi. 25-31, the two terms are employed alternately, and to all appearance quite indiscriminately. [VILLAGE.] [H. W. P.]

**DAVID** (דָּוִד, דָּוִיד; LXX. *Δαυίδ*; N. T. *Δαβίδ, Δαυείδ*), the son of Jesse, is the best known to us of any of the characters in the O. T. In him, as in the case of St. Paul in the N. T., we have the advantage of comparing a detailed narrative of his life with undoubted works of his own composition, and the combined result is a knowledge of his personal character, such as we probably possess of no historical personage before the Christian era, with the exception of Cicero, and perhaps of Caesar.

The authorities for the life of David may be divided into six classes:—

I. The original Hebrew authorities:—

1. The Davidic portion of the Psalms,<sup>b</sup> including such fragments as are preserved to us from other sources, viz. 2 Sam. i. 19-27, iii. 33, 34, xxii. 1-51, xxiii. 1-7. [PSALMS.]

2. The "Chronicles" or "State-papers" of David (1 Chr. xxvii. 24), and the original biographies of David by Samuel, Gad, and Nathan (1 Chr. xxix. 29). These are lost, but portions of them no doubt are preserved in

3. The narrative of 1 Sam. xvi. to 1 K. ii. 10; with the supplementary notices contained in 1 Chr. xi. 1 to xlix. 30.

II. The two slight notices in the heathen historians, Nicolaus of Damascus in his *Universal History* (Jos. Ant. vii. 5, §2), and Eusebius in his *History of the Kings of Judah* (Eus. *Præp. Ev. ix.* 30).

III. David's apocryphal writings, contained in Fabricius, *Codex Apocryphus V. Test.* p. 906-1006. (1) Ps. cli., on his victory over Goliath. (2) Colloquies with God, on madness, on his temptation, and on the building of the Temple. (3) A charm against fire. Of these the first alone deserves any attention.

IV. The Jewish traditions, which may be divided into three classes:—

1. The additions to the Biblical narrative contained in Josephus, *Ant.* vi. 8-vii. 15.

2. The Hebrew traditions preserved in Jerome's *Questiones Hebraicæ in Libros Regum et Paralipomenon* (vol. iii., Venice ed.).

<sup>a</sup> The shorter form is used in the earlier books; indeed, everywhere except in 1 K. iii. 14, and in Chr., Ezr., Neh., Cant., Hos., Am., Ezek. xxxiv. 23, and Zech., in which the longer form is found. The Arabic

form of the name, in common use, is دَاوُد, *Dâoud*.

<sup>b</sup> In quoting the Psalms in connexion with the history, we have been guided partly by the titles (as expressing the Jewish traditions), partly by the internal evidence, as verified by the judgment of Hebrew scholars.

mothers were the eldest of the whole family, were probably of the same age as David himself, and they accordingly were to him—especially the three sons of Zeruiah—throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, whilst he was distinguished from them by qualities of his own, peculiar to himself. The two sons of his brother Shimeah are both connected with his after history, and both celebrated for the gift of sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3). The other was Jonathan (2 Sam. xxi. 21), who afterwards became the counsellor of David himself (1 Chr. xxvii. 32). It is a conjecture or tradition of the Jews preserved by Jerome (*Qu. Heb.* on 1 Sam. xvii. 12) that this was no other than Nathan the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Chr. ii. 13-15. But this is hardly probable.

The first time that David appears in history at once admits us to the whole family circle. There was a practice once a year at Bethlehem, probably at the first new moon of the year, of holding a sacrificial feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. ix. 6), with the elders of the town. At this or such like feast (xvi. 1) suddenly appeared the great prophet Samuel, driving a heifer before him, and having in his hand a horn of the consecrated oil<sup>d</sup> of the Tabernacle. The elders of the little town were terrified at this apparition, but were reassured by the august visitor, and invited by him to the ceremony of sacrificing the heifer. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil, as if for an invitation to begin (comp. ix. 22). He was restrained by divine intimation as son after son passed by. Eliab, the eldest, by "his height" and "his countenance," seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day was gone when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are these all thy children? And he said, There remaineth yet the youngest, and behold he keepeth the sheep.

This is our first and most characteristic introduction to the future king. The boy was brought in. We are enabled to fix his appearance at once in our minds. He was of short stature, thus contrasting with his tall brother Eliab, with his rival Saul, and with his gigantic enemy of Gath. He had red<sup>e</sup> or auburn hair, such as is not unfrequently seen in his countrymen of the East at the present day. In later life he wore a beard.<sup>f</sup> His bright eyes<sup>g</sup> are especially mentioned (xvi. 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eyes," "comely," "goodly," xvi. 12, 18, xvii. 42), well made, and of immense

strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (1's. xviii. 33, 34). He was pursuing the occupation allotted in Eastern countries usually to the slaves, the females, or the despised of the family (comp. the case of Moses, of Jacob, of Zipporah, and Rachel, and in later times, of Mahomet; Sprenger, p. 8). The pastures of Bethlehem are famous throughout the sacred history. The Tower of Shepherds (Gen. xxxv. 21), the shepherds abiding with their flocks by night (Luke ii.), were both there. He usually carried a switch or wand<sup>h</sup> in his hand (1 Sam. xvii. 40), such as would be used for his dogs (xvii. 43), and a scrip or wallet round his neck, to carry anything that was needed for his shepherd's life (xvii. 40). Such was the outer life of David when (as the later Psalmists described his call) he was "taken from the sheepfolds, from following the ewes great with young, to feed Israel according to the integrity of his heart, and to guide them by the skilfulness of his hands" (1's. lxxviii. 70-72). The recollection<sup>i</sup> of the sudden and great elevation from this humble station is deeply impressed on his after life. "The man who was raised up on high" (2 Sam. xviii. 1)—"I have exalted one chosen out of the people" (1's. lxxviii. 19)—"I took thee from the sheepcote" (2 Sam. vii. 8).

3. But there was another preparation still more needed for his office, which possibly had made him already known to Samuel, and which at any rate is his next introduction to the history. When the body-guard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of this gift with the schools of the prophets, who exercised their vocation with tabret, psaltery, pipe, and harp (1 Sam. x. 5), in the pastures (*Naioth*; comp. 1's. xxiii. 2), to which he afterwards returned as to his natural home (1 Sam. xix. 18).<sup>k</sup>

Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain. The 23rd, from its subject of the shepherd, and from its extreme simplicity (though placed by Kwald somewhat later), may well have been suggested by this time. The 8th, 19th, and 29th,<sup>l</sup> which are universally recognised as David's, describe the phenomena of nature, and as such may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, &c. (Ps. vii. 2, xxii. 20, 21), must be reminiscences of this time. And now, at any rate, he must have

<sup>d</sup> "The oil;" so Joseph. *Ant.* vi. 8, §1.

<sup>e</sup> 1 Sam. xvi. 12, xvii. 42. Ruddy = red-haired; *ρυπαῖρος*, I.XX.; *rufus*, Vulg.: the same word as for Esau, Gen. xxv. 25. The rabbis (probably from this) say that he was like Esau. Josephus (*Ant.* vi. 8, 1) makes it his tawny complexion (*ξανθοῦς τὴν χροάν*).

<sup>f</sup> 1 Sam. xxi. 13.

<sup>g</sup> "Fierce, quick;" *γοργὸς τὰς ὀφθαλμοῖς* (Joseph. *Ant.* vi. 8, 1).

<sup>h</sup> The same word as is used in Gen. xxx. 37, Jer. i. 11, Hos. iv. 12.

<sup>i</sup> It is useless to speculate on the extent to which his mission was known to himself or to others. Josephus (*Ant.* vi. 8, 1) says that Samuel whispered it into his ear.

<sup>k</sup> The Mussulman traditions represent him as skilled in making haircloth and sackcloth—the usual occupations of the prophets. See the notes to BETHLEHEM, p. 202 a.

<sup>l</sup> The Mussulman traditions describe him as understanding the language of birds (*Koran*, xxi. 9, xvii. 16).

first acquired the art which gave him one of his chief claims to mention in after times—"the sweet singer of Israel" (2 Sam. xxiii. 1), "the inventor of instruments of music" (Am. vi. 5); "with his whole heart he sung songs and loved him that made him" (Ecclus. xlvii. 8).<sup>m</sup>

4. One incident alone of his solitary shepherd life has come down to us—his conflict with the lion and the bear in defence of his father's flocks (1 Sam. xvii. 34, 35). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (xvi. 18), and when he suddenly appeared in the camp, his elder brother immediately guessed that he had left the sheep in his arduous to see the battle (xvii. 28). To this new aspect of his character we are next introduced.

There is no perfectly satisfactory means of reconciling the apparently contradictory accounts in 1 Sam. xvi. 14-23, and xvii. 12-31, 55-58. The first states that David was made known to Saul and became his armour-bearer in consequence of the charm of his music in assuaging the king's melancholy. The second implies that David was still a shepherd with his father's flocks, and unknown to Saul. The Vatican MS. of the LXX., followed by Kennicott (who argues the question at length, *Dissertation on Hebrew Text*, 418-432, 554-558), rejects the narrative in 1 Sam. xvii. 12-31, 55-58, as spurious. But the internal evidence from its graphic touches is much in its favour, and it must at least be accepted as an ancient tradition of David's life. Holsley, but with no external authority, transposes 1 Sam. xvi. 14-23. Another explanation supposes that Saul had forgotten him. But this only solves half the difficulty, and is evidently not the intention of the narrative. It may therefore be accepted as an independent statement of David's first appearance, modified by the counter-statement already noticed.

The scene of the battle is at EPHES-DAMMIM, in the frontier-hills of Judah, called probably from this or similar encounters "the bound of blood." Saul's army is encamped on one side of the ravine, the Philistines on the other, the watercourse of Elah or "the Terebinth" runs between them.<sup>n</sup> A Philistine of gigantic stature, and clothed in complete armour, insults the comparatively defenceless Israelites, amongst whom the king alone appears to be well armed (xvii. 38; comp. xiii. 20). No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of milk-cheese to his three eldest brothers, fresh from the sheepfolds. Just as he comes to the

circle of waggon which formed, as in Arab settlements, a rude fortification round the Israelite camp (xvii. 20), he hears the well known shout of the Israelite war-cry (comp. Num. xxiii. 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers)<sup>o</sup> into the midst of the lines.<sup>p</sup> Then he hears the challenge, now made for the fortieth time—sees the dismay of his countrymen—hears the reward proposed by the king—goes with the impetuosity of youth from soldier to soldier talking of the event, in spite of his brother's rebuke—he is introduced to Saul—undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished—not the armour of Saul, which he naturally found too large, but the shepherd's sling, which he always carried with him, and the five polished pebbles which he picked up as he went from the watercourse of the valley, and put in his shepherd's wallet.<sup>q</sup> Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up behind the ephod in the Tabernacle at Nob (1 Sam. xxi. 9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. [Nob.] Ps. cxliv., though by its contents of a much later date, is by the title in the LXX. "against Goliath." But there is also a psalm, preserved in the LXX. at the end of the Psalter, and which, though probably a mere adaptation from the history, well sums up this early period of his life: "This is the psalm of David's own writing" (?) (*ἰδιόγραφος εἰς Δαυὶδ*), and outside the number, when he fought the single combat with Goliath. "I was small amongst my brethren, and the youngest in my father's house. I was feeding my father's sheep. My hands made a harp, and my fingers fitted a psaltery. And who shall tell it to my Lord? He is the Lord, He heareth. He sent his messenger (angel?) and took me from my father's flocks, and anointed me with the oil of His anointing. My brethren were beautiful and tall, but the Lord was not well pleased with them. I went out to meet the Philistine, and he cursed me by his idols. But I drew his own sword and beheaded him, and took away the reproach from the children of Israel."<sup>r</sup>

II. *Relations with Saul.*—We now enter on a new aspect of David's life. The victory over Goliath had been a turning point of his career. Saul inquired his parentage, and took him finally

<sup>m</sup> In Mussulmah traditions, as Abraham is called "the Friend," and Mohammed "the Apostle," so David is "the Prophet of God." In Weil's *Legende*, p. 157, is a striking Oriental description of his powers as a psalmist: "He could imitate the thunders of heaven, the roar of the lion, the notes of the nightingale."

<sup>n</sup> Variations in the common account are suggested by two other passages. 1. In 2 Sam. xxi. 19, it is stated that "Goliath of Gath, the staff of whose spear was like a weaver's beam," was killed (not by David, but) by Elhanan of Bethlehem. This, combined with the fact that the Philistine whom David slew is usually nameless, has suggested to Ewald (ii. 23, 611) the ingenious conjecture that the name of Goliath (which is only given twice to David's enemy, 1 Sam. xvii. 4, xxi. 9) was borrowed from the conflict of the real Goliath with Elhanan, whose Bethlehemite

origin has led to the confusion. Jerome (*Qu. Heb. ad loc.*) makes Elhanan the same as David. 2. In 1 Chr. xi. 12, Eleazar (or more probably Shamhah, 2 Sam. xxiii. 11) is said to have fought with David at Ephesdammim against the Philistines. It is of course possible that the same scene may have witnessed two encounters between Israel and the Philistines; but it may also indicate that David's first acquaintance with Eleazar, afterwards one of his chief captains, was made on this memorable occasion.

<sup>o</sup> The same word is used as in 1 Sam. xxii. 17.

<sup>p</sup> As in 1 Sam. iv. 16, 2 Sam. xviii. 22.

<sup>q</sup> For the Mussulman legend, see Weil's *Legende*, p. 153.

<sup>r</sup> Of these and of like songs, Bunsen (*Bibelwerk*, Pref. p. cl.) interprets the expression in 2 Sam. xxiii. 1, not "the sweet singer of Israel," but "the darling of the songs of Israel."

to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to the end of their lives. The triumphant songs\* of the Israelitish women announced that they felt that in him Israel had now found a deliverer mightier even than Saul. And in those songs, and in the fame which David thus acquired, was laid the foundation of that unhappy jealousy of Saul towards him which, mingling with the king's constitutional malady, poisoned his whole future relations to David.

Three new qualities now began to develop themselves in David's character. The first was his prudence. It had been already glanced at on the first mention of him to Saul (1 Sam. xvi. 18), "prudent in matters." But it was the marked feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely," and evidently with the impression that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the middle ages. (One instance of it appears immediately, in his answer to the trap laid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law, seeing that I am a poor man and lightly esteemed?" (xviii. 23). Secondly, we now see his magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or asseveration in later times was, "As the Lord liveth who hath redeemed my soul out of adversity" (2 Sam. iv. 9; 1 K. i. 29); and the Psalms are filled with imagery taken even literally from shelter against pursuers, slipping down precipices (Ps. xvi. 36), hiding-places in rocks and caves, leafy coverts (xxvi. 20), strong fastnesses (xviii. 2).

This course of life subdivides itself into four portions:—

1. His life at the court of Saul till his final escape (1 Sam. xviii. 2–xix. 18). His office is not exactly defined. But it would seem that, having been first armour-bearer (xvi. 21, xviii. 2), then made captain over a thousand—the subdivision of a tribe—(xviii. 13), he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. Three formed the usual companions of the king at his meals (ix. 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the

Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign.† He also still performed from time to time the office of minstrel. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out,‡ at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court—the son of Saul, his friend Jonathan—the daughter of Saul, his wife Michal. Warned by the one, and assisted by the other, he escaped by night,§ and was from thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death [MICHAL]. To this escape the traditional title assigns Ps. lix. Internal evidence (according to Ewald) gives Ps. vi.¶ and vii. to this period. In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chr. xii. 17)—according to the title of the psalm, Cush, a Benjamite, and therefore of Saul's tribe.

2. His escape (1 Sam. xix. 18–xvi. 15).—(a) He first fled to Nioth (or the pastures) of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote himself with his musical and poetical gifts to the prophetic office, and give up the cares and dangers of public life. But he had a higher destiny still. Up to this time both the king and himself had thought that a reunion was possible (see xv. 5, 26). But the madness of Saul now became more settled and ferocious in character; and David's danger proportionally greater. The secret interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavour to seize him at Ramah, and he now determined to leave his country, and take refuge, like Orlantes, or Themistocles in like circumstances, in the court of his enemy. Before this last resolve, he visited Non, the seat of the tabernacle, partly to obtain a final interview with the High-priest (1 Sam. xxii. 9, 15) partly to obtain food and weapons. On the pretext of a secret mission‡ from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath. "There is none like that: give it me." The incident was of double importance in David's career. First it established a connexion between him and the only survivor from the massacre in which David's visit involved the house of Ahimelech. Secondly, from Ahimelech's surrender of the consecrated bread to David's hunger our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in

\* See Fabricius, *Cod. Apoc. V. T.* 906.

† 1 Sam. xx. 25, xxii. 14, as explained by Ewald, p. 98.

‡ The story of his wooing Merab, and of her marriage with Adriel (1 Sam. xviii. 17–19), is omitted in LXX. and Joseph. (*Ant.* vi. 10, §1). There is the same obliteration of her name in the existing Text of 2 Sam. xxi. 8.

§ The first of these (1 Sam. xviii. 9–11) is omitted in the Vatican MS. of the LXX. and Joseph. (*Ant.* vi. 10 §1).

¶ For the Mussulman legend, see Weil's *Legends*, p. 154.

‡ The allusions to his danger from the Benjamite archers (Ps. xi. 2), to his flight like a bird to the mountains (xi. 1, comp. 1 Sam. xxvi. 20), and probably to the neighbourhood of the Dead Sea (xi. 6), rather point to the time when he was at Engedi.

§ The statement of his pretended mission is differently given in the Hebrew and in the LXX. It must be observed that the young men spoken of as his companions were imaginary. He was quite alone.

the N. T.\* (Matt. xii. 3; Mark ii. 25; Luke vi. 3, 4). It is also commemorated by the traditional title of Ps. lli.

His stay at the court of ACHISH was short. Discovered possibly by "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror; and he only escaped by feigning madness,<sup>a</sup> violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and foaming at the mouth (1 Sam. xxi. 13, LXX.). The 56th and 34th psalms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Abimelech.

3. His life as an independent outlaw (xxii. 1-xxvi. 25). (a) His first retreat was the cave of *Adullam*, probably the large cavern (the only very large one in Palestine), not far from Bethlehem, now called *Kharrûn* (see Bonar's *Land of Promise*, p. 24+). From its vicinity to Bethlehem, he was joined there by his whole family, now feeling themselves insecure from Saul's fury (xxii. 1). This was probably the foundation of his intimate connexion with his nephews, the sons of Zeruah.

Of these, Abishai, with two other companions, was amongst the earliest (1 Chr. xi. 15, 20; 1 Sam. xxi. 6; 2 Sam. xxiii. 13, 18). Besides these, were outlaws and debtors from every part, including doubtless some of the original Canaanites—of whom the name of one at least has been preserved, Ahimelech the Hittite (1 Sam. xxvi. 6).<sup>b</sup>

(b) His next move was to a stronghold, either the mountain, afterwards called Herodium, close to Adullam, or the fastness called by Josephus (*B. J.* vii. 8, §4) *Masada*, the Greek form of the Hebrew word *Matzei* (1 Sam. xxii. 4, 5; 1 Chr. vi. 16), in the neighbourhood of Engedi. Whilst there, he had deposited his aged parents for the sake of greater security, beyond the Jordan, with their ancestral kinsman of Moab (ib. 3). The neighbouring king, Nahash of Ammon, also treated him kindly (2 Sam. x. 2). Here another companion appears for the first time, a schoolfellow, if we may use the word, from the schools of Samuel, the prophet Gad, his subsequent biographer (1 Sam. xli. 5); and whilst he was there, occurred the chivalrous exploit of the three heroes just mentioned to procure water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Chelosis (1 Chr. xi. 16-19; 2 Sam. xxiii. 14-17). He was joined here by two separate bands. One a little body of eleven fierce Gadite<sup>c</sup> mountaineers, who swam the Jordan in flood-time to reach him (1 Chr. xii. 8). Another was a detachment of men from Judah and Benjamin under his nephew Amasai, who henceforth attached himself to David's fortunes (1 Chr. xii. 16-18).

(c) At the warning of Gad, he fled next to the forest of *Hareth* (somewhere in the hills of Judah, but its exact site unknown), and then again fell in with the Philistines, and again, apparently advised by Gad (xxiii. 4) made a descent on their foraging

parties, and relieved *Keilah* (also unknown), in which he took up his abode. Whilst there, now for the first time, in a fortified town of his own (xxiii. 7), he was joined by a new and most important ally—Abiathar, the last survivor of the house of Ithamar, who came with the High-priest's Ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxiii. 6, 9, xiii. 23). By this time, the 400 who had joined him at Adullam (xxii. 2) had swelled to 600 (xxiii. 13).

(d) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the localities, partly because the same event seems to be twice narrated (1 Sam. xxiii. 19-24, xxvi. 1-4, and perhaps 1 Sam. xxiv. 1-22, xxvi. 5-25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul. From thence Saul literally hunts him like a partridge, the treacherous Zaphites beating the bushes before him, and 3000 men, stationed to catch even the print of his footsteps on the hills (1 Sam. xxiii. 14, 22 (Eph. 1, 24 (LXX.), xxiv. 11, xxvi. 2, 20). David finds himself driven to the extreme south of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuer and pursued catch sight of each other. Of the first of these escapes, the memory was long preserved in the name of the "Cliff of Divisions," given to the cliff down one side of which David climbed, whilst Saul was surrounding the hill on the other side (xviii. 25-29), and was suddenly called away by a panic of a Philistine invasion. On another occasion, David took refuge in a cave "by the spring of the wild goats" (Engedi) immediately above the Dead Sea (1 Sam. xxvi. 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, scared in the dark recesses of the cave, seeing, yet not seen, suggest to him the chance thus thrown in their way. David, with a characteristic mixture of humour and generosity, descends and silently cuts off the skirt of the long robe, spread, as is usual in the East on such occasions, before and behind the person so occupied—and then caused the pathetic scene of remonstrance and forgiveness (xix. 8-22). The third (if it can be distinguished from the one just given) was in the wilderness further south. There was a regular camp, formed with its usual fortification of waggon and baggage. Into this enclosure David penetrated by night, and carried off the cruse of water, and the well known royal spear of Saul, which had twice so nearly transfixed him to the wall in former days (xxvi. 7, 11, 22). [ARMS, *Chanith*.] The same scene is repeated as at Engedi—and this is the last interview between Saul and David (xxvi. 25). He had already parted with Jonathan in the forest of Ziph (xxiii. 18).

To this period are annexed by their traditional

\* It is a characteristic Jewish comment (as distinguished from the lesson drawn by Christ) that the bread was useless to him (Jerome, *Qu. Heb. in loc.*).

<sup>a</sup> This is the subject of one of David's apocryphal colloquies (Fabricius, *Cod. Apoc. V. Trist.* p. 1002).

<sup>b</sup> Sibbechai, who kills the giant at Goliath (2 Sam. xxi. 18), is said by Josephus to have been a Hittite.

<sup>c</sup> Gad, as Jerome's Jewish commentators observe (*Qu. Heb. in loc.*), appears suddenly, without introduction, like Elijah. Is it possible that he, like Elijah, may have been from beyond the Jordan, and come, as his name implies, with the eleven Gadites?

<sup>d</sup> For the Mussulman legend, see Weil, p. 156.

titles Psalm liv. ("When the Ziphim came and said, Doth not David hide himself with us?"); lvii., ("When he fled from Saul in the cave," though this may refer also to Adullam); lxii. "When he was in the wilderness of Judah" (or Idumaea, LXX.), cxlii. ("A prayer when he was in the cave"). It is probably these psalms which made the Psalter so dear to Alfred and to Wallace during their like wanderings.

Whilst he was in the wilderness of Maon occurred David's adventure with NABAL, instructive as showing his mode of carrying on the freebooter's life, and his marriage with Abigail. His marriage with Ahinoam from Jezreel,\* also in the same neighbourhood (Josh. xv. 55), seems to have taken place a short time before (1 Sam. xxv. 43, xxvii. 3; 2 Sam. iii. 2).

4. His service under Achish† (1 Sam. xxvii. 1; 2 Sam. i. 27).—Wearied with his wandering life he at last crosses the Philistine frontier, not as before, in the capacity of a fugitive, but the chief of a powerful band—his 600 men now grown into an organised force, with their wives and families around them (xxvii. 3-4). After the manner of Eastern potentates, Achish gave him, for his support, a city—Ziklag on the frontier of Philistia—and it was long remembered that to this curious arrangement the kings of Judah owed this appanage of their dynasty (xxvii. 6). There we meet with the first note of time in David's life. He was settled there for a year\* and four months (xxvii. 7), and his increasing importance is indicated by the fact that a body of Benjamite archers and slingers, twenty-two of whom are specially named, joined him from the very tribe of his rival (1 Chr. xii. 1-7). Possibly during this stay he may have acquired the knowledge of military organisation, in which the Philistines surpassed the Israelites, and in which he surpassed all the preceding rulers of Israel.

He deceived Achish into confidence by attacking the old Nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the southern tribes or the Nomadic allied tribes of Israel. But this confidence was not shared by the Philistine nobles; and accordingly David was sent back by Achish from the last victorious campaign against Saul. In this manner David escaped the difficulty of being present at the battle of Gilboa, but found that during his absence the Belouin Amalekites, whom he had plundered during the previous year, had made a descent upon Ziklag, burnt it to the ground, and carried off the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. It happened that an important accession had just been made to his force. On his march with the Philistines northward to Gilboa, he had been joined by some chiefs of the Manassites, through whose territory he was passing. Urgent as must have been the need for them at home, yet David's fascination carried them off, and they now assisted him against the plunderers (1 Chr. xii. 19-21). They overtook the invaders in the desert, and recovered the spoil. These were the gifts with which David was now able for the first time to requite the

friendly inhabitants of the scene of his wanderings (1 Sam. xxx. 26-31). A more lasting memorial was the law which traced its origin to the arrangement made by him, formerly in the attack on Nabal, but now again, more completely, for the equal division of the plunder amongst the two-thirds who followed to the field, and one-third who remained to guard the baggage (1 Sam. xxx. 25, xxv. 13). Two days after this victory a Belouin arrived from the North with the fatal news of the defeat of Gilboa. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2 Sam. i. 1-27).

### III. David's reign.

(I.) As king of Judah at Hebron, 7½ years (2 Sam. ii. 11); (2 Sam. ii. 1-v. 5).

Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king—by whom is not stated—but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any intervention of Abiathar (2 Sam. ii. 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan; and consequently David would be the only Israelite potentate amongst the western tribes. Gradually his power increased, and during the two years which followed the elevation of Ishbosheth, a series of skirmishes took place between the two kingdoms. First came a successful incursion into the territory of Ishbosheth (2 Sam. ii. 28). Next occurred the defection of Abner (2 Sam. iii. 12), and the surrender of Michal, who was now separated from her second husband to return to her first (2 Sam. iii. 15). Then rapidly followed, though without David's consent, the successive murders of AMNER and of ISHBOSHETH (2 Sam. iii. 30, iv. 5). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. A solemn league was made between him and his people (2 Sam. v. 3). For the third time David was anointed king, and a festival of three days celebrated the joyful event (1 Chr. xii. 39). His little band had now swelled into "a great host, like the host of God" (1 Chr. xii. 22). The command of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii. 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing a weight of authority above the others. The sons of Issachar had "understanding of the times to know what Israel ought to do," and with the adjacent tribes contributed to the common feast the peculiar products of their rich territory (1 Chr. xii. 32, 40). The Levitical tribe, formerly represented in David's following only by the solitary fugitive Abiathar, now came in strength, represented by the head of the rival branch of Eleazar, the High-priest, the aged Jehoiada and his youthful and warlike kinsman Zadok (1 Chr. xii. 27, 28; xxvii. 5).

\* Joseph. *Ant.* vi. 13, §8, calls it *Abassar*.

† According to the Jewish tradition (Jerome, *Qu. Heb.* on 2 Sam. viii. 10), he was the son of the former Achish; his mother's name *Mechah*.

§ But the value of this is materially damaged by the variations in the LXX. to "4 months," and Joseph. *Ant.* vi. 13, to "4 months and 20 days."

The only psalm directly referred to this epoch is the 27th (by its title in the LXX. *Πρὸ τοῦ χρισθῆναι*—"before the anointing" i. e. at Hebron).

Underneath this show of outward prosperity, two cankers, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, which darkened all the rest of his career. The first was the formation of a haem, according to the usage of Oriental kings. To the two wives of his wandering life, he had now added four, and including Michal, five (2 Sam. ii. 2; iii. 2-5, 15). The second was the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits of right, and thus of all the incidents of this part of his career the most plaintive and characteristic is his lamentation over his powerlessness to prevent the murder of Abner (2 Sam. iii. 31-36).

II. Reign over all Israel 33 years (2 Sam. v. 5, to 1 K. ii. 11).

(1) The foundation of Jerusalem.—It must have been with no ordinary interest that the surrounding nations watched for the prey on which the Lion of Judah, now about to issue from his native lair, and establish himself in a new home, would make his first spring. One fastness alone in the centre of the land had hitherto defied the aims of Israel. On this, with a singular prescience, David fixed as his future capital. By one sudden assault Jebus was taken, and became henceforth known by the names (whether borne by it before or not we cannot tell) of Jerusalem and Zion. Of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful scaler of the precipice, was the highest place in the army. Joab henceforward became captain of the host (1 Chr. xi. 6). The royal residence was instantly fixed there—fortifications were added by the king and by Joab—and it was known by the special name of the "city of David" (1 Chr. xi. 7; 2 Sam. v. 9).

The neighbouring nations were partly enraged and partly awestruck. The Philistines<sup>a</sup> made two intellectual attacks on the new king (2 Sam. v. 17-20),<sup>1</sup> and a retribution on their former victories took place by the capture and confutation of their own idols (1 Chr. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram<sup>b</sup> sent cedarwood for the buildings of the new capital (2 Sam. v. 11) especially for the palace of David himself (2 Sam. vii. 2). Unhallowed and profane as the city had been before, it was at once elevated to a sanctity which it has never lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jerim with marked solemnity. A temporary halt (owing to the death of Uzza) detained it at Obed-edom's house, after

which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Chr. xiii. 2, xv. 2-27) especially of the Levites. The musical arts in which David himself excelled were now developed on a great scale (1 Chr. xv. 16-22; 2 Sam. vi. 5). Zadok and Abiathar, the representatives of the two Aaronic families, were both present (1 Chr. xv. 11). Chenaniah presided over the music (1 Chr. xv. 22, 27). Obed-edom followed his sacred charge (1 Chr. xiii. 18, 21, 24). The prophet Nathan appears for the first time as the controlling adviser of the future (2 Sam. vi. 3). A sacrifice was offered as soon as a successful start was made (1 Chr. xv. 26; 2 Sam. vi. 13). David himself was dressed in the white linen dress of the priestly order, without his royal robes, and played on stunged instruments (1 Chr. xv. 27; 2 Sam. vi. 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x. 5), and as still in the impressive ceremonial of some Eastern Dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unreserved enthusiasm, and thus conveyed the symbol of the presence of Jehovah into the ancient heathen fortress. In the same spirit of uniting the sacerdotal with the royal functions, he offered sacrifices on a large scale, and himself gave the benediction to the people (2 Sam. vi. 17, 8; 1 Chr. xvi. 2).<sup>1</sup> The scene of this inauguration was on the hill which from David's habitation was specially known as the "City of David." As if to mark the new era he had not brought the ancient tabernacle from Gibeon, but had erected a new tent or tabernacle (1 Chr. xv. 1) for the reception of the ark. It was the first beginning of the great design, of which we will speak presently, afterwards carried out by his son, of erecting a permanent temple or palace for the ark, corresponding to the state in which he himself was to dwell. It was the greatest day of David's life. One incident only tarnished its splendour—the reproach of Michal, his wife, as he was finally entering his own palace, to carry to his own household the benediction which he had already pronounced on his people. [MICHAL.] His act of severity towards her was an additional mark of the stress which he himself laid on the solemnity (2 Sam. vi. 20-23; 1 Chr. xv. 29).

No less than eleven psalms, either in their traditional titles, or in the irresistible evidence of their contents, bear traces of this great festival. The 29th psalm (by its title in the LXX.) is said to be on the "Going forth of the tabernacle."<sup>m</sup> The 30th (by its title), the 15th, and 101st by their contents, express the feelings of David on his occupation of his new home. The 68th, at least in part, and the 24th<sup>n</sup> seem to have been actually composed for the entrance of the ark into the ancient gates of the heathen fortress—and the last

<sup>a</sup> The importance of the victory is indicated by the (probable) allusion to it in Isa. xxviii. 21.

<sup>1</sup> In 1 Chr. xiv. 8, the incoherent words of 2 Sam. v. 17, "David went down into the hold," are omitted.

<sup>b</sup> Eupolemus (*Eus. Præp. Ev.* ix. 30) mentions an expedition against Hiram king of Tyre and Sidon, and a letter to Vafres king of Egypt to make an alliance.

<sup>1</sup> 1 Chr. xvi. 1, says "they offered;" 2 Sam. vi. 17, "he offered." Both say "he blessed." The LXX., by a slight variation of the text, reads both in

2 Sam. vi. 14 and 2 Chr. xxx. 21, "instruments of praise," for "all his might."

<sup>m</sup> As "the tabernacle" was never moved from Gibeon in David's time, "the ark" is probably meant. It is the Psalm which describes a thunderstorm. Is it possible to connect this with the event described in 2 Sam. vi. 6? A similar allusion may be found in Ps. lxxiii. 7, 33. (See Chandler, ii. 211.)

<sup>n</sup> In the LXX. title said to be "on the Sabbath-day."

words of the second of these two psalms<sup>o</sup> may be regarded as the inauguration of the new name by which God henceforth is called, The Lord of hosts. "Who is this king of glory?" "The Lord of hosts, He is the king of glory" (Ps. xxiv. 10; comp. 2 Sam. vi. 2). Fragments of poetry worked up into psalms (xvi. 2-13,<sup>p</sup> cv. 1, 47, 48), occur in 1 Chr. xvi. 8-36, as having been delivered by David "into the hands of Asaph and his brother" after the close of the festival, and the two mysterious terms in the titles of Ps. vi. and xlv. (Sheminihah and Alamoth) appear in the lists of those mentioned on this occasion in 1 Chr. xv. 20, 21. The 132nd is, by its contents, if not by its authorship, thrown back to this time. The whole progress of the removal of the ark is traced in David's vein.

(2) Foundation of the Court and Empire of Israel, 2 Sam. viii. to xii.—The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. Up to this time he had been a king, such as Saul had been before him, or as the kings of the neighbouring tribes, each ruling over his territory, unconcerned with any foreign relations except so far as was necessary to defend his own nation. But David, and through him the Israelitish monarchy, now took a wider range. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp; and he also founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv. 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. For once, the kings of Israel were on a level with the great potentates of the world. David was an imperial conqueror, if not of the same magnitude, yet of the same kind, as Ramesses or Cyrus.—"I have made thee a great name like unto the name of the great men that are in the earth" (2 Sam. vii. 9). "Thou hast shed blood abundantly, and hast made great wars" (1 Chr. xxii. 8). And as, on the one hand, the external relations of life, and the great incidents of war and conquest receive an elevation by their contact with the religious history, so the religious history swells into larger and broader dimensions from its contact with the course of the outer world. The enlargement of territory, the amplification of power and state, leads to a corresponding enlargement and amplification of ideas, of imagery, of sympathies; and thus (humanly speaking), the magnificent forebodings of a wider dispensation in the prophetic writings first became possible through the court and empire of David.

(a.) In the internal organization of the kingdom the first new element that has to be considered is the royal family, the dynasty, of which David was

the founder, a position which entitled him to the name of "Patriarch" (Acts ii. 29) and (ultimately) of the ancestor of the Messiah.

Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv. 25; 1 K. i. 6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 K. xv. 2). The princes were under the charge of Jehiel (1 Chr. xxvii. 32), perhaps the Levite (1 Chr. xv. 21; 2 Chr. xx. 14), with the exception of Solomon, who (according at least to one rendering) was under the charge of Nathan (2 Sam. xii. 25). David's strong parental affection for all of them is very remarkable, 2 Sam. xiii. 31, 33, 36, xiv. 33, xviii. 5, 33, xix. 4; 1 K. i. 6.

(b.) The military organization, which was in fact inherited from Saul, but greatly developed by David, was as follows:

(1.) "The Host," i. e. the whole available military force of Israel, consisting of all males, capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Canaan, and had been commanded by the chief or the judge, who presided over Israel for the time. Under Saul, we first find the recognised post of a captain or commander-in-chief—in the person of Abner; and under David, this post was given as a reward for the assault on Jerusalem, to his nephew JOAB (1 Chr. xi. 6, xxvii. 34), who conducted the army to battle in the absence of the king (2 Sam. xii. 26). There were 12 divisions of 24,000 each, who were held to be in duty month by month; and over each of them presided an officer, selected for this purpose, from the other military bodies formed by David (1 Chr. xxvii. 1-15). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were, the introduction of a very limited number of chariots (2 Sam. viii. 4) and of mules for the princes and officers instead of the asses (2 Sam. xiii. 29, xviii. 9). According to a Mussulman tradition (*Adra*, xxi. 80), David invented chain armour.<sup>a</sup> The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army, see ARMS AND ARMY.

(2.) The Body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxii. 14; Ewald). But it now assumed a peculiar organization. They were at least in name foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Gath. They are usually called from this circumstance "Cherethites and Pelethites," but had also a body especially from Gath<sup>a</sup> amongst them, of whom the name of one, Ittai, is preserved, as a faithful servant of David (2 Sam. xv. 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who

<sup>o</sup> Ewald, iii. 164. For an elaborate adaptation of the 68th Psalm to this event, see Chandler, ii. 54.

<sup>p</sup> In the title of the LXX. said to be David's "when the house was built after the captivity." It is possible that by "the captivity" may be meant the captivity of the ark in Philistia, as in Judg. xviii. 30.

<sup>a</sup> Compare the legends in Weil's *Legends*, p. 155, and Lane's *Selections from the Koran*, p. 229. Thus

a good coat of mail is often called by the Arabs "*Daoudée*," i. e. Davidian.

<sup>a</sup> A tradition in Jerome (*Qu. Heb.* on 1 Chr. xviii. 17) speaks of their being in the place of the seventy judges appointed by Moses.

<sup>b</sup> But here the reading is doubtful (Ewald, iii. 177, note.)

<sup>b</sup> Perhaps the father of Bathsheba, whose marriage with Uriah would thus be accounted for. (See Blunt, *Coincidences*, II. x.)

at one time Jonathan (2 Sam. xx. 25; 1 Chr. xxvii. 32); Jehoshaphat, the recorder or historian,<sup>a</sup> 2 Sam. xx. 24; and Adoram the tax collector, both of whom survived him (2 Sam. xx. 24; 1 K. xii. 18, iv. 3, 6). Each tribe had its own head (1 Chr. xxvii. 16-22). Of these the most remarkable were Elihu, David's brother (probably Eliab), Prince of Judah (ver. 18), and Jaasiel, the son of Abner, of Benjamin (ver. 21).

But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile; and from his being called "the seer," belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii. 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii. 5-17, xii. 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation,<sup>d</sup> which he supports in the person of Solomon (1 K. i.). Two high priests also appear—representatives of the two rival houses of Aaron (1 Chr. xxiv. 3); here again, as in the case of the two prophets, one, Abiathar,<sup>e</sup> who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges, (1 Chr. xxvii. 34), joining him after the death of Saul, and becoming afterwards the support of his son, the other Zadok, who ministered at Gibeon (1 Chr. xvi. 39), and who was made the head of the Aaronic family (xxvii. 17). Besides these four great religious functionaries there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jehuthun (1 Chr. xxv. 1-31)—Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and guardians of the treasures (1 Chr. xxvi. 1-28) which had been accumulated, since the re-establishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Chr. xxvi. 26-28).

The collection of those various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the Judges. But the main peculiarity of the whole must have been, that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought, and whose arts he fostered. And,

<sup>a</sup> As in the court of Persia (Herod. vi. 100, vii. 90, viii. 100).

<sup>d</sup> 2 Sam. xii. 25, is by some interpreters rendered, "He put him (Solomon) under the hand of Nathan;" thus making Nathan Solomon's preceptor. (See Chandler, ii. 272.)

<sup>e</sup> Compare Blunt, II. xv.

<sup>f</sup> ὁ ἱερεὺς τῶ γένει (Joseph. Ant. vii. 12, §4).

<sup>g</sup> By the reduction of Gath, 1 Chr. xviii. 1.

<sup>h</sup> The punishment on the Moabites is too obviously worded to be explained at length. A Jewish tradition (which shows that there was a sense of its being excessive) maintained that it was in consequence of the

more remarkably still, though not himself a priest, he yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi. 14, 17, 18); and, as if to include his whole court within the same sacerdotal sanctity, Benaiah the captain of his guard was a priest by descent (1 Chr. xxvii. 5), and joined in the sacred music (1 Chr. xvi. 6); David himself and "the captains of the host" arranged the prophetic duties (1 Chr. xxv. 1); and his sons are actually called "priests" (2 Sam. viii. 18; 1 Chr. xviii. 17, translated "chief," and ἀρχαῖ, "chief rulers"), as well as Ira, of Maanasseh (2 Sam. xx. 26, translated "chief ruler," but I.XX. ἱερεὺς). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points. But from this time the idea took possession of the Jewish mind and was never lost. What the heathen historian Justin antedates, by referring it back to Aaron, is a just description of the effect of the reign of David:—*Sacerdos nunc rex creatur; semperque eundem hinc mos apud Judaeos fuit ut eodem rege et sacerdotes haberent; quorum iustitia religione permixta, incredibile quantum conluere* (Justin, xxvi. 2).

(d.) From the internal state of David's kingdom, we pass to its external relations. These will be found at length under the various countries to which they relate. It will be here only necessary to briefly indicate the enlargement of his dominions. Within 10 years from the capture of Jerusalem, he had reduced to a state of permanent subjection the PHILISTINES<sup>1</sup> on the west (2 Sam. viii. 1); the MOABITES<sup>2</sup> on the east (2 Sam. viii. 2), by the exploits of Benaiah (2 Sam. xliii. 20); the SYRIANS on the north-east as far as the Euphrates<sup>3</sup> (2 Sam. viii. 3); the EDOMITES<sup>4</sup> (2 Sam. viii. 14), on the south; and finally the AMMONITES,<sup>5</sup> who had broken their ancient alliance, and made one grand resistance to the advance of his empire (2 Sam. x. 1-19, xii. 26-31). These three last wars were entangled<sup>m</sup> with each other. The last and crowning point was the siege of Rabbah. The ark went with the host (2 Sam. xi. 11). David himself was present at the capture of the city (2 Sam. xii. 29). The savage treatment of the inhabitants—the only instance as far as appears of cruel severity against his enemies—is perhaps to be explained by the formidable nature of their resistance—as the like stain on the generosity of the Black Prince in the massacre of Limoges. The royal crown, or "crown of Milcom," was placed on David's head (2 Sam. xii. 30), and according to Josephus (Ant. vii. 5) was always worn by him afterwards. The Hebrew tradition (Jerome, Qu. Heb. ad 1 Chr. xx. 2) represents it as having been the diadem of the Ammonite god

Moabites having murdered David's parents, when confided to them, 1 Sam. xxii. 3 (Chandler, ii. 163).

<sup>1</sup> Described briefly in a fragment of Nicolaus of Damascus, in Joseph. Ant. vii. 5, §2, and Eusebius, in Eus. Praep. Ev. ix. 80.

<sup>2</sup> To these Eusebius adds the Nabateans and Nebdaneans.

<sup>3</sup> For the details of the punishment, see RABBAH. Chandler (ii. 237, 238) interprets it of hard servitude. Ewald (iii. 201), of actual torture and slaughter.

<sup>m</sup> The story appears to be told twice over (2 Sam. viii. 3-14, x. 1-xi. 1, xii. 26-31).

Milcom, or Moloch; and that Ittai the Gittite (doing what no Israelite could have done, for fear of pollution) tore it from the idol's head, and brought it to David. The general peace which followed was commemorated in the name of "the Peaceful" (Solomon), given to the son born to him at this crisis.<sup>1</sup>

To these wars in general may be ascribed Ps. ex., as illustrating both the sacerdotal character of David, and also his mode of going forth to battle. To the Edomite war, both by its title and contents must be ascribed Ps. lx. 6-12 (cviii. 7-13), describing the assault on Petra. Ps. lxxviii. may probably have received additional touches, as it was sung on the return of the ark from the siege of Rabbah.<sup>2</sup> Ps. xviii.<sup>3</sup> (repeated in 2 Sam. xxi.) is ascribed by its title, and appears from some expressions to belong to the day "When the Lord had delivered him out of the hand of all his enemies," as well as "out of the hand of Saul" (2 Sam. xxii. 1; Ps. xviii. 1). That "day" may be either at this time or at the end of his life. Ps. xx. (Syr. Vers.) and xxi. relate to the general union of religious and of military excellencies displayed at this time of his career. (Ps. xxi. 3, "Thou testest a crown of pure gold upon his head," not improbably refers to the golden crown of Ammon, 2 Sam. xii. 30.)

(3.) In describing the incidents of the life of David after his accession to the throne of Israel, most of the details will be best found under the names to which they refer. Here it will be needful only to give a brief thread, enlarging on those points in which David's individual character is brought out.

Three great calamities may be selected as marking the beginning, middle, and close, of David's otherwise prosperous reign; which appears to be intimately in the question of Gad, 2 Sam. xiv. 13, "a three<sup>4</sup> years' famine, a three months' flight, or a three days' pestilence."

(a.) Of these, the first (the three years' famine) introduces us to the last notices of David's relations with the house of Saul. There has often arisen a painful suspicion in later times, as there seems to have been at the time (xvi. 7), that the oracle which gave as the cause of the famine Saul's massacre of the Gibeonites, may have been connected with the desire to extinguish the last remains of the fallen dynasty. But such an explanation is not needed. The massacre was probably the most recent national crime that had left any deep impression; and the whole tenor of David's conduct towards Saul's family is of an opposite kind. It was then that he took the opportunity of removing the bodies of Saul and Jonathan to their own ances-

tral sepulchre at Zelah (2 Sam. xxi. 14); and it was then, or shortly before, that he gave a permanent home and restored all the property of the family to Mephibosheth, the only surviving son of Jonathan (2 Sam. ix. 1-13, xxi. 7). The seven who perished were, two sons of Saul by Rizpah, and five grandsons—sons of Merab<sup>5</sup> and Adriel (2 Sam. xxi. 8).

(b.) The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king. Underneath the splendour of his last glorious campaign against the Ammonites, was a dark story, known probably at that time only to a very few; and even in later times,<sup>6</sup> kept as much as possible out of the view of the people, but now recognised as one of the most instructive portions of his career—the double crime of adultery with Bathsheba, and of the virtual murder of Uriah. The crimes<sup>7</sup> are undoubtedly those of a common Oriental despot. But the rebuke of Nathan; the sudden revival of the king's conscience; his grief for the sickness of the child; the gathering of his uncles and elder brothers around him; his return of hope and peace; are characteristic of David, and of David only. And if we add to these the two Psalms, the 32nd and the 51st, of which the first by its acknowledged internal evidence, the 2nd by its title<sup>8</sup> also claim to belong to this crisis of David's life, we shall feel that the instruction drawn from the sin has more than compensated to us at least for the scandal occasioned by it.

But, though the "free spirit" and "clean heart" of David remained, and though the birth of Solomon was as auspicious as if nothing had occurred to trouble the victorious festival which succeeded it; the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xxi. 10). The outrage on his daughter Tamar; the murder of his eldest son Amnon; and then the revolt of his best beloved Absalom, brought on the crisis, which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life was aggravated by the impetuosity of Ishb, now perhaps from his complicity in David's crime more unmanageable<sup>9</sup> than ever. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole nation; and if, as appears from 2 Sam. xi. 3, xxiii. 34, Ahithophel was the grandfather of Bathsheba, its main supporter was one whom David had provoked by his own crimes. For its general course, the reader is referred to the names just mentioned. But two or three of its scenes relate so

<sup>1</sup> The golden shields taken in the Syrian war remained long afterwards as trophies in the temple at Jerusalem (2 Sam. viii. 7; Cant. iv. 4). [Anns, *Shelot*, p. 112.] The brass was used for the brazen basins and pillars (2 Sam. viii. 8; I. XX.).

<sup>2</sup> See Hengstenberg on Ps. lxxviii.

<sup>3</sup> The imagery of the thunderstorm, Ps. xviii. 7-14, may possibly allude to the events either of 2 Sam. v. 20-24 (Chandler, ii. 211), or of 2 Sam. vi. 8.

<sup>4</sup> So LXX. and 1 Chr. xxi. 12, instead of seven.

<sup>5</sup> Ewald, iii. 207.

<sup>6</sup> That this incident took place early in the reign, appears (1) from the freshness of the allusion to Saul's act (2 Sam. xxi. 1-8); (2) from the allusions to the massacre of Saul's sons in xix. 28; (3) from the apparent connexion of the story with ch. ix.

<sup>7</sup> The mention of Adriel necessitates the reading of

Merab for Michal.

<sup>8</sup> It is omitted in the Chronicles.

<sup>9</sup> This is the subject of one of the apocryphal dialogues of David (Fabric. *Cod. Apoc. V. Test.* p. 1000). The story is also told in the Koran (xcviii. 20-24), and wild legends are formed out of it (Weil's *Legends*, p. 158-160, 170).

<sup>7</sup> Ewald places it after the captivity. From the two last verses (li. 18, 19) this would be the almost certain conclusion. But is it not allowable to suppose these verses to be an adaptation of the psalm to that later time?

<sup>8</sup> See Blunt's *Coincidences*, II. xi. for a theory perhaps too much elaborated, yet not without some foundation.

<sup>9</sup> Blunt, II. x.; Jerome, *Qu. Heb.* on 2 Sam. xi. 3.

touchingly and peculiarly to David, that this is the place for dwelling upon them.

The first is the most detailed description of any single place that we find in the Jewish history.

It was apparently early on the morning of the day after he had received the news of the rebellion at Hebron that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse; in the midst of which he and his body-guard were conspicuous. They started from a house on the outskirts of the city (2 Sam. xv. 17, LXX.), and every stage of the mournful procession was marked by some incident which called forth a proof of the deep and lasting affection which the king's peculiar character had the power of inspiring in all who knew him. The first distinct halt was by a solitary olive-tree (2 Sam. xv. 18, LXX.) that marked the road to the wilderness of the Jordan. Amongst his guard of Philistines and his faithful company of 600<sup>b</sup> he observed Ittai of Gath, and with the true nobleness of his character entreated the Philistine chief not to peril his own or his countrymen's lives in the service of a fallen and a stranger sovereign. But Ittai declared his resolution (with a fervour which almost inevitably recalls a like profession made almost on the same spot to the great descendant of David centuries afterwards) to follow him in life and in death. They all passed over the ravine of the Kedron; and here, when it became apparent that the king was really bent on departure, "the whole land wept with a loud voice"—the mountain and the valley resounded with the wail of the people. At this point they were overtaken by the two priests, Zadok and Abiathar, bringing the ark from its place on the sacred hill to accompany David on his flight—Abiathar, the elder, going forward up the mountain, as the multitude defiled past him. Again, with a spirit worthy of the king, who was prophet as well as priest, David turned them back. He had no superstitious belief in the ark as a charm; he had too much reverence for it to risk it in his personal peril. And now the whole crowd turned up the mountain pathway; all wailing, all with their heads muffled as they went; the king only distinguished from the rest by his unshodden feet. At the top of the mountain, consecrated by an altar of worship, they were met by Hushai the Archite, "the friend," as he was officially called, of the king. The priestly garment, which he wore<sup>c</sup> after the fashion as it would seem of David's chief officers, was torn, and his head was smeared with dust, in the bitterness of his grief. In him David saw his first gleam of hope. A moment before, the tidings had come of the treason of Ahithophel; and to frustrate his designs Hushai was sent back, just in time to meet Absalom arriving from Hebron. It was noon when David passed over the mountain top, and now, as Jerusalem was left behind, and the new scene opened before him, two new characters appeared, both in connexion with the hostile tribe of Benjamin, whose territory they were entering. One was Ziba, servant of Mephibosheth, taking advantage of the civil war to make his own fortunes. At Bahurim, also evidently on the downward pass, came

forth one of its inhabitants, Shimei, in whose furious curses broke out the long suppressed hatred of the fallen family of Saul, as well perhaps as the popular feeling against the murderer<sup>d</sup> of Uriah. With characteristic replies to both, the king descended to the Jordan valley (2 Sam. xvi. 14; and comp. xvii. 22; *Jos. Ant.* vii. 9, §4) and there rested after the long and eventful day at the ford or bridge<sup>e</sup> (*Abara*) of the river. At midnight they were aroused by the arrival of the two sons of the high priests, and by break of dawn they had reached the opposite side in safety.

To the dawn of that morning is to be ascribed Ps. iii., and (according to Ewald, though this seems less certain) to the previous evening, Ps. iv. Ps. cxlii. by its title in the LXX.—"When his son was pursuing him," belongs to this time. Also by long popular belief the trans-Jordanic exile of Ps. xlii. has been supposed to be David, and the complaints of Ps. lv., lxi., and cix., to be levelled against Ahithophel.

The history of the remaining period<sup>f</sup> of the rebellion is compressed into a brief summary. Mahanaim was the capital of David's exile, as it had been of the exiled house of Saul (2 Sam. xvii. 24, comp. ii. 8, 12). Three great chiefs of that pastoral district are specially mentioned as supporting him; one, of great age, not before named, Buzai of the Gileadite; the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (vii. 30, x. 2); and Machir, the son of Ammiel, the former protector of the child of David's friend Jonathan (2 Sam. xvii. 27, ix. 4). His forces were arranged under the three great military officers who remained faithful to his fortunes—Joab, captain of the host; Abishai, captain of "the mighty men;" and Ittai, who seems to have taken the place of Beniah (had he wavered in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. xviii. 2). On Absalom's side, was David's nephew, Amasa (ib. xvii. 25). The warlike spirit of the old king and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelps in the 'field' (or a fierce wild bear in the Jordan valley, LXX.):" the king himself, as of old, "loving not with the people," but "hid in some pit or some other place" (2 Sam. xvii. 8, 9). The final battle was fought in the "forest of Ephraim," which terminated in the accident leading to the death of Absalom. At this point the narrative resumes its minute detail. As if to mark the greatness of the calamity, every particular of its first reception is recorded. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavouring to outstrip the other, were seen running breathless from the field. The first who arrived was Ahimaaz, the son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entreated by Joab not to make himself the bearer of tidings so mournful; and it would seem that when he came to the point his heart failed, and he spoke only of the great confusion in which he had left the army. At this

<sup>b</sup> Ewald, iii. 177, note. According to the reading of *Gibbōim* for *Gittim*.

<sup>c</sup> 2 Sam. xv. 32. *Cutaneth*; *ῥὸν χιτῶνα*; A. V. "coat."

<sup>d</sup> Blunt, II. x.

<sup>e</sup> Comp. 2 Sam. xv. 28, xix. 18 (both Chetib;

the Keri has *Araboth*, i. e. the "plains" or "deserts").

<sup>f</sup> If Ewald's interpretation of 2 Sam. xxiv. 13, be correct, it was 3 months. The Jewish tradition (in Jerome, *Qu. Heb.* on 2 Sam. iv. 4) makes it 6.

<sup>g</sup> For the Mussulman legend, see Weil, p. 161.

moment the other messenger burst in—a stranger, perhaps an Ethiopian<sup>b</sup>—and abruptly revealed the fatal news (2 Sam. xviii. 19-32). [CUSHI.] The passionate burst of grief which followed, is one of the best proofs of the deep affection of David's character. He wrapt himself up in his sorrow; and even at the very moment of his triumph, he could not forget the hand that had slain his son. He made a solemn vow to supersede Joab by Amasa, and in this was laid the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xiv. 13).

The return was marked at every stage by rejoicing and amnesty.—Shimei forgiven, Mephibosheth<sup>c</sup> partially reinstated, Barzillai rewarded by the gifts long remembered, to his son CHIMHAM (2 Sam. xiv. 16-49; 1 K. ii. 7). Judah was first reconciled. The embers of the insurrection still smouldering (2 Sam. xiv. 41-43) in David's hereditary enemies of the tribe of Benjamin were trampled out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. And David again reigned in undisturbed peace at Jerusalem (2 Sam. xx. 1-22).<sup>d</sup>

(c.) The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gd. The occasion which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv. 1-9; 1 Chr. xxi. 1-7, xxvii. 23, 24); an attempt not unreasonably suggested by the increase of his power, but implying a confidence and pride alien to the spirit inculcated on the kings of the chosen people [see NUMBERS]. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Chr. xxi. 6). The king also scrupled to number those who were under 20 years of age (1 Chr. xxvii. 23), and the final result never was recorded in the "Chronicles of King David" (1 Chr. xxvii. 24). The plague, however, and its cessation were commemorated down to the latest times of the Jewish nation. Possibly Ps. xxv. and xci. had reference (whether David's or not) to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pestilence, or, as it was called, like the Black Death of 1348, "The Death." Outside the walls of Jerusalem, Araunah or Ornan, a wealthy Jebusite—perhaps even the ancient king of Jebus (2 Sam. xxiv. 23)<sup>k</sup>—possessed a threshing-floor; there he and his

sons were engaged in threshing the corn gathered in from the harvest (1 Chr. xxi. 20). At this spot an awful vision appeared, such as is described in the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the devoted city.<sup>l</sup> The scene of such an apparition at such a moment was at once marked out for a sanctuary. David demanded, and Araunah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of "Moriah" (2 Chr. iii. 1); and for the first time a holy place,<sup>m</sup> sanctified by a vision of the Divine presence, was recognised in Jerusalem. It was this spot which afterwards became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with almost idolatrous veneration, in the centre of the Mussulman "Dome of the Rock" (see Professor Willis in Willis's *Holy City*, i.).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the ark, which still remained inside his own palace in its temporary tent. Such schemes, we are told, he had entertained after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their delay. One, that the ancient nomadic form<sup>n</sup> of worship was not yet to be abandoned (2 Sam. vii. 6); the other, that David's wars<sup>o</sup> unfitted him to be the founder of a seat of peaceful worship (1 Chr. xxi. 8). But a solemn assurance was given that his dynasty should continue "for ever" to continue the work (2 Sam. vii. 13; 1 Chr. xii. 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him therefore the stores<sup>p</sup> and the plans of the future Temple (according to 1 Chr. xxi. 2-19, xxviii. 1-xxix. 19) were committed.

A formidable conspiracy to interrupt the succession broke out in the last days of David's reign [see ADONIJAH], which detached from his person two of his court, who from personal offence or adherence to the ancient family had been alienated from him—Joab and Abiathar. But Zadok, Nathan, Benaiah, Shimei, and Rei<sup>q</sup> remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's auspices<sup>r</sup> (1 K. i. 1-53).

The Psalms which relate to this period are, by title, Ps. xcvi. by internal evidence, Ps. ii.

By this time David's infirmities had grown upon him. The warmth of his exhausted frame was attempted to be restored by the introduction of a

<sup>b</sup> "Cushi"—or Hebrew *ka-Cushi*, with the article. It is doubtful whether it is a proper name.

<sup>c</sup> The injustice done to Mephibosheth by this division of his property was believed in later traditions to be the sin which drew down the division of David's kingdom (Jerome, *Qu. Heb.* on 2 Sam. xiv.). The question is argued at length by Selden, *De Successione*, c. 25, pp. 67, 68. (Chandler, ii. 376.)

<sup>d</sup> To many English readers, the events and names of this period have acquired a double interest from the power and skill with which Dryden has made the story of "Absalom and Aithophel" the basis of his political poem on the Court of King Charles II.

<sup>e</sup> In the original the expression is much stronger than in the A. V.—"Araunah, the king." [See ARANAH.]

<sup>f</sup> This apparition is also described in a fragment of the heathen hi-torian Eupolemus (*Eus. Præp. Ev.* ix. 30), but is confused with the warning of Nathan

against building the temple. "An angel pointed out the place where the altar was to be, but forbade him to build the temple, as being stained with blood, and having fought many wars. His name was Duanathan."

<sup>g</sup> In 1 Chr. xvi. 26, a fire from heaven descends to sanctify the altar. This is not mentioned in 2 Sam. xxi.

<sup>h</sup> This is the subject of one of the apocryphal colloquia (*Eub. Apoc.* v. i. p. 1001).

<sup>i</sup> In this respect David still belonged to the older generation of heroes. (See Jerome, *Qu. Heb. ad loc.*)

<sup>j</sup> Eupolemus (*Eus. Præp. Ev.* ix. 30) makes David send fleets for these stores to Elath and to Ophir.

<sup>k</sup> Jerome (*Qu. Heb. ad loc.*) renders Rei = Ira, not improbably. Ewald's conjecture (*ibid.* 266, note) is that he is identical with Radai.

<sup>l</sup> Eupolemus (*Eus. Præp. Ev.* ix. 30) adds, "in the presence of the high-priest Eli."

young Shunammite, of the name of Abisag, mentioned apparently for the sake of an incident which grew up in connexion with her out of the later events (1 K. i. 1, ii. 17). His last song is preserved—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had felt in realizing it (2 Sam. xxiii. 1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings against Joab and Shimei, and charges to remember the children of Barzillai (1 K. ii. 1-9).

He died, according to Josephus (*Ant.* viii. 15, 2), at the age of 70, and "was buried in the city of David."<sup>\*</sup> After the return from the captivity, "the sepulchres of David" were still pointed out "between Siloah and the house of the mighty men," or "the guardhouse." (*Neh.* iii. 16.) His tomb, which became the general sepulchre of the kings of Judah, was pointed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says St. Peter at Pentecost (*Acts* ii. 29); and Josephus (*Ant.* vii. 15, 3; xiii. 8, 4; xvi. 7, 1) states that, Solomon having buried a vast treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into ruin in the time of Hadrian (*Dio Cassius*, lxi. 14). In Jerome's time a tomb, so called, was the object of pilgrimage (*Ep. ad Marcell.* 17 (46)), but apparently in the neighbourhood of Bethlehem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem commonly called Mount Zion, under the so-called "Cœmiculum." For the description of it see Barclay's *City of the Great King*, p. 209. For the traditions concerning it see Williams' *Holy City*, ii. 509-513. The so-called "Tombs of the Kings" have of late been claimed as the royal sepulchre by De Sauley (ii. 162-215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are *outside* the walls, and therefore cannot be identified with the tomb of David, which was emphatically *within* the walls (see Robinson, iii. p. 252, *note*).

The character of David has been so naturally brought out in the incidents of his life that it need not be here described in detail. In the complexity of its elements,—passion, tenderness, generosity, heroism—the soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king—the romantic friend, the chivalrous leader, the devoted father—there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the variety of elements included within it. But David's character stands at a higher point of the sacred history, and represents the Jewish people just at the moment of their transition from the lofty virtues of the older system to the fuller civilisation and cultivation of the later. In this man-

ner he becomes naturally, if one may so say, the likeness or portrait of the last and grandest development of the nation and of the monarchy is the person and the period of the Messiah. In a sense more than figurative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Jacob, or of Moses, but he was truly "the son of David."

To his own people his was the name most dearly cherished after their first ancestor Abraham. "The city of David," "the house of David," "the throne of David," "the seed of David," "the oath sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New, and they serve to mark the lasting significance of his appearance in history.<sup>u</sup>

His Psalms (whether those actually written by himself be many or few) have been the source of consolation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings, but eminently characteristic of David,—the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expressions of devotion which have been equally used through the whole Christian Church—Abyssinian, Greek, Latin, Puritan, Anglican.

The difficulties which attend on his character are valuable as proofs of the impartiality of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Bayle)<sup>v</sup> in later times, have seized on its dark features and exaggerated them to the utmost. And it has been often asked, both by the scoffers and the serious, how the man after God's<sup>w</sup> own heart could have murdered Uriah, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter. "Who is called 'the man after God's own heart?' David, the Hebrew king, had fallen into sins enough—blackest crimes—there was no want of sin. And therefore the unbelievers sneer, and ask 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often baffled, never ended struggle of it be forgotten? . . . David's life and history as written for us in those Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best.

<sup>\*</sup> A striking legend of his death is preserved in Well's *Legends*, 169, 170; a very absurd one, in Basnage, *Hist. des Juifs*, bk. v. ch. 2.

<sup>u</sup> This variety of elements is strikingly expressed in "the Song of David," a poem written by the unfortunate Christopher Smart in charcoal on the walls of his cell, in the intervals of madness.

<sup>v</sup> It may be remarked that the name never appears as given to any one else in the Jewish history, as if, like "Peter" in the Papacy, it was too sacred to be appropriated.

<sup>w</sup> For some just remarks in answer to Bayle on the

necessity of taking into account the circumstances of David's age and country, see Dean Milman's *Hist. of the Jews*, i. 247.

<sup>x</sup> This expression has been perhaps too much made of. It occurs only once in the Scriptures (1 Sam. xiii. 14, quoted again in *Acts* xiii. 22), where it merely indicates a man whom God will approve, in distinction from Saul who was rejected. A much stronger and more peculiar commendation of David is that contained in 1 K. xv. 3-5, and implied in Ps. lxxviii. 20-28.

Struggle often baffled—sore baffled—driven as into entire wreck: yet a struggle never ended, ever with tears, repentance, true unconquerable purpose begun anew" (Carlyle's *Heroes and Hero-Worship*, p. 72).

[A. P. S.]

### DAVID, CITY OF. [JERUSALEM.]

DAY (ἡμέρα, ἡμέρα, perhaps from *דָּוָה*, *laivo*, to be weary). The variable length of the natural day ("ab exortu ad occasum solis," Censor. *de Die Nat.* 23) at different seasons led in the very earliest times to the adoption of the civil day (or one revolution of the sun) as a standard of time. The commencement of the civil day varies in different nations: the Babylonians (like the people of Nuremberg) reckoned it from sunrise to sunrise (Isidor. *Orig.* v. 30); the Umbrians from noon to noon; the Romans from midnight to midnight (Plin. ii. 79); the Athenians and others from sunset to sunset (Macrob. *Saturn.* i. 3; Gell. iii. 2).

The Hebrews naturally adopted the latter reckoning (Lev. xxiii. 32, "from even to even shall ye celebrate your sabbath") from Gen. i. 5, "the evening and the morning were the first day" (a passage which the Jews are said to have quoted to Alexander the Great (*Germ. Jund.* 66, 1; Reland, *Ant. Hebr.* iv. 15)). Some (as in Godwyn's *Moses and Aaron*) argue foolishly from Matt. xviii. 1, that they began their civil day in the morning; but the expression *ἐπιφωσκούσα* shows that the natural day is there intended. Hence the expressions "evening-morning" = day (Dan. viii. 14; LXX. *πυρρήμερον*; also 2 Cor. xi. 25), the Hindoo *ahoratra* (You Bohlen on Gen. i. 4), and *πυρρήμερον* (2 Cor. xi. 25). There was a similar custom among the Athenians, Arabians, and ancient Teutons (Tac. *Germ.* xi., "nec diem numerum ut apud nos, sed noctivum computant . . . nox duceat diem videtur") and Celtic nations (Ctes. *de H. G.* vi. 18, "ut noctem dies subsequatur"). This mode of reckoning was widely spread; it is found in the Roman law (Gains, i. 112), in the Nibelungenlied, in the Sallie law (*inter decem noctes*), in our own terms "fortnight," "seven-nights" (see Orelli, &c. in loc. Tac.), and even among the Siamese ("they reckon by nights," Bowring, i. 137) and New Zealanders (Taylor's *Tu-Ika-Mani*, p. 20). No doubt this arose from the general notion "that the first day in Eden was 36 hours long" (Lightfoot's Works, ii. 331, ed. Pitman; Hes. *Theogon.* 123; Aristoph. *Av.* 693; Wilkinson, *Anc. Eg.* iv. 273). Kalisch plausibly refers it to the use of lunar years (*Gen.* p. 67). Sometimes however they reckoned from sunrise (*ἡμεροβόριον*, comp. Ps. i. 2; Lev. vii. 15). The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day. Roughly indeed they were content to divide it into "morning, evening, and noonday" (Ps. lv. 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdivided. These are held to have been:—

I. *Nesheph*, נֶשֶׁפֶּה (from נָשַׁף, "to blow") and *Shachur*, שָׁחַר, or the dawn. After their acquaintance with Persia they divided this into, (a) the time when the eastern, and (b) when the western horizon was illuminated, like the Greek *Leucothes*—Matuta—and Aurora; or "the gray dawn" (Milton), and the rosy dawn. Hence we find the *dual* Shahnam as a proper name (1 Chr. viii. 8). The

writers of the Jerus. Talmud divide the dawn into four parts, of which the (1.) was *Aijeleth hashachar*, "the gazelle of the morning" [AJELETH SHAHAR], a name by which the Arabians call the sun (comp. "eyelids of the dawn," Job iii. 9; ἀμέρας βλέφαρον, Soph. *Antig.* 109). This was the time when Christ arose (Mark xvi. 2; John xx. 1; Rev. xiii. 16; ἡ ἐπιφωσκούσα, Matt. xxviii. 1).

The other three divisions of the dawn were, (2.) "when one can distinguish blue from white" (πρωτὸ σκοτίας ἐτι ὀψης, John xx. 1; "obscurum adhuc coepit lucis," Tac. *II.* iv. 2). At this time they began to recite the phylacteries. (3.) Cum lucebat oriens (ὄρθρος βαδύς, Luke). (4.) Oriente sole (ἀπὸ πρωτῆς ἀνατείλαντος τοῦ ἡλίου, Mark xvi. 2; Lightfoot, *Hor. Hebr.* ad Marc. xvi. 2).

II. *Boker*, בֹּקֶר, "sunrise." Some suppose that the Jews, like other Oriental nations, commenced their civil day at this time until the Exodus (Jewings's *Jewish Ant.*).

III. *Chom Hanyom*, חֹם הַיּוֹם, "heat of the day" (ἔως διεθερμάνθη ἡ ἡμέρα, LXX.), about 9 o'clock.

IV. *Tzaharaim*, צְהַרַיִם, "the two noons" (Gen. xliii. 16; Deut. xxviii. 29).

V. *Kuach hayom*, רוּחַ הַיּוֹם, "the cool (lit. wind) of the day," before sunset (Gen. iii. 8); so called by the Persians to this day (Chardin, *Voy.* iv. 8; Jahn, *Arch. Bibl.* §29).

VI. *Erech*, עֶרֶב, "evening." The phrase "between the two evenings" (Ex. xvi. 12, xxx. 8), being the time marked for slaying the paschal lamb and offering the evening sacrifice (Ex. xii. 6, xiv. 39), led to a dispute between the Karites and Samaritans on the one hand, and the Pharisees on the other. The former took it to mean between sunset and full darkness (Deut. xvi. 6); the Rabbins explained it as the time between the beginning (δελὰ πρωτῆς, "little evening," Flab.) and end of sunset (δ. ὀψία, or real sunset: Jos. *B. J.* vi. 9, §3; Gesen. s. v.; Jahn, *Arch. Bibl.* §101; Bochart, *Hierez.* i. p. 558).

Since the sabbaths were reckoned from sunset to sunset (Lev. xxiii. 32), the Sabbatarian Pharisees, in that spirit of scrupulous superstition which so often called forth the rebukes of our Lord, were led to settle the minutest rules for distinguishing the actual instant when the sabbath began (ὀψία, Matt. viii. 16 = ὅτε ἔδω ὁ ἥλιος, Mark). They therefore called the time between the actual sunset and the appearance of three stars (Maimon. in Shabb. cap. 5, comp. Nehem. iv. 21, 22), and the Talmudists decided that "if on the evening of the sabbath a man did any work after one star had appeared, he was forgiven; if after the appearance of two, he must offer a sacrifice for a doubtful transgression; if after three stars were visible, he must offer a sin-offering;" the order being reversed for works done on the evening after the actual sabbath (Lightfoot, *Hor. Hebr.* ad Matt. viii. 16; Otho, *Lex. Rab.* s. v. *Sabbatum*).

Before the captivity the Jews divided the night into three watches (Ps. lxxiii. 6, xc. 4), viz. the first watch, lasting till midnight (Lam. ii. 19, A. V. "the beginning of the watches") = ἀρχὴ νυκτός; the "middle watch" (which proves the statement), lasting till cock-crow (Judg. vii. 15) = μέσον νυκτός; and the morning watch, lasting till sunrise (Ex.

xiv. 24) = ἀμφιλόκη νύξ (Hom. *Il.* vii. 433). These divisions were probably connected with the Levitical duties in the Temple service. The Jews, however, say (in spite of their own definition, "a watch is the third part of the night") that they always had four night-watches (comp. Neh. ix. 3), but that the fourth was counted as a part of the morning (Buxtorf's *Lev. Talm.* s. v. Carpzov. *Appar. Crit.* p. 347; Neland, iv. 18).

In the N. T. we have allusions to four watches, a division borrowed from the Greeks (Herod. ix. 51) and Romans (φυλακή, τὸ τέταρτον μέρος τῆς νυκτός, Suid.). These were, 1. ὥφελ, ὥφελ, or ὥφελ ὥρα, from twilight till 9 o'clock (Mark xi. 11; John xx. 19); 2. μεσονύκτιον, midnight, from 9 till 12 o'clock (Mark xiii. 35); 3. ἀλεκτροφωνία, till 3 in the morning (Mark xiii. 35, ἀπ. λεγ.; 3 Mac. v. 23); 4. πρωΐ, till daybreak, the same as πρωΐα (ὥρα) (John xviii. 28; Jos. *Ant.* v. 6, §5, xviii. 9, §6).

The word held to mean "hour" is first found in Dan. iii. 6, 15, v. 5 (*Shu'ah*, נְשִׁי, also "a moment," iv. 19). Perhaps the Jews, like the Greeks, learnt from the Babylonians the division of the day into 12 parts (Herod. ii. 109). In our Lord's time the division was common (John xi. 9). It is probable that Ahaz introduced the first sundial from Babylon (ὥρολόγιον, Πιλήγ, Is. xxxviii. 8; 2 K. xx. 11), as Anaximenes did the first σκιδ-θρονον into Greece (Jahn, *Arch.* §101). Possibly the Jews at a later period adopted the clepsydra (Jos. *Ant.* xi. 6). The third, sixth, and ninth hours were devoted to prayer (Dan. vi. 10; Acts ii. 15, iii. 1, &c.).

On the Jewish way of counting their week-days from the sabbath, see Lightfoot's *Works*, ii. 334, ed. Pitman. [WEEK.]

The word "day" is used of a festal day (Hos. vii. 5); a birthday (Job iii. 1); a day of ruin (Hos. i. 11; Job xviii. 20; comp. *tempus, tempora reipublice*, Cic., and *dies Canensis*); the judgment-day (Joel i. 15; 1 Thess. v. 2); the kingdom of Christ (John vii. 56; Rom. xiii. 12); and in other senses which are mostly self-explaining. In 1 Cor. iv. 3, ὑπὸ ἀνθρωπίνης ἡμέρας is rendered "by man's judgment." Jerome, *ad Algas. Quæst.* x. considers this a Cilicisim (Bochart, *Hieroz.* ii. 471). On the prophetic or year-day system (Lev. xxv. 3, 4; Num. xiv. 34; Ez. iv. 2-6, &c.), see a treatise in Elliot's *Hor. Apoc.* iii. 154, sq. The expression ἐπιούσιον, rendered "daily" in Matt. vi. 11, is a ἄπ. λεγ., and has been much disputed. It is unknown to classical Greek (εἰκε πεπλάσθαι ὑπὸ τῶν Εὐαγγελιστῶν, Orig. *Orat.* 16). The Vulg. has *supersubstantivum*, a rendering recommended by Abelard to the nuns of the Paraclete. Theophyl. explains it as ἐπὶ τῇ οὐσίᾳ καὶ συντάξει ἡμῶν ἀνταρκτικῆς, and he is followed by most commentators (cf. Chrysost. *Hom. in Or. Domin.* Suid. & Etym. M. s. v.). Salmasius, Grotius, &c., arguing from the rendering ἡμέρη in the Nazarene Gospel, translate it as though it were = τῆς ἐπιούσης ἡμέρας, or eis aἰῶνα (Sixt. Senensis *Bibl. Sanct.* p. 444 a). But see the question examined at full length (after Tholuck) in Alford's *Greek Test.* ad loc.; Schleusner, *Lex. s. v.*; Wetstein, *N. T.* i. p. 461, &c. See CHRONOLGY. [F. W. F.]

**DAYSMAN**, an old English term, meaning umpire or arbitrator (Job ix. 33). It is derived from *day*, in the specific sense of a day fixed for

a trial (comp. 1 Cor. iv. 3, where ἀνθρωπίνη ἡμέρα—lit. *man's day*, and so given in Wycliffe's translation—is rendered "man's judgment" in the A. V.). Similar expressions occur in German (*eine sache tagen* = to bring a matter before a court of justice) and other Teutonic languages. The word "daysman" is found in Spenser's *Faerie Queene*, ii. c. 8, in the Bible published in 1551 (1 Sam. ii. 25), and in other works of the same age. [W. L. B.]

**DEACON** (Διάκονος; *Diaconus*). The office described by this title appears in the N. T. as the correlative of ἐπίσκοπος [BISHOP]. The two are mentioned together in Phil. i. 1; 1 Tim. iii. 2, 8. The union of the two in the LXX. of Is. lx. 17, may have suggested both as lit titles for the officers of the Christian Church, or have led to the adoption of one after the other had been chosen on independent grounds. The coincidence, at all events, soon attracted notice, and was appealed to by Clement of Rome (1 Cor. xlii.) as prophetic. Like most words of similar import, it appears to have been first used in its generic sense, implying subordinate activity (1 Cor. iii. 5; 2 Cor. vi. 4), and afterwards to have gained a more defined connotation, as applied to a distinct body of men in the Christian society.

The narrative of Acts vi. is commonly referred to as giving an account of the institution of this office. The Apostles, in order to meet the complaints of the Hellenistic Jews, that their widows were neglected in the daily ministrations (διακονία), call on the body of believers to choose seven men "full of the Holy Ghost and of wisdom," whom they "may appoint over this business." The seven are accordingly appointed, and it is left to them "to serve tables"—to attend to the distribution of the alms of the Church, in money or in kind (Neander, *Pfanz. u. Leit.* i. p. 51, ed. 1847), while the ministry (διακονία) of the word is reserved for the Apostles. On this view of the narrative the seven were the first deacons, and the name and the office were derived by other Churches from that of Jerusalem. At a later period, the desire to reproduce the Apostolic pattern led in many instances to a limitation of the deacons in a given diocese to the original number (*Conc. Neocaes.* c. 14).

It may be questioned, however, whether the seven were not appointed to higher functions than those of the deacons of the N. T. They are spoken of not by that title but as "the seven" (Acts xvi. 8). The gifts implied in the words "full of the Holy Ghost and of wisdom" are higher than those required for the office of deacon in 1 Tim. iii. Two out of the seven do the work of preachers and evangelists. It has been inferred accordingly (Stanley, *Apostolic Ages*, p. 62), that we meet in this narrative with the record of a special institution to meet a special emergency, and that the seven were not deacons, in the later sense of the term, but commissioners who were to superintend those that did the work of deacons. There are indications, however, of the existence of another body in the Church of Jerusalem whom we may compare with the deacons of Phil. i. 1, and 1 Tim. iii. 8. As the πρεσβύτεροι of Acts xiv. 23, xv. 6; 1 Pet. v. 1, were not merely men advanced in years, so the νεώτεροι or νεανίσκοι of Acts v. 6, 10 were probably not merely young men, but persons occupying a distinct position and exercising distinct functions (cf. Mosheim *de Reb. Christ.* p. 118). The identity of ἐπίσκοποι and πρεσβύτεροι has

been shown under *Bisitot*; and it is natural to infer from this that there was a similar relation between the two titles of *διδάκοντοι* and *νεσρέποι*. The parallelism of *δ-νεσρέποι* and *δ-διδάκοντες* in Luke xxii. 26, tends to the same conclusion.

Assuming on these data the identity of the two names we have to ask—

(1), to what previous organisation, if any, the order is traceable?

(2), what were the qualifications and functions of the men so designated?

I. As the constitution of the Jewish synagogue had its elders (*זקנים*) or pastors (*רבנים*), so also it had its subordinate officers (*דיינים*), the *δυναμειται* of Luke iv. 20, whose work it was to give the reader the rolls containing the lessons for the day, to clean the synagogue, to open and close it at the right times (SYNAGOGUE; and see Winer). It was natural that when the Galilean disciples found themselves at the head of congregations of their own, they should adopt this as well as other parts of the arrangements with which they were familiar, and accordingly the *νεσρέποι* of Acts v. do what the *δυναμειται* of the synagogue would have done under like circumstances.

II. The moral qualifications described in 1 Tim. iii., as necessary for the office of a deacon, are substantially the same as those of the bishop. The deacons, however, were not required to be "given to hospitality," nor to be "apt to teach." It was enough for them to "hold the mystery of the faith in a pure conscience." They were not to gain their living by disreputable occupations (*μη ἀσχεποῦσθαι*). On offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii. 10), and if this ended satisfactorily were to enter on it. On the view that has been taken of the events of Acts vi., there is no direct evidence in the N. T. that they were appointed by the laying on of hands, but it is at least probable that what was so familiar as the outward sign of the bestowal of spiritual gifts or functions would not have been omitted in this instance, and therefore that in this respect the later practice of the Church was in harmony with the earlier. What the functions of the deacons were we are left to infer from that later practice, from the analogy of the synagogue and from the scanty notices of the N. T. From these data we may think of the *νεσρέποι* in the Church of Jerusalem as preparing the rooms in which the disciples met, taking part in the distribution of alms out of the common fund, at first with no direct supervision, then under that of the Seven, and afterwards under the elders, maintaining order at the daily meetings of the disciples to break bread, baptising new converts, distributing the bread and the wine of the Lord's Supper, which the Apostle or his representative had blessed. In the Asiatic and Greek Churches, in which the surrender of property and consequent dependence of large numbers on the common treasury had never been carried to the same extent, this work would be one of less difficulty than it was when "the Grecians murmured against the Hebrews," and hence probably it was that the appointment of the Seven stands out as a solitary fact with nothing answering to it in the later organisation. Whatever alms there were to be distributed would naturally pass through their hands, and the other functions continued probably as before. It does not appear to have belonged to the office of a deacon to teach publicly in the

Church. The possession of any special *χάρισμα* would lead naturally to a higher work and office, but the idea that the diaconate was but a probation through which a man had to pass before he could be an elder or bishop was foreign to the constitution of the Church of the 1st century. Whatever countenance it may receive from the common patristic interpretation of 1 Tim. iii. 13 (cf. Estius and Hammond *ad loc.*), there can be little doubt (as all the higher order of expositors have felt, cf. Wiesinger and Ellicott *ad loc.*) that when St. Paul speaks of the *καλὰς βαθεύας*, which is gained by those who "do the office of a deacon well," he refers to the honour which belongs essentially to the lower work, not to that which they were to find in promotion to a higher. Traces of the primitive constitution and of the permanence of the diaconate are found even in the more developed system of which we find the commencement in the Ignatian epistles. Originally the deacons had been the helpers of the bishop-elder of a Church of a given district. When the two names of the latter title were divided and the bishop presided, whether as *præsum inter pares*, or with a more absolute authority over many elders, the deacons appear to have been dependent directly on him and not on the presbyters, and as being his ministers, the "eyes and ears of the bishop" (*Const. Apost. ii. 44*), were tempted to set themselves up against the elders. Hence the necessity of laws like those of *Conc. Nic. c. 18*; *Conc. Carth. iv. c. 37*, enjoining greater humility, and hence probably the strong language of Ignatius as to the reverence due to deacons (*Ep. ad Trall. c. 3*; *ad Smyrn. c. 8*). [E. H. P.]

#### DEACONESS (*Διακονος*; *Diaconissa*, Tert.)

The word *Διακονος* is found in Rom. xvi. 1 associated with a female name, and this has led to the conclusion that there existed in the Apostolic age, as there undoubtedly did a little later (Pliny. *Ep. ad Traj.*), an order of women bearing that title, and exercising in relation to their own sex functions which were analogous to those of the deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi. 6, 12 belonged to such an order (Herzog, *Real-Encycl. sub voc.*). The rules given as to the conduct of women in 1 Tim iii. 11, Tit. ii. 3, have in like manner been referred to them (Chrysost. Theophyl. Hamm. Wiesinger. *ad loc.*), and they have been identified even with the "widows" of 1 Tim. v. 3-10 (Schaff, *Apost. Kirche*, p. 356).

In some of these instances, however, it seems hardly doubtful that writers have transferred to the earliest age of the Church the organisation of a later. It was of course natural that the example recorded in Luke viii. 2, 3, should be followed by others, even when the Lord was no longer with His disciples. The new life which pervaded the whole Christian society (Acts ii. 44, 45, iv. 31, 32) would lead women as well as men to devote themselves to labours of love. The strong feeling that the true *θρησκεία* of Christians consisted in "visiting the fatherless and the widow" would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (cf. Grot. on Rom. xvi. 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christian truth (*Tit. ii. 3, 4*), possibly in the preparation of female catechumens. Even the later organisation implies the previous

existence of the germs from which it was developed. It may be questionable, however, whether the passages referred to imply a recognised body bearing a distinct name. The "widows" of 1 Tim. v. 3-10 were clearly, so far as the rule of ver. 9 was acted on, women who were no longer able to discharge the active duties of life, and were therefore maintained by the Church that they might pass their remaining days in "prayers night and day." The conditions of v. 10 may, however, imply that those only who had been previously active in ministering to the brethren, who had in that sense been deaconesses, were entitled to such a maintenance. For the fuller treatment of this subject, see WIDOWS. On the existence of deaconesses in the Apostolic age, see Mosheim *de Reb. Christ.* p. 118; Neander, *Pfanz.* u. *Leit.* i. p. 265; Augusti. *Handb. der Christ. Archäol.* ii. 3.

[E. H. P.]

**DEAD SEA.** This name nowhere occurs in the Bible, and appears not to have existed until the 2nd century after Christ. It originated in an erroneous opinion, and there can be little doubt that to the name is due in a great measure the mistakes and misrepresentations which were for so long prevalent regarding this lake, and which have not indeed yet wholly ceased to exist.

In the O. T. the lake is called "the Salt Sea," and "the Sea of the Plain" (*Arabah*), and under the former of these names it will be found described. [SALT SEA.]

[G.]

### DEARTH. [FAMINE.]

**DE'BIR**, the name of three places of Palestine.

1. **דְּבִיר**, but in Judg. and Chr. **דְּבִיר**; **Δαβίρ**; Alex. **Δαβελ**; *Dahir*), a town in the mountains of Judah (Josh. xv. 49), one of a group of eleven cities to the west of Hebron. In the narrative it is mentioned as being the next place which Joshua took after Hebron (x. 38). It was the seat of a king (x. 39, xii. 13) and was one of the towns of the Anakim, and from which they were utterly destroyed by Joshua (xi. 21). The earlier name of Debir was Kirjath-sepher, "city of book" (Josh. xv. 15; Judg. i. 11), and Kirjath-sannah, "city of palm" (Josh. xv. 49). The records of its conquest vary, though not very materially. In Josh. xv. 17 and Judg. i. 13 a detailed account is given of its capture by Othniel son of Kenaz, for love of Achsah the daughter of Caleb, while in the general history of the conquest it is ascribed to the great commander himself (Josh. x. 38, 39). In the last two passages the name is given in the Hebrew text as Debirah (**דְּבִירָה**). It was one of the cities given with their "suburbs" (**בְּנֵי־עִיר**) to the priests (Josh. xxi. 15; 1 Chr. vi. 58). Debir does not appear to have been known to Jerome, nor has it been discovered with certainty in modern times. About three miles to the W. of Hebron is a deep and secluded valley called the *Wady Nunkh*, enclosed on the north by hills of which one bears a name certainly suggestive of Debir,—*Debir-ben*. (See the narrative of Rosen in the *Zeitsch. D. M. G.* 1857, p. 50-64.) The subject, and indeed the whole topography of this district, requires further examination; in the meantime it is perhaps some confirmation of Dr. Rosen's suggestion that a village or site on one of these hills was pointed out to the writer as called *Iza*, the Arabic name for Joshua. Schwarz (86) speaks of a *Wady Dibir* in this direction. Van de Velde (Memoir,

### DEBORAH

307) finds Debir at *Dilbeh*, six miles S.W. of Hebron, where Stewart mentions a spring brought down from a high to a low level by an aqueduct.

2. **דְּבִיר**; **דְּבִיר** *τὸ τέτραπρον τῆς φάραγγος* 'Αχόρ; *Debera*), a place on the north boundary of Judah, near the "Valley of Achor" (Josh. xv. 7), and therefore somewhere in the complications of hill and ravine behind Jericho. De Sauley (ii. 139) attaches the name *Thour-ed-Dabour* to the ruined khan on the right of the road from Jerusalem to Jericho, at which travellers usually stop to refresh, but this is not corroborated by any other traveller. The name given to it by the Arabs when the writer passed (1858) was *Ahan Hatherarah*. A *Wady Dabor* is marked in Van de Velde's map as close to the S. of *Nehy Misi*, at the N.W. corner of the Dead Sea.

3. The "border" (**גְּבול**), of Debir is named as forming part of the boundary of Gad (Josh. xiii. 26) and as apparently not far from Mahanaim. Reland (734) conjectures that the name may possibly be the same as Lodebar (**לֹדְבָר**), but no identification has yet taken place (LXX. **Δαβών**, Alex. **Δαβελ**; *Dabir*). Lying in the grazing country on the high downs east of Jordan, the name may be derived from **דָּבַר**, *Dabar*, the same word which is the root of *Midbar*, the wilderness or pasture (see Ges. 318). [ΔΕΒΑΡ.] [G.]

**DE'BIR** (**דְּבִיר**; **Δαβίρ**; Alex. **Δαβελ**; *Dabir*), King of Eglon, a town in the low country of Judah; one of the five kings hanged by Joshua (Josh. x. 3, 23).

**DEBORAH** (**דְּבִירָה**; **Δεβώρα**), a woman of Naphtali, mother of Tobiel, the father of Tobit (Tob. i. 8). The same name as

**DEBORAH** (**דְּבִירָה**; **Δεβώρα**, **Δεβώρα**; *Debbora*). 1. The nurse of Rebekah (Gen. xxxv. 8). Nurses held a high and honourable place in ancient times, and especially in the East (2 K. xi. 2; Hom. *Od.* i. 429; Virg. *Aen.* vii. 2; "Aeneida nutrix;" Ov. *Met.* xiv. 441), where they were often the principal members of the family (2 Chr. xxii. 11; Juhn, *Arch. Bibl.* §166). Deborah accompanied Rebekah from the house of Bethuel (Gen. xiv. 59), and is only mentioned by name on the occasion of her burial, under the oak-tree of Bethel, which was called in her honour Allon-Bachuth (**Βάλανος πένθους**, LXX.). Such spots were usually chosen for the purpose (Gen. xxiii. 17, 18; 1 Sam. xxxi. 13; 2 K. xxi. 18, &c.). Many have been puzzled at finding her in Jacob's family; it is unlikely that she was sent to summon Jacob from Haran (as Jarchi suggests), or that she had returned during the lifetime of Rebekah, and was now coming to visit her (as Abarbanel and others say); but she may very well have returned at Rebekah's death, and that she was dead is probable from the omission of her name in Gen. xxxv. 27; and if, according to the Jewish legend, Jacob first heard of his mother's death at this spot, it will be an additional reason for the name of the tree, and may possibly be implied in the expression **וַיְבָרֶךְ**, comforted, A. V. "blessed" (Gen. xxxv. 9; see too Ewald, *Gesch.* i. 390).

\* De Sauley quotes the name in Joshua as "*Dabor*;" but on what authority is not apparent. Certainly not that of the Hebrew or the Vulgate.

2. A prophetess who judged Israel (Judg. iv. v.). Her name, דְּבוֹרָה, means "a bee" (or σφήξ, "a wasp"), just as Μέλισσα and Melitilla were proper names. This name may imply nothing whatever, being a mere appellative, derived like Rachel (a lamb), Tamar (a palm), &c., from natural objects; although she was (as Corn. a Lapide quaintly puts it) *sis mellea, hostibus aculeata*. Some, however, see in the name an official title, implying her prophetic authority. A bee was an Egyptian symbol of regal power (cf. Call. *Jov.* 66, and *Et. Mag.* s. v. δισσόν); and among the Greeks the term was applied not only to poets (*more apud Matinae*, Hor.), and to those peculiarly chaste (as by the Neoplatonists), but especially to the priestesses of Delphi (χρησμός μελισσας Δελφίδος, Pind. *P.* iv. 106), Cybele, and Artemis (Creuzer, *Symbolik.* iii. 354, &c.), just as δισσόν was to the priests (Liddell and Scott, s. v.). In both these senses the name suits her, since she was essentially a vates or seer, combining the functions of poetry and prophecy.

She lived under the palm-tree ("such tents the patriarchs loved," Coleridge) of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv. 5), which, as palm-trees were rare in Palestine, "is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx. 33) Bual-Tamar, or the sanctuary of the palm" (Stanley, *S. and P.* 146). Von Bohlen (p. 334) thinks that this tree is identical with Allon-Bachuth (Gen. xxxv. 8), the name and locality being nearly the same (Ewald, *Gesch.* i. 391, 405), although it is unhistorical to say that this "may have suggested a name for the nurse" (Hävernick's *Introd. to Pent.* p. 201; Kalisch, *Gen.* ad loc.). Possibly it is again mentioned as "the oak of Tabor," in 1 Sam. x. 3, where Thenius would read זָבֶרֶה for תָּבֶרֶה. At any rate it was a well-known tree, and she may have chosen it from its previous associations.

She was probably a woman of Ephraim, although from the expression in Judg. v. 15, some suppose her to have belonged to Issachar (Ewald, *Gesch.* ii. 489). The expression לְפִירוֹת אֵשׁ is much disputed; it is generally thought to mean "wife of Lapidoth," as in A. V.; but other versions render it "uxor principis," or "Foemina Lapidothana" ("that great dame of Lapidoth," Tennyson), or *mulier splendorum*, i. e. one divinely illuminated, since לְפִירוֹת = lightnings. But the most prosaic notion is that of the Rabbis, who take it to mean that she attended to the tabernacle lamps, from לָפִיד, *lapid*, a lamp! The fem. termination is often found in men's names, as in Shelomith (1 Chr. xxiii. 9), Koheleth, &c. Lapidoth then was probably her husband, and not Barak, as some say.

She was not so much a judge (a title which belongs rather to Barak, Heb. xi. 32) as one gifted with prophetic command (Judg. iv. 6, 14, v. 7), and by virtue of her inspiration "a mother in Israel." Her sex would give her additional weight, as it did to Velleda and Alaurinia among the Germans, from an instinctive belief in the divinity of womanhood (Tac. *German.* viii.). Compare the instances of Miriam, Huldah, Anna, Noadiah (2 K. xxii. 14; Neh. vi. 14).

Jabin's tyranny was peculiarly felt in the northern tribes, who were near his capital and under her

jurisdiction, viz. Zebulon, Nephthali, and Issachar: hence, when she summoned Barak to the deliverance, "it was on them that the brunt of the battle fell; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, south, and east" (Stanley, p. 339). Under her direction Barak encamped on "the broad summit of Tabor" (Jos. *De B. J.* ii. 20, §6). When asked to accompany him, "she answered indignantly, Thou, oh Barak, deliverest up meekly the authority which God hath given thee into the hands of a woman; neither do I reject it" (Jos. *Ant.* v. 5, §2). The LXX. interpolate the words ἔτι οὐκ οἶδα τὴν ἡμέραν ἐν ᾗ ἐξδοῖαι δὲ Κύριος τὸν ἄγγελον μετ' ἐμοῦ as a sort of excuse for Barak's request (iv. 8, cf. 14, v. 28). When the small band of ill-armed (Judg. v. 8) Israelites saw the dense iron chariots of the enemy, "they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day" (Jos. *l. c.*). They did so, but Deborah's prophecy was fulfilled (Judg. iv. 9), and the enemy's general perished among the "oaks of the wanderers (Zaunaim)," in the tent of the Bedoniu Kenite's wife (Judg. iv. 21) in the northern mountains. "And the land had rest forty years" (Judg. v. 31). For the natural phenomena which aided (Judg. v. 20, 21) the victory, and the other details (for which we have ample authority in the twofold narration in prose and poetry), see BARAK, where we have also entered on the difficult question of the chronology (Ewald, *Gesch.* ii. 489-494).

Deborah's title of "prophetess" (נָבִיָּה) includes the notion of inspired poetry, as in Ex. xv. 20; and in this sense the glorious triumphal ode (Judg. v.) well vindicates her claim to the office. On this ode much has been written, and there are separate treatises about it by Hollmann, Kalkar, and Kenrick. It is also explained by Ewald (*die Poet. Bücher des Alt. Bundes.* i. 125), and Gumpach (*Alttestament. Studien*, pp. 1-140). [F. W. F.]

## DEBTOR. [LOAN.]

DECAPOLIS (Δεκάπολις, "the ten cities"). This name occurs only three times in the Scriptures, Matt. iv. 25; Mark v. 20, and vii. 31; but it is frequently mentioned by Josephus and other ancient writers. Immediately after the conquest of Syria by the Romans (B.C. 65), ten cities appear to have been rebuilt, partially colonized, and endowed with peculiar privileges; the country around them was hence called *Decapolis*. The limits of the territory were not very clearly defined; and probably in the course of time other neighbouring cities received similar privileges. This may account for the fact that ancient geographers speak so indefinitely of the province, and do not even agree as to the names of the cities themselves. Pliny (v. 18) admitting that "*non omnes eadem observant*," enumerates them as follows: *Scythopolis, Hippus, Gadara, Pella, Philadelphia, Gerasa, Dion, Canatha, Damascus, and Raphana*. Ptolemy (v. 17) makes *Capitolias* one of the ten; and an old Palmyrene inscription quoted by Reland (*Pal.* p. 525) includes *Abila*, a town which, according to Eusebius (*Onom.* s. v. *Abila*) was 12 Roman miles east of Gadara. Josephus (*B. J.* iii. 9, §7) calls *Scythopolis* the largest city of Decapolis, thus manifestly excluding Damascus from the number. All the

cities of Decapolis, with the single exception of Scythopolis, lay on the east of the Jordan; and both Eusebius and Jerome (*Onom. s. v. Decapolis*) say that the district was situated "beyond the Jordan, around Hippos, Pella, and Gadara," that is, to the east and south-east of the Sea of Galilee. With this also agrees the statement in Mark v. 20, that the demoniac who was cured at Gadara "began to publish in Decapolis how great things Jesus had done to him." It would appear, however, from Matt. iv. 25, and Mark vii. 31, that Decapolis was a general appellation for a large district extending along both sides of the Jordan. Pliny (v. 18) says it reached from Damascus on the north to Philadelphia on the south, and from Scythopolis on the west to Canatha on the east—thus making it no less than 100 miles long by 60 broad; and he adds, that between and around these cities are tetrarchies, each like a kingdom; such as Trachonitis, Paneas, Abila, ~~Amma~~, &c.

This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed. His footsteps—is now almost without an inhabitant. Six out of the ten cities are completely ruined and deserted. Scythopolis, Gadara, and Canatha have still a few families, living, more like wild beasts than human beings, amid the crumbling ruins of palaces, and in the cavernous recesses of old tombs. Idumæans alone continues to flourish, like an oasis in a desert. [J. L. P.]

**DEDAN** (דִּדָּן; Δαιδάν, Δαιδάμ, Δαδάν, Δαδάν; *Dedan, Dadan*). 1. The name of a son of Raamah, son of Cush (Gen. x. 7; 1 Chr. i. 9, "the sons of Raamah, Sheba, and Dedan"). 2. That of a son of Jokshan, son of Keturah (Gen. xxv. 3, and "Jokshan begat Sheba and Dedan. And the sons of Dedan were Asshurim, Letushim, and Leummim." Cf. 1 Chron. i. 32). The usual opinion respecting these founders of tribes is that the first settled among the sons of Cush, wherever these latter may be placed; the second, on the Syrian borders, about the territory of Edom. But Gesenius and Winer have suggested that the name may apply to one tribe; and this may be adopted as probable on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan, whom the writer places, presumptively, on the borders of the Persian Gulf. [ARABIA, CUSH, RAAMAH, &c.] The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia; and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are contained in the prophecies of Isaiah, Jeremiah, and Ezekiel, and are in every case obscure. The Edomite settlers seem to be referred to in Jer. xlix. 8, where Dedan is mentioned in the prophecy against Edom; again in xxv. 23, with Tema and Buz; in Ez. xxv. 13, with Teman, in the prophecy against Edom; and in Isa. xxi. 13 ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim"), with Tema and Kedar. This last passage is by some understood to

refer to caravans of the Cushite Dedan; and although it may only signify the wandering propensities of a nomad tribe, such as the Edomite portion of Dedan may have been, the supposition that it means merchant-caravans is strengthened by the remarkable words of Ezekiel in the lamentation for Tyre. This chapter (xxvii.) twice mentions Dedan; first in ver. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said, "The children of Dedan were thy merchants, many isles (יַמַּיִם) were the merchandise of thine hand: they brought thee for a present horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the prophet again (in ver. 20) mentions Dedan in a manner which seems to point to the wide spread and possibly the mixed ancestry of this tribe. Ver. 15 may be presumed to allude especially to the Cushite Dedan (cf. ch. xxxviii. 13, where we find Dedan with Sheba and the merchants of Tarshish; apparently, from the context, the Dedan of ch. xxvii. 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i. e. the Keturahite Dedan). The whole of the passage is as follows: "Dedan [was] thy merchant in precious clothes for chariots. Arabia, and all the princes of Kedar, they occupied with thee in lambs, and rams, and goats: in these [were they] thy merchants. The merchants of Sheba and Raamah they [were] thy merchants: they occupied in thy fairs with chief of all spices, and with all precious stones, and gold. Haran, and Canneh, and Eden, the merchants of Sheba, Asshur, [and] Chilmad, [were] thy merchants." (Ez. xxvii. 20-23.) We have here a Dedan connected with Arabia (probably the north-western part of the peninsula) and Kedar, and also with the father and brother of the Cushite Dedan (Raamah and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian gulf. This Dedan moreover is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off eastern nations who came with "spices and precious stones and gold," "blue clothes and brodered work," and "chests of rich apparel."

The probable inferences from these intentions of Dedan support the argument first stated, namely, 1. That Dedan son of Raamah settled on the shores of the Persian gulf, and his descendants became caravan-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumæa, and perhaps to have led a pastoral life.

All traces of the name of Dedan, whether in Idumæa or on the Persian gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers however throw some light on the eastern settlement; and a native indication of the name is presumed to exist in the island of *Dadan*, on the borders of the gulf. The identification must be taken in connexion with the writer's recovery of the name of Sheba, the other son of Raamah, on the island of *Adul*, near the Arabian shore of the same gulf. This is discussed in the art. RAAMAH. [E. S. P.]

**DEDICATION, FEAST OF THE** (τῆ ἐγκαινία, John x. 22, *Encaenia*, Vulg.; δ ἑγκαίνιος τοῦ θυσιαστηρίου, 1 Macc. iv. 56 and 59

[the same term as is used in the LXX. for the dedication of the altar by Moses, Num. vii. 10]; δ καθαρismus τοῦ ναοῦ, 2 Macc. x. 5; Mishna, **הַכֶּהֱנִים**, i. e. dedication; Joseph. **φῶτα**, Ant. xii. 7, §7, the festival instituted to commemorate the purging of the temple and the rebuilding of the altar after Judas Maccabaeus had driven out the Syrians, B.C. 164. It is named only once in the Canonical Scriptures, John x. 22. Its institution is recorded 1 Macc. iv. 52-59. It commenced on the 25th of Chisleu, the anniversary of the pollution of the temple by Antiochus Epiphanes, B.C. 167. Like the great Mosaic feasts, it lasted eight days, but it did not require attendance at Jerusalem. It was an occasion of much festivity. The writer of 2 Macc. tells us that it was celebrated in nearly the same manner as the Feast of Tabernacles, with the carrying of branches of trees, and with much singing (x. 6, 7). Josephus states that the festival was called "Lights," and that he supposes the name was given to it from the joy of the nation at the unexpected liberty—**τὴν εὐοχὴν ἔχομεν καλοῦντες αὐτὴν φῶτα**, ἐκ τοῦ παρ' ἑλλήδος οἰμαὶ ταύτην ἡμῖν φανῆναι τὴν ἐξουσίαν (Ant. xii. 7, §7). The Mishna informs us that no fast on account of any public calamity could be commenced during this feast. In the Gemara a story is related that when the Jews entered the temple, after driving out the Syrians, they found there only one bottle of oil which had not been polluted, and that this was miraculously increased, so as to feed the lamps of the sanctuary for eight days. Maimonides ascribes to this the custom of the Jews illuminating each house with one candle on the first day of the feast, two on the second day, three on the third, and so on. Some had this number of candles for each person in the house. Neither the books of Maccabees, the Mishna, nor Josephus mention this custom, and it would seem to be of later origin, probably suggested by the name which Josephus gives to the festival. In the temple at Jerusalem, the "Hallel" was sung every day of the feast.

In Ezra (vi. 16) the word **הַכֶּהֱנִים**, applied to the dedication of the second temple, on the third of Adar, is rendered in the LXX. by **ἐγκαλνία**, and in the Vulg. by **dedicatio**. But the anniversary of that day was not observed. The dedication of the first Temple took place at the Feast of Tabernacles (1 K. viii. 2; 2 Chr. v. 3). [TABERNACLES, FEAST OF.]

See Lightfoot, *Temple Service*, sect. v.; *Horae Heb.* on John x. 22, and his *Sermon* on the same text; *Mishna*, vol. ii. 369, ed. Surenhus. and Houtingius' note, 317; Kuinoel on John x. 22. [S. C.]

## DEER. [FALLOW-DEER.]

DEGREES, SONGS OF (**שירי המעלות**), a title given to fifteen Psalms, from cxx. to cxxiv. inclusive. Four of them are attributed to David, one is ascribed to the pen of Solomon, and the other ten give no indication of their author. Eichhorn supposes them all to be the work of one and the same bard (*Einkl. in das A. T.*), and he also shares the opinion of Herder (*Geiste der hebräischen Poesie*), who interprets the title, "Hymns for a journey." "The headings of the Psalms, however, are not to be relied on, as many of these titles were superadded long after the authors of the Psalms had passed away. The words 'of David,' or 'of Solomon,' do not of themselves establish the

fact that the Psalm was written by the person named, since the very same phraseology would be employed to denote a hymn composed in honour of David or of Solomon" (Marks' *Sermons*, i. 208-9). Bellermann (*Metrik der Hebräer*) calls these Psalms "trochaic songs."

With respect to the term **הַמַּעֲלֹת**, A. V. "degrees," a great diversity of opinion prevails amongst Biblical critics. According to some it refers to the melody to which the Psalm was to be chanted. Others, including Gesenius, derive the word from the poetical composition of the song, and from the circumstance that the concluding words of the preceding sentence are often repeated at the commencement of the next verse. Thus Psalm cxi.:—

I will lift up mine eyes unto the hills

From whence cometh my help.

My help cometh even from Jehovah, &c.

And so in other passages (comp. cxi. 4, 5, and cxxiv. 1-2 and 3-4). Aben Ezra quotes an ancient authority, which maintains that the *degrees* allude to the fifteen steps which, in the temple of Jerusalem, led from the court of the women to that of the men, and on each of which steps, one of the fifteen songs of degrees was chanted. Adam Clarke (*Comment. on Ps. cxx.*) refers to a similar opinion as found in the Apocryphal Gospel of the birth of Mary: "Her parents brought her to the temple, and set her upon one of the steps. Now there are fifteen steps about the temple, by which they go up to it, according to the fifteen Psalms of degrees."

The most generally accredited opinion, however, is that **מַעֲלָה** is etymologically connected with **עָלָה**, "to go up," or to travel to Jerusalem; that some of these hymns were preserved from a period anterior to the Babylonish captivity; that others were composed in the same spirit by those who returned to Palestine, on the conquest of Babylon by Cyrus, and that a few refer even to a later date, but were all incorporated into one collection, because they had one and the same object. This view is adopted by Rosenmüller, Herder, Mendelssohn, Joel Brill, &c. &c. Luther translates the words "Ein Lied im höhern Chor," thus connecting the Psalm with the manner of its execution; and Michaelis compares **מַעֲלָה** with the Syriac **שכלתא** (Scala) which would likewise characterize the metre or the melody. [D. W. M.]

DEHAVITES (**דְּהָוִיט**; **Δαυαίος**; *Dicui*) are mentioned but once in Scripture (Ezr. iv. 9). They were among the colonists planted in Samaria by the Assyrian monarch Esarhaddon, after the completion of the Captivity of Israel. From their name, taken in conjunction with the fact that they are coupled with the Susanchites (Susianians, or people of Susa) and the Elamites (Elymians, natives of the same country), it is fairly concluded that they are the Dai or Dahi, mentioned by Herodotus (i. 125) among the nomadic tribes of Persia. This people appears to have been widely diffused, being found as Dahae (**Δαῖ**) both in the country east of the Caspian (Strab. xi. 8, §2; Arrian. *Exped. Al.* iii. 11, &c.), and in the vicinity of the Sea of Azof (Strab. xi. 8, §3); and again as Dhi (**Δῖοι**, Thucyd. ii. 96), Dai (**Δαί**, Strab.), or Daci (**Δακοί**, Strab. D. Cass. &c.) upon the Danube. They were an Arian race, and are regarded by some as having their lineal descendants in the modern

Danes (see Grimm's *Geschicht. d. Deutsch. Sprach.* i. 192-3). The Septuagint form of the name—*Davacus*, may compare with the *Darus* (= *Δαρος*) of Latin comedy. [G. R.]

**DEKAR.** The son of Deker, *i.e.* BEN-DEKAR (דְּקָרִי; *vñs* Δακάρ; *Bendecar*), was Solomon's commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaalbim and Bethshemesh (1 K. iv. 9).

**DELATAH** (דִּלְתָּי and דִּלְתָּיָה = "Jehovah's freedman"—comp. ἀπελευθερος Κυρίου, 1 Cor. vii. 22; also the Phoenician name Δελαιστάρτος, quoted from Menander by Josephus, *Cont. Ap.* i. 18, and the modern name Godfrey = Gottesfrey; LXX. Δαλατα; Δαλαας; *Dalauai, Daluait*, the name of several persons.

1. DELAIAHU (LXX. Vat. Αδαλαα); a priest in the time of David, leader of the twenty-third course of priests (1 Chr. xxiv. 18).

2. DELATAH; "children of Delaiah" were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezr. ii. 60; Neh. vii. 62). In 1 Esdr. the name is LADDAN.

3. DELATAH; son of Mehetabel and father of Shemaiah (Neh. vi. 10).

4. DELATAHU (Δαλαας and Γοδολας); son of Shemaiah, one of the "princes" (דִּינִי) about the court of Jehoiakim (Jer. xxxvi. 12, 25).

The name also occurs in the A. V. as DALATAH.

**DELI'LAH** (דִּלְיָלָה; Δαλιδα; Joseph. Δαλιη; *Dalila*), a woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi. 4-18). Her connexion with Samson forms the third and last of those amatory adventures which in his history are so inextricably blended with the craft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. [SAMSON.]

It is not stated, either in Judges or in Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek; since in the time of the Judges the frontier was shifting and indefinite. [SOREK.] The following considerations, however, supply presumptive evidence that she was a Philistine:—

1. Her *occupation*, which seems to have been that of a courtesan of the higher class, a kind of political Hetaera. The hetaeric and political view of her position is more decided in Josephus than in Judges. He calls her *γυνή εταραιομένη*, and associates her influence over Samson with *πόρος* and *συνουσία* (*Ant.* v. 8, §11). He also states more clearly her relation as a political agent to the "lords of the Philistines" (דִּינִי, Joseph. *of προσεστώτες, τοῖς ἔρχουσι Παλαιστίνων*; LXX. *ἐρχοῦντες*; *Sutragae*; *οἱ τοῦ κοινοῦ*; magistrates, political lords, Milton, *Sans.* Ag. 850, 1195), employing under their directions "hers in wait" (דִּלְיָלָה, τὸ ἐνεδρον; *insidius*; cf. Josh. viii. 14; *στρατιωτῶν*). On the other hand, Chrysostom and many of the Fathers have maintained that Delilah was married to Samson (so Milton, 227), a natural but uncritical attempt to save the morality of the Jewish champion. See Judg. xvi. 9, 18, as showing an exclusive command

of her establishment inconsistent with the idea of matrimonial connexion (Patrick, *ad loc.*). There seems to be little doubt that she was a courtesan; and her employment as a political emissary, together with the large sum which was offered for her services (1100 pieces of silver from each lord = 5500 shekels; cf. Judg. iii. 3), and the tact which is attributed to her in Judges, but more especially in Josephus, indicates a position not likely to be occupied by any Israelitish woman at that period of national depression.

2. The general tendency of the Scripture narrative: the sexual temptation represented as acting upon the Israelites from *without* (Num. xxv. 1, 6, xxxi. 15, 16).

3. The special case of Samson (Judg. xiv. 1, xvi. 1).

In Milton Delilah appears as a Philistine, and justifies herself to Samson on the ground of patriotism (*Sans.* Ag. 850, 980). [T. E. B.]

### DELUGE. [NOAH.]

**DELUS** (Δῆλος), mentioned in 1 Macc. xv. 23, is the smallest of the islands called Cyclades in the Aegean Sea. It was one of the chief seats of the worship of Apollo, and was celebrated as the birth-place of this god and of his sister Artemis (Diana). We learn from Josephus (*Ant.* xiv. 10, §8) that Jews resided in this island, which may be accounted for by the fact, that after the fall of Corinth (u.c. 146) it became the centre of an extensive commerce. The sanctity of the spot and its consequent security, its festival which was a kind of fair, the excellence of its harbour, and its convenient situation on the highway from Italy and Greece to Asia, made it a favourite resort of merchants. So extensive was the commerce carried on in the island, that 10,000 slaves are said to have changed hands there in one day (Strab. xiv. p. 668). Delus is at present uninhabited, except by a few shepherds. (For details, see *Dict. of Gr. & Rom. Geogr.* s.v.)

**DEMAS** (Δημάς), most probably a contraction from Δημήτριος, or perhaps from Δήμαρχος, a companion of St. Paul (called by him his *συνεργος* in Philem. 24; see also Col. iv. 14) during his first imprisonment at Rome. At a later period (2 Tim. iv. 10) we find him mentioned as having deserted the apostle through love of this present world, and gone to Thessalonica. This departure has been magnified by tradition into an apostasy from Christianity (so Epiphani. *Haer.* 41. 6 . . . καὶ Δημᾶν, καὶ Ἑρμογένην, τοὺς ἀγαπήσαντας τὸν ἐνταῦθα αἰῶνα, καὶ καταλείψαντας τὴν ὁδὸν τῆς ἀληθείας), which is by no means implied in the passage. [H. A.]

**DEMETRIUS** (Δημήτριος), a maker of silver shrines of Artemis at Ephesus (Acts xix. 24). These *ναοὶ ἀργυροῦ* were small models of the great temple of the Ephesian Artemis, with her statue, which it was customary to carry on journeys, and place on houses, as charms. Demetrius and his fellow craftsmen, in fear for their trade, raised a tumult against St. Paul and his missionary companions. [H. A.]

**DEMETRIUS I.** (Δημήτριος), surnamed "The Saviour" (Σωτήρ, in recognition of his services to the Babylonians), king of Syria, was the son of Seleucus Philopator, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (u.c. 175) in exchange for his

uncle Antiochus Epiphanes. From his position he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV.; but on the death of that monarch (B.C. 164) he claimed his liberty and the recognition of his claim by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxxi. 12); and by the advice and assistance of Polybius, whose friendship he had gained at Rome (Polyb. xxxi. 19; Just. xxxiv. 3), he left Italy secretly, and landed with a small force at Tripolis in Phoenicia (2 Macc. xiv. 1; 1 Macc. vii. 1; Jos. Ant. xii. 10, 1). The Syrians soon declared in his favour (B.C. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii. 2, 3; 2 Macc. xiv. 2). Having thus gained possession of the kingdom Demetrius succeeded in securing the favour of the Romans (Polyb. xxxii. 4), and he turned his attention to the internal organisation of his dominions. The Græcizing party were still powerful at Jerusalem, and he supported them by arms. In the first campaign his general Bacchides established Alcimus in the high-priesthood (1 Macc. vii. 5-20); but the success was not permanent. Alcimus was forced to take refuge a second time at the court of Demetrius, and Nicanor, who was commissioned to restore him, was defeated in two successive engagements by Judas Maccabæus (1 Macc. vii. 31, 2, 43-5), and fell on the field. Two other campaigns were undertaken against the Jews by Baccchides (B.C. 161; 158); but in the meantime Judas had completed a treaty with the Romans shortly before his death (B.C. 161), who forbade Demetrius to oppress the Jews (1 Macc. viii. 31). Not long afterwards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxii. 20; Just. xxxv. 1); and he alienated the affection of his own subjects by his private excesses (Just. l. c.; cf. Polyb. xxxiii. 14). When his power was thus shaken (B.C. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius vainly endeavoured to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favoured the cause of Alexander (1 Macc. x. 1-6). The rivals met in a decisive engagement (B.C. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x. 48-50; Jos. Ant. vii. 2, §4; Polyb. iii. 5). In addition to the very interesting fragments of Polybius the following references may be consulted: Just. xxiv. 3, xxxv. 1; App. Syr. 46, 47, 67. [B. F. W.]

DEMETRIUS II. (Δημήτριος), "The Vic-

torious" (Νικητράς), was the elder son of Demetrius Soter. He was sent by his father, together with his brother Antiochus, with a large treasure, to Chidus (Just. xxxv. 2), when Alexander Balas laid claim to the throne of Syria. When he was grown up, the weakness and vices of Alexander furnished him with an opportunity of recovering his father's dominions. Accompanied by a force of Cretan mercenaries (Just. l. c.; cf. 1 Macc. x. 67), he made a descent on Syria (B.C. 148), and was received with general favour (1 Macc. x. 67 ff.). Jonathan, however, still supported the cause of Alexander, and defeated Apollonius, whom Demetrius had appointed governor of Coele-Syria (1 Macc. x. 74-82). In spite of these hostilities, Jonathan succeeded in gaining the favour of Demetrius when he was established in the kingdom (1 Macc. xi. 23-27), and obtained from him an advantageous commutation of the royal dues and other concessions (1 Macc. xi. 32-37). In return for these favours the Jews rendered important services to Demetrius when Tryphon first claimed the kingdom for Antiochus VI., the son of Alexander (1 Macc. xi. 42), but afterwards being offended by his faithless ingratitude (1 Macc. xi. 53), they espoused the cause of the young pretender. In the campaign which followed, Jonathan defeated the forces of Demetrius (B.C. 144; 1 Macc. xii. 28); but the treachery to which Jonathan fell a victim (B.C. 143) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favourable terms from Demetrius (B.C. 142); but shortly afterwards Demetrius was himself taken prisoner (B.C. 138) by Arsaces VI. (Mithridates), whose dominions he had invaded (1 Macc. xiv. 1-3; Just. xxxvi.). Mithridates treated his captive honourably, and gave him his daughter in marriage (App. Syr. 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Siletes, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle, he again took possession of the Syrian crown (B.C. 128). Not long afterwards a pretender, supported by Ptol. Physcon, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife (App. Syr. 68), while attempting to escape by sea (Just. xxxix. 1; Jos. Ant. xiii. 9, 3). [CLIFPATRA.]

Tetradrachm (Attic talent) of Demetrius II

Obv. Head of Demetrius to the right. Rev. ΒΑΣΙΛΕΥΣ ΔΗΜΗΤΡΙΟΥ ΘΕΟΥ ΦΙΛΑΔΕΛΦΟΥ ΝΙΚΑΤΟΡΟΣ; in exergue ΕΡΘ (1097 of Era Seleuc.). Apollo to the left, seated on corymb, with arrow and bow.

DEMON (LXX. δαμόνιον; N. T. δαμόνιον, or rarely δαίμων. Derivation uncertain. Plato (Crat. i. p. 398) connects it with δαίμων, "intelligent," of which indeed the form δαίμων is found in Archil. (B.C. 650); but it seems more probably derived from δαμα, to "divide" or "assign," in

which case it would be similar to *Μοῖρα*). In sketching out the Scriptural doctrine as to the nature and existence of the demons, it seems natural, 1st, to consider the usage of the word *δαίμων* in classical Greek; 2ndly, to notice any modification of it in Jewish hands; and then, 3rdly, to refer to the passages in the N. T. in which it is employed.

I. Its usage in classical Greek is various. In Homer, where the gods are but supernatural men, it is used interchangeably with *θεός*; afterwards in Hesiod (*Op.* 121), when the idea of the gods had become more exalted and less familiar, the *δαίμονες* are spoken of as intermediate beings, the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, *τὸ δαίμονιον* was sometimes used as equivalent to *τὸ θεῖον* for any superhuman nature. Plato (*Symp.* pp. 202, 203) fixes it distinctly in the more limited sense: *πάν τὸ δαίμονιον μεταξύ ἐστὶ θεοῦ καὶ θνητοῦ . . . . θεὸς ἀνθρώπου οὐ μίγνυνται, ἀλλὰ διὰ δαίμονιον πᾶσα ἐστὶν ἡ ὁμιλία καὶ ἡ διδασκαλία θεοῖς πρὸς ἀνθρώπους*. Among them were numbered the spirits of good men, "made perfect" after death (Plat. *Crit.* p. 398, quotation from Hesiod). It was also believed that they became tutelary deities of individuals (to the purest form of which belief Socrates evidently referred in the doctrine of his *δαίμωνιον*); and hence *δαίμων* was frequently used in the sense of the "fate" or "destiny" of a man (as in the tragedies constantly), thus recurring, it would seem, directly to its original derivation.

The notion of evil demons appears to have belonged to a later period, and to have been due, both to Eastern influence, and to the clearer separation of the good and evil in men's thoughts of the supernatural.\* They were supposed to include the spirits of evil men after death, and to be authors, not only of physical, but of moral evil.

II. In the LXX. the words *δαίμων* and *δαίμωνιον* are not found very frequently, but yet employed to render different Hebrew words; generally in reference to the idols of heathen worship; as in Ps. xcv. 3, for *עֲצֻלִים*, the "empty," the "vanities," rendered *χειροποιήτους*, &c., in Lev. xiv. 4, xxvi. 1; in Deut. xxxii. 17, for *דִּיּוּשִׁים*, "lords" (comp. 1 Cor. viii. 5); in Is. lxx. 11, for *גַּד*, *Gad*, the goddess of Fortune: sometimes in the sense of avenging or evil spirits, as in Ps. xci. 6, for *בְּרָכָה*, "pestilence," i. e. evidently "the destroyer;" also in Is. xiii. 21, xxiv. 14, for *עֲרֵב*, "hairy," and *בְּרָכָה*, "dwellers in the desert," in the same sense in which the A. V. renders "satyrs."

In Josephus we find the word "demons" used always of evil spirits; in *Bell. Jud.* vii. 6, §3, he defines them as *τὰ πνεύματα τῶν πονηρῶν*, and speaks of their exorcism by fumigation (as in Tob. viii. 2, 3). See also *Ant.* vi. c. 8, §2, viii. c. 2, §5. Writing as he did with a constant view to the Gentiles, it is not likely that he would use the word in the other sense, as applied to heathen divinities.

By Philo the word appears to be used in a more general sense, as equivalent to "angels," and referring to both good and evil.

\* Those who imputed lust and envy of man to their gods were hardly likely to have a distinct view of supernatural powers of good and evil, as eternally opposed to each other.

The change, therefore, of sense in the Hellenistic usage is, first, the division of the good and evil demons, and the more general application of the word to the latter; secondly, the extension of the name to the heathen deities.

III. We now come to the use of the term in the N. T. In the Gospels generally, in James ii. 19, and in Rev. xvi. 14, the demons are spoken of as spiritual beings, at enmity with God, and having power to afflict man, not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual pollution also. In Acts xix. 12, 13, &c., they are exactly defined as *τὰ πνεύματα τὰ πονηρά*. They "believe" the power of God "and tremble" (James ii. 19); they recognise our Lord as the Son of God (Matt. viii. 29; Luke iv. 41), and acknowledge the power of His name, used in exorcism, in the place of the name of Jehovah, by His appointed messengers (Acts xix. 15); and look forward in terror to the judgment to come (Matt. viii. 29). The description is precisely that of a nature akin to the angelic [see ANGELS] in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it we are sometimes quoted the fact that the demoniacs sometimes haunted the tombs of the dead (Matt. viii. 28), and the supposed reference of the epithet *ἀκαθάρτα* to the ceremonial uncleanness of a dead body.

In 1 Cor. x. 20, 21, 1 Tim. iv. 1, and Rev. ix. 20, the word *δαίμονια* is used of the objects of Gentile worship, and in the first passage opposed to the word *θεοί* (with a reference to Deut. xxii. 17). So also is it used by the Athenians in Acts xvii. 18. The same identification of the heathen deities with the evil spirits is found in the description of the damsel having *πνεῦμα πύθωνα*, or *πύθωνος*, at Philippi, and the exorcism of her as a demoniac by St. Paul (Acts xvi. 16); and it is to be noticed that in 1 Cor. x. 19, 20, the apostle is arguing with those who declared an idol to be a pure nullity, and while he accepts the truth that it is so, yet declares that all, which is offered to it, is offered to a "demon." There can be no doubt then of its being a doctrine of Scripture, mysterious (though not necessarily impossible) as it may be, that in idolatry the influence of the demons was at work and permitted by God to be effective within certain bounds. There are not a few passages of profane history on which this doctrine throws light; nor is it inconsistent with the existence of remnants of truth in idolatry, or with the possibility of its being, in the case of the ignorant, overruled by God to good.

Of the nature and origin of the demons, Scripture is all but silent. On one remarkable occasion, recorded by the first three Evangelists (Matt. xii. 24-30; Mark iii. 22-30; Luke xi. 14-26), our Lord distinctly identifies Satan with Beelzebub, *τῷ ἄρχοντι τῶν δαιμονίων*; and there is a similar though less distinct connexion in Rev. xvi. 14. From these we gather certainly that the demons are agents of Satan in his work of evil, subject to the kingdom of darkness, and doubtless doomed to share in its condemnation; and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), "the principalities and powers" against whom we "wrestle" (Eph. vi. 12, &c.). As to the question of their

fall, see SATAN; and on the method of their action on the souls of men, see DEMONIACS.

The language of Scripture, as to their existence and their enmity to man, has suffered the attacks of scepticism, merely on the ground that, in the researches of natural science, there are no traces of the supernatural, and that the fall of spirits, created doubtless in goodness, is to us inconceivable. Both facts are true, but the inference false. The very darkness in which natural science ends, when it approaches the relation of mind to matter, not only does not contradict, but rather implies the existence of supernatural influence. The mystery of the origin of evil in God's creatures is inconceivable; but the difficulty in the case of the angels differs only in degree from that of the existence of sin in man, of which nevertheless as a fact we are only too much assured. The attempts made to explain the words of our Lord and the Apostles as a mere accommodation to the belief of the Jews are incompatible with the simple and direct attribution of personality to the demons, as much as to men or to God, and (if carried out in principle) must destroy the truth and honesty of Holy Scripture itself. [A. B.]

**DEMONIACS** (δαιμονιζόμενοι, δαιμόνια ἔχοντες). This word is frequently used in the N. T., and applied to persons suffering under the possession of a demon or evil spirit [see DEMON], such possession generally showing itself visibly in bodily disease or mental derangement. The word δαιμονίζω is used in a nearly equivalent sense in classical Greek (as in Aesch. *Choeph.* 566; *Sept. c. Theb.* 1001; Eur. *Phoen.* 888, &c.), except that as the idea of spirits distinctly evil and rebellious, hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an Ἄστυ. Neither word is employed in this sense by the LXX., but in our Lord's time (as is seen, for example, constantly in Josephus) the belief in the possession of men by demons, who were either the souls of wicked men after death, or evil angels, was thoroughly established among all the Jews with the exception of the Sadducees alone. With regard to the frequent mention of demoniacs in Scripture three main opinions have been started.

I. That of Strauss and the mythical school, which makes the whole account merely symbolic, without basis of fact. The possession of the devils is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out the devils by our Lord a corresponding symbol of His conquest over that evil power by His doctrine and His life. The notion stands or falls with the mythical theory as a whole: with regard to the special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetic and avowedly figurative passages, would make their assertion here not a symbol or a figure, but a lie. It would be as reasonable to expect a myth or symbolic fable from Tacitus or Thucydides in their accounts of contemporary history.

II. The second theory is, that our Lord and the Evangelists, in referring to demoniacal possession, spoke only in accommodation to the general belief of the Jews, without any assertion as to its truth or its falsity. It is concluded that, since the symptoms of the affliction were frequently those of bodily disease (as dumbness, Matt. ix. 32; blindness, Matt. xii. 22; epilepsy, Mark ix. 17-27), or those seen in cases of ordinary insanity (as in Matt. viii. 28; Mark v. 1-5),

since also the phrase "to have a devil" is constantly used in connexion with, and as apparently equivalent to, "to be mad" (see John vii. 20, viii. 48, x. 20, and perhaps Matt. xi. 18; Luke vii. 33); and since, lastly, cases of demoniacal possession are not known to occur in our own days, therefore we must suppose that our Lord spoke, and the Evangelists wrote, in accordance with the belief of the time, and with a view to be clearly understood, especially by the sufferers themselves, but that the demoniacs were merely persons suffering under unusual diseases of body and mind.

With regard to this theory also, it must be remarked that it does not accord either with the general principles or with the particular language of scripture. Accommodation is possible when, in things indifferent, language is used which, although scientifically or etymologically inaccurate, yet conveys a true impression, or when, in things not indifferent, a declaration of truth (1 Cor. iii. 1, 2), or a moral law (Matt. xix. 8), is given, true or right as far as it goes, but imperfect, because of the imperfect progress of its recipients. But certainly here the matter was not indifferent. The age was one of little faith and great superstition; its characteristic the acknowledgment of God as a distant Lawgiver, not an Inspirer of men's hearts. This superstition in things of far less moment was denounced by our Lord; can it be supposed that He would sanction, and the Evangelists be permitted to record for ever, an idea in itself false, which has constantly been the very stronghold of superstition? Nor was the language used such as can be paralleled with mere conventional expression. There is no harm in our "speaking of certain forms of madness as lunacy, not thereby implying that we believe the moon to have or to have had any influence upon them; . . . but if we began to describe the cure of such as the moon's ceasing to afflict them, or if a physician were solemnly to address the moon, bidding it abstain from injuring his patient, there would be here a passing over to quite a different region. . . . there would be that gulf between our thoughts and worlds in which the essence of a lie consists. Now Christ does everywhere speak such language as this." (Trench *On Miracles*, p. 153, where the whole question is most ably treated.) Nor is there, in the whole of the New Testament, the least indication that any "economy" of teaching was employed on account of the "hardness" of the Jews' "hearts." Possession and its cure are recorded plainly and simply; demoniacs are frequently distinguished from those afflicted with bodily sickness (see Mark i. 32, xvi. 17, 18; Luke vi. 17, 18), even, it would seem, from the epileptic (σκληνιαζόμενοι, Matt. ix. 24); the same outward signs are sometimes referred to possession, sometimes merely to disease (comp. Matt. iv. 24, with xvii. 15; Matt. xii. 22, with Mark vii. 32, &c.); the demons are represented as speaking in their own persons with superhuman knowledge,\* and acknowledging our Lord to be, not as the Jews generally called him, son of David, but Son of God (Matt. viii. 29; Mark i. 24, v. 7; Luke iv. 41, &c.). All these things speak of a personal power of evil,

\* Compare also the case of the damsel with the spirit of divination (πνεῦμα πωδωνος) at Philippi; where also the power of the evil spirit is referred to under the well-known name of the supposed inspiration of Delphi.

and, if in any case they refer to what we might call mere disease, they at any rate tell us of something in it more than a morbid state of bodily organs or self-caused derangement of mind. Nor does our Lord speak of demons as personal spirits of evil to the multitude alone, but in His secret conversations with His disciples, declaring the means and conditions by which power over them could be exercised (Matt. xvii. 21). Twice also He distinctly connects demoniacal possession with the power of the evil one; once in Luke x. 18, to the seventy disciples, where He speaks of his power and theirs over demons as a "fall of Satan," and again in Matt. xii. 25-30, when He was accused of casting out demons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of evil, He uses an argument, as to the division of Satan against himself, which, if possession be unreal, becomes inconclusive and almost insincere. Lastly, the single fact recorded of the entrance of the demons at Gadara (Mark v. 10-14) into the herd of swine,<sup>b</sup> and the effect which that entrance caused, is sufficient to overthrow the notion that our Lord and the Evangelists do not assert or imply any objective reality of possession. In the face of this mass of evidence it seems difficult to conceive how the theory can be reconciled with anything like truth of scripture.

But besides this it must be added, that to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers it to a class of cases which we know to exist, but gives no answer to the further question, how did the disease or insanity arise? Even in disease, whenever the mind acts upon the body (as *e. g.* in nervous disorders, epilepsy, &c.) the mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. Insanity may indeed arise, in some cases, from the physical injury or derangement of those bodily organs through which the mind exercises its powers, but far oftener it appears to be due to metaphysical causes, acting upon and disordering the mind itself. In all cases where the evil lies not in the body but in the mind, to call it "only disease or insanity" is merely to state the fact of the disorder, and give up all explanation of its cause. It is an assumption, therefore, which requires proof, that, amidst the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gifted with "discernment of spirits" might see signs of what the Scripture calls "possession."

The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region whither human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of moral corruption by the Fall, and refers the power of moral evil to a spiritual and personal source; so also it asserts the existence of inferior spirits of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Inexplicable to us this influence certainly is, as all

action of spirit on spirit is found to be; but no one can pronounce *a priori* whether it be impossible or improbable, and no one has a right to eviscerate the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance.

III. We are led, therefore, to the ordinary and literal interpretation of these passages, that there are evil spirits [DEMONS], subjects of the Evil One, who, in the days of the Lord Himself and His Apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation wielded by Satan through the permission of God. [SATAN.] Its relation to it, indeed, appears to be exactly that of a miracle to God's ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both (that is) are actuated by the same general principles, and tend to the same general object; but the former is a special and direct manifestation of that which is worked out in the latter by a long course of indirect action. The distinguishing feature of possession is the complete or incomplete loss of the sufferer's reason or power of will; his actions, his words, and almost his thoughts are mastered by the evil spirit (Mark i. 24, v. 7. Acts xix. 15), till his personality seems to be destroyed, or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary temptations and assaults of Satan, the will itself yields consciously, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Still, however, possession is only the special and, as it were, miraculous form of the "law of sin in the members," the power of Satan over the heart itself, recognised by St. Paul as an indwelling and agonising power (Rom. vii. 21-24). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to *sensual* temptations may easily be conjectured from general observation of the tyranny of a habit of sensual indulgence.<sup>c</sup> The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) bear, as has been often noticed, many marks very similar to those of the Scriptural possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of demoniacal tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate hardness of wilful sin. The spirit might still retain marks of its original purity, although through the flesh and the demoniac power acting by the flesh it was enslaved. Here also the observation of the suddenness and completeness of conversion, seen in cases of sensualism, compared with the greater difficulty in cases of more refined

<sup>b</sup> It is almost needless to refer to the subterfuges of interpretation by which the force of this fact is evaded.

<sup>c</sup> It is to be noticed that almost all the cases of demoniac possession are recorded as occurring among

the rude and half-Gentile population of Galilee. St. John, writing mainly of the ministry in Judea, mentions none.

and spiritual sin, tends to confirm the record of Scripture.

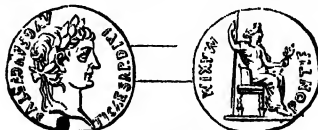

It was but natural that the power of evil should show itself, in more open and direct hostility than ever, in the age of our Lord and His Apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded His coming, and continued till the heaven of Christianity was felt. Nor was it less natural that it should have died away gradually before the great direct, and still greater indirect influence of Christ's kingdom. Accordingly we find early fathers (as Just. Mart. *Dial. c. Tryph.* p. 311 B.; Tertullian, *Apol.* 23, 37, 43) alluding to its existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jehovah as occasionally successful (see Matt. xii. 27; Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the Gospel, and as one well-known benefit which it already conferred on the empire. By degrees the mention is less and less frequent, till the very idea is lost or perverted.

Such is a brief sketch of the Scriptural notices of possession. That round the Jewish notion of it there grew up, in that noted age of superstition, many foolish and evil practices, and much superstitious as to fumigations, &c. (comp. *Tub. viii.* 1-3; *Joseph. Ant.* viii. c. 2 §5), of the "vagabond exorcists" (see Acts xix. 13) is obvious and would be inevitable. It is clear that Scripture does not in the least sanction or even condescend to notice such things; but it is certain that in the Old Testament (see *Lev. xix.* 31; 1 Sam. xxviii. 7, &c.; 2 K. xxi. 6, xxiii. 24, &c.) as well as in the New, it recognises possession as a real and direct power of evil spirits upon the heart. [A. B.]

**DEMOPHON** (Δημόφων), a Syrian general in Palestine under Antiochus V. Eupator (2 Macc. xii. 2).

**DENARIUS** (δηνάριον; *denarius*; A. V. "penny," Matt. xviii. 28, xx. 2, 9, 13, xli. 19; Mark vi. 37, xii. 15, xiv. 5; Luke vii. 41, x. 35, xv. 24; John vi. 7, xli. 5; Rev. vi. 6), a Roman silver coin, in the time of Our Saviour and the Apostles. It took its name from its being first equal to ten "asses," a number afterwards increased to sixteen. The earliest specimens are of about the commencement of the 2nd century B.C. From this time it was the principal silver coin of the commonwealth. It continued to hold the same position under the Empire until long after the close of the New Testament Canon. In the time of Augustus eighty-four denarii were struck from the pound of silver, which would make the standard weight about 60 grs. This Nero reduced by striking ninety-six from the pound, which would give a standard weight of about 52 grs., results confirmed by the coins of the periods, which are, however, not exactly true to the standard. The drachm of the Attic talent, which from the reign of Alexander until the Roman domination, was the most important Greek standard, had, by gradual reduction, become equal to the denarius of Augustus, so that the two coins came to be regarded as identical. Under the same emperor the Roman coin superseded the Greek, and many of the few cities which yet struck silver money, took for it the form and general character of the denarius and of its half the

quinarius. In Palestine in the N. T. period, we learn from numismatic evidence that denarii must have mainly formed the silver currency. It is therefore probable that in the N. T. by δραχμή and δηνάριον, both rendered in the A. V. "piece of silver," we are to understand the denarius [DRACHMA; SILVER, PIECE OF]. The δίδραχμον of the tribute (Matt. xvii. 24) was probably in the time of Our Saviour not a current coin, like the στατήρ mentioned in the same passage (ver. 27). [MONEY.] From the parable of the labourers in the vineyard it would seem that a denarius was then the ordinary pay for a day's labour (Matt. xx. 2, 4, 7, 9, 10, 13). The term *denarius aureus* (Plin. xxxiv. 17, xxxvii. 3) is probably a corrupt designation for the *aureus* (*nummus*); in the N. T. the denarius proper is always intended. (See MONEY, and *Dict. of Ant. Denarius*.) [R. S. P.]

Denarius of Tiberius.

Obv. TI CAESAR DIVI AVG F AVGVSTVS. Head of Tiberius, laureate, to the right (Matt. xxii. 19, 20, 21). Rev. PONTIF MAXIM Seated female figure to the right.

**DEPOSIT** (ἵρηξ; παραθήκη, παρακαταθήκη; *depositum*), the arrangement by which one man kept at another's request the property of the latter, until demanded back, was one common to all the nations of antiquity; and the dishonest dealing with such trusts is marked by profane writers with extreme reprobation (Herod. vi. 86; Juv. xiii. 199, &c.; *Joseph. Ant.* iv. 7, §38; *de B. J.* iv. 8, §5, 7). Even our Saviour seems (Luke xvi. 12) to allude to conduct in such cases as a test of honesty.\* In later times, when no banking system was as yet devised, shrines were often used for the custody of treasure (2 Macc. iii. 10, 12, 15; *Xenoph. Anab.* v. 3, §7; *Cic. Legg.* ii. 16; *Plut. Lys.* c. 18); but, especially among an agricultural people, the exigencies of war and other causes of absence must often have rendered such a deposit, especially as regards animals, an owner's only course. Nor was the custody of such property burdensome; for, the use of it was no doubt, so far as that was consistent with its unimpaired restoration, allowed to the depositary, which office also no one was compelled to accept. The articles specified by the Mosaic law are, (1.) "money or stuff;" and (2.) "an ass, or an ox, or a sheep, or any beast." The first case was viewed as only liable to loss by theft (probably for loss by accidental fire, &c., no compensation could be claimed), and the thief, if found, was to pay double, i. e., probably to compensate the owner's loss, and the unjust suspicion thrown on the depositary. If no theft could be proved, the depositary was to swear before the judges that he had not appropriated the article, and then was quit.<sup>b</sup> In the second, if the beast were to "die or be hurt, or

\* Such is probably the meaning of the words, ἐν τῷ ἀλλοτρίῳ πιστοί. It may also be remarked that, in the parable of the talents, the "lothful servant" affects to consider himself as a mere *depositarius*, in the words ἵδε ἔχει τὸ σόν (Matt. xxv. 25).

<sup>b</sup> The Hebrew expression נָדָה דָּנָה, Ex. xxii. 8, rendered in the A. V. "to see whether," is a common formula *jurandi*.

driven away, no man seeing it."—accidents to which beasts at pasture were easily liable,—the depositary was to purge himself by a similar oath. (Such oaths are probably alluded to Heb. vi. 16, as "an end of all strife.") In case, however, the animal were stolen, the depositary was liable to restitution, which probably was necessary to prevent collusive theft. If it were torn by a wild beast, some proof was easily producible, and, in that case, no restitution was due (Ex. xxii. 7-13). In case of a false oath so taken, the perjured person, besides making restitution, was to "add the fifth part more thereto," to compensate the one injured, and to "bring a ram for a trespass-offering unto the Lord" (Lev. vi. 5, 6). In the book of Tobit (v. 3) a written acknowledgment of a deposit is mentioned (i. 14 (17), iv. 20 (21)). This, however, merely facilitated the proof of the fact of the original deposit, leaving the law untouched. The Mishna (Baba Metzia, c. iii., Shebuoth, v. 1), shows that the law of the oath of purgation in such cases continued in force among the later Jews. Michaelis on the laws of Moses, ch. 162, may be consulted on this subject. [H. H.]

DER'BE (Δέρβη, Acts xiv. 20, 21, xvi. 1; Eth. Δερβαῖος, Acts xx. 4). The exact position of this town has not yet been ascertained, but its general situation is undoubted. It was in the eastern part of the great upland plain of LYCAONIA, which stretches from ICONIUM eastwards along the north side of the chain of Taurus. It must have been somewhere near the place where the pass called the Cilician Gates opened a way from the low plain of Cilicia to the table-land of the interior; and probably it was a stage upon the great road which passed this way. It appears that Cicero went through Derbe on his route from Cilicia to Iconium (Cic. *ad Fam.* xiii. 73). Such was St. Paul's route on his second missionary journey (Acts xv. 41, xvi. 1, 2), and probably also on the third (xviii. 23, xix. 1). In his first journey (xiv. 20, 21) he approached from the other side, viz., from Iconium, in consequence of persecution in that place and at LYSTRA. No incidents are recorded as having happened at Derbe. In harmony with this, it is not mentioned in the enumeration of places 2 Tim. iii. 11. "In the apostolic history Lystra and Derbe are commonly mentioned together: in the quotation from the epistle, Lystra is mentioned and not Derbe. The distinction is accurate; for St. Paul is here enumerating his persecutions" (Paley, *Horas Paulinae*, *in loc.*).

Three sites have been assigned to Derbe. (1.) By Col. Leake (*Asia Minor*, 101), it was supposed to be at *Bin-bir-Kütissah*, at the foot of the *Karadagh*, a remarkable volcanic mountain which rises from the Lycæonian plain; but this is almost certainly the site of LYSTRA. (2.) In Kiepert's *Map*, Derbe is marked farther to the east, at a spot where there are ruins, and which is in the line of a Roman road. (3.) Hamilton (*Researches in Asia Minor*, ii. 313) and Texier (*Asie Mineure*, ii. 129, 130) are disposed to place it at *Divle*, a little to the S.W. of the last position and nearer to the roots of Taurus. In favour of this view there is the important fact that Steph. Byz. says that the place was sometimes called *Δεσβεία*, which in the Lycæonian language (see Acts xiv. 11) meant a "juniper tree." Moreover, he speaks of a *λμηνή* here, which (as Leake and the French translators of Strabo suggest) ought probably to be *λίμνη*; and if this is correct, the requisite condition is en-

tified by the proximity of the Lake *Ak Göl*. Wieseler (*Chronol. der Apost. Zeitalter*, p. 24) takes the same view, though he makes too much of the possibility that St. Paul, on his second journey, travelled by a minor pass to the W. of the Cilician Gates. It is difficult to say why Winer (*Realwörterbuch*, s. v.) states that Derbe was "S. of Iconium and S.E. of Lystra."

Strabo places Derbe at the edge of Isauria; but in the *Synecdemus* of Hierocles (Wesseling, p. 675, where the word is Δέρβαι) it is placed, as in the Acts of the Apostles, in Lycæonia. The boundaries of these districts were not very exactly defined. The whole neighbourhood, to the sea-coast of CILICIA, was notorious for robbery and piracy. Antipater, the friend of Cicero (*ad Fam.* xiii. 73) was the bandit chieftain of Lycæonia. Amyntas, king of Galatia (successor of Deiotarus II.), murdered Antipater and incorporated his dominions with his own. Under the Roman provincial government Derbe was at first placed in a corner of *ΚΑΠΠΑΔΟΓΙΑ*; but other changes were subsequently made. [*GALATIA*.] Derbe does not seem to be mentioned in the Byzantine writers. Leake says (102) that its bishop was a suffragan of the metropolitan of Iconium. [J. S. H.]

DESERT, a word which is sparingly employed in the A. V. to translate four Hebrew terms, of which three are essentially different in signification. A "desert," in the sense which is ordinarily attached to the word, is a vast, burning, sandy, plain, alike destitute of trees and of water. This idea is probably derived from the deserts of Africa—that, for example, which is overlooked by the Pyramids, and with which many travellers are familiar. But it should be distinctly understood that no such region as this is ever mentioned in the Bible as having any connexion with the history of the Israelites, either their wanderings or their settled existence. With regard to the sand, the author of "Sinai and Palestine" has given the fullest correction to this popular error, and has shown that "sand is the exception and not the rule of the Arabian desert" of the Peninsula of Sinai (*S. & P.*, 8, 9, 64). And as to the other features of a desert, certainly the Peninsula of Sinai is no plain, but a region extremely variable in height, and diversified, even at this day, by oases and valleys of verdure and vegetation, and by frequent wells, which were all probably far more abundant in those earlier times than they now are. This however will be more appropriately discussed under the head of WILDERNESSES OF THE WANDERINGS. Here, it is simply necessary to show that the words rendered in the A. V. by "desert," when used in the historical books, denoted definite localities; and that those localities do not answer to the common conception of a "desert."

1. *ARABAH* (עֲרָבָה). The root of this word, according to Gesenius (*Thes.* 1066), is *Arab*, עֲרַב, to be dried up as with heat; and it has been already shown that when used, as it invariably is in the historical and topographical records of the Bible, with the definite article, it means that very depressed and enclosed region—the deepest and the hottest chasm in the world—the sunken valley north and south of the Dead Sea, but more particularly the former. [*ARABAH*.] True, in the pre-

"The sea of sand." See Coleridge's parable on Mystics and Mysticism (*Aids to Refl.* Conclusion.)

sent depopulated and neglected state of Palestine the Jordan valley is as arid and desolate a region as can be met with, but it was not always so. On the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho, "the city of Palm trees," at the lower end of the valley, Bethshean at the upper, and Phasaelis in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (Jos. Ant. xviii. 2, §2; xvi. 5, §2; BETHSHEAN; JERICHO). When the abundant water-resources of the valley were properly husbanded and distributed, the tropical heat caused not barrenness but tropical fertility, and here grew the balsam, the sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. ARABAH in the sense of the Jordan Valley is translated by the word "desert" only in Ez. xlvii. 8. In a more general sense of waste, deserted country—a meaning easily suggested by the idea of excessive heat contained in the root—"Desert," as the rendering of *Arabah*, occurs in the prophets and poetical books; as Is. xxxv. 1, 6, xl. 3, xli. 19, li. 3; Jer. ii. 6, v. 6, xvii. 6, l. 12; but this general sense is never found in the historical books. In these, to repeat once more, *Arabah* always denotes the Jordan valley, the *Ghor* of the modern Arabs. Professor Stanley proposes to use "desert" as the translation of *Arabah* whenever it occurs, and though not exactly suitable, it is difficult to suggest a better word.

2. But if *Arabah* gives but little support to the ordinary conception of a "desert," still less does the other word which our translators have most frequently rendered by it. MIDBAR (מִדְבָּר) is accurately the "pasture ground," deriving its name from a root *dar* (דָּרַךְ), "to drive," significant of the pastoral custom of driving the flocks out to feed in the morning, and home again at night; and therein analogous to the German word *trieb*, which is similarly derived from *treiben*, to drive. With regard to the Wilderness of the Wanderings—for which MIDBAR is almost invariably used—this signification is most appropriate; for we must never forget that the Israelites had flocks and herds with them during the whole of their passage to the Promised Land. They had them when they left Egypt (Ex. x. 26, xii. 38), they had them at Hazeroth, the middle point of the wanderings (Num. xi. 22), and some of the tribes possessed them in large numbers immediately before the transit of the Jordan (Num. xxxii. 1). Midbar is not often rendered by "desert" in the A. V. Its usual and certainly more appropriate translation is "wilderness," a word in which the idea of vegetation is present. In speaking of the Wilderness of the Wanderings the word "desert" occurs as the rendering of *Midbar*, in Ez. iii. 1, v. 3, xix. 2; Num. xxxiii. 15, 16; and in more than one of these it is evidently employed for the sake of euphony merely.

*Midbar* is most frequently used for those tracts of waste land which lie beyond the cultivated ground in the immediate neighbourhood of the towns and villages of Palestine, and which are a very familiar feature to the traveller in that country. In spring these tracts are covered with a rich green verdure of turf, and small shrubs and herbs of various kinds. But at the end of summer the herbage withers, the turf dries up and is pow-

dered thick with the dust of the chalky soil, and the whole has certainly a most dreary aspect. An example of this is furnished by the hills through which the path from Bethany to Jericho pursues its winding descent. In the spring so abundant is the pasturage of these hills, that they are the resort of the flocks from Jerusalem on the one hand and Jericho on the other, and even from the Arabs on the other side of the Jordan. And even in the month of September—when the writer made this journey—though the turf was only visible on close inspection, more than one large flock of goats and sheep was browsing, scattered over the slopes, or stretched out in a long even line like a regiment of soldiers.<sup>b</sup> A striking example of the same thing, and of the manner in which this waste pasture land gradually melts into the cultivated fields, is seen in making one's way up through the mountains of Benjamin, due west, from Jericho to *Mukhmus* or *Jeba*. These *Milbars* seem to have borne the name of the town to which they were most contiguous, for example Bethaven (in the region last referred to); Ziph, Maon, and Paran, in the south of Judah; Gibeon, Jeruel, &c. &c.

In the poetical books "desert" is found as the translation of *Midbar* in Deut. xxxii. 10; Job xxiv. 5; Is. xxi. 1; Jer. xxv. 24.

3. CHAR'BAH (חַרְבָּה). This word is perhaps related to *Arabah*, with the substitution of one guttural for another; at any rate it appears to have the same force, of dryness, and thence of desolation. It does not occur in any historical passages. It is rendered "desert" in Ps. cii. 6; Is. xlviii. 21; Ezek. xiii. 4. The term commonly employed for it in the A. V. is "waste places" or "desolation."

4. JESHIMON (יִשְׁמוֹן). This word in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V. [JESHIMON; BETH-JESHIMOTH.] Without the article it occurs in a few passages of poetry; in the following of which it is rendered "desert." Ps. lxxviii. 40; cvi. 14; Is. xliii. 19, 20. [G.]

DESSAU (Δεσσαύ; Alex. Δεσσαού; Dessau), a village (not "town"; *κῆμα*, *castellum*) at which Nicanor's army was once encamped during his campaign with Judas (2 Macc. xiv. 16). There is no mention of it in the account of these transactions in 1 Macc. or in Josephus. Ewald conjectures that it may have been Adasa (*Gesch.* iv. 368, note).

DEUEL (דְּעוּל; Vat. and Alex. Παγουήλ; *Dehuel*), father of Eliasaph, the "captain" (שָׂרִי) of the tribe of Gad at the time of the numbering of the people at Sinai (Num. i. 14, vii. 42, 47, x. 20). The same man is mentioned again in ii. 14, but here the name appears as Reuel, owing to an interchange of the two very similar Hebrew letters ו and ר. In this latter passage the Samaritan, Arabic and Vulg. retain the D; the LXX., as in the other places, has R. [REUEL.] Which

<sup>b</sup> This practice is not peculiar to Palestine. Mr. Blakesley observed it in Algeria; and gives the reason for it, namely, a more systematic, and therefore complete, consumption of the scanty herbage. (*Four Months in Algeria*, 303.)

of the two was really his name we have no means of deciding.

**DEUTERONOMY** (דְּבָרִים, or אֵלֶּה הַדְּבָרִים, so called from the first words of the book; Δευτερονόμιον, as being a repetition of the Law; *Deuteronomium*: called also by the later Jews מִשְׁנֵה תּוֹרָה and סֵפֶר מוֹכַחֹת).

**A. Contents.** The Book consists chiefly of three discourses delivered by Moses shortly before his death. They were spoken to all Israel in the plains of Moab on the eastern side of the Jordan (i. 1), in the eleventh month of the last year of their wanderings, the fortieth year after their exodus from Egypt (i. 3).

Subjoined to these discourses are the Song of Moses, the Blessing of Moses, and the story of his death.

**I.** The first discourse (i. 1—iv. 40). After a brief historical introduction, the speaker recapitulates the chief events of the last 40 years in the wilderness, and especially those events which had the most immediate bearing on the entry of the people into the promised land. He enumerates the contests in which they had been engaged with the various tribes who came in their way, and in which their success had always depended upon their obedience; and reminds them of the exclusion from the promised land, first of the former generation because they had been disobedient in the matter of the spies, and next of himself with whom the Lord was wroth for their sakes (iii. 26). On the appeal to the witness of this past history is then based an earnest and powerful exhortation to obedience; and especially a warning against idolatry as that which had brought God's judgment upon them in times past (iv. 3), and would bring yet sorer punishment in the future (iv. 26-28). To this discourse is appended a brief notice of the severing of the three cities of refuge on the east side of the Jordan (iv. 41-43).

**II.** The second discourse is introduced like the first by an explanation of the circumstances under which it was delivered (iv. 44-49). It extends from chap. v. 1—xxvi. 19, and contains a recapitulation, with some modifications and additions, of the Law already given on Mount Sinai. Yet it is not bare recapitulation, or naked enactment, but every word shows the heart of the lawgiver full at once of zeal for God and of the most fervent desire for the welfare of his nation. It is the Father no less than the Legislator who speaks. And whilst obedience and life are throughout bound up together, it is the obedience of a loving heart, not a service of formal constraint which is the burden of his exhortations. The following are the principal heads of discourse: (a.) He begins with that which formed the basis of the whole Mosaic code,—the Ten Commandments, and impressively repeats the circumstances under which they were given (v. 1—vi. 3). (b.) Then follows an exposition of the spirit of the First Table. The love of Jehovah who has done so great things for them (vi.), and the utter uprooting of all idol-worship (vii.) are the points chiefly insisted upon. But they are also reminded that if idolatry be a snare on the one hand, so is self-righteousness on the other (viii. 10 ff. x.), and therefore lest they should be lifted up, the speaker enters at length on the history of their past rebellions (ix. 7, 22-24), and especially of their sin in the matter of the golden calf (ix. 9-21). The true nature of obedience is again emphatically urged (x.

12—xi. 32), and the great motives to obedience set forth in God's love and mercy to them as a people (x. 15, 21, 22), as also his signal punishment of the rebellious (xi. 3-6). The blessing and the curse (xi. 26-32) are further detailed. (c.) From the general spirit in which the Law should be observed, Moses passes on to the several enactments. Even these are introduced by a solemn charge to the people to destroy all objects of idolatrous worship in the land (xii. 1-3). They are upon the whole arranged systematically. We have (1.) first the laws touching religion (xii.—xvi. 17); (2.) then those which are to regulate the conduct of the government and the executive (xvi. 18—xxi. 23); and (3.) lastly those which concern the private and social life of the people (xxii. 1—xxvi. 19). The whole are framed with express reference to the future occupation of the land of Canaan.

(1.) There is to be but one sanctuary where all offerings are to be offered. Flesh may be eaten anywhere, but sacrifices may only be slain in "the place which the Lord thy God shall choose" (xii. 5-32). All idol prophets, all enticements to idolatry from among themselves, even whole cities, if idolatrous, are to be cut off (xiii.); and all idolatrous practices to be eschewed (xiv. 1, 2). Next come regulations respecting clean and unclean animals, tithe, the year of release and the three feasts of the Passover, of Weeks, and of Tabernacles (xiv. 3—xvi. 17).

(2.) The laws affecting public personages and defining the authority of the Judges (xvi. 18-20) and the Priests (xvii. 8-13), the way of proceeding in courts of justice (xvii. 1-13); the law of the King (xvii. 14-20), of the Priests and Levites and Prophets (xviii.); of the cities of refuge and of witnesses (xix.). The order is not very exact, but on the whole the section xvi. 18—xix. 21 is *judicial* in its character. The passage xvi. 21—xvii. 1, seems strangely out of place. Baumgarten (*Comm. in loc.*) tries to account for it on the ground of the close connexion which must subsist between the true worship of God and righteous rule and judgment. But who does not feel that this is said with more ingenuity than truth?

Next come the laws of war (xx.), both as waged (a) generally with other nations, and (b) especially with the inhabitants of Canaan (ver. 17).

(3.) Laws touching domestic life and the relation of man to man (xxi. 15—xxvi. 19). So Ewald divides, assigning the former part of chap. xxi. to the previous section. Hävernick on the other hand includes it in the present. The fact is, that ver. 10-14 belong to the laws of war which are treated of in chap. xx., whereas 1-9 seem more naturally to come under the matters discussed in this section. It begins with the relations of the family, passes on to those of the friend and neighbour, and then touches on the general principles of justice and charity by which men should be actuated (xxiv. 16-22). It concludes with the solemn confession which every Israelite is to make when he offers the first fruits, and which reminds him of what he is as a member of the theocracy, as one in covenant with Jehovah and greatly blessed by Jehovah.

Finally, the whole long discourse (v. 1—xxvi. 19) is wound up by a brief but powerful appeal (16-19), which reminds us of the words with which it opened. It will be observed that no pains are taken here, or indeed generally in the Mosaic legislation, to keep the several portions of the law,

considered as moral, ritual, and ceremonial, apart from each other by any clearly marked line. But there is in this discourse a very manifest gradual descent from the higher ground to the lower. The speaker begins by setting forth Jehovah Himself as the great object of love and worship, thence he passes (1.) to the Religions, (2.) to the Political, and (3.) to the Social economy of his people.

III. In the third discourse (xxvii. 1—xxx. 20), the Elders of Israel are associated with Moses. The people are commanded to set up stones upon Mount Ebal, and on them to write "all the words of this law." Then follow the several curses to be pronounced by the Levites on Ebal (xxvii. 14-26), and the blessings on Gerizim (xxviii. 1-14). How terrible will be the punishment of any neglect of this law, is further portrayed in the vivid words of a prophecy but too fearfully verified in the subsequent history of the people. The subject of this discourse is briefly "The Blessing and the Curse."

IV. The delivery of the Law as written by Moses (for its still further preservation) to the custody of the Levites, and a charge to the people to hear it read once every seven years (xxxi.): the Song of Moses spoken in the ears of the people (xxxi. 30—xxxii. 44): and the blessing of the twelve tribes (xxxiii.).

V. The Book closes (xxxiv.) with an account of the death of Moses, which is first announced to him in xxxii. 48-52. On the authorship of the last chapter we shall speak below.

B. *Relation of Deuteronomy to the preceding books.*

It has been an opinion very generally entertained by the more modern critics, as well as by the earlier, that the book of Deuteronomy forms a complete whole in itself, and that it was appended to the other books as a later addition. Only chapters xxxii., xxxiii., xxxiv., have been in whole or in part called in question by De Wette, Ewald, and Von Lengerke. De Wette thinks that xxxii. and xxxiii. have been borrowed from other sources, and that xxxiv. is the work of the Elohist [PENTATEUCH]. Ewald also supposes xxxii. to have been borrowed from another writer, who lived, however (in accordance with his theory, which we shall notice lower down), after Solomon. On the other hand, he considers xxxiii. to be later, whilst Bleek (*Report*, i. 25) and Tuch (*Gen.* 556) decide that it is Elohist. Some of these critics imagine that these chapters originally formed the conclusion of the book of Numbers, and that the Deuteronomist [PENTATEUCH] tore them away from their proper position in order the better to incorporate his own work with the rest of the Pentateuch, and to give it a fitting conclusion. Gesenius and his followers are of opinion that the whole book as it stands at present is by the same hand. But it is a question of some interest and importance whether the book of Deuteronomy should be assigned to the author, or one of the authors, of the former portions of the Pentateuch, or whether it is a distinct and independent work. The more conservative critics of the school of Hengstenberg contend that Deuteronomy forms an integral part of the Pentateuch, which is throughout to be ascribed to Moses. Others, as Stähelin and Delitzsch, have given reasons for believing that it was written by the Jehovist; whilst others again, as Ewald and De Wette, are in favour of a different author.

The chief grounds on which the last opinion rests are the many variations and additions to be

found in Deuteronomy, both in the historical and legal portions, as well as the observable difference of style and phraseology. It is necessary therefore, before we come to consider more directly the question of authorship, to take into account these alleged peculiarities; and it may be well to enumerate the principal discrepancies, additions, &c., as given by De Wette in the last edition of his *Einteilung* (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

I. *Discrepancies.*—The most important discrepancies alleged to exist between the historical portions of Deuteronomy and the earlier books are the following:—

(1.) The appointment of judges (i. 6-18) is at variance with the account in Ex. xviii. It is referred to a different time, being placed after the departure of the people from Horeb (ver. 6), whereas in Exodus it is said to have occurred during their encampment before the mount (Ex. xviii. 5). The circumstances are different, and apparently it is mixed up with the choosing of the seventy elders (Num. xi. 11-17). To this it has been answered, that although Dent. i. 6 mentions the departure from Sinai, yet Dent. i. 9-17 refers evidently to what took place during the abode there, as is shown by comparing the expression "at that time," ver. 9, with the same expression ver. 18. The speaker, as is not unnatural in animated discourse, checks himself and goes back to take notice of an important circumstance prior to one which he has already mentioned. This is manifest, because ver. 19 is so clearly resumptive of ver. 6. Again, there is no force in the objection that Jethro's counsel is here passed over in silence. When making allusion to a well-known historical fact, it is unnecessary for the speaker to enter into details. This at most is an omission, not a contradiction. Lastly, the story in Exodus is perfectly distinct from that in Num. xi., and there is no confusion of the two here. Nothing is said of the institution of the seventy in Dent., probably because the office was only temporary, and if it did not cease before the death of Moses, was not intended to be perpetuated in the promised land. (So in substance Ranke, v. Lengerke, Hengst., Hävern., Stähelin.)

(2.) Chap. i. 22 is at variance with Num. xiii. 2, because here Moses is said to have sent the spies into Canaan at the suggestion of the people, whereas there God is said to have commanded the measure. The explanation is obvious. The people make the request; Moses refers it to God, who then gives to it His sanction. In the historical book of Numbers the divine command only is mentioned. Here, where the lawgiver deals so largely with the feelings and conduct of the people themselves, he reminds them both that the request originated with themselves, and also of the circumstances out of which that request sprang (ver. 20, 21). These are not mentioned in the history. The objection, it may be remarked, is precisely of the same kind as that which in the N. T. is urged against the reconciliation of Gal. ii. 2 with Acts xv. 2, 3. Both admit of a similar explanation.

(3.) Chap. i. 44, "And the Amorites which dwelt in that mountain," &c., whereas in the story of the same event, Num. xiv. 43-45, *Amalekites* are mentioned. Answer: in this latter passage not only Amalekites, but Canaanites, are said to have come down against the Israelites. The Amorites stand here not for "Amalekites," but for "Canaan-

ites," as being the most powerful of all the Canaanitish tribes (cf. Gen. xv. 16; Deut. i. 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you in *Seir*," where, according to 1 Chr. iv. 42, they dwelt (so Hengst. iii. 421).

(4.) Chap. ii. 2-8, confused and at variance with Num. xx. 14-21, and xxi. 4. In the former we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 20), "And he said, Thou shalt not go through. And Edom came out against him," &c. But, according to Deut., that part of the Edomite territory only was traversed which lay about Elath and Ezion-geber. In this exposed part of their territory any attempt to prevent the passage of the Israelites would have been useless, whereas at Kadesh, where, according to Numbers, the opposition was offered, the rocky nature of the country was in favour of the Edomites. (So Hengst. iii. 283 ff., who is followed by Winer, i. 293, note 3.) To this we may add, that in Deut. ii. 8, when it is said, "we passed by from our brethren the children of Esau . . . through the way of the plain from Elath," the failure of an attempt to pass elsewhere is implied. Again, according to Deut., the Israelites purchased food and water of the Edomites and Moabites (ver. 6, 28), which, it is said, contradicts the story in Num. xx. 19, 20. But in both accounts the Israelites offer to pay for what they have (cf. Deut. ii. 6 with Num. xx. 19). And if in Deut. xxiii. 4 there seems to be a contradiction to Deut. ii. 29, with regard to the conduct of the Moabites, it may be removed by observing (with Hengst. iii. 286) that the unfriendliness of the Moabites in not coming out to meet the Israelites with bread and water was the very reason why the latter were obliged to buy provisions.

(5.) More perplexing is the difference in the account of the encampments of the Israelites, as given Deut. x. 6, 7, compared with Num. xx. 23, xxxiii. 30 and 37. In Deut. it is said that the order of encampment was, (1) Bene-jakan, (2) Mosera (where Aaron dies), (3) Gudgodah, (4) Jotbath. In Numbers it is, (1) Moseroth, (2) Bene-jakan, (3) Hor-hagidgad, (4) Jotbath. Then follow the stations Ebronah, Ezion-geber, Kadesh, and Mount Hor, and it is at this last that Aaron dies. (It is remarkable here that no account is given of the stations between Ezion-geber and Kadesh on the return route.) Various attempts have been made to reconcile these accounts. The explanation given by Kurtz (*Atlas zur Gesch. d. A. B.* 20) is on the whole the most satisfactory. He says: "In the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh, Num. xxxiii. 36. On the down-route to Ezion-geber they had encamped at the several stations Moseroth (or Moserah), Bene-Jakan, Chor-hagidgad, and Jotbath. But now again departing from Kadesh, they go to Mount Hor, 'in the edge of the land of Edom' (ver. 37, 38), or to Moserah (Deut. x. 6, 7), this last being in the desert at the foot of the mountain. Bene-Jakan, Gudgodah, and Jotbath were also visited about this time, i. e. a second time, after the second halt at Kadesh." This seems a not improbable explanation, and our knowledge of the topography of the desert is so inaccurate that we can hardly hope for a better. More may be seen in Winer, art. *Wüste*.

(6.) But this is not so much a discrepancy as a peculiarity of the writer: in Deut. the usual name for the mountain on which the law was given is

Horeb, only once (xxxiii. 2) Sinai; whereas in the other books Sinai is far more common than Horeb. The answer given is, that Horeb was the general name of the whole mountain-range; Sinai, the particular mountain on which the law was delivered; and that Horeb, the more general and well-known name, was employed in accordance with the rhetorical style of this book, in order to bring out the contrast between the Sinaitic giving of the law, and the giving of the law in the land of Moab (Deut. i. 5, xxix. 1). So Keil. Of this last explanation it is not too much to say that it is neither ingenious nor satisfactory.

It must be remembered, with regard to all the answers above given, that so far as they reconcile alleged contradictions, they tend to establish the veracity of the writers, but they by no means prove that the writer of the book of Deuteronomy is no other than the writer of the earlier books. So far indeed there is nothing to decide one way or the other. The additions both to the historical and legal sections are in this respect of far more importance, and the principal of them we shall here enumerate.

II. *Additions*.—These are to be found both in the History and in the Law.

1. In the History. (a) The command of God to leave Horeb, Deut. i. 6, 7, not mentioned Num. x. 11. The repentance of the Israelites, Deut. i. 45, omitted Num. xiv. 45. The intercession of Moses in behalf of Aaron, Deut. ix. 20, of which nothing is said Ex. xxxii., xxxiii. These are so slight, however, that, as Keil suggests, they might have been passed over very naturally in the earlier books, supposing both accounts to be by the same hand. But of more note are: (b) The command not to fight with the Moabites and Ammonites, Deut. ii. 9, 19, or with the Edomites, but to buy of them food and water, ii. 4-8. The valuable historical notices which are given respecting the earlier inhabitants of the countries of Moab and Ammon and of Mount Seir, ii. 10-12, 20-23; the sixty fortified cities of Bashan, iii. 4; the king of the country who was "of the remnant of giants," iii. 11; the different names of Hermon, iii. 9; the wilderness of Kedemoth, ii. 26; and the more detailed account of the attack of the Amalekites, xxv. 17, 18, compared with Ex. xvii. 8.

(2) In the Law. The appointment of the cities of refuge, Deut. xix. 7-9, as compared with Num. xxxv. 14 and Deut. iv. 41; of one particular place for the solemn worship of God, where all offerings, tithes, &c., are to be brought, Deut. xii. 5, &c., whilst the restriction with regard to the slaying of animals only at the door of the tabernacle of the congregation (Lev. xvii. 8, 4) is done away, 15, 20, 21; the regulations respecting tithes to be brought with the sacrifices and burnt-offerings to the appointed place, Deut. xii. 6, 11, 17, xiv. 22, &c., xvi. 12; concerning false prophets and seducers to idolatry and those that hearken unto them, xiii.: concerning the king and the manner of the kingdom, xvii. 14, &c.; the prophets, xviii. 15, &c.; war and military service, xx.; the expiation of secret murder; the law of female captives; of first-born sons by a double marriage; of disobedient sons; of those who suffer death by hanging, xxi.; the laws in xxii. 5-8, 13-21; of divorce, xxiv. 1, and various lesser enactments, xxiii. and xxv.; the form of thanksgiving in offering the first-fruits, xxvi.; the command to write the law upon stones, xxvii., and to read it before all Israel at the Feast of Tabernacles, xxxi. 10-13.

Many others are rather extensions or modifications of, than additions to, existing laws, as for instance the law of the Hebrew slave, Deut. xv. 12, &c., compared with Ex. xxi. 2, &c. See also the fuller directions in Deut. xv. 19-23, xxvi. 1-11, as compared with the briefer notices, Ex. xiii. 12, xiiii. 19.

C. Author. 1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible interpolations are, according to De Wette, iv. 41-3, x. 6-9, xxxii. and xxxiii. Internal evidence indeed is strongly decisive that this book of the Pentateuch was not the work of a compiler.

2. It cannot be denied that the style of Deuteronomy is very different from that of the other four books of the Pentateuch. It is more flowing, more rhetorical, more sustained. The rhythm is grand, and the diction more akin to the sublimer passages of the prophets, than to the sober prose of the historians.

3. Who then was the author? On this point the following principal hypotheses have been maintained:—

(1.) The old traditional view that this book, like the other books of the Pentateuch, is the work of Moses himself. Of the later critics, Hengstenberg, Hävernick, Ranke, and others, have maintained this view. Moses Stuart writes: "Deuteronomy appears to my mind, as it did to that of Eichhorn and Herder, as the earnest outpourings and admonitions of a heart which felt the deepest interest in the welfare of the Jewish nation, and which realized that it must soon bid farewell to them . . . Instead of bearing upon its face, as is alleged by some, evidences of another authorship than that of Moses, I must regard this book as being so deeply fraught with holy and patriotic feeling, as to convince any unprejudiced reader who is competent to judge of its style, that it cannot, with any tolerable degree of probability, be attributed to any pretender to legislation, or to any mere imitator of the great legislator. Such a glow as runs through all this book it is in vain to seek for in any artificial or supposititious composition" (*Hist. of the O. T. Curm.*, §3).

In support of this opinion it is said: *a.* That supposing the whole Pentateuch to have been written by Moses, the change in style is easily accounted for when we remember that the last book is hortatory in its character, that it consists chiefly of orations, and that these were delivered under very peculiar circumstances. *b.* That the *usus loquendi* is not only generally in accordance with that of the earlier books, and that as well in their Elohistic as in their Jehovistic portions, but that there are certain peculiar forms of expression common only to these five books. *c.* That the alleged discrepancies in matters of fact between this and the earlier books may all be reconciled (see above), and that the additions and corrections in the legislation are only such as would necessarily be made when the people were just about to enter the promised land. Thus Bertheau observes: "It is hazardous to conclude from contradictions in the laws that they are to be ascribed to a different age . . . He who made additions must have known what it was he was making additions to, and would either have avoided all contradiction, or would have altered the earlier laws to make them agree with the later" (*Die Sieben Gruppen Mos. Gesetze*, p. 19, note). *d.* That the book bears witness to its own author-

ship (xxxi. 19), and is expressly cited in the N. T. as the work of Moses (Matt. xix. 7, 8; Mark x. 3; Acts iii. 22, vii. 37).

The advocates of this theory of course suppose that the last chapter, containing an account of the death of Moses, was added by a later hand, and perhaps formed originally the beginning of the book of Joshua.

(2.) The opinion of Stähelin (and as it would seem of Bleek) that the author is the same as the writer of the Jehovistic portions of the other books. He thinks that both the historical and legislative portions plainly show the hand of the supplementist (*Krit. Unters.* s. 76). Hence he attaches but little weight to the alleged discrepancies, as he considers them all to be the work of the reviser, going over, correcting, and adding to the older materials of the Elohistic document already in his hands.

(3.) The opinion of De Wette, Gesenius, and others, that the Deuteronomist is a distinct writer from the Jehovist. De Wette's arguments are based, *a.*, on the difference in style; *b.*, on the contradictions already referred to as existing in matters of history, as well as in the legislation, when compared with that in Exodus; *c.*, on the peculiarity noticeable in this book, that God does not speak by Moses, but that Moses himself speaks to the people, and that there is no mention of the angel of Jehovah (cf. i. 30, vii. 20-23, xi. 13-17, with Ex. xxiii. 20-33); and lastly on the fact that the Deuteronomist ascribes his whole work to Moses, while the Jehovist assigns him only certain portions.

(4.) From the fact that certain phrases occurring in Deut. are found also in the prophecy of Jeremiah, it has been too hastily concluded by some critics that both books were the work of the prophet. So Von Bohlen, Gesenius (*Gesch. d. Hebr. Spr.* 32), and Hartmann (*Hist. Krit. Forsch.* 660). König, on the other hand (*Alttest. Stud.* ii. 12 ff.), has shown not only that this idiomatic resemblance has been made too much of (see also Keil, *Eint.* p. 117), but that there is the greatest possible difference of style between the two books. And De Wette remarks (*Eint.* p. 191), "Zu viel behauptet fiber diese Verwandtschaft von Bohlen, Gen. a. clxvii."

(5.) Ewald is of opinion that it was written by a Jew living in Egypt during the latter half of the reign of Manasseh (*Gesch. des V. I.* i. 171). He thinks that a pious Jew of that age, gifted with prophetic power and fully alive to all the evils of his time, sought thus to revive and to impress more powerfully upon the minds of his countrymen the great lessons of that Law which he saw they were in danger of forgetting. He avails himself therefore of the groundwork of the earlier history, and also of the Mosaic mode of expression. But as his object is to rouse a corrupt nation, he only makes use of historical notices for the purpose of introducing his warnings and exhortations with the more effect. This he does with great skill and as a master of his subject, whilst at the same time he gives fresh vigour and life to the old law by means of those new prophetic truths which had so lately become the heritage of his people. Ewald further considers that there are passages in Deuteronomy borrowed from the books of Job and Isaiah (iv. 32 from Job viii. 8, and xxviii. 29, 30, 35 from Job v. 14, xxi. 10, ii. 7, and xxviii. 49, &c. from Is. v. 26 ff., xxxiii. 19), and much of it akin to Jeremiah (*Gesch.* i. 171, note). The song of Moses (xxiii.) is, according to him, not by the Deuteronomist, but is nevertheless later than the time of Solomon.

D. *Date of Composition.* Was the Book really written, as its language certainly implies, before the entry of Israel into the Promised Land? Not only does the writer assert that the discourses contained in the Book were delivered in the plains of Moab, in the last month of the 40 years' wandering, and when the people were just about to enter Canaan (i. 1-5), but he tells us with still further exactness that all the words of this Law were written at the same time in the Book (xxi. 9). Moreover, the fact that the goodly land lay even now before their eyes seems everywhere to be uppermost in the thoughts of the legislator, and to lend a peculiar solemnity to his words. Hence we constantly meet with such expressions as "When Jehovah thy God bringeth thee into the land which He hath sworn to thy fathers to give thee," or "whither thou goest in to possess it." This phraseology is so constant, and seems to fall in so naturally with the general tone and character of the Book, that to suppose it was written long after the settlement of the Israelites in Canaan, in the reign of Solomon (De Wette, v. Lengerke and others), or in that of Manasseh (Ewald as above), is not only to make the Book an historical romance, but to attribute very considerable inventive skill to the author (as Ewald in fact does).

De Wette argues, indeed, that the character of the Laws is such as of itself to presuppose a long residence in the land of Canaan. He instances the allusion to the temple (xii. and xvi. 1-7), the provision for the right discharge of the king's and prophetic offices, the rules for civil and military organisation and the state of the Levites, who are represented as living without cities (though such are granted to them in Num. xxv.) and without tithes (allotted to them in Num. xviii. 20, &c.). But in the passages cited the temple is not named, much less is it spoken of as already existing: on the contrary, the phrase employed is "The place which the Lord your God shall choose." Again, to suppose that Moses was incapable of providing for the future and very different position of his people as settled in the land of Canaan, is to deny him even ordinary sagacity. Without raising the question about his divine commission, surely it is not too much to assume that so wise and great a legislator would foresee the growth of a polity and would be anxious to regulate its due administration in the fear of God. Hence he would guard against false prophets and seducers to idolatry. As regards the Levites, Moses might have expected or even desired that, though possessing certain cities (which, however, were inhabited by others as well as themselves), they should not be confined to those cities but scattered over the face of the country. This must have been the case at first, owing to the very gradual occupation of the new territory. The mere fact that in giving them certain rights in Deut. nothing is said of an earlier provision in Num. does not by any means prove that this earlier provision was unknown or had ceased to be in force.

Other reasons for a later date, such as the mention of the worship of the sun and moon (iv. 19, xvii. 3); the punishment of stoning (xvii. 5, xvii. 21, &c.); the name *Feast of Tabernacles*; and the motive for keeping the Sabbath, are of little force. In Amos v. 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxiii. 34; and the motive alleged for the observance of

the Sabbath at least does not exclude other motives.

A further discussion of the question of authorship, as well as of the date of the legislation in Deuteronomy, must be reserved for another article. [PENTATEUCH.] [J. J. S. P.]

DEVII. (*Διδύβλος*; *Diubolos*; properly "one who sets at variance," *διαβάλλει*; comp. Plat. *Symp.* p. 222, C. D.; and generally a "slanderer" or "false accuser").

The word is found in the plural number and adjective sense in 1 Tim. iii. 11; 2 Tim. iii. 3; and Tit. ii. 3. In all other cases it is used with the article as a descriptive name of Satan [*SATAN*], excepting that in John vi. 70 it is applied to Judas (as "Satan" to St. Peter in Matt. xvi. 23), because they—the one permanently, and the other for the moment—were doing Satan's work.

The name describes him as slandering God to man, and man to God.

The former work is, of course, a part of his great work of temptation to evil; and is not only exemplified but illustrated as to its general nature and tendency by the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish ruler, seeking His own good and not that of His creatures. The object is to stir up the spirit of freedom in man to seek a fancied independence; and it is but a slight step further to impute falsehood or cruelty to Him. The success of the devil's slander is seen, not only in the Scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine *φθόνος*, which ran through so many. (See c. g. Herod. i. 32, vii. 46.) The same slander is implied rather than expressed in the temptation of our Lord, and overcome by the faith, which trusts in God's love even where its signs may be hidden from the eye. (Comp. the unmasking of a similar slander by Peter in Acts v. 4.)

The other work, the slandering or accusing man before God, is, as it must necessarily be, unintelligible to us. The All-Seeing Judge can need no accuser, and the All-Pure could, it might seem, have no intercourse with the Evil One. But in truth the question touches on two mysteries, the relation of the Infinite to the Finite spirit, and the permission of the existence of evil under the government of Him who is "the Good." As a part of these it must be viewed,—to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts are proved to us by incontrovertible evidence.

The fact of the devil's accusation of man to God is stated generally in Rev. xii. 10, where he is called "the accuser (*κατήγορος*) of our brethren, who accused them before our God day and night," and exemplified plainly in the case of Job. Its essence as before is the imputation of selfish motives (Job i. 9, 10), and its refutation is placed in the self-sacrifice of those "who loved not their own lives unto death."

For details see *SATAN*.

[A. B.]

DEW (*ῥεῖα*; *ῥέσος*, *ros*). This in the summer is so copious in Palestine that it supplies to some extent the absence of rain (Ecclus. xviii. 16, xliii. 22), and becomes important to the agriculturist; as a proof of this copiousness the well-known sign of Gideon (Judg. vi. 37, 39, 40) may be adduced. Thus it is coupled in the divine blessing with rain, or mentioned as a prime source of fertility (Gen.

xxvii. 28; Deut. xxviii. 13; Zech. viii. 12), and its withdrawal is attributed to a curse (2 Sam. i. 21; 1 K. xvii. 1; Hag. i. 10). It becomes a leading object in prophetic imagery by reason of its penetrating moisture without the apparent effort of rain (Deut. xxxii. 2; Job xxix. 19; Ps. cxxiii. 3; Prov. xix. 12; Is. xxvi. 19; Hos. xiv. 5; Mic. v. 7); while its speedy evanescence typifies the transient goodness of the hypocrite (Hos. vi. 4, xiii. 3). It is mentioned as a token of exposure in the night (Cant. v. 2; Dan. iv. 15, 23, 25-33, v. 21). [H. II.]

**DIADDEM** (דִּיאֲדֵם, דִּיאֲדֵם, or מִצְנֶפֶת; also מִצְנֶפֶת), a word employed in the A. V. as the translation of the above Hebrew terms. They occur in poetical passages, in which neither the Hebrew nor the English words appear to be used with any special force. מִצְנֶפֶת is strictly used for the "mitre" of the high-priest. [MITRE.]

What the "diadem" of the Jews was we know not. That of other nations of antiquity was a fillet of silk, two inches broad, bound round the head and tied behind, the invention of which is attributed to Liber (Plin. *H. N.* vii. 56, 57). Its colour was generally white (Tac. *Ann.* vi. 37; Sil. Ital. xvi. 241); sometimes, however, it was of blue, like that of Darius, *cerulea fascia albo distincta* (Q. Curt. iii. 3, vi. 20; Xen. *Cyr.* viii. 3, §13); and it was worn with pearls or other gems (Gibbon, i. 392; Zech. ix. 16), and enriched with gold (Rev. ix. 7). It was peculiarly the mark of Oriental sovereigns (1 Mace. xii. 32, τὸ δαδῆμα τῆς Ἀσίας), and hence the deep offence caused by the attempt of Caesar to substitute it for the laurel crown appropriated to Roman emperors (*sacabat . . . coronatus; . . . diadema ostendit*, Cic. *Phil.* ii. 34); when some one crowned his statue with a laurel-wreath, *cautidne fascine praefigunt*, the tribunes instantly ordered the fillet or diadem to be removed, and the man to be thrown into prison (Suet. *Caes.* 79). Caligula's wish to use it was considered an act of insanity (Suet. *Cal.* 22). Helioagabalus only wore it in private. Antony assumed it in Egypt (Flor. iv. 11), but Diocletian (or, according to Aurel. Victor, Aurelian) first assumed it as a badge of the empire. Representations of it may be seen on the coins of any of the later emperors (Tillemont, *Hist. Imp.* iii. 531).

A crown was used by the kings of Israel, even in battle (2 Sam. i. 10; similarly it is represented on coins of Theodosius as *encircling* his helmet); but in all probability this was not the state crown (2 Sam. xii. 30), although used in the coronation of Josiah (2 K. xi. 12). Kitto supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress on the word כִּנֹּר in this place, especially as it is very likely that the state crown was kept in the Temple.

In Esth. i. 11, ii. 17, we have כִּנֹּר (κίταρις, κίταρις) for the turban (στολὰ βυσσίνη, vi. 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favour (viii. 15, διὰ δὲ βύσσινον πορφυροῦν). The diadem of the king differed from that of others in having an erect triangular peak (κυρβασία, Aristoph. *Ar.* 487; ἢν οἱ βασιλεῖς μόνον ὀρθὴν ἐφόρουσαν παρὰ Πέρσας, οἱ δὲ στρατηγοὶ κεκλιμένην, Suid. s. v. τιάρα, and Hesych.). Possibly the כִּנֹּר of Dan. iii. 21 is a tiara (as in LXX., where however Orsius and others invert the words καὶ τιάρας

καὶ περικημίσαι), A. V. "hat." Some render it by *tibiale* or *calceamentum*. Schleusner suggests that κρῶβυλος may be derived from it. The tiara generally had pendent flaps falling on the shoulders. (See Paschalius, *de Corona*, p. 573; Brissonius, *de Regn. Pers.*, &c.; Layard, ii. 320; Scarchus Myrothee, iii. 38; Fabricius, *Bibl. Ant.* xiv. 13).

The words סְרִינִי מְבֹנִיִּים in Ez. xxiii. 15 mean long and flowing turbans of gorgeous colours (LXX. παρὰβαττα, where a better reading is τιάραι βατταί). [CROWN.] [F. W. F.]

Obverse of Tetrarchic of Tigranes, king of Syria. Head of king with diadem, to the right.

**DIAL** (מְדִילֹת; ἀναβαθμολ; *horologium*). The word is the same as that rendered "steps" in A. V. (Ex. xx. 26; 1 K. x. 19), and "degrees" in A. V. (2 K. xx. 9, 10, 11; Is. xxxviii. 8), where, to give a consistent rendering, we should read with the margin the "degrees" rather than the "dial" of Ahaz. In the absence of any materials for determining the shape and structure of the solar instrument, which certainly appears intended, the best course is to follow the most strictly natural meaning of the words, and to consider with Cyril of Alexandria and Jerome (*Comm. on Is.* xxxviii. 8), that the מְדִילֹת were really stairs, and that the shadow (perhaps of some column or obelisk on the top) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Ahaz's tastes seem to have led him in pursuit of foreign curiosities (2 K. xvi. 10), and his intimacy with Tiglath-Pileser gave him probably an opportunity of procuring from Assyria the pattern of some such structure; and this might readily lend the "princes of Babylon" (2 Chr. xxxii. 31) to "inquire of the wonder," viz. the alteration of the shadow, in the reign of Hezekiah. Herodotus (ii. 109) mentions that the Egyptians received from the Babylonians the πῶλος and the γνῶμαν, and the division of the day into twelve hours. Of such division, however, the O. T. contains no undoubted trace, nor does any word proved to be equivalent to the "hour" occur in the course of it, although it is possible that Ps. cii. 11, and cix. 23, may contain allusion to the progress of a shadow as measuring diurnal time. In John xi. 9 the day is spoken of as consisting of twelve hours. As regards the physical character of the sign of the retrogression of the shadow in Is. xxxviii. 8, it seems useless to attempt to analyse it; no doubt an alteration in the inclination of the gnomon, or column, &c., might easily effect such an apparent retrogression; but the whole idea, which is that of Divine interference with the course of nature in behalf of the king, resists such an attempt to bring it within the compass of mechanism.

It has been suggested that the מְדִילֹת of Is. xvi.

8, xxvii. 9; Ez. vi. 4, 6, rendered in the margin of the A. V. "sun-images," were gnomons to measure time (Jahn, *Archæol.* i. i. 539), but there seems no adequate ground for this theory. [H. H.]

**DIAMOND** (דָּמָן; *iaspis*; *jaspis*), a precious stone, the third in the second row on the breast-plate of the High-priest (Ex. xxviii. 18, xxxix. 11), and mentioned by Ezekiel (xxviii. 13) among the precious stones of the king of Tyro. Gesenius has noticed the difficulty of identifying the terms used in the versions for each of the Hebrew names of precious stones in the above passages, the translators or transcribers having apparently altered the order in which they stand. *iaspis* seems to be the word in the LXX. corresponding to דָּמָן, but most ancient commentators give *δυνήξ*, *δυνήχιον*, *onychinus*. Our translation, "diamond," is derived from Eben Esra, and is defended by Braun (*de Vest. Sacerd.* ii. 13). Kulisch (on Ex. p. 536) says "perhaps Emerald."

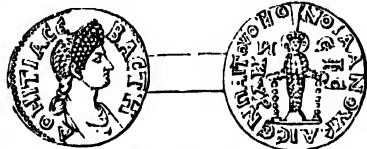

The etymology (from דָּמָן, to strike, or crush) leads us to suppose a hard stone. The emerald, which is of a green colour, of various depths, is nearly as hard as the topaz, and stands next to the ruby in value. The same authority doubts whether the art of engraving on the diamond was known to the ancients, since they did not even understand how to cut the ruby.

Respecting דָּמָן, which is translated "diamond" in Jer. xvii. 1, see under ADAMANT. [W. D.]

**DIA'NA.** This Latin word, properly denoting a Roman divinity, is the representative of the Greek *Artemis* ("Ἀρtemis), the tutelary goddess of the Ephesians, who plays so important a part in the narrative of Acts xix. The Ephesian Diana was, however, regarded as invested with very different attributes, and made the object of a different worship, from the ordinary Diana of the Greeks, and is rather perhaps to be identified with Astarte and other female divinities of the East. K. O. Müller says (*Hist. of the Dorians*, i. 403, Eng. trans.), "everything that is related of this deity is singular and foreign to the Greeks."

Guhl, indeed (*Ephesiaca*, 78-86), takes the contrary view, and endeavours in almost all points to identify her with the true Greek goddess. And in some respects there was doubtless a fusion of the two. Diana was the goddess of rivers, of pools, and of harbours; and these conditions are satisfied by the situation of the sanctuary at Ephesus. Coressus, one of the hills on which the city stood, is connected by Stephanus Byzantinus with κόρη. We may refer also to the popular notion that, when the temple was burnt on the night of Alexander's birth, the calamity occurred because the goddess was absent in the character of Lucina. Again, on coins of Ephesus we sometimes find her exhibited as a huntress and with a stag. But the true Ephesian Diana is represented in a form entirely alien from Greek art. St. Jerome's words are (*Praefat. ad Ephes.*), "Scribebat Paulus ad Ephesios Dianam colentes, non hanc venatricem, quae arcum tenet et succincta est, sed istam *multivivum*, quam Graeci *πολύβιον* vocant, ut scilicet ex ipsa effigie mentirentur omnium eam bestiarum et viventium esse nutricem." Guhl indeed supposes this mode of representation to have reference simply to the fountains over which the goddess presided, conceiving the multiplication of

breasts to be similar to the multiplication of eyes in Argus or of heads in Typhoeus. But the correct view is undoubtedly that which treats this peculiar form as a symbol of the productive and nutritive powers of nature. This is the form under which the Ephesian Diana, so called for distinction, was always represented, wherever worshipped; and the worship extended to many places, such as Sinus, Mitylene, Perga, Hierapolis, and Gortyna, to mention those only which occur in the N. T. or the Apocrypha. The coin below will give some notion

Greek imperial copper coin of Ephesus and Smyrna allied (Ὁμόνοια); Domitian, with name of province.

Obv.: ΔΟΜΙΤΙΑ ΣΕΒΑΣΤΗ. Bust to right. Rev.: ΑΡΤΕΜΙΣ ΕΦΕΣΙΑ ΟΜΟΝΟΙΑ ΕΦΕ ΖΜΥΡ. Ephesian Diana.

of the image, which was grotesque and archaic in character. The head wore a mural crown, each hand held a bar of metal, and the lower part ended in a rude block covered with figures of animals and mystic inscriptions. This idol was regarded as an object of peculiar sanctity, and was believed to have fallen down from heaven (τοῦ Διοπετοῦς, Acts xix. 35).

The Oriental character of the goddess is shown by the nature of her hierarchy, which consisted of women and eunuchs, the former called *Μελαίσσαι*, the latter *Μεγάβουσαι*. At their head was a high-priest called *Ἑσάρη*. These terms have probably some connexion with the fact that the bee was sacred to the Ephesian Diana (Aristoph. *Ran.* 1273). For the temple considered as a work of art we must refer to the article EPIKURUS. No arms were allowed to be worn in its precincts. No bloody sacrifices were offered. Here also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerman, in *Trans. of the Numismatic Soc.* 1841); and we find an interesting proof of the continuance of these privileges in imperial times in Tac. *Ann.* iii. 61 (Strab. xiv. 641; Paus. vii. 2; Cic. *Verr.* ii. 33). The temple had a large revenue from endowments of various kinds. It was also the public treasury of the city, and was regarded as the safest bank for private individuals.

The cry of the mob (Acts xix. 28), "Great is Diana of the Ephesians!" and the strong expression in ver. 27, "whom all Asia and the world worshippeth," may be abundantly illustrated from a variety of sources. The term *μεγάλη* was evidently a title of honour recognised as belonging to the Ephesian goddess. We find it in inscriptions (as in Boeckh, *Corp. Insc.* 2963, c.), and in Xenophon's *Ephesiaca*, i. 11. (For the Ephesian Xenophon, see *Dict. of Biog. and Mythol.*) As to the enthusiasm with which "all Asia" regarded this worship, independently of the fact that Ephesus was the capital of the province, we may refer to such passages as the following: *ὁ τῆς Ἀσίας υἱός*, *Corp. Insc.* i. c.; "communiter a civitatibus Asiæ factum," Liv. i. 45; "tota Asia extruente," Plin. xvi. 79; "factum a tota Asia," ib. xxxvi. 21. As to the notoriety of the worship throughout "the

world," Pausanias tells us (iv. 31) that the Ephesian Diana was more honoured privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines" mentioned by St. Luke (ver. 24), and not by him only. This specific worship was publicly adopted also, as we have seen, in various and distant places: nor ought we to omit the games celebrated at Ephesus in connexion with it, or the treaties made with other cities on this half-religious, half-political basis. [J. S. H.]

**DIBLA'IM** (דִּבְלַיִם; Δεβλαΐμ; *Deblaiim*), mother of Hosea's wife Gomer (Hos. i. 3).

**DIBLA'IM** (accurately DIBLAH, דִּבְלָה, the word in the text being דִּבְלָהָ = "to Diblah," Δεβλαθή; *Deblathu*), a place named only in Ez. vi. 14, as if situated at one of the extremities of the land of Israel:—"I will . . . make the land desolate . . . 'from' the wilderness (*Midbar*) to Diblah." The word *Midbar* being frequently used for the nomad country on the south and south-east of Palestine, it is natural to infer that Diblah was in the north. To this position Beth-diblathaim or Almon-diblathaim in Moab on the east of the Dead Sea, are obviously unsuitable; and indeed a place which like Diblathaim was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is RIBLAH, and the letters D (ד) and R (ר) are so much alike and so frequently interchanged, owing to the carelessness of copyists, that there is a strong probability that Riblah is the right reading. The conjecture is due to Jerome (*Comm. in loc.*), but it has been endorsed by Michaelis, Gesenius, and other scholars (Ges. *Thes.* 312; and see Davidson, *Heb. Text*, Ez. vi. 14). Riblah, though an old town, is not heard of during the early and middle course of Jewish history, but shortly before the date of Ezekiel's prophecy it had started into a terrible prominence from its being the scene of the cruelties inflicted on the last king of Judah, and of the massacres of the priests and chief men of Jerusalem perpetrated there by order of the king of Babylon. [G.]

**DIB'ON** (דִּיבֹן; Δαϊβών, Δηβών; *Dibon*), a town on the east side of Jordan, in the rich pastoral country, which was taken possession of and rebuilt by the children of Gad (Num. xxxii. 3, 34). From this circumstance it possibly received the name of DIBON-GAD. Its first mention is in the ancient fragment of poetry Num. xxi. 30, and from this it appears to have belonged originally to the Moabites. The tribes of Reuben and Gad being both engaged in pastoral pursuits are not likely to have observed the division of towns originally made with the same strictness as the more settled people on the west, and accordingly we find Dibon counted to Reuben in the lists of Joshua (xii. 9—LXX. omits—17). In the time of Isaiah and Jeremiah, however, it was again in possession of Moab (Is. xv. 2; Jer. xlviii. 18, 22, comp. 24). In the same denunciations of Isaiah it appears, probably, under the name of DIMON, M and B

\* See DEUBL, DIWNAH, &c. It is in the LXX. version that the corruption of D into R is most frequently to be observed; Dabon to Rhison, Dodanim to Rhodoi, &c. &c. A case in point is Riblah itself, which in the LXX. is more often Δεβλαθά than Ρεβλαθά.

being convertible in Hebrew, and the change admitting of a play characteristic of the poetry of Isaiah. The two names were both in existence in the time of Jerome (comm. in Josh. xv., quoted by Ireland, 735). The last passages appear to indicate that Dibon was on an elevated situation: not only is it expressly said to be a "high place" (Is. xv. 2), but its inhabitants are bid to "come down" from their glory or their stronghold. Under the name of Dabon or Debon it is mentioned by Eusebius and Jerome in the *Onomasticon*. It was then a very large village (κώμη παμμεγέθης) beyond the Arnon. In modern times the name *Dibban* has been discovered by Seetzen, Irby and Mangles (142), and Burekhardt (*Syr.* 372) as attached to extensive ruins on the Roman road, about three miles north of the Arnon (*Wady Mojib*). All agree, however, in describing these ruins as lying low.

2. One of the towns which was re-inhabited by the men of Judah after the return from captivity (Neh. xi. 25). From its mention with Jakabzeel, Moladah, and other towns of the south, there can be no doubt that it is identical with DIMONAH. [G.]

**DIB'ON-GAD** (דִּיבֹן גָּד; Δαϊβών Γὰδ; *Dibon-gad*), one of the halting-places of the Israelites. It was in Moab between JEABARIM and ALMON-DIBLATHAIM (Num. xxxiii. 45, 46). It was no doubt the same place which is generally called DIBON; but whether it received the name of Gad from the tribe, or originally possessed it, cannot be ascertained. [G.]

**DIB'RI** (דִּבְרִי; Δαβρεί; *Dibri*), a Danite, father of Shelomith, a woman who had married an Egyptian and whose son was stoned for having "blasphemed the Name" [i. e. of Jehovah] (Lev. xxiv. 11).

**DIDRACHMON** (διδραχμών; *didrachmon*). [MONEY; SHEKEL.]

**DIDYMUS** (Δίδυμος), that is, *the Twin*, a surname of the apostle Thomas (John xi. 16, xx. 24, xxi. 2). [THOMAS.]

**DIK'IAH** (דִּיקְיָה; Δεκιά; *Debia*; Gen. x. 27; 1 Chr. i. 21), a son of Joktan, whose settlements, in common with those of the other sons of Joktan, must be looked for in Arabia. The name in Hebrew signifies "a palm-tree," and the cognate

word in Arabic (دَقْدَق), "a palm-tree abounding with fruit;" hence it is thought that Diklah is a part of Arabia containing many palm-trees. The city *Φουλκων*, in the north-west of Arabia Felix, has been suggested as preserving the Joktante name (Boch. *Phaleg*, ii. 22); but Bochart, and after him Gesenius, refer the descendants of Diklah to the Minnei, a people of Arabia Felix inhabiting a palmiferous country. Whether we follow Bochart and most others in placing the Minnei on the east borders of the *Hijáz*, southwards towards the *Yemen*, or follow Fresnel in his identification of the *Wálee Doán* with the territory of this people, the connexion of the latter with Diklah is uncertain and unsatisfactory. No trace of Diklah is known to exist in Arabic works, except the men-

tion of a place called *Dakalah* دَقْلَة = דִּיקְלָה in *El-Yemámeh* (*Kámoos*, s. v.), with many palm-

trees (*Marasid*, s. v.). "Nakhleh" (نخلة) also signifies a palm-tree, and is the name of many places, especially *Nakhleh el-Yenaneeyeh*, and *Nakhleh esh-Shimeeyeh* (here meaning the Southern and Northern Nakhleh), two well-known towns situate near each other. According to some, the former was a seat of the worship of El-I-Att, and a settlement of the tribe of Thakeef; and in a tradition of Mohammed's, this tribe was not of unmixed Ishmaelite blood, but one of four which he thus exclaims:—"All the Arabs are [descended] from Ishmael, except four tribes: Sulaf [Sheleph], Hadramiawt [Hazarmaveth], El-Arwah [?], and Thakeef" (*Mu-at ez-Zemân*, bis).

Therefore, 1. Diklah may probably be recovered in the place called Dikalah above mentioned; or, possibly, 2. in one of the places named Nakhleh.

A discussion of the vexed and intricate question of the Minaii is beyond the limits of this article; but as they are regarded by some authorities of high repute as representing Diklah, it is important to record an identification of their true position. This has hitherto never been done; those who have written on the subject having argued on the vague and contradictory statements of the Greek geographers, from the fact that no native mention of so important a people as the Minaii had been discovered (cf. Bochart, *Phaley*; Fresnel's *Lettres*, *Journal Asiatique*; Jomard, *Essai*, in Mengin's *Hist. de l'Egypte*, vol. iii.; Causin, *Essai*, &c.). There is, however, a city and people in the Yemen which appear to correspond in every respect to the position and name of the Minaii. The latter is written *Menaioi*, *Muraioi*, and *Muraioi*, which may be fairly rendered "people of *Mew*, of *Muv*, and of *Muvv*;" while the first exhibits the sound of a diphthong, or an attempt at a diphthong. The Greek account places them, generally, between the Sabaens (identified with Soba, or Ma-rib: see ARABIA) and the Erythraean Sea. It is therefore remarkable that where it should be sought we find a city with a fortress, called *Ma'een*, or *Ma'in*,

معين (*Kāmoos*, *Marasid*, s. v.), well-known, and

therefore not carefully described in the Arabic geographical dictionaries, but apparently near *San'a*; and further that in the same province are situate the

town of *Mo'eyn* (معين, abbr. dim. of the former), whence the *Bene-Mo'eyn*; and the town of *Ma'eench* (fem. of *Ma'een*). The gent. n. would be *Ma'eenae*, &c. The township in which are the latter two places is named *Sinhân* (comp. Niebuhr, *Descr.* 201) which was one of the confederation

formed by the ancient tribe of Jenb, جنب (*Marasid*, s. v.), grandson of Kahlân, who was brother of Himyer the Joktaute. This identification is reconcilable with all that is known of the Minaii. See further in art. UZAL. [E. S. P.]

DIL'EAN (דילעאן; Alex. *Δαλαδν*; *Deleau*), one of the cities of Judah, in the *Shefelah* or low country (Josh. xv. 38). If Gesenius's interpretation, "gourd" or "cucumber," be correct, the name is very suitable for a place situated in that rich district. It is not elsewhere mentioned, nor has it been subsequently identified with certainty. Van de Velde (ii. 160) suggests that it may be

the modern place *Tina* (Kiepert's map in Robinson, *B. Tina*), about three miles north of *Tell-es-Safieh* in the maritime plain of Philistia, south of Ekron. [G.]

DIM'NAH (דִּמְנָה; Vat. omits; Alex. *δαννα*; *Danna*), a city in the tribe of Zebulun, given to the Merarite Levites (Josh. xxi. 35). The name does not occur in the list of cities belonging to the tribe (Josh. xix. 10-16). In the list of Levitical cities in 1 Chr. vi. 77 occurs RIMMON, accurately Rimmono (רִמּוֹנוֹ), which may possibly be a variation of Dimnah, 7 being often changed into 7. In this case Rimmon is probably the real name (Bertheau, *Chronik*, 72, 3; Movers, *Chronik*, 72). [G.]

DIM'ON, THE WATERS OF (דִּמְוֹן; 72 *דִּבּוֹן* *דִּבּוֹן*; Alex. *ῥεμμαῶν*; *Dibon*), some streams on the east of the Dead Sea, in the land of Moab, against which Isaiah is here uttering denunciations (Is. xv. 9). From Dibon being named in verse 2 of this chapter, as well as in the lists of Moabite towns in Jer. xlviii., and no place named Dimon being elsewhere mentioned as belonging to Moab, Gesenius (*Comment. über Jes.* 534) conjectures that the two names are the same, the form "Dimon" being used for the sake of the play between it and the word *Dum* (דֹּם) "blood." [DIBON, 1.] [G.]

DIMO'NAH (דִּמְוֹנָה; *ῥεγμᾶ*; Alex. *δῖμωνα*; *Dinona*), a city in the south of Judah, the part bordering on the desert of Idumaea (Josh. xv. 22). Dimonah is mentioned in the *Onomasticon*, but was evidently not known to Eusebius and Jerome, nor has it been identified in later times. It probably occurs under the altered name of DIBON in Neh. xi. 25. [G.]

DINAH (דִּינָה, *judged* or *avenged*, from the same root as DAN; *Δείνα*; *Dina*), the daughter of Jacob by Leah (Gen. xxx. 21). She accompanied her father from Mesopotamia to Canaan, and, having ventured among the inhabitants, was violated by Shechem the son of Hamor, the chieftain of the territory in which her father had settled (Gen. xxxiv.). Her age at this time, judging by the subsequent notice of Joseph's age (Gen. xxxvii. 2), may have been from 13 to 15, the ordinary period of marriage in Eastern countries (Lane's *Mud. Egypt.* i. 208). Shechem proposed to make the usual reparation by paying a sum to the father and marrying her (Gen. xxxiv. 12); such reparation would have been deemed sufficient under the Mosiac law (Deut. xxii. 28, 29) among the members of the Hebrew nation. But in this case the suitor was an alien, and the crown of the offence consisted in its having been committed by an alien against the favoured people of God; he had "wrought folly in Israel" (xxxiv. 7). The proposals of Hamor, who acted as his deputy, were framed on the recognition of the hitherto complete separation of the two peoples; he proposed the fusion of the two by the establishment of the rights of intermarriage and commerce; just as among the Romans the *jus connubii* and the *jus commercii* constituted the essence of *civitas*. The sons of Jacob, but upon revenge, availed themselves of the eagerness, which Shechem showed, to effect their purpose; they demanded, as a condition of the proposed union, the circumcision of the Shechemites: the practice could not have been

unknown to the Hivites, for the Phœnicians (Her. ii. 104), and probably most of the Canaanite tribes were circumcised. They therefore assented; and on the third day, when the pain and fever resulting from the operation were at the highest [CIRCUMCISION], Simeon and Levi, own brothers to Dinah, as Josephus observes (*Ant.* i. 21, §1; *δηομήτριοι ἀδελφοί*), attacked them unexpectedly, slew all the males and plundered their city. Jacob's remark (ver. 30) does not imply any guiltiness on the part of his sons in this transaction; for the brothers were regarded as the proper guardians of their sister's honour, as is still the case among the Bedouins; but he dreaded the revenge of the neighbouring peoples, and even of the family of Hamor, some of whom appear to have survived the massacre (*Judg.* ix. 28). His escape, which was wonderful, considering the extreme vigour with which the laws of blood-revenge have in all ages prevailed in the East [BLOOD-REVENGE], is ascribed to the special interference of Jehovah (*xxxv.* 5). Josephus omits all reference to the treachery of the sons of Jacob and explains the easy capture of the city as occurring during the celebration of a feast (*Ant.* i. 21, §2). The object for which this narrative is introduced into the book of Genesis probably is, partly to explain the allusion in Gen. xlix. 5-7, and partly to exhibit the consequences of any association on the part of the Hebrews with the heathens about them. Ewald (*Geschichte*, i. 488) assumes that the historical foundation of the narrative was furnished by an actual fusion of the nomad Isacrites with the aborigines of Shechem, on the ground that the daughters of the patriarchs are generally noticed with an ethnological view; the form in which the narrative appears being merely the colouring of a late author; such a view appears to us perfectly inconsistent with the letter and the spirit of the text. [W. L. B.]

**DINAITES** (דִּנְאִיִּים; *Δειναῖοι*; *Dinaei*, *Ezr.* ix. 9), the name of some of the Cuthæan colonists who were placed in the cities of Samaria by the Assyrian governor, after the conquest and captivity of the ten tribes under Sardanapalus. They remained under the dominion of Persia, and united with their fellow-colonists in opposition to the Jews; but nothing more is known of them. Junius (*Comm. in loc.*), without any authority, identifies them with the people known to geographers by the name *Demani*. [W. A. W.]

**DINHA'BAH** (דִּנְהָבָה; *Δενναβά*; *Denaba*; Gen. xxvii. 32; 1 Chr. i. 43), the capital city, and probably the birthplace, of Bela, son of Beor, king of Elom. Eusebius (*Onomasticon*, s. v.) mentions a village *Dannan* (*Damnab*, Jerome), eight miles from Areopolis, or Ar of Moab (on the road to Arnon; Jerome), and another on Mount Peor, seven miles from Esbus (*Heshbon*); but neither of these has claim to be the Dinhabah of Scripture. R. Joseph, in his Targum (on 1 Chr. i. 43, ed. Wilkins), finds a significance in the name. After identifying Balaam the son of Beor with Laban the Syrian, he adds, "And the name of his capital city was Dinhabah, for it was given (אֵתְּנָהּ) him as a present." With us little probability Gosenius conjectured that it might signify *dominus*, i. e. *locus directionis*, i. e. *praedonum latibulum*. The name is not uncommon among Semitic races. Ptolemy (v. 15, §24) mentions *Δανδβα* in Palmyrene Syria, afterwards a bishop's see; and according to Zosimus (iii. 27) there

was a *Δανδβα* in Babylonia. (Knobel, *Genesis*.) The Peshito Syriac has *דַּנְבָּא*, *Danhab*, probably a mistake for *דַּנְבָּא*. [W. A. W.]

**DIONYSTA** (Διονύστια, *Bacchanalia*), "the feast of Bacchus," which was celebrated, especially in later times, with wild extravagance and licentious enthusiasm. Women, as well as men, joined in the processions (*θιασοί*), acting the part of Maenads, crowned with ivy and bearing the thyrsus (cf. Ovid, *Fast.* iii. 767 ff.; Broudkh. *ad Tib.* iii. 6, 2, who gives a coin of *Maroneia*, bearing a head of Dionysus crowned with ivy); and the phallus was a principal object in the train (Herod. ii. 48, 49). Shortly before the persecution of Antiochus Epiphanes, 168 B.C., in which the Jews "were compelled to go in procession to Bacchus carrying ivy" (2 Macc. vi. 7), the secret celebration of the Bacchanalia in Italy had been revealed to the Roman senate (B.C. 186). The whole state was alarmed by the description of the excesses with which the festival was attended (*Liv.* xxix. 8 ff.), and a decree was passed forbidding its observance in Rome or Italy. This fact offers the best commentary on the conduct of Antiochus; for it is evident that rites which were felt to be incompatible with the comparative simplicity of early Roman worship must have been peculiarly revolting to Jews of the Hasmonean age (cf. Herod. iv. 79, *Σκύθαι τοῦ Βακχεύειν περί Ἑλλησιν ὀνειδίζουσι*). [B. F. W.]

**DIONYSIUS THE AREOPAGITE** (Διονύσιος ὁ Ἀρεοπαγίτης, Acts xvii. 34), an eminent Athenian, converted to Christianity by the preaching of St. Paul. Euseb. (*H. E.* iii. 4) makes him, on the authority of Dionysius, bishop of Corinth, to have been first bishop of Athens (see also *H. E.* iv. 23). According to a later tradition given in the martyrologies on the authority of Aristides the apologist, he suffered martyrdom at Athens. On the writings which were once supposed to have had Dionysius for their author, but which are now confessed to be spurious, and the production of some neo-Platonists of the 6th century, see an elaborate discussion in Herzog's *Encyclopædia*; and for further legends respecting himself, *Suidas sub voce*, and the article in the *Dictionary of Biography and Mythology*. [H. A.]

**DIONYSUS** (Διώνυσος, Διόνυσος, of uncertain derivation), also called *BACCHUS* (*Βάκχος*, *Ίακχος*, the noisy god: after the time of Herodotus), was properly the god of wine. In Homer he appears simply as the "frenzied" god (*Il.* vi. 132), and yet "a joy to mortals" (*Il.* xiv. 325); but in later times the most varied attributes were centred in him as the source of the luxuriant fertility of nature, and the god of civilization, gladness, and inspiration. The eastern wanderings of Dionysus are well known (Strab. xv. 7, p. 687; *Dict. Biogr.* s. v.), but they do not seem to have left any special trace in Palestine (yet cf. *Luc. de Syria Decr.* p. 886, ed. Bened.). His worship, however, was greatly modified by the incorporation of Eastern elements, and assumed the twofold form of wild orgies [*DIONYSIA*] and mystic rites. To the Jew Dionysus would necessarily appear as the embodiment of paganism in its most material shape, sanctioning the most tumultuous passions and the worst excesses. Thus Tacitus (*Hist.* v. 5) rejects

the tradition that the Jews worshipped Bacchus (*Liberum patrem*; cf. *Plut. Quæst. Conv.* iv. 6), on the ground of the "entire diversity of their principles" (*nequaquam congruentius institutis*), though he interprets this difference to their discredit. The consciousness of the fundamental opposition of the God of Israel and Dionysus explains the punishment which Ptolemaeus Philopator inflicted on the Jews (3 Macc. ii. 29), "branding them with the ivy-leaf of Dionysus," though Dionysus may have been the patron god of the Ptolemies (Grimm, on the *Macc.*). And it must have been from the same circumstance that Nicanor is said to have threatened to erect a temple of Dionysus upon the site of the Temple at Jerusalem (2 Macc. xiv. 33).

[B. F. W.]

## DIOSCORINTHIUS. [MONTIUS.]

**DIOTREPHES** (*Διοτρεφής*), a Christian mentioned in 3 John 9, as *φιλοσωρευόν* in some church to which St. John had written, and which, on account of his influence, did not receive the apostle's authority, nor the messengers which he had sent. It is entirely uncertain what church is meant, as it is who Gaius was, to whom the epistle is addressed. [GAIUS.] [H. A.]

## DISCIPLE. [EDUCATION; SCHOOLS.]

**DISCUS** (*δίσκος*), one of the exercises in the Grecian gymnasia, which Jason the high-priest introduced among the Jews in the time of Antiochus Epiphanes, and which he induced even the priests to practise (2 Macc. iv. 14). The discus was a circular plate of stone or metal, made for throwing to a distance as an exercise of strength and dexterity. It was indeed one of the principal gymnastic exercises of the Greeks, and was practised in the heroic age. (For details and authorities, see *Dict. of Gr. & Rom. Ant.* s. v.)

Dioscorinus. (Osterley, Denk. der alt. Kunst. vol. i. no. 129.)

## DISEASES. [MEDICINE.]

**DISH.** 1. *דִּשָּׁה*, Gesen. p. 965: see BASIN.

2. *צִלְתָּה*, in plur. only *צִלְתָּוִית* or *צִלְתָּהִם*; *ὄβρισην*, δ *ἀλάστρος*, *λέβης*; *vas*, *lebes*. 3. *נֶשֶׁךְ*: see CHARGER.

## DISPERSION, JEWS OF THE

In N. T. *τρυβαλον*, Matt. xxvi. 23, Mark xiv. 20. In ancient Egypt, and also in Judaea, guests at the table lauded their food with the fingers, but spoons were used for soup or other liquid food, when required (Wilkinson, *Anc. Eg.* i. 181, 2nd ed.). The same is the case in modern Egypt. Each person breaks off a small piece of bread, dips it in the dish, and then conveys it to his mouth, together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering is contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and intimacy. *τρυβαλον* is used in LXX. for *נֶשֶׁךְ*, sometimes in A. V. "charger" (Ex. xxv. 29; Num. iv. 7, vii. 13, 19). This is also rendered *κοτάλη* or half sextarius, i. e. probably a cup or flask rather than a dish. *τρυβαλον* is in Vulg. Matt. xxvi. 23, *puropis*; in Mark xiv. 20, *cutinus*. Schlensner, *Lex. in N. T. τρυβαλον* (Lane, *Mod. Eg.* i. 193; Chardin, *Voy.* iv. 53, 54; Niebuhr, *Descr. de l'Arab.* 46). [BASIN.] [H. W. P.]

**DIS'ILAN** (*דִּישָׁן*; *Πισών*; *Dism*), the youngest son of Seir the Horite (Gen. xxxvi. 21, 28, 30; 1 Chr. i. 38, 42). [W. L. B.]

**DIS'HION** (*דִּישָׁן*; *Δησών*; *Dison*). 1. The fifth son of Seir (Gen. xxxvi. 21, 26, 30; 1 Chr. i. 38). 2. The son of Anah and grandson of Seir (Gen. xxxvi. 25; 1 Chr. i. 38). Dishon and Dishan belong to the same root, which may possibly reappear in the name *Deisch* noticed by Abulfeda (*Hist. Antisl.* p. 196). The geographical position of the tribes descended from these patriarchs is uncertain. Knobel (*Conun.* in *loc.*) places them to E. and S.E. of the Gulf of Akaba, on the ground that the names of the sons of Dishon, Eshbun, and Hemdan may be identified with *Ushany* and *Humaidy*, branches of the tribe of *Oman*. Such identifications must be received with caution, as similar names are found in other parts of Arabia—*Hamule*, for instance, near Tayf, and again *Hamdun*, which bears a still closer resemblance to the original name, near *Sana* (Burckhardt's *Arabia*, i. 156, ii. 376). [W. L. B.]

**DISPERSION, THE JEWS OF THE**, or simply **THE DISPERSION**, was the general title applied to those Jews who remained settled in foreign countries after the return from the Babylonian exile, and during the period of the second Temple. The original word applied to these foreign settlers (*תַּלְמִידִים*; cf. Jer. xxiv. 5, xxviii. 4, &c., from *לָהֵךְ*, to strip naked; so *בְּנֵי נִלְתָּה*, Ezr. vi. 16) conveys the notion of spoliation and bereavement, as of men removed from the Temple and home of their fathers; but in the LXX. the ideas of a "sojourning" (*μετοικεσία*) and of a "colony" (*ἀποικία*) were combined with that of a "captivity" (*αἰχμαλωσία*), while the term "dispersion" (*διασπορά*, first in Deut. xxviii. 25, *וַיִּשְׁׁרְץ*; cf. Jer. xxxiv. 17), which finally prevailed, seemed to imply that the people thus scattered "to the utmost parts of heaven" (Deut. xxx. 4), "in bondage among the Gentiles" (2 Macc. i. 27), and shut out from the full privileges of the chosen race (John vii. 35), should yet be as the seed sown for a future harvest (cf. Is. xlix. 6 Heb.) in the strange lands where they found a temporary resting-place (1 Pet. i. 1,

παρεπιδήμιος διασποράς). The schism which had divided the first kingdom was forgotten in the results of the general calamity. The Dispersion was not limited to the exiles of Judah, but included "the twelve tribes" (Jann. i. 1, ταῖς δώδεκα φυλαῖς ταῖς ἐν τῇ διασπορᾷ), which expressed the completeness of the whole Jewish nation (Acts xxi. 7, τὸ δωδεκάφυλον).

The Dispersion, as a distinct element influencing the entire character of the Jews, dates from the Babylonian exile. Uncertain legends point to earlier settlements in Arabia, Ethiopia, and Abyssinia; but even if these settlements were made, they were isolated and casual, while the Dispersion, of which Babylon was the acknowledged centre, was the outward proof that a *faith* had succeeded to a *kingdom*. Apart from the necessary influence which Jewish communities bound by common laws, enrolled by the possession of the same truths, and animated by kindred hopes, must have exercised on the nations among whom they were scattered, the difficulties which set aside the literal observance of the Mosaic ritual led to a wider view of the scope of the law, and a stronger sense of its spiritual significance. Outwardly and inwardly, by its effects both on the Gentiles and on the people of Israel, the Dispersion appears to have been the clearest providential preparation for the spread of Christianity.

But while the fact of a recognised Dispersion must have weakened the local and ceremonial influences which were essential to the first training of the people of God, the Dispersion was still bound together in itself and to its mother country by religious ties. The Temple was the acknowledged centre of Judaism, and the faithful Jew everywhere contributed the half-shekel towards its maintenance (τὸ δίδραχμον, Matt. xvii. 24; cf. Mishna, *Shekalim*, 7, 4; Jos. *Ant.* xvi. 6); and, in part at least, the ecclesiastical calendar was fixed at Jerusalem, whence beacon-fires spread abroad the true date of the new-moons (Mishna, *Rosh-Hashana*, 2, 4). The tribute was indeed the simplest and most striking outward proof of the religious unity of the nation. Treasuries were established to receive the payments of different districts (Jos. *Ant.* xviii. 9, 1; cf. *Ant.* xvi. 6, 5, 6), and the collected sums were forwarded to Jerusalem, as in later times the Mahometan offerings were sent to Mecca (Jost, *Gesch. d. Judenth.* 337 n.; Cic. *pro Flacco*, xxviii.).

At the beginning of the Christian era the Dispersion was divided into three great sections, the Babylonian, the Syrian, the Egyptian. Precedence was yielded to the first. The jealousy which had originally existed between the poor who returned to Palestine and their wealthier countrymen at Babylon had passed away, and Gamaliel wrote "to the sons of the Dispersion in Babylonia, and to our brethren in Media . . . and to all the Dispersion of Israel" (Frankel, *Monatsschrift*, 1853, p. 413). From Babylon the Jews spread throughout Persia, Media, and Parthia; but the settlements in China belong to a modern date (Frankel, l. c. p. 463). The few details of their history which have been preserved bear witness to their prosperity and influence (Jos. *Ant.* xiii. 2, 2 f. xviii. 9). No schools of learning are noticed, but Hillel the Elder and Nahum the Mede are mentioned as coming from Babylon to Jerusalem (Frankel).

The Greek conquests in Asia extended the limits of the Dispersion. Seleucus Nicator transplanted large bodies of Jewish colonists from Babylonia to the capitals of his western provinces. His policy

was followed by his successor Antiochus the Great; and the persecutions of Antiochus Epiphanes only served to push forward the Jewish emigration to the remoter districts of his empire. In Armenia the Jews arrived at the greatest dignities, and Nisibis became a new centre of colonization (Frankel, pp. 454-6). The Jews of Cappadocia (1 Pet. i. 1) are casually mentioned in the Mishna; and a prince and princess of Adiabene adopted the Jewish faith only 30 years before the destruction of the Temple (Jos. *Ant.* xx. 2). Large settlements of Jews were established in Cyprus, in the islands of the Aegean (Cos, Delos; Jos. *Ant.* xiv. 10), and on the western coast of Asia Minor (Ephesus, Miletus, Pergamus, Halicarnassus, Sardis; Jos. *Ant.* l. c.). The Romans confirmed to them the privileges which they had obtained from the Syrian kings; and though they were exposed to sudden outbursts of popular violence (Jos. *Ant.* xviii. 9; *B. J.* vii. 3), the Jews of the Syrian provinces gradually formed a closer connexion with their new homes, and together with the Greek language adopted in many respects Greek ideas. [HELLENISTS.]

This Hellenizing tendency, however, found its most free development at Alexandria [ALEXANDRIA]. The Jewish settlements established there by Alexander and Ptolemy I. became the source of the African dispersion, which spread over the north coast of Africa, and perhaps inland to Abyssinia (the *Filasha*). At Cyrene (Jos. *Ant.* xiv. 7, 2, JASON) and Berenice (Tripoli) the Jewish inhabitants formed a considerable portion of the population, and an inscription lately discovered at the latter place (Frankel, p. 422) speaks of the justice and clemency which they received from a Roman governor (cf. Jos. *Ant.* xvi. 6, 5). The African Dispersion, like all other Jews, preserved their veneration for the "holy city" (Philo, *Ley. ad Caium*, §36; in *Flacc.* c. 7), and recognised the universal claims of the Temple by the annual tribute (Jos. l. c.). But the distinction in language led to wider differences, which were averted in Babylon by the currency of an Aramaic dialect. The Scriptures were no longer read on the Sabbath (Frankel, 420; *Vorstudien*, 52 ff.), and no fire-signals conveyed the dates of the new-moons to Egypt (cf. Frankel, 419 n.). Still the national spirit of the African Jews was not destroyed. After the destruction of the Temple the Zealots found a reception in Cyrene (Joseph. *B. J.* vii. 11); and towards the close of the reign of Trajan, A.D. 115, the Jewish population in Africa rose with terrible ferocity (Dion, 68, 32). The insurrection was put down by a war of extermination (Euseb. *H. E.* iv. 2); and the remnant who escaped established themselves on the opposite coast of Europe, as the beginning of a new Dispersion.

The Jewish settlements in Rome were consequent upon the occupation of Jerusalem by Pompey, B.C. 63. The captives and emigrants whom he brought with him were located in the trans-Tiberine quarter, and by degrees rose in station and importance (Philo, *Ley. ad Caium*, §§23 ff.). They were favoured by Augustus and Tiberius after the fall of Sejanus (Philo, l. c.); and a Jewish school was founded at Rome (Frankel, 459). In the reign of Claudius [CLAUDIUS] the Jews became objects of suspicion from their immense numbers (Dion, 60, 6); and the internal disputes consequent, perhaps, upon the preaching of Christianity, led to their banishment from the city (Suet. *Claud.* 25: *Judeos impulsore Chresto assidue tumultuantes Roma expulit*. Acts

xviii. 2). This expulsion, if general, can only have been temporary, for in a few years the Jews at Rome were numerous (Acts xviii. 17 ff.), and continued to be sufficiently conspicuous to attract the attention of the satirists (Mart. *Ep.* xi. 94; Juv. *Sat.* iii. 14).

The influence of the Dispersion on the rapid promulgation of Christianity can scarcely be overated. The course of the apostolic preaching followed in a regular progress the line of Jewish settlements. The mixed assembly from which the first converts were gathered on the day of Pentecost represented each division of the Dispersion (Acts ii. 9-11; (1) Parthians . . . Mesopotamia; (2) Judaea (i. e. Syria) . . . Pamphylia; (3) Egypt . . . Greece; (4) Romans . . .), and these converts naturally prepared the way for the apostles in the interval which preceded the beginning of the separate apostolic missions. The names of the seven demons are all Greek, and one is specially described as a proselyte (Acts vi. 5). The church at Antioch, by which St. Paul was entrusted with his great work among the heathen (Acts xiii. 1), included Barnabas of Cyprus (Acts iv. 36), Lucius of Cyrene, and Simeon, surnamed *Niger*; and among his 'fellow-labourers' at a later time are found Aquila of Pontus (Acts xviii. 2), Apollos of Alexandria (Acts xviii. 24; cf. 1 Cor. iii. 6), and Urkianus (Rom. xvi. 9), and Clement (Phil. iv. 3), whose names, at least, are Roman. Antioch itself became a centre of the Christian Church (Acts xii. 1, xiv. 26, xv. 22, xvii. 22), as it had been of the Jewish Dispersion; and throughout the apostolic journeys the Jews were the class to whom "it was necessary (*ἀναγκαῖον*) that the Word of God should be first spoken" (Acts xiii. 46), and they in turn were united with the mass of the population by the intermediate body of "the devout" (*οἱ σεβόμενοι*), which had recognised in various degrees "the faith of the God of Israel."

The most important original authorities on the Dispersion are Joseph. *Ant.* xiv. 10, xiv. 7; c. *Apion.* ii. 5; Philo, *Leg. ad Caium*; id. c. *Flaccum*. Frankel has collected the various points together in an exhaustive essay in his *Monatschrift*, Nov. Dec. 1853, 409-11; 449-51. Cf. Jost, *Gesch. d. Judenth.* 336; 344. Ewald, *Gesch. d. Volkes Isr.* iv.

#### DIVINATION (ὀραβία; μαντεία, Ez. xiii. 7;

μαντεία, Wisd. xvii. 7; מַנְטִיָּה, *pharmakela*, *technicum*, *divinatio*, Is. xlvii 9; מַנְטִיָּה, *ψιθυρισμός*, &c.). This art "of taking an aim of divine matters by human, which cannot but breed mixture of imaginations" (Baron, *Ess.* xvii.) has been universal in all ages, and all nations alike civilized and savage. It arises from an impression that in the absence of direct, visible guiding Providence, the Deity suffers His will to be known to men, partly by inspiring those who from purity of character or elevation of spirit were susceptible of the divine afflatus (*θεομάνεις, ἐνθουσιασταί, ἐκστατικοί*), and partly by giving perpetual indications of the future, which must be learnt from experience and observation (Cic. *Div.* i. 18; Plin. xxx. 5). The first kind of divination was called Natural (*ἄτεχνος, ἀδίδακτος*), in which the medium of inspiration was transported from his own individuality, and became the passive instrument of supernatural utterances (*Aen.* vi. 47; Ov. *Met.* ii. 640, &c.). As this process involved violent convulsions, the word *μαντική* is derived from *μαίνεσθαι*, and alludes to the foaming mouth and streaming hair of the possessed seer

(Plut. *Tim.* 72. B., where the *μαντῆς* is carefully distinguished from the *προφήτης*). But even in the most passionate and irresistible prophecies of Scripture we have none of these unnatural distortions (Num. xxiii. 5; Ps. xxxix. 3; Jer. xx. 9), although, as we shall see, they were characteristic of pretenders to the gift.

The other kind of divination was artificial (*τεχνητή*), and probably originated in an honest conviction that external nature sympathised with and frequently indicated the condition and prospects of mankind; a conviction not in itself ridiculous, and fostered by the accidental synchronism of natural phenomena with human catastrophes (Thuc. iii. 89; Jos. *B. J.* vi. 5, §3; Foxe's *Martyrs*, iii. 406, &c.). When once this feeling was established the supposed manifestations were infinitely multiplied, and hence the numberless forms of imposture or ignorance called kapomancy, pyromancy, arithmancy, libanomancy, botanomancy, kephalomancy, &c., of which there are abundant accounts in Cic. *de Div.*; Caelan *de Sipientiâ*; Anton. v. Dalm. *de Orig. Idol.*; Fabricius, *Bibl. Ant.* pp. 409-426; Carpzov. *App. Crit.* 540-549; Potter's *Antiq.* i. ch. viii. sq. Indeed there was scarcely any possible event or appearance which was not pressed into the service of augury, and it may be said of the ancient Greeks and Romans, as of the modern New Zealanders, that "after uttering their *karakias* (or chants) the whistling of the wind, the moving of trees, the flash of lightning, the peal of thunder, the flying of a bird, even the buzz of an insect would be regarded as an answer" (Taylor's *New Zealand*, p. 74; Bowring's *Siam*, i. 153 sq.). A system commenced in fanaticism ended in deceit. Hence Cato's famous saying that it was strange how two augurs could meet without laughing in each other's face. But the supposed knowledge became in all nations an engine of political power, and hence interest was enlisted in its support (Cic. *de Legib.* ii. 12; Liv. vi. 27; Soph. *Ant.* 1055; Mic. iii. 11). It fell into the hands of a priestly caste (Gen. xli. 8; Is. xlvii. 13; Jer. v. 31; Dan. ii. 2), who in all nations made it subservient to their own purposes. Thus in Persia, Charlin says that the astrologers would make even the Shah rise at midnight and travel in the worst weather in obedience to their suggestions.

The invention of divination is ascribed to Prometheus (Aesch. *Pr. Vinct.* 492), to the Phrygians and Etruscans, especially sages (Cic. *de Div.* 1; and Clem. Alex. *Strom.* i. 326, where there is a great deal more on the subject), or (as by the Fathers generally) to the devil (Firmic. *Maternus de Errore*, Proem; Lactant. ii. 16; Minuc. Felix. *Oct.* 27). In the same way Zoroaster ascribes all magic to Ahriman (Nork, *Bram. und Rab.* p. 97). Similar opinions have prevailed in modern times (Sir Thomas Browne, *Vulg. Err.* i. xi.).

Many forms of divination are mentioned in Scripture, and the subject is so frequently alluded to that it deserves careful examination. We shall proceed to give a brief analysis of its main aspects as presented in the sacred writers, following as far as possible the order of the books in which the professors of the art are spoken of.

They are first mentioned as a prominent body in the Egyptian court, Gen. xli. 8. 1. חֲזַקְיָהוּ (ἡγήνηται; Hesych. δὲ πρὶ ἐπελὼν καὶ διοσημῶν ἡγήνομενος; Aqu. *κρυφιστά*). They were a class of Egyptian priests, eminent for learning (*λεπογραμματεῖς*). The name may be derived from

they called Bath Kol; of which remarkable instances are found in Gen. xxiv. 14; 1 Sam. xiv. 9, 10; 1 K. xx. 33. After the extinction of the spirit of prophecy it was considered by the Jews as a sort of substitute for the loss. For a curious dissertation on it see Lightfoot, *ad Matt.* iii. 13. A belief in the significance of chance words was very prevalent among the Egyptians (Clem. Alex. *Strom.* i. 304; Plut. *de Is.* 14), and the accidental sigh of the engineer was sufficient to prevent even Amasis from removing the monolithic shrine to Sais (Wilkinson, *Anc. Egypt.* iv. 144). The universality of the belief among the ancients is known to every scholar (Cic. *de Div.* i.; Herod. ii. 90; Virg. *Aen.* vii. 116, &c.). From the general theory of the possibility of such omens sprang the use of the Sortes Biblicae, &c. (Niepph. Greg. viii. Aug. Ep. 119; Prideaux, *Connect.* ii. 376, &c.; Cardan, *de Varietate*, p. 1040).

If מַעֲזֵיזִים be derived from עֵיז, it will mean "one who fascinates with the eyes," as in the Syr. Vers. (cf. Vitringa, *Comment. ad Is.* ii. 6). A belief in the ὄφθαλμοὶ βάσανος (עֵיז עֵיז) was universal, and is often alluded to in Scripture (Deut. xxiii. 6; Matt. xx. 15; Tob. iv. 7, μὴ φθονησάτω σου ὁ ὄφθαλμός, 1 Sam. xviii. 9, "Saul eyed David"). The well-known passages of Pliny and the ancients on the subject are collected in Potter's *Ant.* i. 383, sq.

Others again make the עֵיזִים (Is. ii. 6, &c.), "soothsayers," who predicted "times" as in A. V., from the observation of the clouds (Aben Ezra on Lev. xix. 26) and other *διοσμηταί*, as lightnings, comets, meteors, &c. (Jer. x. 2), like the Etruscan Fulguratores (Cic. *Div.* i. 18; Plin. ii. 43, 53; Plut. *de Superst.*; Hom. *Od.* v. 102; Virg. *Ecl.* i. 16; Humboldt's *Cosmos*, ii. 135, ed. Sabine). Possibly the position of the diviner in making these observations originated the Jewish names for East and West, viz., front and back (Godwyn, iv. 10, but Carpzov disputes the assertion, *Ap. Crit.* p. 541). The practice naturally led to the tabulation of certain days as lucky or unlucky (Job iii. 5, "monthly prognosticators;" Is. xlvii. 13, *ἡμερὰς παρετηρήσθη*, Gal. iv. 10), just as the Greeks and Romans regarded some days as *caulidi*, others as *atri* (Hes. *Opp. et D.* 770; Suet. *Aug.* 92, &c.). If we had space, every one of the superstitions alluded to might be paralleled in modern times.

In Judg. ix. 37, the expression "terebinth of Meonenim (enchantments)" refers not so much to the general sacredness of great trees (Hom. *Od.* xiv. 328, *ῥηθίς Γενίης οἰκεία quercus*, Virg. *Georg.*), as to the fact that (probably) here Jacob had buried his amulets (Gen. xxv. 4; Stanley, *Sin. & Pal.* p. 142).

8. מַחֲשֵׁיזִים (ὁλισμόμενοι; *observantes auguria*; Ps. lviii. 5; 2 K. xvii. 17, xxi. 6, &c.): A. V. enchanters; *ophionants* (Bochart, *Hieroz.* ii. p. 383), from שָׁחַץ, to hiss; people who, like the ancient Psylli (Plin. *H. N.* vii. 2, xviii. 4) and Marmaridae (Sil. Ital. iii. 301),

"Ad quorum cantus serpentes obrita veneni,  
Ad quorum tactum mites jacuere cerastae,"

were supposed to render serpents innocuous and obedient (Ex. vii. 9; Jer. vii. 17; Eccl. x. 11), chiefly by the power of music (Nicand. *Meriac.* 162; Luc. ix. 891; Sil. Ital. 8, 495; Aen. vii. 753; Niebuhr's *Travels*, i. 189); but also no doubt by

the possession of some genuine and often hereditary secret (Lane, *Mod. Egypt.* ii. 106, sq.; Arnob. *adv. Gent.* ii. 32). They had a similar power over scorpions (Frankleu's *Tour to Persia*). The whole subject is exhausted by Bochart (*Hieroz. Tom.* ii. iii. 6, *de As. fide Surdá*).

שָׁחַץ has, however, a general meaning of "learning by experience," like "to augur," in English, Gen. xxx. 27; either because ophiomancy (Ter. *P'horim.* iv. 4, 26) was common, or because the word meant (as the Rabbis say) an observation of *ἐνὸδία σύμβολα*, &c. (Jer. x. 2; Plin. xxviii. 5, 7). Some understand it of *divinatio ex pelvibus* (Plin. *H. N.* xxx. 2; Poli *Syn. ad Deut.* xviii. 10).

9. מַכְשִׁיזִים (μακακολ; *malefici, venefici*; A. V. wizards), from the Arabic, "to reveal," meaning not only astrologers proper (Chaldaei), but generally all the professed occult means of discovering the unknown. It might no doubt involve the use of divining-ropes for the purpose of Aquelicism, &c., dependent on physical laws only partially understood (Mayo's *Pop. Superstitions*).

10. חַבְרִים חַבְרָה (ἐπασιδοντες ἐπασιδῶν; *incantatores*), from חָבַר, to bind (cf. bannen = binden, Gesen. s. v.). Those who acquired power by uttering spells, &c. (καταδῶν; and ὕμνος δέσμιος, Aesch. *Eum.* 296;

"So the spell now works around thee,

And the clankless chain hath bound thee."

*Manfred*, i. 1.)

In Onkelos it is rendered רַמְטִין, a *mutterer*; and this would connect the "enchanters" with the Nekromanteis (No. 5. Is. xxix. 4).

11. Belomants. Alluded to in Ez. xxi. 21, where Nebuchadnezzar, at the parting of two ways, uses divination to decide whether he shall proceed against Jerusalem or Rabbah, and קָלַל בְּחִיצִים (τοῦ ἀναβράσαι βάβρον, I. XX.; but it should be rather *ρίψαι βέλη*, or as Vulg. *commiscens sagittas*; the other explanations are untenable). Jerome (*ad loc.*) explains it of mingling in a quiver arrows on which were inscribed the names of various cities, that city being attacked the name of which was drawn out (Prid. *Connect.* i. 85). Estius says "he threw up a bundle of arrows to see which way they would light, and falling on the right hand he marched towards Jerusalem. The A. V. "made his arrows bright," seems to allude to a sort of *σιδηρομαντεία*,—incorrectly. The arrows used were coloured and 7 such were kept at Mecca. Pietro della Valle saw a divination derived from the changes of 8 arrows at Aleppo, and attributed it to diabolical agency. We read of a somewhat similar custom in use among the ancient Teutons (Tac. *Germ.* x.), and among the Aiani (Am. Marcell. xxvi.); also among the modern Egyptians (Lauw, ii. 111.). "But of another kind was that practised by Elisha," 2 K. xiii. 15" (Sir Thos. Browne, *Vulg. Errors*, v. 23, 7).

12. Closely connected with this was *ἐλομ.* or *βαδρομαντεία* (Hom. iv. 12) מַכְשִׁיזִים. Δόλο ἱσάμενος βάβρους . . . παπούσας ἐπετήρουν δ' οὐν φέροντο, Cyr. Alex. (*ad loc.*), and so too Theophylact. Another explanation is that the positive or negative answer to the required question was decided by the equal or unequal number of *spins* in the staff (Godwyn, i. c.). Parallels are found among the Scythians (Herod. iv. 67, and Schol.

Nicandri *Σκόβαι μυρικῶν μαντεύονται* ξύλῳ), Persians (Strab. xv. p. 847), Assyrians (Athen. *Deipn.* xii. 7), Chinese (Stavrouinis' *Συνα*; Pinkerton, xi. 132), and New Zealanders (called *Niu*, Taylor's *New Zeal.* 91). These kinds of divination are expressly forbidden in the Koran, and are called *at Meisar* (ch. v. Sale's *Prelim. Dissert.* p. 89).

13. *Κυλικομαντεία*, Gen. xlv. 5 (τὸ κῶδῶ τὸ ἀργυροῦν . . . αὐτὸς δὲ οἰωνοῦσιν οἰωνίζεταί ἐν αὐτῷ; Hesych. κῶδῶν, ποτήριον βασιλικόν. *l. quo augurari solet*. Parkhurst and others, denying that divination is intended, make it a mere cup of office (Bruce's *Travels*, ii. 637) "for which he would search carefully" (a meaning which שָׁחַץ may bear). But in all probability the A. V. is right. The Nile was called the cup of Egypt, and the silver vessel which symbolised it had prophetic and mysterious properties (Hävenick, *Introd. to the Pentateuch*, ad loc.). The divination was by means of revelations from the water, or from magically inscribed gems, &c. thrown into it; a sort of *ὕδρομαντεία*, *κασποτρομαντεία*, or *κρυσταλλομαντεία* (Cardan. *de rerum Variet.* cap. 93), like the famous *nûrour of ink* (Lane, ii. 362), and the crystal divining globes, the properties of which depend on a natural law brought into notice in the recent revivals of Mesmerism. The jewelled cup of Jemsheed was a divining cup, and such a one was made by Merlin (*Færic Queen*, iii. 2, 19). Jul. Serenus (*de Fato*, ix. 18) says that after certain incantations, a demon *vocem instar sibilii edebat in aquis*. It is curious to find *κυλικομαντεία* even in the South Sea Islands (*Daily Bib. Illustr.* i. 424). For illustrations of Egyptian cups see Wilkinson, iii. 258. This kind of divination must not be confused with *Cyathomanteia* (Sukl. s. v. *κοτταβίζειν*).

14. Consultation of Terephim (Zech. x. 2; Ez. xxi. 21; *ἐπερωτῆσαι ἐν τοῖς γλυπτοῖς*; 1 Sam. xv. 23, *הָיָה* = an inquirer). These were wooden images (1 Sam. xix. 13) consulted as "idols," from which the excited worshippers fancied that they received oracular responses. The notion that they were the embalmed heads of infants on a gold plate inscribed with the name of an unclean spirit, is Rabbi Eliezer's invention. Other Rabbis think that they may mean "astrolabes, &c." [TEREPHIM.]

15. *Ἡκατοσκοπία*, or *extispicium* (Ez. xxi. 21, *κατασκοπήσασθαι ἐν ἡπατι*, *l. XXX., כִּכְבָּר הָאֵר*). The liver was the most important part of the sacrifice (Artemid. *Onciocr.* ii. 74; Suet. *Aug.* 95; Cic. *de Div.* ii. 13; Sen. *Oedip.* 360). Thus the deaths of both Alexander and Hephæstion were foretold *ἐν τῷ ἥπατι τὸ ἦπαρ ἦν ἱερέλου* (Arrian, *Allec.* vii. 18).

16. *Ὀνειρομαντεία* (Deut. xiii. 2, 3; Judg. vii. 13; Jer. xxiii. 32; Jos. *Ant.* xvii. 6, 4). God frequently revealed Himself by dreams when the soul was thought to be least debased by contact with the body (*εἰδουσα γὰρ φῆν ὁρμασιν λαμπρύνεται*. Aesch. *Eum.*). Many warnings occur in Scripture against the impostures attendant on the interpretation of dreams (Zech. x. 2, &c.). We find however no direct trace of *seeking* for dreams such as occurs in Virg. *Aen.* vii. 81; Plaut. *Cureul.* i. 1, 2, 61. [DREAMS.]

17. The consultation of oracles may be considered as another form of divination (Js. xli. 21-24, xlv. 7). The term oracle is applied to the

Holy of Holies (1 K. vi. 16; Ps. cxviii. 2, דְּבַר, *דַּבְּהָרַתָּא תִּתִּיבֵי תִּתִּיבֵי תִּתִּיבֵי*, Lev. Ma.; Hottinger, *Theol. Phil.* p. 366). That there were several oracles of heathen gods known to the Jews we may infer both from the mention of that of Bael-zebub at Ekron (2 K. i. 2-6), and from the towns named *Idbir*. "Idbir quod nos *oraculum* sive *responsum* possumus appellare, et ut contentiosius verbum exprimaamus e verbo *λαλητήριον*, vel *locutorium* dicere" (Hieron. *ad Eph.* i.). The word "oracles" is applied in the N. T. to the Scriptures (Acts vii. 38; Rom. iii. 2, &c.). On the general subject of oracles see Anton. v. *Dale de oraculis*; *Dict. of Ant. Art. Oraculum*; Potter's *Antiq.* i. 286-326; Sir T. Browne, *Tract* xi., and *Vulp. Err.* vii. 12, &c.

18. It only remains to allude to the fact that superstitious importance was peculiarly attached to the words of dying men. And although the observed fact that "men sometimes at the hour of their departure do speak and reason above themselves" (*Relig. Medici*, xi.) does not of course take away from the death bed prophecies of Scripture their supernatural character (Gen. xlix.; 2 K. xiii., &c.), yet it is interesting to find that there are analogies which resemble them (II. xii. 355; and the story of Calanus; Cic. *de Div.* i. 30; Shakspeare, *Rich.* ii. 2, 1; Daniel, *Civil Wars*, iii. 62, &c.).

Moses forbade every species of divination (cf. *Koran*, ch. v.; Cato *de Re Rust.* 3, *omni superstitione rudes animos infestant*, Columell. ii. 1), because a prying into the future clouds the mind with superstition, and because it would have been (as indeed it proved to be, Is. ii. 6; 2 K. xxi. 6) an incentive to idolatry; indeed the frequent denunciations of the sin in the prophets tend to prove that these forbidden arts presented peculiar temptations to apostate Israel (Hottinger, *Jur. Hebr. Lec.* 253, 254). But God supplied his people with substitutes for divination, which would have rendered it superfluous, and left them in no doubt as to his will in circumstances of danger, had they continued faithful. It was only when they were unfaithful that the revelation was withdrawn (1 Sam. xxviii. 6; 2 Sam. ii. 1, v. 23, &c.). According to the Rabbis the Urim and Thummim lasted until the temple; the spirit of prophecy until Malachi; and the Bath Kol, as the sole means of guidance from that time downwards (Lightfoot, *l. c.*; Maimonides, *de Fendim. Leg.* cap. 7; Abarbanel *Prolegg. in Daniel*).

How far Moses and the Prophets believed in the reality of necromancy, &c., as distinguished from various forms of imposture is a question which at present does not concern us. But even if, in those times, they did hold such a belief, no one will now urge that we are bound to do so at the present day. And yet such was the opinion of Bacon, Bp. Hall, Baxter, Sir Thos. Browne, Lavater, Glanville, Henry More, and numberless other eminent men. Such also was the opinion which led Sir M. Hale to burn Amy Duny and Rose Cullenden at Bury in 1664; and caused even Wesley to say, that "to give up a belief in witchcraft was to give up the Bible." We recommend this statement, in contrast with the all but universal disbelief in such superstitions now, to thoughtful consideration. (For a curious statute against witchcraft (5 Eliz. cap. 15), see Collier's *Eccles. Hist.* vi. 366.)

Superstition not unfrequently goes hand in hand with scepticism, and hence, amid the general infidelity prevalent through the Roman empire at our

Lord's coming, imposture was rampant; as a glance at the pages of Tacitus will suffice to prove. Hence the lucrative trades of such men as Simon Magus (Acts xv. 9), Bar-jesus (Acts xiii. 6, 8), the slave with the spirit of Python (Acts xvi. 16), the vagabond Jews, exorcists (Luke xi. 19; Acts xix. 13), and other *γόητρος* (2 Tim. iii. 13; Rev. xiv. 20, &c.), as well as the notorious dealers in magical *βιβλοι* (*Εφέσια γράμματα*) and *πεπλεγνα* at Ephesus (Acts xix. 19). Among the Jews these flagrant impostors (*ἀπατεῶνες*, Jos.) had become dangerously numerous, especially during the Jewish war; and we find them constantly alluded to in Josephus (*De Bell. Jud.* vi. 5, §1, 2; cf. Matt. xxiv. 23-24; Tac. *H. v.* 12; *Ant.* xv. 5, §1, &c.). As was natural, they, like most Orientals, especially connected the name of Solomon with their spells and incantations (Jos. *Ant.* viii. 2). The names of the main writers on this wide and interesting subject will be found mentioned in the course of the article, and others are referred to in Fabricius *Bibl. Antig.* cap. xii., and Böttcher, *de Inferis*, pp. 101 sq. [F. W. F.]

**DIVORCE.** The law regulating this subject is found Deut. xxiv. 1-4, and the cases in which the right of a husband to divorce his wife was lost, are stated ib. xxii. 19, 29. The ground of divorce was what the text calls a *דבר רב*, on the meaning of which the Jewish doctors of the period of the N. T. widely differed; the school of Shammai seeming to limit it to a moral delinquency in the woman, whilst that of Hillel extended it to trifling causes, e. g., if the wife burnt the food she was cooking for her husband.\* The Pharisees wished perhaps to embroil our Saviour with these rival schools by their question (Matt. xiv. 3); by His answer to which, as well as by His previous maxim (v. 31), he declares that but for their hardened state of heart, such questions would have no place. Yet from the distinction made, "but I say unto you," v. 31, 32, it seems to follow, that He regarded all the lesser causes than "fornication" as standing on too weak ground, and declined the question of how to interpret the words of Moses. It would be unreasonable, therefore, to suppose that by *דבר רב*, to which he limited the remedy of divorce, Moses meant "fornication," i. e. adultery, for that would have been to stultify the law "that such should be stoned" (John viii. 5; Lev. xx. 10). The practical difficulty, however, which attends on the doubt which is now found in interpreting Moses' words will be lessened if we consider, that the mere giving "a bill (or rather "book" *סֵפֶר*) of divorcement" (comp. Is. i. 1; Jer. iii. 8), would in ancient times require the intervention of a Levite, not only to secure the formal correctness of the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. Traditional opinion and prescriptive practice would probably fix the standard of the *דבר רב*, and doubtless with the lax general morality which marks the decline of the Jewish polity, that standard would be lowered (Mal. ii. 14-16). Thus the Gemar. *Babyl. Gittin*. 9 (ap. Selden, *de uz. Heb.* iii. 17) allows

\* Mishna Gittin, ix. 10. R. Akibah allows divorce if the husband merely saw a wife whose appearance pleased him better.

divorce for a wife's spinning in public, or going out with head uncovered or clothes so torn as not properly to conceal her person from sight. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any, save a much more recent one, makes the whole question one of great uncertainty. The case of Phalti and Michal is not in point, being merely an example of one arbitrary act redressed by another (1 Sam. xxv. 44; comp. 2 Sam. iii. 14-16). Selden, quoting (*de uz. Heb.* iii. 19) Zohar, *Præf.* p. 8 b, &c., speaks of an alleged custom of the husband, when going to war, giving the wife the *libellus divorcii*; but the authority is of slight value, and the fact improbable. It is contrary to all known Oriental usage to suppose that the right of quitting their husband and choosing another was allowed to women (Joseph. *Ant.* xv. 7, §10). Salome is noted (*ibid.*) as the first example of it;—one, no doubt, derived from the growing prevalence of heathen laxity. Hence also, probably, the caution given 1 Cor. vii. 10. Winer is surely mistaken (*s. v. Ehescheidung*) in supposing that a man might take back as wife her whom he had divorced, except in the cases when her second husband had died or had divorced her. Such resumption is contemplated by the lawgiver as only possible in those two cases, and therefore is in them only expressly forbidden (Jer. iii. 1).

For the view taken among later Jews on this subject, see Joseph. *Ant.* iv. 8, §23, xvi. 7, §3; *Vit.* 76, a writer whose practice seems to have been in accordance with the views of Hillel. On the general subject Buxtorf, *de Sponsal. et Divort.* 82-83; Selden, *Uxor Hebr.* iii. 17 ff.; and Michaelis, *Laws of Moses*, ii. 336, may be consulted. [H. H.]

**DIZ'AHAB** (*דִּזְאָהָב*; *κατ'ἀρχοσεία*; *ubi aurum est plurimum*), a place in the Arabian Desert, mentioned Deut. i. 1, as limiting the position of the spot in which Moses is there represented as addressing the Israelites. It is by Robinson (i. 147, ii. 187, note) identified with *Dahab*, a cape on the W. shore of the *Gulf of Akabah* about two-thirds down its length; see further under *WILDERNESS*. The name seems to mean "lord," i. e. "possessor of" (Arab. *ذو* and *دَى* = Heb. *פֶּעַל* gold;") probably given from that metal having been there found. Gesen. s. v. [H. H.]

**DO'CUS**<sup>b</sup> (*Δάκ*; Jos. *Δαγών*; *Doch*; Syr. *ܕܐܝܬܐ*; *Doak*), a "little hold" (*τὸ ὀχύρωμα*; *munitionculum*) near Jericho (1 Macc. xvi. 15, comp. verse 14) built by Ptolemy the son of Abubus, and in which he entertained and murdered his father-in-law Simon Maccabæus, with his two sons. By Josephus (*Ant.* xiii. 8, 1; *B. J.* i. 2, 2) it is called *Dagon*, and said to have been "one of the fortresses (*ἐργυμάτων*) above Jericho. The name still remains in the neighbourhood, attached to the copious and excellent springs of *Ain-Dak*, which burst forth in the *Wady Nane'ineh*, at the foot of the mountain of Quarantania (*Quruntul*), about 4 miles N.W. of Jericho. Above the springs are traces of ancient foundations, which may be those of Ptolemy's castle, but more probably of that of the Templars, one of whose stations this was: it stood as late as the latter end of the 13th century,

<sup>b</sup> It would be interesting to know whence the form of the name used in the A. V. was derived.

when it was visited by Brocardus. (See Rob. i. 571, and the quotations in 572, note.) [G.]

**DOD'AI** (דודאי; Δωδία; *Dadi*), an Ahoite who commanded the course of the 2nd month (1 Chr. xxvii. 4). It is probable that he is the same as Dodo, whose name in the *Cetib* and in the LXX. is Dodai, and that the words "Elenaz son of" have been omitted from the above passage in Chronicles. [Dodo, 2.]

**DODA'NIM** (דודנים; Δωδαιοι; *Dodunim*), Gen. x. 4; 1 Chr. i. 7 (in some copies and in marg. of A. V. 1 Chr. i. 7, **RODANIM**, רודנים), a family or race descended from Javan, the son of Japhet (Gen. x. 4; 1 Chr. i. 7). Authorities vary as to the form of the name: the Hebrew text has both. Dodanum appears in the Syriac, Chaklee, Vulgate, Persian, and Arabic versions, and in the Targum of Onkelos; Rodanum is supported by the LXX., the Samaritan version, and some early writers, as Eusebius and Cosmas. The weight of authority is in favour of the former; the substitution of Δωδαιοι in the LXX. may have arisen from familiarity with that name (comp. Ez. xxvii. 15, where it is again substituted for Dedan). Dodanum is regarded as identical with Dardani (Gesen. *Thesaur.* p. 1266), the latter, which is the original form, having been modified by the change of the liquid *r* into *d*, as in Barmilear and Bonilear. Hamilear and Hamilco. Thus the Targum of Jonathan, that on Chronicles, and the Jerusalem Talmud give Dardania for Dodanum. The Dardani were found in historical times in Illyricum and Troy; the former district was regarded as their original seat. They were probably a semi-Pelasgic race, and are grouped with the Chittim in the genealogical table, as more closely related to them than to the other branches of the Pelasgic race (Kuobel, *Völkertafel*, pp. 104 ff.). The similarity of the name Dodona in Epirus has led to the identification of Dodanum with that place; but a mere local designation appears too restricted for the general tenour of Gen. x. Kalisch (*Comm. on Gen.*) identifies Dodanum with the Daunians, who occupied the coast of Apulia: he regards the name as referring to Italy generally. The wide and unexplained difference of the names, and the comparative unimportance of the Daunian form objections to this view. [W. L. B.]

**DODA'VAH** (acc. DODAVAHU; דודאבא; Δωδία; Alex. Δδία; *Dodona*), a man of Mavsha in Judah, father of Eliezer who denounced Jehoshaphat's alliance with Ahaziah (2 Chr. xx. 37). In the Jewish traditions Dodavah is the son of Jehoshaphat, who was also his uncle (Jerome, *Qu. Heb. ad loc.*).

**DODO**. 1. (דודי; Δουδιδ and Δωδωδ; *patruus ejus*), a man of Bethlehem, father of Elihu, who was one of David's "thirty" captains (2 Sam. xxiii. 24; 1 Chr. xi. 26). He is a different person from

2. DODO THE AHOITE, father of Elenaz, the 2nd of the three "mighty men" who were over the "thirty" (2 Sam. xxiii. 9; 1 Chr. xi. 12). He, or his son—in which case we must suppose the words "Elenaz son of" to have escaped from the text—probably had the command of the second monthly course (1 Chr. xxvii. 4). In the latter passage the name is DODAI (דודאי; Δωδία, Alex. Δωαία); but this form occurs in the Hebrew text (*Cetib*) of 2 Sam. xxiii. 9 (דודי), and in the LXX. of all; and in Josephus (*Ant.* vii. 12, §4; Δωδελος); and

is believed by Kennicott (*Dissertation*, §c. 134), who has examined these lists with great minuteness, to be the correct one. The Jewish tradition (Jerome, *Qu. Heb.* on 1 Chr. xi. 12) was, that Dodo was the brother of Jesse.

3. A man of Issachar, forefather of Tola the Judge (Judg. x. 1). The LXX. and Vulg. renderings are remarkable; πατραδέλφου αὐτοῦ: *patrui Abimelech*. [G.]

**DO'EG** (דוג; Δωγκ; *Doeg*), an Idumean (LXX. and Joseph. *Ant.* vi. 12, §1, δ Ξέρως) chief of Saul's herdsmen ("having charge of the mules"). He was at Nob when Ahimelech gave David the sword of Goliath, and not only gave information to Saul, but when others declined the office, himself executed the king's order to destroy the priests of Nob, with their families, to the number of 85 persons, together with all their property (1 Sam. xvi. 7, xxi. 9, 17, 22; Ps. lii.). A question has arisen on the nature of the business by which he was "detained before the Lord" (דוג, συνεχόμενος Νεεσσαράν; *intus in tabernaculo Domini*). The difficulty which lies in the idea that Doeg was a foreigner, and so incapable of a Nazirite vow (*Mischn. de Votiv.* ix. 1, Surenh.), is explained by the probable supposition that he was a proselyte, attending under some vow or some act of purification at the Tabernacle (1 Sam. xx. 18; *Ant. Sacr.* Patrick, Calmet; Ges. p. 1059; Winer, s. v. *Doeg*; Thenius, *ad loc.* in *kurzy. exeg. Hdb.*). [H. W. P.]

**DOG** (דָּוֶג; κυών, κυνάριον; *canis*), an animal frequently mentioned in Scripture. It was used by the Hebrews as a watch for their houses (Is. lvi. 10), and for guarding their flocks (Joh xxx. 1). Then also as now, troops of hungry and semi-wild dogs used to wander about the fields and streets of the cities, devouring dead bodies and other offal (1 K. xiv. 11, xvi. 4, xxi. 19, 23, xxii. 38, 2 K. ix. 10, 36; Jer. xv. 3, Ps. lix. 6, 14), and thus became such objects of dislike that fierce and cruel enemies are poetically styled dogs in Ps. xxii. 16, 20. Moreover the dog being an unclean animal (Is. lvi. 3; Hor. *Ep.* i. 2, 26, *canis immundus et amicus luto sus*), the terms *dog*, *dead dog*, *dog's head* were used as terms of reproach, or of humility in speaking of one's self (1 Sam. xxiv. 14; 2 Sam. iii. 8, ix. 8, xvi. 9; 2 K. viii. 13). Knox relates a story of a nobleman of Ceylon who being asked by the king how many children he had, replied—"Your Majesty's dog has three puppies." Throughout the whole East "dog" is a term of reproach for impure and profane persons, and in this sense is used by the Jews respecting the Gentiles (Rev. xii. 15; comp. Schottgen, *Hor. Heb.* i. 1145), and by Mohammedans respecting Christians. The wanton nature of the dog is another of its characteristics, and there can be no doubt that דָּוֶג in Deut. xxiii. 18 means *scortum virile*, i. q. דָּוֶג; comp. Ecclus. xxvi. 25—"A shameless woman shall be counted as a dog," Hesyeh. *Κυνὴς ἀναδελφίς*. Stanley (*S. & P.* p. 350) mentions to have seen on the very site of Jezreel the descendants of the dogs that devoured Jezebel, prowling on the mounds without the walls for offal and carrion thrown out to them to consume; and Wood, in his Journal to the source of the Oxus, complains that the dog has not yet arrived at his natural position in the social state. We still use the name of one of the noblest creatures in the world as a term of contempt. To ask an Uzbek to

sell his wife would be no affront, but to ask him to sell his dog an unpardonable insult—*Suggerferosh* or dog-seller being the most offensive epithet that one Uzbek can apply to another. The addition of the article (τοῖς κυνῶσις, Matt. xv. 26; Mark vii. 27) implies that the presence of dogs was an ordinary feature of Eastern life in our Saviour's time.

As to the etymology of the word, Bochart thinks that it has reference to the firmness and tenacity of

a dog's bite, and compares *كلبة* = *forcipes*; but this word is more probably itself derived from

*كلب*, a dog.

The root of *כלב* is an unused verb *כלל*, to *strike* = Germ. *klappen*; and thence to *bark* = Germ. *klaffen*. Fr. *clapir*. [W. D.]

## DOORS. [GATES.]

DOPH'KAH (דֹּפְקָה; 'Paphka, the LXX. apparently reading *ῥ* for *ῥ*; *Daphca*), a place mentioned Num. xxxiii. 12, as a station in the Desert where the Israelites encamped; see WILDERNESS. [H. H.]

DOR (דֹּר and דָּר, Josh. xvii. 11, 1 K. iv. 11; *Δῶρ*, *Ḍāra*, 1 Macc. xv. 11), an ancient royal city of the Canaanites (Josh. xii. 23), whose ruler was an ally of Jabin king of Hazor against Joshua (Josh. xi. 1, 2). It was probably the most southern settlement of the Phoenicians on the coast of Syria (Jos. Vit. 8; *Ant.* xv. 9, §8). Josephus describes it as a maritime city, on the west border of Manasseh and the north border of Dan (*Ant.* v. 1, §22, viii. 2, §3, *B. J.* i. 7, §7), near Mount Carmel (*c. Ap.* ii. 10). One old author tells us that it was founded by Dorus a son of Neptune, while another affirms that it was built by the Phoenicians, because the neighbouring rocky shore abounded in the small shell-fish from which they got the purple dye (Steph. B. s. v.; Reland, *Pal.* p. 739). It appears to have been within the territory of the tribe of Asher, though allotted to Manasseh (Josh. xvii. 11; Judg. i. 27). The original inhabitants were never expelled; but during the prosperous reigns of David and Solomon they were made tributary (Judg. i. 27, 28), and the latter monarch stationed at Dor one of his twelve purveyors (1 K. iv. 11). Tryphon, the murderer of Jonathan Maccabaeus and usurper of the throne of Syria, having sought an asylum in Dor, the city was besieged and captured by Antiochus Sidetes (1 Macc. xv. 11). It was subsequently rebuilt by Gabinius the Roman general, along with Samaria, Ashdod, and other cities of Palestine (Joseph. *Ant.* xiv. 5, §3), and it remained an important place during the early years of the Roman rule in Syria. Its coins are numerous, bearing the legend *Ḍāra iepā* (Vaillant, *Num. Imp.*). It became an episcopal city of the province of *Palestina Prima*, but was already ruined and deserted in the fourth century (Hieron. in *Epitaph. Paulae*).

Of the site of Dor there can be no doubt. The descriptions of Josephus and Jerome are clear and full. The latter places it on the coast, "in the ninth mile from Caesarea, on the way to Ptole-

mais" (*Onom. s. v. Dora*). Just at the point indicated is the small village of *Tantāra*, probably an Arab corruption of *Dora*, consisting of about thirty houses, wholly constructed of ancient materials. Three hundred yards north are low rocky mounds projecting into the sea, covered with heaps of rubbish, massive foundations, and fragments of columns. The most conspicuous ruin is a section of an old tower, 30 ft. or more in height, which forms the landmark of *Tantāra*. On the south side of the promontory, opposite the village, is a little harbour, partially sheltered by two or three small islands. A spur of Mount Carmel, steep and partially wooded, runs parallel to the coast line, at the distance of about a mile and a half. Between its base and the sandy beach is a rich and beautiful plain—this is possibly the "border," "coast," or "region" of Dor (דֹּר) in Hebrew, Josh. xi. 2, xii. 23; 1 K. iv. 11) referred to in Scripture. The district is now almost wholly deserted, being exposed to the raids of the wild Bedawin who pasture their flocks on the rich plain of Sharon. [J. L. P.]

## DOR'CAS. [TANITIA.]

DORYMENES (Δορυμένης), father of Ptolemy, surnamed Macron (1 Macc. iii. 36; 2 Macc. iv. 45). As this Ptolemy was in the service of Ptolemy Philometor, king of Egypt, before he deserted to Antiochus Epiphanes, it is probable that his father Dorymenes is the same Dorymenes who fought against Antiochus the Great (Polyb. v. 61).

DOSITHEUS (Δοσίθεος), "a priest and Levite," who carried the translation of Esther to Egypt (Esth. xi. 1, 2). It is scarcely likely that he is identical with the Dositheus who is mentioned by Josephus (*c. Ap.* ii. 5) as one of the "commanders of the forces" of Ptol. VI. Philometor, though he probably lived in the reign of that monarch. [B. F. W.]

## DO'THAIM. [DOTHAN.]

DO'THAN (once דֹּתַן, DOTHAIN, and in contracted form דֹּתַן; = possibly "two wells" - Gen. 332, 568; *Δωθαίμ*, *Δωθαίμ*; *Dothain*), a place first mentioned (Gen. xxxvii. 17) in connexion with the history of Joseph, and apparently as in the neighbourhood of Shechem. It next appears as the residence of Elisha (2 K. vi. 13), and the scene of a remarkable vision of horses and chariots of fire surrounding "the mountain" (הַר), on which the city stood. It is not again mentioned in the O. T.; but later still we encounter it—then evidently well known—as a landmark in the account of Holofernes' campaign against Bethulia (Jud. iv. 6, vi. 3, 18, vii. 3). The change in the name DOTHAIM is due to the Greek text, from which this book is translated. In the Vat. and Alex. and Vulg. text—it is also mentioned in Jud. iii. 9, where the A. V. has "Judea" (*Ἰουδαίας* for *Δωθαίας*), and all these passages testify to its situation being in the centre of the country near the southern edge of the great plain of Esdraelon.

Dothain was known to Eusebius (*Onomasticon*), who places it 12 miles to the N. of Sebaste (Samaria); and here it has been at length discovered

\* This passage was a great puzzle to the old geographers, not only from the corrupt reading, *Ἰουδαίας*, mentioned above, but also from the expression, still found in the text, τοῦ πρὸς τοῦ μεγάλου; A. V. "the great strait;" literally, "the great saw." The knot

was cut by Reland, who conjectured most ingeniously that *πρὸς* was the translation of מִשְׁוֹר, *Masor* = a saw, which was a corruption of מִישׁוֹר, *Mishor* = "the plain" (Reland, 742, §3).

in our own times<sup>b</sup> by Mr. Van de Velde (i. 364, &c.) and Dr. Robinson (iii. 122), still bearing its ancient name unimpaired, and situated at the south end of a plain of the richest pasture, 4 or 5 miles S.W. of *Jenin*, and separated only by a swell or two of hills from the plain of Esdraelon. The *Tell* or mound on which the ruins stand is described as very large—"huge," Van de Velde, i. 364; at its southern foot is still a fine spring. Close to it is an ancient road, running N. and S., the remains of the massive (Jewish?) pavement of which are still distinguishable (V. de Velde, 369, 70). The great road from *Bésán* to Egypt also passes near *Dothan* (Rob. iii. 122). The traditional site was at the *Khan Jubb Yásuf* near *Tell Hám*, at the N. of the Sea of Galilee. (See the quotations in Rob. ii. 419.) It need hardly be said that this position is in accordance with the requirements of the narrative. [G.]

### DOVE (*Yonah*, יוֹנָה; *περιστέρα*; *columba*).

The first mention of this bird occurs in Gen. viii., where it appears as Noah's second messenger sent forth from the ark to ascertain if the waters had abated, and returns from its second mission with an olive leaf in its mouth. The dove's rapidity of flight is alluded to in Ps. lv. 6; the beauty of its plumage in Ps. lxxviii. 13; its dwelling in the rocks and valleys in Jer. xlviii. 28, and Ez. vii. 16; its mournful voice in Is. xxxviii. 14, lix. 11; Nah. ii. 7; its harmlessness in Matt. x. 16; its simplicity in Hos. vii. 11, and its amative nature in Cant. i. 15, ii. 14, &c. The last characteristic, according to Gesenius, is the origin of the Hebrew word, from an unused root יוֹן (יוֹן), to grow warm (comp. Arab. وَحْنُ, to burn with anger, and Gr. *laivō*). None of the other derivations proposed for the word are at all probable; nor can we with Winer regard a word of this form as primitive. It is similar to טוֹבָה, from the root טוֹב. Doves are kept in a domesticated state in many parts of the East. The pigeon-cot is an universal feature in the houses of Upper Egypt. In Persia pigeon-houses are erected at a distance from the dwellings, for the purpose of collecting the dung as manure. There is probably an allusion to such a custom in Is. lx. 8. Stanley (S. & P., p. 257), speaking of Ascalon as the haunt of the Syrian Venus, says: "Her temple is destroyed, but the sacred doves—sacred by immemorial legends on the spot and celebrated there even as late as Eusebius—still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls." It is supposed that the dove was placed upon the standards of the Assyrians and Babylonians in honour of Semhāmī. Tibullus (i. 7) says:

"Quid referam ut volitet crebras intacta per urbes  
Alba Palæstina sancta columba Syro."

This explains the expression in Jer. xxv. 38, כְּפָנֵי חֶרֶב, "from before the fierceness of the dove," i. e. the Assyrian (comp. Jer. xli. 16, l. 16). There is, however, no representation of the dove among the sculptures of Nineveh, so that it could hardly have been a common emblem of the nation at the time when they were executed; and the

word in the above three passages of Jeremiah admits another interpretation. (See *Ges. Thes.* p. 601 a.) In 2 K. vi. 25, in describing the famine in Samaria, it is stated that "the fourth part of a cab of dove's dung was sold for five pieces of silver" (רְבִייוֹנִים, דְּבִייוֹנִים; *κόρυς περιστέρων*; *stercoris columbarum*). רְבִייוֹנִים, i. e. רְבִי וְזֵנִים, is from a root signifying to deposit ordure. There seems good reason for taking this as a literal statement, and that the straits of the besieged were such that they did not hesitate even to eat such revolting food as is here mentioned (comp. Cels. *Hierobot.* ii. p. 32; Maurer on 2 K. vi. 25). The notion that some vegetable production is meant which was called by this name, may be compared with the fact that the Arabs call the herb *Kali خور العصار* = sparrows' dung, and in German the *asafœtida* is called *Teufelsdröck*. [W. D.]

### DOWRY. [MARRIAGE.]

**DRACHMA** (*δραχμή*; *drachma*; 2 Macc. iv. 19, x. 20, xii. 43; Luke xv. 8, 9), a Greek silver coin, varying in weight on account of the use of different talents. The Jews must have been acquainted with three talents, the Ptolemaic, used in Egypt and at Tyre, Sidon, and Berytus, and adopted for their own shekels; the Phœnician, used at Aradus and by the Persians; and the Attic, which was almost universal in Europe, and in great part of Asia. The drachmæ of these talents weigh respectively, during the period of the Maccabees, about 55 grs. troy, 58·5, and 66. The drachms mentioned in 2 Macc. are probably of the Seleucidæ, and therefore of the Attic standard; but in Luke denarii seem to be intended, for the Attic drachma had been at that time reduced to about the same weight as the Roman denarius as well as the Ptolemaic drachma, and was wholly or almost superseded by it. This explains the remark of Josephus, *σικλὸς . . . Ἀττικὰ δέξεται δράχμας τέσσαρας* (*Ant.* iii. 8, §2), for the four Ptolemaic drachmæ of the shekel, as equal to four denarii of his time, were also equal to four Attic drachmæ [MONEY; SILVER, PIECE OF]. [R. S. P.]

**DRAGON.** The translators of the A. V., apparently following the Vulgate, have rendered by the same word "dragon" the two Hebrew words *Tan*, תַּן, and *Tannin*, תַּנִּין. The similarity of the forms of the words may easily account for this confusion, especially as the masculine plural of the former, *Tannin*, actually assumes (in Lam. iv. 3) the form *Tannin*, and, on the other hand, *Tannin* is evidently written for the singular *Tannin* in Ez. xxix. 3, xxxii. 2. But the words appear to be quite distinct in meaning; and the distinction is generally, though not universally, preserved by the LXX.

1. The former is used, always in the plural, in Job xxx. 29; Is. xxxiv. 13, xliii. 20 (*serpentes*); in Is. xlii. 22 (*dragones*); in Jer. x. 22, xlix. 33 (*serpentes*); in Ps. xlii. 19 (*serpentes*); and in Jer. ix. 11, xiv. 6, li. 37; Mic. i. 8 (*serpentes*). The feminine plural *Tannin* is found in Mal. i. 3; a passage altogether differently translated by the

1845 (p. 168); but neither of these travellers gives any account of the site.

<sup>b</sup> In the first and second of these passages the Vulg. has *didrachma*.

<sup>b</sup> It is right to say that the true site of Dothan was known to the Jewish traveller Rabbi ha-Parchi, A.D. 1300 (see Zunz's extracts in notes to Benjamin of Tudela, Asher's ed. ii. 434), and to Schwarz, A.D.

LXX. It is always applied to some creatures inhabiting the desert, and connected generally with the words  $\text{נָחָשׁ}$  ("ostrich") and  $\text{נֶקֶד}$  ("jackal"?). We should conclude from this that it refers rather to some wild beast than to a serpent, and this conclusion is rendered almost certain by the comparison of the *tannin* in Jer. xiv. 6, to the wild asses snuffing the wind, and the reference to their "wailing" in Mic. i. 8, and perhaps in Job xxx. 29. The Syriac (see Winer, *Realw.* s. v. *Schakal*) renders it by a word which, according to Pococke, means a "jackal" (a beast whose peculiarly mournful howl in the desert is well known), and it seems most probable that this or some cognate species is to be understood whenever the word *tan* occurs.

II. The word *tannia*,  $\text{תַּנְיָא}$  (plur.  $\text{תַּנְיָיִם}$ ), is always rendered as *δράκων* in the LXX., except in Gen. i. 21, where we find *κῆρος*. It seems to refer to any great monster, whether of the land or the sea,<sup>a</sup> being indeed more usually applied to some kind of serpent or reptile, but not exclusively restricted to that sense. When referring to the sea it is used as a parallel to  $\text{לִיָּתָן}$  ("Leviathan"), as in Is. xxvii. 1; and indeed this latter word is rendered in the LXX. by *δράκων*, in Ps. lxxiv. 14, civ. 26; Job xl. 20; Is. xxvii. 1; and by *μέγα κῆρος* in Job iii. 8. When we examine special passages we find the word used in Gen. i. 21, of the great sea-monsters, the representatives of the inhabitants of the deep. The same sense is given to it in Ps. lxxiv. 13 (where it is again connected with "Leviathan"), Ps. cxlviii. 7, and probably in Job vii. 12 (Vulg. *octus*). On the other hand, in Ex. vii. 9, 10, 12, Deut. xxxii. 33, Ps. cxi. 13, it refers to land-serpents of a powerful and deadly kind. It is also applied metaphorically to Pharaoh or to Egypt (Is. li. 9; Ez. xxix. 3, xxxii. 2; perhaps Ps. lxxiv. 13), and in that case, especially as feet are attributed to it, it most probably refers to the crocodile as the well-known emblem of Egypt. When, however, it is used of the king of Babylon, as in Jer. li. 34, the same propriety would lead us to suppose that some great serpent, such as might inhabit the sandy plains of Babylonia, is intended.<sup>c</sup>

Such is the usage of the word in the O. T. in the N. T. it is only found in the Apocalypse (Rev. xii. 3, 4, 7, 9, 16, 17, &c.), as applied metaphorically to "the old serpent, called the Devil, and Satan," the description of the "dragon" being dictated by the symbolical meaning of the image rather than by any reference to any actually existing creature. Of similar personification, either of an evil spirit or of the powers of material Nature as distinct from God, we have traces in the extensive prevalence of dragon-worship, and existence of dragon-temples of peculiar serpentine form, the use of dragon-standards both in the east, especially in Egypt (see also the apocryphal history of Bel and the Dragon), and in the west, more particularly among the Celtic tribes. The most remarkable of all, perhaps, is found in the Greek legend of Apollo as the slayer of the Python, and the supplanter of the serpent-worship by a higher wisdom. The reason, at least of the scriptural symbol, is to be sought not only in the union of gigantic power with

craft and malignity, of which the serpent is the natural emblem, but in the record of the serpent's agency in the temptation (Gen. iii.). [SERPENT.] [A. B.]

DREAMS ( $\text{חֲלֹמִים}$ ; *ἐνύπνια*; *somnia*; *καὶ ὄνειρος* in LXX., and *καὶ ὄναρ* in St. Matthew, are generally used for "in a dream"). The Scriptural record of God's communication with man by dreams has been so often supposed to involve much difficulty, that it seems not out of place to refer briefly to the nature and characteristics of dreams generally, before enumerating and classifying the dreams recorded in Scripture.

I. The main difference between our sleeping and waking thoughts appears to lie in this,—that, in the former case, the perceptive faculties of the mind (the sensational powers,<sup>a</sup> and the imagination which combines the impressions derived from them) are active, while the reflective powers (the reason or judgment by which we control those impressions, and distinguish between those which are imaginary or subjective and those which correspond to, and are produced by, objective realities) are generally asleep. Milton's account of dreams (in *Par. Lost*, Book v. 100–113) seems as accurate as it is striking:—

"But know, that in the mind  
Are many lesser faculties, that serve  
Reason as chief: among these fancy next  
Her office holds; of all external things,  
Which the five watchful senses represent,  
She forms imaginations, airy shapes,  
Which reason, joining or disjoining, frames  
All what we affirm, or what deny, and call  
Our knowledge or opinion; then retires  
Into her private cell, when nature sleeps."

Thus it is that the impressions of dreams are in themselves vivid, natural, and picturesque, occasionally gifted with an intuition beyond our ordinary powers, but strangely incongruous and often grotesque; the emotion of surprise or incredulity, which arises from a sense of incongruity, or of unlikeness to the ordinary course of events, being in dreams a thing unknown. The mind seems to be surrendered to that power of association by which, even in its waking hours, if it be inactive and inclined to "musing," it is often carried through a series of thoughts connected together by some vague and accidental association, until the reason, when it starts again into activity, is scarcely able to trace back the slender line of connexion. The difference is, that, in this latter case, we are aware that the connexion is of our own making, while in sleep it appears to be caused by an actual succession of events.

Such is usually the case, yet there is a class of dreams, seldom noticed and indeed less common, but recognised by the experience of many, in which the reason is not wholly asleep. In these cases it seems to look on as it were from without, and so to have a double consciousness: on the one hand we enter into the events of the dream, as though real, on the other we have a sense that it is but a dream, and a fear lest we should awake and its pageant should pass away.

In either case the ideas suggested are accepted

<sup>a</sup> Greenius derives it from an obsolete root  $\text{נָחַ$ , "to extend."

<sup>c</sup> The application of Is. xxvii. 1, appears more uncertain.

<sup>a</sup> These powers are to be carefully distinguished (as in Butler's *Analogy*, part i. c. 1) from the organs through which they are exercised when we are awake.

by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. But it is evident that the method of such suggestion is still undetermined, and in fact is no more capable of being accounted for by any single cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or lastly by the direct action of the Spirit of God, or of created spirits of orders superior to our own, or the spirit within us. So also it is in dreams. In the first place, although memory and imagination supply most of the material of dreams, yet physical sensations of cold and heat, of pain or of relief, even actual impressions of sound or of light will often mould or suggest dreams, and the physical organs of speech will occasionally be made use of to express the emotions of the dreamer. In the second place, instances have been known where a few words whispered into a sleeper's ear have produced a dream corresponding to their subject. On these two points experience gives undoubted testimony; as to the third, it can, from the nature of the case, speak but vaguely and uncertainly. The Scripture declares, not as any strange thing, but as a thing of course, that the influence of the Spirit of God upon the soul extends to its sleeping as well as its waking thoughts. It declares that God communicates with the spirit of man directly in dreams, and also that He permits created spirits to have a like communication with it. Its declaration is to be weighed, not as an isolated thing, but in connexion with the general doctrine of spiritual influence; because any theory of dreams must be regarded as a part of the general theory of the origination of all thought.

II. It is, of course, with this last class of dreams that we have to do in Scripture. The dreams of memory or imagination are indeed referred to in Eccl. v. 3; Is. xxix. 8; but it is the history of the Revelation of the Spirit of God to the spirit of man, whether sleeping or waking, which is the proper subject of Scripture itself.

It must be observed that, in accordance with the principle enunciated by S. Paul in 1 Cor. xiv. 15, dreams, in which the understanding is asleep, are recognised indeed as a method of divine revelation, but placed below the visions of prophecy, in which the understanding plays its part.<sup>b</sup> It is true that the book of Job, standing as it does on the basis of "natural religion," dwells on dreams and "visions in deep sleep" as the chosen method of God's revelation of Himself to man (see Job iv. 13, vii. 14, xxii. 15). But in Num. xii. 6; Deut. xiii. 1, 3, 5; Jer. xxvii. 9; Joel ii. 28, &c., dreamers of dreams, whether true or false, are placed below "prophets," and even below "diviners;" and similarly in the climax of 1 Sam. xxviii. 6, we read that "the Lord answered Saul not, neither by dreams, nor by Urim [by symbol], nor by prophets." Under the Christian dispensation, while we find frequently of trances (*ἐκστασεις*) and visions (*ὁρασεις*, *ὁράματα*), dreams are never referred to as vehicles of divine revelation. In exact accordance with this principle

are the actual records of the dreams sent by God. The greater number of such dreams were granted, for prediction or for warning, to those who were aliens to the Jewish covenant. Thus we have the record of the dreams of Abimelech (Gen. xx. 3-7); Laban (Gen. xxxi. 24); of the chief butler and baker (Gen. xl. 5); of Pharaoh (Gen. xli. 1-8); of the Midianite (Judg. vii. 13); of Nebuchadnezzar (Dan. ii. 1, &c., iv. 10-18); of the Magi (Matt. ii. 12), and of Pilate's wife (Matt. xxvii. 19). Many of these dreams, moreover, were symbolical and obscure, so as to require an interpreter. And, where dreams are recorded as means of God's revelation to His chosen servants, they are almost always referred to the periods of their earliest and most imperfect knowledge of Him. So it is in the case of Abraham (Gen. xv. 12, and perhaps 1-9), of Jacob (Gen. xxviii. 12-15), of Joseph (Gen. xxxvii. 5-10), of Solomon (1 K. iii. 5), and, in the N. T., of Joseph (Matt. i. 20, ii. 13, 19, 22). It is to be observed, moreover, that they belong especially to the earliest age, and become less frequent as the revelations of prophecy increase. The only exception to this is found in the dreams and "visions of the night" given to Daniel (ii. 19, vii. 1), apparently in order to put to shame the falsehoods of the Chaldaean belief in prophetic dreams and in the power of interpretation, and yet to bring out the truth latent therein (comp. S. Paul's miracles at Ephesus, Acts xix. 11, 12, and their effect, 18-20).

The general conclusion therefore is, first, that the Scripture claims the dream, as it does every other action of the human mind, as a medium through which God may speak to man either directly, that is, as we call it, "providentially," or indirectly in virtue of a general influence upon all his thoughts; and secondly, that it lays far greater stress on that divine influence by which the understanding also is affected, and leads us to believe that as such influence extends more and more, revelation by dreams, unless in very peculiar circumstances, might be expected to pass away. [A. B.]

**DRESS.** This subject includes the following particulars:—1. Materials. 2. Colour and decoration. 3. Name, form, and mode of wearing the various articles. 4. Special usages relating thereto.

1. The materials were various, and multiplied with the advance of civilization. The earliest and simplest robe was made out of the leaves of a tree (*תְּרֵמֶלֶךְ*, "A. V. fig-tree"—and comp. the present Arabic name for the fig, *tin*, or *teen*), portions of which were sewn together, so as to form an apron (Gen. iii. 7). Ascetic Jews occasionally used a similar material in later times. Josephus (*Vita*, §2) records this of Barnas (*ἐσθῆτι μὲν ἀπὸ δένδρων χρώμενον*); but whether it was made of the leaves, or the bark, is uncertain. After the fall, the skins of animals supplied a more durable material (Gen. iii. 21), which was adapted to a rude state of society, and is stated to have been used by various ancient nations (Diod. Sic. i. 43, ii. 38; Arius, *Ind.* cap. 7, §3). Skins were not wholly disused at later periods: the *adlareth* (*תְּרֵמֶלֶךְ*) worn by Elijah appears to have been the skin of a sheep or some other animal with the wool left on: in the LXX. the word is rendered *μηλωτή* (1 K. xix. 13, 19; 2 K. ii. 13), *δορά* (Gen. xxv. 25), and *δέρις* (Zech. xiii. 4); and it may be connected with *δορά* etymologically (Sualchut, *Archaeol.* i. 19); Gesenius, however, prefers the notion of *amplitudo*, *אָרְרָה*, in which case it = *אָרְרָה*.

<sup>b</sup> The same order, as being the natural one, is found in the earliest record of European mythology—

<sup>a</sup> *Ἄλλ' ἄγε δὴ τινα μάντιν ἐρεόμεν, ἥ ἱερῶα*

<sup>a</sup> *Ἡ καὶ ὀνειρόπολον, καὶ γὰρ τὸν αἶν Διὸς ἐστί.*

HOM. II. 1. 63.

(Mic. ii. 8; *Theaur.* p. 29). The same material is implied in the description (שֵׁשׁ בָּגָדִים אֲחֵרִים; *ἀνὴρ δασύς*, LXX.; A. V. "hairy man," 2 K. i. 8), though these words may also be understood of the hair of the Prophet; and in the comparison of Esau's skin to such a robe (Gen. xxv. 25). It was characteristic of a prophet's office from its mean appearance (Zech. xiii. 4; cf. Matt. vii. 15). Pelisses of sheep-skin\* still form an ordinary article of dress in the East (Burckhardt's *Notes on Bedouins*, i. 50). The *addereth* worn by the king of Nineveh (Jon. iii. 6), and the "goolly Babylonish garment" found at Ai (Josh. vii. 21), were of a different character, either robes trimmed with valuable furs, or the skins themselves ornamented with embroidery. The art of weaving hair was known to the Hebrews at an early period (Ex. xvi. 7, xxxv. 6); the sackcloth used by mourners was of this material [SACKCLOTH], and by many writers the *addereth* of the prophets is supposed to have been such. John the Baptist's robe was of camel's hair (Matt. iii. 4), and a similar material was in common use among the poor of that day (Joseph. *B. J.* i. 24, §3), probably of goats' hair, which was employed in the Roman *cilicium*. At what period the use of wool, and of still more artificial textures, such as cotton and linen, became known is uncertain: the first of these, we may presume, was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen. xxxviii. 12): it was at all times largely employed, particularly for the outer garments (Lev. xiii. 47; Deut. xxi. 11; Ez. xxiv. 3; Job xxxi. 20; Prov. xxvii. 26, xxxi. 13). [WOOL.] The occurrence of the term *cetoneth* in the book of Genesis (iii. 21, xxvii. 3, 23) seems to indicate an acquaintance, even at that early day, with the finer materials; for that term, though significant of a particular robe, originally appears to have referred to the material employed (the root being preserved in our *cotton*; cf. Böhlen's *Introd.* ii. 51; Saatchutz, *Archæol.* i. 8), and was applied by the later Jews to flax or linen, as stated by Josephus (*Ant.* iii. 7, §2, *Χετομένη μὲν καλεῖται. Λίνον τοῦτο σμάλνει, χεῖον γὰρ τὸ λίνον ημεῖς καλοῦμεν*). No conclusion, however, can be drawn from the use of the word: it is evidently applied generally, and without any view to the material, as in Gen. iii. 21. It is probable that the acquaintance of the Hebrews with linen, and perhaps cotton, dates from the period of the captivity in Egypt, when they were instructed in the manufacture (1 Chr. iv. 21). After their return to Palestine we have frequent notices of linen, the finest kind being named *shesh* (שֵׁשׁ), and at a later period *butz* (בִּיז), the latter a word of Syrian, and the former of Egyptian origin, and each indicating the quarter whence the material was procured: the term *chôr* (חֹר) was also applied to it from its brilliant appearance (Is. xix. 9; Esth. i. 6, viii. 13). It is the *θύσσος* of the LXX. and the N. T. (Luke xvi. 19; Rev. xviii. 12, 16), and the "fine linen" of the A. V. It was used in the vestments of the high-priests (Ex. xxviii. 5 ff.), as well as by the wealthy (Gen. xli. 42; Prov. xxxi. 22; Luke xiv. 19). [LINEN.] A less costly kind was named *had* (הָד; *λίνεος*),

which was used for certain portions of the high-priest's dress (Ex. xxviii. 42; Lev. xvi. 4, 23, 32), and for the ephods of Samuel (1 Sam. ii. 18) and David (2 Sam. vi. 14): it is worthy of notice, in reference to its quality and appearance, that it is the material in which angels are represented (Ex. ix. 3, 11, x. 2, 6, 7; Dan. x. 5, xii. 6; Rev. xv. 6). A coarser kind of linen, termed *ἀρόλιον* (Ecclus. xl. 4), was used by the very poor [LINEN]. The Hebrew term *sadin* (סָדִין = *σινδών*, and *sutin*) expresses a fine kind of linen, especially adapted for summer wear, as distinct from the *saraballa*, which was thick (Talmud, *Menach.* p. 41, 1). What may have been the distinction between *shesh* and *sadin* (Prov. xxxi. 22, 24) we know not: the probability is that the latter name passed from the material to a particular kind of robe. Silk was not introduced until a very late period (Rev. xviii. 12): the term *neshe* (נֶשֶׁה; *πρίχαπτον*; Ex. xvi. 10) is of doubtful meaning [SILK]. The use of a mixed material (יִצְוָשׁ; *κίβδηλον*, i. e. *spurious*, LXX.; *ἀντι-διακείμενον*, Aquil.; *ἐριόλιον*, Gr. Ven.), such as wool and flax, was forbidden (Lev. xix. 19; Deut. xxii. 11), on the ground, according to Josephus (*Ant.* iv. 8, §11), that such was reserved for the priests, or as being a practice usual among idolaters (Spencer, *Lef. Heb. Rit.* ii. 32), but more probably with the view of enforcing the general idea of purity and simplicity.

2. Colour and decoration. The prevailing colour of the Hebrew dress was the natural white of the materials employed, which might be brought to a high state of brilliancy by the art of the fuller (Mark ix. 3). Some of the terms applied to these materials (e. g. שֵׁשׁ, בִּיז, חֹר) are connected with words significant of whiteness, while many of the allusions to garments have special reference to this quality (Job xxxviii. 14; Ps. civ. 1, 2; Is. lxiii. 3): white was held to be peculiarly appropriate to festive occasions (Eccl. ix. 8; cf. Hor. *Sat.* ii. 2, 60), as well as symbolical of purity (Rev. iii. 4, 5, iv. 4, vii. 9, 13). It is uncertain when the art of dyeing became known to the Hebrews; the *cetoneth passim* worn by Joseph (Gen. xxxvii. 3, 23) is variously taken to be either a "coat of divers colours" (*ποικίλος*; *polymita*, Vulg.; comp. the Greek *πύσσειν*, *Il.* ii. 126, xii. 441), or a tunic furnished with sleeves and reaching down to the ankles, as in the versions of Aquila, *ἀσπράγδαίος*, *καρπώτος*, and Symmachus, *χειριδωτός*, and in the Vulg. (2 Sam. xiii. 18), *taluris*, and as described by Josephus (*Ant.* vii. 8, §1). The latter is probably the correct sense, in which case we have no evidence of the use of variegated robes previously to the sojourn of the Hebrews in Egypt, though the notice of scarlet thread (Gen. xxxviii. 28) implies some acquaintance with dyeing, and the light summer robe (חֲשִׁיבָה; *θήριετρον*; *veil*, A. V.) worn by Rebecca and Tamar (Gen. xxiv. 65, xxxviii. 14, 19) was probably of an ornamental character. The Egyptians had carried the art of weaving and embroidery to a high state of perfection, and from them the Hebrews learned various methods of producing decorated stuffs. The elements of ornamentation were—(1) weaving with

\* The sheep-skin coat is frequently represented in the sculptures of Khorsabad: it was made with sleeves, and was worn over the tunic: it fell over

the back, and terminated in its natural state. The people wearing it have been identified with the Sagartil (Bonomi's *Nineveh*, p. 193).

threads previously dyed (Ex. xxxv. 25; cf. Wilkinson's *Egyptians*, iii. 125); (2) the introduction of gold thread or wire (Ex. xxviii. 6 ff.); (3) the addition of figures, probably of animals and hunting or battle scenes (cf. Layard, ii. 297), in the case of garments, in the same manner as the cherubim were represented in the curtains of the tabernacle (Ex. xxvi. 1, 31, xxxvi. 8, 35). These devices may have been either woven into the stuff, or cut out of other stuff and afterwards attached by needlework: in the former case the pattern would appear only on one side, in the latter the pattern might be varied. Such is the distinction, according to Talmudical writers, between *cunning-work* and *needlework*, or as marked by the use of the singular and dual number, *רָקְמָה*, *needlework*, and *רָקְמָתִים*, *needlework on both sides* (Judg. v. 30, A. V.), though the latter term may after all be accepted in a simpler way as a dual = *two embroidered robes* (Bertheau, *Comm. in l. c.*). The account of the consorts of Amasis (Her. iii. 47) illustrates the processes of decoration described in Exodus. Robes decorated with gold (*מִשְׁבְּצוֹת*, Ps. xlv. 13), and at a later period with silver thread (Joseph. *Ant.* xix. 8, §2; cf. Acts xii. 21), were worn by royal personages: other kinds of embroidered robes were worn by the wealthy both of Tyre (Ez. xvi. 13) and Palestine (Judg. v. 30; Ps. xlv. 14). The art does not appear to have been maintained among the Hebrews: the Babylonians and other eastern nations (Josh. vii. 21; Ez. xxvii. 24), as well as the Egyptians (Ez. xxvii. 7), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine: dyed robes were imported from foreign countries (Zeph. i. 8), particularly from Phoenicia, and were not much used on account of their expensiveness: purple (Prov. xxxi. 22; Luke xvi. 19) and scarlet (2 Sam. i. 24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them: the wealthy Tyrians (Ez. xxvii. 7), the Medianish kings (Judg. viii. 26), the Assyrian nobles (Ez. xvin. 6), and Persian officers (Est. viii. 15), are all represented in purple. The general hue of the Persian dress was more brilliant than that of the Jews: hence Ezekiel (xviii. 12) describes the Assyrians as *לְבָשִׁי מְבֹלָל*, lit. *clothed in perfection*; according to the LXX. *εὐδαιμόνεια*, wearing robes with *handsome borders*. With regard to the head-dress in particular, described as *מִרְוּחֵי מְבֹלָלִים* (*τίρπαι βαρράδι*; A. V. "dyed attire;" cf. Ov. *Met.* xiv. 654, *mitra picta*), some doubt exists whether the word rendered dyed does not rather mean *flowing* (Ges. *Thesaur.* p. 542; Layard, ii. 308).

3. The names, forms, and mode of wearing the robes. It is difficult to give a satisfactory account of the various articles of dress mentioned in the Bible: the notices are for the most part incidental, and refer to a lengthened period of time, during which the fashions must have frequently changed: while the collateral sources of information, such as sculpture, painting, or contemporary records, are but scanty. The general characteristics of Oriental dress have indeed preserved a remarkable uniformity in all ages: the modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments, the former heavy and warm, the

latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, consisting in the multiplication of robes of a finer texture and more ample dimensions. Hence the numerous illustrations of ancient costume, which may be drawn from the usages of modern Orientals, supplying in great measure the want of contemporaneous representations. With regard to the figures which some have identified as Jews in Egyptian paintings and Assyrian sculptures, we cannot but consider the evidence insufficient. The figures in the painting at Beni Hassan, delineated by Wilkinson (*Anc. Egypt.*, ii. 296), and supposed by him to represent the arrival of Joseph's brethren, are dressed in a manner at variance with our ideas of Hebrew costume: the more important personages wear a double tunic, the upper one constructed so as to pass over the left shoulder and under the right arm, leaving the right shoulder exposed: the servants wear nothing more than a skirt or kilt, reaching from the loins to the knee. Wilkinson suggests some collateral reasons for doubting whether they were really Jews: to which we may add a further objection that the presents, which these persons bring with them, are not what we should expect from Gen. xliii. 11. Certain figures inscribed on the face of a rock at *Behistun*, near Kermanshah, were supposed by Sir R. K. Porter to represent Samaitians captured by Shalmaneser: they are given in Vaux's *Nineveh*, p. 372. These sculptures are now recognised as of a later date, and the figures evidently represent people of different nations, for the tunics are alternately short and long. Again, certain figures discovered at Nineveh have been pronounced to be Jews: in one instance the presence of hats and boots is the ground of identification (Bonomi, *Nineveh*, p. 197; comparing Dan. iii. 21); but if, as we shall hereafter show, the original words in Dan. have been misunderstood by our translators, no conclusion can be drawn from the presence of these articles. In another instance the figures are simply dressed in a short tunic, with sleeves reaching nearly to the elbow, and confined at the waist by a girdle, a style of dress which was so widely spread throughout the East that it is impossible to pronounce what particular nation they may have belonged to: the style of head-dress seems an objection to the supposition that they are Jews. These figures are given in Bonomi's *Nineveh*, p. 381.

The costume of the men and women was very similar; there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (*בָּלִי* *אֵשֶׁת*), such as the staff, signet-ring, and other ornaments, or, according to Josephus (*Ant.* iv. 8, §43), the weapons of a man; as well as to a man to wear the outer robe (*שְׂמֹנֶת*) of a woman (Deut. xxii. 5): the reason of the prohibition, according to Maimonides (*Mor. Neboch.* iii. 37), being that such was the practice of idolaters (cf. Carpzov, *Appar.* p. 514); but more probably it was based upon the general principle of propriety. We shall first describe the robes which were common to the two sexes, and then those which were peculiar to women.

(1.) The *ketoneth* (*כֶּתֶנֶת*), whence the Greek *χiton* was the most essential article of dress. It was a closely fitting garment, resembling in form and use our *shirt*, though unfortunately translated

coat in the A. V. The material of which it was made was either wool, cotton, or linen. From Josephus' observation (*Ant.* iii. 7, §4) with regard to the *meil*, that it was *οὐκ ἐκ θυοῖν περιτμημάτων*, we may probably infer that the ordinary *cetoneth* or tunic was made in two pieces, which were sewn together at the sides. In this case the *χιτών ἀρραφος* worn by our Lord (*John* xix. 23) was either a singular one, or, as is more probable, was the upper tunic or *meil*. The primitive *cetoneth* was without sleeves and reached only to the knee, like the Doric *χιτών*; it may also have been, like the latter, partially opened at one side, so that a person in rapid motion was exposed (*2 Sam.* vi. 20). Another kind, which we may compare with the Ionian *χιτών*, reached to the wrists and ankles: such was probably the *cetoneth passim* worn by Joseph (*Gen.* xxxvii. 3, 23), and Tamar (*2 Sam.* xiii. 18), and that which the priests wore (*Joseph. Ant.* iii. 7, §2). It was in either case kept close to the body by a girdle [GIRDLE], and the fold formed by the overlapping of the robe served as an inner pocket, in which a letter or any other small article might be carried (*Joseph. Ant.* xvii. 5, §7). A person wearing the *cetoneth* alone was described as *ערום*, *naked*, A. V.: we may compare the use of the term *γυμνὰ* as applied to the Spartan virgins (*Plut. Lyc.* 14), of the Latin *nudus* (*Virg. Georg.* i. 299), and of our expression *stripped*. Thus it is said of Saul after having taken off his upper garments (*1 Sam.* xix. 24); of Isaiah (*Is.* xx. 2) when he had put off his sackcloth, which was usually worn over the tunic (cf. *Jon.* iii. 6), and only on special occasions next the skin (*2 K.* vi. 30); of a warrior who has cast off his military cloak (*Am.* ii. 16; cf. *Liv.* iii. 24, *incrimis nudique*); and of Peter without his fisher's coat (*John* xxi. 7). The same expression is elsewhere applied to the poorly clad (*Job* xvii. 6; *Is.* lviii. 7; *James* ii. 15).

The annexed woodcut (fig. 1) represents the simplest style of Oriental dress, a long loose shirt or *cetoneth* without a girdle, reaching nearly to the ankle. The same robe, with the addition of the girdle, is shown in fig. 4.

FIG. 1. An Egyptian. (Lano's Modern Egyptians.)

In fig. 2 we have the ordinary dress of the modern Bedouin: the tunic overlaps the girdle at

the waist leaving an ample fold, which serves as a pocket. Over the tunic he wears the *abba*, or striped plaid, which completes his costume.

FIG. 2. A Bedouin. (Lylich, *Israel* deus.)

(2.) The *sulin* (סולין) appears to have been a wrapper of fine linen (*σινδών*, LXX.), which might be used in various ways, but especially as a night-shirt (*Mark* xiv. 51; cf. *Her.* ii. 95; Schleusner's *Lex. in N. T. s. v.*). The Hebrew term is given in the Syriac N. T. as = *σινδώνιον* (*Luke* xix. 20), and *λέντιον* (*John* xiii. 4). The material or robe is mentioned in *Judg.* xiv. 12, 13 (*sheet, shirt*, A. V.), *Prov.* xxxi. 24, and *Is.* iii. 23 (*fine linen*, A. V.); but in none of these passages is there anything to decide its specific meaning. The Talmudical writers occasionally describe the *talith* under that name, as being made of fine linen: hence Lightfoot (*Exercitationes* on *Mark* xiv. 51) identifies the *σινδών* worn by the young man as a *talith*, which he had put on in his haste without his other garments.

(3.) The *meil* (מעי) was an upper or second tunic, the difference being that it was longer than the first. It is hence termed in the LXX. *δποδότης ποδήρης*, and probably in this sense the term is applied to the *cetoneth passim* (*2 Sam.* xiii. 18), implying that it reached down to the feet. The sacerdotal *meil* is elsewhere described. [PRIEST.] As an article of ordinary dress it was worn by kings (*1 Sam.* xxiv. 4), prophets (*1 Sam.* xxviii. 14), nobles (*Job* i. 20), and youths (*1 Sam.* ii. 19). It may, however, be doubted whether the term is used in its specific sense in these passages, and not rather in its broad etymological sense (from *מעי*, to cover), for any robe that chanced to be worn over the *cetoneth*. In the LXX. the renderings vary between *ἐπενδότης* (*1 Sam.* xviii. 4; *2 Sam.* xiii. 18; *1 Sam.* ii. 19, Theodot.), a term properly applied to an upper garment, and specially used in *John* xxi. 7 for the linen coat worn by the Phœnician and Syrian fishermen (Theophyl. in *l. c.*), *διπλούς* (*1 Sam.* ii. 19, xv. 27, xxiv. 4, 11, xxviii. 14; *Job* xxix. 14), *μάτια* (*Job* i. 20), *σφόδα* (*1 Chr.* xv. 27; *Job* ii. 12), and *δποδότης* (*Ex.* xxxix. 21; *Lev.* viii. 7), showing that generally speaking it was regarded as an upper gar-

ment. This further appears from the passages in which notice of it occurs: in 1 Sam. xviii. 4 it is the "robe" which Jonathan first takes off; in 1 Sam. xxviii. 14 it is the "mantle" in which Samuel is enveloped; in 1 Sam. xv. 27, it is the "mantle," the skirt of which is rent (cf. 1 K. xi. 30, where the שְׁלֵמָה is similarly treated); in 1 Sam. xxiv. 4, it is the "robe," under which Saul slept (generally the כִּנְיָ was so used); and in Job i. 20, ii. 12, it is the "mantle" which he rents (cf. Ezr. ix. 3, 5); in these passages it evidently describes an outer robe, whether the *simlah*, or the *meil* itself used as a *simlah*. Where two tunics are mentioned (Luke iii. 11) as being worn at the same time, the second would be a *meil*: travellers generally wore two (Joseph. *Ant.* xvii. 5, §7), but the practice was forbidden to the disciples (Matt. x. 10; Luke ix. 3).

The dress of the middle and upper classes in modern Egypt (fig. 3) illustrates the customs of the Hebrews. In addition to the shirt, they wear a long vest of striped silk and cotton, called *kufṭān*, descending to the ankles, and with ample sleeves, so that the hands may be concealed at pleasure. The girdle surrounds this vest. The outer robe consists of a long cloth coat, called *giblah*, with sleeves reaching nearly to the wrist. In cold weather the *abba* is thrown over the shoulders.

Fig. 4. An Egyptian of the upper classes (Lana.)

(4.) The ordinary outer garment consisted of a quadrangular piece of woollen cloth, probably resembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are—*simlah* (שְׁמָלָה, occasionally שְׁלֵמָה), which appears to have had the broadest sense, and sometimes is put for clothes generally (Gen. xxv. 2, xxvii. 34; Ex. iii. 22, xlii. 9; Deut. x. 18; Is. iii. 7, iv. 1), though once used specifically of the warrior's cloak (Is. ix. 5); *beyed* (בֵּיגָד), which is more usual in speaking of robes of a handsome and substantial character (Gen. xxvii. 15, xli. 42; Ex. xxviii. 2; 1 K. xxii. 10; 2 Chr. xviii. 9; Is. lxiii. 1); *cesuth* (צִסוּת), appropriate to passages where covering or protection is the prominent idea (Ex. xxii. 26; Job xxvi. 6, xxxi. 19); and lastly *cebāsh* (שְׁבָשָׁה),

usual in poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8), priests' vestments (2 K. x. 22), and royal apparel (Esth. vi. 11, viii. 15). A cognate term (*malbush* מַלְבוּשׁ) describes specifically a state-dress, whether as used in a royal household (1 K. x. 5; 2 Chr. ix. 4), or for religious festivals (2 K. x. 22); elsewhere it is used generally for robes of a handsome character (Job xvii. 16; Is. lxviii. 3; Ez. xvi. 13; Zeph. i. 8). Another term, *meil* (מֵיֶל), with its derivatives מֵיֶלֶת (Ps. cxxxiii. 2), and מֵיֶלֶת (2 Sam. x. 4; 1 Chr. xiv. 4), is expressive of the length of the Hebrew garments (1 Sam. iv. 12, xviii. 4), and is specifically applied to a long cloak (Judg. iii. 16; 2 Sam. xv. 8), and to the priest's coat (Lev. vi. 10). The Greek terms *ἡμάτιον* and *στέλα* express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Macc. x. 21, xiv. 9; Mark xii. 38, xvi. 5; Luke xv. 22, xx. 46; Rev. vi. 11, vii. 9, 13); the *χιτών* and *ἡμάτιον* (*tunica*, *pallium*, Vulg.; *coat*, *cloak*, A. V.) are brought into juxtaposition in Matt. v. 40, and Acts ix. 39. The *beyed* might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl with the ends or "skirts" (שְׁבָשָׁה; *περόνια*; *anguli*) hanging down in front; or it might be thrown over the head, so as to conceal the face (2 Sam. xv. 30; Esth. vi. 12). The ends were skirted with a fringe and bound with a dark purple riband (Num. xv. 38): it was confined at the waist by a girdle, and the fold (פִּי; *κόλπος*; *sinus*), formed by the overlapping of the robe, served as a pocket in which a considerable quantity of articles might be carried (2 K. iv. 39; Ps. lxxix. 12; Hag. ii. 12; Niebuhr, *Description*, p. 56), or as a purse (Prov. xvii. 23, xxi. 14; Is. lxxv. 6, 7; Jer. xxxii. 18; Luke vi. 38).

The ordinary mode of wearing the outer robe, called *abba* or *abāyah*, at the present time, is exhibited in figs. 2 and 5. The arms, when falling down, are completely covered by it, as in fig. 5; but in holding any weapon, or in active work, the lower part of the arm is exposed, as in fig. 2.

Fig. 5. Egyptians of the lower orders (Lana.)

The dress of the women differed from that of the men in regard to the outer garment, the *cetoneth* being worn equally by both sexes (Cant. v. 3). The names of their distinctive robes were as follows:—(1) *mitpachath* (מִתְּפָאֶחֶת; *περιζωα*; *pallium*, *lintermen*; *veil*, *winple*, A. V.), a kind of shawl (Ruth iii. 15; Is. iii. 22); (2) *maatpapha* (מַעֲטָפָה; *pallolum*; *mantle*, A. V.), another kind of shawl (Is. iii. 22), but, how differing from the one just mentioned, we know not; the etymological meaning of the first name is *expansion*, of the second *enveloping*; (3) *tsuiph* (צִיִּיפ; *θήριςτρον*; *veil*, A. V.), a robe worn by Rebecca on approaching Isaac (Gen. xxiv. 65), and by Tamar when she assumed the guise of a harlot (Gen. xxxviii. 14, 19); it was probably, as the LXX. represents it, a light summer dress of handsome appearance (*περιβαλε τὸ θήριςτρον καὶ ἐκάλυψετο*, Gen. xxxviii. 14), and of ample dimensions, so that it might be thrown over the head at pleasure; (4) *radid* (רָדִיד; A. V. "veil"), a similar robe (Is. iii. 23; Cant. v. 7), and substituted for the *tsuiph* in the Chaldee version: we may conceive of these robes as resembling the *peplum* of the Greeks, which might be worn over the head, as represented in *Dict. of Ant.* p. 885, or again as resembling the *haburah* and *mildiyeh* of the Modern Egyptians (Lane, i. 73, 75); (5) *pethigil* (פֶּתִיגִיל; *χιτὼν μεσοσθέρπυρος*; *stomacher*, A. V.), a term of doubtful origin, but probably significant of a gay holiday dress (Is. iii. 24); to the various explanations enumerated by Gesenius (*Thesaur.* p. 1137), we may add one proposed by Saalchütz (*Archæol.* i. 31), פֶּתִי, *wide* or *foolish*, and גִּיל, *pleasure*, in which case it = *unbridled pleasure*, and has no reference to dress at all; (6) *gilyonim* (גִּלְיוֹנִים; Is. iii. 23), also a doubtful word, explained in the LXX. as a transparent dress, i. e. of gauze (*διαφανὴ λακωνικὴ*); Schroeder (*de Vest. mul. Heb.* p. 311) supports this view, but more probably the word means, as in the A. V., *glasses*. The garments of females were terminated by an ample border or fringe (שֶׁבֶל, *שָׁוִל*; *σάκος*; *skirts*), which concealed the feet (Is. xlvii. 2; Jer. xiii. 22).

Figs. 6 and 7 illustrate some of the peculiarities

Fig. 6. An Egyptian Woman. (Lane.)

of female dress: the former is an Egyptian woman (in her walking dress); the latter represents a dress, probably of great antiquity, still worn by the peasants in the south of Egypt: the outer robe, or *hulaleeyeh*, is a large piece of woollen stuff wound round the body, the upper parts being attached at the shoulders; another piece of the same stuff is used for the head-veil, or *tarkah*.

Fig. 7. A woman of the southern province of Upper Egypt. (Lane.)

Having now completed our description of Hebrew dress, we add a few remarks relative to the selection of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our Authorised Version that the same English word should represent various Hebrew words; e. g. that "veil" should be promiscuously used for *radid* (Is. iii. 23), *tsuiph* (Gen. xxiv. 65), *mitpachath* (Ruth iii. 15), *muskeh* (Ex. xxxiv. 33); "robe" for *meil* (1 Sam. xvii. 4), *cetoneth* (Is. xxii. 21), *addereth* (Jon. iii. 6), *salruh* (Mic. ii. 8); "mantle" for *meil* (1 Sam. xv. 27), *addereth* (1 K. xix. 13), *maatpapha* (Is. iii. 22); and "coat" for *meil* (1 Sam. ii. 19), *cetoneth* (Gen. iii. 21); and conversely that different English words should be promiscuously used for the same Hebrew one, as *meil* is translated "coat," "robe," "mantle," "addereth," "robe," "mantle." Uniformity would be desirable, in as far as it can be attained, so that the English reader might understand that the same Hebrew term occurred in the original text, where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable: the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the *cetoneth*: at once an undergarment, and yet not unfrequently worn without anything over it; a *shirt*, as being worn next the skin; and a *coat*, as being the upper garment worn in a house: deprive the Hebrew of his *cetoneth*, and he was positively naked; deprive the Englishman of his *coat*, and he has under garments still. The *begeh* again: in shape probably like a Scotch *plaid*, but the use of such a term would be unintelligible to the minds of English peasantry; in use unlike

any garment with which we are familiar, for we only wear a *great-coat* or a *cloak* in bad weather, whereas the Hebrew and his *beged* were inseparable. With such difficulties attending the subject, any attempt to render the Hebrew terms must be, more or less, a *compromise* between correctness and modern usage; and the English terms which we are about to propose must be regarded merely in the light of suggestions. *Cetonech* answers in many respects to "frock;" the sailor's "frock" is constantly worn next the skin, and either with or without a coat over it; the "smock-frock" is familiar to us as an upper-garment, and still as a kind of undress. In shape and material these correspond with *cetonech*, and like it, the term "frock" is applied to both sexes. In the sacerdotal dress a more technical term might be used: "vestment," in its specific sense as = the chasuble, or *casula* would represent it very aptly. *Meil* may perhaps be best rendered "gown," for this too applies to both sexes, and, when to men, always in an official sense, as the academic gown, the alderman's gown, the barrister's gown, just as *meil* appears to have represented an official, or, at all events, a special dress. In sacerdotal dress "alb" exactly meets it, and retains still, in the Greek church, the very name, *podieris*, by which the *meil* is described in the LXX. The sacerdotal ephod approaches, perhaps, most nearly to the term "pail," the *ἀμφόριον* of the Greek church, which we may compare with the *ἐσώρις* of the LXX. *Adderech* answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. *Sudin* = "liuen wrapper." *Sinlah* we would render "garment," and in the plural "clothes," as the broadest term of the kind; *beged* "vestment," as being of superior quality; *lebush* "robe," as still superior; *mad* "cloak," as being long; and *malbush* "dress," in the specific sense in which the term is not unfrequently used as = *fine* dress. In female costume *mitpachath* might be rendered "shawl," *matapha* "mantle," *tsaph* "handsome dress," *radid* "cloak."

In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The *talith* (טלית) is frequently noticed; it was made of fine liuen, and had a fringe attached to it, like the *beged*; it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act of prayer. The *kolbin* (קולבין) was probably another name for the *talith*, derived from the Greek *κολάβιον*; Epiphanius (i. 15) represents the *στολα* of the Pharisees as identical with the *Dalmatica* or the *Colobium*; the latter, as known to us, was a close tunic without sleeves. The *chaluk* (חלוק) was a woollen shirt, worn as an under tunic. The *nactoren* (נקטורין) was a mantle or outer garment (cf. Lightfoot, *Exercitation* on Matt. v. 40; Mark xiv. 51; Luke ix. 3, &c.). Gloves (קפין or כף) are also noticed (*Chetim*, xvi. 8, xxiv. 15, xxvi. 3), not, however, as worn for luxury, but for the protection of the hands in manual labour.

With regard to other articles of dress, see GIRDLER; HANDKERCHIEF; HEADDRESS; HEM OF GARMENT; SANDALS; SHOE; VEIL.

The dresses of foreign nations are occasionally referred to in the Bible; that of the Persians is described in Dan. iii. 21 in terms which have been variously understood, but which may be identified with the statements of Herodotus (i. 195, vii. 61)

in the following manner:—(1) The *sarbalin* (סרבלין; A. V. "coats") = ἀνὰ ἑρμίδες or *drawers*, which were the distinctive feature in the Persian as compared with the Hebrew dress; (2) the *patish* (פטיש; A. V. "hosen") = κισῶν ποδηνεκῆς *lives* or inner tunic; (3) the *carbala* (קרבלא; A. V. "hat") = ἄλλος ἐρίπνεος κισῶν or upper tunic, corresponding to the *meil* of the Hebrews; (4) the *lebush* (לבוש; A. V. "garment") = χλαμύδιον *leukon* or cloak, which was worn, like the *beged*, over all. In addition to these terms, we have notice of a robe of state of fine liuen, *tachrich* (תכריך; טידρημα; *sericum pallium*), so called from its ample dimensions (Esth. viii. 15). The same expression is used in the Chaldee for *purple garments* in Ez. xvii. 16.

The references to Greek or Roman dress are few: the *χλαμύς* (2 Marc. xii. 35; Matt. xxvii. 28) was either the *paludamentum*, the military scarf of the Roman soldiery, or the Greek *chlamys* itself, which was introduced under the Emperors [*Dict. of Ant. Art. CHLAMYS*]; it was especially worn by officers. The travelling *cloak* (φελδωνης) referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman *paenula*, of which it may be a corruption; the Talmudical writers have a similar name (פלין or פלניא). It is, however, otherwise explained as a travelling case for carrying clothes or books (Conybeare, *St. Paul*, ii. 499).

4. The customs and associations connected with dress are numerous and important, mostly arising from the peculiar form and mode of wearing the outer garments. The *beged*, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Ex. xii. 34; Judg. viii. 25; Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 9); or again as an *impruuptu* saddle (Matt. xxi. 7). Its most important use, however, was a coverlet at night (Ex. xxii. 27; Ruth iii. 9; Ez. xvi. 8), whence the word is sometimes taken for bed-clothes (1 Sam. xix. 13; 1 K. i. 1): the Bedouin applies his *abba* to a similar purpose (Niebuhr, *Description*, p. 56). On this account a creditor could not retain it after sunset (Ex. xxii. 26; Deut. xxiv. 12, 13; cf. Job xxii. 6, xxiv. 7; Am. ii. 8). The custom of placing garments in pawn appears to have been very common, so much so that עבוס, *pledge* = a garment (Deut. xxiv. 12, 13); the accumulation of such pledges is referred to in Hab. ii. 6 (*that londesth himself with עבטים*, i. e. *pledges*; where the A. V. following the LXX. and Vulg. reads טים עב, "thick clay"); this custom prevailed in the time of our Lord, who bids his disciples give up the *ladron* as *beged*, in which they slept, as well as the *χιτόν* (Matt. v. 40). At the present day it is not unusual to seize the *abba* as compensation for an injury: an instance is given in Wortabet's *Syria*, i. 293.

The loose flowing character of the Hebrew robes admitted of a variety of symbolical actions; rending them was expressive of various emotions, as grief (Gen. xxxvii. 29, 34; Job i. 20; 2 Sam. i. 2) [MOURNING], fear (1 K. xxi. 27; 2 K. xxii. 11, 19), indignation (2 K. v. 7, xi. 14; Matt. xxvi. 65), or despair (Judg. xi. 35; Esth. iv. 1); generally the outer garment alone was thus rent (Gen.

xxxvii. 34; Job i. 20, ii. 12), occasionally the inner (2 Sam. xv. 32), and occasionally both (Ezr. ix. 3; Matt. xxvi. 65, compared with Mark xiv. 63). Shaking the garments or shaking the dust off them, was a sign of renunciation (Acts xviii. 6); spreading them before a person, of loyalty and joyous reception (2 K. ix. 13; Matt. xxi. 8); wrapping them round the head, of awe (1 K. xix. 13), or of grief (2 Sam. xv. 30; Esth. vi. 12; Jer. xiv. 3, 4); casting them off, of excitement (Acts xxii. 23); laying hold of them, of supplication (1 Sam. xv. 27; Is. iii. 8, iv. 1; Zech. viii. 23).

The length of the dress rendered it inconvenient for active exercise; hence the outer garments were either left in the house by a person working close by (Matt. xxiv. 18) or were thrown off when the occasion arose (Mark x. 50; John xiii. 4; Acts vii. 58), or, if this was not possible, as in the case of a person travelling, they were girded up (1 K. xviii. 46; 2 K. iv. 29, ix. 1; 1 Pet. i. 13); on entering a house the upper garment was probably laid aside and resumed on going out (Acts xii. 8). In a sitting posture, the garments concealed the feet; this was held to be an act of reverence (Is. vi. 2; see Lowth's note). The proverbial expression in 1 Sam. xxv. 22; 1 K. xiv. 10, xxi. 21; 2 K. ix. 8, probably owes its origin to the length of the garments, which made another habit more natural (cf. Her. ii. 35; Xen. *Cyrop.* i. 2, §16; Ammian. Marcell. xxiii. 6); the expression is variously understood to mean the *lowest* or the *youngest* of the people (Ges. *Thesaur.* p. 1397; Jahn, *Archæol.* i. 8, §120). To cut the garments short was the grossest insult that a Jew could receive (2 Sam. x. 4; the word there used מָרָן is peculiarly expressive of the length of the garments). To raise the border or skirt of a woman's dress was a similar insult, implying her unchastity (Is. xlvi. 2; Jer. xiii. 22, 26; Nah. iii. 5).

The putting on and off of garments, and the ease with which it was accomplished, are frequently referred to; the Hebrew expressions for the first of these operations, as regards the outer robe, are לָבַשׁ, *to put on*, עָטָה, כָּסָה, עִטָּף, lit. *to cover*, the three latter having special reference to the amplitude of the robes; and for the second פָּשַׁט, lit. *to expand*, which was the natural result of taking off a wide, loose garment. The ease of these operations forms the point of comparison in Ps. cii. 26; Jer. xliii. 12. In the case of closely fitting robes the expression is חָנַר, lit. *to gird*, which is applied to the ephod (1 Sam. ii. 18; 2 Sam. vi. 14), to sackcloth (2 Sam. iii. 31; Is. xxxii. 11; Jer. iv. 8); the use of the term may illustrate Gen. iii. 7, where the garments used by our first parents are called חִנָּרִים (A. V. "aprons"), probably meaning such as could be wound round the body. The converse term is פָּתַח, *to loosen, or unbind* (Ps. xxx. 11; Is. xx. 2).

The number of suits possessed by the Hebrews was considerable: a single suit consisted of an under and upper garment, and was termed עֵרָה בְּנָדִים (σφαλι ματῶν, i. e. *apparatus vestium*, LXX.; Judg. xvii. 10). Where more than one is spoken of, the suits are termed חֲלִיפוֹת (ἀλλασσόμενα στολά; cf. Hom. *Od.* viii. 249, ἐμματα ἐξηραιβά; *changes of raiment*, A. V.) These

formed in ancient times one of the most usual presents among Orientals (Harmer, *Observations*, ii. 379 ff.); five (Gen. xlv. 22) and even ten changes (2 K. v. 5) were thus presented, while as many as thirty were proposed as a wager (Judg. xiv. 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xviii. 4; cf. Hom. *Il.* vi. 230; Harmer, ii. 388). The presentation of a robe in many instances amounted to installation or investiture (Gen. xli. 42; Esth. viii. 15; Is. axii. 21; cf. Morier, *Second Journey*, p. 93); on the other hand, taking it away amounted to dismissal from office (2 Macc. iv. 38). The production of the best robe was a mark of special honour in a household (Luke xv. 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvii. 16; Matt. vi. 19; James v. 2), so that *to have clothing* was to be wealthy and powerful (Is. iii. 6, 7). On grand occasions the entertainer offered becoming robes to his guests (Trench on *Parables*, p. 231). Hence in large households a wardrobe (מִלְחָמָה) was required for their preservation (2 K. x. 22; cf. Harmer, ii. 382), intended by a special officer, named שֹׁמֵר הַבְּגָדִים, *keeper of the wardrobe* (2 Chr. xxxiv. 22). Robes reserved for special occasions are termed מַחֲצִיאוֹת (A. V. "changeable suits"; Is. iii. 22; Zech. iii. 4) because laid aside when the occasion was past.

The colour of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Is. lxiii. 3; Jude 23; Rev. iii. 4); reference is made in Lev. xiii. 47 ff. to a greenish or reddish spot of a leprosy character. Jahn (*Archæol.* i. 8, §135) conceives this to be not the result of leprosy, but the depredations of a small insect; but Schilling (*de Lepros.* p. 192) states that leprosy taints clothes, and adds *sunt maculæ omnino indebiles et potius incrementum capeque quam minus sub his lavandibus videntur* (Knobel, *Comm. in l. c.*). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. [SOAP; FULLER.]

The business of making clothes devolved upon women in a family (Prov. xxxi. 22; Acts ix. 39); little art was required in what we may term the tailoring department; the garments came forth for the most part ready made from the loom, so that the weaver supplanted the tailor. The references to sewing are therefore few: the term תָּפַר (Gen. iii. 7; Job xvi. 15; Eccl. iii. 7; Ez. xiii. 18) was applied by the later Jews to *mending* rather than making clothes.

The Hebrews were liable to the charge of extravagance in dress; Isaiah in particular (iii. 16 ff.) dilates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. iv. 30; Ez. xvi. 10; Zeph. i. 8, and Ecclus. xi. 4, and in a later age 1 Tim. ii. 9; 1 Pet. iii. 3. [W. L. B.]

**DRINK, STRONG** (שָׂכַר, σικερα). The Hebrew term *shechar*, in its etymological sense, applies to any beverage that had *intoxicating* qualities: it is generally found connected with wine, either as an exhaustive expression for all other liquors (e. g. Judg. xiii. 4; Luke i. 15), or as parallel to it, particularly in poetical passages (e. g.

Is. v. 11; Mic. ii. 11); in Num. xxviii. 7 and Ps. lxx. 12, however, it stands by itself and must be regarded as including wine. The Bible itself throws little light upon the nature of the mixtures described under this term. We may infer from Cant. viii. 2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape for the purpose of making wine: the pomegranate, which is there noticed, was probably one out of many fruits so used. In Is. xxiv. 9 there may be a reference to the *sweetness* of some kind of strong drink. In Num. xxviii. 7 *strong drink* is clearly used as equivalent to wine, which was ordered in Ex. xxix. 40. With regard to the application of the term in later times we have the explicit statement of Jerome (*Ep. ad Nepot.*), as well as other sources of information, from which we may state that the following beverages were known to the Jews:—1. *Beer*, which was largely consumed in Egypt under the name of *zythus* (Herod. ii. 77; Diod. Sic. i. 34), and was thence introduced into Palestine (Mishn. *Pesach*. 3, §1). It was made of barley; certain herbs, such as lupin and skirrett, were used as substitutes for hops (Colum. x. 114). The *boozah* of modern Egypt is made of barley-bread, crumbled in water and left until it has fermented (Lane, i. 131): the Arabians mix it with spices (Burekhardt's *Arabia*, i. 213), as described in Is. v. 22. The Mishna (*l. c.*) seems to apply the term *shechar* more especially to a Median drink, probably a kind of beer made in the same manner as the modern *boozah*; the Edomite *chonet*, noticed in the same place, was probably another kind of beer, and may have held the same position among the Jews that bitter beer does among ourselves. 2. *Cider*, which is noticed in the Mishna (*Terum*. 11, §2) as *apple-wine*. 3. *Honey-wine*, of which there were two sorts, one like the *οινόμελι* of the Greeks, which is noticed in the Mishna (*Schabb*. 20, §2; *Terum*. 11, §1) under a Hebraized form of that name, consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed *debash* (honey) by the Hebrews, and *dibs* by the modern Syrians, resembling the *ψήμα* of the Greeks and the *defrutum* of the Romans, and similarly used, being mixed either with wine, milk, or water. 4. *Date-wine*, which was also manufactured in Egypt (*οἶνος φοινικίος*, Herod. ii. 86, iii. 20). It was made by mashing the fruit in water in certain proportions (Plin. xiv. 19, §3). A similar method is still used in Arabia, except that the fruit is not mashed (Burekhardt's *Arabia*, ii. 264): the palm-wine of modern Egypt is the sap of the tree itself, obtained by making an incision into its heart (Wilkinson, ii. 174). 5. Various other fruits and vegetables are enumerated by Pliny (xiv. 19) as supplying materials for *fictitious* or home-made wine, such as figs, millet, the carob fruit, &c. It is not improbable that the Hebrews applied *raisins* to this purpose in the simple manner followed by the Arabians (Burekhardt, ii. 377), viz., by putting them in jars of water and burying them in the ground until fermentation takes place. [W. L. B.]

## DROMEDARY. [CAMEL.]

DRUSIL'LA (Δρουσίλλα), daughter of Herod Agrippa I. (Acts xii. 1, 19 ff.) and Cypros; sister

\* "Sicera Hebraeorum sermone omnis potio, quo inebriare potest, sive illa, quae frumento conficitur sive pomorum succo, aut cum favi decoquantur in dulcem

of Herod Agrippa II. She was at first betrothed to Antiochus Epiphanes, prince of Commagene, but, he refusing to become a Jew, she was married to Azizus, king of Emesa, who complied with that condition (*Ant. xx. 7, §1*). Soon after, Felix, procurator of Judaea, brought about her seduction by means of the Cyprian sorcerer Simon, and took her as his wife (*ib. 7, §2*). In Acts xxiv. 24, we find her in company with Felix at Caesarea, on occasion of St. Paul being brought before the latter; and the narrative implies that she was present at the apostle's preaching. Felix had by Drusilla a son named Agrippa, who, together with his mother, perished in the eruption of Vesuvius under Titus, (Joseph. *l. c.*; comp. Tac. *Hist.* v. 9). [H. A.]

DULCIMER (*Simphoniah*, סמפוניא), a musical instrument, not in use amongst the Jews of Palestine, but mentioned in Daniel, iii. 5, 15, and at ver. 10 under the shorter form of סמפניא, along with several other instruments, which Nebuchadnezzar ordered to be sounded before a golden image set up for national worship during the period of the captivity of Judah. Luther translates it *lute*. Grotius adopts the view of Servius, who considers *simphonía* to be the same with *tibia obliqua* (πλαγίανλος); he also quotes Isidorus (ii. 22), who speaks of it as a long drum. Rabbi Saadia Gaon (*Comm. on Dan.*) describes the *Simphoniah* as the bag-pipe, an opinion adopted by the author of Schille-hag-giborim (Joel Brill's Preface to Mendelssohn's version of the Psalms) by Kircher, Bartholæus, and the majority of biblical critics. The same instrument is still in use amongst peasants in the N.W. of Asia and in Southern Europe, where it is known by the similar name *Sampogna* or *Zampogna*. With respect to the etymology of the word a great difference of opinion prevails. Some trace it to the Greek *συμφωνία*, and Calmet, who inclines to this view, expresses astonishment that a pure Greek word should have made its way into the Chaldean tongue: it is probable, he thinks, that the instrument Dulcimer (A. V.) was introduced into Babylon by some Greek or Western-Asiatic musician who was taken prisoner by Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Others, with far greater probability, regard it as a Semitic word, and connect it with סמנ, "a tube" (Fürst). The word סמנ occurs in the Talmud (*Succa* 36a), where it evidently has the meaning of an air-pipe. Landau (*Arukh. Art.* סמנ) considers it synonymous with siphon. Ibn Yahia, in his commentary on Dan. iii. 5, renders it by שוּנְיָאִין (*šp̄yān*), organ, the well-known powerful musical instrument, composed of a series of pipes. Rabb. Elias, whom Buxtorf quotes (*Lexic. Talmud.* p. 1504), translates it by the German word *Leier* (lyre).

The old fashioned spinet, the precursor of the harpichord, is said to have resembled in tone the ancient dulcimer. The modern dulcimer is described by Dr. Busby (*Dict. of Music*) as a triangular instrument, consisting of a little chest, strung with about fifty wires cast over a bridge fixed at each end; the shortest wire is 18 inches in length, the longest 36: it is played with two small hammers held in the hands of the performer. [D. W. M.]

DU'MAH (דומא; Δουμά, 'Ιδουμά, 'Ιδουμαία,

et barbarum potionem, aut palmarum fructus exprimentur in liquorem, cocti-que frugibus aqua pingulior coloratur."

*Duma*), a son of Ishmael, most probably the founder of an Ishmaelite tribe of Arabia, and thence the name of the principal place, or district, inhabited by that tribe. In Gen. xxv. 14, and 1 Chr. i. 30, the name occurs in the list of the sons of Ishmael; and in Isaiah (xli. 11), in the "burden of Dumah," coupled with Seir, the forest of Arabia, and Kedar. The name of a town in the north-western part of the peninsula, *Doomat-el-Jendel*,<sup>a</sup> is held by Gesenius, and other European authorities, to have been thus derived; and the opinion is strengthened by Arab traditionists, who have the same belief (*Mir-at ez-Zemân*). The latter, however, err in writing

"*Dāwmat-el-Jendel*" (دومة الجندل); while the lexicographers and geographers of their nation expressly state that it is correctly "*Doomat-el-*

*Jendel*," or "*Doomad-el-Jendel*" (دومة الجندل),

or (دوماء الجندل), signifying "Dumah of the stones or blocks of stone," of which it is said to have been built (*Sihah* M. S., *Marāsid*, and *Mush-tarak*, s. v.); not the "stony Dumah," as Europeans render it. El-Jendel is said by some to mean "stones such as a man can lift" (*Kāmoos*), and seems to indicate that the place was built of un-hewn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "*Kureiyāt*" of *Wādī-l-Kurā* (*Marsūd*, s. v. *Doomah*), appears to be called "*Doomat-el-Jendel*," and the fortress which it contains, to have

the special appellation of "*Murīd*" (مارد).

It should be observed that there are two "*Doomaths*," that named in this article, and *D. el-Erd*. The chief of one, a contemporary of Mohammed, is said to have founded the other, or to have given it the name of D.; but most Arab authorities, and probably also, are in favour of the prior antiquity of the former. [E. S. P.]

DUMAH (דומה; *Peumá*; Alex. *Ποῦμα*; *Rumai*), a city in the mountainous district of Judah, near Hebron (Josh. xv. 52). In the *Onomasticon* of Eusebius and Jerome it is named as a very large place (ἀσὸς μεγάλη), 17 miles from Eleutheropolis, in the district of Daurama (i. e. "the south," from the Hebrew דָּרוֹם). Eleutheropolis not being certainly known, this description does not afford much clue. Robinson passed the ruins of a village called *ed-Dumneeh*, 6 miles south-west of Hebron (Irb. i. 212), and this may possibly be Dumah. (See also Kiepert's *Map*, 1856; and Van de Velde's *Memoir*, 308). [G.]

DUNG (נָלָל, נָלָל, צָאָה, the latter always, and the two former generally, applied to men; דָּמָן, פָּרָשׁ, צִפִּיעַ, to brute animals, the second exclusively to animals offered in sacrifice, and the third to the dung of cows or camels). The uses of dung were twofold, as manure, and as fuel. The manure consisted either of straw steeped in liquid manure (בְּמִי מְרִמָּה, lit. in dung water, Is. xxv. 10), or the

*sweepings* (חֲפָצִים, Is. v. 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps (אִשְׁפָּת) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. ii. 13), and thence removed in due course to the fields (Mishn. *Sheb.* 3, §1-3). To sit on a dung-heap was a sign of the deepest dejection (1 Sam. ii. 8; Ps. cxlii. 7; Lam. iv. 5; cf. Job ii. 8, LXX. and Vulg.). The mode of applying manure to trees was by digging holes about their roots and inserting it (Luke xiii. 8), as still practised in Southern Italy (Trench, *Parables*, p. 356). In the case of sacrifices the dung was burnt outside the camp (Ex. xxix. 14; Lev. iv. 11, vii. 17; Num. xix. 5); hence the extreme opprobrium of the threat in Mal. ii. 3. Particular directions were laid down in the law to enforce cleanliness with regard to human ordure (Deut. xxii. 12 ff.); it was the grossest insult to turn a man's house into a receptacle for it (מִחְרָאָה, 2 K. x. 27; נִקְלָה, Ezr. vi. 11; Dan. ii. 5, iii. 29, "dunghill," A. V.); public establishments of that nature are still found in the large towns of the East (Russell's *Aleppo*, i. 34). The expression to "cast out as dung" implied not only the offensiveness of the object, but also the ideas of removal (1 K. xiv. 10), and still more exposure (2 K. ix. 37; Jer. viii. 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (2 K. vi. 25, x. 27, xviii. 27; Is. xxxvi. 12). The occurrence of such names as Gilgalai, Dimnah, Madmenah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The term σκαβαλα ("dung," A. V., Phil. iii. 8) applies to refuse of any kind (cf. Eccles. xxvii. 4).

The difficulty of procuring fuel in Syria, Arabia, and Egypt, has made dung in all ages valuable as a substitute: it was probably used for heating ovens and for baking cakes (Ez. iv. 12, 15), the equable heat, which it produced, adapting it peculiarly for the latter operation. Cow's and camel's dung is still used for a similar purpose by the Bedouins (Burckhardt's *Notes*, i. 57); they even form a species of pan for frying eggs out of it (Russell, i. 39): in Egypt the dung is mixed with straw and formed into flat round cakes, which are dried in the sun (Lane, i. 252, ii. 141). [W. L. B.]

#### DUNGEON. [PRISON.]

DURA (דּוּרָא; *Δεειρά*; *Dura*), the plain where Nebuchadnezzar set up the golden image (Dan. iii. 1), has been sometimes identified with a tract a little below *Tekrit*, on the left bank of the Tigris (Layard, *Nin. & Bab.* p. 460), where the name *Dur* is still found. But 1. this tract probably never belonged to Babylon; 2. at any rate it is too far from the capital to be the place where the image was set up; for the plain of Dura was in the province or district of Babylon (בְּמִדְיַת בָּבֶל), and therefore in the vicinity of the city; 3. the name *Dur*, in its modern use, is applicable to any plain. M. Oppert places the plain (or, as he calls it, the "valley") of Dura to the south-east of Babylon in the vicinity of the mound of *Dowair* or

<sup>a</sup> The "t" in Dooat is thus written for "h" by grammatical construction.

<sup>b</sup> Winer, in his art. 'Duma,' quoting Hitzig

(Zeller's *Jahrb.* 1848), has complicated the question by making D. el-Jendel distinct from D. of Wādī-l-Kurā.

*Dûair*. He has discovered on this site the pedestal of a colossal statue, and regards the modern name as a corruption of the ancient appellation. [G. R.]

DUST. [MOURNING.]

## E.

**EAGLE** (*Nesher*, נֶשֶׁר; *derós*; *aquila*), an unclean bird distinguished from the *ossifrage*, the *osprey*, the *vulture*, and the *gôr eagle*, in Lev. xi. 13-18, and Deut. xiv. 12-17. In these two passages therefore it means a particular species, probably the *χρυσάεος* or golden eagle (*Aquila chrysaëtos*, Linn.); but in many passages in which it occurs, *Nesher* must be taken for a generic term embracing many different species of the order *Raptores*. Thus *eagle*, in Mic. i. 16, means the *Vultur barbatus*, which is bald; while in Job xxxix. 27; Prov. xxx. 17; and Matt. xxiv. 28, the eagle which is represented as feeding on the slain, is the *Neophron percnopterus*, or Egyptian vulture (see Plin. *H. N.* 10. 3, "quatuor generis est percnopterus . . . vulturinâ specie—sola aquilârum exanimâ fert corpora"). In Arabic *نسر* is a generic as well as

a specific term, the root being in Heb. נֶשֶׁר, in Arab. *نسر*, to tear with the beak. The characteristics of eagles referred to in Scripture are their swiftness of flight (Deut. xxvii. 49), their strength (Hos. vii. 1; Hab. i. 8), their lofty placed nests (Jer. xlix. 16), their care of their young both in the nest and in training them to fly (Deut. xxxii. 11; Ex. xix. 4), and their moulting (Is. ciii. 5). The eagle was an Assyrian emblem, and hence probably the reference in Hab. i. 8. The eagle-headed deity of the Assyrian sculptures is that of the god Nisroch; and in the representations of battles trained birds of this order are frequently shown accompanying the Assyrian warriors in their attacks, and in one case bearing off the entrails of the slain. From the Assyrians the use of the eagle as a standard descended to the Persians, and from them probably to the Romans. [W. D.]

**E'ANES** (*Mānyš*; *Esses*), 1 Esd. ix. 21, a name which stands in the place of HIRIM, MAASEIAH, and ELIJAH, in the parallel list of Ezra x. It does not appear whence the translators obtained the form of the name given in the A. V.

**EARNEST**. This term occurs only thrice in the A. V. (2 Cor. i. 22, v. 5; Eph. i. 14). The equivalent in the original is ἀρραβών, a Græcised form of עֲרָבוֹן, which was introduced by the Phœnicians into Greece, and also into Italy, where it reappears under the forms *arrhabo* and *arraha*. It may again be traced in the French *arrhes*, and in the old English expression *Eurt's* or *Arl's* money. The Hebrew word was used generally for *pledge* (Gen. xxxviii. 17), and in its cognate forms for *surety* (Prov. xvii. 18) and *hostage* (2 K. xiv. 14). The Greek derivative, however, acquired a more technical sense as signifying the *deposit* paid by the purchaser on entering into an agreement for the purchase of any thing (Suid. *Lex. s. v.*). A similar legal and technical sense attaches to *earnest*, the payment of which places both the vendor and the

purchaser in a position to enforce the carrying out of the contract (Blackstone, ii. 30). There is a marked distinction between *pledge* and *earnest* in this respect, that the latter is a *part-payment*, and therefore implies the *identity* in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii., to be resumed by the depositor when he has completed his contract. Thus the expression "*earnest* of the Spirit" implies, beyond the idea of security, the *identity* in kind, though not in degree, and the *continuity* of the Christian's privileges in this world and in the next. The payment of earnest-money under the name of *arrabon* is still one of the common occurrences of Arab life. [W. L. B.]

**EARRINGS**. The word נֶזֶם, by which these ornaments are usually described, is unfortunately ambiguous, originally referring to the nose-ring (as its root indicates), and thence transferred to the earring. The full expression for the latter is נֶזֶם אֶשֶׁר בְּאַזְנוֹתַי (Gen. xxv. 4), in contradistinction to נֶזֶם עֲלֵי־אָרֶץ (Gen. xxiv. 47). In the majority of cases, however, the kind is not specified, and the only clue to the meaning is the context. The term occurs in this undefined sense in Judg. viii. 24; Job xlii. 11; Prov. xxv. 12; Hos. ii. 13. The material of which the earring was made was generally gold (Ex. xxvii. 2), and its form circular, as we may infer from the name עֵגֶל, by which it is described (Num. xxxi. 50; Ez. xvi. 12): such was the shape usual in Egypt (Wilkinson's *Egyptians*, iii. 370). They were worn by women and by youth of both sexes (Ex. i. c.). It has been inferred from the passage quoted, and from Judg. viii. 24, that they were not worn by men: these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the *amount of the gold* is the peculiarity adverted to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellsted's *Travels*, i. 321). The mention of the *sons* in Ex. xxxii. 2 (which, however, is omitted in the LXX.) is in favour of their having been worn; and it appears unlikely that the Hebrews presented an exception to the almost universal practice of Asiatics, both in ancient and modern times (Winer, *Realwört.*, s. v. *Ohrringe*). The earring appears to have been regarded with superstitious reverence as an amulet: thus it is named in the Chaldee and Samaritan versions קִרְיָאָה, *a holy thing*; and in Is. iii. 20 the word חֲשִׁים, prop. *amulets*, is rendered in the A. V., after the LXX. and Vulg., *earrings*. [AMULET.] On this account they were surrendered along with the idols by Jacob's household (Gen. xxxv. 4). Charlin describes earrings, with talismanic figures and characters on them, as still existing in the East (Brown's *Antiquities*, ii. 305). Jewels were sometimes attached to the rings: they were called נִטְפֹתַי (from נָטַף, *to drop*) a word rendered in Judg. viii. 26 *δρακμοί*; *moneta*; *collars* or *sweet jewels*, A. V.; and in Is. iii. 19, *κόσμημα*; *torques*; *chains* or *sweet balls*, A. V. The size of the earrings still worn in eastern countries far exceeds what is usual among

ourselves (Harmer's *Observations*, iv. pp. 311, 314); hence they formed a handsome present (Job xlii. 11), or offering to the service of God (Num. xxi. 50). [W. L. B.]

Egyptian Earrings, from Wilkinson.

**EARTH.** This term is used in two widely different senses: (1) for the material of which the earth's surface is composed; (2) as the name of the planet on which man dwells. The Hebrew language discriminates between these two by the use of separate terms, *Adamah* (אֲדָמָה) for the former, *Erets* (אֶרֶץ) for the latter. As the two are essentially distinct we shall notice them separately.

1. *Adamah* is the earth in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression *ish adamah* for an agriculturist (Gen. ix. 20). The earth supplied the elementary substance of which man's body was formed, and the terms *adam* and *adamah* are brought into juxtaposition, implying an etymological connexion (Gen. ii. 7). [ADAM.] The opinion that man's body was formed of earth prevailed among the Greeks (Hesiod. *Op. et Di.* 81, 70; Plat. *Rep.* p. 269), the Romans (Virg. *Georg.* ii. 341; Ovid, *Met.* i. 82), the Egyptians (Diod. Sic. i. 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (Job x. 9; Eccl. xii. 7). The law prescribed earth as the material out of which altars were to be raised (Ex. xx. 24); Bähr (*Symb.* i. 488) sees in this a reference to the name *adam*: others with more reason compare the *ara do cespitis* of the Romans (Ov. *Trist.* v. 5, 9; Hor. *Od.* iii. 8, 4, 5), and view it as a precept of simplicity. Naaman's request for two mules' burthen of earth (2 K. v. 17) was based on the idea that Jehovah, like the heathen deities, was a local god and could be worshipped acceptably only on his own soil.

II. *Erets* is explained by Von Bohlen (*Introd. to Gen.* ii. 6) as meaning etymologically the low in opposition to the high, i. e. the heaven. It is applied in a more or less extended sense:—1. to the whole world (Gen. i. 1); 2. to land as opposed to sea (Gen. i. 10); 3. to a country (Gen. xxi. 32); 4. to a plot of ground (Gen. xxiii. 15); and 5. to the ground on which a man stands (Gen. xxxiii. 3). The two former senses alone concern us, the first involving an inquiry into the opinions of the Hebrews on Cosmogony, the second on Geography.

I. COSMOGONY.—The views of the Hebrews on this subject are confessedly imperfect and obscure. This arises partly from the ulterior objects which led them to the study of natural science, and still more from the poetical colouring with which they expressed their opinions. The books of Genesis, Job, and

Psalms supply the most numerous notices: of these, the two latter are strictly poetical works and their language must be measured by the laws of poetical expression; in the first alone have we anything approaching to an historical and systematic statement, and even this is but a sketch—an outline—which ought to be regarded at the same distance, from the same point of view, and through the same religious medium as its author regarded it. The act of creation itself, as recorded in the first chapter of Genesis, is a subject beyond and above the experience of man; human language, derived, as it originally was, from the sensible and material world, fails to find an adequate term to describe the act; for, our word "create" and the Hebrew *bara*, though most appropriate to express the idea of an original creation, are yet applicable and must necessarily be applicable to other modes of creation; nor does the addition of such expressions as "out of things that were not" (ἐξ οὐκ ὄντων, 2 Macc. vii. 28), or "not from things which appear" (μη ἐκ φαινόμενων, Heb. xi. 3) contribute much to the force of the declaration. The absence of a term which shall describe exclusively an original creation is a necessary infirmity of language: as the event occurred but once, the corresponding term must, in order to be adequate, have been coined for the occasion and reserved for it alone, which would have been impossible. The same observation applies, though in a modified degree, to the description of the various processes subsequent to the existence of original matter. Moses viewed matter and all the forms of matter in their relations primarily to God, and secondarily to man—as manifesting the glory of the former, and as designed for the use of the latter. In relation to the former, he describes creation with the special view of illustrating the Divine attributes of power, goodness, wisdom, and accordingly he throws this narrative into a form which impresses the reader with the sense of these attributes. In relation to the latter he selects his materials with the special view of illustrating the subordination of all the orders of material things to the necessities and comforts of man. With these objects in view, it ought not to be a matter of surprise, if the simple narrative of creation omits much that scientific research has since supplied, and appears in a guise adapted to those objects. The subject itself is throughout one of a transcendental character; it should consequently be subjected to the same standard of interpretation as other passages of the Bible, descriptive of objects which are entirely beyond the experience of man, such as the day of judgment, the states of heaven and hell, and the representations of the Divine Majesty. The style of criticism applied to Gen. i. by the opponents, and not infrequently by the supporters of Revelation, is such, as would be subversive of many of the most noble and valuable portions of the Bible. With these preface remarks we proceed to lay down what appear to us to be the leading features of Hebrew Cosmogony.

1. The earth was regarded not only as the central point of the universe, but as the universe itself, every other body—the heavens, sun, moon, and stars—being subsidiary to, and, as it were, the complement of the earth. The Hebrew language has no expression equivalent to our *universes*: "the heavens and the earth" (Gen. i. 1, xiv. 19; Ex. xxxi. 17) has been regarded as such; but it is clear that the heavens were looked upon as a necessary adjunct of the earth—the curtain of the tent

in which man dwells (Is. xl. 22), the sphere above which fitted the sphere below (comp. Job xxii. 14, and Is. xl. 22)—designed solely for purposes of beneficence in the economy of the earth. This appears from the account of its creation and offices: the existence of the heaven was not prior to or contemporaneous with that of the earth, but subsequent to it; it was created on the second day (Gen. i. 6). The term under which it is described, *ruḥia* (רֹחַיָּה), is significant of its *extension*, that it was stretched out as a curtain (Ps. civ. 2) over the surface of the earth. Moreover it depended upon the earth; it had its "foundations" (2 Sam. xxii. 8) on the edges of the earth's circle, where it was supported by the mountains as by massive pillars (Job xxvi. 11). Its offices were (1.) to support the waters which were above it (Gen. i. 7; Ps. cxlviii. 4), and thus to form a mighty reservoir of rain and snow, which were to pour forth through its windows (Gen. vii. 11; Is. xxiv. 18) and doors (Ps. lxxviii. 23), as through opened sluice-gates, for the fructification of the earth; (2.) to serve as the *substratum* (σρεπέματα or "firmament") in which the celestial bodies were to be fixed. As with the heaven itself, so also with the heavenly bodies; they were regarded solely as the ministers of the earth. Their offices were (1.) to give light; (2.) to separate between day and night; (3.) to be for *signs*, as in the case of eclipses or other extraordinary phenomena; for *seasons*, as regulating seed-time and harvest, summer and winter, as well as religious festivals; and for *days and years*, the length of the former being dependent on the sun, the latter being estimated by the motions both of sun and moon (Gen. i. 14-18); so that while it might truly be said that they held "dominion" over the earth (Job xxxviii. 33), that dominion was exercised solely for the convenience of the tenants of earth (Ps. civ. 19-23). So entirely indeed was the existence of heaven and the heavenly bodies designed for the earth, that with the earth they shall simultaneously perish (2 Pet. iii. 10): the curtain of the tent shall be rolled up and the stars shall of necessity drop off (Is. xxxiv. 4; Matt. xxiv. 29)—their sympathy with earth's destruction being the counterpart of their joyous song when its foundations were laid (Job xxxviii. 7).

2. The earth was regarded in a twofold aspect; in relation to God, as the manifestation of His infinite attributes; in relation to man, as the scene of his abode. (1.) The Hebrew cosmogony is based upon the leading principle that the universe exists, not independently of God, by any necessity or any inherent power, nor yet contemporaneously with God, as being co-existent with Him, nor yet in opposition to God, as a hostile element, but dependently upon Him, subsequently to Him, and in subjection to Him. The opening words of Genesis express in broad terms this leading principle; however difficult it may be, as we have already observed, to express this truth adequately in human language, yet there can be no doubt that the subordination of matter to God in every respect is implied in that passage, as well as in other passages, too numerous to quote, which comment upon it. The same great principle runs through the whole history of creation: matter owed all its forms and modifications to the will of God: in itself dull and inert, it received its first vivifying capacities from the influence of the Spirit of God brooding over the deep (Gen. i. 2); the progressive improvements in its condition were the direct and miraculous effects of God's will; no in-

terposition of secondary causes is recognised; "He spake and it was" (Ps. xxxiii. 9); and the pointed terseness and sharpness with which the writer sums up the whole transaction in the three expressions "God said," "it was so," "God saw that it was good"—the first declaring the divine volition, the second the immediate result, the third the perfectness of the work—harmonises aptly with the view which he intended to express. Thus the earth became in the eyes of the pious Hebrew the scene on which the Divine perfections were displayed: the heavens (Ps. xix. 1), the earth (Ps. xxiv. 1, civ. 24), the sea (Job xxvi. 10; Ps. lxxxix. 9; Jer. v. 22), "mountains and hills, fruitful trees and all cedars, beasts and all cattle, creeping things and flying fowl" (Ps. cxlviii. 9, 10), all displayed one or other of the leading attributes of His character. So also with the ordinary operations of nature—the thunder was His voice (Job xxxvii. 5), the lightnings His arrows (Ps. lxxvii. 17), wind and storm His messengers (Ps. cxlviii. 8), the earthquake, the eclipse and the comet, the signs of His presence (Joel ii. 10; Matt. xxiv. 29; Luke xxi. 25).

(2.) The earth was regarded in relation to man, and accordingly each act of creation is a preparation of the earth for his abode—light, as the primary condition of all life; the heavens, for purposes already detailed; the dry land, for his home; "grass for the cattle and herb for the service of man" (Ps. civ. 14); the alternations of day and night, the one for his work and the other for his rest (Ps. civ. 23); fish, fowl, and flesh for his food; the beasts of burden, to lighten his toil. The work of each day of creation has its specific application to the requirements and the comforts of man, and is recorded with that special view.

3. Creation was regarded as a progressive work—a gradual development from the inferior to the superior orders of things. Thus it was with the earth's surface, at first a chaotic mass, *waste and empty*, well described in the paronomastic terms *tohu, bohu*, overspread with waters and enveloped in darkness (Gen. i. 2), and thence gradually brought into a state of order and beauty so conspicuous, as to have led the Latins to describe it by the name *Mundus*. Thus also with the different portions of the universe, the earth before the light, the light before the firmament, the firmament before the dry land. Thus also with light itself, at first the elementary principle, separated from the darkness, but without defined boundaries; afterwards the illuminating bodies with their distinct powers and offices—a progression that is well expressed in the Hebrew language by the terms *or* and *mabôr* (אור, מאור). Thus also with the orders of living beings; firstly, plants; secondly, fish and birds; thirdly, cattle; and lastly, man. From "good" in the several parts to "very good" as a whole (Gen. i. 31), such was its progress in the judgment of the Omnipotent workman.

4. Order involves time; a succession of events implies a succession of periods; and accordingly Moses assigns the work of creation to six days, each having its specific portion—light to the first, the firmament to the second, the dry land and plants to the third, the heavenly bodies to the fourth, fish and fowl to the fifth, beasts and man to the sixth. The manner, in which these acts are described as having been done, precludes all idea of time in relation to their performance: it was miraculous and instantaneous: "God said" and then "it was." But the progressiveness, and consequently the individuality

of the acts, does involve an idea of time as elapsing between the completion of one and the commencement of another; otherwise the work of creation would have resolved itself into a single continuous act. The period assigned to each individual act is a day—the only period which represents the entire cessation of a work through the interposition of night. That a natural day is represented under the expression “evening was and morning was,” admits, we think, of no doubt; the term “day” alone may refer sometimes to an indefinite period contemporaneous with a single event; but when the individual parts of a day, “evening and morning” are specified, and when a series of such days are noticed in their numerical order, no analogy of language admits of our understanding the term in anything else than its literal sense. The Hebrews had no other means of expressing the civil day of 24 hours than as “evening, morning” (עֶרֶב וּבֹקֶר, Dan. viii. 14), similar to the Greek *νυκθήμερον*, and although the alternation of light and darkness lay at the root of the expression, yet the Hebrews in their use of it no more thought of those elements than do we when we use the terms *fortnight* or *se’nnight*; in each case the lapse of a certain time, and not the elements by which that time is calculated, is intended; so that, without the least inconsistency either of language or of reality, the expression may be applied to the days previous to the creation of the sun. The application of the same expressions to the events subsequent to the creation of the sun, as well as the use of the word “day” in the 4th commandment without any indications that it is used in a different sense, or in any other than the literal acceptance of (Gen. i. 5 ff., confirm the view above stated. The interpretation that “evening and morning” = *beginning* and *end*, is opposed not only to the order in which the words stand, but to the sense of the words elsewhere.

5. The Hebrews, though regarding creation as the immediate act of God, did not ignore the evident fact that existing materials and intermediate agencies were employed both then and in the subsequent operations of nature. Thus the simple fact “God created man” (Gen. i. 27) is amplified by the subsequent notice of the material substance of which his body was made (Gen. ii. 7); and so also of the animals (Gen. i. 24, ii. 19). The separation of sea and land, attributed in Gen. i. 6 to the Divine fiat, was seen to involve the process of partial elevations of the earth’s surface (Ps. civ. 8, “the mountains ascend, the valleys descend;” comp. Prov. viii. 25-28). The formation of clouds and the supply of moisture to the earth, which in Gen. i. 7 was provided by the creation of the firmament, was afterwards attributed to its true cause in the continual return of the waters from the earth’s surface (Eccl. i. 7). The existence of the element of light, as distinct from the sun (Gen. i. 3, Job xxxviii. 19), has likewise been explained as the result of a philosophically correct view as to the nature of light; more probably, however, it was founded upon the incorrect view that the light of the moon was independent of the sun.

6. With regard to the earth’s body, the Hebrews conceived its surface to be an immense disc, supported like the flat roof of an Eastern house by pillars (Job ix. 6; Ps. lxxv. 3), which rested on solid foundations (Job xxxviii. 4, 6; Ps. civ. 5; Prov. viii. 29); but where those foundations were on which the “sockets” of the pillars rested, none could tell (Job xxxviii. 6). The more philosophical

view of the earth being suspended in free space seems to be implied in Job xvi. 7; nor is there any absolute contradiction between this and the former view, as the pillars of the earth’s surface may be conceived to have been founded on the deep bases of the mountains, which bases themselves were unsupported. Other passages (Ps. xxiv. 2, cxxvi. 6) seem to imply the existence of a vast subterranean ocean; the words, however, are susceptible of the sense that the earth was elevated above the level of the seas (Hengstenberg, *Comm.* in loc.), and, that this is the sense in which they are to be accepted, appears from the converse expression “water under the earth” (Ex. xx. 4), which, as contrasted with “heaven above” and “earth beneath,” evidently implies the comparative elevation of the three bodies. Beneath the earth’s surface was *sheol* (שְׁאוֹל), the hollow place, “hell” (Num. xvi. 30; Deut. xxxii. 22; Job xi. 8), the “house appointed for the living” (Job xxx. 23), a “land of darkness” (Job x. 21), to which were ascribed in poetical language gates (Is. xxxviii. 10) and bars (Job xvii. 16), and which had its valleys or deep places (Prov. ix. 18). It extended beneath the sea (Job xxvi. 5, 6), and was thus supposed to be continuous with the upper world.

II. GEOGRAPHY.—We shall notice (1) the views of the Hebrews as to the form and size of the earth, its natural divisions, and physical features; (2) the countries into which they divided it and their progressive acquaintance with those countries. The world in the latter sense was sometimes described by the poetical term *tebel* (תֵּבֵל), corresponding to the Greek *οἰκουμένη* (Is. xiv. 21).

(1.) In the absence of positive statements we have to gather the views of the Hebrews as to the form of the earth from scattered allusions, and these for the most part in the poetical books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disk (Is. xl. 22; the word *חַוְיָה*, *circle*, is applied exclusively to the circle of the horizon whether bounded by earth, sea or sky), bordered by the ocean (Deut. xxx. 13; Job xxvi. 10; Ps. cxxxix. 9; Prov. viii. 27), with Jerusalem as its centre (Ex. v. 5), which was thus regarded, like Delphi, as the *navel* (חֲבֻץ); Judg. ix. 37; Ex. xxxviii. 12; LXX.; Vulg.; or, according to another view (Gesen. *Thesaur.* s. v.), the highest point of the world. The passages quoted in support of this view admit of a different interpretation; Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt; and not only between them but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression “four corners” (אַרְבַּע פְּנֵימָה), generally applied to the skirts of a garment), as though implying the quadrangular shape of a garment stretched out, according to Eratosthenes’ comparison; but the term “corners” may be applied in a metaphorical sense for the extreme ends of the world (Job xxxviii. 3, xxxviii. 13; Is. xl. 12, xxiv. 16; Ex. vii. 2). Finally, it is suggested by Bähr (*Symbolik*, i. 170) that these two views may have

been held together, the former as the actual and the latter as the symbolical representation of the earth's form. As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Is. xii. 5, xiv. 7, fl., xiv. 17), or Assyrian empires (Is. x. 14, xiv. 26, xxvii. 18), just as at a later period the Roman empire was styled *orbis terrarum*; the "ends of the earth" (קְצוֹת) in the language of prophecy applied to the nations on the border of these kingdoms, especially the Medes (Is. v. 26, xlii. 5) in the east, and the islands and coasts of the Mediterranean in the west (Is. xli. 5, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Is. xxiv. 14; Zech. ix. 10; Ps. lxxii. 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii. 18; Is. xlii. 5). We shall presently trace the progress of their knowledge in succeeding ages.

The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the east, before (קִדְמָה), behind (אֲחֵרָה), the right hand (יְמִינִי), and the left hand (שְׂמֹאלִי), representing respectively E., W., S., and N. (Job xxiii. 8, 9); sometimes relatively to the sun's course, the rising (קִדְמָה), the setting (מָבֹאֵה), Ps. l. 1), the brilliant quarter (קִדְמָה), Ez. xl. 24), and the dark quarter (אֲחֵרָה), Ez. xxvi. 20; comp. the Greek ὄρος, Hom. II. xii. 240); sometimes as the seat of the four winds (Ez. xxxvii. 9); and sometimes according to the physical characteristics, the sea (יָם) for the W. (Gen. xxviii. 14), the parched (בְּרָבָה) for the S. (Ez. xxvii. 9), and the mountains (הָרִים) for the N. (Is. xlii. 4). The north appears to have been regarded as the highest part of the earth's surface, in consequence perhaps of the mountain ranges which existed there, and thus the heaviest part of the earth (Job xxvi. 7). The north was also the quarter in which the Hebrew *el-Dorado* lay, the land of gold mines (Job xxxvii. 22; margin; comp. Her. iii. 116).

These terms are very indistinctly used when applied to special localities; for we find the north assigned as the quarter of Assyria (Jer. iii. 18), Babylonia (Jer. vi. 22), and the Euphrates (Jer. xvi. 10), and more frequently Media (Jer. l. 3; comp. li. 11), while the south is especially represented by Egypt (Is. xxx. 6; Dan. xi. 5). The Hebrews were not more exact in the use of terms descriptive of the physical features of the earth's surface; for instance, the same term (יָם) is applied to the sea (Mediterranean), to the lakes of Palestine, and to great rivers, such as the Nile (Is. xlvii. 2), and perhaps the Euphrates (Is. xxvii. 1): mountain (הָר) signifies not only high ranges, such as Sinai or Ararat, but an elevated region (Josh. xi. 16); river (נָחַל) is occasionally applied to the sea (Jon. ii. 3; Ps. xxiv. 2) and to canals fed by rivers (Is. xlv. 27). Their vocabulary, however, was ample for

describing the special features of the lands with which they were acquainted, the terms for the different sorts of valleys, mountains, rivers, and springs being very numerous and expressive. We cannot fail to be struck with the adequate ideas of descriptive geography expressed in the directions given to the spies (Num. xiii. 17-20) and in the closing address of Moses (Deut. viii. 7-9); nor less, with the extreme accuracy and the variety of almost technical terms, with which the boundaries of the various tribes are described in the book of Joshua, warranting the assumption that the Hebrews had acquired the art of surveying from the Egyptians (Jahn, i. 6, §104).

(2.) We proceed to give a brief sketch of the geographical knowledge of the Hebrews down to the period when their distinctive names and ideas were superseded by those of classical writers. The chief source of information open to them, beyond the circle of their own experience, was their intercourse with the Phœnician traders. While the first made them acquainted with the nations from the Tigris to the African desert, the second informed them of the coasts of the Mediterranean, the regions of the north, and the southern districts of Arabia. From the Assyrians and Babylonians they gained some slight knowledge of the distant countries of India, and perhaps even China.\*

Of the physical objects noticed we may make the following summary, omitting of course the details of the geography of Palestine:—1. *Seas*—the Mediterranean, which was termed the "great sea" (Num. xxxiv. 6), the "sea of the Philistines" (Ez. xxiii. 31), and the "western sea" (Deut. xi. 24); the Red Sea, under the names of the "sea of Suph," sedge (Ez. x. 19), and the "Egyptian sea" (Is. xl. 15); the Dead Sea, under the names "Salt Sea" (Gen. xiv. 3), "Eastern Sea" (Joel ii. 20), and "Sea of the Desert" (Deut. iv. 49); and the Sea of Chinnereth, or Galilee (Num. xxxiv. 11); 2. *Rivers*—the Euphrates, which was specifically "the river" (Gen. xxi. 21), or "the great river" (Deut. i. 7); the Nile, which was named either Yor (Gen. xli. 1), or Sihor (Josh. xiii. 3); the Tigris, under the name of Hiddekel (Dan. x. 4); the Chebar, *Chaboras*, a tributary to the Euphrates (Ez. i. 3); the Habor, probably the same, but sometimes identified with the *Chaboras* that falls into the Tigris (2 K. xvii. 6); the river of Egypt (Num. xxxiv. 5); and the rivers of Damascus, Abana (*Barada*), and Pharpar (2 K. v. 12). For the Gihon and Pison (Gen. ii. 11, 13), see EDEN. 3. *Mountains*—Ararat or Armenia (Gen. viii. 4); Sinai (Ez. xii. 2); Horeb (Ez. iii. 1); Hor (Num. xx. 22) near Petra; Lebanon (Deut. iii. 25); and Sephar (Gen. x. 30) in Arabia.

The distribution of the nations over the face of the earth is systematically described in Gen. x., to which account subsequent, though not very important, additions are made in caps. xxv. and xxxvi., and in the prophetic and historical books. Although the table in Gen. x. is essentially ethnographical, yet the geographical element is also strongly developed: the writer had in his mind's eye not only the descent but the residence of the various nations. Some of the names indeed seem to be purely geographical designations; Aram, for in-

\* The geographical questions arising out of the description of the garden of Eden are discussed in a separate article. [Eden.]

stance, means *high lands*; Canaan, *low lands*; Eber, the land *across, or beyond*; Sidon, *fishing station*; Madai, *central land*; Tarshish, probably *conquered*; Mizraim, still more remarkably from its dual form, the *two Egypts*; Ophir, the *rich land*. It has indeed been surmised that the names of the three great divisions of the family of Noah are also in their origin geographical terms; Japhet, the *widely extended regions* of the north and west; Ham, the country of the *black soil*, Egypt; and Shem the *mountainous country*; the last is, however, more than doubtful.

In endeavouring to sketch out a map of the world, as described in Gen. x., it must be borne in mind that, in cases where the names of the races have not either originated in or passed over to the lands they occupied, the locality must be more or less doubtful. For, the migrations of the various tribes in the long lapse of ages led to the transfer of the name from one district to another, so that even in Biblical geography the same name may at different periods indicate a widely different locality. Thus Magog in the Mosaic table may have been located south of the Caucasus, and in Ezekiel's time, north of that range; Gomer at the former period in Cappadocia, at the latter in the *Crinon*. Again, the terms may have varied with the extending knowledge of the earth's surface; Chittim, originally Cyprus, was afterwards applied to the more westerly lands of Macedonia in the age of the Maccabees, if not even to Italy in the prophecies of Daniel, while Tarshish may without contradiction have been the sea-coast of Cilicia in the Mosaic table, and the coast of Spain in a later age. Possibly a solution may be found for the occurrence of more than one Dedan, Sheba, and Havilah, in the fact that these names represent districts of a certain character, of which several might exist in different parts. From the above remarks it will appear how numerous are the elements of uncertainty introduced into this subject; unanimity of opinion is almost impossible; nor need it cause surprise, if even in the present work the views of different writers are found at variance. The principle on which the following statement has been compiled is this—to assign to the Mosaic table the narrowest limits within which the nations have been, according to the best authorities, located, and then to trace out, as far as our means admit, the changes which those nations experienced in Biblical times.

Commencing from the west, the "isles of the Gentiles," i. e. the coasts and islands of the Mediterranean sea, were occupied by the Japhetites in the following order:—Javan, the *Ionians*, in parts of Greece and Asia Minor; Elishah, perhaps the *Æolians*, in the same countries; Dodanim, the *Dardani*, in Illyricum; Tiras in Thrace; Kittim, at *Citium*, in Cyprus; Ashkenaz in Phrygia; Gomer in Cappadocia, and Tarshish in Cilicia. In the north, Tubal, the *Tivareni*, in Pontus; Meshach, the *Moschici* in Colchis; Magog, *Oogoroni*, in northern Armenia; Togarmah in Armenia; and Madai in Media. The Hamites represent the southern parts of the known world; Cush, probably an appellative similar to the Greek *Aethiopia*, applicable to all the dark races of Arabia and eastern Africa; Mizraim in Egypt; Phut in Libya; Naphtuhim and Lehabim, on the coast of the Mediterranean, west of Egypt; Caphtorim, in Egypt; Calubim from the Nile to the border of Palestine; Pathrusim in Egypt; Seba in Meroc; Sabtah, on the western coast of the straits of

*Bab-el-mandeb*; Havilah, more to the south; and Sabteclah in the extreme south, where the *Somali* now live; Nimrod in Babylonia; Kaamah and Dedan on the south-western coast of the Persian gulf. In the central part of the world were the Shemites: Elam, *Elymais*, in Persia; Asshur in *Assyria*; Arphaxad, *Arrapachitis*, in northern Assyria; Lud in *Lydia*; Aram in Syria and Mesopotamia, and the descendants of Joktan in the peninsula of Arabia.

This sketch is filled up, as far as regards northern Arabia, by a subsequent account, in cap. xxv., of the settlement of the descendants of Abraham by Keturah and of Ishmael; the geographical position of many is uncertain; but we are acquainted with that of the Midianites among the sons of Abraham, and of Nebaioth, *Nabataei*; Kedar, *Kedrei* (Plin. v. 12); Dumah, *Dumailha* (Ptol. v. 19), among the sons of Ishmael. Some of the names in this passage have a geographical origin, as Mibsan, a *spice-bearing land*, Tema, an *arid or southern land*. Again, in cap. xxxvi. we have some particulars with regard to the country immediately to the south of Palestine, where the aboriginal Horites, the *Troglodytes* of the mountainous districts in the eastern part of Arabia Petæa, were displaced by the descendants of Esau. The narrative shows an intimate acquaintance with this district, as we have the names of various towns, Dinhabah, Kozah, Avith, Masrekah, Rehoboth, and Pau, few of which have any historical importance. The peninsula of Sinai is particularly described in the book of Exodus.

The countries, however, to which historical interest attaches are Mesopotamia and Egypt. The hereditary connexion of the Hebrews with the former of these districts, and the importance of the dynasties which bore sway in it, make it by far the most prominent feature in the map of the ancient world; its designation in the book of Genesis is *Adan-aram*, or *Aram-Naharaim*; in the north was Ur of the Chaldees, and the Haran to which Terah migrated; in the south was the plain of Shinar, and the seat of Nimrod's capital, Babel; on the banks of the Tigris were the cities of Accad, Calneh, Nineveh, Calah, and Resen; and on the banks of the Euphrates, Erech and Rehoboth (Gen. x. 10-12). From the same district issued the warlike expedition headed by the kings of Shinar, Ellasar, Elam, and Tidal, the object of which apparently was to open the commercial route to the Ælæntic gulf (Gen. xiv.), and which succeeded in the temporary subjection of all the intervening nations, the Hephaim in Ashteroth-Karnaim (*Bashan*), the Zuzim in Ham (between the Arnon and Jabbok), the Emim in Shaveh (near the Arnon), and the district of the Amalekites (to the south of Palestine). It is, in short, to the early predominance of the eastern dynasties that we are indebted for the few geographical details which we possess regarding those and the intervening districts. The Egyptian captivity introduces to our notice some of the localities in Lower Egypt, viz. the province of Goehen, and the towns Ramees (Gen. xlvii. 11); On, *Helipolis* (Gen. xli. 45); Pithom, *Patumus*? (Ex. i. 11); and Migdol, *Magdohm*? (Ex. xiv. 2).

During the period of the Judges the Hebrews had no opportunity of advancing their knowledge of the outer world; but with the extension of their territory under David and Solomon, and the commercial treaties entered into by the latter with the

Phoenicians in the north and the Egyptians in the south, a new era commenced. It is difficult to estimate the amount of information which the Hebrews derived from the Phoenicians, inasmuch as the general policy of those enterprising traders was to keep other nations in the dark as to the localities they visited; but there can be no doubt that it was from them that the Hebrews learned the route to Ophir, by which the trade with India and South Africa was carried on, and that they also became acquainted with the positions and productions of a great number of regions comparatively unknown. From Ez. xxvii, we may form some idea of the extended ideas of geography which the Hebrews had obtained: we have notice of the mineral wealth of Spain, the dyes of the Aegæan Sea, the famed horses of Armenia, the copper-mines of Colchis, the yarns and embroideries of Assyria, the cutlery of South Arabia, the spices and precious stones of the *Yemen*, and the caravan trade which was carried on with India through the entrepôts on the Persian Gulf. As the prophet does not profess to give a systematical enumeration of the places, but selects some from each quarter of the earth, it may fairly be inferred that more information was obtained from that source. Whether it was from thence that the Hebrews heard of the tribes living on the northern coasts of the Euxine—the Scythians (Magog), the Cummerians (Gomer), and the Roxolani (?), or perhaps *Russians* (Roshch, Ez. xxxviii, 2, *Hebrew text*), is uncertain: the inroad of the northern hordes, which occurred about Ezekiel's time, may have drawn attention to that quarter.

The progress of information on the side of Africa is clearly marked: the distinction between Upper and Lower Egypt is shown by the application of the name Pathros to the former (Ez. xxix. 14). Memphis, the capital of lower Egypt, is first mentioned in Hosea (ix. 6) under the name Moph, and afterwards frequently as Noph (Is. xix. 13); Thebes, the capital of Upper Egypt, at a later period, as No-Ammon (Nah. iii. 8) and No (Jer. xvi. 25); and the distant Syene (Ez. xlix. 10). Several other towns are noticed in the Delta; Sin, *Pelusion* (Ez. xxx. 15); Pibeseth, *Hubastis* (Ez. xxx. 17); Zaan, *Timis* (Is. xix. 11); Tahapanes, or Tahpanhes, *Daphne* (Jer. ii. 16); *Heliopolis*, under the Hebraised form Beth-shemesh (Jer. xliii. 13); and, higher up the Nile, Hanes, *Hieracopolis* (Is. xxx. 4). The position of certain nations seems to have been better ascertained. Cush (*Aethiopia*) was fixed immediately to the south of Egypt, where Tirhakah held sway with *Nopata* for his capital (2 K. xix. 9); the Lubim (*Lihyans*, perhaps rather *Nubians*, who may also be noticed under the corrupted form Chub, Ez. xxx. 5) appear as allies of Egypt; and with them a people not previously noticed, the Sukkiims, the *Trogodytes* of the western coast of the Red Sea (2 Chr. xii. 3); the Ludim and Put are mentioned in the same connexion (Ez. xxx. 5).

The wars with the Assyrians and Babyonians, and the captivities which followed, bring us back again to the geography of the East. Incidental notice is taken of several important places in connexion with these events: the capital of Persia, Shushan, *Susa* (Dan. viii. 2); that of Media, Achmetha, *Ecbatana* (Ez. vi. 2); Hena, Ivah, and Sepharvaim, on the Euphrates (2 K. xviii. 34); Carchemish, *Circissium*, on the same river (Is. x. 9); Gozan and Halah, on the borders of Media

(2 K. xvii. 6); Kir, perhaps on the banks of the Cyrus (2 K. xvi. 9). The names of Persia (2 Chr. xxxvi. 20) and India (Ez. i. 1) now occur: whether the far-distant *China* is noticed at an earlier period under the name Sinim (Is. xlix. 12) admits of doubt.

The names of Greece and Italy are hardly noticed in Hebrew geography: the earliest notice of the former, subsequently to Gen. x., occurs in Is. lxvi. 19, under the name of Javan; for the Javan in Joel iii. 6 is probably in South Arabia, to which we must also refer Ez. xxvii. 13, and Zech. ix. 13. In Dan. viii. 21, the term definitely applies to Greece, whereas in Is. lxvi. it is indefinitely used for the Greek settlements. If Italy is described at all, it is under the name Chittim (Dan. xi. 30).

In the Maccabæan era the classical names came into common use: Crete, Sparta, Delos, Sicily, Caria, Cilicia, and other familiar names are noticed (1 Macc. x. 67, xi. 14, xv. 23); Asia, in a restricted sense, as = the Syrian empire (1 Macc. viii. 6); Hispania and Rome (1 Macc. viii. 1-3). Henceforward the geography of the Bible, as far as foreign lands are concerned, is absorbed in the wider field of classical geography. It is hardly necessary to add that the use of classical designations in our Authorized Version is in many instances a departure from the Hebrew text: for instance, *Mesopotamia* stands for Aram-Naharaim (Gen. xxiv. 10); *Ethiopia* for Cush (2 K. xix. 9); the *Chaldeans* for Chasdim (Job i. 17); *Græcia* for Javan (Dan. viii. 21); *Egypt* for Mizraim (Gen. xlii. 10); *Armenia* for Ararat (2 K. xix. 37); *Assyria* for Asshur (Gen. ii. 14); *Idumæa* for Edom (Is. xxxiv. 5); and *Syria* for Aram. Arabia, it may be observed, does occur as an original Hebrew name in the later books (Is. xxi. 13), but probably in a restricted sense as applicable to a single tribe. [W. L. B.]

## EARTHENWARE. [POTTERY.]

**EARTHQUAKE** (עָרָד). Earthquakes, more or less violent, are of frequent occurrence in Palestine, as might be expected from the numerous traces of volcanic agency visible in the features of that country. The recorded instances, however, are but few; the most remarkable occurred in the reign of Uzziah (Am. i. 1; Zech. xiv. 5), which Josephus (*Ant.* ix. 10, §4) connected with the sacrilege and consequent punishment of that monarch (2 Chr. xxvi. 16 ff.). From Zech. xiv. 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (τοῦ ὄρους ἀποσπαραγῆναι τὸ ἡμισυ τοῦ κατὰ τὴν ὄρου) can hardly mean the *western half of the mountain*, as Whiston seems to think, but the *half of the western mountain*, i. e., of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the *western mountain*. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Hitzig (*Comm. in Zech.*) suggests that the name מְרִיבָד, "*corruption*," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitling it to be described as the *destroying mountain*, in the sense in which the term occurs in Jer. li. 25. An earth-

quake occurred at the time of our Saviour's crucifixion (Matt. xxvii. 51-54), which may be deemed miraculous rather from the conjunction of circumstances than from the nature of the phenomenon itself, for it is described in the usual terms (הַיָּמִי עֶרְעֻלָּהּ). Josephus (*Ant.* xv. 5, §2) records a very violent earthquake, that occurred B.C. 31, in which 10,000 people perished. Earthquakes are not unfrequently accompanied by fissures of the earth's surface; instances of this are recorded in connexion with the destruction of Korah and his company (Num. xvi. 32; cf. Joseph. *Ant.* iv. 3, §3), and at the time of our Lord's death (Matt. xxvii. 51); the former may be paralleled by a similar occurrence at Oppido in Calabria A.D. 1783, where the earth opened to the extent of 500, and a depth of more than 200 feet: and again by the sinking of the bed of the Tagus at Lisbon, in which the quay was swallowed up (Pfaff, *Schlüpfungsgesch.* p. 115). These depressions are sometimes on a very large scale; the subsidence of the valley of Siddim at the southern extremity of the Dead Sea may be attributed to an earthquake; similar depressions have occurred in many districts, the most remarkable being the submersion and subsequent re-elevation of the temple of Serapis at Puteoli. The frequency of earthquakes about the Dead Sea is testified in the name Bela (Gen. xiv. 2; comp. Jerome ad Is. xv.). Darkness is frequently a concomitant of earthquake. [DARKNESS.] The awe, which an earthquake never fails to inspire, "conveying the idea of some universal and unlimited danger" (Humboldt's *Kosmos*, i. 212), rendered it a fitting token of the presence of Jehovah (1 K. xix. 11); hence it is frequently noticed in connexion with His appearance (Judg. v. 4; 2 Sam. xlii. 8; Ps. lxxviii. 18, xlvii. 4, civ. 32; Am. viii. 8; Hab. iii. 10).

[W. L. B.]

**EAST** (מִזְרָח; מִזְרֵי). The Hebrew terms, descriptive of the *east*, differ in idea, and, to a certain extent, in application; (1) *kodem* properly means that which is *before* or *in front* of a person, and was applied to the east from the custom of turning in that direction when describing the points of the compass, *before*, *behind*, the *right* and the *left*, representing respectively E., W., S., and N. (Job xxiii. 8, 9); (2) *mizrach* means the place of the *sun's rising*, and strictly answers to the Greek *anatolē* and the Latin *oriens*; sometimes the full expression מִזְרַח־שֶׁמֶשׁ is used (Judg. xi. 18; Is. xli. 25), and sometimes *kodem* and *mizrach* are used together (e.g. Ex. xxvii. 13; Josh. xix. 12), which is after all not so tautologous as it appears to be in our translation "on the east side eastward." Bearing in mind this etymological distinction, it is natural that *kodem* should be used when the *four quarters* of the world are described (as in Gen. xlii. 14, xxviii. 14; Job xxiii. 8, 9; Ex. xlvii. 18 ff.) and *mizrach* when the east is only distinguished from the *west* (Josh. xi. 3; Ps. l. 1, ciii. 12, cxlii. 3; Zech. viii. 7), or from some other one quarter (Dan. viii. 9, xi. 44; Am. viii. 12); exceptions to this usage occur in Ps. cvii. 3, and Is. xliii. 5, each, however, admitting of explanation. Again, *kodem* is used in a strictly geographical sense to describe a spot or country immediately *before* another in an easterly direction; hence it occurs in such passages as Gen. ii. 8, iii. 24, xi. 2, xlii. 11, xxv. 6; and hence the subsequent application of the term, as a proper name (Gen. xxv. 6, *eastward*,

*unto the land of Kedem*), to the lands lying immediately eastward of Palestine, viz. Arabia, Mesopotamia and Babylonia [BENE-KEDEM]; on the other hand *mizrach* is used of the *far east* with a less definite signification (Is. xli. 2, 25, xliii. 5, xlv. 11). In describing *aspect* or *direction* the terms are used indifferently (compare *kodem* in Lev. i. 16, and Josh. vii. 2 with *mizrach* in 2 Chr. v. 12, and 1 Chr. v. 10). The east seems to have been regarded as symbolical of *distance* (Is. xlv. 11), as the land stretched out in these directions without any known limit. In Is. ii. 6 it appears as the seat of witchery and similar arts (comp. Job xv. 2); the correct text may, however, be דִּבְרֵי, which gives a better sense (Gesen. *Thesaur.* p. 1193). In the LXX. *anatolai* is used both for *kodem* and *mizrach*. It should be observed that the expression is, with but few exceptions (Dan. viii. 9; Rev. xxi. 13; comp. vii. 2, xvi. 12, from which it would seem to have been St. John's usage to insert ἡλίου), *anatolai* (Matt. ii. 1, viii. 11, xxiv. 27; Luke xiii. 29), and not *anatolē*. It is hardly possible that St. Matthew would use the two terms indifferently in succeeding verses (ii. 1, 2), particularly as he adds the article to *anatolē*, which is invariably absent in other cases (cf. Rev. xxi. 13). He seems to imply a definiteness in the locality—that it *was* the country called דִּבְרֵי, or *anatolai* (comp. the modern *Anatolia*) as distinct from the quarter or point of the compass (*anatolai*) in which it lay. In confirmation of this it may be noticed that in the only passage where the article is prefixed to *kodem* (Gen. x. 30), the term is used for a definite and restricted locality, namely, Southern Arabia. [W. L. B.]

**EASTER** (πάσχα; *pascha*). The occurrence of this word in the A. V. of Acts xii. 4—"Intending after Easter to bring him forth to the people"—is chiefly noticeable as an example of the want of consistency in the translators. In the earlier English versions Easter had been frequently used as the translation of *πάσχα*. At the last revision Passover was substituted in all passages but this. It would seem from this, and from the use of such words as "robbers of churches" (Acts ix. 37), "town-clerk" (ix. 35), "serjeants" (xvi. 35), "deputy" (xiii. 7, &c.), as if the Acts of the Apostles had fallen into the hands of a translator who acted on the principle of choosing, not the most correct, but the most familiar equivalents. (Comp. Trench, *On the Authorised Version of the N. T.* p. 21). For all that regards the nature and celebration of the Feast thus translated, see PASSOVER.

[E. H. P.]

**EAST WIND.** [WINDS.]

**E'BAL, MOUNT** (הַר עִיבָל; ὄρος Γαιβάλα; Joseph. Γιββλος; *mons Itebal*), a mount in the promised land, on which, according to the command of Moses, the Israelites were, after their entrance into the promised land, to "put" the curse which should fall upon them if they disobeyed the commandments of Jehovah. The blessing consequent on obedience was to be similarly localised on Mount Gerizim (Deut. xi. 26-29). This was to be accomplished by a ceremonial in which half the tribes stood on the one mount and half on the other; those on Gerizim responding to and affirming blessings, those on Ebal curses, as pronounced by the Levites, who remained with the ark in the centre of the interval (comp. Deut. xxvii. 11-26 with Josh. viii. 30-35,

with Joseph. *Ant.* iv. 8, §44, and with the comments of the Talmud (*Sota*, 36), quoted in Herzheimer's *Pentateuch*. But notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the first great altar to be erected to Jehovah; an altar of large unhewn stones plastered with lime and inscribed with the words of the law (*Deut.* xxvii. 2-3). On this altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (*ver.* 6, 7). Scholars disagree as to whether there were to be two erections—a kind of cromlech and an altar—or an altar only, with the law inscribed on its stones. The latter was the view of Josephus (*Ant.* iv. 8, §44, v. 1, §19), the former is unhesitatingly adopted by the latest commentator (Keil, on *Josh.* viii. 32). The words themselves may perhaps bear either sense.

The terms of Moses' injunction seem to infer that no delay was to take place in carrying out this symbolical transaction. It was to be "on the day" that Jordan was crossed (*xxvii.* 2), before they "went in unto the land flowing with milk and honey" (*ver.* 3). And accordingly Joshua appears to have seized the earliest practicable moment, after the pressing affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been despatched, to carry out the command (*Josh.* viii. 30-35). After this Ebal appears no more in the sacred story.

The question now arises, where were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies *Nablâs*, the ancient SHECHEM—Ebal on the north and Gerizim on the south.

(1) It is plain from the passages already quoted that they were situated near together, with a valley between.

(2) Gerizim was very near Shechem (*Judg.* ix. 7), and in Josephus's time their names appear to have been attached to the mounts, which were then, as now, Ebal on the north and Gerizim on the south. Since that they have been mentioned by Benjamin of Tudela (*Asher*, i. 66), and Sir John Maundrell, and among modern travellers by Maundrell (*Mod. Trav.* 432).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in *Deut.* xi. 30: A. V. "Are they not on the other side Jordan, by the way where the sun goeth down, in the land of the Canaanites, which dwell in the champaign over against Gilgal, beside the plains of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (*Arabah*, mistranslated here only, "champaign"), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebal and Gerizim were in the immediate neighbourhood of Jericho. And this is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremonial on the mounts while his camp was at Gilgal (*comp.* vii. 2, ix. 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (*Onomasticon*, FeBaA). He does not quote the passage in *Deut.*, but seems to be led to his opinion rather by the difficulty of the mountains at Shechem being too far apart to admit of the blessings and curings

being heard, and also by his desire to contradict the Samaritans; add to this that he speaks from no personal knowledge, but simply from hearsay (*Ἀέγεται*), as to the existence of two such hills in the Jordan valley. The notice of Eusebius is merely translated by Jerome, with a shade more of animosity to the Samaritans (*vehementer errant*), and expression of difficulty as to the distance, but without any additional information. Procopius and Epiphanius also followed Eusebius, but their mistakes have been disposed of by Reland (*Pal.* 503-4; *Miscell.* 129-133).

With regard to the passage in *Deut.*, it will perhaps assume a different aspect on examination.

(1) Moses is represented as speaking from the east side of the Jordan, before anything was known of the country on the west, beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed their due proportions. (2) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond—(עַל־פְּנֵי), the word rendered "the backside of the desert," in *Ex.* iii. 1)—the way of the sunset, in the land of the Canaanite who dwells in the *Arabah* over against Gilgal, near the terebinths of Moreh." If this rendering is correct, a great part of the difficulty has disappeared. Gilgal no longer marks the site of Ebal and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side the river, in their native lowlands, but who, we have it actually on record, were both in the time of Abraham (*Gen.* xii. 6) and of the conquest (*Josh.* xvii. 18) located about Shechem. The word now rendered "beyond" is not represented at all in the A. V., and it certainly throws the locality much further back; and lastly there is the striking landmark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name probably survived in Mortha, or Marmotha, a name of Shechem found on coins of the Roman period (Reland, *Miscell.* 137, 9).

In accordance with this is the addition in the Samaritan Pentateuch, after the words "the terebinths of Moreh," at the end of *Deut.* xi. 30, of the words "over against Shechem." This addition is the more credible because there is not, as in the case noticed afterwards, any apparent motive for it. If this interpretation be accepted, the next verse (31) gains a fresh force:—"For ye shall pass over Jordan [not only to meet the Canaanites immediately on the other side, but] to go in to possess the land [the whole of the country, even the heart of it, where these mounts are situated (glancing back to *ver.* 29)], the land which Jehovah your God giveth you; and ye shall possess it, and dwell therein." And it may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not missed if we understand it as taking place directly a footing had been obtained on the outskirts of the country, and not as acted in the heart of the conquered land, in its most prominent natural position, and close to its oldest city—Shechem.

This is evidently the view taken by Josephus. His statement (*Ant.* v. 1, §19) is that it took place after the subjugation of the country and the establishment of the Tabernacle at Shiloh. He has no misgivings as to the situation of the mountains. They were at Shechem (ἐν τῇ Σικανῶν), and from thence, after the ceremony, the people returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will be at once perceived that the book contains no account of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Esdraelon, or Galilee. We lose Joshua at Gilgal, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x. 43, xi. 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii. 30-35. Nor should it be overlooked that some doubt is thrown on this in Josh. viii. 30-35, by its omission in both the Vat. and Alex. MSS. of the LXX.

The distance of Ebal and Gerizim from each other is not such a stumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been ignorant of the distance to which the voice will travel in the clear elastic atmosphere of the East. Prof. Stanley has given some instances of this (*S. & P.* 13); others equally remarkable were observed by the writer; and he has been informed by a gentleman long resident in the neighbourhood that a voice can be heard without difficulty across the valley separating the two spots in question (see also Bonar, 371).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text, is in reference to Ebal and Gerizim. In Dent. xxvii. 4, the Samaritan has Gerizim, while the Hebrew (as in A. V.) has Ebal, as the mount on which the altar to Jehovah, and the inscription of the law were to be erected. Upon this basis they ground the sanctity of Gerizim and the authenticity of the temple and holy place, which did exist and still exist there. The arguments upon this difficult and hopeless question will be found in Kennicott (Dissert. 2.), and in the reply of Verschnir (Leovard. 1775; quoted by Gesenius de *Pent. Sana.* 61). Two points may merely be glanced at here which have apparently escaped notice. 1. Both agree that Ebal was the mount on which the cursings were to rest, Gerizim that for the blessings. It appears inconsistent, that Ebal, the mount of cursing, should be the site of the altar and the record of the law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind. 2. Taking into account the known predilection of Orientals for ancient sites on which to fix their sanctuaries, it is more easy to believe (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. Thus the very fact of the occupation of Gerizim by the Samaritans would seem an argument for its original sanctity.

Ebal is rarely ascended by travellers, and we are therefore in ignorance as to how far the question may be affected by remains of ancient buildings thereon. That such remains do exist is certain, even from the very meagre accounts published (Bartlett, *Walks about Jerusalem*, App. 251, 2; and Narrative of Rev. J. Mills in Trans. Pal. Archaeol. Assoc. 1855), while the mountain is evidently of such extent as to warrant the belief that there is a great deal still to discover.

The report of the old travellers was that Ebal

was more barren than Gerizim (see Benjamin of Tudela, &c.), but this opinion probably arose from a belief in the effects of the curse mentioned above. At any rate it is not borne out by the latest accounts, according to which there is little or no perceptible difference. Both mountains are terraced, and Ebal is "occupied from bottom to top by beautiful gardens" (Mills; see also Porter, *Hand-book*, 332). The slopes of Ebal towards the valley appear to be steeper than those of Gerizim (Wilson, 45, 71). It is also the higher mountain of the two. There is some uncertainty about the measurements, but the following are the results of the latest observations (Van de Velde, *Memoir*, 178).

*Nablâs*, above sea, 1672 ft.

Gerizim do. 2800 " .. above Nablâs, 928 ft.

Ebal do. about 2700 " .. do. 1028 "

According to Wilson (*Lands*, ii. 71,—but see Rob. ii. 277, 280, note) it is sufficiently high to shut out Hermon from the highest point of Gerizim. The structure of Gerizim is nummulitic limestone with occasional outcrops of igneous rock (Poole, in *Geogr. Journ.* xvi. 56), and that of Ebal is probably similar. At its base above the valley of Nablâs are numerous caves and sepulchral excavations. The modern name of Ebal is *Sitti Salamiyah*, from a Mohammedan female saint, whose tomb is standing on the eastern part of the ridge, a little before the highest point is reached (Wilson, 71, note). By others, however, it is reported to be called '*Imâd-ed-Deen*, 'the pillar of the religion' (Stanley, 238, note). The tomb of another saint called *Amâl* is also shown (Ritter, 641), with whom the latter name may have some connexion. On the south-east shoulder is a ruined site bearing the name of '*Askar* (Rob. iii. 132). [SYCHAR.] [G.]

**EBED**, 1. עֶבֶד = "slave;" but many MSS., and the Syr. and Arab. Versions, have עֶבֶר, **EBER**; יְעֻבָּה; Alex. 'ΑΒΕδ; *Ebed* and *Obed*), father of GAAL, who with his brethren assisted the men of Shechem in their revolt against Abimelech (Judg. ix. 26, 28, 30, 31, 35).

2. (עֶבֶר; 'ΑΒΕθ; Alex. 'ΑΒΗ; *Abed*), son of Jonathan; one of the Bene-Adin who returned from Babylon with Ezra (Ezr. viii. 6). In 1 Esdras the name is given OBETH.

It would add greatly to the force of many passages in the O. T. if the word "slave" or "bondman" were appropriated to the Hebrew term *Ebed*, while "servant," "attendant," or "minister," were used to translate *Na'ar*, *Mesharet*, &c. In the addresses of subjects to a ruler, the Oriental character of the transaction would come home to us at once if we read "what saith my lord to his slave"—the very form still in use in the East, and familiar to us all in the *Arabian Nights* and other Oriental works—instead of "his servant." [G.]

**E'BED-ME'LECH** (עֶבֶד מֶלֶךְ; Ἀβδμελεχ, *Abdmelech*), an Ethiopian eunuch in the service of king Zedekiah, through whose interference Jeconiah was released from prison, and who was on that account preserved from harm at the taking of Jerusalem (Jer. xxxviii. 7 ff., xxxix. 15 ff.). His name seems to be an official title = *King's slave*, i.e. *minister*.

**EBEN-EZER** (הָעֵבֶן אֶזְרָא, "the stone of

\* For a peculiarity in the Hebrew name in iv. 1—the definite article to both words—see Ewald, *Ausführl. Lebrb.* §290 d.

help;" **'Aber** (עֶבֶר; Joseph. *Αἰθος λαχυρὸς*; *lapis Adjutorii*), a stone set up by Samuel after a signal defeat of the Philistines, as a memorial of the "help" received on the occasion from Jehovah (1 Sam. vii. 12). "He called the name of it Ebenezer, saying, 'hitherto hath Jehovah helped us'" (*uzurauu*, עֶבֶרֶצֶר). Its position is carefully defined as between MIZPELIL—"the watch-tower," one of the conspicuous eminences a few miles N. of Jerusalem—and SHEN, "the tooth" or "crag." Neither of these points, however, have been identified with any certainty—the latter not at all. According to Josephus's record of the transaction (*Ant.* vi. 2, 2), the stone was erected to mark the limit of the victory, a spot which he calls KORRAIA, but in the Hebrew BETH-CAIR. It is remarkable that of the occurrences of the name Eben-ezer, two (1 Sam. iv. 1, v. 1) are found in the order of the narrative before the place received its title. But this would not naturally happen in a record written after the event, especially in the case of a spot so noted as Eben-ezer must have been. [G.]

**E'BER** (עֶבֶר; **"Eber**, **"Eber**; *Heber*), son of Saluh, and great-grandson of Shem (*Gen.* x. 14; 1 Chr. i. 19). For confusion between Eber and Heber see HEBER; and for the fictitious importance attached to this patriarch, and based upon *Gen.* x. 21, *Num.* xiv. 24, see HEBREW. [T. E. B.]

**EB'ASAPH** (עֶבְרָסָף; *Ἀβιασάφ* and *Ἀβισάφ*; *Abiasaph*), a Kethathite Levite of the family of Korah, one of the forefathers of the prophet Samuel and of Heman the singer (1 Chr. vi. 23, 37). The same man is probably intended in ix. 19. The name appears also to be identical with *ABIASAPH* (which see), and in one passage (1 Chr. xvi. 1) to be abbreviated to *Asaph*.

**EBONY** (*Habenin*, הֶבֶנִּים), a dark very hard kind of wood, mentioned only in *Ez.* xxvii. 15, as brought with ivory to Tyre by the men of Dedan. It is the timber of the *Diospyros ebenum*, Linn., and is found both in Aethiopia and India, though Virgil (*Georg.* ii. 115) says

— "soia India nigrum  
Fert ebenum."

It was highly esteemed by the ancients: see Theophr. *Hist. Pl.* iv. 5; Plin. *H. N.*, vi. 30, §35, xii. 4, §8, 9. There is an affinity between *Habenin* and *Oben* or *Eben*, a stone. Hence perhaps *Habenin* in the above passage may have the force of "stony wood," i. e. as hard as stone, lithoxyle, Germ. *Steinholz*. The Semitic word is the origin of the Greek *ἔβενος*, and the Latin *ebenum*, and it has come back into the Arabic and Persian

ابنوس, ابنوش, with its Greek termination. The Hebrew use of the plural arose from the fact that this wood was exported out into logs (comp. *φάλαγγες ἔβενου*, in Herod. iii. 97). The fine black ebony of commerce is imported from Mauritius and the East Indies. Other, but inferior, kinds, are derived from Africa and Jamaica. [W. D.]

**EBRON'AH**. [ABRONAH.]

**ECAN'US**, one of the five swift scribes who attended on Esdras (2 Esdr. xiv. 24).

**ECBAT'ANA** (עֶכְבָּתָנָא; *Ἀμαθὰ*, *Ἐκβάτανα*; *Ecbatana*). It is doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the

expression *מִן־הַמָּגִן*, in *Ezra* vi. 2, differently, and translate it *in arca*, "in a coffer" (see Buxtorf and others, and so our English Bible *in the margin*). The LXX., however, give *ἐν πόλει*, "in a city," or (in some MSS.) *ἐν Ἀμαθὰ ἐν πόλει*, which favours the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanae being intended, for except these towns there was no place in the province of the Medes "which contained a palace" (חַיִּיבָא), or where records are likely to have been deposited. The name *Achinetha* too, which at first sight seems somewhat remote from Ecbatana, wants but one letter of *Illymatana*, which was the native appellation. In the apocryphal books Ecbatana is frequently mentioned (*Tob.* iii. 7, xiv. 12, 14; *Jud.* i. 1, 2; 2 Mac. ix. 3, &c.); and uniformly with the later and less correct spelling of *Ἐκβάτανα*, instead of the earlier and more accurate form, used by Herodotus, Aeschylus, and Ctesias, of *Ἀγβάτανα*.

Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of Northern Media, the Media Atropatene of Strabo; the other the metropolis of the larger and more important province known as Media Magna (see Sir H. Rawlinson's paper on the Atropatenian Ecbatana, in the 10th volume of the *Journal of the Geographical Society*, art. ii.). The site of the former appears to be marked by the very curious ruins at *Takht-i-Sulaiman* (lat. 36° 28', long. 47° 9'); while that of the latter is occupied by *Hamadan*, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i. 98-99, 153; comp. *Mos. Choren.* ii. 84); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their temple.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of the *Zendavesta* (*Vendidad*, Fargard II.) is the oldest, and the least exaggerated. "Jemshid," it is said, "erected a *Var*, or fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population, and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to flow forth abundantly. And within the *var*, or fortress, he erected a lofty palace, encompassed with walls, and laid it out in many separate divisions, and there was no place, either in front or rear, to command and overrule the fortress." Herodotus, who ascribes the foundation of the city to his king Deioces, says:—"The Medes were obedient to Deioces, and built the city now called Agbatana, the walls of which are of great size and strength, rising in circles one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favours this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, the royal palace and the treasures standing within the last. The circuit

of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the next black, of the third scarlet, of the fourth blue, of the fifth orange: all these are coloured with paint. The two last have their battlements coated respectively with silver and gold. All these fortifications Deloëus caused to be raised for himself and his own palace. The people were required to build their dwellings outside the circuit of the walls" (Herod. i. 98-99). Finally, the book of Judith, probably the work of an Alexandrian Jew, professes to give a number of details, which appear to be drawn chiefly from the imagination of the writer (Jud. i. 2-4).

The peculiar feature of the site of *Takht-i-Suleiman*, which it is proposed to identify with the northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval enclosure about 800 yards in its greatest and 400 in its least diameter, strewn with ruins, which cluster round a remarkable lake. This

is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown way from below, and which stands uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides—the south, the west, and the north—the acclivity is steep and the height above the plain uniform, but on the east it abuts upon a hilly tract of ground,

and here it is but slightly elevated above the adjacent country. It cannot therefore have ever answered exactly to the description of Herodotus, as the eastern side could not anyhow admit of seven walls of circumvallation. It is doubted whether even the other sides were thus defenced. Although the flanks on these sides are covered with ruins, "no traces remain of any wall but the upper one" (*As. Journ.* x. p. 52). Still, as the nature of the ground on three sides would allow this style of defence, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose, that in the peaceful times of the Persian empire it was thought sufficient to preserve the upper enceinte, while the others were allowed to fall into decay, and ultimately were superseded by domestic buildings. With regard to the colouring of the walls, or rather of the battlements, which has been considered to mark especially the fabulous character of Herodotus'

description, recent discoveries show that such a mode of ornamentation was actually in use at the period in question in a neighbouring country. The temple of the Seven Spheres at Borsippa was adorned almost exactly in the manner which Herodotus assigns to the Median capital [BABEL, TOWER OF]; and it does not seem at all improbable that, with the object of placing the city under the protection of the Seven Planets, the seven walls may have been coloured nearly as described. Herodotus has a little deranged the order of the hues, which should have been either black, orange, scarlet, gold, white, blue, silver—as at the Borsippa temple—or black, white, orange, blue, scarlet, silver, gold—if the order of the days dedicated to the planets were followed. Even the use of silver and gold in external ornamentation—which seems at first sight highly improbable—is found to have prevailed. Silver roofs were met with by the Greeks at the southern Ecbatana (Polyb. x. 27, §10-12); and there is reason to believe that at Borsippa the gold and silver stages of the temple were actually coated with those metals.

The northern Ecbatana continued to be an important place down to the 13th century after

Plan of Ecbatana.

EXPLANATION.

1. Remains of a Fire-Temple.
2. Ruined Mosque.
3. Ancient buildings with shafts and capitals.
4. Ruins of the Palace of Abakut Kima.
5. Cemetery.
6. Ridge of rock called "the Dragon".
7. Hill called "Tawilsh," or "the Stable".
8. Ruins of Kishlah.
9. Rocky hill of Zindan-i-Suleiman.

Christ. By the Greeks and Romans it appears to have been known as Gaza, Gazaca, or Canzaca, "the treasure city," on account of the wealth laid up in it; while by the Orientals it was termed *Shiz*. Its decay is referable to the Mogul conquests, ab. A.D. 1200; and its final ruin is supposed to date from about the 15th or 16th century (*As. Soc. Journ.* vol. x. part i. p. 49).

In the 2nd book of Macenbes (ix. 3, &c.) the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by *Hamadan*. This place, situated on the northern flank of the great mountain called formerly Orontes, and now *Elicend*, was perhaps as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was at any rate regarded from the time of Darius Hystaspis as the chief city of the Persian satrapy of Media, and as such it became the summer residence of the Persian kings from Darius downwards. It was occupied by Alexander soon after the battle of Arbela (Arr.

*Exp. Alex.* iii. 19), and at his decease passed under the dominion of the Seleucidæ. In the wars between his successors it was more than once taken and retaken, each time suffering largely at the hands of its conquerors (*Polyb.* x. 27). It was afterwards recognised as the metropolis of their empire by the Parthians (*Oros.* vi. 4). During the Arabian period, from the rise of Baghdad on the one hand and of Isfahan on the other, it sank into comparative insignificance; but still it has never descended below the rank of a provincial capital, and even in the present depressed condition of Persia, it is a city of from 20,000 to 30,000 inhabitants. The Jews, curiously enough, regard it as the residence of Ahasuerus (Xerxes?)—which is in Scripture declared to be Susa (*Est.* i. 2, ii. 3, &c.)—and show within its precincts the tombs of Esther and Mordecai (*Ker Porter*, vol. ii. pp. 105-110). It is not distinguished by any remarkable peculiarities from other Oriental cities of the same size.

The Ecbatana of the book of Tobit is thought by Sir H. Rawlinson to be the northern city (see *As. Soc. Journ.* x. pt. i. pp. 137-141). [G. R.]

**ECCLESIASTES** (עֵקֶלְאִישֶׁת, *Kohēleth*; Ἐκκλησιαστικός, *Ecclesiastes*). I. Title.—The title of this book is taken from the name by which the son of David, or the writer who personates him, speaks of himself throughout it. The apparent anomaly of the feminine termination η indicates

that the abstract noun has been transferred from the office to the person holding it (*Gesen. sub voc.*), and has thus become capable of use as a masculine proper name, a change of meaning of which we find other instances in *Sophereth* (*Neh.* vii. 57), *Pochereth* (*Est.* ii. 57); and hence, with the single exception of *Ecl.* vii. 27, the noun, notwithstanding its form, is used throughout in the masculine. Ewald, however (*Poet. Büch.* iv. p. 189), connects the feminine termination with the noun חֵכֶם (wisdom), understood, and supposes a poetic licence in the use of the word as a kind of symbolic proper name, appealing to *Prov.* xxx. 1, xxxi. 1, as examples of a like usage. As connected with the root קָהַל, "to call together," and with קָהָל, "assembly," the word has been applied to one who speaks publicly in an assembly, and there is, to say the least, a tolerable agreement in favour of this interpretation. Thus we have the comment of the Midrash, stating that the writer thus designates himself, "because his words were spoken in the assembly" (quoted in *Preston's Ecclesiastes*, note on i. 1); the rendering Ἐκκλησιαστικός by the LXX.; the adoption of this title by Jerome (*Præf. in Ecl.*), as meaning "qui coctum, i. e. ecclesiam congregat quem nos nuncupare possumus Concionatorem;" the use of "Prediger" by Luther, of "Preacher" in the Authorised Version. On the other hand, taking קָהַל in the sense of collecting things, not of summoning persons, and led perhaps by his inability to see in the book itself any greater unity of design than in the chapters of Proverbs, Grotius (*in Eccles.* i. 1) has suggested Συναθροιστής (*compiler*) as a better equivalent. In this he has been followed by Herder and Jahn, and Mendelssohn has adopted the same rendering (notes on i. 1, and vii. 27, in *Preston*), seeing in it the statement partly that the writer had compiled the sayings of wise men who had gone before him, partly that he was,

by an inductive process, gathering truths from the facts of a wide experience.

II. *Canonicity*.—In the Jewish division of the books of the Old Testament, Ecclesiastes ranks as one of the five Megilloth or Rolls [BIBLE], and its position, as having canonical authority, appears to have been recognised by the Jews from the time in which the idea of a canon first presented itself. We find it in all the Jewish catalogues of the sacred books, and from them it has been received universally by the Christian Church. Some singular passages in the Talmud indicate, however, that the recognition was not altogether unhesitating, and that it was at least questioned how far the book was one which it was expedient to place among the Scriptures that were read publicly. Thus we find the statements (*Mishna, Shabbas*, c. x., quoted by Mendelssohn in *Preston*, p. 74; *Midrash*, fol. 114 a; *Preston*, p. 13) that "the wise men sought to secrete the book *Kohēleth*, because they found in it words tending to heresy," and "words contradictory to each other;" that the reason they did not secrete it was "because its beginning and end were consistent with the law;" that when they examined it more carefully they came to the conclusion, "We have looked closely into the book *Kohēleth*, and discovered a meaning in it." The chief interest of such passages is of course connected with the inquiry into the plan and teaching of the book, but they are of some importance also as indicating that it must have commended itself to the teachers of an earlier generation, either on account of the external authority by which it was sanctioned, or because they had a clearer insight into its meaning, and were less startled by its apparent difficulties. Traces of this controversy are to be found in a singular discussion between the schools of Shammai and Hillel, turning on the question whether the book *Kohēleth* were inspired, and in the comments on that question by R. Ob. de Bartenor and Maimonides (*Surenhus* iv. 349).

III. *Author and Date*.—The questions of the authorship and the date of this book are so closely connected that they must be treated of together, and it is obviously impossible to discuss the points which they involve without touching also on an inquiry into the relation in which it stands to Hebrew literature generally.

The hypothesis which is naturally suggested by the account that the writer gives of himself in ch. i. and ii. is that it was written by the only "son of David" (i. 1), who was "king over Israel in Jerusalem" (i. 12). According to this notion we have in it what may well be called the Confessions of King Solomon, the utterance of a repentance which some have even ventured to compare with that of the 51st psalm. Additional internal evidence has been found for this belief in the language of vii. 26-28, as harmonising with the history of 1 K. xi. 3, and in an interpretation (somewhat forced perhaps) which refers iv. 13-15 to the murmurs of the people against Solomon and the popularity of Jeroboam as the leader of the people, already recognised as their future king (*Mendelssohn and Preston in loc.*). The belief that Solomon was actually the author was, it need hardly be said, received generally by the Rabbinic commentators and the whole series of Patristic writers. The apparent exceptions to this in the passages by Talmudic writers which ascribe it to Hezekiah (*Baba Bathra*, c. i. fol. 15), or Isaiah (*Shalsh. Hakkab*,

fol. 66 b, quoted by Michaelis), can hardly be understood as implying more than a share in the work of editing, like that claimed for the "men of Hezekiah" in Prov. xiv. 1. Grotius (*Praef. in Eccles.*) was indeed almost the first writer who called it in question, and started a different hypothesis. It can hardly be said, however, that this consensus is itself decisive. In questions of this kind the later witnesses add nothing to the authority of the earlier, whose testimony they simply repeat, and unless we had clearer knowledge than we have as to the sources of information or critical discernment of those by whom the belief was adopted, we ought not to look on their acceptance of it as closing all controversy. The book which bears the title of the "Wisdom of Solomon" asserts, both by its title and its language (vii. 1-21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards. It may seem, however, as if the whole question were settled for all who recognise the inspiration of Scripture by the statement, in a canonical and inspired book, as to its own authorship. The book purports, it is said (Preston, *Proleg. in Eccles.* p. 5), to be written by Solomon, and to doubt the literal accuracy of this statement is to call in question the truth and authority of Scripture. It appears questionable, however, whether we can admit an *a priori* argument of this character to be decisive. The hypothesis that every such statement in a canonical book must be received as literally true, is, in fact, an assumption that inspired writers were debarred from forms of composition which were open, without blame, to others. In the literature of every other nation the form of personated authorship, where there is no *omnino decipiendo*, has been recognised as a legitimate channel for the expression of opinions, or the quasi-dramatic representation of character. Why should we venture on the assertion that if adopted by the writers of the Old Testament it would have made them guilty of a falsehood, and been inconsistent with their inspiration? The question of authorship does not involve that of canonical authority. A book written by Solomon would not necessarily be inspired and canonical. There is nothing that need startle us in the thought that an inspired writer might use a liberty which has been granted without hesitation to the teachers of mankind in every age and country.

The preliminary difficulty being so far removed, we can enter on the objections which have been urged against the traditional belief by Grotius and later critics, and the hypotheses which they have substituted for it. In the absence of adequate external testimony, these are drawn chiefly from the book itself.

1. The language of the book is said to be inconsistent with the belief that it was written by Solomon. It belongs to the time when the older Hebrew was becoming largely intermingled with Aramaic forms and words (Grotius, De Wette, Ewald, and nearly the whole series of German critics), and as such takes its place in the latest group of books of the Old Testament, along with Ezra, Nehemiah, Daniel, Esther: it is indeed more widely different from the language of the older books than any of

them (Ewald). The prevalence of abstract forms again, characteristic of the language of Ecclesiastes, is urged as belonging to a later period than that of Solomon in the development of Hebrew thought and language. The answers given to these objections by the defenders of the received belief are (Preston, *Eccles.* p. 7), (a) that many of what we call Aramaic or Chaldean forms may have belonged to the period of pure Hebrew, though they have not come down to us in any extant writings; and (b) that so far as they are foreign to the Hebrew of the time of Solomon, he may have learnt them from his "strange wives," or from the men who came as ambassadors from other countries.

2. It has been asked whether Solomon would have been likely to speak of himself as in i. 12, or to describe with bitterness the misery and wrong of which his own misgovernment had been the cause, as in iii. 16, iv. 1 (Jahn, *Einkl.* ii. p. 840). On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no distinct confession and repentance. The question here raised is, of course, worth considering, but it can hardly be looked on as leading in either direction to a conclusion. There are forms of subtlety and self-reproach, of which this half-sad, half-scornful retrospect of a man's own life—this utterance of bitter words by which he is condemned out of his own mouth—is the most natural expression. Any individual judgment on this point cannot, from the nature of the case, be otherwise than subjective, and ought therefore to bias our estimate of other evidence as little as possible.

3. It has been urged that the state of society indicated in this book leads to the same conclusion as its language, and carries us to a period after the return from the Babylonian captivity, when the Jews were enjoying comparative freedom from invasion, but were exposed to the evils of misgovernment under the satraps of the Persian king (Ewald, *Poet. Bücher*; Keil, *Einkl. in das A. T.* under *Eccles.*). The language is throughout that of a man who is surrounded by many forms of misery (iii. 16, iv. 1, v. 8, viii. 11, ix. 12). There are sudden and violent changes, the servant of to-day becoming the ruler of to-morrow (x. 5-7). All this, it is said, agrees with the glimpses into the condition of the Jews under the Persian empire in Ezra and Nehemiah, and with what we know as to the general condition of the provinces under its satraps. The indications of the religious condition of the people, their formalism, and much-speaking (v. 1, 2), their readiness to evade the performance of their vows by casuistic excuses (v. 5), represent in like manner the growth of evils, the germs of which appeared soon after the captivity, and which we find in a fully developed form in the prophecy of Malachi. In addition to this general resemblance there is the agreement between the use of מַלְאָךְ for the "angel" or priest of God (v. 6, Ewald, *loc. cit.*),

and the recurrence in Malachi of the terms מַלְאָךְ הַיְהוָה, the "angel" or messenger of the Lord, as a synonyme for the priest (Mal. ii. 7), the true priest being the great agent in accomplishing God's purposes. Significant, though not conclusive, in either direction, is the absence of all reference to any contemporaneous prophetic activity, or to any Messianic hopes. This might indicate a time before such hopes had become prevalent or after they

were, for a time, extinguished. It might, on the other hand, be the natural result of the experience through which the son of David had passed, or fitly take its place in the dramatic personation of such a character. The use throughout the book of Elohîm instead of Jehovah as the divine Name, though characteristic of the book as dealing with the problems of the universe rather than with the relations between the Lord God of Israel and His people, and therefore striking as an idiosyncrasy, leaves the question as to date nearly where it was. The indications of rising questions as to the end of man's life, and the constitution of his nature, of doubts like those which afterwards developed into Sadduceism (iii. 19-21), of a copious literature connected with those questions, confirm, it is urged (Ewald), the hypothesis of the later date. It may be added too, that the absence of any reference to such a work as this in the enumeration of Solomon's writings in 1 K. iv. 32, tends, at least, to the same conclusion.

In this case, however, as in others, the arguments of recent criticism are stronger against the traditional belief than in support of any rival theory, and the advocates of that belief might almost be content to rest their case upon the discordant hypotheses of their opponents. On the assumption that the book belongs, not to the time of Solomon, but to the period subsequent to the captivity, the dates which have been assigned to it occupy a range of more than 300 years. Grotius supposes Zerubabel to be referred to in xii. 11, as the "One Shepherd" (*Comm. in Eccles. in loc.*), and so far agrees with Keil (*Einführung in das A. T.*), who fixes it in the time of Ezra and Nehemiah. Ewald and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Bertholdt the period between Alexander the Great and Antiochus Epiphanes; Hitzig, circ. 204 B.C., Hartmann, the time of the Maccabees. On the other hand it must be remembered in comparing these discordant theories that the main facts relied upon by these critics as fatal to the traditional belief are compatible with any date subsequent to the captivity, while they are inconsistent, unless we admit the explanation, given as above, by Preston, with the notion of the Salomonic authorship.

IV. *Plan.*—The book of Ecclesiastes comes before us as being conspicuously, among the writings of the O. T. the great stumbling-block of commentators. Elsewhere there are different opinions as to the meaning of single passages. Here there is the widest possible divergence as to the plan and purpose of the whole book. The passages already quoted from the Mishna show that some, at least, of the Rabbinical writers were perplexed by its teaching—did not know what to make of it—but gave way to the authority of men more discerning than themselves. The traditional statement, however, that this was among the scriptures which were not read by any one under the age of thirty (*Crit. Sac. Amarna in Eccles.*, but with a "nescio ubi" as to his authority), indicates the continuance of the old difficulty, and the remarks of Jerome (*Praef. in Eccles., Comm. in Eccles. xii. 13*) show that it was not forgotten. Little can be gathered from the series of Patristic interpreters. The book is comparatively seldom quoted by them. No attempt is made to master its plan and to enter into the spirit of its writer. The charge brought by Philastrius of Brescia (circ. 380) against some heretics who rejected it as teaching a false morality, shows that the obscurity which had been a stumbling-

block to Jewish teachers was not removed for Christians. The fact that Theodore of Mopsuestia was accused at the Fifth General Council of calling in question the authority and inspiration of this book, as well as of the Canticles, indicates that in this respect as in others he was the precursor of the spirit of modern criticism. But with these exceptions, there are no traces that men's minds were drawn to examine the teachings of the book. When, however, we descend to the more recent developments of criticism, we meet with an almost incredible divergence of opinion. Luther, with his broad clear insight into the workings of a man's heart, sees in it (*Praef. in Eccles.*) a noble "Politica vel Oeconomica," leading men in the midst of all the troubles and disorders of human society to a true endurance and reasonable enjoyment. Grotius (*Praef. in Eccles.*) gives up the attempt to trace in it a plan or order of thought, and finds in it only a collection of many maxims, connected more or less closely with the great problems of human life, analogous to the discussion of the different definitions of happiness at the opening of the Nicomachean Ethics. Some (of whom Warburton may be taken as the type, *Works*, vol. iv. p. 154) have seen in the language of ii. 18-21. a proof that the belief in the immortality of the soul was no part of the transmitted creed of Israel. Others (Patrick, Des Voeux, Davidson, Mendelssohn) contend that the special purpose of the book was to assert that truth against the denial of a sensual scepticism. Others, the later German critics, of whom Ewald may be taken as the highest and best type, reject these views as partial and one-sided, and while admitting that the book contains the germs of later systems, both Pharisaic and Sadducean, assert that the object of the writer was to point out the secret of a true blessedness in the midst of all the distractions and sorrows of the world as consisting in a tranquil calm enjoyment of the good that comes from God (*Poet. Büch. iv. 180*).

The variety of these opinions indicates sufficiently that the book is as far removed as possible from the character of a formal treatise. It is that which it professes to be—the confession of a man of wide experience looking back upon his past life and looking out upon the disorders and calamities which surround him. Such a man does not set forth his premises and conclusions with a logical completeness. While it may be true that the absence of a formal arrangement is characteristic of the Hebrew mind in all stages of its development (Lowth, *de Sac. Poet. Heb. Proel. xiv.*), or that it was the special mark of the declining literature of the period that followed the captivity (Ewald, *Poet. Büch. iv. p. 177*), it is also true that it belongs generally to all writings that are addressed to the spiritual rather than the intellectual element in man's nature, and that it is found accordingly in many of the greatest works that have influenced the spiritual life of mankind. In proportion as a man has passed out of the region of a traditional, easily-systematized knowledge, and has lived under the influence of great thoughts—possessed by them, yet hardly mastering them so as to bring them under a scientific classification—are we likely to find this apparent want of method. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of it, of his ultimate discovery. The treatise *de Imitatione Christi*, the *Pensées* of Pascal, Augustine's *Confessions*,

widely as they differ in other points, have this feature in common. If the writer consciously reproduces the stages through which he has passed, the form he adopts may either be essentially dramatic, or it may record a statement of the changes which have brought him to his present state, or it may repeat and renew the oscillations from one extreme to another which had marked that earlier experience. The writer of Ecclesiastes has adopted and interwoven both the latter methods, and hence, in part, the obscurity which has made it so pre-eminently the stumbling-block of commentators. He is not a didactic moralist writing a Homily on Virtue. He is not a prophet delivering a message from the Lord of Hosts to a sinful people. He is a man who has sinned in giving way to selfishness and sensuality, who has paid the penalty of that sin in satiety and weariness of life; in whom the mood of spirit, over-reflective, indisposed to action, of which Shakespeare has given us in Hamlet, Jacques, Richard II., three distinct examples, has become dominant in its darkest form, but who has through all this been under the discipline of a divine education, and has learnt from it the lesson which God meant to teach him. What that lesson was will be seen from an examination of the book itself.

Leaving it an open question whether it is possible to arrange the contents of this book (as Koster and Vaihinger have done) in a carefully balanced series of strophes and antistrophes, it is tolerably clear that the recurring burden of "Vanity of vanities" and the teaching which recommends a life of calm enjoyment, mark, whenever they occur, a kind of halting-place in the succession of thoughts. It is the summing up of one cycle of experience; the sentence passed upon one phase of life. Taking this, accordingly, as our guide, we may look on the whole book as falling into five divisions, each, to a certain extent, running parallel to the others in its order and results, and closing with that which, in its position no less than its substance, is "the conclusion of the whole matter."

(1.) Ch. i. and ii. This portion of the book more than any other has the character of a personal confession. The Preacher starts with reproducing the phase of despair and weariness into which his experience had led him (i. 2, 3). To the man who thus satiated with life the order and regularity of nature are oppressive (i. 4-7); nor is he led, as in the 90th Psalm, from the things that are transitory to the thought of One whose years are from eternity. In the midst of the ever-recurring changes he finds no progress. That which seems to be new is but the repetition of the old (i. 8-11). Then, having laid bare the depth to which he had fallen, he retraces the path by which he had travelled thitherward. First he had sought after wisdom as that to which God seemed to call him (i. 13), but the pursuit of it was a sore travail, and there was no satisfaction in its possession. It could not remedy the least real evil, nor make the crooked straight (i. 15). The first experiment in the search after happiness had failed and he tried another. It was one to which men of great intellectual gifts and high fortunes are continually tempted—to surround himself with all the appliances of sensual enjoyment and yet in thought to hold himself above it (ii. 1-9), making his very voluptuousness part of the experience which was to enlarge his store of wisdom. This—which one may perhaps call the Goethe idea of life—was what

now possessed him. But this also failed to give him peace (ii. 11). Had he not then exhausted all human experience and found it profitless? (ii. 12). If for a moment he found comfort in the thought that wisdom excelleth folly, and that he was wise (ii. 13, 14), it was soon darkened again by the thought of death (ii. 15). The wise man dies as the fool (ii. 16). This is enough to make even him who has wisdom hate all his labour and sink into the outer darkness of despair (ii. 20). Yet this very despair leads to the remedy. The first section closes with that which, in different forms, is the main lesson of the book—to make the best of what is actually around one (ii. 24)—to substitute for the reckless feverish pursuit of pleasure the calm enjoyment which men may yet find both for the senses and the intellect. This, so far as it goes, is the secret of a true life; this is from the hand of God. On everything else there is written, as before, the sentence that it is vanity and vexation of spirit.

(2.) Ch. iii. 1—vi. 9. The order of thought in this section has a different starting-point. One who looked out upon the infinitely varied phenomena of man's life might yet discern, in the midst of that variety, traces of an order. There are times and seasons for each of them in its turn, even as there are for the vicissitudes of the world of nature (iii. 1-8). The heart of man with its changes is the mirror of the universe (iii. 11), and is, like that, inscrutable. And from this there comes the same conclusion as from the personal experience. Calmly to accept the changes and chances of life, entering into whatever joy they bring, as one accepts the order of nature, this is the way of peace (iii. 13). The thought of the ever-recurring cycle of nature, which had before been irritating and disturbing, now whispers the same lesson. If we suffer, others have suffered before us (iii. 15). God is seeking out the past and reproducing it. If men repeat injustice and oppression, God also in the appointed season repeats His judgments (iii. 16, 17). It is true that this thought has a dark as well as a bright side, and this cannot be ignored. If men come and pass away, subject to laws and changes like those of the natural world, then, it would seem, man has no pre-eminence above the beast (iii. 19). One end happens to all. All are of the dust and return to dust again (iii. 20). There is no immediate denial of that conclusion. It was to that that the preacher's experience and reflection had led him. But even on the hypothesis that the personal being of man terminates with his death, he has still the same counsel to give. Admit that all is darkness beyond the grave, and still there is nothing better on this side of it than the temper of a tranquil enjoyment (iii. 22). The transition from this to the opening thoughts of ch. iv. seems at first somewhat abrupt. But the preacher is retracing the paths by which he had been actually led to a higher truth than that in which he had then rested, and he will not, for the sake of a formal continuity, smooth over its ruggedness. The new track on which he was entering might have seemed less promising than the old. Instead of the self-centred search after happiness he looks out upon the miseries and disorders of the world, and learns to sympathise with suffering (iv. 1). At first this does but multiply his perplexities. The world is out of joint. Men are so full of misery that death is better than life (iv. 2). Successful energy exposes men to envy (iv. 4). Indolence leads to

poverty (iv. 5). Here too he who steers clear of both extremes has the best portion (iv. 6). The man who heaps up riches stands alone without kindred to share or inherit them, and loses all the blessings and advantages of human fellowship (iv. 8-12). And in this survey of life on a large scale, as in that of a personal experience, there is a cycle which is ever being repeated. The old and foolish king yields to the young man, poor and wise, who steps from his prison to a throne (iv. 13, 14). But he too has his successor. There are generations without limit before him, and shall be after him (iii. 15, 16). All human greatness is swallowed up in the great stream of time. The opening of ch. v. again presents the appearance of abruptness, but it is because the survey of human life takes a yet wider range. The eye of the Preacher passes from the dwellers in palaces to the worshippers in the Temple, the devout and religious men. Have they found out the secret of life, the path to wisdom and happiness? The answer to that question is that there the blindness and folly of mankind show themselves in their worst forms. Hypocrisy, unseemly prayers, idle dreams, broken vows, God's messenger, the Priest, mocked with excuses—that was what the religion which the Preacher witnessed presented to him (v. 1-6). The command "Fear thou God," meant that a man was to take no part in a religion such as this. But that command also suggested the solution of another problem, of that prevalence of injustice and oppression which had before weighed down the spirit of the inquirer. Above all the tyranny of petty governors, above the might of the king himself there was the power of the Highest (v. 8); and His judgment was manifest even upon earth. Was there after all so great an inequality? Was God's purpose that the earth should be for all, really counteracted? (v. 9). Was the rich man with his cues and fears happier than the labouring man whose sleep was sweet without riches? (v. 10-12). Was there anything permanent in that wealth of his? Did he not leave the world naked as he entered it? And if so, did not all this bring the inquirer round to the same conclusion as before? Moderation, self-control, freedom from all disturbing passions, these are the conditions of the maximum of happiness which is possible for man on earth. Let this be received as from God. Not the outward means only, but the very capacity of enjoyment is His gift (v. 18, 19). Short as life may be, if a man thus enjoys, he makes the most of it. God approves and answers his cheerfulness. Is not this better than the riches or length of days on which men set their hearts? (vi. 1-5). All are equal in death; all are nearly equal in life (vi. 6). To feed the eyes with what is actually before them is better than the ceaseless wanderings of the spirit (vi. 9).

(3.) Ch. vi. 10—viii. 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more troubling and leading to a higher truth. The spirit of man looks before and after, and the uncertainties of the future vex it (vi. 12). A good name is better, as being more permanent, than riches (vii. 1); death is better than life, the house of mourning than the house of feasting (vii. 2). Self-command and the spirit of calm endurance are a better safe-guard against vain speculations

than any form of enjoyment (vii. 8, 9, 10). This wisdom is not only a defence, as lower things, in their measure may be, but it gives life to them that have it (vii. 12). So far there are signs of a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii. 15). Wisdom suggests a half-solution of them (vii. 18), suggests also calmness, caution, humility in dealing with them (vii. 22); but this again is followed by a relapse into the bitterness of the sated pleasure-seeker. The search after wisdom, such as it had been in his experience, had led only to the discovery that though men were wicked, women were more wicked still (vii. 26-28). The repetition of thoughts that had appeared before, is perhaps the natural consequence of such an oscillation, and accordingly in ch. viii. we find the seeker moving in the same round as before. There are the old reflections on the misery of man (viii. 6), and the confusions in the moral order of the universe (viii. 10, 11), the old conclusion that enjoyment (such enjoyment as is compatible with the fear of God) is the only wisdom, viii. 15.

(4.) Ch. viii. 16—xii. 8. After the pause implied in his again arriving at the lesson of v. 15, the Preacher retraces the last of his many wanderings. This time the thought with which he started was a profound conviction of the inability of man to unravel the mysteries by which he is surrounded (viii. 17), of the nothingness of man when death is thought of as ending all things (ix. 3-6), of the wisdom of enjoying life while we may (ix. 7-10), of the evils which affect nations or individual man (ix. 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (x. 1-20), each true and weighty in itself, but not leading him on to any firmer standing-ground or clearer solution of the problems which oppressed him. It is here that the traces of plan and method in the book seem most to fail us. Consciously or unconsciously the writer teaches us how clear an insight into the follies and sins of mankind may co-exist with doubt and uncertainty as to the great ends of life, and give him no help in his pursuit after truth. In ch. xi. however the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The conclusions of previous trains of thought are not contradicted, but are placed under a new law and brought into a more harmonious whole. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi. 1-4). His wisdom is to remember that there are things which he cannot know, problems which he cannot solve (xi. 5), to enjoy, in the brightness of his youth, whatever blessings God bestows on him (xi. 9). But beyond all these there lie the days of darkness, of failing powers and incapacity for enjoyment, and the joy of youth, though it is not to be crushed, is yet to be tempered by the thought that it cannot last for ever, and that it too is subject to God's law of retribution (xi. 9, 10). The secret of a true life is that a man should consecrate the vigour of his youth to God (xii. 1). It is well to do that before the night comes, before the slow decay of age benumbs all the faculties of sense (xii. 2, 6), before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii. 8);

but it leads also to "the conclusion of the whole matter," to that to which all trains of thought and all the experiences of life had been leading the seeker after wisdom, that "to fear God and keep his commandments" was the highest good attainable; that the righteous judgment of God would in the end fulfil itself and set right all the seeming disorders of the world (xii. 13, 14).

If one were to indulge conjecture, there would perhaps be some plausibility in the hypothesis that xii. 8 had been the original conclusion, and that the epilogue of xii. 9-14 had been added, either by another writer, or by the same writer on a subsequent revision. The verses (9-12) have the character of a panegyric designed to give weight to the authority of the teacher. The two that now stand as the conclusion, may naturally have originated in the desire to furnish a clue to the perplexities of the book, by stating in a broad intelligible form, not easy to be mistaken, the truth which had before been latent.

If the representation which has been given of the plan and meaning of the book be at all a true one, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. In its sharp sayings and wise counsels, it may present some striking affinity to the Proverbs, which also bear the name of the son of David, but the resemblance is more in form than in substance, and in its essential character it agrees with that great inquiry into the mysteries of God's government which the drama of Job brings before us. There are indeed characteristic differences. In the one we find the highest and boldest forms of Hebrew poetry, a sustained unity of design; in the other there are, as we have seen, changes and oscillations, and the style seldom rises above the rhythmic character of proverbial forms of speech. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous and writes as one who has known those sufferings in their intensity. In the words of the Preacher, we trace chiefly the weariness or satiety of the pleasure-seeker, and the failure of all schemes of life but one. In spite of these differences however the two books illustrate each other. In both, though by very diverse paths, the inquirer is led to take refuge (as all great thinkers have ever done) in the thought that God's kingdom is infinitely great, and that man knows but the smallest fragment of it; that he must refrain from things which are too high for him and be content with that which it is given him to know, the duties of his own life and the opportunities it presents for his doing the will of God.

*Literature.*—Every Commentary on the Bible as a whole; every introduction to the study of the O. T. contains of course some materials for the history and interpretation of this as of other books. It is not intended to notice these, unless they possess some special merit or interest. As having that claim may be specified the commentary by Jerome addressed to Paula and Eustochium, as giving an example of the Patristic interpretation of the book now before us; the preface and annotations of Grotius (*Opp.* vol. iii.) as representing the earlier, the translation and notes of Ewald (*Poet. Bibl.* vol. iv.) as giving the later results of philosophical criticism. The *Critici Sacri* here, as elsewhere, will be found a great storehouse of

the opinions of the Biblical scholars of the 16th and 17th centuries. The sections on Ecclesiastes in the Introductions to the O. T. by Eichhorn, De Wette, Jahn, Hävernick, Keil, Davidson, will furnish the reader with the opinions of the chief recent critics of Germany as to the authorship and meaning of the book. Among the treatises specially devoted to this subject may be mentioned the characteristic Commentary by Luther already referred to (*Opp.* vol. ii. Jena, 1590), that by Anton. Corranus in the 16th century, interesting as one of the earliest attempts to trace a distinct plan and order in it, and as having been adopted by Bishop Patrick as the basis of his interpretation, the Annotations in Koheleth by J. Drusius, 1635, the Translation and Notes of Moses Mendelssohn published in German by Rabe (Anspach, 1771), the Philosophical and Critical Essay on Ecclesiastes by Des Voeux (Lond. 1760), written chiefly to meet the attacks of sceptics, and to assert that the doctrine of the book is that of the immortality of the Soul, the Scholia of Maldonatus, better known for his Commentary on the Gospels (Paris, 1767), the commentaries of Knobel (Leipzig, 1836), Zirkel (Wurz, 1792), Schmidt, J. E. (Ch. (1794), Nachtigal, J. Ch. (Halle, 1793), van der Palm (1784), Kaiser (Erlang. 1823), Koster (1831), Umbreit (Gotha, 1818), and the article by Vaihinger, in the *Stud. and Crit.* of 1848. English Biblical literature is comparatively barren in relation to this book, and the only noticeable recent contributions to its exegesis are the Commentary by Stuart, the translation of Mendelssohn with Prolegomena, &c., by Preston (Cambridge, 1853), and the "Attempt to Illustrate the Book of Ecclesiastes" by Holden. As growing out of the attempt to fathom its meaning, though not taking the form of criticism or exegesis, may be mentioned the metrical paraphrases which are found among the works of the minor English poets of the 17th century, of which the most memorable are those by Quarles (1645) and Sandys (1648).

[E. H. P.]

**ECCLESIASTICUS**, the title given in the Latin Version to the book which is called in the Septuagint **THE WISDOM OF JESUS THE SON OF SIRACH** (*Σοφία Ἰησοῦ υἱοῦ Σιράχ*, A.C.; *Σοφία Σιράχ*, B. Rufinus Vers. Orig. *Hom. in Num.* xvii. 3. In libro, qui apud nos quidem inter Salomonis volumina haberi solet, et *Ecclesiasticus* dici, apud Græcos vero *Sapientia Jesu filii Sirach* appellatur scriptum est . . .). The word, like many others of Greek origin, appears to have been adopted in the African dialect (e. g. Tertull. *de judic.* c. 22, p. 435), and thus it may have been applied naturally in the *Vetus Latina* to a church reading-book; and when that translation was adopted by Jerome (*Praef. in Libro Sal. fuxti LXX.* x. p. 404, ed. Migne), the local title became current throughout the West, where the book was most used. The right explanation of the word is given by Rufinus, who remarks that "it does not designate the author of the book, but the character of the writing," as publicly used in the services of the Church (*Comm. in Synb.* §38. *Sapientia, quae dicitur filii Sirach . . . apud Latinos hoc ipso generali vocabulo Ecclesiasticus appellatur, quo vocabulo non auctor libelli sed scripturae qualitas cognominata est*). The special application by Rufinus of the general name of the class (*ecclesiastici* as opposed to *canonici*) to the single book may be explained by its wide popularity. Athanasius, for instance, mentions the book (*Ep. Fest. s. f.*) as

one of those "framed by the fathers to be read by those who wish to be instructed (*κατηχίσθαι*) in the world of godliness." According to Jerome (*Praef. in Libr. Sol.* ix. 1242) the original Hebrew title was *Proverbs* (משלים, cf. inf. §9); and the Wisdom of Sirach share! with the canonical book of Proverbs and the Wisdom of Solomon the title of *The book of all virtues* (ἡ πανόρητος σοφία, ἡ πανόρητος. Hieron. l. c. Cf. Routh, *Rel. Sacr.* i. p. 278). In the Syriac version the book is entitled *The book of Jesus the son of Simoon Asiro* (i. e. the bound); and the same book is called the *wisdom of the Son of Asiro*. In many places it is simply styled *Wisdom* (Orig. in *Matt.* xiii. §4; cf. Clem. Al. *Paed.* i. 8, §§69, 72, &c.), and *Jesus Sirach* (August. ad *Simplic.* i. 20).

2. The writer of the present book describes himself as *Jesus* (i. e. Jeshua) the son of *Sirach*, of *Jerusalem* (c. l. 27), but the conjectures which have been made to fill up this short notice are either unwarranted (e. g. that he was a physician from xxxviii. 1-15) or absolutely improbable. There is no evidence to show that he was of priestly descent; and the similarity of names is scarcely a plausible excuse for confounding him with the Hellenizing high-priest Jason (2 Macc. iv. 7-11; Georg. Sync. *Chronogr.* 276). In the Talmud the name of Ben Sira (בן סירא) for which בן סירא is a late error, Jost, *Gesch. d. Judenth.* 311) occurs in several places as the author of proverbial sayings which in part are parallel to sentences in Ecclesiasticus (cf. §4), but nothing is said as to his date or person [JESUS THE SON OF SIRACH], and the tradition which ascribes the authorship of the book to Eliezer (B.C. 260) is without any adequate foundation (Jost, a. a. O.; yet see note 1). The Palestinian origin of the author is, however, substantiated by internal evidence, e. g. xxiv. 10 f.

3. The language in which the book was originally composed was Hebrew (Ἑβραϊστὶ; this may mean, however, the vernacular Aramaean dialect, John v. 2, xix. 13, &c.). This is the express statement of the Greek translator, and Jerome says (*Praef. in Libr. Sol.* l. c.) that he had met with the "Hebrew" text; nor is there any reason to doubt that he saw the book in its original form. The internal character of the present book bears witness to its foreign source. Not only is the style Hebraistic in general form (cf. Lowth, *de sacra Poesi*, xxiv.) and idiom (e. g. θεμέλιον αἰῶνος, i. 15; κτίσμα αἰῶνος, xxxviii. 34; ἀπὸ προσώπου λόγου, xix. 11; cf. Eichhorn, *Eintl. in d. Apok.* 57) as distinguished from the Greek of the Introduction, but in several instances it is possible to point out mistakes and allusions which are cleared up by the reconstruction of the Hebrew phrases: e. g. xxiv. 25-27, ὡς φῶς, i. e. כְּנֹר for כְּמִנְיָ, as Am. viii. 8, xliii. 8; יָרֵךְ,

מִן, יָרֵךְ, σελήνη (cf. Eichhorn, l. c.; Ewald, *Gesch. d. Volkes Isr.* iv. 299 n.).

4. Nothing however remains of the original proverbs of Ben Sira except the few fragments in pure Hebrew (Jost, *Gesch. d. Judenth.* 311 n.) which occur in the Talmud and later, Rabbinic writers; and even these may have been derived from tradition and not from any written collection.<sup>a</sup> The Greek translation incorporated in the LXX., which is probably the source from which the other translations were derived, was made by the grandson of the author in Egypt "in the reign of Euergetes,"<sup>c</sup> for the instruction of those "in a strange country (ἐν παροικίᾳ) who were previously prepared to live after the law." The date which is thus given is unfortunately ambiguous. Two kings of Egypt bore the surname Euergetes. Ptol. III., the son and successor of Ptol. II. Philadelphus, B.C. 247-222; and Ptol. VII. Physcon, the brother of Ptol. VI. Philometor, B.C. 170-117. And the noble eulogy on "Simon the son of Onias, the high-priest," who is described as the last of the great worthies of Israel (c. l.), and apparently removed only by a short interval from the times of the author is affected by a similar ambiguity, so that it cannot be used absolutely to fix the reign in which the translation was made. Simon I., the son of Onias, known by the title of the *Just*, was high-priest about 310-290 B.C., and Simon II., also the son of Onias, held the same office at the time when Ptol. IV. Philopator endeavoured to force an entrance into the Temple, B.C. 217 (3 Macc. i. 2). Some have consequently supposed that the reference is to Simon the Just, and that the grandson of Ben Sirach, who is supposed to have been his younger contemporary, lived in the reign of Ptolemy III. (Jahn, Vaihinger in Herzog's *Encycl.* s. v.); others again have applied the eulogy to Simon II., and fixed the translation in the time of Ptolemy VII. (Eichhorn, *Eintl.* 38). But both suppositions are attended with serious difficulties. The description of Simon can scarcely apply to one so little distinguished as the second high-priest of the name, while the first, a man of representative dignity, is passed over without notice in the list of the benefactors of his nation. And on the other hand the manner in which the translator speaks of the Alexandrine version of the Old Testament, and the familiarity which he shows with its language (e. g. xlv. 10, Ἐνὸς μετετέθη, Gen. v. 24; cf. Lindé, ap. Eichhorn, p. 41-2) is scarcely consistent with a date so early as the middle of the third century. From these considerations it appears best to combine the two views. The grandson of the author was already past middle-age when he came to Egypt, and if his visit took place early in the reign of Ptolemy Physcon,

xxv. 2; xxvi. 1; xxx. 23; xxxviii. 1, 4, 8; xlii. 9 f.

<sup>a</sup> Sirac. *Prolog.* ἐν γὰρ τῇ ὑπόθεσιν καὶ τριακίστῳ ἔτει ἐπὶ τοῦ Εὐεργέτου βασιλέως, παραγενέσθεις εἰς Αἴγυπτον. . . . It is strange that any doubt should have been raised about the meaning of the words, which can only be, that the translator "in his thirty-eighth year came to Egypt during the reign of Euergetes;" though it is impossible now to give any explanation of the specification of his age. The translation of Eichhorn (l. c. 40), and several others, "in the thirty-eighth year of the reign of Euergetes," is absolutely at variance with the grammatical structure of the sentence.

<sup>a</sup> The reading of Cod. A. and six other MSS. is remarkable: Ἰησοῦ υἱοῦ Σιράχ Ἑλεάζαρ (2 MSS. Ἑλεάζαρος; Ald. 1 MS. Ἑλεάζαρος) ὁ Ἰσραὴλ. Cf. Eichh. p. 68, n. The words are wanting in the Syriac and Arabic, but are supported by all other authorities.

<sup>b</sup> The "Alphabet," or "Book of Ben Sira," which exists at present, is a later compilation (Zunz, *Gottesd. Vortr. d. Juden.* 100-105) of proverbs in Hebrew and Chaldean, containing some genuine fragments, among much that is worthless (Dukes, *Rabbinische Blumenlese*, pp. 31 ff.). Ben Sira is called in the preface the son of Jeremiah. The sayings are collected by Dukes, l. c. pp. 67 ff. They offer parallels to Koelus. iii. 21; vi. 8; ix. 8 ff.; xi. 1; xlii. 15;

it is quite possible that the book itself was written while the name and person of the last of "the men of the great synagogue" was still familiar to his countrymen." Even if the date of the book be brought somewhat lower, the importance of the position which Simon the Just occupied in the history of the Jews would be a sufficient explanation of the distinctness of his portraiture; and the political and social troubles to which the book alludes (li. 6, 12, xxvi. ff.) seem to point to the disorders which marked the transference of Jewish allegiance from Egypt to Syria rather than to the period of prosperous tranquillity which was enjoyed during the supremacy of the earlier Ptolemies (c. B.C. 200).

5. The name of the Greek translator is unknown. He is commonly supposed to have borne the same name as his grandfather, but this tradition rests only on conjecture or misunderstanding (Jerome, l. c. *inf.* §7, *Synops. S. Script.* printed as a Prologue in the Compl. ed. and in A. V.).

6. It is a more important fact that the book itself appears to recognise the incorporation of earlier collections into its text, Jesus the son of Sirach, while he claims for himself the writing of the book (*ἐξδραξα*), characterises his father as one "who poured forth a shower of wisdom (*ἀνέβη βροχὴ σοφίας*) from his heart;" and the title of the book in the Vatican MS. and in many others may be more than a familiar abbreviation (*σοφία Σεράχ*). Yet Cod. C has *πρόλογος Σεράχ* combined with the usual heading, *Σοφ. Ἰησοῦ υ. Σ.* From the very nature of his work the author was like "a gleaner after the grape-gatherers" (xxxiii. 16), and Bretschneider has endeavoured to show (pp. 28 ff.) from internal discrepancies of thought and doctrine that he made use of several smaller collections, differing widely in their character, though all were purely Hebrew in their origin.

7. The Syriac and Old Latin versions, which latter Jerome adopted without alteration (*Praef. in Libr. Sal. furti LXX.* l. c. . . . in Ecclesiastico, quem esse Jesu filii Sirach, nullus ignorat, calamo temperavi, tantummodo Canonicae scripturas emendare desiderans . . .), differ considerably from the present Greek text, and it is uncertain whether they were derived from some other Greek recension (Eichhorn, p. 84) or from the Hebrew original (Bertholdt, §304 ff.). The language of the Latin version presents great peculiarities. Even in the first two chapters the following words occur which are found in no other part of the Vulgate: *defunctio* (i. 13), *religiosisus* (i. 17, 18, 26), *compartior* (i. 24), *inhonoratio* (i. 38), *obductio* (ii. 2, v. 1, 10), *receptibilibs* (ii. 5). The Arabic version is directly derived from the Syriac (Bretschn. p. 702 f.).

8. The existing Greek MSS. present great discrepancies in order, and numerous interpolations. The arrangement of cc. xxx. 25—xxxvi. 17, in the Vatican and Complutensian editions is very different. The English version follows the latter, which is supported by the Latin and Syriac versions against the authority of the Uncial MSS. The extent of the variation is seen in the following table:

<sup>a</sup> If indeed the inscription in B. "The Wisdom of Sirach" (so also *Epiph. Haer.* viii. ἡ σοφία τοῦ Σεράχ), as distinguished from the prayer in c. li. (Ἰησοῦ υ. Σ.) is based upon any historic tradition, another generation will be added to carry us back to the first elements of the book. See §6.

*Ed. Compl. Lat. Syr. E. V.*

xxxli. . . . .  
xxxlii. 16, 17, ἡ γρίπτησα . . .  
xxxlii. 10 ff. ὡς καλεῖται . . .  
xxxiv. . . . .  
xxxvi. 1-11, φιλὰς Ἰακώβ . . .  
xxxvi. 12 ff. καὶ κατεκλήρο-  
νόμενα.

*Ed. Vat. A. B. C.*  
xxxiii. 13, λαμπρὰ καρδία,  
ε. τ. λ.  
xxxiv. . . . .  
xxxvi. 1-16.  
xxx. 25 ff.  
xxxli. . . . .  
xxxiii. 1-12.  
xxxvi. 17 ff.

The most important interpolations are: i. 5, 7, 18b, 21; ii. 25; iv. 23b; vii. 26b; x. 21; xii. 6c; xiii. 25b; xvi. 15, 16, 22c; xvii. 5, 9, 16, 17a, 18, 21, 23c, 26b; xviii. 2b, 3, 27c, 33c; xix. 5b, 6a, 13b, 14a, 18, 19, 21, 25c; xx. 3, 14b, 17b, 32; xlii. 9, 10, 23c; xlii. 3c, 4c, 5b, 28; xxiv. 18, 24; xiv. 12, 26c; xvi. 19-27; i. 29b. All these passages, which occur in the A. V. and the Compl. texts, are wanting in the best MSS. The edition of the Syro-Hexaplaric MS. at Milan, which is at present reported to be in preparation (1858), will probably contribute much to the establishment of a sounder text.

9. It is impossible to make any satisfactory plan of the book in its present shape. The latter part, c. xlii. 15—l. 21, is distinguished from all that precedes in style and subject; and "the praise of noble men" (*πατέρων ὕμνος*) seems to form a complete whole in itself (ch. xlii.—l. 24). The words of Jerome, *Praef. in Libr. Salom.* (Quorum priorem [*παιδερων* Jesu filii Sirach librum] Ibraicum reperi, non *Ecclesiasticum* ut apud Latinos, sed *Parabolas* prae notatum, cui juncti erant *Ecclesiastes* et Canticum Canticorum, ut similitudinem Salomonis non solum librorum numero, sed etiam materiarum generis coaequaret), which do not appear to have received any notice, imply that the original text presented a triple character answering to the three works of Solomon, the Proverbs, Ecclesiastes, and Canticles; and it is, perhaps, possible to trace the prevalence of the different types of maxim, reflection, and song in successive parts of the present book. In the central portion of the book (xviii. 29, *ἐγκράτεια ψυχῆς*, xxxii. (xxxv.) *περὶ ἡγωνιζόμενων*) several headings are introduced in the oldest MSS., and similar titles preface c. xlii. (*πατέρων ὕμνος*) and c. li. (*προσευχὴ Ἰησοῦ υἱοῦ Σεράχ*). These sections may have contributed to the disarrangement of the text, but they do not offer any sufficient clue to its true subdivisions. Eichhorn supposed that the book was made up of three distinct collections which were afterwards united: i.—xxiii.; xxiv.—xlii. 14; xlii. 15—l. 24 (*Enl.* 50 ff.). Bretschneider sets aside this hypothesis, and at the same time one which he had formerly been inclined to adopt that the recurrence of the same ideas in xxiv. 32 ff.; xxxii. 10, 17 (xxx.); l. 27, mark the conclusion of three parts. The last five verses of c. l. (l. 25-29) form a natural conclusion to the book; and the prayer, which forms the last chapter (li.), is wanting in two MSS. Some have supposed that it was the work of the translator; but it is more probable that he found it attached to the larger work, though it may not have been designed originally for the place which it occupies.

10. The earliest clear coincidence with the contents of the book occurs in the epistle of Barnabas (c. xix.—Ecdus. iv. 31; cf. *Const. Apost.* vii. 11), but in this case the parallelism consists in the thought and not in the words, and there is no mark of quotation. The parallels which have been discovered in the New Testament are too general

to show that they were derived from the written text, and not from popular language; and the same remark applies to the other alleged coincidences with the Apostolic fathers (e. g. *Ecclesi.* v. 13 = James i. 19; xi. 18, 19 = Luke xii. 19). There is no sign of the use of the book in Justin Martyr, which is the more remarkable as it offers several thoughts congenial to his style. The first distinct quotations occur in Clement of Alexandria; but from the end of the second century the book was much used and cited with respect, and in the same terms as the canonical Scriptures; and its authorship was often assigned to Solomon from the similarity which it presented to his writings (August. *De Cura pro Mort.* 18). Clement speaks of it continually as *Scripture* (*Paed.* i. 8 §62; ii. 2 §34; 5 §46; 8 §69, &c.), as the work of Solomon (*Strom.* ii. 5 §24), and as the voice of the great Master (παύλαργός, *Paed.* ii. 10 §98). Origen cites passages with the same formula as the canonical books (γέγραπται, *In Johann.* xxxii. §14; *In Matt.* xvi. §8), as *Scripture* (*Comm. in Matt.* §44; *In Ep. ad Rom.* ix. §17, &c.), and as the utterance of "the divine word" (*c. Cel.* viii. 50). The other writers of the Alexandrine school follow the same practice. Dionysius calls its words "divine oracles" (*Frug. de Nat.* iii. p. 1258 ed. Migne), and Peter Martyr quotes it as the work of "the Preacher" (*Frug.* i. §5, p. 515, ed. Migne). The passage quoted from Tertullian (*de rescript. cust.* 2, sicut scriptum est: ecce posui ante te bonum et malum; gustasti enim de arbore agnitionis . . . cf. *Ecclesi.* xv. 17, Vulg.) is not absolutely conclusive; but Cyprinus constantly brings forward passages from the book as *Scripture* (*de bono pat.* 17; *de mortalitate*, 9, §13) and as the work of Solomon (*Ep.* lxx. 2). The testimony of Augustine sums up briefly the result which follows from these isolated authorities. He quotes the book constantly himself as the work of a prophet (*Serm.* xxxix. 1), the word of God (*Serm.* lxxxvii. 11), "*Scripture*" (*Lib. de Nat.* 3), and that even in controversy (*c. Jul. Pely.* v. 36), but he expressly notices that it was not in the Hebrew Canon (*De Cura pro Mort.* 18) "though the Church, especially of the West, had received it into authority" (*De Cinit.* xvii. 20, cf. *Speculum*, iii. 1127, ed. Paris). Jerome, in like manner (*l. c.* §7), contrasts the book with "the canonical Scriptures" as "doubtful," while they are "sure;" and in another place (*Prolog. Galeat.*) he says that it "is not in the Canon," and again (*Prolog. in Libr. Sol.*) that it should be read "for the instruction of the people (plebs), not to support the authority of ecclesiastical doctrines." The book is not quoted by Irenaeus, Hippolytus, or Eusebius; and is not contained in the Canon of Melito, Origen, Cyril, Laodicea, Hilary, or Rufinus. [CANON.] It was never included by the Jews among their Scriptures; for though it is quoted in the Talmud, and at times like the Kethubim, the study of it was forbidden, and it was classed among "the outer books" (ספרים חצונים), that is probably, those which were not admitted into the Canon (Dukes, *Rabb. Blumenlese*, 24, 5).

11. But while the book is destitute of the highest canonical authority, it is a most important monument of the religious state of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; for there is no sufficient reason for assuming Alexandrine interpolations or direct Alexandrine influence (Gfrörer,

*Philo*, ii. 18 ff.). The translator may, perhaps, have given an Alexandrine colouring to the doctrine, but its great outlines are unchanged (cf. Dachne, *Relig. Philos.* ii. 129 ff.). The conception of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but at the same time His mercy is extended to all mankind (xviii. 11-13). Little stress is laid upon the spirit-world, either good (xlviii. 21; xlv. 2; xxix. 28 ?) or evil (xii. 27 ?); and the doctrine of a resurrection fades away (xiv. 16; xvii. 27, 28; xlv. 14, 15. Yet cf. xlviii. 11). In addition to the general hope of restoration (xxxvi. 1, &c.), one trait only of a Messianic faith is preserved in which the writer contemplates the future work of Elias (xlviii. 10). The ethical precepts are addressed to the middle class (Eichhorn, *Einh.* 44 ff.). The praise of agriculture (vii. 15) and medicine (xxxviii. 1 ff.), and the constant exhortations to cheerfulness, seem to speak of a time when men's thoughts were turned inwards with feelings of dependency and perhaps (Dukes, *l. c.* 27 ff.) of fatalism. At least the book marks the growth of that anxious legalism which was conspicuous in the sayings of the later doctors. Life is already imprisoned in rules: religion is degenerating into ritualism: knowledge has taken refuge in schools (cf. Ewald, *Gesch. d. Volkes Isr.* iv. 298 ff.).

12. Numerous commentaries on Ecclesiasticus appeared in the 16th and 17th centuries (cf. Bretschneider, *Lib. Sirac.* Pref. x. note, for a list of these, of which the most important were those of Camerarius (*Lipsiae*, 1570, 8vo.), Corn. a Lapide (*Antverpiae*, 1687, &c., fol.), and Drusius (*Franckerae*, 1596, 4to); but nothing more was done for the criticism of the book till the editions of Linde (a German translation and notes, *Lipsiae*, 1785, 1795, 8vo., followed by a Greek text, *Gedani*, 1795, 8vo.). Linde's labours left much to be supplied, and in 1806 Bretschneider published his edition, which still remains the most complete (*Liber Jesse Siracidae Graece ad fidem Codd. et verss. emend. et perpet. comm. illustratus a Car. Gottl. Bretschneider . . . Rotobonae*, MDCCCVI.); but this will probably be superseded by the promised (1858) Commentary of Fritzsche in the *Kurzge. Handbuch*, for both in style and scholarship it labours under serious defects. [B. F. W.]

**ECLIPSE OF THE SUN.** No historical notice of an eclipse occurs in the Bible, but there are passages in the prophets which contain manifest allusion to this phenomenon. They describe it in the following terms:—"The sun goes down at noon," "the earth is darkened in the clear day" (*Am.* viii. 9), "the day shall be dark" (*Mic.* iii. 6), "the light shall not be clear nor dark" (*Zech.* xiv. 6), "the sun shall be dark" (*Joel* ii. 10, 31, iii. 15). Some of these notices probably refer to eclipses that occurred about the time of the respective compositions: thus the date of Amos coincides with a total eclipse, which occurred Feb. 9, B.C. 784, and was visible at Jerusalem shortly after noon (Hitzig, *Comm.* in Proph.); that of Micah with the eclipse of June 5, B.C. 716, referred to by Dionys. Hal. ii. 56, to which same period the latter part of the book of Zechariah may be probably assigned. A passing notice in Jer. xv. 9 coincides in date with the eclipse of Sept. 30, B.C. 610, so well known from Herodotus' account (i. 74. 103). The darkness that overspread the world at the crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the

Passover. [DARKNESS.] The awe which is naturally inspired by an eclipse in the minds of those who are unacquainted with the cause of it, rendered it a token of impending judgment in the Prophetic books. [W. L. B.]

ED. *i. e.* "witness," a word inserted in the Auth. Vers. of Josh. xxii. 34, apparently on the authority of a few MSS., and also of the Syriac and Arabic Versions, but not existing in the generally-received Hebrew Text. The passage is literally as follows: "And the children of Reuben and the children of Gad named (LXX. *ἐπωμαδεν*) the altar: because that is a witness (Ed) between us that Jehovah is God." The rendering of the LXX, though in some respects differing materially from the present text, shows plainly that at that time the word Ed stood in the Hebrew in its present place. The word עֵד, to call or proclaim, has not invariably (though generally) a transitive force, but is also occasionally an intransitive verb. (For a further investigation of this passage, see Keil, *Joshua*, *ad loc.*) [G.]

EDAR, TOWER OF (accus. EDEN, מִנְרָה; עֵדֶר; Vat. omits; Alex. *πύργος Γαδέρ*; *Turris Eder*), a place named only in Gen. xxv. 21. Jacob's first halting-place between Bethlehem and Hebron was "beyond (מִנְרָה) the tower Eder." According to Jerome (*Onomasticon*, Bethlehem) it was 1000 paces from Bethlehem. The name signifies a "flock" or "drove," and is quite in keeping with the pastoral habits of the district. Jerome sees in it a prophecy of the announcement of the birth of Christ to the shepherds; and there seems to have been a Jewish tradition that the Messiah was to be born there (Targum Ps. Jon.). [G.]

EDDI'AS (I'e'dias; Alex. *I'eddi'as*; *Geddias*), 1 Esdr. ix. 26. [J. J. Z. H.]

E'DEN (עֵדֶן; E'dém), the first residence of man. It would be difficult, in the whole history of opinion, to find any subject which has so invited, and at the same time so completely baffled, conjecture, as the Garden of Eden. The three continents of the old world have been subjected to the most rigorous search; from China to the Canary Isles, from the Mountains of the Moon to the coasts of the Baltic, no locality which in the slightest degree corresponded to the description of the first abode of the human race has been left unexamined. The great rivers of Europe, Asia, and Africa, have in turn done service as the Pison and Gihon of Scripture, and there remains nothing but the New World wherein the next adventurous theorist may bewilder himself in the mazes of this most difficult question.

In order more clearly to understand the merit of the several conjectures, it will be necessary to submit to a careful examination the historic narrative on which they are founded. Omitting those portions of the text of Gen. ii. 8-14 which do not bear upon the geographical position of Eden, the description is as follows:—"And the Lord God planted a garden in Eden eastward. . . . And a river goeth forth from Eden to water the garden; and from thence it is divided and becomes four heads (or arms). The name of the first is Pison: that is it which compasseth the whole land of Havilah, where is the gold. And the gold of that land is good; there is the bdellium and the onyx stone. And the name of the second river is Gihon; that is

it which compasseth the whole land of Cush. And the name of the third river is Hiddekel; that is it which floweth before Assyria. And the fourth river, that is Euphrates." In the eastern portion then of the region of Eden was the garden planted. The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved then is this:—To find a river which, at some stage of its course, is divided into four streams, two of which are the Tigris and Euphrates. The identity of these rivers with the Hiddekel and P'ith has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories which have been framed with regard to the situation of the terrestrial paradise naturally divide themselves into two classes. The first class includes all those which place the garden of Eden below the junction of the Euphrates and Tigris, and interpret the names Pison and Gihon of certain portions of these rivers: the second, those which seek for it in the high table-land of Armenia, the fruitful parent of many noble streams. These theories have been supported by most learned men of all nations, of all ages, and representing every shade of theological belief; but there is not one which is not based in some degree upon a forced interpretation of the words of the narrative. Those who contend that the united stream of the Euphrates and Tigris is the "river" which "goeth forth from Eden to water the garden," have committed a fatal error in neglecting the true meaning of נָחַל, which is only used of the course of a river from its source *downwards* (cf. Ex. xlvii. 1). Following the guidance which this word supplies, the description in ver. 10 must be explained in this manner: the river takes its rise in Eden, flows into the garden, and from thence is divided into four branches, the separation taking place either in the garden or after leaving it. If this be the case, the Tigris and Euphrates before junction cannot, in this position of the garden, be two of the four branches in question. But, though they have avoided this error, the theorists of the second class have been driven into a Charybdis not less destructive. Looking for the true site of Eden in the highlands of Armenia, near the sources of the Tigris and Euphrates, and applying the names Pison and Gihon to some one or other of the rivers which spring from the same region, they have been compelled to explain away the meaning of נָחַל, the "river," and to give to נְאֻשִׁים a sense which is not supported by a single passage. In no instance is נְאֻשִׁי (lit. "head") applied to the source of a river. On several occasions (cf. Judg. vii. 16; Job i. 17, &c.) it is used of the detachments into which the main body of an army is divided, and analogy therefore leads to the conclusion that נְאֻשִׁים denotes the "branches" of the parent stream. There are other difficulties in the details of the several theories, which may be obstacles to their entire reception, but it is manifest that no theory which fails to satisfy the above-mentioned conditions can be allowed to take its place among things that are probable.

The old versions supply us with little or no assistance. The translators appear to have halted between a mystical and literal interpretation. The word עֵדֶן is rendered by the LXX. as a proper name in three passages only, Gen. ii. 8, 10, iv. 16, where it is represented by E'dém. In all others,

with the exception of Is. li. 3, it is translated *ἡδονή*. In the Vulgate it never occurs as a proper name, but is rendered "*voluptas*," "*locus voluptatis*," or "*deliciae*." The Targum of Onkelos gives it uniformly *עֵדֶן*, and in the Peshito Syriac it is the same, with the slight variation in two passages of *עֵדֶן* for *עֵדֶן*.

It would be a hopeless task to attempt to chronicle the opinions of all the commentators upon this question: their name is legion. Philo (*de Mundi Opif.* §54) is the first who ventured upon an allegorical interpretation. He conceived that by paradise is darkly shadowed forth the governing faculty of the soul; that the tree of life signifies religion, whereby the soul is immortalised; and by the faculty of knowing good and evil the middle sense, by which are discerned things contrary to nature. In another passage (*de Plantat.* §9) he explains Eden, which signifies "pleasure," as a symbol of the soul, that sees what is right, exults in virtue, and prefers one enjoyment, the worship of the only wise, to myriads of men's chief delights. And again (*Leyis Allegor.* i. §14) he says, "now virtue is tropically called paradise, and the site of paradise is Eden, that is, pleasure." The four rivers he explains (§19) of the several virtues of prudence, temperance, courage, and justice; while the main stream of which they are branches is the generic virtue, goodness, which goeth forth from Eden, the wisdom of God. The opinions of Philo would not be so much worthy of consideration, were it not that he has been followed by many of the Fathers. Origen, according to Luther (*Comm. in Gen.*), imagined paradise to be heaven, the trees angels, and the rivers wisdom. Papus, Irenaeus, Pantæus, and Clements Alexandrinus have all favoured the mystical interpretation (Huet. *Origéniana*, ii. 167). Ambrosius followed the example of Origen, and placed the terrestrial paradise in the third heaven, in consequence of the expression of St. Paul (2 Cor. xii. 2, 4); but elsewhere he distinguishes between the terrestrial paradise and that to which the apostle was caught up (*De Parad.* c. 8). In another passage (*Ep. ad Sabinum*) all this is explained as allegory. Among the Hebrew traditions enumerated by Jerome (*Trad. Hebr. in Gen.*) is one that paradise was created before the world was formed, and is therefore beyond its limits. Moses Bar Cepha (*De Parad.*) assigns it a middle place between the earth and the firmament. Some affirm that paradise was on a mountain, which reached nearly to the moon; while others, struck by the manifest absurdity of such an opinion, held that it was situated in the third region of the air, and was higher than all the mountains of the earth by twenty cubits, so that the waters of the flood could not reach it. Others again have thought that paradise was twofold, one corporeal and the other incorporeal: others that it was formerly on earth, but had been taken away by the judgment of God (Hopkinson, *Descr. Parad.* in *Ugol. Thes.* vii.). Among the opinions enumerated by Morinus (*Diss. de Parad. Terrest.* *Ugol. Thes.* vii.) is one, that, before the fall, the whole earth was paradise, and was really situated in Eden, in the midst of all kinds of delights. Ephraem Syrus (*Comm. in Gen.*) expresses himself doubtfully upon this point. Whether the trees of paradise, being spiritual, drank of spiritual water, he does not undertake to decide; but he seems to be of opinion that the four rivers have lost their original virtue in consequence of the

curse pronounced upon the earth for Adam's transgression.

Conjectures with regard to the dimensions of the garden have differed as widely as those which assign its locality. Ephraem Syrus maintained that it surrounded the whole earth, while Johannes Tostatus restricted it to a circumference of thirty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia. (Hopkinson, as above.) But of speculations like these there is no end.

What is the river which goes forth from Eden to water the garden? is a question which has been often asked, and still waits for a satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus (*Ant.* i. 1, §3) and Johannes Damascenus (*De Orthod. Fid.* ii. 9). It was the *Shut-el-Arab*, according to those who place the garden of Eden below the junction of the Tigris and Euphrates, and their conjecture would deserve consideration were it not that this stream cannot, with any degree of propriety, be said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of *נָהָר* (*nâhâr*) is wholly without a parallel; and even if it could, under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in ver. 10, it must be the same as that which it has in the following verses, in which it is sufficiently definite. Sickler (*Augusti, Theol. Monatschrift.* i. 1, quoted by Winer), supposing the whole narrative to be a myth, solves the difficulty by attributing to its author a large measure of ignorance. The "river" was the Caspian Sea, which in his apprehension was an immense stream from the east. Bertheau, applying the geographical knowledge of the ancients as a test of that of the Hebrews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the Israelites (Knobel, *Genesis*). But he allows the four rivers of Eden to have been real rivers, and not, as Sickler imagined, oceans which bounded the earth east and west of the Nile.

That the *Hiddekel*\* is the Tigris, and the *Phnath* the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adapted by the Hebrews to their own geographical notions. As the former is the name of the great river by which Daniel sat (*1 Dan.* x. 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems no reason to suppose that the appellations in Gen. ii. 14 are to be understood in any other than the ordinary sense. One circumstance in the description is worthy of observation. Of the four rivers, one, the Euphrates, is mentioned by name only, as if that were sufficient to identify it. The other three are defined according to their geographical positions, and it is fair to conclude that they were therefore rivers

\* This name is said to be still in use among the tribes who live upon its banks (*Col. Chesney, Exp. to Tigris and Euphrates*, i. 13).

with which the Hebrews were less intimately acquainted. If this be the case, it is scarcely possible to imagine that the Gihon, or, as some say, the Pison, is the Nile, for that must have been even more familiar to the Israelites than the Euphrates, and have stood as little in need of a definition.

With regard to the Pison, the most ancient and most universally received opinion identifies it with the Ganges. Josephus (*Ant.* i. 1 §3), Eusebius (*Onomast.* s. v.), Ambrosius (*de Parad.* c. 3), Epiphanius (*Ancor.* c. 58), Ephr. Syr. (*Op. Syr.* i. 23), Jerome (*Ep.* 4 *ad Rust.* and *Quest. Heb. in Gen.*), and Augustine (*de Gen. ad lit.* viii. 7) held this. But Jarchi (*on Gen.* ii. 11), Saadiah Gaon, R. Moses ben Nachman, and Abr. Peritso (Ugol. *Thes.* vii.), maintained that the Pison was the Nile. The first of these writers derives the word from a root which signifies "to increase," "to overflow" (cf. *Hab.* i. 8), but at the same time quotes an etymology given in *Beresith rabbu*, §16, in which it is asserted that the river is called Pison "because it makes the flux (פִּשְׁוֹן) to grow." Josephus explains it by *παλθός*, Scaliger by *παλμυρα*. The theory that the Pison is the Ganges is thought to receive some confirmation from the author of the book of Ecclesiasticus, who mentions (xxiv. 25, 27) in order the Pison, the Tigris, the Euphrates, Jordan, and Gihon, and is supposed to have commenced his enumerations in the east and to have terminated it in the west. That the Pison was the Indus was an opinion current long before it was revived by Ewald (*Gesch. d. Volk. Isr.* i. 331, note 2) and adopted by Kalisch (*Genesis*, p. 96). Philostorgius, quoted by Huet (*Ugolin.* vol. vii.), conjectured that it was the Hydaspes; and Willford (*As. Res.* vol. vi.), following the Hindoo tradition with regard to the origin of mankind, discovers the Pison in the Landi-Sindh, the Ganges of the Hindus, called also Nilâb from the colour of its waters, and known to the Hindoos by the name of Nilâ-Gangâ or Gangâ simply. Severianus (*de Mundi creat.*) and Ephraem Syrus (*Comm. on Gen.*) agree with Ctesius in identifying the Pison with the Danube. The last-mentioned father seems to have held, in common with others, some singular notions with regard to the course of this river. He believed that it was also the Ganges and Indus, and that, after traversing Ethiopia and Elymas, which he identified with Havilah, it fell into the ocean near Cadiz. Such is also the opinion of Epiphanius with regard to the course of the Pison, which he says is the Ganges of the Ethiopians and Indians and the Indus of the Greeks (*Ancor.* c. 58). Some, as Hopkinson (*Ugol.* vol. vii.), have found the Pison in the Naharmalen, one of the artificial canals which formerly joined the Euphrates with the Tigris. This canal is the *fiumen regium* of Amm. Marc. (xxiii. 6 §25, and xxiv. 6 §1), and the *Armulehar* of Pliny (*N. H.* vi. 30). Grotius, on the contrary, considered it to be the Gihon. Even those commentators who agree in placing the terrestrial Paradise on the *Shit-el-Arab*, the stream formed by the junction of the Tigris and Euphrates, between Ctesiphon and Apamea, are by no means unanimous as to which of the branches, into which this stream is again divided, the names Pison and Gihon are to be applied. Calvin (*Comm. in Gen.*) was the first to conjecture that the Pison was the most easterly of these channels, and in this opinion he is followed by Scaliger and many others. Huet, on the other hand, conceived that he proved beyond doubt that

Calvin was in error, and that the Pison was the westernmost of the two channels by which the united stream of the Euphrates and Tigris falls into the Persian Gulf. He was confirmed by the authority of Bochart (*Microz.* pt. ii. l. 5, c. 5). Junius (*Priel. in Gen.*) and Rask discovered a relic of the name Pison in the *Psitticus*. The advocates of the theory that the true position of Eden is to be sought for in the mountains of Armenia have been induced, from a certain resemblance in the two names, to identify the Pison with the Phasis, which rises in the elevated plateau at the foot of Mount Ararat, near the sources of the Tigris and Euphrates. Ireland (*de Sila parad. terr.* Ugol. vii.), Calmet (*Dict.* s. v.), Link (*Urwelt*, i. 307), Rosenmüller (*Handb. d. Bibl. Alt.*), and Hartmann have given their suffrages in favour of this opinion. Räumler (quoted by Delitzsch, *Genesis*) endeavoured to prove that the Pison was the Phasis of Xenophon (*Anab.* iv. 6), that is, the Aras or Araxes, which flows into the Caspian Sea. There remain yet to be noticed the theories of Leclerc (*Comm. in Gen.*) that the Pison was the Chyrsourhoas, the modern Barada, which takes its rise near Damascus; and that of Buttmann (*Aelt. Erdk.* p. 32) who identified it with the Berynna or Habatti, a river of Ava. Mendelssohn (*Comm. on Gen.*) mentions that some affirm the Pison to be the Gozan of 2 K. xvii. 6 and 1 Chr. v. 26, which is supposed to be a river, and the same with the Kizil-Uzen in Hyrcania. Colonel Chesney, from the results of extensive observations in Armenia, was "led to infer that the rivers known by the comparatively modern names of Ilalyz and Araxes are those which, in the book of Genesis, have the names of Pison and Gihon; and that the country within the former is the land of Havilah, whilst that which borders upon the latter is the still more remarkable country of Cush." (*Exp. to Ephr. and Tigris*, i. 267.)

Such, in brief, is a summary of the various conjectures which have been advanced, with equal degrees of confidence, by the writers who have attempted to solve the problem of Eden. The majority of them are characterised by one common defect. In the narrative of Genesis the river Pison is defined as that which surrounds the whole land of Havilah. It is, then, absolutely necessary to fix the position of Havilah before proceeding to identify the Pison with any particular river. But the process followed by most critics has been first to find the Pison and then to look about for the land of Havilah. The same inverted method is characteristic of their whole manner of treating the problem. The position of the garden is assigned, the rivers are then identified, and lastly the countries mentioned in the description are so chosen as to coincide with the rest of the theory.

With such diversity of opinion as to the river which is intended to be represented by the Pison, it was scarcely possible that writers on this subject should be unanimous in their selection of a country possessing the attributes of Havilah. In Gen. ii. 11, 12, it is described as the land where the best gold was found, and which was besides rich in the treasures of the *b'dolach* and the stone *shoham*. A country of the same name is mentioned as forming one of the boundaries of Ishmael's descendants (Gen. xxv. 18), and the scene of Saul's war of extermination against the Amalekites (1 Sam. xv. 7). In these passages Havilah seems to denote the desert region south-east of Palestine. But the

word occurs also as the proper name of a son of Joktan, in close juxtaposition with Sheba and Ophir, also sons of Joktan and descendants of Shem (Gen. x. 29), who gave their names to the spice and gold countries of the south. Again, Havilah is enumerated among the Hamites as one of the sons of Cush; and in this enumeration his name stands in close connexion with Seba, Sheba, and Delan, the first founders of colonies in Ethiopia and Arabia which afterwards bore their names. If, therefore, the Havilah of Gen. ii. be identical with any one of these countries, we must look for it on the east or south of Arabia, and probably not far from the Persian Gulf. In other respects, too, this region answers to the conditions required. Bochart, indeed, thought the name survived in *Chaula*; which was situated on the east side of the Arabian Gulf, and which he identified with the abode of the Shemitic Joktanites; but if his etymology be correct, in which he connects Havilah with the root חלל "sand," the appellation of "the sandy" region would not necessarily be restricted to one locality. That the name is derived from some natural peculiarity is evident from the presence of the article. Whatever may be the true meaning of *b'dolach*, be it carbuncle, crystal, idellium, ebony, pepper, cloves, beryl, pearl, diamond, or emerald, all cities detect its presence, under one or other of these forms, in the country which they select as the Havilah most appropriate to their own theory. As little difficulty is presented by the *shohum*: call it onyx, sardonx, emerald, sapphir, beryl, or sardius, it would be hard indeed if some of these precious stones could not be found in any conceivable locality to support even the most far-fetched and improbable conjecture. That Havilah is that part of India through which the Ganges flows, and, more generally, the eastern region of the earth; that it is to be found in Susiana (Hopkinson), in Ava (Buttinaum), or in the Ural region (Raumer), are conclusions necessarily following upon the assumptions with regard to the Pison. Hartmann, Rehdal, and Rosenmüller are in favour of Colchis, the scene of the legend of the Golden Fleece. The Phasis was said to flow over golden sands, and gold was carried down by the mountain-torrents (Strabo, xi. 2, §19). The crystal (*b'dolach*) of Scythia was renowned (Solinus, c. xx.), and the emeralds (*shohum*) of this country were as far superior to other emeralds, as the latter were to other precious stones (Plin. *H. N.* xxxvii. 17), all which proves, say they, that Havilah was Colchis. Rosenmüller argues, rather strangely, if the Phasis be the Pison, the land of Havilah must be Colchis, supposing that by this country the Hebrews had the idea of a Pontic or Northern India. In like manner Leclerc, having previously determined that the Pison must be the Chrysorrhoea, finds Havilah not far from Coele Syria. Hasse (*Entdeck.* pp. 44, 50, quoted by Rosenmüller) compares Havilah with the *Ῥαῖα* of Herodotus (iv. 9), in the neighbourhood of the Arimaspians, and the dragon which guarded the land of gold. For all these hypotheses there is no more support than the meiest conjecture.

The second river of Paradise presents difficulties not less insurmountable than the Pison. Those who maintained that the Pison is the Ganges held also that the Gihon was the Nile. One objection to this theory has been already mentioned. Another, equally strong, is, that although in the books of the Old Testament frequent allusion is made to

this river, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the LXX. rendering of גִּיחוֹן by *Γήεν* in Jer. ii. 18; but it is clear from the manner in which the translators have given the latter clause of the same passage that they had no conception of the true meaning. Among modern writers, Bertheau (quoted by Delitzsch, *Genesis*) and Kalisch (*Genesis*) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient notions of the earth's surface, without reference to the advances made in later times in geographical knowledge. If this hypothesis be adopted, it certainly explains some features of the narrative; but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as contradictory to the now well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have nothing but categorical assertion. Pausanias (ii. 5), indeed, records a legend that the Euphrates, after disappearing in a marsh, rises again beyond Ethiopia, and flows through Egypt as the Nile. Arrian (*Exp. Alex.* vi. 1) relates that Alexander, on finding crocodiles in the Indus, and bears like those of Egypt on the banks of the Acesines, imagined that he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find it convenient to quote, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauretania (Plin. *H. N.* v. 10).

The etymology of Gihon (גִּיחוֹן. *to burst forth*) seems to indicate that it was a swiftly-flowing impetuous stream. According to Golius (*Lex. Arab.*),

جیحون (*Jichoon*) is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians *Jichoon ar-lus*, and from this circumstance it has been adopted by Rehdal, Calmet, and Col. Chesney as the modern representative of the Gihon. It is clear, therefore, that the question is not to be decided by etymology alone, as the name might be appropriately applied to many rivers. That the Gihon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the *Shat-el-Arab*. Bochart and Huet contended that it was the easternmost of the channels, while Calvin considered it to be the most westerly. Hopkinson and Junius, conceiving that Eden was to be found in the region of Aurantia (= *Audantia*, *quasi Edenitis*) on the Euphrates, were compelled to make the Gihon coincide with the Naharsar, the Mares of Amm. Marc. (xxiii. 6, §25). That it should be the Orontes (Leclerc), the Ganges (Buttinaum and Ewald), the Kur, or Cyrus, which rises from the side of the Saghanlou mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories. Rask and Verbrugge are in favour of the Gyndes of the ancients (Her. i. 189),

now called the Diyālāh, one of the tributaries of the Tigris. Abraham Perissol (Ugol. vol. vii.) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Gihon with a river which his editor, Hyde, explains to be the Niger, he avoids the difficulty which is presented by the fact that the Hiddekel and Prath are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and run underground till they make their appearance in Assyria. Equally satisfactory is the explanation of Ephraem Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and after passing underneath the sea, come to light again in different quarters of the globe. It may be worth while remarking, by the way, that the opinions of this father are frequently misunderstood in consequence of the very inadequate Latin translation with which his Syriac works are accompanied, and which often does not contain even an approximation to the true sense. (For an example, see Kalisch, *Genesis*, p. 95.)

From etymological considerations, Huet was induced to place Cush in Chusistan (called Cutha, 2 K. xvii. 24), Leclerc in Cassiotia in Syria, and Reland in the "regio Cassacorum." Bochart identified it with Susiana, Link with the country about the Caucasus, and Hartmann with Bactria or Bilkh, the site of Paradise being, in this case, in the celebrated vale of Kashmir. The term Cush is generally applied in the Old Testament to the countries south of the Israelites. It was the southern limit of Egypt (Ez. xxix. 10), and apparently the most westerly of the provinces over which the rule of Ahasuerus extended, "from India, even unto Ethiopia" (Esth. i. 1, viii. 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Is. lxviii. 31; Is. xviii. 1; Jer. xlv. 9, &c.); but in two passages Cush stands in close juxtaposition with Elam (Is. xi. 11), and Persia (Ez. xxxviii. 5). The Cushite king, Zerah, was utterly defeated by Asa at Marashah, and pursued as far as Gedar, a town of the Philistines, on the southern border of Palestine, which was apparently under his sway (2 Chr. xiv. 9, &c.). In 2 Chr. xxi. 16, the Arabians are described as dwelling "beside the Cushites," and both are mentioned in connexion with the Philistines. The wife of Moses, who, we learn from Ex. ii., was the daughter of a Midianite chieftain, is in Num. xii. 1 denominated a Cushite. Further, Cush and Seba (Is. xliii. 3), 'Cush and the Sabneans (Is. xlv. 14) are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x. 7), in which Seba is the son of Cush. From all these circumstances it is evident that under the denomination Cush were included both Arabia and the country south of Egypt on the western coast of the Red Sea. It is possible, also, that the vast desert tracts west of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. The Targumist on Is. xi. 11, sharing the prevailing error of his time, translates Cush by India, but that a better knowledge of the relative positions of these countries was anciently possessed is clear from Esth. i. 1. With all this evidence for the southern situation of Cush, on what grounds are Rosenmüller and others justified in applying the term to a more northern region on the banks of the Oxus? We are told that, in the Hindoo mythology, the gardens

and metropolis of India are placed around the mountain Mōru, the celestial north pole; that, among the Babylonians and Medo-Persians, the gods' mountain, Alborj, "the mount of the congregation," was believed to be "in the sides of the north" (Is. xiv. 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far distant hyperborean region. Guided by such meaning indications, Hassé (*Entdeckungen*, pp. 49, 50, n.) scrupled not to gratify his national feeling by placing the garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in Scandinavia, and the inhospitable Siberia has not been without its advocates (Morén, Rosenmüller's *Geog.* i. 96). But, with all this predilection in favour of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the *Purāṇas* "of a terrestrial paradise, different from that of the general Hindu system, in the southern parts of Africa" (*As. Res.* iii. 300). Even Mēru was no further north than the Himalayan range, which the Aryan race crossed in their migrations.

In the midst of this diversity of opinions, what is the true conclusion at which we arrive? Theory after theory has been advanced, with no lack of confidence, but none has been found which satisfies the required conditions. All share the inevitable fate of conclusions which are based upon inadequate premises. The problem may be indeterminate because the data are insufficient. It would scarcely, on any other hypothesis, have admitted of so many apparent solutions. Still it is one not easy to be abandoned, and the site of Eden will ever rank, with the quadrature of the circle and the interpretation of unfulfilled prophecy, among those unsolved, and perhaps insoluble, problems, which possess so strange a fascination.

It must not be denied, however, that other methods of meeting the difficulty, than those above mentioned, have been proposed. Some, ever ready to use the knife, have unhesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Gruauville Penn, *Min. and Mos. Geol.* p. 184). But, even admitting this, the words are not mere unmeaning jargon, and demand explanation. Ewald (*Gesch.* i. 331, note) affirms, and we have only his word for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards it as a product of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden remained under the guardianship of angels till the time of the deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. On the supposition that this is correct, there is still a difficulty to be explained. The narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been suggested that the deception of the garden of Eden is part of an inspired antediluvian document (Morén, Rosenmüller's *Geogr.* i. 92). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the flood in changing

the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. Meanwhile, as every expression of opinion results in a confession of ignorance, it will be more honest to acknowledge the difficulty than to rest satisfied with a fictitious solution.

The idea of a terrestrial paradise, the abode of purity and happiness, has formed an element in the religious beliefs of all nations. The image of "Eden, the garden of God," retained its hold upon the minds of the poets and prophets of Israel as a thing of beauty whose joys had departed (*Ex. xxviii. 13*; *Joel ii. 3*), and before whose gates the cherubim still stood to guard it from the guilty. Arab legends tell of a garden in the East, on the summit of a mountain of jacinth, inaccessible to man; a garden of rich soil and equable temperature, well watered, and abounding with trees and flowers of rare colours and fragrance. In the centre of Jambu-dwipa, the middle of the seven continents of the Purānas, is the golden mountain Meru, which stands like the seed-cup of the lotus of the earth. On its summit is the vast city of Brāhmā, renowned in heaven, and encircled by the Ganges, which, issuing from the foot of Vishnu, washes the lunar orb, and falling thither from the skies, is divided into four streams, that flow to the four corners of the earth. These rivers are the Bhadrā, or Oby of Siberia; the Sītā, or Hoangho, the great river of China; the Alakannandā, a main branch of the Ganges; and the Chakshu, or Oxus. In this abode of divinity is the Nandana, or grove of Indra; there too is the Jambu tree, from whose fruit are fed the waters of the Jambu river, which give life and immortality to all who drink thereof. (*Vishnu Purāna*, trans. Wilson, pp. 166-171.) The enchanted gardens of the Chinese are placed in the midst of the summits of Houan-lun, a high chain of mountains further north than the Himalaya, and further east than Hindukush. The fountain of immortality which waters these gardens is divided into four streams, the fountains of the supreme spirit, Tychin. Among the Medo-Persians the gods' mountain Alborz is the dwelling of Ormuzd, and the good spirits, and is called "the navel of the waters." The Zend books mention a region called *Heden*, and the place of Zoroaster's birth is called *Hedenesh*, or, according to another passage, *Airjana Vedjo* (Knobel, *Genesis*).

All these and similar traditions are but mere mocking echoes of the old Hebrew story, jarred and broken notes of the same strain; but, with all their exaggerations, "they intimate how in the background of man's visions lay a Paradise of holy joy,—a Paradise secured from every kind of profanation, and made inaccessible to the guilty; a Paradise full of objects that were calculated to delight the senses and to elevate the mind; a Paradise that granted to its tenant rich and rare immunities, and that fed with its perennial streams the tree of life and immortality" (Hudwrick, *Christ and other musters*, pt. ii. p. 133).

[W. A. W.]

**EDEN**, 1. (עֵדֶן; 'Eḏēm; *Eden*; omitted by LXX. in Is. xxvii. 12, and *Ex. xxvii. 23*), one of the mats which supplied the luxury of Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Asshur; and in Am. i. 5. Beth-Eden, or "the house of Eden," is rendered in the LXX. by Χαβδάν. In 2 K. xix. 12, and Is. xxxvii. 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezep, as victims of the Assyrian greed

of conquest. Telassar appears to have been the head-quarters of the tribe; and Knobel's (*Comm. on Isaiah*) etymology of this name would point to the highlands of Assyria as their whereabouts. But this has no sound foundation, although the view which it supports receives confirmation from the version of Jonathan, who gives חַדִּיב (*Chadib*) as the equivalent of Eden. Bochart proved (*Phaleg*, pt. i. p. 274) that this term was applied by the Talmudic writers to the mountainous district of Assyria, which bordered on Media, and was known as Adiabene. But if Gozan be Gausanitis in Mesopotamia, and Haran be Carrahe, it seems more natural to look for Eden somewhere in the same locality. Keil (*Comm. on Kings*, ii. 97, English translation) thinks it may be حِجْلِي (*Ma'don*), which Assemani (*Bibl. Or. ii. 226*) places in Mesopotamia, in the modern province of Diarbekr. Bochart, considering the Eden of Genesis and Isaiah as identical, argues that Gozan, Haran, Rezep, and Eden, are mentioned in order of geographical position, from north to south; and, identifying Gozan with Gausanitis, Haran with Carrahe, a little below Gausanitis on the Tigris, and Rezep with Resapha, gives to Eden a still more southerly situation at the confluence of the Euphrates and Tigris, or even lower. According to him, it may be Addan, or Addana, which geographers place on the Euphrates. Michaelis (*Suppl. No. 1826*) is in favour of the modern Aden, called by Ptolemy Ἀραβίας ἐμπόριον, as the Eden of Ezekiel. In the absence of positive evidence, probability seems to point to the N.W. of Mesopotamia as the locality of Eden.

2. BETH-EDEN (בֵּית עֵדֶן, "house of pleasure;" *ἑδρες Χαβδάν*; *domus voluptatis*), probably the name of a country residence of the kings of Damascus (Am. i. 5). Michaelis (*Suppl. ad Leg. Hebr. s. v.*), following Laroque's description, and misled by an apparent resemblance in name, identified it with *E'dien*, about a day's journey from Baalbek, on the eastern slope of the Libanus, and near the old cedars of *Bshirai*. Baur (*Anos*, p. 224), in accordance with the Mohammedi tradition, that one of the four terrestrial paradises was in the valley between the ranges of the Libanus and Anti-Libanus, is inclined to favour the same hypothesis. But Grotius, with greater appearance of probability, pointed to the *παρθέσιος* of Ptolemy (v. 15) as the locality of Eden. The ruins of the village of *Jasich el-Katimeh*, now a paradise no longer, are supposed by Dr. Robinson to mark the site of the ancient Paradisus, and his suggestion is approved by Mr. Porter (*Humb. p. 577*). Again, it has been conjectured that Beth Eden is no other than *Beit-Jenn*, "the house of Paradise," not far to the south-west of Damascus, on the eastern slope of the Hermon, and a short distance from *Ma'fel*. It stands on a branch of the ancient Phapur, near its source (Rosenmüller, *Bibl. Alt. ii. 291*; Hitzig, *Anos*, in loc.; Porter, *Damascus*, i. 311). But all this is mere conjecture; it is impossible, with any degree of certainty, to connect the Arabic name, bestowed since the time of Mohammed, with the more ancient Hebrew appellation, whatever be the apparent resemblance.

[W. A. W.]

**EDER** (עֶדֶר; "a flock;" Vat. omits; Alex. 'Eḏpal; *Eder*), one of the towns of Judah in the extreme south, and on the borders of Edom (*Josh. xv. 21*). No trace of it has been discovered

in modern times, unless, as has been suggested, it is identical with ARAD, by a transposition of letters.

2. ('Eḏep, *Edier*). A Levite of the family of Merari, in the time of David (1 Chr. xxiii. 23, xxiv. 30). [G.]

E'DES ('Hḏaṣ; *Esmi*), 1 Esdr. ix. 35. [JADAU.]

ED'NA ('Eḏna, i. c. עֲדָנָה, *pleasure*; *Anna*), the wife of Raguel (Tob. vii. 2, 8, 14, 16; x. 12; xi. 1). [B. F. W.]

E'DOM, IDUMEA, or IDUMAE'A (אֲדוֹמ, *red*; 'Eḏōm; N. T. Ἰδουμαία, only in Mark iii. 8). The name Edom was given to Esau, the first-born son of Isaac, and twin brother of Jacob, when he sold his birthright to the latter for a meal of lentile pottage. The peculiar colour of the pottage gave rise to the name *Edom*, which signifies "red." "And Esau said to Jacob, Feed me, I pray thee, with that same red pottage; for I am faint; therefore was his name called Edom" (Gen. xxv. 29-34). The country which the Lord subsequently gave to Esau was hence called the "field of Edom" (שְׂדֵה אֲדוֹם, Gen. xxxii. 3), or "land of Edom" (אֶרֶץ אֲדוֹם, Gen. xxxvi. 16; Num. xxxiii. 37). Probably its physical aspect may have had something to do with this. The Easterns have always been, and to the present day are, accustomed to apply names descriptive of the localities. The ruddy hue of the mountain-range given to Esau would at once suggest the word *Edom*, and cause it to be preferred to the better-known Esau. The latter was also occasionally used, as in Obad. 8, 9, 19; and in 21, we have "the Mount of Esau" (אֶת־הַר עֲשָׂו).

Edom was previously called *Mount Seir* (שֵׁעִיר, *rugged*; Gen. xxxii. 3, xxxvi. 8), from Seir the progenitor of the Horites (Gen. xiv. 6, xxxvi. 20-22). The name Seir was perhaps adopted on account of its being descriptive of the "rugged" character of the territory. Josephus (*Ant.* i. 18, §1) confounds the words *Seir* and *Esau*, and seems to affirm that the name Seir was also derived from Isaac's son; but this idea is opposed to the express statement of Moses (Gen. xiv. 6). The original inhabitants of the country were called *Horites*, from *Hori*, the grandson of Seir (Gen. xxxvi. 20, 22), because that name was descriptive of their habits as "Troglodytes," or "dwellers in caves" (חֹרִי, HORITES). Timna, the daughter of Seir and aunt of Hori, became concubine to Eliphaz, Esau's oldest son, and bare to him Amalek, the progenitor of the *Amalekites* (Gen. xxxvi. 12, 20, 22). Immediately after the death of Isaac, Esau left Canaan and took possession of Mount Seir (Gen. xxxv. 28, xxxvi. 6, 7, 8). When his descendants increased they extirpated the Horites, and adopted their habits as well as their country (Deut. ii. 12; Jer. xlix. 16; Obad. 3, 4).

The boundaries of Edom, though not directly, are yet incidentally defined with tolerable distinctness in the Bible. The country lay along the route pursued by the Israelites from the peninsula of Sinai to Kadesh-barnea, and thence back again to Elath (Deut. i. 2, ii. 1-8); that is, along the east side of the great valley of Arabah. It reached southward as far as Elath, which stood at the northern end of the gulf of Elath, and was the seaport of the Edonites; but it does not seem to have

extended farther, as the Israelites on passing Elath struck out eastward into the desert, so as to pass round the east of Edom (Deut. ii. 8). On the north of Edom lay the territory of Moab, through which the Israelites were also prevented from going, and were therefore compelled to go from Kadesh by the southern extremity of Edom (Judg. xi. 17, 18; 2 K. iii. 6-9). The boundary between Moab and Edom appears to have been the "brook Zered" (Deut. ii. 13, 14, 18), probably the modern *Wady-el-Ahsy*, which still divides the provinces of *Kerak* (Moab) and *Jebel* (Gabalene). But Edom was wholly a mountainous country. "Mount Seir" (Gen. xiv. 6, xxxvi. 8, 9; Deut. i. 2, ii. 1, 5, &c.) and "the Mount of Esau" (Obad. 8, 9, 19, 21), are names often given to it in the Bible, while Josephus and later writers called it *Gabalene* ("the mountainous"). This shows that it only embraced the narrow mountainous tract (about 100 miles long by 20 broad) extending along the eastern side of the Arabah from the northern end of the gulf of Elath to near the southern end of the Dead Sea. A glance at the more modern divisions and names corroborates this view. Josephus divides Edom, or Idumaea, into two provinces; the one he calls *Gabolitis* (Γαβολίτις), and the other *Amalekitis* (Ant. ii. 1, §2). The former is Edom Proper, or Mount Seir; the latter is the region south of Palestine now called the desert of *el-Tih*, or "Wandering," originally occupied by the Amalekites (Num. xiii. 29; 1 Sam. xv. 1-7, xxvii. 8), but afterwards, as we shall see, possessed by the Edomites. Eusebius also gives the name *Gabalene*, or *Gabalene*, as identical with Edom (*Onom.* s. v. *Seir, Idumaea, Allus*, &c.), and in the Samaritan Pentateuch the word *Gubla* is substituted for *Seir* in Deut. xxxiii. 2. *Gabalene* is the Greek form of the Hebrew *Gabal* (גָּבַל, *mountain*), and it is still retained in the Arabic *Jebal* (جبال, *mountains*).

The mountain range of Edom is at present divided into two districts. The northern is called *Jebel*. It begins at *Wady-el-Ahsy* (the ancient brook *Zered*), which separates it from *Kerak* (the ancient Moab), and it terminates at or near Petia. The southern district is called *esh-Shérak*, a name which, though it resembles, bears no radical relation to the Hebrew *Seir*.

The physical geography of Edom is somewhat peculiar. Along the western base of the mountain-range are low calcareous hills. To these succeed lofty masses of igneous rock, chiefly porphyry, over which lies red and variegated sandstone in irregular ridges and abrupt cliffs, with deep ravines between. The latter strata give the mountains their most striking features and remarkable colours. The average elevation of the summits is about 2000 feet above the sea. Along the eastern side runs an almost unbroken limestone ridge, a thousand feet or more higher than the other. This ridge sinks down with an easy slope into the plateau of the Arabian desert. While Edom is thus wild, rugged, and almost inaccessible, the deep glens and flat terraces along the mountain sides are covered with rich soil, from which trees, shrubs, and flowers now spring up luxuriantly. No contrast could be greater than that between the bare, parched plains on the east and west, and the ruddy cliffs, and verdant, flower-spangled glens and terraces of Edom. This illustrates Bible topography, and reconciles seemingly discordant statements in the sacred volume.

While the posterity of Esau dwelt amid rocky fastnesses and on mountain heights, making their houses like the eyries of eagles, and living by their sword (Jer. xlix. 16; Gen. xxvii. 40), yet Isaac, in his prophetic blessing, promised his disappointed son that his dwelling should be "of the fatness of the earth, and of the dew of heaven from above" (Gen. xxvii. 39). Some other passages of Scripture are also illustrated by a glance at the towering precipices and peaks of Edom. The border of the Amorites was from "the ascent of scorpions (*Akrabbim*), from the rock"—that is, from the rocky boundary of Edom (Judg. i. 36). And we read that Amaziah, after the conquest of Seir, took ten thousand of the captives to the "top of the cliff," and thence cast them down, dashing them all to pieces (2 Chr. xxv. 11, 12).

The ancient capital of Edom was Bozrah [BOZRAH], the site of which is most probably marked by the village of *Buseirah*, near the northern border, about 25 miles south of Kerak (Gen. xxvi. 33; Is. xxiv. 6, lxiii. 1; Jer. xlix. 13, 22). But Sela, better known by its Greek name *Petra*, appears to have been the principal stronghold in the days of Amaziah (B.C. 838; 2 K. xiv. 7; see *PETRA*). Elath, and its neighbour Ezion-geber, were the seaports; they were captured by king David, and here Solomon equipped his merchant-fleet (2 Sam. viii. 14; 1 K. ix. 26).

When the kingdom of Israel began to decline, the Edomites not only reconquered their lost cities, but made frequent incursions upon southern Palestine (2 K. xvi. 6; where *Edomites* and not Syrians (*Arameans*) is evidently the true reading; 2 Chr. xxviii. 17). It was probably on account of these attacks, and of their uniting with the Chaldeans against the Jews, that the Edomites were so fearfully denounced by the later prophets (Ob. 1 sq.; Jer. xlix. 7 sq.; Ezek. xxv. 12 sq., xxxv. 3 sq.). During the Captivity they advanced westward, occupied the whole territory of their brethren the Amalekites (Gen. xxxvi. 12; 1 Sam. xv. 1 sq.; Joseph. *Ant.* ii. 1, §2), and even took possession of many towns in southern Palestine, including Hebron (Joseph. *Ant.* xii. 8, §6; B. J. iv. 9, §7; c. *Aptm.* ii. 10). The name Edom, or rather its Greek form, Idumæa, was now given to the country lying between the valley of Arabah and the shores of the Mediterranean. Thus Josephus writes (*Ant.* v. 1, §22)—"the lot of Simeon included that part of Idumæa which bordered upon Egypt and Arabia;" and though this is true it does not contradict the language of Scripture—"I will not give you of their land, no, not so much as a footbreadth, because I have given Mount Seir unto Esau for a possession" (Deut. ii. 5). Not a footbreadth of Edom Proper, or Mount Seir, was ever given to the Jews. Jerome also (*in Obad.*) says that the Edomites possessed the whole country from Eleuthero-opolis to Petra and Elath; and Roman authors sometimes give the name Idumæa to all Palestine, and even call the Jews Idumæans (Virg. *Georg.* iii. 12; Juven. viii. 160; Martial. ii. 2).

While Idumæa thus extended westward, Edom Proper was taken possession of by the Nabatheans, an Arabian tribe, descended from Nebaioth, Ishmael's oldest son and Esau's brother-in-law (Gen. xxv. 13; 1 Chr. i. 29; Gen. xxxvi. 3). The Nabatheans were a powerful people, and held a great part of southern Arabia (Josh. *Ant.* i. 12, §4). They took Petra and established themselves there at least three centuries before Christ, for Antigonus,

one of the successors of Alexander the Great, after conquering Palestine, sent two expeditions against the Nabatheans in Petra (Diod. Sic. 19). This people, leaving off their nomad habits, settled down amid the mountains of Edom, engaged in commerce, and founded the little kingdom called by Roman writers *Arabia Petraea*, which embraced nearly the same territory as the ancient Edom. Some of its monarchs took the name Aretas (2 Macc. v. 8; Joseph. *Ant.* xiii. 15, §1, 2; xiv. 5, §1), and some Obodas (Joseph. *Ant.* xiii. 13, §5). Aretas, king of Arabia, was father-in-law of Herod Antipas (Matt. xiv. 3, 4), and it was the same who captured the city of Damascus and held it at the time of Paul's conversion (2 Cor. xi. 32; Acts ix. 25). The kingdom of Arabia was finally subdued by the Romans in A.D. 105. Under the Romans the transport trade of the Nabatheans increased. Roads were constructed through the mountain-defiles from Elath on the coast to Petra, and thence northward and westward. Traces of them still remain, with ruinous military stations at intervals, and fallen milestones of the times of Trajan and Marcus Aurelius (*Peutinger Tables*; Laboide's *Voyage*; Burckhardt's *Syria*, pp. 374, 419; Irby and Mangles' *Travels*, pp. 371, 377, 1st ed.). To the Nabatheans Petra owes those great monuments which are still the wonder of the world.

When the Jewish power revived under the warlike Asmonean princes, that section of Idumæa which lay south of Palestine fell into their hands. Judas Maccabeus captured Hebron, Marissa, and Ashdod; and John Hyrcanus compelled the inhabitants of the whole region to conform to Jewish law (Joseph. *Ant.* xii. 8, §6, xiii. 9, §2; 1 Macc. v. 65, 68). The country was henceforth governed by Jewish prefects; one of these, Antipater, an Idumæan by birth, became, through the friendship of the Roman emperor, procurator of all Judæa, and his son was Herod the Great, "King of the Jews" (Joseph. *Ant.* xiv. 1, §3, 8, §5, xv. 7, §9, xvii. 11, §4).

Early in the Christian era Edom Proper was included by geographers in Palestine, but in the fifth century a new division was made of the whole country into *Palestina Prima, Secunda, and Tertia*. The last embraced Edom and some neighbouring provinces, and when it became an ecclesiastical division its metropolis was Petra. In the seventh century the Mohammedan conquest gave a death-blow to the commerce and prosperity of Edom. Under the withering influence of Mohammedan rule the great cities fell to ruin, and the country became a desert. The followers of the false prophet were here, as elsewhere, the instruments in God's hands for the execution of His judgments. "Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee most desolate. I will lay thy cities waste, and when the whole earth rejoiceth I will make thee desolate. . . . I will make Mount Seir most desolate, and cut off from it him that passeth out and him that returneth. . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord" (Ezek. xxxv. 3, 4, 7, 9, 14).

The Crusaders made several expeditions into Edom, penetrating as far as Petra, to which they gave the name it still bears, *Wady Musa*, "Valley of Moses" (*Gesta Dei per Franc.* pp. 405, 518, 555, 581). On a commanding height about 12 miles north of Petra they built a strong fortress called Mons Regalis, now *Shibek* (*Gesta Dei*, p.

611). At that time so little was known of the geography of the country that the Crusaders occupied and fortified *Karak* (the ancient Kir Moab) under the impression that it was the site of Petra.

From that time until the present century Edom remained an unknown land. In the year 1812 Burckhardt entered it from the north, passed down through it, and discovered the wonderful ruins of Petra. In 1828 Laborde, proceeding northward from Akabah through the deserts of Edom, also visited Petra, and brought away a portfolio of splendid drawings, which proved that the descriptions of Burckhardt had not been exaggerated. Many have since followed the footsteps of the first explorers, and a trip to Petra now forms a necessary part of the eastern traveller's grand tour.

For the ancient geography of Edom consult *Revue de Palestine*, pp. 48, 66 sq., 78, 82; for the history and commerce of the Nabatheans, Vincent's *Commerce and Navigation of the Ancients*, vol. ii.; for the present state of the country and descriptions of Petra, Burckhardt's *Travels in Syria*, Laborde's *Voyage*, Robinson's *Biblical Researches*, Porter's *Handbook for Syria and Palestine*. [J. L. P.]

**EDOMITES** (עֲדֹמִי, עֲדֹמִי, pl.; and עֲדֹמִי, Deut. ii. 4; 'Ἰδουμαῖοι), the descendants of Esau, or Edom. [EDOM.] Esau settled in Mount Seir immediately after the death of his father Isaac (Gen. xxxvi. 6, 8). Before that time, however, he had occasionally visited, and even resided in, that country; for it was to the "land of Seir" Jacob sent messengers to acquaint his brother of his arrival from Padan-aram (Gen. xxii. 3). The Edomites soon became a numerous and powerful nation (Gen. xxxvi. 1 sq.). Their first form of government appears to have resembled that of the modern Bedawin; each tribe or clan having a petty chief or sheikh (שֵׁיחַ, "Duke" in the A. V., Gen. xxxvi. 15). The Horites, who inhabited Mount Seir from an early period, and among whom the Edomites still lived, had their sheikhs also (Gen. xxxvi. 29 sq.). At a later period, probably when the Edomites began a war of extermination against the Horites, they felt the necessity of united action under one competent leader, and then a king was chosen. The names of eight of their kings are given in the book of Genesis (xxxvi. 31-39), with their native cities, from which it appears that one of them was a foreigner ("Saul of Rehoboth-by-the-river"), or, at least, that his family were resident in a foreign city. (See also 1 Chr. i. 43-50.) Against the Horites the children of Edom were completely successful. Having either exterminated or expelled them they occupied their whole country (Deut. ii. 12). A statement made in Gen. xxxvi. 31, serves to fix the period of the dynasty of the eight kings. They "reigned in the land of Edom before there reigned any king over the children of Israel;" that is, before the time of Moses, who may be regarded as the first virtual king of Israel (comp. Deut. xxviii. 5; Ex. xviii. 16-19). Other circumstances, however, prove that though the Edomite kings had the chief command, yet the old patriarchal government by sheikhs of tribes was still retained. Most of the large tribes of Bedawin at the present day have one chief, with the title of *Emir*, who takes the lead in any great emergency; while each division of the tribe enjoys perfect independence under its own sheikh. So it would seem to have been with the Edomites. Lists of *dukes* (or *sheikhs*,

עֲדֹמִי) are given both before and after the kings (Gen. xxxvi. 15, sq.; 1 Chr. i. 51 sq.), and in the triumphant song of Israel over the engulfed host of Pharaoh, when describing the effect this fearful act of divine vengeance would produce on the surrounding nations, it is said—"Then the *dukes* of Edom shall be amazed" (Ex. xv. 15), while, only a few years afterwards, Moses "sent messengers from Kadesh unto the *king* (מֶלֶךְ) of Edom" to ask permission to pass through his country (Judg. xi. 17).

Esau's bitter hatred to his brother Jacob for fraudulently obtaining his blessing appears to have been inherited by his latest posterity. The Edomites peremptorily refused to permit the Israelites to pass through their land, though addressed in the most friendly terms—"thus saith thy brother Israel" (Num. xx. 14)—and though assured that they would neither drink of their waters nor trespass on their fields or vineyards (ver. 17). The Israelites were expressly commanded by God neither to resent this conduct, nor even to entertain feelings of hatred to the Edomites (Deut. ii. 4, 5, xxii. 7). The Edomites did not attempt actual hostilities, though they prepared to resist by force any intrusion (Num. xx. 20). Their neighbours and brethren (Gen. xxxvi. 12), the Amalekites, were probably urged on by them, and proved the evilest and most determined opponents of the Israelites during their journey through the wilderness (Ex. xvii. 8, 9).

For a period of 400 years we hear no more of the Edomites. They were then attacked and defeated by Saul (1 Sam. xiv. 47). Some forty years later David overthrew their army in the "Valley of Salt," and his general, Joab, following up the victory, destroyed nearly the whole male population (1 K. xi. 15, 16), and placed Jewish garrisons in all the strongholds of Edom (2 Sam. viii. 13, 14; in ver. 13 the Heb. should evidently be אֲדָמָה, instead of אֲדָם; comp. 14; 2 K. xiv. 7; and Jos. Ant. vii. 5, §4). In honour of that victory the Psalmist-warrior may have penned the words in Ps. lx. 8, "over Edom will I cast my shoe." Hadad, a member of the royal family of Edom, made his escape with a few followers to Egypt, where he was kindly received by Pharaoh. After the death of David he returned, and tried to excite his countrymen to rebellion against Israel, but failing in the attempt he went on to Syria, where he became one of Solomon's greatest enemies (1 K. xi. 14-22; Jos. Ant. viii. 7, §6). The Edomites continued subject to Israel from this time till the reign of Jehoshaphat (B.C. 914), when they attempted to invade Israel in conjunction with Ammon and Moab, but were miraculously destroyed in the valley of Betachah (2 Chr. xx. 22). A few years later they revolted against Jehoram, elected a king, and for half a century retained their independence (2 Chr. xxi. 8). They were then attacked by Amaziah, 10,000 were slain in battle, Sela, their great stronghold, was captured, and 10,000 more were dashed to pieces by the conqueror from the cliffs that surround the city (2 K. xiv. 7; 2 Chr. xxv. 1, 12). Yet the Israelites were never able again completely to subdue them (2 Chr. xxviii. 17). When Nebuchadnezzar besieged Jerusalem the Edomites joined him, and took an active part in the plunder of the city and slaughter of the poor Jews. Their cruelty at that time seems to be specially referred to in the 137th Psalm—"Remember

O Lord, the children of Edom in the day of Jerusalem; who said, Raze it, raze it, even to the foundation thereof." As the first part of Isaac's prophetic blessing to Esau—"the elder shall serve the younger"—was fulfilled in the long subjection of the Edomites to the kings of Israel, so now the second part was also fulfilled—"It shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck" (Gen. xxvii. 40). It was on account of these acts of cruelty committed upon the Jews in the day of their calamity that the Edomites were so fearfully denounced by the later prophets (Is. xxxiv. 5-8, lxi. 1-4; Jer. xlix. 17; Lam. iv. 21; Ezek. xxv. 13, 14; Am. i. 11, 12; Obad. 10 sq.).

On the conquest of Judah by the Babylonians, the Edomites, probably in reward for their services during the war, were permitted to settle in southern Palestine, and the whole plateau between it and Egypt; but they were about the same time driven out of Edom Proper by the Nabatheans. [EDOM; NABATHEANS.] For more than four centuries they continued to prosper, and retained their new possessions with the exception of a few towns which the Persian monarchs compelled them to restore to the Jews after the captivity. But during the warlike rule of the Maccabees they were again completely subdued, and even forced to conform to Jewish laws and rites (Joseph. *Ant.* xii. 8, §6, *Ant.* 9, §1; 1 Macc. v. 65), and submit to the government of Jewish prefects. The Edomites were now incorporated with the Jewish nation, and the whole province was often termed by Greek and Roman writers *Idumæa* (*Pol. Geog.* v. 16; *Mar.* iii. 8). According to the ceremonial law an Edomite was received into "the congregation of the Lord"—that is, to all the rites and privileges of a Jew—"in the third generation" (*Deut.* xxiii. 8). Antipater, a clever and crafty Idumæan, succeeded, through Roman influence, in obtaining the government of Judæa (Joseph. *Ant.* xiv. 8, §5). His oldest son, Phasaelus, he made governor of Jerusalem, and to his second son Herod, then only in his 15th year, he gave the province of Galilee. Herod, afterwards named the Great, was appointed "king of the Jews" by a decree of the Roman senate (B.C. 37; Joseph. *Ant.* xiv. 14, §5; *Matt.* ii. 1). Immediately before the siege of Jerusalem by Titus, in consequence of the influence of John of Gischala, 20,000 Idumæans were admitted to the Holy City, which they filled with robbery and bloodshed (Joseph. *B. J.* iv. 4 and 5). From this time the Edomites, as a separate people, disappear from the page of history, though the name Idumæan still continued to be applied to the country south of Palestine as late as the time of Jerome (*in Obad.*).

The character of the Edomites was drawn by Isaac in his prophetic blessing to Esau—"By thy sword shalt thou live" (Gen. xxvii. 40). War and rapine were the only professions of the Edomites. By the sword they got Mount Seir—by the sword they exterminated the Horites—by the sword they long battled with their brethren of Israel, and finally broke off their yoke—by the sword they won southern Palestine—and by the sword they performed the last act in their long historic drama, massacred the guards in the temple, and pillaged the city of Jerusalem.

Little is known of their religion; but that little shows them to have been idolatrous. It is probable that Esau's marriage with the "daughters of Canaan," who "were a grief of mind" to his father

and mother (Gen. xxvi. 34, 35), induced him to embrace their religion, and when Esau and his followers took possession of Mount Seir they seem to have followed the practice common among ancient nations of adopting the country's gods, for we read that Amaziah, king of Judah, after his conquest of the Edomites, "brought the gods of the children of Seir, and set them up to be his gods" (2 Chr. xxv. 14, 15, 20). Josephus also refers to both the idols and priests of the Idumæans (*Ant.* xv. 17, §9).

The habits of the Idumæans were singular. The Horites, their predecessors in Mount Seir, were, as their name implies, *troglodytes*, or dwellers in caves; and the Edomites seem to have adopted their dwellings as well as their country. Jeremiah and Obadiah both speak of them as "dwelling in the clefts of the rocks," and making their habitations high in the cliffs, like the eyries of eagles (Jer. xlix. 16; Obad. 3, 4), language which is strikingly illustrated by a survey of the mountains and glens of Edom. Everywhere we meet with caves and grottoes hewn in the soft sandstone strata. Those at Petra are well known. [PETRA.] Their form and arrangements show that most of them were originally intended for habitations. They have closets and recesses suitable for family uses, and many have windows. The nature of the rock and the form of the cliffs made excavation an easier work than erection, besides the additional security, comfort, and permanence of such abodes. Indeed there is reason to believe that the commercial Nabatheans were the first who introduced buildings into Edom. It is worthy of remark also that the Edomites, when they took possession of southern Palestine, followed even there their old mode of life, and excavated caves and grottoes everywhere through the country. So Jerome in his Commentary on Obadiah writes—"Omnis Australis regio Idumæorum de Eleutheropoli usque ad Petram et Ailam (hæc est possessio Esau) in specubus habitavit: cuius habet: et propter nimis calores solis, quia meridiana provincia est, subterraneis tuguriis nititur." During a visit to this region in 1857 the writer of this article had an opportunity of inspecting a large number of these caverns, and has no hesitation in ranking them among the most remarkable of their kind in the world. [ELEUTHEROPOLIS.] The nature of the climate, the dryness of the soil, and their great size, render them healthy, pleasant, and commodious habitations, while their security made them specially suitable to a country exposed in every age to incessant attacks of robbers. [J. L. P.]

EDREI, 1. (עֲדְרֵי; 'Edraei, and 'Edraiv; Euseb. *Onom.* Αδραῖ; Arab. اذرع), one of the

two capital cities of Bashan (Num. xxi. 33; *Deut.* i. 4, iii. 10; Josh. xii. 4). In Scripture it is only mentioned in connexion with the victory gained by the Israelites over the Amorites under Og their king, and the territory thus acquired. Not a single allusion is made to it in the subsequent history of God's people, though it was within the territory allotted to the half tribe of Manasse (Num. xxxii. 33), and it continued to be a large and important city down to the seventh century of our era.

The ruins of this ancient city, still bearing the name *Edra*, stand on a rocky promontory which projects from the S.W. corner of the Lejah. [ARAB.] The site is a strange one—without water, without access, except over rocks and through de-

files all but impracticable. Strength and security seem to have been the grand objects in view. The rocky promontory is about a mile and a half wide by two miles and a half long; it has an elevation of from twenty to thirty feet above the plain, which spreads out from it on each side, flat as a sea, and of rare fertility. The ruins are nearly three miles in circumference, and have a strange wild look, rising up in black shattered masses from the midst of a wilderness of black rocks. A number of the old houses still remain; they are low, massive, and gloomy, and some of them are half buried beneath heaps of rubbish. In these the present inhabitants reside, selecting such apartments as are best fitted for comfort and security. The short Greek inscriptions which are here and there seen over the doors prove that the houses are at least as old as the time of Roman dominion. *Edra* was at one time adorned with a considerable number of public edifices, but time and the chances of war have left most of them shapeless heaps of ruin. Many Greek inscriptions are met with; the greater part of them are of the Christian age, and of no historic value.

The identity of this site with the Edrei of Scripture has been questioned by many writers, who follow the doubtful testimony of Eusebius (*Onom.* s. v. *Edrei* and *Astaroth*), and place the capital of Bashan at the modern *Der'a*, a few miles farther south. The following reasons have induced the present writer to regard *Edra* as the true site of Edrei. 1st. The situation is such as would naturally be selected for a capital city in early and troublous times by the rulers of a warlike nation. The principles of fortification were then little known, and consequently towns and villages were built on the tops of hills or in the midst of rocky fastnesses. The advantages of *Edra* in this respect are seen at a glance. *Der'a*, on the other hand, lies in the open country, without any natural advantages, exposed to the attack of every invader. It is difficult to believe that the warlike Replains would have erected a royal city in such a position. 2nd. The dwellings of *Edra* possess all the characteristics of remote antiquity—massive walls, stone roofs, stone doors. 3rd. The name Edrei, "strength," is not only descriptive of the site, but it corresponds more exactly to the Arabic *Edra* than to *Der'a*. In opposition to these we have the statement in Eusebius that Edrei was in his day called Adara, and was 24 Roman miles from Bostra. There can be no doubt that he refers to *Der'a*, which, as lying on a great road, was better known to him than *Edra*, and thus he was led hastily to identify it with Edrei.

It is probable that Edrei did not remain long in possession of the Israelites. May it not be that they abandoned it in consequence of its position within the borders of a wild region infested by numerous robber bands? The Lejah is the ancient Argob, and appears to have been the stronghold of the Geshurites; and they perhaps subsequently occupied Edrei (Josh. xii. 4, 5). The monuments now existing show that it must have been an important town from the time the Romans took possession of Bashan; and that it, and not *Der'a*, was the episcopal city of Adara, which ranked next to Bostra (Reland, *Pal.* pp. 219, 223, 348). In A.D. 1142, the Crusaders under Baldwin III. made a sudden attack upon Adara, then popularly called *Ciutat Bernardi de Stampis*, but they encountered such obstacles in the difficult nature of the ground,

the scarcity of water, and the valour of the inhabitants, that they were compelled to retreat. At the time of the visit of the present writer in 1854 the population amounted to about fifty families, of which some eight or ten were Christian, and the rest Mohammedan. A full account of the history and antiquities of Edrei is given in Porter's *Five Years in Damascus*, vol. ii. pp. 220 sq., and *Handbook for Syria and Palestine*, pp. 532 sq. See also Burckhardt's *Travels in Syria*, pp. 57 sq.; Buckingham's *Travels among the Arab Tribes*, p. 274.

2. A town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kedesh. It is only once mentioned in Scripture (Josh. xiii. 37). The name signifies "strength," or a "stronghold." About two miles south of Kedesh is a conical rocky hill called *Tell Khuraibeh*, the "Tell of the ruin," with some remains of ancient buildings on the summit and a rock-hewn tomb in its side. It is evidently an old site, and it may be that of the long-lost Edrei. The strength of the position, and its nearness to Kedesh, give probability to the supposition. Dr. Robinson (*Bibl. Res.* vol. iii. p. 365) suggests the identity of *Tell Khuraibeh* with *Iluzai*. For the objections to this theory see Porter's *Handbook for Syria and Palestine*, p. 442. [J. L. P.]

**EDUCATION.** Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Ex. xii. 26, xiii. 8, 14; Dent. iv. 5, 9, 10, vi. 2, 7, 20, vi. 19, 21; Acts xvii. 3; 2 Tim. iii. 15; Hist. of Susanna, 3; Joseph. c. Ap. ii. 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom, therefore, and instruction, of which so much is said in the Book of Proverbs, is to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. i. 2, 8, ii. 2, 10, iv. 1, 7, 20, viii. 1, ix. 1, 10, xii. 1, xvi. 22, xvii. 24, xxxi.). Implicit exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxxviii. 31, xxxiv. xl. xli.); of Daniel and his companions in captivity (Dan. i. 4, 17); and above all, in the intellectual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 K. iv. 29, 34, x. 1-9; 2 Chr. ix. 1-8), and the memory of which has, with much exaggeration, been widely preserved in Oriental tradition. The statement made above may, however, in all probability be taken as representing the chief aim of ordinary Hebrew education, both at the time when the Law was best observed, and also when, after periods of national decline from the Mosaic standard, attempts were made by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate reform in the moral condition of the people on the basis of that standard (2 K. xvii. 13, xxii. 8-20; 2 Chr. xvii. 7, 9; 1 K. xiv. 14; Is. i. et seq.).

In later times the prophecies, and comments on them as well as on the earlier Scriptures, together with other subjects, were studied (Prol. to Eccles., and Eccles. xxxvii. 24, 26, xxxix. 1-11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Hieronym. on *Titus*,

iii. 9; Calmet, *Dict. Géogr. et Hist.*). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child to steal (Mishn. *Kiddush*. ii. 2, vol. iii. p. 413; Surenhus.; Lightfoot, *Chron. Temp.* on Acts xvii. vol. ii. p. 79).

The sect of the Essenes, though themselves abjuring marriage, were anxious to undertake and careful in carrying out the education of children, but confined its subject matter chiefly to morals and the Divine law (Joseph. *B. J.* ii. 8, §12; Philo, *Quod omnis probus liber*, vol. ii. 458, ed. Mangey; §12, Tanchum.).

Previous to the captivity, the chief depositaries of learning were the schools or colleges, from which in most cases (see Am. vii. 14) proceeded that succession of public teachers, who at various times endeavoured to reform the moral and religious conduct of both rulers and people. [SCHOOLS OF PROPHETS.] In these schools the Law was probably the chief subject of instruction; the study of languages was little followed by any Jews till after the captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts xxi. 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mishn. *Sotah*, c. ix. 15, vol. iii. p. 307, 308, Surenhus.).

Besides the prophetic schools instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x. 11; Ez. xlv. 23, 24; 1 Chr. xxv. 7, 8; Mal. ii. 7). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity, were conspicuous in enforcing the religious education of the people (2 Chr. xvii. 7, 8, 9, xix. 5, 8, 11; 2 K. xxiii. 2).

From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighbourhood of the tribe of Zebulun to the commercial district of Phœnicia may have been the occasion of their reputation in this respect. The "writers" of that tribe are represented (Judg. v. 14) by the same word *כְּתָבִים*, used in that passage of the levying of an army or, perhaps, of a military officer (Gen. p. 966) as is applied to Ezra, in reference to the Law (Ezr. vii. 6); to Serubab, David's scribe or secretary (2 Sam. viii. 17); to Shebna, scribe to Hezekiah (2 K. xviii. 37); Sheamaiah (1 Chr. xxiv. 6); Baruch, scribe to Jeremiah (Jer. xxxvi. 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder *כְּתָבִים*, or historiographer, whose business was to compile memorials of the reign (2 Sam. viii. 16, xx. 24; 2 K. xviii. 18; 2 Chr. xxxiv. 8). Learning, in the sense above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence of others at table (Lightfoot, *Chr. Temp.* Acts xvii. vol. ii. 79, fol.; *Hor. Hebr.* Luke xiv. 8-24, ii. 540). The same authority deprecates the degeneracy of later times in this respect (Mishn. *Sotah*, ix. 15, vol. iii. 308, Suren.).

To the schools of the Prophets succeeded, after the captivity, the synagogues, which were either themselves used as schools or had places near them for that purpose. In most cities there was at least one, and in Jerusalem, according to some, 394, according to others, 460 (Calmet, *Dict. Ecoles.*). It was from these schools and the doctrines of the various teachers presiding over them, of whom Gamaliel, Sammai, and Hillel were among the most famous, that many of those traditions and refinements proceeded by which the Law was in our Lord's time encumbered and obscured, and which may be considered as represented, though in a highly exaggerated degree, by the Talmud. After the destruction of Jerusalem, colleges inheriting and probably enlarging the traditions of their predecessors, were maintained for a long time at Japhne in Galilee, at Lydda, at Tiberias, the most famous of all, and Sepphoris. These schools in process of time were dispersed into other countries, and by degrees destroyed. According to the principles laid down in the Mishna, boys at five years of age were to begin the Scriptures, at ten the Mishna, at thirteen they became subject to the whole Law (see Luke ii. 46), at fifteen they entered the Gemara (Mishna *Pirk. Ab.* iv. 20, v. 21, vol. iv. pp. 460, 482, 486, Surenhus.). Teachers were treated with great respect, and both pupils and teachers were exhorted to respect each other. Physical science formed part of the course of instruction (*ib.* iii. 18). Unmarried men and women were not allowed to be teachers of boys (*Kiddush*. iv. 13, vol. iii. p. 383). In the schools the Rabbins sat on raised seats, and the scholars, according to their age, sat on benches below or on the ground (Lightfoot on *Luke* ii. 46; Philo, *ibid.* 12, ii. 458, Mangey).

Of female education we have little account in Scripture, but it is clear that the prophetic schools included within their scope the instruction of females, who were occasionally invested with authority similar to that of the Prophets themselves (Judg. iv. 4; 2 K. xxii. 14). Needlework formed a large but by no means the only subject of instruction imparted to females, whose position in society and in the household must by no means be considered as represented in modern Oriental—including Mohammedan—usage (see Prov. xxxi. 16, 26; Hist. of Sns. 3; Luke xiii. 2, 3, x. 39; Acts xiii. 50; 2 Tim. i. 5).

Among modern Mohammedans, education, even of boys, is of a most elementary kind, and of females still more limited. In one respect it may be considered as the likeness or the caricature of the Jewish system, viz. that besides the most common rules of arithmetic, the Kurán is made the staple, if not the only subject of instruction. In Oriental schools, both Jewish and Mohammedan, the lessons are written by each scholar with chalk on tablets which are cleaned for a fresh lesson. All recite their lessons together aloud; faults are usually punished by stripes on the feet. Female children are, among Mohammedans, seldom taught to read or write. A few chapters of the Kurán are learnt by heart, and in some schools they are taught embroidery and needlework. In Persia there are many public schools and colleges, but the children of the wealthy parents are mostly taught at home. The Kurán forms the staple of instruction, being regarded as the model not only of doctrine but of style, and the textbook of all science. In the colleges, however,

mathematics are taught to some extent (Jahu, *Arch. Bibl.* §§106, 106, Engl. Tr.; Shaw, *Travels*, p. 194; Rawolf, *Travels*, c. vii. p. 60; Burckhardt, *Syria*, p. 326; *Travels in Arabia*, i. 275; Porter, *Damascus*, ii. p. 95; Lane, *Mod. Eg.*, i. p. 89, 93; *Englishw. in Eg.*, ii. 28, 31; Wellsted, *Arabia*, ii. 6, 395; Chardin, *Voyages*, iv. 224 (Langle); Olearius, *Travels*, p. 214, 215; Pietro della Valle, *Viaggi*, ii. p. 188). [SCHOOLS OF PROPHETS.] [H. W. P.]

**EGLAH** (עֵגְלָה, "a heifer"; Αἰγᾶλ and Ἀγλά; *Egla*), one of David's wives during his reign in Hebron, and the mother of his son Ithream (2 Sam. iii. 5; 1 Chr. iii. 3). In both lists the same order is preserved, Egla being the sixth and last, and in both is she distinguished by the special title of David's "wife." According to the ancient Hebrew tradition preserved by Jerome (*Quaest. Hebr.* on 2 Sam. in. 5, vi. 23) she was Michal, the wife of his youth; and she died in giving birth to Ithream. A name of this signification is common amongst the Arabs at the present day.

**EGLA'IM** (עֵגְלָיִם, "two ponds"; Ἀγαλείμ; *Gallim*), a place named only in Is. xv. 8, and there apparently as one of the most remote points on the boundary of Moab. It is probably the same as EN-EGLA'IM. A town of this name was known to Eusebius (*Onom.* Agallim), who places it 8 miles to the south of Areopolis, i. e. Ar-Moab (*Rabba*). Exactly in that position, however, stands *Kerak*, the ancient Kir Moab.

A town named Agalla is mentioned by Josephus with Zoar and other places as in the country of the Arabians (*Ant.* xiv. 1, §4).

With most of the places on the east of the Dead Sea, Egla'im yet awaits further research for its identification. [G.]

**EGL'ON** (עֵגְלוֹן; Ἐγλώμ; Joseph. Ἐγλών; *Egilon*), a king of the Moabites (Judg. iii. 12 ff.), who, aided by the Ammonites and the Amalekites, crossed the Jordan and took "the city of palaces," or Jericho (Joseph.). Here he built himself a palace (Joseph. *Ant.* v. 4, §1 ff.), and continued for eighteen years (Judg. and Joseph.) to oppress the children of Israel, who paid him tribute (Joseph.). Whether he resided at Jericho permanently, or only during the summer months (Judg. iii. 20; Joseph.), he seems to have formed a familiar intimacy (συνήθης, Joseph. not Judg.) with Ehud, a young Israelite (ἰσραήλιος, Joseph.), who lived in Jericho (Joseph. not Judg.), and who, by means of repeated presents, became a favourite courtier of the monarch. Josephus represents this intimacy as having been of long continuance; but in Judges we find no mention of intimacy, and only one occasion of a present being made, viz., that which immediately preceded the death of Egion. The circumstances attending this tragical event are somewhat differently given in Judges and in Josephus. That Ehud had the entrée of the palace is implied in Judges (iii. 19), but more distinctly stated in Josephus. In Judges the Israelites send a present by Ehud (iii. 15); in Josephus Ehud wins his favour by repeated presents of his own. In Judges we have two scenes, the offering of the present and the death scene, which are separated by the temporary withdrawal of Ehud (18, 19); in Josephus there is but one scene. The present is offered, the attendants are

dismissed, and the king enters into friendly conversation (δμιλᾶν) with Ehud. In Judges the place seems to change from the reception-room into the "summer-parlour," where Ehud found him upon his return (cf. 18, 20). In Josephus the entire action takes place in the summer-parlour (δωμάτιον). In Judges the king exposes himself to the dagger by rising apparently in respect for the divine message which Ehud professed to communicate (Patrick, *ad loc.*): in Josephus it is a dream which Ehud pretends to reveal, and the king, in delighted anticipation, springs up from his throne. The obesity of Egion, and the consequent impossibility of recovering the dagger, are not mentioned by Josephus (vid. Judg. iii. 17, *fat, ἀστέιος*, LXX.; but "crassus," Vulg., and so Gesen. *Lez.*).

After this desperate achievement Ehud repaired to Seirah (improp. Seirath; vid. Gesen. *Lez.* sub v.), in the mountains of Ephraim (iii. 26, 27), or Mount Ephraim (Josh. xix. 50). To this wild central region, commanding, as it did, the plains E. and W., he summoned the Israelites by sound of horn (a national custom according to Joseph.; A. V. "a trumpet"). Descending from the hills they fell upon the Moabites, dismayed and demoralized by the death of their king (Joseph. not Judg.). The greater number were killed at once, but 10,000 men made for the Jordan with the view of crossing into their own country. The Israelites, however, had already seized the fords, and not one of the unhappy fugitives escaped. As a reward for his conduct Ehud was appointed Judge (Joseph. not Judg.).

*Note.*—The "quarries that were by Gilgal" (iii. 19): in the margin better, as in Deut. vii. 25, "graven images" (Patrick *ad loc.*: cf. Gesen. *Heb. Lez.* sub v. עֲצָבִים).

[T. E. B.]

**EGL'ON** (עֵגְלוֹן; in Josh. x. Ὀδολλάμ, Vat. and Alex.; Αἰλάμ, Ἐγλώμ; *Egilon*, *Aylon*), a town of Judah in the *Shefelah* or low country (Josh. xv. 39). During the struggles of the conquest, Egion was one of a confederacy of five towns, which under Jerusalem attempted resistance, by attacking Gibeon after the treaty of the latter with Israel. Egion was then Ammonite, and the name of its king Debir (Josh. x. 3-5). The story of the overthrow of this combination is too well-known to need notice here (x. 23-25, &c.). Egion was soon after visited by Joshua and destroyed (x. 34, 35, xii. 12). The name doubtless survives in the modern *Aylan*, "a shapeless mass of ruins," "potsherds," and "scattered heaps of unhewn stones," covering a "round hillock" (Porter, *Handb.*; Van de Velde, ii. 188; Rob. ii. 49), about 10 miles from *Beit Jibrin* (Eleutheropolis) and 14 from Gaza, on the south of the great maritime plain.

In the Onomasticon it is given as *Egion quere et Odollam*; and its situation stated as 10 miles east of Eleutheropolis. The identification with Adullam arose no doubt from the reading of the LXX. in Josh. x., as given above; and it is to the site of that place, and not of Egion, that the remarks of Eusebius and Jerome refer. This will be seen on comparing *Adollam*. No reason has been assigned for the reading of the LXX. [G.]

**E'GYPT** (מִצְרַיִם, מִצְרַיִם, gent. n. מִצְרַיִם; Αἰγύπτος; *Aegyptus*), a country occupying the north-eastern angle of Africa, and lying between N. lat. 31° 37' and 24° 1', and E. long.

27° 13' and 34° 12'. Its limits appear to have been always very nearly the same. In Ezekiel (xxix. 10, xxx. 6), according to the obviously-correct rendering [MIZRAI], the whole country is spoken of as extending from Migdol to Syene, which indicates the same limits to the east and the south as at present. Egypt seems, however, to have been always held, except by the modern geographers, to include no more than the tract irrigated by the Nile lying within the limits we have specified. The deserts were at all times wholly different from the valley, and their tribes, more or less independent of the rulers of Egypt.

*Names.*—The common name of Egypt in the Bible is "Mizraim," or more fully "the land of Mizraim." In form Mizraim is a dual, and accordingly it is generally joined with a plural verb. When, therefore, in Gen. x. 6, Mizraim is mentioned as a son of Ham, we must not conclude that anything more is meant than that Egypt was colonized by descendants of Ham. The dual number doubtless indicates the natural division of the country into an upper and a lower region, the plain of the Delta and the narrow valley above, as it has been commonly divided at all times. The singular Mazon also occurs, and some suppose that it indicates Lower Egypt, the dual only properly meaning the whole country (thus Gesenius, *Thes.* s. v. מצרים, מצור), but there is no sure ground for this assertion. The mention of Mizraim and Pathros together (Is. xi. 11; Jer. xlv. 1, 15), even if we adopt the explanation which supposes Mizraim to be in these places by a late usage put for Mazon, by no means proves that since Pathros is a part of Egypt, Mizraim, or rather Mazon, is here a part also. The mention together of a part of a country as well as the whole is very usual in Hebrew phraseology. Gesenius thinks that the Hebrews supposed the word מצור to mean a limit, although he admits it may have had a different Egyptian origin. Since we cannot trace it to Egyptian, except as a translation, we consider it a purely Semitic word, as indeed would be most likely. Gesenius finds the signification "limit" in the Arabic name of Egypt,

مصر; but this word also means "red mud," the colour intended being either red or reddish brown.

Egypt is also called in the Bible מצרים, "the land of Ham" (Ps. cv. 23, 27; comp. lxxviii. 51), a name most probably referring to Ham the son of Noah [HAM]; and רַבִּי, Rabi, "the proud" or "insolent" [RABAB]: both these appear to be poetical appellations. The common ancient Egyptian name of the country is written in hieroglyphics KEM, which was perhaps pronounced Chem; the demotic form is KEMEE<sup>a</sup> (Brugsch, *Geographische Inschriften*, i. p. 73, No. 362); and the Coptic forms are ΧΗΕΗ, ΧΗΕΙ (M); ΚΗΕΕ, ΚΗΕΗ (S), and ΚΗΕΙ (B).<sup>b</sup> This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to the land on account of the blackness of its alluvial soil (comp. Plut. de Is. et Osir. c. 33. ἐτι τὴν Αἴγυπτον ἐν τοῖς μέγιστα μελάνγειον οὖσαν, ὥστε τὸ μέλαν τοῦ ὀφθαλμοῦ, Χημὴν καλοῦσι). It would

seem, as thus descriptive of the physical character of the land, to be the Egyptian equivalent of Mazon, if the meaning we have assigned to that word be the true one. In this case it would appear strange that it should correspond in sound to Ham, and in sense to Mazon or Mizraim. It is probable, however (comp. Plut. l. c.), that it also corresponded in sense to Ham, implying warmth as well as darkness.

In Arabic we find the cognate word حَمَا, "black fetid mud" (Kámoos), or "black mud" (Siháh, MS.), which suggests the identity of Ham and Mazon. Therefore we may reasonably conjecture that Kem is the Egyptian equivalent of Ham, and also of Mazon, these two words being similar or even the same in sense. The name Ham may have been prophetically given to Noah's son as the progenitor of the inhabitants of Egypt and neighbouring hot or dark countries. The other hieroglyphic names of Egypt appear to be of a poetical character.

Under the Pharaohs Egypt was divided into Upper and Lower, "the two regions" TA-TEE? called respectively "the Southern Region" TA-RES, and "the Northern Region" TA-MEHET. There were different crowns for the two regions, that of Upper Egypt being white, and that of Lower Egypt red, the two together composing the pschent. The sovereign had a special title as ruler of each region: of Upper Egypt he was SUTEN, "king," and of Lower Egypt SHEBT, "bee," the two combined forming the common title SUTEN-SHEBT. The initial sign of the former name is a bent reed, which illustrates what seems to have been a proverbial expression in Palestine as to the danger of trusting to the Pharaohs and Egypt (1 K. xviii. 21; Is. xxxvi. 6; Lz. xxix. 6): the latter name may throw light upon the comparison of the king of Egypt to a fly, and the king of Assyria to a bee (Is. vii. 18). It must be remarked that Upper Egypt is always mentioned before Lower Egypt, and that the crown of the former in the pschent rises above that of the latter. In subsequent times this double division obtained. Manetho speaks of τὴν τε ἄνω καὶ κάτω χώραν (ap. Jos. c. Apion. i. 14), and under the Ptolemies βασιλεὺς τῶν τε ἄνω καὶ τῶν κάτω χωρῶν (Rosetta Stone) occurs, as equivalent to the title mentioned above. In the time of the Greeks and Romans Upper Egypt was divided into the Heptanomis and the Thebais, making altogether three provinces, but the division of the whole country into two was even then the most usual.

*Superficies.*—Egypt has a superficies of about 9582 square geographical miles of soil, which the Nile either does or can water and fertilise. This computation includes the river and lakes as well as sandy tracts which can be inundated, and the whole space either cultivated or fit for cultivation is no more than about 5626 square miles. Anciently 2735 square miles more may have been cultivated, and now it would be possible at once to reclaim about 1295 square miles. These computations are those of Colonel Jacotin and M. Estève, given in the *Memoir of the former in the great French work (Description de l'Égypte, 2nd ed. xviii. pt. ii. pp. 101, et seqq.)*. They must be very nearly true of the actual state of the country at the present time. Mr. Lane calculated the extent of the cultivated land in A. H. 777,

<sup>a</sup> The system of transcribing ancient Egyptian is that given by the writer, in the *Encyclopædia Britannica*, 8th ed. art. "Hieroglyphics."

<sup>b</sup> The letters M, S, and B denote here and elsewhere the Memphitic, Sahidic, and Bashmuric dialects.

A.D. 1375-8, to be 5500 square geographical miles, from a list of the cultivated lands of towns and villages appended to De Sacy's *Add Allatif*. He thinks this list may be underrated. M. Mengin made the cultivated land much less in 1821, but since then much waste territory has been reclaimed (Mrs. Poole, *Englishwoman in Egypt*, i. p. 85). The chief differences in the character of the surface in the times before the Christian era were that the long valley through which flowed the canal between the Nile and the Red Sea was then cultivated, and that the Gulf of Suez extended much further north than at present.

*Nomes*.—From a remote period Egypt was divided into Nomes, HESPU, sing. HESI, each one of which had its special objects of worship. The monuments show that this division was as old as the earlier part of the Twelfth Dynasty, which began B.C. cir. 2082. They are said to have been first 36 in number. Ptolemy enumerates 44, and Pliny 46; afterwards they were further increased. There is no distinct reference to them in the Bible. In the LXX. version indeed, מִסְכָּרָה (Is. xix. 2) is rendered by *πόμους*, but we have no warrant for translating it otherwise than "kingdom." It is probable that at that time there were two, if not three, kingdoms in the country. Two provinces or districts of Egypt are mentioned in the Bible, Pathros and Caphtor; the former appears to have been part of Upper Egypt, the latter was certainly so, and must be represented by the Coptite Nome, although no doubt of greater extent. [PATHROS; CAPHTOR.]

*General appearance, Climate, &c.*—The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been abundant; whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly-bare yellow mountains or the sand-strewn rocky desert on either side. Thus the plain of Jordan before the cities were destroyed was, we read, "well watered every where" . . . "[even] like a garden of the Lord, like the land of Egypt" (Gen. xiii. 10). The climate is equable and healthy. Rain is not very unfrequent on the northern coast, but inland very rare. Cultivation nowhere depends upon it. This absence of rain is mentioned in Deut. (xi. 10, 11) as rendering artificial irrigation necessary, unlike the case of Palestine, and in Zech. (xiv. 18) as peculiar to the country. Egypt has been visited at all ages by severe pestilences, but it cannot be determined that any of those of ancient times were of the character of the modern Plague. The plague with which the Egyptians are threatened in Zech. (i. c.) is described by a word, מַגֵּפָה, which is not specially applicable to a pestilence of their country (see ver. 12). Cutaneous disorders, which have always been very prevalent in Egypt, are distinctly mentioned as peculiar to the country (Deut. vii. 15, xviii. 27, 35, 60, and perhaps Ex. xv. 20, though here the reference may be to the Plague of Boils), and as punishments to the Israelites in case of disobedience, whereas if they

obeyed they were to be preserved from them. The Egyptian calumny that made the Israelites a body of lepers and unclean (Jos. c. Apion.) is thus refuted, and the traditional tale as to the Exodus given by Manetho shown to be altogether wrong in its main facts which depend upon the truth of this assertion. Famines are frequent, and one in the middle ages, in the time of the Fâtîmeh Khaleefeh El-Mustansir-billah, seems to have been even more severe than that of Joseph. [FAMINE.]

*Geology*.—The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts covered or strewn with sand. On either side of the plain they are low, but they overlook the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. In Upper Egypt the mountains near the Nile rarely exceed 300 feet in their height, but far in the eastern desert they often attain a much greater elevation. The highest is *Gebel Ohârîb*, which rises about 6000 feet above the sea. Limestone, sandstone, and granite were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert between the Thebais and the Red Sea. An important geological change has in the course of centuries raised the country near the head of the Gulf of Suez, and depressed that on the northern side of the isthmus. Since the Christian era the head of the Gulf has retired southwards, as prophesied by Isaiah—"The Lord shall utterly destroy the tongue of the Egyptian sea" (xi. 15); "the waters shall fail from the sea" (xix. 5). The Delta is of a triangular form, its eastern and western limits being nearly marked by the courses of the ancient Pelusiac and Canopic branches of the Nile: Upper Egypt is a narrow winding valley, varying in breadth, but seldom more than 12 miles across, and generally broadest on the western side. Anciently there was a fertile valley on the course of the Canal of the Red Sea, the Land of Goshen, now called *Wâdi-t Tuneylât*: this is covered with the sands of the desert. [GOSHEN.] To the south, on the opposite side, is the oasis now called the *Foïyoom*, the old Arsinoite Nome, connected with the valley by a neck of cultivated land.

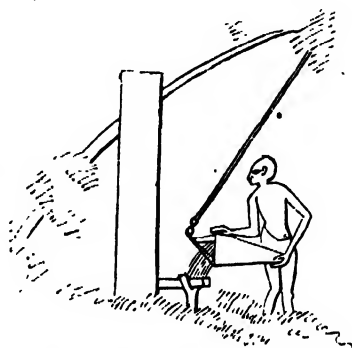

*The Nile*.—The Nile is called in the Bible *Shihor*, שִׁיחֹר, or "the black (river);" *Yecôr*, יַעֲרֹר, "the river," probably derived from the Egyptian ATUR, AUR; נַהַר מִצְרַיִם, "the river of Egypt;" and נַחַל מִצְרַיִם, either "the brook," if the first word be not a proper name, or else the "Nahal (Nile) of Egypt," to which, if the latter rendering be correct, נַחַל alone must be added. These names are discussed in another article. [NILE.] In Egyptian the Nile bore the sacred appellation HAFEE or HAFEE-MU, "the abyss," or "the abyss of waters." As Egypt was divided into two regions, we find two Niles, HAFEE-RES, "the Southern Nile," and HAFEE-MEHEET "the Northern Nile," the former name being given to the river in Upper Egypt and in Nubia. The common appellation is ATUR, or AUR, "the river," which may be compared to the Hebrew *Yecôr*. This word has been preserved in the Coptic appellation εἰρεπό,

ιαπο, ιαπω (M), ιεπο (S), which likewise also signifies "the river." The inundation, HAPPE-UR, "great Nile," or "high Nile," fertilizes and sustains the country, and makes the river its chief blessing; a very low inundation or failure of rising being the cause of famine. The Nile was on this account anciently worshipped, and the plague in which its waters were turned into blood, while injurious to the river itself and its fish (Ex. vii. 21; Ps. cv. 29), was a reproof to the superstition of the Egyptians. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation lasts about three months. During this time, and especially when near the highest, the river rapidly pours along its red turbid waters, and spreads through openings in its banks over the whole valley and plain. The prophet Amos, speaking of the ruin of Israel, metaphorically says that "the land . . . shall be drowned, as [by] the flood [river] of Egypt" (viii. 8, ix. 5). The rate at which the Nile deposits the alluvial soil of Egypt has been the subject of interesting researches, which have as yet led to no decisive result.

*Cultivation, Agriculture, &c.*—The ancient prosperity of Egypt is attested by the Bible as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated and well able to support its inhabitants, for it cannot be supposed that there was then much external traffic. In such a climate the wants of man are few, and nature is liberal in necessary food. Even the Israelites in their hard bondage did "eat freely" the fish and the vegetables and fruits of the country, and ever afterwards they longed to return to the idle plenty of a land where even now starvation is unknown. The contrast of the present state of Egypt to its former prosperity is more to be ascribed to political than to physical causes. It is true that the branches of the Nile have failed, the canals and the artificial lakes and ponds for fish are dried up; that the reeds and other water-plants which were of value in commerce, and a shelter for wild-fowl, have in most parts perished; that the land of Goshen, once, at least for pasture, "the best of the land" (Gen. xlvii. 6, 11), is now sand-strewn and unwatered so as scarcely to be distinguished from the desert around, and that the predictions of the prophets have thus received a literal fulfilment (see especially Is. xix. 5-10), yet this has not been by any irresistible aggression of nature, but because Egypt, smitten and accursed, has lost all strength and energy. The population is not large enough for the cultivation of the land now fit for culture, and long oppression has taken from it the power and the will to advance.

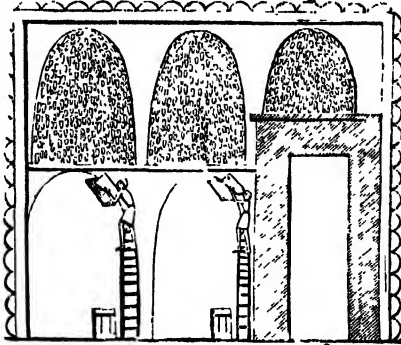

Egypt is naturally an agricultural country. As far back as the days of Abraham, we find that when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary—at least during famines—of the nations around. The inundation, as taking the place of rain, has always rendered the system of agriculture peculiar; and the artificial irrigation during the time of low Nile is necessarily on the same principle. We read of the Land of Promise that it is "not as the land of Egypt, from whence ye came out, where thou sowest thy seed, and waterest [it] with thy foot, as a garden of herbs: but the land whither thou goest in to possess it,

[is] a land of hills and valleys, [and] drinketh water of the rain of heaven" (Deut. xi. 10, 11). Watering with the foot may refer to some mode of irrigation by a machine, but we are inclined to think that it is an idiomatic expression implying a laborious work. The monuments do not afford a representation of the supposed machine. That now called the shádóof, which is a pole having a weight

Shádóof, or pole and bucket, for watering the garden. (Wilkinson)

at one end and a bucket at the other, so hung that the labourer is aided by the weight in raising the full bucket, is depicted, and seems to have been the common means of artificial irrigation. There are detailed pictures of breaking up the earth, or ploughing, sowing, harvest, threshing, and storing

Granary, showing how the grain was put in, and that the doors a b were intended for taking it out. (Wilkinson.)

the wheat in granaries. The threshing was simply treading out by oxen or cows, unmuazzled (comp. Deut. xxv. 4). The processes of agriculture began as soon as the water of the inundation had sunk into the soil, about a month after the autumnal equinox, and the harvest-time was about and soon after the vernal equinox (Ex. ix. 31, 32). Vines were extensively cultivated, and there were several different kinds of wine, one of which, the Marotic, was famous among the Romans. Of other fruit-trees, the date-palm was the most common and valuable. The gardens resembled the fields, being watered in the same manner by irrigation. On the tenure of land much light is thrown by the history

of Joseph. Before the famine each city and large village—for  $\text{רָאִי}$  must be held to have a wider signification than our "city"—had its field (Gen. xli. 48); but Joseph gained for Pharaoh all the land, except that of the priests, in exchange for food, and required for the right thus obtained a fifth of the produce, which became a law (xlvii. 20-26). The evidence of the monuments, though not very explicit, seems to show that this law was ever afterwards in force under the Pharaohs. The earliest records afford no information as to the tenure of land; but about Joseph's time we find frequent mention of villages with their lands, the two being described under one designation, as held by the great officers of the crown, apparently by the royal gift. There does not seem to have been any hereditary aristocracy, except perhaps at an earlier time, and it is not impossible that these lands may have been held during tenure of office or for life. The temples had lands which of course were inalienable. Diodorus Siculus states that all the lands belonged to the crown except those of the priests and the soldiers (i. 73). It is probable that the latter, when not employed on active service, received no pay, but were supported by the crown-lands, and occupied them for the time as their own. [JOSEPH.] The great lakes in the north of Egypt were anciently of high importance, especially for their fisheries and the growth of the papyrus. Lake Menzeleh, the most eastern of the existing lakes, has still large fisheries, which support the people who live on its islands and shore, the rude successors of the independent Egyptians of the Bucolia. Lake Moeris, anciently so celebrated, was an artificial lake between Bence-Suwey and Medeenet El-Feyoom. It was of use to irrigate the neighbouring country, and its fisheries yielded a great revenue. It is now entirely dried up. The canals are now far less numerous than of old, and many of them are choked and comparatively useless. The Bahr Yoosuf, or "river of Joseph"—not the patriarch, but the famous Sultán Yoosuf Salâh-eddeen, who repaired it—is a long series of canals, near the desert on the west side of the river, extending northward from Farshoot for about 350 miles to a little below Memphis. This was probably a work of very ancient times. There can be no doubt of the high antiquity of the Canal of the Red Sea, upon which the land of Goshen mainly depended for its fertility. It does not follow, however, that it originally connected the Nile and the Red Sea.

**Botany.**—The cultivable land of Egypt consists almost wholly of fields, in which are very few trees. There are no forests and few groves, except of date-palms, and in Lower Egypt a few of orange and lemon-trees. There are also sycomores, mulberry-trees, and acacias, either planted on the sides of roads or standing singly in the fields. The Theban palm grows in the Thebais, generally in clumps. These were all, except, perhaps, the mulberry-tree, of old common in the country. The two palms are represented on the monuments, and sycamore and acacia-wood are the materials of various objects made by the ancient inhabitants. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and there are many others less common or important. These were

also of old produced in the country. Anciently gardens seem to have received great attention, to have been elaborately planned, and well filled with trees and shrubs. Now horticulture is neglected, although the modern inhabitants are as fond of flowers as were their predecessors. The vegetables are of many kinds and excellent, and form the chief food of the common people. Anciently cattle seem to have been more numerous, and their meat, therefore, more usually eaten, but never as much so as in colder climates. The Israelites in the desert, though they looked back to the time when they "sat by the flesh pots" (Ex. xvi. 3), seem as much to have regretted the vegetables and fruits, as the flesh and fish of Egypt. "Who shall give us flesh to eat." We remember the fish which we did eat in Egypt freely, the cucumbers, and the melons, and the leeks, and the onions, and the garlick" (Num. xi. 4, 5). The chief vegetables now are beans, peas, lentils, of which an excellent thick pottage is made (Gen. xxi. 34), leeks, onions, garlic, radishes, carrots, cabbages, gourds, cucumbers, the tomato, and the egg-fruit. There are many besides these. The most important field-produce in ancient times was wheat; after it must be placed barley, millet,

Vineyard. (Wilkinson.)

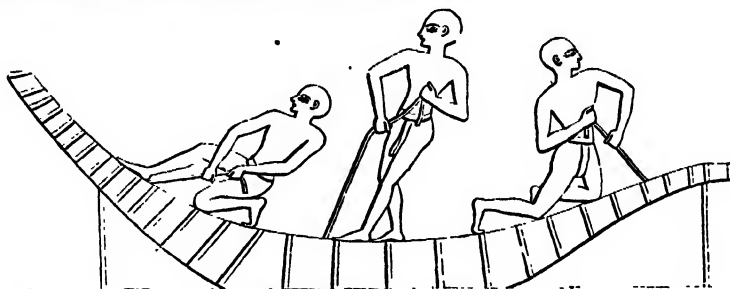

flax, and among the vegetables, lentils, peas, and beans. At the present day the same is the case; but maize, rice, oats, clover, the sugar-cane, roses, the tobacco-plant, hemp, and cotton, must be added; some of which are not indigenous. In the account of the plague of Hail four kinds of field-produce are mentioned—Bar, barley, wheat, and  $\text{חֲבֵצֵת}$  (Ex. ix:31, 32), which is variously rendered in the A. V. "rye" (l. c.), "spelt" (Is. xxvii. 25), and "fitches" (Is. xxviii. 27). It is doubted whether the last be a cereal or a leguminous product: we incline to the former opinion. (See RYE.) It is clear from the evidence of the monuments and of ancient writers that, of old, reeds were far more common in Egypt than now. The byblus or papyrus is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of their thin leaves the famous paper was manufactured. It appears to be mentioned under two names in the Bible, neither of which, however, can be proved to be a peculiar designation for it.

\* It may be well to mention that the writer knows no satisfactory instance of wheat found in ancient

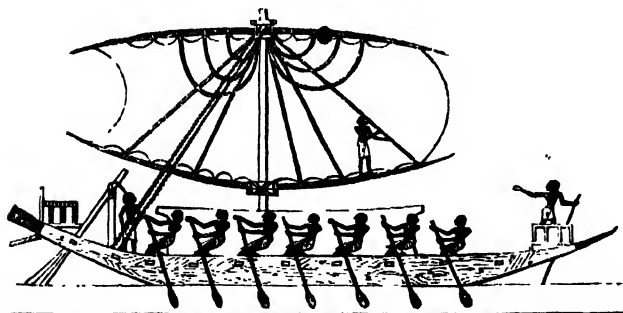

Egyptian tombs having germinated on being sown in our own time.

(1.) The mother of Moses made **נֹפֶת** **נֹפֶת**, "an ark" or "skiff" "of papyrus" in which to put her child (Ex. ii. 3), and Isaiah tells of messengers sent apparently from furthest Ethiopia in **בְּלִי-נֹפֶת**, "vessels of papyrus" (xviii. 2), in both which cases **נֹפֶת** must mean papyrus, although it would seem in other places to signify "reeds" generically.<sup>d</sup> (2.) Isaiah prophesies "the papyrus-reeds (**שָׁרִית**) in the river (**נַחַל**), on the edge of the river, and everything growing [lit. sown] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix. 7). Gesenius renders **שָׁרִית** a naked or bare place, here grassy places on the banks of the Nile. Apart from the fact that little grass grows on the banks of the Nile, in Egypt,

and that little only during the cooler part of the year, instead of those sloping meadows that must have been in the European scholar's mind, this word must mean some product of the river which with the other water-plants should be dried up, and blown away, and utterly disappear. Like the fisheries and the flax mentioned with it, it ought to hold an important place in the commerce of ancient Egypt. It can therefore scarcely be reasonably held to intend anything but the papyrus. The marine and fluvial product **סִנִּי**, from which the Red Sea was called **סִין-סִנִּי**, will be noticed in art. RED SEA. The lotus was anciently the favourite flower, and at feasts it took the place of the rose among the Greeks and Arabs: it is now very rare.

Making a papyrus boat. (Wilkinson.)

Boat of the Nile, showing how the sail was fastened to the yards, and the nature of the rigging. (Wilkinson.)

**Zoology.**—Of old Egypt was far more a pastoral country than at present. The neat cattle are still excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xli. 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any, except a few in the houses of Copts and Franks. Under the Pharaohs the horses of the country were in repute among the neighbouring nations, who purchased them as well as chariots out of Egypt. Thus it is commanded respecting a king of Israel: "he shall not multiply horses to himself, nor cause the people

to return to Egypt, to the end that he should multiply horses: forasmuch as the Lord hath said unto you, Ye shall henceforth return no more that way" (Deut. xvii. 16),—which shows that the trade in horses was with Egypt, and would necessitate a close alliance. "Solomon had horses brought out of Egypt, and linen yarn: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred [shekels] of silver, and an horse for an hundred and fifty; and so for all the kings of the Hittites and for the kings of Syria did they bring [them] out by their hand" (1 K. x. 28, 29). The num-

<sup>d</sup> In Job viii. 11, Ps. xxxv. 7, the word is probably used generically.

<sup>e</sup> In a tomb near the Pyramids of El-Geezeh, of the time of Shaf-ra, second king of the viii dynasty, the flocks and herds of the chief occupant are represented and their numbers thus given: 835 oxen, 220 cows with their calves, 2234 goats, 760 asses with their

young, and 974 sheep. Job had at the first 7000 sheep, 3000 camels, 500 yoke of oxen, 500 she-asses (1. 3), and afterwards double in each case (xlii. 12). The numbers are round, but must be taken as an estimate of a large property of this kind in the patriarchal times.

ber of horses kept by this king for chariots and cavalry was large (iv. 26, x. 26; 2 Chr. i. 14, ix. 25).<sup>1</sup> Some of these horses came as yearly tribute from his vassals (1 K. x. 25). In later times the prophets reproved the people for trusting in the help of Egypt, and relying on the aid of her horses and chariots and horsemen, that is, probably, men in chariots, as we shall show in speaking of the Egyptian armies. The kings of the Hittites, mentioned in the passage quoted above, and in the account of the close of the siege of Samaria by Benhadad, where we read—"the Lord had made the host of the Syrians to hear a noise of chariots, and a noise of horses, [even] the noise of a great host: and they said one to another, Lo, the king of Israel hath hired against us the kings of the Hittites, and the kings of the Egyptians to come upon us" (2 K. vii. 6)—these kings ruled the Hittites of the valley of the Orontes, who were called by the Egyptians SHIETA or KIETA. The Pharaohs of the xviii, xix, and xxth dynasties waged fierce wars with these Hittites, who were then ruled by a great king and many chiefs, and whose principal arm was a force of chariots, resembling those of the Egyptian army.—Asses were anciently numerous: the breed at the present time is excellent. Dogs were formerly more prized than now, for being held by most of the Muslims to be extremely unclean, they are only used to watch the houses in the villages. The camel has nowhere been found mentioned in the inscriptions of Egypt, or represented on the monuments. In the Bible Abraham is spoken of as having camels when in Egypt, apparently as a gift from Pharaoh (Gen. xii. 16), and before the Exodus the camels of Pharaoh or his subjects were to be smitten by the murrain (Ex. ix. 3, comp. 6). Both these Pharaohs were probably Shepherds. The Ishmaelites or Midianites who took Joseph into Egypt, carried their merchandise on camels (Gen. xxxvii. 25, 28, 36), and the land-traffic of the Arabs must always have been by caravans of camels; but it is probable that camels were not kept in Egypt, but only on the frontier. On the black obelisk from Nimroud, now in the British Museum, which is of Shalmanubar, king of Assyria, contemporary with Jehu and Hazael, camels are represented among objects sent as tribute by Egypt. They are of the two-humped sort, which, though perhaps then common in Assyria, has never, as far as is known, been kept in Egypt. The deserts have always abounded in wild animals, especially of the canine and antelope kinds. Anciently the hippopotamus was found in the Egyptian Nile, and hunted. This is a fact of importance for those who suppose it to be the behemoth of the book of Job, especially as that book shows evidence of a knowledge of Egypt. Now, this animal is rarely seen even in Lower Nubia. The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, have been driven further south than his brother

pachyderm, for the name of the Island of Elephantine, just below the First Cataract, in hieroglyphics, AB. . . "Elephant-land," seems to show that he was anciently found there. Bats abound in the temples and tombs, filling the dark and deserted chambers and passages with the unearthly whirr of their wings. Such desolation is represented by Isaiah when he says that a man shall cast his idols "to the moles and to the bats" (ii. 20).

The birds of Egypt are not remarkable for beauty of plumage: in so open a country this is natural. The *Rapaces* are numerous, but the most common are scavengers, as vultures and the kite. The *Grallatores* and *Anseres* abound on the islands and sandbanks of the river and in the sides of the mountains which approach or touch the stream.

Among the reptiles, the crocodile must be especially mentioned. In the Bible it is usually called תנין, תַּנִּינִים, "dragon," a generic word of almost as wide a signification as "reptile," and is used as a symbol of the king of Egypt.<sup>2</sup> Thus in Ezekiel, "Behold I am against thee, Pharaoh king of Egypt, the great dragon that lieth in the midst of his rivers, which hath said, My river [is] mine own, and I have made [it] for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will leave thee [thrown] into the wilderness, thee and all the fish of thy rivers. . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven" (xxix. 3, 4, 5). Here there seems to be a retrospect of the Exodus, which is thus described in Is. li. 9, 10, and 15? and with a more close resemblance in Ps. lxxiv. 13, 14, "Thou didst divide the sea by thy strength: thou brakest the heads of the dragons (תַּנִּינִים) in the waters. Thou brakest the heads of leviathan (לִיְיָתָן) in pieces, [and] gavest him [to be] meat to the dwellers in the wilderness" (פֶּסַח, t. c. to the wild beasts, comp. Is. xiii. 21). The last passage is important as indicating that whereas תַּנִּינִים is the Hebrew generic name of reptiles, and therefore used for the greatest of them, the crocodile, לִיְיָתָן is the special name of that animal. The description of leviathan in Job (xli.) fully bears out this opinion, and it is doubtful if any passage can be adduced in which a wider signification of the latter word is required.<sup>3</sup> In Job (xxvi. 12) also there is an apparent allusion to the Exodus in words similar to those in Isaiah (li. 9, 10, and 15?), but without a mention of the dragon. In this case the division of the sea and the smiting of רֶמֶס, the proud or insolent, are mentioned in connexion with the wonders of creation (vs. 7-11, 13): so too in Is. (vs. 13, 15). The crossing of the Red Sea

<sup>1</sup> The number of Solomon's chariots is given as 1400, and his horsemen 12,000. The stalls of horses are stated as 40,000 (1 K. iv. 26), or 4000 (2 Chr. ix. 25): the former would seem to be the correct number.

<sup>2</sup> It is supposed by commentators to mean the country also; but this cannot, we think, be proved.

<sup>3</sup> Gesenius (*Theas.* s. v.) would take לִיְיָתָן for a serpent in Job iii. 8, Is. xxvii. 1, and in the latter case supposes the king of Babylon to be meant. In the first passage the meaning "crocodile" is, how-

ever, especially applicable. The patriarch speaks of desperate men as those "who are ready to stir up leviathan:" comp. xli. 2; A. V. 10, "None [is so] fierce as to stir him up. Who then can stand before me?" The argument is, that if the creature be so terrible, who shall resist the Creator? The second passage seems to refer not to the king of Babylon, but to the enemies of God's people at a remote time (Is. xxiv. xxv., xxvi., esp. ver. 19, and xxvii. esp. vs. 12, 13: comp. the similar use of Egypt, &c., in Rev. xi. 8).

could be thus spoken of as a signal exercise of the Divine power.—Frogs are very numerous in Egypt, and their loud and constant croaking in the autumn in “the streams,” נַהֲרֹת, “the rivers,” יַאֲרִים, and “the ponds” or “marshes,” מַנְתָּיִם (Ex.

viii. 1, A. V. 5) makes it not difficult to picture the plague of Frogs. Serpents and snakes are also common, but the more venomous have their home, like the scorpion, in the desert (comp. Deut. viii. 15).—The Nile and lakes have an abundance of fishes; and although the fisheries of Egypt have very greatly fallen away their produce is still a common article of food.—Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud, and, as in the plague, eat every herb and fruit and leaf where they alight; but they never, as then, overspread the whole land (Ex. x. 3-6, 12-19). They disappear as suddenly as they come, and are carried away by the wind (vs. 19). As to the lice and flies, they are now plagues of Egypt; but it is not certain that the words בָּנָם וְעָרֹב designate them (Ex. viii. 16-31).

*Ancient Inhabitants.*—The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Nigritians and the Caucasians. The constant immigrations of Arab settlers have greatly diminished the Nigritian characteristics in the generality of the modern Egyptians. The ancient dress was far more scanty than the modern, and in this matter, as in manners and character, the influence of the Arab race is also very apparent. The ancient Egyptians in character were very religious and contemplative, but given to base superstition, patriotic, respectful to women, hospitable, generally fugil, but at times luxurious, very sensual, lying, thievish, treacherous, and cringing, and intensely prejudiced, through pride of race, against strangers, although kind to them. This is very much the character of the modern inhabitants, except that Mohammedanism has taken away the respect for women. The ancient Egyptians are indeed the only early eastern nation that we know to have resembled the modern westerns in this particular; but we find the same virtues markedly to characterize the Nigritians of our day. That the Egyptians, in general, treated the Israelites with kindness while they were in their country, even during the oppression, seems almost certain from the privilege of admission into the congregation in the third generation, granted to them in the Law, with the Edomites, while the Ammonites and Moabites were absolutely excluded, the reference in three out of the four cases being to the stay in Egypt and the entrance into Palestine (Deut. xviii. 3-8). This supposition is important in its bearing on the history of the oppression.

*Language.*—The ancient Egyptian language, from the earliest period at which it is known to us, is an agglutinate monosyllabic form of speech. It is expressed by the signs which we call hieroglyphics. The character of the language is compound: it consists of elements resembling those of the Nigritian languages and the Chinese language, on the one hand, and those of the Semitic languages on the other. All those who

have studied the African languages make a distinct family of several of those languages, spoken in the north-east quarter of the continent, in which family they include the ancient Egyptian; while every Semitic scholar easily recognises in Egyptian Semitic pronouns and other elements, and a predominantly Semitic grammar. As in person, character, and religion, so in language we find two distinct elements, mixed but not fused, and here the Nigritian element seems unquestionably the earlier. Bunsen asserts that this language is “ante-historical Semitism:” we think it enough to say that no Semitic scholar has accepted his theory. For a full discussion of the question see *The Genesis of the Earth and of Man*, ch. vi. As early as the age of the xxvith dynasty a vulgar dialect was expressed in the demotic or enchorial writing. This dialect forms the link connecting the old language with the Coptic or Christian Egyptian, the latest phasis. The Coptic does not very greatly differ from the monumental language, distinguished in the time of the demotic as the sacred dialect, except in the presence of many Greek words.

*Religion.*—The basis of the religion was Nigritian fetishism, the lowest kind of nature-worship, differing in different parts of the country, and hence obviously indigenous. Upon this were engrafted, first, cosmic worship, mixed up with traces of primeval revelation, as in Babylonia; and then, a system of personifications of moral and intellectual abstractions. The incongruous character of the religion necessitates this supposition, and the ease with which it admitted extraneous additions in the historical period confirms it. There were three orders of gods—the eight great gods, the twelve lesser, and the Osirian group. They were represented in human forms, sometimes having the heads of animals sacred to them, or bearing on their heads cosmic or other objects of worship. The fetishism included, besides the worship of animals, that of trees, rivers, and hills. Each of these creatures or objects was appropriated to a divinity. There was no prominent hero-worship, although deceased kings and other individuals often received divine honours—in one case, that of Sesertesen III., of the xiiith dynasty, the old Sesostris, of a very special character. Sacrifices of animals, and offerings of all kinds of food, and libations of wine, oil, and the like, were made. The great doctrines of the immortality of the soul, man’s responsibility, and future rewards and punishments, were taught. Among the rites, circumcision is the most remarkable: it is as old as the time of the ivth dynasty.

The Israelites in Egypt appear during the oppression, for the most part, to have adopted the Egyptian religion (Josh. xxiv. 14; Ex. xx. 7, 8). The golden calf, or rather steer, עֲגֹלָה, was probably taken from the bull Apis, certainly from one of the sacred bulls. Remphan and Chnum were foreign divinities adopted into the Egyptian Pantheon, and called in the hieroglyphics RENPU (probably pronounced REMPU) and KEN. It can hardly be doubted that they were worshipped by the Shepherds; but there is no satisfactory evidence that there was any separate foreign system of idolatry. [REMPHAN.] Ashtoreth was worshipped at Memphis, as is shown by a tablet of Amenoph II., B.C. cir. 1400, at the quarries of Turā.

<sup>1</sup> Gesenius (*Theo. s. v.*) understands this word here and in Ex. vii. 19 to mean the stagnant pools left by the Nile after the inundation. At the season to which the narrative refers these would have been dried up,

although there would be many marshy places, especially near the north coast and towards the ancient head of the Red Sea.

opposite that city (Vyse's *Pyramids*, iii. "Tourah tablet 2"), in which she is represented as an Egyptian goddess. The temple of "the Foreign Venus" in "the Tyrian camp" in Memphis (Herod. ii. 112) must have been sacred to her. Doubtless this worship was introduced by the Phœnician Shepherds.

As there are prominent traces of primeval revelation in the ancient Egyptian religion, we cannot be surprised at finding certain resemblances to the Mosaic Law, apart from the probability that whatever was unobjectionable in common belief and usages would be retained. The points in which the Egyptian religion shows strong traces of truth are, however, doctrines of the very kind that the Law does not expressly teach. The Egyptian religion, in its reference to man, was a system of responsibility, mainly depending on future rewards and punishments. The Law, in its reference to man, was a system of responsibility mainly depending on temporal rewards and punishments. All we learn, but this is of the utmost importance, is that every Israelite who came out of Egypt must have been fully acquainted with the universally-recognised doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments, truths which the Law does not, and of course could not, contradict. The idea that the Law was an Egyptian invention is one of the worst examples of modern reckless criticism.

*Laws.*—We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The passages in the Bible which throw light upon the laws in force during the sojourn of the Israelites in Egypt most probably do not relate to purely native law, nor to law administered to natives, for during that whole period they appear to have been under Shepherd rulers, and in any case it cannot be doubted that they would not be subject to absolutely the same system as the Egyptians. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and without military protection. We must therefore infer that the laws relating to the maintenance of order were sufficient and strictly enforced. The punishments seem to have been lighter than those of the Mosaic Law, and very different in their relation to crime and in their nature. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more severely treated than offences against religion and morals. Popular feeling seems to have taken the duties of the judge upon itself in the case of impiety alone. That in early times the Egyptian populace acted with reverence to any offence against its religion as it did under the Greeks and Romans, is evident from the answer of Moses when Pharaoh proposed that the Hebrews should sacrifice in the land. "It is not meet so to do; for we shall sacrifice the abomination of the Egyptians to the Lord our God: lo, shall we sacrifice the abomination of the Egyptians before their eyes, and will they not stone us?" (Ex. viii. 26).

*Government.*—The government was monarchical, but not of an absolute character. The sovereign was not superior to the laws, and the priests had the power to check the undue exercise of his authority. The kings under whom the Israelites lived seem to have been absolute, but even Joseph's Pharaoh did not venture to touch the independence of the priests. Nomes and districts

were governed by officers whom the Greeks called nomarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period, for indications of something of the kind occur in the inscriptions of the ivth and xiith dynasties.

*Foreign Policy.*—The foreign policy of the Egyptians must be regarded in its relation to the admission of foreigners into Egypt and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusiveness which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of preserving the institutions of the country from the influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern ports until Naucratis was opened to them, and hence too the restriction of Shemite settlers in earlier times to the land of Goshen, scarcely regarded as part of Egypt. It may be remarked as a proof of the strictness of this policy that during the whole of the sojourn of the Israelites they appear to have been kept to Goshen. The key to the policy towards foreign nations, after making allowance for the hatred of the yellow and white races balanced by the regard for the red and black, is found in the position of the great oriental rivals of Egypt. The supremacy or influence of the Pharaohs over the nations lying between the Nile and the Euphrates depended as much on wisdom in policy as prowess in arms. The kings of the ivth, vith, and xvth dynasties appear to have uninterruptedly held the peninsula of Sinai, where tablets record their conquest of Asiatic nomads. But with the xviiiith dynasty commences the period of Egyptian supremacy. Very soon after the accession of this powerful line most of the countries between the Egyptian border and the Tigris were reduced to the condition of tributaries. The empire seems to have lasted for nearly three centuries, from about B.C. 1500 to about 1200. The chief opponents of the Egyptians were the Hittites of the valley of the Orontes with whom the Pharaohs waged long and fierce wars. After this time the influence of Egypt declined; and until the reign of Shishak (B.C. dir. 990-967), it appears to have been confined to the western borders of Palestine. No doubt the rising greatness of Assyria caused the decline. Thenceforward to the days of Pharaoh Necho there was a constant struggle for the tracts lying between Egypt, and Assyria and Babylonia, until the disastrous battle at Carchemish finally destroyed the supremacy of the Pharaohs. It is probable that during the period of the empire an Assyrian or Babylonian king generally supported the opponents of the rulers of Egypt. Great aid from a powerful ally can indeed alone explain the strong resistance offered by the Hittites. The general policy of the Egyptians towards their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them Egyptian garrisons, except in some important positions, nor attempted those depotations that are so marked a feature of Asiatic policy. In the case of those nations which never attacked them they do not appear to have even exacted tribute. So long as their general supremacy was uncontested they would not be unwise enough to make favourable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the

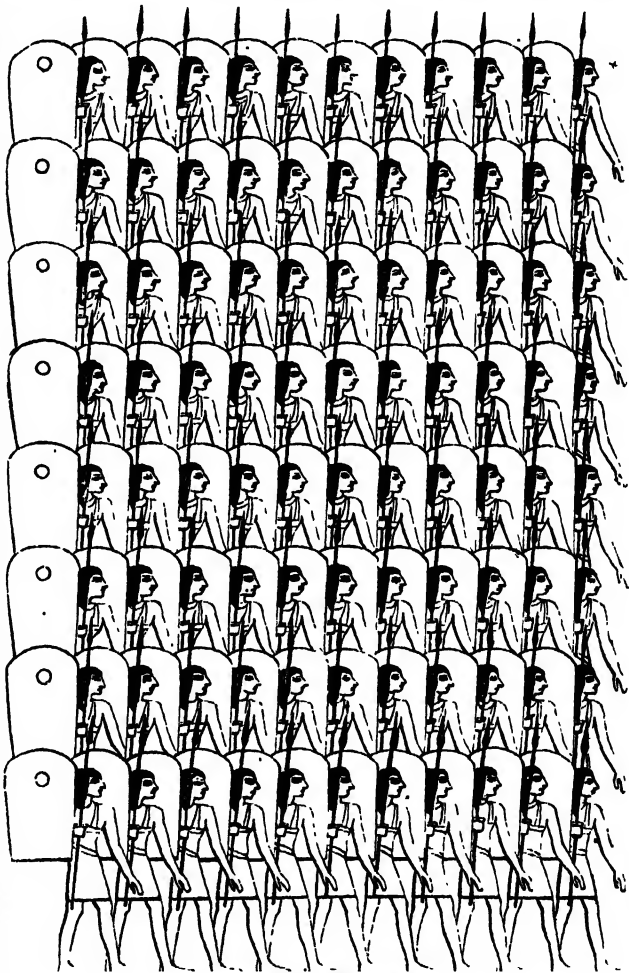

later part is fully consistent with what we have said of the general policy of the Pharaohs. Shishak and Zerah, if the latter were, as we believe, a king of Egypt or a commander of Egyptian forces, are the only exceptions in a series of friendly kings, and they were almost certainly of Assyrian or Babylonian extraction. One Pharaoh gave his daughter in marriage to Solomon, another appears to have been the ally of Jehoram, king of Israel (2 K. vii. 6). So made a treaty with Hoshea, Tirhakah aided Hozekiah, Pharaoh Necho fought Josiah against

his will, and did not treat Judah with the severity of the Oriental kings, and his second successor, Pharaoh Hophra, maintained the alliance, notwithstanding this break, as firmly as before, and although foiled in his endeavour to save Jerusalem from the Chaldeans, received the fugitives of Judah, who, like the fugitives of Israel at the capture of Samaria, took refuge in Egypt. It is probable that during the earlier period the same friendly relations existed. The Hebrew records of that time afford no distinct indication of hostility with Egypt, nor have the Egyptian lists of conquered regions and towns of the same age been found to contain any Israelite name, whereas in Shishak's list the kingdom of Judah and some of its towns occur. The route of the earlier Pharaohs to the east seems always to have been along the Palestinian coast, then mainly held by the Philistines and Phoenicians, both of whom they subdued, and across Syria northward of the territories occupied by the Hebrews.—With respect to the African nations a different policy appears to have been pursued. The Rebu (Lebu) or Lubim, to the west of Egypt, on the north coast, were reduced to

subjection, and probably employed, like the Shaietana or Cherethim, as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, "the Prince of Kesh (Cush)," and the assimilation was so complete that Ethiopian sovereigns seem to have been received by the Egyptians as native rulers. Further south, the Negroes were subject to predatory attacks like the slave-hunts of modern times, conducted not so much from

motives of hostility as to obtain a supply of slaves. In the Bible we find African peoples, Lubim, Phut, Sukkiim, Cush, as mercenaries or supporters of Egypt, but not a single name that can be positively placed to the eastward of that country.

*Army.*—There are some notices of the Egyptian army in the O. T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of the Exodus led 600 chosen chariots besides his whole chariot-force in pursuit of the Israelites. The warriors fighting in chariots

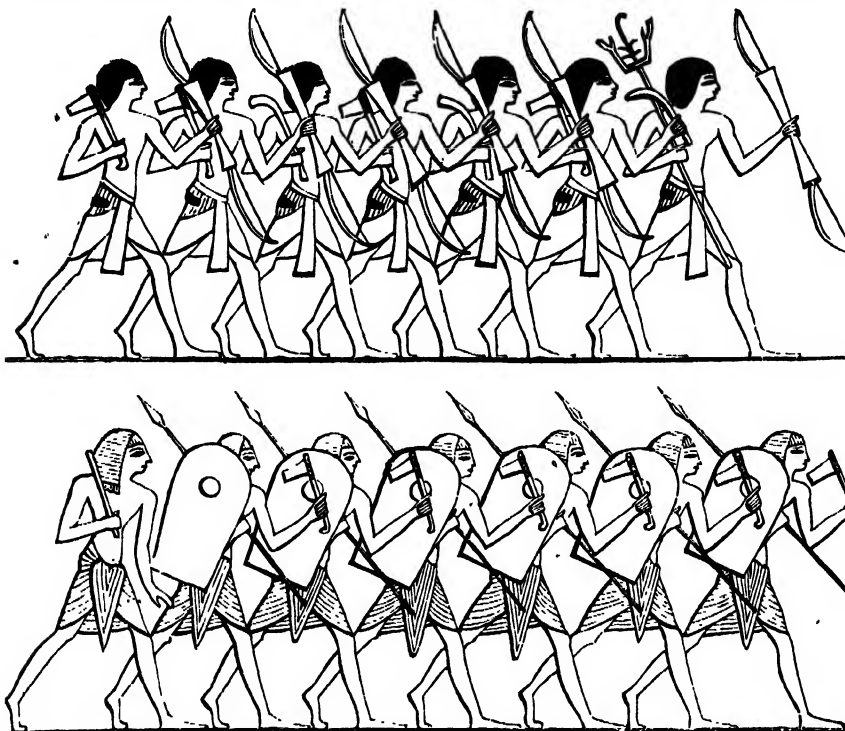

Phalanx of heavy infantry. (Wilkinson.)

are probably the "horsemen" mentioned in the relation of this event and elsewhere, for in Egyptian they are called the "horse" or "cavalry." We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the xxiid dynasty, when we find that Shishak's invading force was partly composed of foreigners; whether mercenaries or allies, cannot as yet be positively determined, although the monu-

ments make it most probable that they were of the former character. The army of Necho, defeated at Carchemish, seems to have been similarly

composed, although it probably contained Greek mercenaries, who soon afterwards became the most important foreign element in the Egyptian forces.

Disciplined troops of the time of the XVIIIth Dynasty. (Wilkinson.)

*Domestic Life.*—The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's great work. What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem-system of seclusion. The wife is called "the lady of the house." Marriage appears to have been universal, at least with the richer class; and if polygamy were tolerated it was rarely practised. Of marriage-ceremonies no distinct account has been discovered, but there is evidence that something of the kind was usual in the case of a queen (De Rouge, *Essai sur une Stèle Egyptienne*, pp. 53, 54). Concubinage was allowed, the concubines taking the place of inferior wives. There were no castes, although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with labourers. A man of the upper class might, however, both hold a command in the army and be a priest; and therefore the caste-system cannot have strictly applied in the case of the subordinates. The general manner of life does not much illustrate that of the Israelites from its great essential difference. The Egyptians from the days of Abraham were a settled people, occupying a land which they had held for centuries without question, except through the aggression of foreign invaders. The occupations of the higher class were the superintendence of their fields and gardens,

their diversions, the pursuit of game in the deserts, or on the river, and fishing. The tending of cattle was left to the most despised of the lower class. The Israelites on the contrary were from the very first a pastoral people: in time of war they lived within walls; when there was peace they "dwelt in their tents" (2 K. xiii. 5). The Egyptian feasts, and the dances, music, and feats which accompanied them, for the diversion of the guests, as well as the common games, were probably introduced among the Hebrews in the most luxurious days of the kingdoms of Israel and Judah. The account of the nontide dinner of Joseph (Gen. xlii. 16, 31-34) agrees with the representations of the monuments, although it evidently describes a far simpler repast than would be usual with an Egyptian minister. The attention to precedence, which seems to have surprised Joseph's brethren (ver. 33), is perfectly characteristic of Egyptian customs. The funeral ceremonies were far more important than any events of the Egyptian life, as the tomb was regarded as the only true home. The body of the deceased was embalmed in the form of Osiris, the judge of the dead, and conducted to the burial-place with great pomp and much display of lamentation. The mourning lasted seventy-two days or less. Both Jacob and Joseph were embalmed, and the mourning for the former continued seventy days.

*Literature and Art.*—The Egyptians were a

very literary people, and time has preserved to us, besides the inscriptions of their tombs and temples, many papyri, of a religious or historical character, and one tale. They bear no resemblance to the books of the O. T., except such as arises from their sometimes enforcing moral truths in a manner not wholly different from that of the Book of Proverbs. The moral and religious system is, however, essentially different in its principles and their application. Some have imagined a great similarity between the O. T. and Egyptian literature, and have given a show of reason to their idea by dressing up Egyptian documents in a garb of Hebrew phraseology, in which, however, they have gone so awkwardly that no one who had not prejudged the question could for a moment be deceived. In science, Egyptian influence may be distinctly traced in the Pentateuch. Moses was "learned in all the wisdom of the Egyptians" (Acts vii. 22), and probably derived from them the astronomical knowledge which was necessary for the calendar. [CHRONOLOGY.] His acquaintance with chemistry is shown in the manner of the destruction of the golden calf. The Egyptians excelled in geometry and mechanics: the earlier books of the Bible, however, throw no light upon the degree in which Moses may have made use of this part of his knowledge. In medicine and surgery, the high proficiency of the Egyptians was probably of but little use to the Hebrews after the Exodus: anatomy, practised by the former from the earliest ages, was repugnant to the feelings of Shemites, and the simples of Egypt and of Palestine would be as different as the ordinary diseases of the country. In the arts of architecture, sculpture, and painting, the former of which was the chief, there seems to have been but a very slight and material influence. This was natural, for with the Egyptians architecture was a religious art, embodying in its principles their highest religious convictions, and mainly devoted to the service of religion. Durable construction, massive and grand form, and rich, though sober, colour, characterize their temples and tombs, the abodes of gods, and "homes" of men. To adopt such an architecture would have been to adopt the religion of Egypt, and the pastoral Israelites had no need of buildings. When they came into the Promised Land they found cities ready for their occupation, and it was not until the days of Solomon that a temple took the place of the tent, which was the sanctuary of the pastoral people. Details of ornament were of course borrowed from Egypt; but separated from the vast system in which they were found, they lost their significance, and became harmless, until modern sociologists made them prominent in support of a theory which no mind capable of broad views can for a moment tolerate.

*Magicians.*—We find frequent reference in the Bible to the magicians of Egypt. The Pharaoh of Joseph laid his dream before the magicians, who could not interpret it (Gen. xli. 8); the Pharaoh of the Exodus used them as opponents of Moses and Aaron, when, after what appears to have been a seeming success, they failed as before (Ex. vii. 11, 12, 22; viii. 18, 19; ix. 11; 2 Tim. iii. 8, 9). The monuments do not recognise any such art, and we must conclude that magic was secretly practised, not because it was thought to be unlawful, but in order to give it importance. [See MAGIC, JAMHRES, JANNER.]

*Industrial Arts.*—The industrial arts held an

important place in the occupations of the Egyptians. The workers in fine flax and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Is. xix. 9). The fine linen of Egypt found its way to Palestine (Prov. vii. 16). Pottery was a great branch of the native manufactures, and appears to have furnished employment to the Hebrews during the bondage (Ps. lxxxi. 6, lxxviii. 13; comp. Ex. i. 14).

*Festivals.*—The religious festivals were numerous, and some of them were, in the days of Herodotus, kept with great merry-making and license. His description of that of the goddess Bubastis, kept at the city of Bubastis in the eastern part of the Delta, would well apply to some of the great Mohammedan festivals now held in the country (ii. 59, 60). The feast which the Israelites celebrated when Aaron had made the golden calf seems to have been very much of the same character: first offerings were presented, and then the people ate and danced and sang (Ex. xxxii. 5, 6, 17, 18, 19), and even it seems stripped themselves (ver. 25), as appears to have been not unusual at the popular ancient Egyptian festivals.

*Manners of Modern Inhabitants.*—The manners of the modern inhabitants are, we are disposed to believe after much consideration, more similar to those of the ancient Hebrews, on account of Arab influence, than the manners of their predecessors. How remarkably they illustrate the Bible is seen in the numerous references given in the *Modern Egyptians* (see its index), and in the great general value of that work in Biblical criticism.

*CHRONOLOGY AND HISTORY.*—In treating of the chronology and history of ancient Egypt it is our endeavour to avoid as much as possible the statement of doubtful matters, and to give the greater prominence to those points on which the generality of sound Egyptologists are virtually agreed. The subject may be divided into three main branches, technical chronology, historical chronology, and history:—

1. *Technical Chronology.*—It is impossible here to treat in much detail the difficult subject of Egyptian technical chronology. That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers, and by their monuments. It is, however, very difficult to connect periods mentioned by the former with the indications of the same kind offered by the latter; and what we may term the recorded observations of the monuments cannot be used for the determination of chronology without a previous knowledge of Egyptian astronomy that we have not wholly attained. The testimony of ancient writers must, moreover, be carefully sifted, and we must not take their statements as a positive basis without the strongest evidence of correctness. Without that testimony, however, we could not at present prosecute the inquiry. The Egyptians do not appear to have had any common era. Every document that bears the date of a year, gives the year of the reigning sovereign, counted from that current year in which he came to the throne, which was called his first year. There is therefore no general means of testing deductions from the chronological indications of the monuments.

There appear to have been at least three years in use with the Egyptians before the Roman domination, the Vague Year, the Tropical Year, and the Sothic year; but it is not probable that more than two of these were employed at the same time.

The Vague Year contained 365 days without any additional fraction, and therefore passed through all the seasons in about 1500 years. It was both used for civil and for religious purposes. Probably the Israelites adopted this year during the sojourn in Egypt, and that instituted at the Exodus appears to have been the current Vague Year fixed by the adoption of a method of intercalation. [CHRONOLOG.] The Vague Year was divided into twelve months, each of thirty days, with five epagomenae, or additional days, after the twelfth. The months were assigned to three seasons, each comprising four months, called respectively the 1st, 2nd, 3rd, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, &c., are taken from the divinities to which they were sacred. The seasons are called, according to our rendering, those of Vegetation, Manifestation, and the Waters or the Inundation: the exact meaning of their names has however been much disputed. They evidently refer to the phenomena of a Tropical Year, and such a year we must therefore conclude the Egyptians to have had, at least in a remote period of their history. If, as we believe, the third season represents the period of the inundation, its beginning must be dated about one month before the autumnal equinox, which would place the beginning of the year at the Winter Solstice, an especially fit time in Egypt for the commencement of a tropical year. The Sothic Year was a supposed sidereal year of 365½ days, commencing with the so-called heliacal rising of Sothis. The Vague Year, having no intercalation, constantly retrograded through the Sothic Year, until a period of 1461 years of the former kind, and 1460 of the latter had elapsed, from one coincidence of commencements to another.

The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Vague Years, and therefore consisted of 1460 years of the former kind. This cycle is mentioned by ancient writers, and two of its commencements recorded, the one, called the Era of Menophres, July 20, B.C. 1322, and the other, on the same day, A.D. 139. Menophres is supposed to be the name of an Egyptian king, and this is most probable. The nearest name is Men-ptah, or Men-phthah, which is part of that of Sethe Menptah, the father of Rameses II., and also that of the son of the latter, all these being kings of the sixteenth dynasty. We are of opinion that chronological indications are conclusive in favour of the earlier of the two sovereigns. The Tropical Cycle was a cycle of the coincidence of the Tropical and Vague Years. We do not know the exact length of the former year with the Egyptians, nor indeed that it was used in the monumental age; but from the mention of a period of 500 years, the third of the cycle, and the time during which the Vague Year would retrograde through one season, we cannot doubt that there was such a cycle, not to speak of its analogy with the Sothic Cycle. It has been supposed by M. Biot to have had a duration of 1505 years; but the length of 1500 Vague Years is preferable, since it contains a number of complete lunations, besides that the Egyptians could scarcely have been more exact, and that the period of 500 years is a subdivision of 1500. Ancient writers do not fix any commencements of this cycle. If the characteristics of the Tropical Year are what we suppose, the cycle would have begun B.C. 2005 and 507: two hieroglyphic inscriptions record, as we believe, the former of these epochs

*Horae Aegyptiacae*, p. 12 seqq., pl. i. Nos. 5, 6).<sup>\*</sup> The return of the Phoenix has undoubtedly a chronological meaning. It has been supposed to refer to the period last mentioned, but we are of opinion that the Phoenix Cycle was of exactly the same character, and therefore length, as the Sothic, its commencement being marked by the so-called heliacal rising of a star of the constellation BENNU HESAR, "the Phoenix of Osiris," which is placed in the astronomical ceiling of the Rameseum of El-Kurneh six months distant from Sothis. The monuments make mention of Panegyric Months, which can only, we believe, be periods of thirty years each, and divisions of a year of the same kind. We have computed the following dates of commencements of these Panegyric Years:—1st. B.C. 2717, 1st dynasty, era of Menes (not on monuments); 2nd. B.C. 2352, 17th dynasty, Sûphis, I. and II.; 3rd. B.C. 1986 (xiiith dynasty, Sesertesen III. ? not on monuments); the last-mentioned date being also the beginning of a Phoenix Cycle, which appears to have comprised four of these Panegyric Years. The other important dates of the system of Panegyrics which occur on the monuments are B.C. 1442, xviiiith dynasty, Queen Amen-nem; and B.C. 1412, xviiiith dynasty, Thothmes III.

Certain phenomena recorded on the monuments have been calculated by M. Biot, who has obtained the following dates:—Rising of Sothis in reign of Thothmes III., xviiiith dynasty, B.C. 1445; supposed Vernal Equinox, Thothmes III., B.C. cir. 1441; rising of Sothis, Rameses III., xxth dynasty, B.C. 1301; star-risings, Rameses VI. and IX., xxth dynasty, B.C. cir. 1241. Some causes of uncertainty affect the exactness of these dates, and that of Rameses III. is irreconcilable with the two of Thothmes III., unless we hold the calendar in which the inscription supposed to record it occurs to be a Sothic one, in which case no date could be obtained.

Egyptian technical chronology gives us no direct evidence in favour of the high antiquity which some assign to the foundation of the first kingdom. The earliest record which all Egyptologists are agreed to regard as affording a date is of the fifteenth century B.C., and no one has alleged any such record to be of any earlier time than the twenty-fourth century B.C. The Egyptians themselves seem to have placed the beginning of the 1st dynasty in the twenty-eighth century B.C., but for determining this epoch there is no direct monumental evidence.

2. *Historical Chronology.*—The materials for historical chronology are the monuments and the remains of the historical work of Manetho. Since the interpretation of hieroglyphics has been discovered the evidence of the monuments has been brought to bear on this subject, but as yet it has not been sufficiently full and explicit to enable us to set aside other aid. We have had to look elsewhere for a general framework, the details of which the monuments might fill up. The remains of Manetho are now generally held to supply this want. A comparison with the monuments has shown that he drew his information from original sources, the general authenticity of which is vindicated by minute points of agreement. The information Manetho gives us, in the present form of his work, is, however, by no means explicit, and it is only by a theoretical arrangement of the materials

<sup>\*</sup> For the reasons for fixing on these years, see *Horae Aeg.* i. c.

that they take a definite form. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable fragments, one relating to the Shepherds, the other to a tale of the Exodus. The list is only known to us in the epitome given by Africanus, preserved by Syncellus, and that given by Eusebius. These present such great differences that it is not reasonable to hope that we can restore a correct text. The series of dynasties is given as if they were successive, in which case the commencement of the first would be placed full 5000 years B.C., and the reign of the king who built the Great Pyramid, 4000. The monuments do not warrant so extreme an antiquity, and the great majority of Egyptologists have therefore held that the dynasties were partly contemporary. A passage in the fragment of Manetho respecting the Shepherds, where he speaks of the kings of the Thebais and of the rest of Egypt rising against these foreign rulers, makes it almost certain that he admitted at least three contemporary lines at that period (*Jos. c. Apim. i. 14*). The naming of the dynasties anterior to the time of a certain single kingdom, and that of the later ones, which we know to have generally held sway over all Egypt, or the first seventeen, and the xviii<sup>th</sup> and following dynasties, lends support to this opinion. The former are named in groups, first a group of Thinites, then one of Memphites, broken by a dynasty of Elephantines, next a Heracleopolite line, &c., the dynasties of a particular city being grouped together; whereas the latter generally present but one or two together of the same name, and the dynasties of different cities recur. The earlier portion seems therefore to represent parallel lines, the later, a succession. The evidence of the monuments leads to the same conclusion. Kings who unquestionably belong to different dynasties are shown by them to be contemporary. In the present state of Egyptology this evidence has led to various results as to the number of contemporary dynasties, and the consequent duration of the whole history. One great difficulty is that the character of the inscriptions makes it impossible to ascertain, without the explicit mention of two sovereigns, that any one king was not a sole ruler. For example, it has been lately discovered that the xi<sup>th</sup> dynasty was for the greatest part of its rule a double line. Yet its numerous monuments in general give no hint of more than one king, although there was almost always a recognised colleague. Therefore, *à fortiori*, no notice would be taken, if possible, on any monument of a ruler of another house than that of the king in whose territory it was made. We can therefore scarcely expect very full evidence on this subject. Mr. Lane, as long ago as 1830, proposed an arrangement of the first seventeen dynasties based upon their numbers and names. This scheme the writer believes to be strikingly confirmed by the monuments. The table in the following page contains the dynasties thus arranged, with the approximative dates we assign to their commencements, and the dates of chief events in Hebrew history connected with that of Egypt, according to the system preferred in art. CHRONOLOGY.

The monuments will not, in our opinion, justify any great extension of the period assigned in the table to the first seventeen dynasties. The last date, that of the commencement of the xviii<sup>th</sup> dynasty, cannot be changed more than a few years. Baron Bunsen and Dr. Lepsius indeed place it much earlier, but they do so in opposition to positive monumental evidence. The date of the beginning of the

1st dynasty, which we are disposed to place a little before B.C. 2700, is more doubtful, but a concurrence of astronomical evidence points to the twenty-eighth century. The interval between the two dates cannot therefore be greatly more or less than twelve hundred years, a period quite in accordance with the lengths of the dynasties according to the better text, if the arrangement here given be correct. Some have supposed a much greater antiquity for the commencement of Egyptian history. Lepsius places the accession of Menes B.C. 3892, and Bunsen, two hundred years later. Their system is founded upon a passage in the chronological work of Syncellus, which assigns a duration of 3555 to the thirty dynasties (*Chron. p. 51b*). It is by no means certain that this number is given on the authority of Manetho, but apart from this, the whole statement is unmistakably not from the true Manetho, but from some one of the fabricators of chronology, among whom the Pseudo-Manetho held a prominent place (*Enc. Brit. 8th ed. Egypt. p. 452; Quarterly Review, No. 210, p. 395-7*). If this number be discarded as doubtful or spurious there is nothing definite to support the extended system so confidently put forth by those who adopt it.

3. *History*.—Passing from chronology to history we have first to notice the indications in the Bible which relate to the earliest period. That Egypt was colonised by the descendants of Noah in a very remote age is shown by the mention of the migration of the Philistines from Caphtor, which had taken place before the arrival of Abraham in Palestine. Before this migration could occur the Caphtorim and other Mizraites must have occupied Egypt for some time. A remarkable passage points to a knowledge of the date at which an ancient city of Egypt was founded:—"Hebron was built seven years before Zoan in Egypt" (*Num. xii. 22*). We find that Hebron was originally called Kirjath-ara, and was a city of the Avakim (*Josh. xiv. 15*), and it is mentioned under that appellation in the history of Abraham (*Gen. xxiii. 2*): it had therefore been founded by the giant-race before the days of that patriarch.

The evidence of the Egyptians as to the primeval history of their race and country is extremely indefinite. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the Negroes, the red and black races, as the children of the god Horus, and the Semites and Europeans, the yellow and white races, as the children of the goddess Pesht (*comp. Brugsch, Geogr. Inschr. ii. pp. 90, 91*). They seem therefore to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The latest portion of the first may indeed be traditional, not mythical, and the earliest part of the second may be traditional and not historical, though this last conjecture we are hardly disposed to admit. In any case, however, there is a very short and extremely obscure time of tradition, and at no great distance from the earliest date at which it can be held to end we come upon the clear light of history in the days of the pyramids. The indications are of a sudden change of seat, and the settlement in Egypt of a civilized race, which, either wishing to be believed autochthonous, or having lost all ties that could keep up the traditions of its first dwelling-place, filled up the commence-

ment of its history with materials drawn from mythology. There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The priests are indeed reported to have told Solon when he spoke of one deluge that many had occurred (*Plat. Tim.* 23), but the reference is more likely to have been to great floods of the Nile than to any extraordinary catastrophes.

The history of the dynasties preceding the xviii is not told by any continuous series of monuments. Except those of the ivth and xiith dynasties there are scarcely any records of the age left to the present day, and thence in a great measure arises the difficulty of determining the chronology. From the time of Menes, the first king, until the Shepherd-invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the ivth dynasty, were the most famous pyramids raised. The Shepherds were foreigners who came from the East, and, in some manner unknown to Manetho, gained the rule of Egypt. Those whose kings composed the xvth dynasty were the first and most important. They appear to have been Phœnicians, and it is probable that their migration into Egypt, and thence at last into Palestine, was part of the great movement to which the coming of the Phœnicians from the Erythraean Sea, and the Philistines from Caphtor, belong. It is not impossible that the war of the four kings—Chedorlaomer and his allies—was directed against the power of the kings of the xvth dynasty. Most probably the Pharaoh of Abraham was of this line, which lived at Memphis, and at the great fort or camp of Avaris on the eastern frontier. The period of Egyptian history to which the Shepherd-invasion should be assigned is a point of dispute. It is generally placed after the xiith dynasty, for it is argued that this powerful line could not have reigned at the same time as one or more Shepherd-dynasties. We are of opinion that this objection is not valid, and that the Shepherd-invasion was anterior to the xiith dynasty. It is not certain that the foreigners were at the outset hostile to the Egyptians, for they may have come in by marriage, and it is by no means unlikely that they may have been long in a position of secondary importance. The rule of the xiith dynasty, which was of Thebans, lasting about 160 years, was a period of prosperity to Egypt, but after its close those calamities appear to have occurred which made the Shepherds hated by the Egyptians. During the interval to the xviiiith dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. The paucity of the monuments proves the troubled nature of this period.

We must here notice the history of the Israelites in Egypt with reference to the dynasty of the Pharaohs who favoured them, and that of their oppressors. According to the scheme of Biblical Chronology which we believe to be the most probable [*CHRONOLOGY*], the whole sojourn in Egypt would belong to the period before the xviiiith dynasty. The Israelites would have come in and gone forth during that obscure age for the history of which we have little or no monumental evidence. This would explain the absence of any positive mention of them on the Egyptian monuments. Some assert that they were an unimportant Arab tribe, and therefore would not be mentioned, and

that the calamities attending their departure could not be commemorated. These two propositions are contradictory, and the difficulties are unsolved. If, as Lepsius supposes, the Israelites came in under the xviiiith dynasty, and went out under the xixth, or if, as Bunsen holds, they came in under the xiith, and (after a sojourn of 1434 years!) went out under the xixth, the oppression in both cases falling in a period of which we have abundant contemporary monuments, sometimes the records of every year, it is impossible that the monuments should be wholly silent if the Biblical narrative is true. Let us examine the details of that narrative. At the time to which we should assign Joseph's rule, Egypt was under Shepherds, and Egyptian kings of no great strength. Since the Pharaoh of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question that he was, if the dates be correct, a Shepherd of the xvth dynasty. How does the Biblical evidence affect this inference? Nothing is more striking throughout the ancient Egyptian inscriptions and writings than the bitter dislike of most foreigners, especially Easterns. They are constantly spoken of in the same terms as the inhabitants of the infernal regions, not alone when at war with the Pharaohs, but in time of peace and in the case of friendly nations. It is a feeling alone paralleled in our days by that of the Chinese. The accounts of the Greek writers, and the whole history of the later period, abundantly confirm this estimate of the prejudice of the Egyptians against foreigners. It seems to us perfectly incredible that Joseph should be the minister of an Egyptian king. In lesser particulars the evidence is not less strong. The Pharaoh of Joseph is a despot, whose will is law, who kills and pardons at his pleasure, who not only raises a foreign slave to the head of his administration, but through his means makes all the Egyptians, except the priests, serfs of the crown. The Egyptian kings on the contrary were restrained by the laws, shamed the public dislike of foreigners, and would have avoided the very policy Joseph followed, which would have weakened the attachment of their fellow-countrymen by the loosening of local ties and complete reducing to bondage of the population, although it would have greatly strengthened the power of an alien sovereign. Pharaoh's conduct towards Joseph's family points to the same conclusion. He gladly invites the strangers, and gives them leave to dwell, not among the Egyptians, but in Goshen, where his own cattle seem to have been (*Gen.* xlv. 34, xlvii. 6). His acts indicate a fellow-feeling and a desire to strengthen himself against the national party.

The "new king" "which knew not Joseph," is generally thought by those who hold with us as to the previous history, to have been an Egyptian, and head of the xviiiith dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel, the Shepherds, would be the first oppressor of the nation which they protected. Plausible as this theory appears, a close examination of the Bible-narrative seems to us to overthrow it. We read of the new king that—"he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them, lest they multiply, and it come to pass, that, when there shall out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (*Ex.* i. 9, 10). The Israelites are therefore more and stronger than the

people of the oppressor, the oppressor fears war in Egypt, and that the Israelites would join his enemies, he is not able at once to adopt open violence, and he therefore uses a subtle system to reduce them by making them perform forced labour, and soon after takes the stronger measure of killing their male children. These conditions point to a divided country and a weak kingdom, and cannot, we think, apply to the time of the xviii and xixth dynasties. The whole narrative of subsequent events to the Exodus is consistent with this conclusion, to which the use of universal terms does not offer any real objection. When all Egypt is spoken of, it is not necessary either in Hebrew or in Egyptian that we should suppose the entire country to be strictly intended. If we conclude therefore that the Exodus most probably occurred before the xviii dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression appear to have been Egyptians or Shepherds. The change of policy is in favour of their having been Egyptians, but is by no means conclusive, for there is no reason that all the foreigners should have had the same feeling towards the Israelites, and we have already seen that the Egyptian Pharaohs and their subjects seem in general to have been friendly to them throughout their history, and that the Egyptians were privileged by the Law, apparently on this account. It may be questioned whether the friendship of the two nations, even if merely a matter of policy, would have been as enduring as we know it to have been had the Egyptians looked back on their conduct towards the Israelites as productive of great national calamities, or had the Israelites looked back upon the persecution as the work of the Egyptians. If the chronology be correct we can only decide in favour of the Shepherds. During the time to which the events are assigned there were no important lines but the Theban, and one or more of Shepherds. Lower Egypt, and especially its eastern part, must have been in the hands of the latter. The land of Goshen was in the eastern part of Lower Egypt: it was wholly under the control of the oppressors, whose capital, or royal residence, at least in the case of the Pharaoh of the Exodus, lay very near to it. Manetho, according to the transcript of Africanus, speaks of three Shepherd-dynasties, the xvth, xvth, and xvth, the last of which, according to the present text, was of Shepherds and Thebans, but this is probably incorrect, and the dynasty should rather be considered as of Shepherds alone. It is difficult to choose between these three: a passage in Isaiah, however, which has been strangely overlooked, seems to afford an indication which narrows the choice. "My people went down aforetime into Egypt to sojourn there; and the Assyrian oppressed them without cause" (lii. 4). This indicates that the oppressor was an Assyrian, and therefore not of the xvth dynasty, which, according to Manetho, in the epitomes, was of Phoenicians, and opposed to the Assyrians (Jos. c. Apion. i. 14). Among the names of kings of this period in the Royal Turin Papyrus (ed. Wilkinson) are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. It is not possible at present to decide whether they were of the xvth or the xvth dynasty. It cannot be objected to the explanation we have offered that the title Pharaoh is applied to the kings connected with the Israelites, and that they must therefore have been natives, for it is almost certain that at least some of

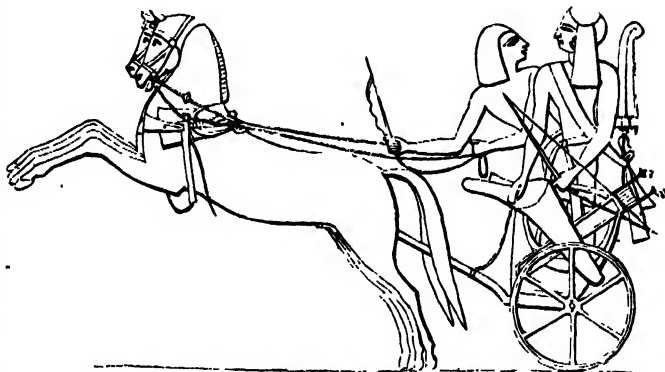

the Shepherd-kings were Egyptianized, like Joseph, who received an Egyptian name, and Moses, who was supposed by the daughters of Jethro to be an Egyptian (Ex. ii. 19). It has been urged by the opponents of the chronological schemes that place the Exodus before the later part of the fourteenth century B.C. that the conquests of the Pharaohs of the xviii, xixth, and xxth dynasties would have involved collisions with the Israelites had they been in those times already established in Palestine, whereas neither the Bible nor the monuments of Egypt indicate any such event. It has been overlooked by the advocates of the Rabbinical date of the Exodus that the absence of any positive Palestinian names, except that of the Philistines, in the lists of peoples and places subject to these Pharaohs, and in the records of their wars, entirely destroys their argument, for while it shows that they did not conquer Palestine, it makes it impossible for us to decide on Egyptian evidence whether the Hebrews were then in that country or not. Shishak's list, on the contrary, presents several well-known names of towns in Palestine, besides that of the kingdom of Judah. The policy of the Pharaohs, as previously explained, is the key to their conduct towards the Israelites. At the same time the character of the portions of the Bible relating to this period prevents our being sure that the Egyptians may not have passed through the country, and even put the Israelites to tribute. It is illustrative of the whole question under consideration, that in the most flourishing days of the sole kingdom of Israel, a Pharaoh should have marched unopposed into Palestine and captured the Canaanite city Gezer at no great distance from Jerusalem, and that this should be merely incidentally mentioned at a later time instead of being noticed in the regular course of the narrative (1 K. ix. 15, 16).

The main arguments for the Rabbinical or latest date of the Exodus have been discussed in a previous article (CHRONOLOGY). The objections to a much earlier date, that of B.C. 1652, may be considered as favourable to the latest rather than to Usher's date, although not unfavourable to both. The main objection to these in our opinion is that the details of the Biblical narrative do not, even with the utmost latitude of interpretation, agree with the history of the country if the Exodus be supposed to have taken place under the xviii or xixth dynasty. As to the account of the Exodus given by Manetho, it was confessedly a mere popular story, for he admitted it was not a part of the Egyptian records, but a tale of uncertain authorship (*ἄτερ δὲ δὲ Μανέθων οὐκ ἐκ τῶν παρ' Ἀιγυπτίοις γραμμάτων, ἀλλ' ὡς αὐτὸς ὁμολόγηκεν, ἐκ τῶν ἀδεσπότων μυθολογουμένων προστέθεικεν*, κ.τ.λ. Jos. c. Apion. i. 16). A critical examination shows that it cannot claim to be a veritable tradition of the Exodus: it is indeed, if based on any such tradition, so distorted that it is impossible to be sure that it relates to the king to whose reign it is assigned. Yet upon the supposition that the king is really Menptah, son of Rameses II., the advocates of the Rabbinical date entirely base their adjustment of Hebrew with Egyptian history at this period.

The history of the xviii, xixth, and xxth dynasties is that of the Egyptian empire. Aahmes, the head of the first of these (B.C. cir. 1525), overthrew the power of the Shepherds, and probably expelled them. Queen Amen-nem and Thothmes II. and III. are the earliest sovereigns of whom great monuments remain in the temple of El-

Karnak, the chief sanctuary of Thebes. The last of these rulers was a great foreign conqueror, and reduced Nineveh, and perhaps Babylon also, to his sway. Amenoph III., his great-grandson, states on scarabæi, struck apparently to commemorate his marriage, that his northern boundary was in Mesopotamia, his southern in Kara (Choloë?). By him was raised the great temple on the west bank at Thebes, the site of which is now only marked by the gigantic pair the Vocal Memnon and its fellow. The head of the sixteenth dynasty, Sethe I., or Sethos, B.C. cir. 1340, waged great foreign wars, particularly with the Hittites of the valley of the Orontes, whose capital Ketesh, situate near Emesa, he captured. By him the great hypostyle hall of El-Karnak was built, and on its northern wall is a most interesting series of bas-reliefs recording his successes. His son Rameses II. was the most illustrious of the Pharaohs. If he did not exceed all others in foreign conquests, he far outshone them in the grandeur and beauty of the temples with which he adorned Egypt and Nubia. His chief campaign was against the Hittites and a great confederacy they had formed. He defeated their army, captured Ketesh, and forced them to conclude a treaty

with him, though this last object does not seem to have been immediately attained. Menptah, the son and successor of Rameses II., is supposed by the advocates of the Rabbinical date of the Exodus to have been the Pharaoh in whose time the Israelites went out. One other king of this period must be noticed, Rameses III., of the xxth dynasty, B.C. cir. 1200, whose conquests, recorded on the walls of his

The son of King Rameses with his charioteer. (Wülken.)

great temple of Medinet Haboo in western Thebes seem to have been not less important than those of Rameses II. The most remarkable of the sculptures commemorating them represents a naval victory in the Mediterranean, gained by the Egyptian fleet over that of the Tokkaree, probably the Carians, and Shaietana (Khairatana), or Cretans. Other Shaietana, whom we take to correspond to the Cherethim of Scripture, serve in the Egyptian forces. This king also subdued the Philistines and the Rebu (Lebu), or Lubim, to the west of Egypt. Under his successors the power of Egypt evidently declined, and towards the close of the dynasty the country seems to have fallen into anarchy, the high-priests of Amen having usurped regal power at Thebes and a Lower Egyptian dynasty, the xxiist, arisen at Tanis. Probably the Egyptian princess who became Solomon's wife was a daughter of a late king of the Tanite dynasty. The head of the xxiind dynasty, Sheshouk I., the Shishak of the Bible, restored the unity of the kingdom, and revived the credit of the Egyptian arms, B.C. cir. 990. Early in his reign he received Jeroboam, the enemy of Solomon (1 K. xi. 40), and perhaps it was by his advice that he afterwards

attacked Judah. It is doubtful, however, whether Jeroboam did not suffer by the invasion as well as Rehoboam. On the outside of the south wall of the temple of El-Karnak is a list of the conquests of Sheshouk I., comprising "the kingdom of Judah," and several Hebrew towns, some of which must have been taken from Jeroboam. [SHISHAK.] Probably his successor, Osorkon I., is the Zerah of Scripture, defeated by Asa. The army that Zerah led can only have been that of Egypt, and his overthrow will explain the decline of the house of Sheshouk. [ZERAH.] Egypt makes no figure in Asiatic history during the xxiind and xxivth dynasties: under the xxvth it regained, in part at least, its ancient importance. This was an Ethiopian line, the warlike sovereigns of which strove to the utmost to repel the onward stride of Assyria. So, whom we are disposed to identify with Shebek II. or Sebichus, the second Ethiopian, rather than with Shebek I. or Sabaco, the first, made an alliance with Hoshea the last king of Israel. [SO.] Tehrak or Tirhakah, the third of this house, advanced against Sennacherib in support of Hezekiah. [TIRHAKAH.] After this, a native dynasty again occupied the throne, the xxvth, of Saite kings. Psametek I. or Psamm-

tichus I. (B.C. 664), who may be regarded as the head of this dynasty, warred in Palestine, and took Ashdod, Azotus, after a siege of twenty-nine years (Herod. ii. 157). Probably it was held by an Assyrian garrison, having been previously taken from the Egyptians by Sargon (Is. xx.). Neku or Necho, the son of Psammetichus, continued the war in the East, and marched along the coast of Palestine to attack the king of Assyria. At Megiddo Josiah encountered him (B.C. 608-7), notwithstanding the remonstrance of the Egyptian king, which is very illustrative of the policy of the Pharaohs in the east (2 Chr. xxxv. 21) no less than is his lenient conduct after the defeat and death of the king of Judah. The army of Necho was after a short space routed at Carchemish by Nebuchadnezzar, B.C. 605-4 (Jer. xli. 2). We read of a time not long subsequent that "the king of Egypt came not again any more out of his land; for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt (2 K. xxiv. 7). [PHARAOH - NECHO.] The second successor of Necho, Apries, or Pharaoh-Hophra, sent his army into Palestine to the aid of Zedekiah (Jer. xxxvii. 5, 7, 11), so that the siege of Jerusalem was

raised for a time, and kindly received the fugitives from the captured city. He seems to have been afterwards attacked by Nebuchadnezzar in his own country. There is, however, no certain account of a complete subjugation of Egypt by the king of Babylon, and it is probable that the prophecies of Ezekiel (for the fulfilment of which commentators have looked to this time) refer to a later period, and chiefly to the conquest by Cambyases and the calamities which followed the revolt of Inaros. [PHARAOH-HOPHRA.] Amasis, the successor of Apries, had a long and prosperous reign, and taking advantage of the weakness and fall of Babylon somewhat restored the weight of Egypt in the East. But the new power of Persia was to prove even more terrible to his house than Babylon had been to the house of Psammetichus, and the son of Amasis had reigned but six months when Cambyases reduced the country to the condition of a province of his empire B.C. 525.

It is not necessary here to give an outline of the subsequent history of Egypt. Its connexion with the history and literature of the Jews is discussed in the articles on the Greek kings of Egypt [PTOLEMY] and ALEXANDRIA. The relation of Egypt and Palestine during the period from the accession of the first Ptolemy until the age of the Apostles is full of interest, but it does not offer any serious difficulties that require it to be here discussed.—It would not be within the province of this article to enter upon a general consideration of the prophecies relating to Egypt: we must, however, draw the reader's attention to their remarkable fulfilment. The visitor to the country needs not to be reminded of them: everywhere he is struck by the precision with which they have come to pass. We have already spoken of the physical changes which have verified to the letter the words of Isaiah. In like manner we recognise, for instance, in the singular disappearance of the city of Memphis and its temples in a country where several primeval towns yet stand, and scarce any ancient site is unmarked by temples, the fulfilment of the words of Jeremiah: "Noph shall be waste and desolate without an inhabitant" (xvi. 19), and those of Ezekiel, "Thus saith the Lord God; I will also destroy the idols, and I will cause [their] images to cease out of Noph" (xxx. 13). Not less signally are the words immediately following the last quotation—"And there shall be no more a prince of the land of Egypt" (l. c.)—fulfilled in the history of the country, for from the second Persian conquest, more than two thousand years ago, until our own days, not one native ruler has occupied the throne.

*Literature.*—The following are the most useful works upon Egypt, excepting such as relate to its modern history: for a very full list of the literature of the subject the reader is referred to Jolowicz's (Dr. H.) *Bibliotheca Aegyptiaca*, 1858. Egypt generally: *Description de l'Égypte*, 2nd ed. 1821-9; *Encyclopædia Britannica*, 8th ed. art. *Egypt*. Description, Productions, and Topography: Abd-Allatif, *Relation de l'Égypte*, ed. Silvestre de Sacy, 1810; d'Anville, *Mémoires sur l'Égypte*, 1766; Belzoni (G.), *Narrative of Operations*, 1820; Brugsch (H.), *Geographische Inschriften Alt-ägyptischer Denkmäler*, 1857;—*Reiseberichte aus Ägypten*, 1855; Champollion le Jeune, *L'Égypte sous les Pharaons*, 1814;—*Lettres écrites pendant son Voyage en Égypte*, 2do ed. 1833; Ehrenberg, Ch. G., und Hemprich, F. W., *Naturgeschichtliche Reisen—Reisen in Ägypten*, &c., 1828—Sym-

*bolæ Physicæ*, 1829-1845; Forskål, Pt. *Descriptiones animalium*, &c., 1775-6;—*Flora Aegyptiaco-arabica*, 1775; Harris, A. Ancient Chronology, History, and Manners: Bunsen, C. C. J., *Egypt's Place*, 1850-59; Cory, I. P., *Ancient Fragments*, 2nd ed., 1832; *Herodotus*, ed. Rawlinson, vols. i.-iii.; Hengstenberg, E. W., *Egypt and the Books of Moses*, 1843; Ideler, L., *Handbuch der Chronologie*, 1825; Lepsius, R., *Chronologie der Ägypter*, vol. i. 1849; *Königsbuch der alten Ägypter*, 1858; Poole, R. S., *Horæ Aegyptiacæ*, 1851; Wilkinson, Sir J. G., *Manners and Customs of the Ancient Egyptians*, 1837, 1841; *Popular Account of the Ancient Egyptians*, 1855. To these must be added, for the manners of the modern inhabitants: Lane, E. W., *Modern Egyptians*, ed. 184; *Thousand and One Nights*, 2nd ed., by E. S. Poole, 1859; Poole, Mrs., *Englishman in Egypt*, 1844. It is impossible to specify a large number of valuable papers by Dr. Hincks, Mr. Birch, M. de Rouge, and others. [R. S. P.]

EHU (אֵהוּ; 'Ayx; Echi), head of one of the Benjamite houses according to the list in Gen. xvi. 21, and son of Belah according to the LXX. version of that passage. He seems to be the same as Ahi-ram, אֲחִירָם, in the list Num. xxvi. 38, and if so, *Ahiram* is probably the right name, as the family were called *Ahirmites*. In 1 Chr. viii. 1, the same person seems to be called אֲחִירָם, Ahiah, and perhaps also אֲחִירָם, Ahoah, in ver. 4 ('Aχιά, LXX., and in Cod. Vatic. 'Aχιδαν), אֲחִירָם ('Aχιά), Ahiah, ver. 7, and אֲחִירָם ('Aδρ), Aher, 1 Chr. vii. 12. These fluctuations in the orthography seem to indicate that the original copies were partly effaced by time or injury. [BECHER; CHRONICLES.]

[A. C. H.]

EHUD (אֵהוּד; 'Aδδ; Joseph. 'Hōdēt; Aod), like Gera, an hereditary name among the Benjamites.

1. Ehud, the son of Bilhan, and great-grandson of Benjamin the Patriarch (1 Chr. vii. 10, viii. 6).

2. Ehud, the son of Gera (אֵהוּד; Γερὰ; Gera; three others of the name, Gen. xvi. 21; 2 Sam.

xvi. 5; 1 Chr. viii. 3), of the tribe of Benjamin (Judg. iii. 15, marg. "son of Jemini," but vid. Gesen. *Lex.* sub v. יְמִינִי), the second Judge of the Israelites (B.C. 1336). In the Bible he is not called a Judge but a *deliverer* (1. c.): so Othniel (Judg. iii. 9) and all the Judges (Neh. ix. 27). As a Benjamite he was specially chosen to destroy Eglon, who had established himself in Jericho, which was included in the boundaries of that tribe. [EGLON.] In Josephus he appears as a young man (*yeaslas*). He was very strong, and left-handed. So A. V.; but the more literal rendering is, as in margin, "shut of his right hand." The words are differently rendered:—1. left-handed, and unable to use his right; 2. using his left hand as readily as his right. For 1. Targum, Joseph., Syr. (impotem), Arab. (aridum), and Jewish writers generally; Cajet., Buxtorf, Parkh., Gesen. (impeditus): derivation of עֲגֹלִים from עָגַל, the latter only in Ps. lxxix. 16, where it = to shut. For 2. LXX. (ἀμφιδέξις), Vulg. (*qui utraque manu pro dextra utebatur*), Corn. a Lap., Bonfrer., Patrick. (cf. περικδέξις, Hom. *Il.* xxi. 163, Hipp. *Aph.* 7. 43); Judg. xx. 16, sole recurrence of the phrase, applied to 700 Benjamites, the picked men of the army, who were not likely to be chosen for a physical defect. As regards Ps. lxxix. 16, it is urged that עָגַל may = *corono* = *aperio*; hence עָגַל = *apertus* = *expeditus*, q. d. *expedita dextra*; or if "*clausus*," *clausus dextra* = *cinctus dextra* = περικδέξις, *ambidexter* (vid. Pol. *Syn.*). The feat of drawing the dagger from the right thigh (Judg. iii. 21) is consistent with either opinion. For Ehud's adventures see EGLON; and for the period of eighty years' rest which his valour is said to have procured for the Israelites, see JUDGES. [T. E. B.]

EKER (עֶכֶר; 'Akör; *Achar*), a descendant of Judah through the families of Hezron and Jerahmeel (1 Chr. ii. 27).

EKREBEL ('Εκρεβήλ; Pesch. אַכ־בֶּ, *Ecrabat*; Vulg. omits), a place named in Jud. vii. 18 only, as "near to Chusi which is on the brook Mochmur;" apparently somewhere in the hill country to the south-east of the Plain of Esdraelon and of Dothain. The Syriac reading of the word points to the place *Acrabbein*, mentioned by Eusebius in the *Ogomasticon* as the capital of a district called *Acrabattine*, and still standing as *Akrabih*, about 6 miles south-east of *Nablüs* (Shechem) in the *Wady Makfuriyeh*, on the road to the Jordan valley (Van de Velde, ii. 304, and Map). Though frequently mentioned by Josephus (*B. J.* ii. 20, §4; iii. 3, §5, &c.), neither the place nor the district are named in the Bible, and they must not be confounded with those of the same name in the South of Judah. [AKRABIM; ARABATTINE; MAALAH-ACRABIM.] [G.]

EKRON (עֶקְרוֹן; ἡ Ἀκκαρόν; *Accaron*), one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii. 3). Like the other Philistine cities its situation was in the *Shefelah*. It fell to the lot of

Judah (Josh. xv. 45, 46; Judg. i. 18), and indeed formed one of the landmarks on his north border, the boundary running from thence to the sea at JANNEEL (*Yebna*). We afterwards, however, find it mentioned among the cities of Dan (sax. 43). But it mattered little to which tribe it nominally belonged, for before the monarchy it was again in full possession of the Philistines (1 Sam. v. 10). Ekron was the last place to which the ark was carried before its return to Israel, and the mortality therein in consequence seems to have been more deadly than at either Ashdod or Gath.\* From Ekron to BETHSHEMESH was a straight highway. Henceforward Ekron appears to have remained uninterruptedly in the hands of the Philistines (1 Sam. xvii. 52; 2 K. i. 2, 16; Jer. xxv. 20). Except the casual mention of a sanctuary of Baal-zebub existing there (2 K. i. 2, 3, 6, 16) there is nothing to distinguish Ekron from any other town of this district—it was the scene of no occurrence, and the native place of no man of fame in any way. The following complete the references to it, Am. i. 8; Zeph. ii. 4; Zech. ix. 5, 7.

'Akir, the modern representative of Ekron, lies at about 5 miles S.W. of *Ramleh*, and 3 due E. of *Yebna*, on the northern side of the important valley *Wady Swar*. "The village contains about 50 mud houses, without a remnant of antiquity except two large finely built wells." The plain south is rich, but immediately round the village it has a dreary forsaken appearance, only relieved by a few scattered stunted trees (Porter, *Handb.* 275; and see Van de Velde, ii. 169; Rob. ii. 228). In proximity to Jabneh (*Yebna*) and Bethshemesh (*Ain Shems*), Akir agrees with the requirements of Ekron in the O. T., and also with the indications of the *Onomasticon* (sub voc. *Accaron*). Jerome there mentions a tradition that the Turris Stratonis, Caesarea, was Ekron.

In the Apocrypha it appears as ACCARON (1 Macc. x. 89, only), bestowed with its borders (τὰ θρία αὐτῆς) by Alexander Balas on Jonathan Maccabæus as a reward for his services.

It was known in the middle ages by the same name. (See the quotation in Rob. ii. 228, note.)

The word EKRONITES appears in Josh. xiii. 3, and 1 Sam. v. 10. In the former it should be singular—"the Ekronite." In the latter עֶקְרוֹנִי. [G.]

E'LA (חֶלֶא; *Jolaman*), 1 Esd. ix. 27. [ELAM.]

EL'ADAH (עֶלְאָדָה; 'Elaðð, Alex. 'Elaaðð; *Elada*), a descendant of Ephraim through Shuthelah (1 Chr. vii. 20).

E'LAH. 1. (חֶלֶא; 'Hlað; Joseph. 'Hλaνoς; 'la), the son and successor of Baasha, king of Israel 1 K. xvi. 8-10; his reign lasted for little more than a year (comp. ver. 8 with 10). He was killed, while drunk, by Zimri, in the house of his steward Arsa, who was probably a confederate in the plot. This occurred, according to Josephus (*Ant.* viii. 12, §4), while his army and officers were absent at the siege of Gibbethon.

2. Father of Hoshiah, the last king of Israel (2 K. xv. 30, xvii. 1). [W. L. B.]

\* The LXX. in both MSS., and Josephus (*Ant.* vi. 1, §1), substitute Asaelon for Ekron throughout this passage (1 Sam. v. 10-12). In support of this it should be remarked that, according to the Hebrew text, the golden trespass offerings were given for

Askelon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the LXX. and Hebrew texts of this transaction. See especially v. 6.

**E'LAH.** 1. (עֵלָה; Ἑλάς; *Ela*), one of the dukes of Edom (Gen. xxxvi. 41; 1 Chr. i. 52). By Knobel (*Genesis*, ad loc.) the name is compared with Elath on the Red Sea.

2. Shimei ben-Elah (accour. *Ela*, עֵלָה; Ἑλά) was Solomon's commissariat officer in Benjamin (1 K. iv. 18).

3. (Ἀλά, Alex. Ἀλά), a son of Caleb the son of Jephunneh (1 Chr. iv. 15). His sons were called Kenaz or Uknaz; but the words may be taken as if Kenaz was, with Elah, a son of Caleb. The names of both Elah and Kenaz appear amongst the Edomite "dukes."

4. (Ἑλά, Alex. Ἑλά), son of Uzzi, a Benjamite (1 Chr. ix. 8), and one of the chiefs of the tribe at the settlement of the country.

**ELAH, THE VALLEY OF** (עֵלָה) = Valley of the Terebinth; ἡ κοιλάς Ἑλά, or τῆς δρύος, once ἐν τῇ κοιλάδι; *Vallis Terebinthi*, a valley in (not "by," as the A. V. has it) which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. xvii. 2, 19). It is once more mentioned in the same connexion (xxi. 9). We have only the most general indications of its position. It lay somewhere near Socoh of Judah, and Azekah, and was nearer Ekron than any other Philistine town. So much may be gathered from the narrative of 1 Sam. xvii. Socoh has been with great probability identified with *Suweikeh*, near to *Beit Netf*, some 14 miles S.W. of Jerusalem, on the road to *Beit Jibrin* and Gaza, among the more western of the hills of Judah, not far from where they begin to descend into the great Philistine Plain. The village stands on the south slopes of the *Wadyes Sumt*, or valley of the acacia, which runs off in a N.W. direction across the plain to the sea just above Ashdod. Below *Suweikeh* it is joined by two other wadyes, large though inferior in size to itself, and the junction of the three forms a considerable open space of not less than a mile wide cultivated in fields of grain. In the centre is a wide torrent bed thickly strewn with round pebbles, and bordered by the acacia bushes from which the valley derives its present name.

There seems no reason to doubt that this is the Valley of the Terebinth. It has changed its name and is now called after another kind of tree, but the terebinth (*Butm*) appears to be plentiful in the neighbourhood, and one of the largest specimens in Palestine still stands in the immediate neighbourhood of the spot. A mile down the valley from *Suweikeh* is *Tell zakariyeh*, which Schwarz (102) and Van de Velde propose to identify with Azekah. If this could be maintained, the site of the valley might be regarded as certain. Ekron is 17 miles, and Bethlehem 12 miles distant from Socoh. For the valley, see Rob. ii. 20, 21; Van de Velde, ii. 191; Porter, *Handb.* 249, 250, 280.

There is a point in the topographical indications of 1 Sam. xvii., which it is very desirable should be carefully examined on the spot. The Philistines were between Socoh and Azekah, at Ephes-dammim, or Pas-dammim, on the mountain on the S. side of the Wady, while the Israelites were in the "valley" (עֵלָה) of the terebinth, or rather on the mountain on the N. side, and "the ravine" or "the glen" (נֶחֱלָה) was between the two armies (ver. 2, 3). Again (52), the Israelites pursued the Philistines

"till you come to 'the ravine'" (the same word). There is evidently a marked difference between the "valley" and the "ravine," and a little attention on the spot might do much towards elucidating this, and settling the identification of the place.

The traditional "Valley of the Terebinth" is the *Wady Beit Hanina*, which lies about 4 miles to the N.W. of Jerusalem, and is crossed by the road to *Nebi Samucl*. The scene of David's conflict is pointed out a little north of the "Tombs of the Judges" and close to the traces of the old paved road. But this spot is in the tribe of Benjamin and otherwise does not correspond with the narrative of the text. [G.]

**E'LAM** (עֵלָם; Ἑλām; *Aelam*), like Αἶλαμ, seems to have been originally the name of a man—the son of Shem (Gen. x. 22; 1 Chr. i. 17). Commonly, however, it is used as the appellation of a country (Gen. xiv. 1, 9; Is. xi. 11; xxi. 2; Jer. xxv. 25; xlix. 34-39; Ez. xxxii. 24; Dan. viii. 2), and will be so treated in this article.

The Elam of Scripture appears to be the province lying south of Assyria and east of Persia Proper, to which Herodotus gives the name of Cissia (iii. 91, v. 49, &c.), and which is termed Susia or Susiana by the geographers (Strab. xv. 3, §12; Ptolem. vi. 3, &c.). It includes a portion of the mountainous country separating between the Mesopotamian plain and the high table-land of *Iran*, together with a fertile and valuable low tract at the foot of the range, between it and the Tigris. The passage of Daniel (viii. 2) which places Shushan (Susa) in "the province of Elam," may be regarded as decisive of this identification, which is further confirmed by the frequent mention of Elymæans in this district (Strab. xi. 13, §6, xvi. 1, §17; Ptolem. vi. 3; Plin. *H. N.* vi. 26, &c.), as well as by the combinations in which Elam is found in Scripture (see Gen. xiv. 1; Is. xxi. 2; Ez. xxxii. 24). It appears from Gen. x. 22, that this country was originally peopled by descendants of Shem, closely allied to the Arameans (Syrians) and the Assyrians; and from Gen. xiv. 1-12, it is evident that by the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-lomero, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manifestly exercises a supremacy over a number of other kings, among whom we even find Amraphel, king of *Shinar*, or Babylon. It is plain then that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x. 10), and later by either Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamitic capital, as one of the most ancient cities of the East, and show its monarchs to have maintained, throughout almost the whole period of Babylonian and Assyrian greatness, a quasi-independent position. Traces are even thought to have been found of Chedor-lomero himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as *Kudur-mapula*. The Elamitic empire established at this time was, however, but of short duration. Babylon and Assyria proved on the whole stronger powers, and Elam during the period of their greatness can only be regarded as the foremost of their

feudatories. Like the other subject nations she retained her own monarchs, and from time to time, for a longer or a shorter space, asserted and maintained her independence. But generally she was content to acknowledge one or other of the two leading powers as her suzerain. Towards the close of the Assyrian period she is found allied with Babylon and engaged in hostilities with Assyria; but she seems to have declined in strength after the Assyrian empire was destroyed, and the Median and Babylonian arose upon its ruins. Elam is clearly a "province" of Babylonia in Belshazzar's time (Dan. viii. 2), and we may presume that it had been subject to Babylon at least from the reign of Nebuchadnezzar. The desolation which Jeremiah (xlix. 30-34) and Ezekiel (xxii. 24-25) foresaw, was probably this conquest, which destroyed the last semblance of Elamitic independence. It is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon; but there is some reason to think that it may have revolted and joined the Persians before the city was besieged. The prophet Isaiah in two places (xxi. 2; xxii. 6) seems to speak of Elam as taking part in the destruction of Babylon; and unless we are to regard him with our translators as using the word loosely for Persia, we must suppose that on the advance of Cyrus and his investment of the Chaldaean capital, Elam made common cause with the assailants. She now became merged in the Persian empire, forming a distinct satrapy (Herod. iii. 91), and furnishing to the crown an annual tribute of 300 talents. Susa, her capital, was made the ordinary residence of the court, and the metropolis of the whole empire, a curious circumstance, the causes of which will be hereafter considered. [SHUSHAN.] This mark of favour did not, however, prevent revolts. Not only was the Magian revolution organised and carried out at Susa, but there seem to have been at least two Elamitic revolts in the early part of the reign of Darius Hystaspes (Behistun Inscr. col. i. par. 16, and col. ii. par. 3). After these futile efforts, Elam acquiesced in her subjection, and, as a Persian province, followed the fortunes of the empire.

It has been already observed that Elam is called Cissia by Herodotus, and Susiana by the Greek and Roman geographers. The latter is a term formed artificially from the capital city, but the former is a genuine territorial title, and marks probably an important fact in the history of the country. The Elamites, a Semitic people, who were the primitive inhabitants (Gen. x. 22), appear to have been invaded and conquered at a very early time by a Hamitic or Cushite race from Babylon, which was the ruling element in the territory from a date anterior to Chedor-Isomer. These Cushites were called by the Greeks Cissians (*Kissioi*) or Cosseans (*Kossaioi*), and formed the dominant race, while the Elamites or Elymaeans were in a depressed condition. In Scripture the country is called by its primitive title without reference to subsequent changes; in the Greek writers it takes its name from the conquerors. The Greek traditions of Memnon and his Ethiopians are based upon this Cushite conquest, and rightly connect the Cissians or Cosseans of Susiana with the Cushite inhabitants of the upper valley of the Nile. [G. R.]

2. A Korhite Levite, fifth son of Meshelemiah; one of the *Bene-Asaph*, in the time of king David (1 Chr. xxvi. 3).

3. A chief man of the tribe of Benjamin, one of the sons of Shashak (1 Chr. viii. 24).

4. ('*Alām*, 'Hlām; *Aelam*). "Children of Elam," *Bene-Elam*, to the number of 1254, returned with Zerubbabel from Babylon (Ezr. ii. 7; Neh. vii. 12; 1 Esd. v. 12), and a further detachment of 71 men with Ezra in the second caravan (Ezr. viii. 7; 1 Esd. viii. 33). It was one of this family, Shechaniah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (x. 2, *Cetob*, 'Olam), and six of the Bene-Elam accordingly put away their foreign wives (x. 26). Elam occurs amongst the names of those, the chief of the people, who signed the covenant with Nehemiah (Neh. x. 14). The lists of Ezr. ii. and Neh. vii. contain apparently an irregular mixture of the names of places and of persons. In the former, ver. 21-34, with one or two exceptions, are names of places; 3-19, on the other hand, are not known as names of places, and are probably of persons. No such place as Elam is mentioned as in Palestine, either in the Bible or in the *Onomasticon* of Eusebius, nor has since been discovered as existing in the country. We may therefore conclude that it was a person.

5. In the same lists is a second Elam, whose sons, to the same number as in the former case, returned with Zerubbabel (Ezr. ii. 31; Neh. vii. 34), and which for the sake of distinction is called "the other Elam" ('*Alām*, 'Hlām; *Aelam*, *Aelam*). The coincidence of the numbers is curious, and also suspicious.

6. One of the priests who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii. 42). [G.]

ELAMITES ('*Alāmī*; 'Ελαμίται, Strab. Ptol.; *Aelamitae*). This word is found only in Ezra iv. 9; and is omitted in that place by the Septuagint writers, who probably regarded it as a gloss upon "Susanchites," which had occurred only a little before. The Elamites were the original inhabitants of the country called Elam; they were descendants of Shem, and perhaps drew their name from an actual man, Elam (Gen. x. 22). It has been observed in the preceding article that the Elamites yielded before a Cossian or Cushite invasion. They appear to have been driven in part to the mountains, where Strabo places them (xi. 13, §6; xvi. 1, §17), in part to the coast, where they are located by Ptolemy (vi. 3). Little is known of their manners and customs, or of their ethnic character. Strabo says they were skilful archers (xv. 3, §10), and with this agree the notices both of Isaiah and Jeremiah, the latter of whom speaks of "the bow of Elam" (xlix. 35), while the former says that "Elam bare the quiver" (xxii. 6). Isaiah adds also in this place, that they fought both on horseback and from chariots. They appear to have retained their nationality with peculiar tenacity; for it is plain from the mention of them on the day of Pentecost (Acts ii. 9), that they still at that time kept their own language, and the distinct notice of them by Ptolemy more than a century later seems to show that they were not even then merged in the Cosseans. In Jud. i. 6 the name is given in the Greek form as ELYMAEANS. [G. R.]

EL'ASAH ('*Alāsāh*; *Elasa*). 1. ('*Haard*) One of the Bene-Pashur, a priest, in the time of  
2 l. 2

Ezra, who had married a Gentile wife (Ezra x. 22). In the apocryphal Esdras, the name is corrupted to TALASAT.

2. (Ἐλεασρ, Alex. Ἐλεασρ), son of Shaphan; one of the two men who were sent on a mission by King Zedekiah to Nebuchadnezzar at Babylon after the first deportation from Jerusalem, and who at the same time took charge of the letter of Jeremiah the Prophet to the captives in Babylon (Jer. xxix. 3).

Elasah is precisely the same name as ELEASAH, the latter being the more correct rendering of the Hebrew word.

ELATH, ELOTH (אֵילָת, אֵילוֹת; אֵילָוֹת, אֵילָדוֹת; Joseph. *Ant.* Αἰλαῶν; *Elath*, *Ailath*, *Ailath*, *Aila*), the name of a town of the land of Edom, commonly mentioned together with Ezion-geber, and situate at the head of the Arabian Gulf, which was thence called the Elanitic Gulf. It first occurs in the account of the wanderings (Deut. ii. 8), and in later times must have come under the rule of David in his conquest of the land of Edom, when "he put garrisons in Edom, throughout all Edom put he garrisons, and all they of Edom became David's servants" (2 Sam. viii. 14). We find the place named again in connexion with Solomon's navy, "in Eziongeber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom" (1 K. ix. 26, cf. 2 Chr. viii. 17). It was apparently included in the revolt of Edom against Joram recorded in 2 K. viii. 20; but it was taken by Azariah, who "built Elath, and restored it to Judah" (xiv. 22). After this, however, "Rezin king of Syria recovered Elath, and drove out the Jews from Elath, and the Syrians came to Elath and dwelt there to this day" (xvi. 6). From this time the place is not mentioned until the Roman period, during which it became a frontier town of the south, and the residence of a Christian bishop. The Arabic

name is *Eyleh* (أَيْلَه).

In the geography of Arabia, Eyleh forms the extreme northern limit of the province of the Hijāz (El-Makreczee, *Khitat*; and *Marsūd*, s. v.; cf. *ARABIA*), and is connected with some points of the history of the country. According to several native writers the district of Eyleh was, in very ancient times, peopled by the Samcyda, said to be a tribe of the Amalekites (the first Amalek). The town itself, however, is stated to have received its name from Eyleh, daughter of Midian (El-Makreczee's *Khitat*, s. v.; Caussin's *Essai sur l'Hist. des Arabes*, i. 23). The Amalekites, if we may credit the writings of Arab historians, passed in the earliest times from the neighbourhood of the Persian Gulf through the peninsula (spreading over the greater part of it), and thence finally passed into Arabia Petraea. Future researches may trace in these fragments of primeval tradition the origin of the Phoenicians. Herodotus seems to strengthen such a supposition when he says that the latter people came from the Erythraean Sea. Were the Phoenicians a mixed Cushite settlement from the Persian Gulf, who carried with them the known maritime characteristics of the peoples of that stock, developed in the great commerce of Tyre, and in that of the Persian Gulf, and, as a link between their extreme eastern and western settlements, in the fleets that sailed from Eziongeber and Elath, and from the southern ports of the Yemen?

[See *ARABIA*, *CAPITOR*, *MIZRAIM*.] It should be observed, however, that Tyrian sailors manned the fleets of Solomon and of Jehoshaphat.

By the Greeks and Romans, Elath was called Ἐλδνα (Ptol. v. 17, §1), Αἰλανα (Strabo, xvi. 768; Plin. v. 12; vi. 32). Under their rule it lost its former importance with the transference of its trade to other ports, such as Berenice, Myos Hormos, and Arsinoë; but in Mohammedan times it again became a place of some note. It is now quite insignificant. It lies on the route of the Egyptian pilgrim-caravan, and the mountain-road or 'Akabah named after it, was improved, or reconstructed, by Ahmad Ibn-Tooloon, who ruled Egypt from A.D. cir. 840 to 848. [E. S. P.]

EL-BETHEL (אֵל-בֵּית-אֵל = "God of the House of God:" LXX., both MSS. omit the "El," Βαῖθῆλ; and so also Vulg., *Domus Dei*, Syr. and Arabic versions), the name which Jacob is said to have bestowed on the place at which God appeared to him when he was flying from Esau (Gen. xxxv. 7). This account differs from the more detailed narrative in chap. xxviii., inasmuch as it places the bestowal of the name after the return from Mesopotamia. A third version of the transaction is given in xxxv. 15. [BETHLEH.] [G.]

EL/OIA (Ἐλκία), one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Jud. viii. 1); what Hebrew name the word represents is doubtful. Hilckiah is probably Chelkias, two steps back in the genealogy. The Syriac version has Elkana. In the Vulgate the names are hopelessly altered.

EL'DAAH (אֵלְדָּאָה, "whom God called;" Ἐλδὰα, Ἐλδὰδ; *Eldaa*; Gen. xxv. 4; 1 Chr. i. 33), the last, in order, of the sons of Milban. The name does not occur except in the two lists of Midian's offspring; and no satisfactory trace of the tribe which we may suppose to have taken the appellation has yet been found. [E. S. P.]

EL'DAD and ME'DAD (אֵלְדָּד וּמֵדָד; Ἐλδὰδ καὶ Μωδὰδ; *Eldad et Medad*), two of the 70 elders to whom was communicated the prophetic power of Moses (Num. xi. 16, 26). Although their names were upon the list which Moses had drawn up (xi. 26), they did not repair with the rest of their brethren to the tabernacle, but continued to prophesy in the camp. Moses being requested by Joshua to forbid this, refused to do so, and expressed a wish that the gift of prophecy might be diffused throughout the people. The great fact of the passage is the more general distribution of the spirit of prophecy, which had hitherto been concentrated in Moses; and the implied sanction of a tendency to separate the exercise of this gift from the service of the tabernacle, and to make it more generally available for the enlightenment and instruction of the Israelites, a tendency which afterwards led to the establishment of "schools of the prophets." The circumstance is in strict accordance with the Jewish tradition that all prophetic inspiration emanated originally from Moses, and was transmitted from him by a legitimate succession down to the time of the captivity. The mode of prophecy in the case of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond): comp. the case of Saul, 1 Sam. x. 11.

From Num. xi. 25, it appears that the gift

was not merely intermittent, but a continuous energy, which only occasionally developed in action. [T. E. B.]

**ELDER** (ἡγεμὼν; πρεσβύτερος; *senior*). The term *elder* or *old man*, as the Hebrew literally imports, was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It applied to various offices; Eliezer, for instance, is described as the "old man of the house," i. e. the *major domo* (Gen. xxiv. 2); the officers of Pharaoh's household (Gen. i. 7), and, at a later period, David's head servants (2 Sam. xii. 17) were so termed; while in Ez. xxvii. 9 the "old men of Gêbal" are the *master-workmen*. As betokening a political office, it applied not only to the Hebrews, but also to the Egyptians (Gen. i. 7), the Moabites and Midianites (Num. xxii. 7). Wherever a patriarchal system is in force, the office of the *elder* will be found, as the keystone of the social and political fabric; it is so at the present day among the Arabs, where the Sheikh (= the *old man*) is the highest authority in the tribe. That the title originally had reference to age, is obvious; and age was naturally a concomitant of the office at all periods (Josh. xxiv. 31; 1 K. xii. 6), even when the term had acquired its secondary sense. At what period the transition occurred, in other words when the word *elder* acquired an official signification, it is impossible to say. The earliest notice of the *elders* acting in concert as a political body is at the time of the Exodus. We need not assume that the order was then called into existence, but rather that Moses availed himself of an institution already existing and recognised by his countrymen, and that, in short, "the elders of Israel" (Ex. iii. 16, iv. 29) had been the *senate* (γενοῦσία, I. XX.) of the people, ever since they had become a people. The position which the elders held in the Mosaic constitution, and more particularly in relation to the people, is described under CONGREGATION; they were the representatives of the people, so much so that *elders* and *people* are occasionally used as equivalent terms (comp. Josh. xiv. 1 with 2, 19, 21; 1 Sam. vii. 4 with 7, 10, 19). Their authority was undefined, and extended to all matters concerning the public weal; nor did the people question the validity of their acts, even when they disapproved of them (Josh. ix. 18). When the tribes became settled the elders were distinguished by different titles according as they were acting as national representatives ("elders of Israel," 1 Sam. iv. 3; 1 K. vii. 1, 3 "of the land," 1 K. xx. 7; "of Judah," 2 K. xiii. 1; Ez. viii. 1), as district governors over the several tribes (Deut. xxi. 28; 2 Sam. xxi. 11), or as local magistrates in the provincial towns, appointed in conformity with Deut. xvi. 18, whose duty it was to sit in the gate and administer justice (Deut. xix. 12, xxi. 3 ff., xxii. 15; Ruth iv. 9, 11; 1 K. xxi. 8; Jud. x. 6); their number and influence may be inferred from 1 Sam. xxx. 26 ff. They retained their position under all the political changes which the Jews underwent under the Judges (Judg. ii. 7, viii. 14, xi. 5. 1 Sam. iv. 3, viii. 4); under the kings (2 Sam. xvii. 4; 1 K. xii. 6, xx. 8, xxi. 11); during the captivity (Jer. xxi. 1; Ez. viii. 1, xiv. 1, xx. 1):

subsequently to the return (Ezr. v. 5, vi. 7, 14 x. 8, 14); under the Maccabees,\* when they were described sometimes as the *senate* (γενοῦσία; 1 Macc. xii. 6; 2 Macc. i. 10, iv. 44, xi. 27; Joseph. *Ant.* xii. 3, §3), sometimes by their ordinary title (1 Macc. vii. 33, xi. 23, xii. 35); and, lastly, at its commencement of the Christian era, when they are noticed as a distinct body from the Sanhedrim, but connected with it as one of the classes whence its members were selected, and always acting in conjunction with it and the other dominant classes. [SANHEDRIM.] Thus they are associated sometimes with the Chief Priests (Matt. xxi. 23), sometimes with the Chief Priests and the Scribes (Matt. xvi. 21), or the Council (Matt. xxvi. 59), always taking an active part in the management of public affairs. St. Luke describes the whole order by the collective term πρεσβυτήριον (Luke xxii. 66; Acts xxii. 5). In Matt. xv. 2 and Heb. xi. 2 "elders" is expressive of time rather than office. For the position of the elders in the synagogue and the Christian Church, see ΣΥΝΑΓΟΓΗ, BISHOP. [W. L. B.]

**EL'EAD** (Ἠλεάδ; 'Elaēd; *Eluē*), a descendant of Ephraim (1 Chr. vii. 21), but whether through Shuthelah, or a son of the patriarch (the second Shuthelah being taken as a repetition of the first, and Ezer and Elead as his brothers) is not to be determined (see Bertheau, *Chronik*, 82).

**EL'EAL'EH** (Ἠλεαλή; 'Elaelā; *Elcale*), a place on the east of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. xxxi. 3, 37). We lose sight of it till the time of Isaiah and Jeremiah, by both of whom it is mentioned as a Moabite town, and, as before, in close connexion with Heshbon (Is. xv. 4, xvi. 9; Jer. xlviii. 34). The extensive ruins of the place are still to be seen, bearing very nearly their ancient name, *El-A'el*, though with a modern signification, "the high," a little more than a mile N. of Heshbon. It stands on the summit of a rounded hill commanding a very extended view of the plain, and the whole of the Southern *Belka* (Burckh. *Syr.* 865; Seetzen, 1854, p. 407). It is from this commanding situation that it doubtless derives its name, which, like many other names of modern Palestine, is as near an approach to the ancient sound as is consistent with an appropriate meaning. [G.]

**ELE'ASA** ('Elaasā, Alex. 'Alasā; *Laisa*), a place at which Judas Maccabæus encamped before the fatal battle with Barchides, in which he lost his life (1 Macc. ix. 5). It was apparently not far from Azotus (comp. 15). Josephus (*Ant.* xii. 11, §1) has Bethzetho, by which he elsewhere renders Bezeth. But this may be but a corrupt reading of Berzetha or Bethzetha, which is found in some MSS. for Berea in 1 Macc. ix. 4. Another reading is Adasa, where Judas had encamped on a former memorable occasion (vii. 40). It is singular that Bezeth should be mentioned in this connexion also (see verse 19). [G.]

**ELE'ASAH** (Ἠλεάσα; *Elasa*). 1. ('Elaasā). Son of Helez, one of the descendants of Judah, of the family of Hezron (1 Chr. ii. 39).

\* Some difficulty arises at this period from the notice in 1 Macc. xiv. 28 of a double body, ἀρχοντες ἔθνος, and πρεσβύτεροι τῆς χώρας; and again in 3 Macc. i. 8, γενοῦσία and πρεσβύτεροι: the second term

may refer to the municipal authorities, as is perhaps implied in the term χώρα. The identity of the γενοῦσία and the πρεσβύτεροι in other passages is clear from 1 Macc. xii. 6, compared with 38.

●2. ('Ελασρ; Alex. Ελασα) Son of Rapha, or Rephaiah; a descendant of Saul through Jonathan and Merib-baal or Mephibosheth (1 Chr. viii. 37, ix. 43).

This name is elsewhere rendered in the A. V. • ELASAH.

ELEAZAR (עֲלֵאזָר; 'Ελεάζαρ; Eleazar).

1. Third son of Aaron, by Elisheba, daughter of Aminadab, who was descended from Judah, through Pharez (Ex. vi. 23, 25; xxviii. 1; for his descent see Gen. xxxviii. 29, xvi. 12; Ruth, iv. 18, 20). After the death of Nadab and Abihu without children (Lev. x. 1; Num. iii. 4), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary (Num. iii. 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before his death was invested on Mount Horeb with the sacred garments, as the successor of Aaron in the office of High-priest (Num. xx. 28). One of his first duties was in conjunction with Moses to superintend the census of the people (Num. xxvi. 3). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxvii. 22, xxxi. 21). After the conquest of Canaan by Joshua he took part in the distribution of the land (Josh. xiv. 1). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua's, 25 years after the death of Moses. He is said to have been buried in "the hill of Phinehas" his son (Gen. p. 260), where Josephus says his tomb existed (*Ant.* v. 1, §29); or possibly a town called Gibeath-Phinehas (Josh. xiv. 33). The High-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithamar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazar in the person of Zadok (1 Sam. ii. 27; 1 Chr. vi. 8, xlv. 3; 1 K. ii. 27; Joseph. *Ant.* viii. 1, §3).

2. The son of Abinadab, of the "hill" (עֲלֵאזָר) of Kirjath-jearim, appointed by the inhabitants of that place to take care of the ark after its return from the Philistines (1 Sam. vii. 1).

3. The son of Dodo the Ahoite (עֲלֵאזָר), i. e. possibly a descendant of Ahoah of the tribe of Benjamin (1 Chr. viii. 4); one of the three principal mighty men of David's army, whose exploits are recorded 2 Sam. xxiii. 9; 1 Chr. xi. 12.

4. A Merarite Levite, son of Mahli, and grandson of Merari. He is mentioned as having had only daughters, who were married by their "brethren" (i. e. their cousins) (1 Chr. xxiii. 21, 22; xxiv. 28).

5. A priest who took part in the feast of dedication under Nehemiah (Neh. xii. 42).

6. One of the sons of Parosh; an Israelite (i. e. a layman) who had married a foreign wife, and had to put her away (Ezra x. 25; 1 Esdr. ix. 26).

7. Son of Phinehas a Levite (Ezr. viii. 33; 1 Esdr. viii. 63).

8. ELEAZAR ('Ελεάζαρ; Joseph. 'Ελεάζαρ), surnamed AVARAN (1 Macc. ii. 5 *Αβαράν*, or *Αβράν*, and so Joseph. *Ant.* xii. 6, 1; 9, 4. In 1 Macc. vi. 43, the common reading *δ' Αβαράν* arises either from the insertion of C by mistake after O, or from a false division of 'Ελεάζαρ *Αβαράν*). The fourth son of Mattathias, who fell by a noble act of self-devotion in an engagement with Antiochus Eupator,

b.c. 164 (1 Macc. vi. 43 ff.; Joseph. *Ant.* xii. 19, §4; *de B. J.* i. 1, §5; Ambr. *De offic. min.* 40). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight—"the help of God"—was his own name (2 Macc. viii. 23).

The surname is probably connected with Arab. *havar*, "to pierce an animal behind" (Mich. *sub voc.*). This derivation seems far better than that of Rödiger (Ersch u. Gruber, s. v.) from Arab. *khavaran*, "an elephant-hide." In either case the title is derived from his exploit.

9. A distinguished scribe ('Ελεάζαρ . . . τῶν πρωτεύοντων γραμματέων, 2 Macc. vi. 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Macc. vi. 18-31). His death was marked by singular constancy and heroism, and seemed to have produced considerable effect. Later traditions embellished the narrative by representing Eleazar as a priest (*De Macc.* 5), or even high-priest (Grimm., *ad Macc.* l. c.). He was also distinguished by the nobler title of "the proto-martyr of the old covenant," "the foundation of martyrdom" (Chrys. *Hom.* 3 in *Macc.* init. Cf. Ambr. *de Jacob.* ii. 10).

For the general credibility of the history compare Grimm. *Excurs.* über 2 Macc. vi. 18-viii. in *Herz. Handb.*; also Ewald, *Gesch.* iv. 341, 532. [MACCABEES.]

The name Eleazar in 3 Macc. vi. appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering and yet "helped by God." (For the name comp. LAZARUS, Luke xvi. 19-25.)

10. The father of Jason, ambassador from Judas Maccabaeus to Rome. (1 Macc. viii. 18.)

11. The son of Eliud, three generations above Joseph, the husband of the Virgin Mary (Matt. i. 15). [B. F. W.]

ELEAZURUS ('Ελαίσεβος; Alex. 'Ελαίσβος; *Eliasis*), 1 Esd. ix. 24. [ELIASHIB.] It is difficult to see where the translators of the A. V. got the form of this name there given.

EL ELOHIE ISRAEL (אֱלֹהֵי יִשְׂרָאֵל) = "Almighty, God of Israel;" καὶ ἐπεκαλεῖσθαι τὸν θεὸν Ἰσραὴλ; *Fortissimum Deum Israel*, the name bestowed by Jacob on the altar which he erected facing the city of Shechem, in the piece of cultivated land upon which he had pitched his tent, and which he afterwards purchased from the Bene-Hamor (Gen. xxxiii. 19, 20).

E'LEPH (אֵלֶפֶת = the Ox; *Ξελήφον*, Alex. *Ξηλαφόν*—both by including the preceding name; *Eleph*), one of the towns allotted to Benjamin, and named next to Jerusalem (Josh. xviii. 28). The signification of the name may be taken as an indication of the pastoral pursuits of its inhabitants. The LXX. read *Zelah* and *Eleph* as one name, possibly owing to the "and" between them having been dropped; but if this is done, the number of 14 cities cannot be made up. The Peschito has

ܐܠܝܦܐ *Geltro*, for *Eleph*; but what the origin of this can be is not obvious. [G.]

ELEPHANT. The word does not occur in the text of the canonical Scriptures of A. V., but is found as the marginal reading to *Bohemoth*, in Job xl. 15. "*Elephants' teeth*" is the marginal reading for "*ivory*" in 1 K. x. 22; 2 Chr. ix. 41.

Elephants however are repeatedly mentioned in the 1st and 2nd books of Maccabees, as being used in warfare. The way in which they were used in battle, and the method of exciting them to fight, is described in the 6th chap. of 1 Macc. For the meaning of *Behemoth*, see BEHEMOTH. For the meaning of *יוֹנָתָן*, see IVORY. [W. D.]

**ELEUTHEROPOLIS** (Ἐλευθερόπολις, *the free city*), a town of southern Palestine, situated at the foot of the hills of Judah, on the borders of the great plain of Philistia. It is about 25 miles from Jerusalem on the road to Gaza. It is not mentioned in Scripture; but it became in the early centuries of the Christian era one of the most important and flourishing towns in the country. Its ancient name was *Betogabra* (Βετογάβρα, *the House of Gabra or Gabriel*), which first occurs in the writings of Ptolemy in the beginning of the 2nd century (ch. xvi.). Josephus refers to a large village called *Bētrapis* (in Rufinus' copy *Βήτραβρις*) in this region, which may be the same (*B. J.* iv. 8, §1). It is found in the Peutinger Tables as *Betogabri* (Reland, *Pal.* p. 421). Its new name, Eleuthropolis, first occurs upon coins in the time of the emperor Septimius Severus (A.D. 202-3; Eckhel, iii. 488). That emperor during his visit to Palestine conferred important privileges on several cities; and this was one of the number. Eusebius is the first writer who mentions Eleuthropolis (*Onom.* s. v.), which was in his time the capital of a large province. It was the seat of a bishop, and was so well known that he made it the central point in Southern Palestine from which the positions of more than 20 other towns were determined. Epiphanius, the well-known writer, was born in a village three miles from the city, in the beginning of the 4th century; and is often called an Eleuthropolitan (Reland, pp. 751-2). In the year A.D. 796, little more than a century and a half after the Saracenic conquest, Eleuthropolis was razed to the ground, and left completely desolate. The Greek language now gave place to the Arabic; and this city lost its proud name, and its prouder rank together (Reland, p. 987). Like so many other cities, the old name, which had probably never been lost to the peasantry, was revived among writers; and we thus find *Beigeberrin*, or some form like it, constantly in use after the 8th century. In the 12th century the Crusaders found the place in ruins, and built a fortress on the old foundations; the remains of which, and the chapel connected with it, still exist. After the battle of Hattin, *Beit Jibrin*, for such is its Arabic name, fell into the hands of the Saracens. It was retaken by King Richard of England, but it was finally captured by Bibars (see Will. Tyr. 14, 22; Jac. de Vit. in *Gesta Dei*, pp. 1070, 1071; Bohseddin, *Vit. Salad.* p. 229). It has since crumbled to ruin under the blight of Mohammedan rule.

Several curious traditions have found a "local habitation" at *Beit Jibrin*. One places here the miraculous fountain which sprang from the jawbone Samson wielded with such success against the Philistines (Anton. Mant. *Itin.* 30, 32).

The modern village contains some 50 or 60 houses. It is situated in a little nook, in the side of a long green valley. The ancient ruins are of considerable extent; they consist of the remains of a strong fortress standing within an irregular enclosure encompassed by a massive wall. A great part of this outer wall is completely ruinous; but the

north side, which skirts the bank of the valley, is still several feet high. The enclosure is about 600 ft. in diameter. The fortress is about 200 ft. square, and is of a much later date than the outer wall; an Arabic inscription over the gateway bears the date A.H. 958 (A.D. 1551). Along its south side are the walls and part of the groined roof of a fine old chapel—the same, doubtless, which was built by the Crusaders.

The valley, on the side of which the ruins of Eleuthropolis lie, runs up among the hills for two miles or more south-by-east. On each side of it are low ridges of soft limestone, which rises here and there in white bare crowns over the dark shrubs. In these ridges are some of the most remarkable caverns, in Palestine. They are found together in clusters, and form subterranean villages. Some are rectangular, 100 ft. and more in length, with smooth walls and lofty arched roofs. Others are bell-shaped—from 40 to 70 ft. in diameter, by nearly 60 ft. in height—all connected together by arched doorways and winding subterranean passages. A few are entirely dark; but most of them are lighted by a circular aperture at the top. They occur at short intervals along both sides of the whole valley; and the writer also saw them at several other neighbouring villages. We learn from history that the Idumaeans [EDOMITES] came, during the Babylonish captivity, and occupied the greater part of Southern Palestine. Jerome says they inhabited the whole country extending from Eleuthropolis to Petra and Elah; and that they dwell in caves—preferring them both on account of their security, and their coolness during the heat of summer (*Comm. in Obad.*). These remarkable caves, therefore, were doubtless the work of the Idumaeans. (See *Handbook for Syria and Palestine*, pp. 255, sq.; Robinson's *Biblical Researches*, 2nd ed. vol. ii. pp. 23, 57, sq.) [J. L. P.]

**ELEUTHERUS** (Ἐλεύθερος), a river of Syria mentioned in 1 Macc. xi. 7; xii. 30. In early ages it was a noted border stream. According to Strabo it separated Syria from Phoenicia (xvi. p. 753), and formed the northern limit of Coele-syria. Josephus informs us that Antony gave Cleopatra "the cities that were within the river Eleutherus, as far as Egypt, except Tyre and Sidon" (*Ant.* xv. 4, §1, *B. J.* i. 18, §5). A careful examination of the passages in Num. xxxiv. 8-10, and Ezek. xlvii. 15-17, and a comparison of them with the features of the country, lead the present writer to the conclusion that this river also formed, for so far, the northern border of the "Promised Land" (*Five Years in Damascus*, vol. ii. pp. 354, sq.). Pliny says that at a certain season of the year it swarmed with tortoise (ix. 10).

Of the identity of the Eleutherus with the modern *Nahr-el-Kebir*, "Great River," there cannot be a doubt. Its highest source is at the northeastern base of Lebanon; it sweeps round the northern end of the range, through the opening called in Scripture "the entrance of Hamath" (Num. xxxiv. 8); and, after receiving several small tributaries from the heights of Lebanon, it falls into the Mediterranean about 18 miles north of Tripolis. It still forms the boundary between the provinces of *Akkâr* and *el-Hum*. During summer and autumn it is but a small stream, easily forded; but in winter it swells into a large and rapid river. [J. L. P.]

ELHA'NAN (עֲלִינָן; 'Eleaván; Adeodatus).

1. A distinguished warrior in the time of King David, who performed a memorable exploit against the Philistines, though in what that exploit exactly consisted, and who the hero himself was, it is not easy to determine.

1. 2 Sam. xxi. 19 says that he was the "son of Jaare Oregim the Bethlehemite," and that he "slew Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here, in the A. V. the words "the brother of" are inserted, to bring the passage into agreement with,

2. 1 Chr. xx. 5, which states that "Elhanan son of Jair (or Jaor) slew Lahmi the brother of Goliath the Gittite, the staff of whose spear," &c.

Of these two statements the latter is probably the more correct—the differences between them being much smaller in the original than in English. We must refer the reader to the Hebrew for the comparison of the two,\* the discrepancies in which are not greater than those known to exist in other corrupt passages, but the following are the grounds of our decision.

(a.) The word *Oregim* exists twice in the verse in Samuel, first as a proper name, and again at the end—"weavers." The former has probably been taken in by an early transcriber from the latter, i. e. from the next line of the MSS. To the end of the verse it certainly belongs, since it is found in the parallel passage of Chron., and also forms part of what seems to have been a proverbial description of Goliath (comp. 1 Sam. xvii. 7). The chances are very much against the same word—and that not a common one—forming part of one verse in two capacities.

(b.) The statement in Samuel is in contradiction to the narrative of 1 Sam. xvii., according to which Goliath the Gittite was killed by David. True, Ewald (*Gesch.* iii. 91, 2)—from the fact that David's antagonist is, with only 3 exceptions (one of them in the doubtful verse, xvii. 12-32), called "the Philistine," and for other linguistic reasons—has suggested that Elhanan was the real victor of Goliath, and that after David became king the name of Goliath was attached to the nameless champion whom he killed in his youth. But against this is the fact that Goliath is named thrice in 1 Sam. xvii. and xxi.—thrice only though it be; and also that Elhanan's exploit, from its position both in Samuel and in Chronicles, and from other indications, took place late in David's reign, and when he had been so long king and so long renowned, that all the brilliant feats of his youth must have been brought to light, and well known to his people. It is recorded as the last but one in the series of encounters of what seems to have been the closing struggle with the Philistines. It was so late that David had acquired among his warriors the fond title of "the light of Israel" (2 Sam. xxi. 17), and that his nephew Jonathan was old enough to perform a feat rivaling that of his illustrious uncle years before. It was certainly after David was made king, for he goes down

to the fight, not with his "young men" (יְעָרָיו),\* as when he was leading his band during Saul's life, but with his "servants" (עָבָדָיו), literally his "slaves," a term almost strictly reserved for the subjects of a king. The vow of his guard, on one of these occasions, that it should be his last appearance in the field, shows that it must have been after the great Ammonite war, in which David himself had led the host to the storming of Rabbah (2 Sam. xii. 29). It may have been between this last event and the battle with Absalom beyond Jordan, though there are other obvious reasons why David stayed within the walls of Mahanaim on that occasion.

On the whole, therefore, though the question is beset with difficulties, the just conclusion appears to be that the reading in Chronicles is the more correct one, according to which Elhanan is the son of Jair,\* and slew Lahmi the brother of Goliath.

Jerome in his *Quæst. Hebr.* on both passages—he does not state whether from ancient tradition or not—translates Elhanan into *Adeo-datus*, and adds *filius saltis Polymitaris Bethlehemites*—"the son of a wood, a weaver, a Bethlehemite." Adeo-datus he says is David, which he proves not only by arguments drawn from the meaning of each of the above words, but also from the statement in the concluding verse of the record that all these giants "fell by the hand of David and by the hand of his servants," and as Elhanan slew Goliath, Elhanan must be David.

2. The son of Dodo of Bethlehem, one of "the thirty" of David's guard, and named first on the list (2 Sam. xxiii. 24; 1 Chr. xi. 26). See Kennicott's *Dissertation*, 179.

The same name is also found with Baal substituted for EL,—BAAL-HANAN. (Comp. BEEK-LIADA.) [4.]

ELI (אֵלִי; 'HAL; 'Hæl; Joseph.; *Ileli*), was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. x. 1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 K. ii. 27), had a son Ahimelech, who is expressly stated to have been "of the sons of Ithamar" (1 Chr. xxiv. 3; cf. 2 Sam. viii. 17). With this accords the circumstance that the names of Eli and his successors in the high-priesthood up to, and including, Abiathar, are not found in the genealogy of Eleazar (1 Chr. vi. 4-15; cf. Ezr. vii. 1-5). As the history makes no mention of any high-priest of the line of Ithamar before Eli, he is generally supposed to have been the first of that line, who held the office. ("Hæl πρότερον τούτων [ἀρχιερωσύνην] παραλαμβάνος," Joseph. *Ant.* viii. i. §3.) From him, his sons having died before him, it appears to have passed to his grandson, Ahitub (1 Sam. xiv. 3; Josephus, however, says "φινεστος δὲ ἦδη καὶ παῖς τοῦ πατρὸς αὐτοῦ παρακχεωρημένος διὰ τὸ γῆρας," *Ant.* v. xi. §2), and it certainly remained in his family till Abiathar, the grandson

\* It will be found fully examined in Kennicott's *Dissertation*, 78.

\* Nothing can be more marked than this distinction. *Na'ar* (נָעָר) is used almost invariably for David's followers up to the death of Saul, and then at once the term changes, and *Ebed* (עָבֵד), a "slave," is as exclusively employed. Even Absalom's people go by the former name. This will be evident to any one who

will look into the quotations under the two words in that most instructive book, *The Englishman's Hebrew Concordance*.

\* Ewald has overcome the difficulty of the two discrepant passages by a curious eclectic process. From Chronicles he accepts the name "Jair," but rejects "Lahmi, the brother of." From Samuel he takes "the Bethlehemite," and rejects "Oregim."

of Ahitub, was "thrust out from being priest unto the Lord," by Solomon for his share in Adonijah's rebellion (1 K. ii. 26, 27; i. 7), and the high-priesthood passed back again to the family of Eleazar in the person of Zadok (1 K. ii. 35). How the office ever came into the younger branch of the house of Aaron we are not informed, though there is reason to suppose that its doing so was sanctioned by God (1 Sam. ii. 30). Its return to the elder branch was one part of the punishment which had been denounced against Eli during his lifetime, for his culpable negligence in contenting himself with mere verbal reprimand (1 Sam. ii. 22-25) instead of active paternal and judicial restraint (iii. 13), when his sons by their rapacity and licentiousness profaned the priesthood, and brought the rites of religion into abhorrence among the people (1 Sam. ii. 27-36, with 1 K. ii. 27). Another part of the same sentence (ver. 31-33) appears to have been taking effect in the reign of David, when we read, that "there were more chief men found of the sons of Eleazar than of the sons of Ithamar," sixteen of the former, and only eight of the latter (1 Chr. xxiv. 4). Notwithstanding this one great blemish, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1 Sam. iii. 18), and his supreme regard for the ark of God (iv. 18). In addition to the office of high-priest he held that of judge, being the immediate predecessor of his pupil Samuel (1 Sam. vii. 6, 15-17), the last of the judges. The length of time during which he judged Israel is given as 40 years in our present Hebrew copies, whereas the LXX. make it 20 years (ἐξέκοιεν ἔτη, 1 Sam. iv. 18). It has been suggested in explanation of the discrepancy, that he was *solo* judge for 20 years, after having been co-judge with Samson for 20 years (Judg. xvi. 31). He died at the advanced age of 98 years (1 Sam. iv. 15), overcome by the disastrous intelligence that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phinehas. [ABIA-THAR, ELEAZAR, ITHAMAR.] (See Lightfoot's *Works*, vol. i. pp. 53, 907, fol. Lond. 1684; Selden, *de Success. in Pontif. Hebr.* lib. i. cap. 4.) [T. T. P.]

**ELI'AB** (עֲלִי'אָב; 'Eliab; *Eliab*). 1. Son of Hebron and leader of the tribe of Zebulun at the time of the census in the wilderness of Sinai (Num. i. 9, ii. 7, vii. 24, 29, x. 16).

2. A Reubenite, son of Pallu or Phallu, whose family was one of the principal in the tribe; and father or progenitor of Dathan and Abiram, the leaders in the revolt against Moses (Num. xvi. 8, 9, xvi. 1. 12; Deut. xi. 6). Eliab had another son named NEMUEL, and the record of Num. xvi. is interrupted expressly to admit a statement regarding his sons.

3. One of David's brothers, the eldest of the family (1 Chr. ii. 13; 1 Sam. xvi. 6, xvii. 13, 28). His daughter Abihail married her second cousin Rehoboam, and bore him three children (2 Chr. xi. 18); although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the less strict sense of granddaughter or descendant. In 1 Chr. xxvii. 18, we find mention of "Elihu, of the brethren of David," as "ruler" (רֹאשׁ), or "prince" (נָשִׂא) of the tribe of Judah. According

to the ancient Hebrew tradition preserved by Jerome (*Quaest. Hebr. ad loc.*), Elihu was identical with Eliab. "Brethren" is however often used in the sense of kinsman, *c. q.* 1 Chr. xii. 2.

4. A Levite in the time of David, who was both a "porter" (שֹׁמֵר, *Shôser*, i. e., a doorkeeper) and a musician on the "psaltery" (1 Chr. xv. 18, 20, xvi. 5).

5. One of the warlike Gadite leaders who came over to David when he was in the wilderness taking refuge from Saul (1 Chr. xii. 9).

6. An ancestor of Samuel the Prophet; a Kohathite Levite, son of Nahath (1 Chr. vi. 27; heb. 12). In the other statements of the genealogy this name appears to be given as ELIHU (1 Sam. i. 1) and ELIEL (1 Chr. vi. 34; heb. 19).

7. Son of Nathanael, one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Jud. viii. 1).

**ELI'ADA** (עֲלִי'אָדָה; 'Eliadâ, and repeated, Βααλιμαδ; Chr. 'Eliadâ; Alex. Ελιεδα; *Eliada*, *Eliada*). 1. One of David's sons; according to the lists, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8). From the latter passage it appears that he was the son of a wife and not of a concubine. In another list of David's family we find the name Eliad changed to Beeliada, Bael being substituted for El, the false god for the true (1 Chr. xiv. 7). What significance there may be in this change it is impossible to say, at any rate the present is the only instance occurring, and even there Eliad is found in one Heb. MS., also in the LXX. and Syr. versions. [BEELIADA.] The name appears to be omitted by Josephus in his list of David's family (*Ant.* vii. 3, §3).

2. A mighty man of war (יָבוֹר, *Yavor*), a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2 Chr. xvii. 17).

**ELI'ADAH** (עֲלִי'אָדָה; Alex. 'Eliadâ; *Eliada*), apparently an Aramite of Zolnah; father of Rezon the captain of a marauding band which annoyed Solomon (1 K. xi. 23).

**ELI'ADAS** (Ελιαδὰς; *Eliadas*), 1 Esd. ix. 28. [ELIOENAI.]

**ELI'ADUN** (Ἠλι'αδουν; Vulg. omits), 1 Esd. v. 58. Possibly altered from HENADAD.

**ELI'AH** (עֲלִי'אָה; *Eliā*). 1. ('Eliā, Alex. Ἠλία) A Benjamite; one of the sons of Jeroham, and a chief man (שָׂרָא, literally "head") of the tribe (1 Chr. viii. 27).

2. (Ἠλίας) One of the Bene-Elam; an Israelite (i. e. a layman) in the times of Ezra, who had married a foreign wife (Ezr. x. 26).

This name is accurately Elijah, and the translators of the A. V. have so expressed it, not only in the name of the Prophet (most frequently spelt with a final u), but in another case (Ezr. x. 21). [ELIJAH.]

**ELI'AHBA** (עֲלִי'אָבָה, in Chr. Ελι'αβ; 'Eliabâ, 'Emaou, 'Eliab; *Eliaba*), a Shamlonite, i. e. probably from SHALBIM; one of the Thirty of David's guard (2 Sam. xxiii. 32; 1 Chr. xi. 33).

**ELIAKIM** (עֲלִיָּאִים, *whom God will establish*; 'Ελιακίμ and 'Ελιακέμ; *Eliakim*). 1. Son of Hilkiah; master of Hezekiah's household (עֲלִיָּאִים = "over the house," as Is. xxxvi. 3), 2 K. xviii. 18, 26, 37. He succeeded Shebna in this office, after he had been ejected from it (Grotius thinks by reason of his leprosy) as a punishment for his pride (Is. xxii. 15-20). Eliakim was a good man, as appears by the title emphatically applied to him by God, "my servant Eliakim" (Is. xxii. 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 K. xviii. 37, xix. 1-5), and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem, and to the house of Judah" (Is. xxii. 21). It was as a special mark of the Divine approbation of his character and conduct, of which however no further details have been preserved to us, that he was raised to the post of authority and dignity which he held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the LXX. and Jerome, understood it of the priestly office, as appears by the rendering of כֹּהֵן (Is. xxii. 15, A. V. "treasurer") by *πρασφορίων*, the "priest's chamber," by the former, and of עֲלִיָּאִים by "*proepositus templi*" by the latter. Hence Nicephorus, as well as the author of the Alexandrian Chronicle, includes in the list of high-priests, Somnas or Sobnas (i. e. Shebna), and Eliakim, identifying the latter with Shallum or Meshullam. His 12th high-priest is, *Somnas, ille impius et perditus, regnante Ezechia*, and his 13th, Eliakim Muselum. But it is certain from the description of the office in Is. xxii., and especially from the expression in ver. 22, "the key of the house of David will I lay upon his shoulder," that it was the King's house, and not the House of God, of which Eliakim was praefect, as Ahishar had been in the reign of Solomon, 1 K. iv. 6, and Azrikam in that of Ahaz, 2 Chr. xxviii. 7. And with this agrees both all that is said, and all that is not said, of Eliakim's functions. The office seems to have been the highest under the king, as was the case in Egypt, when Pharaoh said to Joseph, "Thou shalt be over my house (עֲלִיָּאִים) . . . only in the throne will I be greater than thou," Gen. xli. 40, comp. xxxix. 4. In 2 Chr. xxviii. 7, the officer is called "governor (נָזִיר) of the house." It is clear that the "Scribe" was inferior to him, for Shebna, when degraded from the praefecture of the house, acted as scribe under Eliakim,\* 2 K. xviii. 37. The whole description of it too by Isaiah implies a place of great eminence and power. This description is transferred in a mystical or spiritual sense to Christ the son of David in Rev. iii. 7; thus making Eliakim in some sense typical of Christ. This it is perhaps which gave rise to the interpretation of Eliakim's name mentioned by Origen, *ὁ Θεὸς μου ἀνίστηναι* or as Jerome has it, *Dei resurrectione*, or *Resurgens Deus*; and also favoured the mystical interpretation of the passage in Isaiah given by Jerome in his commentary, based upon the interpretation of כֹּהֵן (A. V. "treasurer") as "*habituans in tabernaculo*," as if it imported the removal of the Jewish

dispensation, and the setting up of the Gospel in its place. The true meaning of כֹּהֵן is very doubtful. "Friend," i. e. of the king, and "Steward of the provisions," are the two most probable significations. Eliakim's career was a most honourable and splendid one. Most commentators agree that Is. xxii. 25 does not apply to him, but to Shebna. Eliakim's name also occurs 2 K. xix. 2; Is. xxxvi. 3, 11, 22, xxxvii. 2. (See further Jerome *de nom. Hebr.* and *Comm. on Is.* xxii. 15 sq.; Rosenmüll. *ib.*; Bp. Lowth's *Notes on Is.*; Selden, *de success. in Pontif. Hebr.*; Winer, *sub voc.*)

2. The original name of Jehoikim king of Judah (2 K. xxiii. 34; 2 Chr. xxxvi. 4). [*JEHOIAKIM.*]

3. A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Neh. xii. 41).

4. Eldest son of Abiud, or Judah; brother of Joseph, and father of Azor, Matt. i. 13. [*GENEALOGY OF CHRIST.*]

5. Son of Melea, and father of Jonan, Luke iii. 30, 31. [*IBID.*] [A. C. H.]

**ELI'ALI** ('Ελιαλί, Alex. 'Ελιαλέλ; *Dielus*), 1 Esd. ix. 34. [*IBID.*]

**ELIAM** (עֲלִיָּאִם; 'Ελιάς, Vat. and Alex.; *Eliam*). 1. Father of Bathsheba, the wife of David (2 Sam. xi. 3). In the list of 1 Chr. iii. 5, the names of both father and daughter are altered; the former to AMMIEL and the latter to BATISHUA; and it may be noticed in passing, that both the latter names were also those of non-Israelite persons, while Uriah was a Hittite. (Comp. Gen. xxxviii. 12; 1 Chr. ii. 3; in both of which "the daughter of Shua" is שִׁשַׁי בַּת שֻׁא, Bath-shua; also 2 Sam. xvii. 27.) The transposition of the two parts of the name El-i-am in Amm-i-el, does not alter its Hebrew signification, which may be "God is my people."

2. Son of Ahithophel the Gilonite; one of David's "thirty" warriors (2 Sam. xxiii. 34). The name is omitted in the list of 1 Chr. xi., but is now probably dimly discernible as "Ahiyah the Pelonite" (ver. 36) (see Kennicott, *Dissertation*, 207). The ancient Jewish tradition preserved by Jerome (*Qu. Hebr.* on 2 Sam. xi. 3, and 1 Chr. iii. 5) is that the two Eliams are one and the same person. An argument has been founded on this to account for the hostility of Ahitophel to King David, as having dishonoured his house and caused the death of his son-in-law (Blunt, *Coincidences*, Pt. II. x.). But such arguments are frequently grounded on ignorance of the habits and modes of feeling of Orientals, who often see no shame in that which is the greatest disgrace to us.

**ELIAONIAS** ('Ελιαωνίας; *Moabitis*, including preceding name), 1 Esd. viii. 31. [*ELIOENAL.*]

**ELIAS** ('Ηλίας, in Maccabees, and Lachm. in N. T. 'Ηλίας; *Elias*, but in Cod. Amiat. *Heliús*), the form in which the name of ELIJAH is given in the A. V. of the Apocrypha and N. Test.: Ecclus. xlviii. 1, 4, 12; 1 Macc. ii. 58; Matt. xi. 14, xvi. 14, xvii. 3, 4, 10, 11, 12, xlvii. 47, 49; Mark vi. 15, viii. 28, ix. 4, 5, 11, 12, 13, xv. 35, 36, Luke i. 17, iv. 25, 26, ix. 8, 18, 30, 33, 54; John i. 21, 25; Rom. xi. 2; James v. 17. In Rom. xi. 2, the reference is not to the prophet.

\* Bp. Lowth thinks, but without sufficient reason, that this Shebna is a different person from the other.

but to the portion of Scripture designated by his name, the words being *ἐν Ἡλίᾳ*, "in Elias," not as in A. V. "of Elias." [BIBLE, 212 b.]

**ELIASAPH** (Ἐλισάφ; *Ἐλισάφ*; *Eliasaph*).

1. Son of Douel; head of the tribe of Dan at the time of the census in the Wilderness of Sinai (Num. i. 14, ii. 14, vii. 42, 47, x. 20).

2. Son of Lael; a Levite, and "chief of the house of the father of the Gershonite" at the same time (Num. iii. 24).

**ELIASHIB** (Ἐλισήβ; *Ἐλιασεβόν*, *Ἐλιαβί*, *Ἐλιασείβ*, *Ἐλιασοῦβ*, *κτλ.*; *Eliasub*, *Eliasib*), a common name at the later period of the O. T. history.

1. A priest in the time of King David, eleventh in the order of the "governors" (יְשִׁבְיָהּ) of the sanctuary (1 Chr. xxiv. 12).

2. A son of Elioenai; one of the latest descendants of the royal family of Judah (1 Chr. iii. 24).

3. High-priest at Jerusalem at the time of the rebuilding of the walls under Nehemiah (Neh. iii. 1, 20, 21). His genealogy is given in xii. 10, 22, 23. Eliashib was in some way allied (נֶאֱרָב = near) to Tobiah the Ammonite, for whom he had prepared a room in the Temple, a desecration which excited the wrath of Nehemiah (Neh. xiii. 4, 7). One of the grandsons of Eliashib had also married the daughter of Sanballat the Hironite (xiii. 28). There seems no reason to doubt that the same Eliashib is referred to in Ezra x. 6.

4. A singer in the time of Ezra who had married a foreign wife (Ezr. x. 24). [ELEAZURUS.]

5. A son of Zattu (Ezr. x. 27), [ELISIMUS] and

6. A son of Bani (x. 36), [ELIASIB] both of whom had transgressed in the same manner.

**ELIASIS** (Ἐλίαςις, *Ἐλιδεῖς*; *Eliasis*), 1 Esd. ix. 34. This name answers to MATTHEAI in Ezr. x. 33; but is probably merely a repetition of Enasibos, just preceding it.

**ELIATHAI** (Ἐλιᾶθαι and Ἐλιᾶθ; *Ἐλιᾶθ*; *Eliatha*), one of the sons of Heman, a musician in the Temple in the time of King David (1 Chr. xxv. 4), who with twelve of his sons and brethren had the twentieth division of the temple-service (xxv. 27). In Jerome's *Quaest. Hebr.* on ver. 27, the name is given as Eliaba and explained accordingly; but not so in the Vulgate.

**ELIADAD** (Ἐλιάδ; *Ἐλιδάδ*; *Eliadad*), son of Chislon; the man chosen to represent the tribe of Benjamin in the division of the land of Canaan (Num. xxxiv. 21).

**ELIEL** (Ἐλιέλ; *Ἐλήλ*; *Eliel*). 1. One of the heads of the tribe of Manasseh—of that portion of the tribe which was on the east of Jordan (1 Chr. v. 24).

2. Son of Toah; a forefather of Samuel the Prophet (1 Chr. vi. 34, heb. 19). Probably identical with ELIHU, 2, and ELIAB, 6.

3. (Ἐλισάφ), one of the Bene-Shimhi; a chief man in the tribe of Benjamin (1 Chr. viii. 20).

4. (Ἐλήλ), like the preceding, a Benjamite, but belonging to the Bene-Shashak (1 Chr. viii. 22).

5. (Alex. *Ἰελήλ*), "the Mahavite;" one of the

heroes of David's guard in the extended list of 1 Chr. (xi. 46).

6. (Δαλήλ, Alex. *Ἀλήλ*), another of the same guard, but without any express designation (xi. 47).

7. (Ἐλιδβ), one of the Gadite heroes who came across Jordan to David when he was in the wilderness of Judah hiding from Saul (1 Chr. xii. 11).

8. A Kohathite Levite, "chief" (יְשִׁבְיָהּ) of the Bene-Chebron at the time of the transportation of the Ark from the House of Obed-edom to Jerusalem (2 Chr. xv. 9, 11).

9. A Levite in the time of Hezekiah; one of the "overscers" (מְסִיבִים) of the offerings made in the Temple (2 Chr. xxxi. 13).

**ELIENAI** (Ἐλιέναι; *Ἐλιενάι*; *Elioenai*), one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

**ELIEZER** (Ἐλιέζερ; *Ἐλιέζερ*; *my God* (is my) *help*). 1. Abraham's chief servant, called by him, as the passage is usually translated, "Eliezer of Damascus," or "that Damascus, Eliezer" (Gen. xv. 2). There is a contradiction in the A. V., for it does not appear how, if he was "of Damascus," he could be "born in Abraham's house" (ver. 3). But the phrase יְהִי בֵּיתִי, "son of my house," only imports that he was one of Abraham's household, not that he was born in his house. In the preceding verse יְהִי בֵּיתִי כְּנֶזֶק בֵּן, &c., should probably be rendered "the son of possession," i. e. possessor "of my house, shall be . . . Eliezer." It was, most likely, this same Eliezer who is described in Gen. xxiv. 2, as the *eldest servant of Abraham's house, that ruled over all that he had*, and whom his master sent to Padan-Aram to take a wife for Isaac from among his own kindred. With what eminent zeal and faithfulness he executed his commission, and how entirely he found the truth of what his own name expressed, in the Providential aid he met with on his errand, is most beautifully told in Gen. xxiv. It should however be said that the passage (Gen. xv. 2), in which the connexion of Eliezer with Damascus seems to be asserted, is one of extreme obscurity and difficulty. The sense above ascribed to *דַּמָּשְׁקִי* (after Simonis and Gesenius) rests only upon conjecture, the use of "*Damascus*" for "*Damascene*," is very unusual, and the whole arrangement of the sentence very harsh. There is probably something at the bottom of it all, besides the alliteration between *Meshek* and *Dammeshek*, which we are ignorant of, and which is wanting to clear up the sense. The two passages, "*Judeais origo Damascena, Syriae nobilissima civitas* . . . *Nomen urbi a Damasco rege inditum* . . . *Post Damascum Azeus, mox Adores et Abraham et Israel reges fuerunt*" (Justin. lib. xxxvi. cap. 2); and "*Ἀβραμὴς βασιλεὺς Δαμασκού* . . . *τοῦ δὲ Ἀβράμου ἔτι καὶ νῦν ἐν τῇ Δαμασκήνῃ τὸ νόμα δοξάζεται* καὶ κόμῃ ἀπ' αὐτοῦ δέκνυνται Ἀβράμου οἰκησις λεγόμενη (Joseph. Ant. i. 7, §2, quoting Nicol. Damascen.) have probably some relation to the narrative in Gen. xv. (See Gesen. *Thes. s. v. דַּמָּשְׁקִי*; Rosenmüll. on Gen. xv.; Knobel, *Gensis*.)

2. Second son of Moses and Zipporah, to whom his father gave this name, "because, said he, the God of my father was my help, that delivered me from the sword of Pharaoh" (Ex. xviii. 4; 1 Chr.

xiii. 15, 17). He remained with his mother and brother Gershom, in the care of Jethro his grandfather, when Moses returned to Egypt (Ex. iv. 18), she having been sent back to her father by Moses (Ex. xviii. 2), though she set off to accompany him, and went part of the way with him. Jethro brought back Zipporah and her two sons to Moses in the wilderness, after he heard of the departure of the Israelites from Egypt (xviii.). Eliezer had one son, Rehabiah, from whom sprang a numerous posterity (1 Chr. xxiii. 17, xxvi. 25, 26). Shelomith in the reigns of Saul and David (ver. 28), who had the care of all the treasures of things dedicated to God, was descended from Eliezer in the 6th generation, if the genealogy in 1 Chr. xxvi. 25 is complete.

3. One of the sons of Becher, the son of Benjamin (1 Chr. vii. 8).

4. A priest in the reign of David, one of those appointed to sound with trumpets before the Ark on its passage from the house of Obed-edom to the city of David (1 Chr. xv. 24).

5. Son of Zichri, "ruler" (רִנְיָהּ) of the Reubenites in the reign of David (1 Chr. xxvii. 16).

6. Son of Dodavah, of Mareshah in Judah (2 Chr. xi. 37), a prophet, who rebuked Jehoshaphat for joining himself with Ahaziah king of Israel, "who did very wickedly," in making a combined expedition of ships of Tarshish to go to Ophir for gold; and foretold the destruction of his fleet at Ezion-geber, which accordingly came to pass. When Ahaziah proposed a second expedition, Jehoshaphat refused (2 Chr. xx. 35-37; 1 K. xii. 48, 49). The combination of the names Eliezer and Dodavah, almost suggests that he may have been descended from David's mighty man Eleazar the son of Dodo (2 Sam. xiii. 9).

7. A chief Israelite—a "man of understanding"—whom Ezra sent with others from Ahava to Casiphia, to induce some Levites and Nethinim to accompany him to Jerusalem (Ezr. viii. 16). In 1 Esdr. viii. 43, the name is given as ELEAZAR.

8, 9, 10. A Priest, a Levite, and an Israelite of the sons of Harim, who, in the time of Ezra, had married foreign wives (Ezr. x. 18, 23, 31). The former is called ELEAZAR, the second ELEAZURUS, and the third ELIONAS, in 1 Esdr. ix. 19, 23, 32.

11. Son of Jorim, 13th in descent from Nathan the son of David, in the genealogy of Christ (Luke ii. 29). [A. C. H.]

ELIHOENAI (אֱלִיחֹנַי); 'Ελιχονά, Alex. 'Ελιανάδ; *Elioenai*), son of Zerabiah, one of the Bene-Pahath-moab, who with 200 men returned from the Captivity with Ezra (Ezr. vii. 4). In the apocryphal Esdras the name is ELIAONIAS.

ELIHO'REPH (אֱלִיחֹרֶפֶת); 'Ελιχόρ, Alex. 'Εναρέφ; *Eliho'reph*), son of Shisha. He and his brother Ahiah were scribes (סֹפְרִים) to Solomon at the commencement of his reign (1 K. iv. 3).

ELIHU (אֱלִיחֻ); 'Ελιούς; *Eliu*). 1. One of the interlocutors in the book of Job. He is described as the "son of Barachel the Buzite," and thus apparently referred to the family of Buz, the son of Nahor, and nephew of Abraham (Gen.

xxii. 21). This opposition suits well with the description of the other personages [ELIPHAZ; BILDAF], and the probable date to be assigned to the scenes recorded. In his speech (cc. xxxii.-xxxvii.) he describes himself as younger than the three friends, and accordingly his presence is not noticed in the first chapters. He expresses his desire to moderate between the disputants; and his words alone touch upon, although they do not thoroughly handle, that idea of the disciplinary nature of suffering, which is the key to Job's perplexity and doubt; but, as in the whole book, the greater stress is laid on God's unsearchable wisdom, and the implicit faith which He demands. [JOB, BOOK OF.] [A. B.]

2. ('Ηλιού). Son of Tohu; a forefather of Samuel the Prophet (1 Sam. i. 1). In the statements of the genealogy of Samuel in 1 Chr. vi. the name ELIEL occurs in the same position—son of Tohu and father of Jeroham (vi. 34—Heb. 19); and also ELIAS (vi. 27—Heb. 12), father of Jeroham and grandson of Zophai. The general opinion is that Elihu is the original name, and the two latter forms but copyists' variations thereof.

3. (Vat. and Alex. 'Ελιδς). A similar variation of the name of Elinab, the eldest son of Jesse, is probably found in 1 Chr. xxvii. 18, where Elihu "of the brethren of David" is mentioned as the chief of the tribe of Judah. But see 1 Chr. xii. 2, where, in a similar connexion, the word "brethren" is used in its widest sense. The LXX. retains Elinab. [ELIAN, 3.] In this place the name is without the final Aleph—אֱלִיחֻ.

4. ('Ελιμύδ; Alex. Ελιμύδ). One of the "captains" (שָׂרֵי, i. e. heads) of the "thousands of Manasseh" (1 Chr. xii. 20) who followed David to Ziklag after he had left the Philistine army on the eve of the battle of Gilboa, and who assisted him against the marauding band (רָבָד) of the Amalekites (comp. 1 Sam. xxx.).

5. (אֱלִיחֻ); 'Ελιού). A Korhite Levite in the time of David; one of the doorkeepers (A. V. "porters") of the house of Jehovah. He was a son of Shemaiuh, and of the family of Obed-edom (1 Chr. xxvi. 7). Terms are applied to all these doorkeepers which appear to indicate that they were not only "strong men," as in A. V., but also fighting men. (See vers. 6, 7, 8, 12, in which occur the words מִלְחָמָה = army, and מַגְרָרִים = warriors or heroes.) [G.]

ELIJAH, 1. (generally אֱלִיָּהּ, *Eliyah*, but sometimes אֱלִיָּהּ, *Eliyah*; 'Ηλιού; Aquila, Ηαλαῖ N. T. 'Ηλίας; *Elias*). ELIJAH THE TISHBITE has been well entitled "the grandest and the most romantic character that Israel ever produced." Certainly there is no personage in the O. T. whose career is more vividly portrayed, or who exercises on us a more remarkable fascination. His rare, sudden, and brief appearances—his undaunted courage and fiery zeal—the brilliancy of his triumphs—the pathos of his despondency—the glory of his departure, and the calm beauty of his reappearance on the Mount of Transfiguration—throw such a halo of brightness around him as is equalled by none of his compeers in the sacred story. The ignorance in which we

\* The connexion of Dedan and Tema with Bux in Jer. xxv. 23, is also to be noticed.

<sup>b</sup> By Chrysostom and others the name is Grecised into 'Ηλιος, as if signifying the brightness of the sun.

\* Stanley, S. & E. 328. In the *Acta Sanctorum* he is called *Prodigious Teshbite*.

<sup>d</sup> "Omnium suae aetatis Prophetarum facile princeps; et, ut a Mose discesseris, nulli secundus" (Friedmuth, in *Ortu Sacro*, quoting from Abarenabel).

are left of the circumstances and antecedents of the man who did and who suffered so much, doubtless contributes to enhance our interest in the story and the character. "Elijah the Tishbite of the inhabitants of Gilead," is literally all that is given us to know of his parentage and locality.\* It is in remarkable contrast to the detail with which the genealogies of other prophets and leaders of Israel are stated. Where the place—if it was a place—lay, which gave him this appellation we know not, nor are we likely to know. It is not again found in the Bible, nor has any name answering to it been discovered since.† [TISHBITE.]

The mention of Gilead, however, is the key-note to much that is most characteristic in the story of the Prophet. Gilead was the country on the further side of the Jordan—a country of chase and pasture, of tent-villages, and mountain-castles, inhabited by a people not settled and civilised like those who formed the communities of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomad tribes of the desert, and gradually conforming more and more to the habits of those tribes; making war with the Hagarites, and taking the countless thousands of their cattle and then dwelling in their stall (1 Chr. v. 10, 19-22). To an Israelite of the tribes west of Jordan the title "Gileadite" must have conveyed a similar impression, though in a far stronger degree, to that which the title "Celt" does to us. What the Highlands were a century ago to the towns in the Lowlands of Scotland, that, and more than that, must Gilead have been to Samaria or Jerusalem.‡ One of the most famous heroes in the early annals of Israel was "Jephthah

the Gileadite," in whom all these characteristics were prominent; and Professor Stanley has well remarked how impossible it is rightly to estimate his character without recollecting this fact (*S. & P.* 327).

With Elijah, of whom so much is told, and whose part in the history was so much more important, this is still more necessary. It is seen at every turn. Of his appearance as he "stood before" Ahab—with the suddenness of motion to this day characteristic of the Bedouins from his native hills, we can perhaps realise something from the touches, few, but strong, of the narrative. Of his height little is to be inferred—that little is in favour of its being beyond the ordinary size.<sup>1</sup> His chief characteristic was his hair, long and thick, and hanging down his back,<sup>2</sup> and which, if not betokening the immense strength of Samson, yet accompanied powers of endurance,<sup>3</sup> no less remarkable. His ordinary clothing consisted of a girdle of skin<sup>4</sup> round his loins, which he tightened when about to move quickly (1 K. xviii. 46). But in addition to this he occasionally wore the "mantle," or cape,<sup>5</sup> of sheep-skin, which has supplied us with one of our most familiar figures of speech.<sup>6</sup> In this mantle, in moments of emotion, he would hide his face (1 K. xix. 13), or when excited would roll it up as into a kind of staff.<sup>7</sup> On one occasion we find him bending himself down upon the ground with his face between his knees.<sup>8</sup> Such, so far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great Prophet, an appearance which there is no reason to think was other than uncommon even at that time.<sup>9</sup> "Vir qui curationem et cultum corporis despiceret ;

\* The Hebrew text is 'אליהו התשיבתי מתישבי נ'. The third word may be pointed (1) as in the present Masoretic text, to mean "from the inhabitants of Gilead," or (2) "from Tishbi of Gilead;" which, with a slight change in form, is what the LXX. has. The latter is followed by Ewald (iii. 486, note). Lightfoot assumes, but without giving his authority, that Elijah was from Jabesh Gilead. By Josephus he is said to have come from Thesbon—*ἐκ πόλεως Θεσβώνης τῆς Παλαιστίνης χώρας* (viii. 13, §2). Perhaps this may have been read as Heshbon, a city of the priests, and have given rise to the statement of Epiphanius, that he was "of the tribe of Aaron," and grandson of Zadok. See also the *Chron. Pseph.* in Fabricius, *Cod. Pseudep.* v. 2: 1070, &c.; and Quaresmius, *Eucid.* ii. 605. According to Jewish tradition—grounded on a certain similarity between the fiery zeal of the two—Elijah was identical with Phinehas the son of Eleazar the priest. He was also the angel of Jehovah who appeared in fire to Gideon (Lightfoot on John i. 21; Eisenmenger, i. 686). Arab tradition places his birthplace at *Gilhad Gihoud*, a few miles N. of es-Salt (Irb, 98), and his tomb near Damascus (Mislín, i. 490).

† The common assumption—perhaps originating with Miller (*Onom.* 947) or Reland (*Pal.* 1035)—is that he was born in the town Tishbe mentioned in Tob. i. 2. But not to insist on the fact that this Tishbe was not in Gilead but in Naphtali, it is nearly certain that the name has no real existence in that passage, but arises from a mistaken translation of the same Hebrew word which is rendered "inhabitants" in 1 K. xvii. 1. [TISHBITE.]

‡ See a good passage illustrative of this in *Rob Roy*, chap. xix.

1 From a comparison of 2 K. iv. 34, with 1 K. xvii. 21, it would seem as if Elisha approached nearer than Elijah to the stature of the child. But the inference is not to be relied on. Chrysostom applied the same epithet to him as to St. Paul, *ἐπίσημον ἀνθρώπων*.

2 2 K. i. 8, "a hairy man;" literally, "a lord of hair." This might be doubtful, even with the support of the LXX. and Josephus—*ἀνθρώπων δαριών*—and of the Targum Jonathan—*בְּרִי שֵׁער*—the same word used for Esau in Gen. xxvii. 11. But its application to the hair of his head is corroborated by the word used by the children of Bethel when mocking Elisha. "Bald-head" is a peculiar term (*קָרְחָה*) applied only to want of hair at the back of the head; and the taunt was called forth by the difference between the bare shoulders of the new prophet and the shaggy locks of the old one. [Elisha.]

3 Running before Ahab's chariot; the hardships of the Cherith; the forty days' fast.

4 עֵרָ (2 K. i. 8), rendered "loather" in this one place only. See Gen. iii. 21, &c.

5 *Addereith*, אֲדֵרֶת; LXX. *μυλωνίς*; always used for this garment of Elijah, but not for that of any prophet before him. It is perhaps a trace of the permanent impression which he left on some parts of the Jewish society, that a hairy cloak became afterwards the recognized garb of a prophet of Jehovah (Zech. xiii. 4; A. V. "rough garment;" where the Hebrew word is the same which—Elijah's history is rendered "mantle").

6 Various relics of the mantle are said to exist. The list of claimants will be found in the *Acta Sanctorum* (July 20). One piece is shown at Oviedo in Spain.

7 עֵרָ (2 K. i. 8); "wrapped" is a different word.

8 This is generally taken as having been in prayer; but kneeling apparently was not (certainly is not) an attitude of prayer in the East. "When ye stand praying, forgive" (Mark xi. 15; and see Matt. vi. 5, &c.).

9 This is to be inferred, as we shall see afterwards, from king Ahaziah's recognition of him by mere description.

facie squalente, quae multitudine suorum crinium obumbraretur . . . pelle caprina tantum de corpore tegentem quantum abscondi decorum erat, reliqua corporis ad aera perdurantem" (Gregory Nyss. quoted by Willemer de *Pallio Elias* in *Crit. Sacri*).

The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from Him, it was a violation of His command against material resemblances; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not one imported from the idolatries of any of the surrounding countries. [CALF.] They were announced by Jeroboam as the preservers of the nation during the great crisis of its existence: "Behold thy gods, O Israel, that brought thee up out of the land of Egypt" (1 K. xii. 28). But the case was quite different when Ahab, not content with the calf-worship—"as if it had been a light thing to walk in the sins of Jeroboam, the son of Nebat"—married the daughter of the king of Sidon, and introduced on the most extensive scale (Joseph. *Ant.* ix. 6, §6) the foreign religion of his wife's family, the worship of the Phœnician Baal. What this worship consisted of we are ignorant—doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosaic ritual. Attached to it and to the worship of Asherah (A. V. "Ashtaroth," and "the groves") were licentious and impure rites, which in earlier times had brought the heaviest judgments on the nation (Num. xxv.; Judg. ii. 13, 14, iii. 7, 8). But the most obnoxious and evil characteristic of the Baal-religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness—a foreign religion, imported from nations, the hatred of whom was inculcated in every page of the law, as opposed to the religion of that God who had delivered the nation from the bondage of Egypt, had "driven out the heathen with His hand, and planted them in;" and through whom their forefathers had "trodden down their enemies, and destroyed those that rose up against them." It is as a witness against these two evils that Elijah comes forward.

1. What we may call the first Act in his life embraces between three and four years—three years and six months for the duration of the drought, according to the statements of the New Testament

(Luke iv. 25; James v. 17), and three or four months more for the journey to Horeb, and the return to Gilead (1 K. xvii. 1—xix. 21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unrestrained freedom of eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elisha—a formula which includes everything at issue between himself and the king—the name of Jehovah—His being the God of Israel—the Living God—Elijah being His messenger, and then—the special lesson of the event—that the god of power and of nature should be beaten at his own weapons. "As Jehovah, God of Israel, liveth, before whom I stand," whose constant servant I am, "there shall not be dew nor rain these years, but according to my word." What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance either of the king, or more probably of the queen (comp. xix. 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (1 K. xviii. 4). He was directed to the brook Cherith, either one of the torrents which cleave the high table-lands of his native hills, or on the west of Jordan, more in the neighbourhood of Samaria. [CHERITH.] There in the hollow of the torrent-bed he remained, supported in the miraculous manner with which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the Cherith is uncertain. The Hebrew expression is simply "at the end of days," nor does Josephus afford us any more information. A vast deal of ingenuity has been devoted to explaining away Elijah's "ravens." The Hebrew word, עֲרֵבִים, *Orebim*, has been interpreted as "Arabians," as "merchants," as inhabitants of some neighbouring town of *Orbo* or *Orbi*.<sup>1</sup> By others Elijah has been held to have plundered a raven's nest—and this twice a-day regularly for several months! There is no escape from the plain meaning of the words—occurring as they do twice, in a passage otherwise displaying no tinge of the marvellous—or from the unanimity of all the Hebrew MSS., of all the ancient versions, and of Josephus.<sup>2</sup>

His next refuge was at Zarephath, a Phœnician town lying between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for.<sup>3</sup> The widow woman in whose house he lived<sup>4</sup> seems, however, to have been an Israelite, and no Baal-worshipper, if we may take her adjuration by "Jehovah thy God" as an indication.<sup>5</sup> Here Elijah performed the miracles of prolonging the oil and the meal; and restored the son of the widow to life after his apparent death.<sup>6</sup>

<sup>1</sup> Jerome, quoted by Kennicott, 581. See these hypotheses brought together in Keil *ad loc.*

<sup>2</sup> This subject is exhausted in a dissertation entitled *Elias corvorum convictor in the Critici Sacri*.

<sup>3</sup> Lightfoot quaintly remarks on this that Elijah was the first Apostle to the Gentiles.

<sup>4</sup> The traditional scene of his meeting with the widow was in a wood to the south of the town (Mislin, i. 532, who however does not give his authority). In the time of Jerome the spot was marked by a tower (Jerome, *Ep. Paulae*). At a later period a church dedicated to the Prophet was erected over the house of the widow, in which his chamber

and her kneading-trough were shown (Anton. Martyr, and Phocas, in Beland, 985). This church was called ὁ χορὸς (Acta Sanctorum).

<sup>5</sup> This must not be much relied on. Zedekiah, son of Chenaanah, one of Ahab's prophets, uses a similar form of words, "Thus saith Jehovah" (1 K. xxii. 11). The apparent inference however from Luke iv. 28 is that she was one of the widows of Israel. In the Jewish traditions her son was the Messiah (Eisenmenger, *Entd. Judenh.* ii. 725).

<sup>6</sup> This is warranted by the expression "his sickness was so sore that there was no breath left in him," a form of words not elsewhere found; while in the

Here the prophet is first addressed by the title, which, although occasionally before used to others, is so frequently applied to Elijah as to become the distinguishing appellation of himself and his successor:—"O thou man of God"—"Now I know that thou art a man of God" (1 K. xvii. 18, 24).

In this, or some other retreat, an interval of more than two years must have elapsed. The drought continued, and at last the full horrors of famine, caused by the failure of the crops, descended on Samaria. The king and his chief domestic officer divide between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of central Palestine, nor in the nooks and crannies of the most shaded torrent-beds, was there any of the herbage left, which in those countries is so certain an indication of the presence of moisture. No one short of the two chief persons of the realm could be trusted with this quest for life or death—"Ahab went one way by himself, and Obadiah went another way by himself." It is the moment for the reappearance of the prophet. He shows himself first to the minister. There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. "There is no nation or kingdom," says Obadiah with true Eastern hyperbole, "whither my lord hath not sent to seek thee;" and now here he stands when least expected. Before the sudden apparition of that wild figure, and that stern, unbroken countenance, Obadiah could not but fall on his face.<sup>a</sup> Elijah, however, soon calms his agitation—"As Jehovah of hosts liveth, before whom I stand, I will surely show myself to Ahab;" and thus relieved of his fear that, as on a former occasion, Elijah would disappear before he could return with the king, Obadiah departs to inform Ahab that the man they seek is there. Ahab arrived, Elijah makes his charge—"Thou hast forsaken Jehovah and followed the Baals." He then commands that all Israel be collected to Mount Carmel with the four hundred and fifty prophets of Baal, and the four hundred of Asherah (Ashtaroath), the latter being under the especial protection of the queen. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Ebal or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Jehovah (xviii. 30)—in ruins, and therefore of earlier erection—we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the ridge of Carmel, which formed the site of the meeting, there cannot be much doubt. It is elsewhere examined. [CARMEL.]

There are few more sublime stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant; with his wild shaggy hair, his scanty garb, and sheep-skin cloak, but with calm dignity of demeanour

and the minutest regularity of procedure, repairing the ruined altar of Jehovah with twelve stones, according to the number of the twelve founders of the tribes, and recalling in his prayer the still greater names of Abraham, Isaac, and Israel—on the other hand the 850 prophets of Baal and Ashtaroath, doubtless in all the splendour of their vestments (2 K. x. 22), with the wild din of their "vain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all—these things form a picture with which we are all acquainted, but which brightens into fresh distinctness every time we consider it. The conclusion of the long day need only be glanced at.<sup>b</sup> The fire of Jehovah consuming both sacrifice and altar—the prophets of Baal killed, it would seem by Elijah's own hand (xviii. 40)—the king, with an apathy almost unintelligible, eating and drinking in the very midst of the carnage of his own adherents—the rising storm—the ride across the plain to Jezreel, a distance of at least 16 miles; the prophet, with true Arab endurance, running before the chariot, but also with true Arab instinct stopping short of the city, and going no further than the "entrance of Jezreel."

So far the triumph had been complete; but the spirit of Jezebel was not to be so easily overcome, and her first act is a vow of vengeance against the author of this destruction. "God do so to me, and more also," so ran her exclamation, "if I make not thy life as the life of one of them by to-morrow about this time." It was no duty of Elijah to expose himself to unnecessary dangers, and, as at his first introduction, so now, he takes refuge in flight. The danger was great, and the refuge must be distant. The first stage on the journey was Beersheba—"Beersheba which belongeth to Judah," says the narrative, with a touch betraying its Israelitish origin. Here, at the ancient haunt of those fathers of his nation whose memory was so dear to him, and on the very confines of cultivated country, Elijah halted. His servant—according to Jewish tradition the boy of Zarephath—he left in the town; while he himself set out alone into the wilderness—the waste uninhabited region which surrounds the south of Palestine. The labours, anxieties, and excitement of the last few days had proved too much even for that iron frame and that stern resolution. His spirit is quite broken, and he wanders forth over the dreary sweeps of those rocky hills wishing for death—"It is enough! Lord, let me die, for I am not better than my fathers."<sup>c</sup> It is almost impossible not to conclude from the terms of the story that he was entirely without provisions for this or any journey. But God, who had brought His servant into this difficulty, provided him with the means of escaping from it. Whether we are to take the expression of the story literally or not is comparatively of little consequence. In some way little short of miraculous—it might well seem to the narrator that it

story of the Shunammite's son it is distinctly said the child "died." Josephus's language (viii. 13, §3) shows that he did not understand the child to have died. The Jewish tradition, quoted by Jerome, was that this boy was the servant who afterwards accompanied Elijah, and finally became the prophet Jonah. (Jerome, *Pref. to Jonah*; and see the citations from the Talmuds in Eisenmenger, *Ents. Jud.* ii. 735.)

<sup>a</sup> The expressions of Obadiah, "lord" and "slave," show his fear of Elijah; they are those ordinarily used in addressing a potentate.

<sup>b</sup> The more so as the whole of this scene is admirably drawn out by Stanley (& P. 355, 6).

<sup>c</sup> Although to some it may seem out of place in a work of this nature, yet the writer cannot resist referring to the Oratorio of *Elijah* by Mendelssohn, one of the most forcible commentaries existing on the history of the Prophet. The scene in which the occurrences at Beersheba are embodied is perhaps the most dramatic and affecting in the whole work.

could be by nothing but an angel—the prophet was awakened from his dream of despondency beneath the solitary bush<sup>a</sup> of the wilderness, was fed with the bread and the water which to this day are all a Bedouin's requirements,<sup>b</sup> and went forward, “in the strength of that food,” a journey of forty days “to the mount of God, even to Horeb.” Here, in “the cave,”<sup>c</sup> one of the numerous caverns in those awful mountains, perhaps some traditional sanctuary of that hallowed region at any rate well known—he remained for certainly one night. In the morning came the “word of Jehovah”—the question, “what doest thou here, Elijah?” driven by what hard necessity dost thou seek this spot on which the glory of Jehovah has in former times been so signally shown?<sup>d</sup> In answer to this invitation the Prophet opens his griefs. He has been very zealous for Jehovah; but force has been vain; one cannot stand against a multitude; none follow him, and he is left alone, lying for his life from the sword which has slain his brethren. The reply comes in that ambiguous and indirect form in which it seems necessary that the deepest communications with the human mind should be couched, to be effectual. He is directed to leave the cavern and stand on the mountain in the open air (עַל הַר בְּרֹאֵיפּוֹר, Josephus), face to face (פָּנֵי) with Jehovah. Then, as before with Moses (Ex. xxxiv. 6), “The Lord passed by;” passed in all the terror of His most appalling manifestations. The fierce wind tore the solid mountains and shivered the granite cliffs of Sinai; the earthquake crash reverberated through the defiles of those naked valleys; the fire burnt in the incessant blaze of Eastern lightning. Like these, in their degree, had been Elijah's own moles of procedure, but the conviction is now forced upon him that in none of these is Jehovah to be known. Then, penetrating the dead silence which followed these manifestations, came the fourth mysterious symbol—the “still small voice.” What sound this was—whether articulate voice or not, we cannot even conjecture; but low and still as it was it spoke in louder accents to the wounded heart of Elijah than the roar and blaze which had preceded it. To him no less unmistakably than to Moses, centuries before, it was proclaimed that Jehovah was “merciful and gracious, long-suffering and abundant in goodness

<sup>a</sup> מַלְאָכִים is both a “messenger” and an “angel.” LXX. ver. 5, 76; and so Josephus (viii. 13, 7).

<sup>b</sup> “One Rotem tree,” Hebrew, רֹתֵם. The indented rock opposite the gate of the Greek convent, *Deir Mar Elyan*, between Jerusalem and Bethlehem, which is now shown to travellers as the spot on which the prophet rested on this occasion (Bonar; Porter, *Handbook*, &c.), appears at an earlier date not to have been so restricted, but was believed to be the place on which he was “accustomed to sleep” (Sandys, *ib.* iii. p. 176; Maundrell, *Ear. Trav.*, 456), and the site of the convent as that where he was born (Gaysford, 1506, in Bonar, 117). Neither the older nor the later story can be believed; but it is possible that they may have originated in some more trustworthy tradition of his having rested here on his southward journey, in all probability taken along this very route. See a curious statement by Quaresmius of the extent to which the rock had been defaced in his own time “by the plety & impiety” of the Christian pilgrims. (*Excursio*, ii. 608; comp. Doubdan, *Voyage*, &c., 144.)

<sup>c</sup> The LXX. adds to the description the only touch wanting in the Hebrew text—a cake of meal—*ἀλυσίτης*.

and truth.” Elijah knew the call, and at once stepping forward and hiding his face in his mantle, stood waiting for the Divine communication. It is in the same words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! “Before his entrance to the cave, he was comparatively a novice; when he left it, he was an initiated man. He had thought that the earthquake, the fire, the wind, must be the great witnesses of the Lord. But he was not in them; not they, but the still small voice had that awe in it which forced the Prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning!” (Maurice, *Prophets and Kings*, 136). Not in the persecutions of Ahab and Jezebel, nor in the slaughter of the Prophets of Baal, but in the 7000 unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone as he had seemed to be.

Three commands were laid on him—three changes were to be made. Instead of Ben-hadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimshi was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. Of these three commands the two first were reserved for Elisha to accomplish, the last only was executed by Elijah himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and companionship which had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably somewhere about the centre of the Jordan valley. [ABEL-MEHOIAH.] Elisha was ploughing at the time,<sup>a</sup> and Elijah “passed over to him”—possibly crossed the river—and cast his mantle, the well-known sheepskin cloak, upon him, as if, by that familiar<sup>b</sup> action, claiming him for his son. A moment of hesitation—but the call was quickly accepted, and then commenced that long period of service and intercourse which continued till Elijah's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence—“Elisha the son of Shaphat, who poured water of the hands of Elijah.”

2. Ahab and Jezebel now probably believed that

<sup>a</sup> The Hebrew word has the article, הַמְּלֵאכִים; and so too the LXX., τὸν σκελετόν. The cave is now shown “in the secluded plain below the highest point of Jebel Musā,” “a hole just large enough for a man's body,” beside the altar in the chapel of Elijah (Stanley, 49; Rob. i. 108).

<sup>b</sup> Hebrew, בֶּן. A. V. “lodge;” but in Gen. xix. 2, accurately, “tarry all night.”

<sup>c</sup> The words of the text are somewhat obscured in the A. V. They bear testimony at once to the solid position of Elisha, and to the extent of the arable soil of the spot. According to the Masoretic punctuation the passage is: “And he departed thence, and found Elisha the son of Shaphat, who was ploughing. Twelve yoke were before him (i. e. either 12 ploughs were before him with his servants, or 12 yoke of land were already ploughed), and he was with the last.”

<sup>d</sup> The word is that always employed for crossing the Jordan.

<sup>e</sup> See also Ruth iii. 4-14. Ewald, *Alttestamentar*, 191, note. A trace of a similar custom survives in the German word *Mantel-kind*.

their threats had been effectual, and that they had seen the last of their tormentor. At any rate this may be inferred from the events of chap. xxi. Foiled in his wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jezebel proceed to possess themselves of it by main force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jezreel had forgotten the laws of Jehovah, how perfect was their submission to the will of their mistress. At her orders Naboth is falsely accused of blaspheming God and the king, is with his sons<sup>m</sup> stoned and killed, and his vineyard then—as having belonged to a criminal—becomes at once the property of the king. [NABOTH.]

Ahab loses no time in entering on his new acquisition. Apparently the very next day after the execution he proceeds in his chariot to take possession of the coveted vineyard. Behind him—probably in the back part of the chariot—ride his two pages Jehu and Bidkar (2 K. ix. 26). But the triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and rapidly as the accusation and death of Naboth had been hurried over, he was there to meet his ancient enemy, and as an enemy he does meet him—as David went out to meet<sup>n</sup> Goliath—on the very scene of his crime; suddenly, when least expected and least wished for, he confronts the miserable king. And then follows the curse, in terms fearful to any Oriental—peculiarly terrible to a Jew—and most of all significant to a successor of the apostate princes of the northern kingdom—"I will take away thy posterity; I will cut off from thee even thy very dogs; I will make thy house like that of Jeroboam and Baasha; thy blood shall be shed in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be torn in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky"—the large vultures which in eastern climes are always wheeling aloft under the clear blue sky, and doubtless suggested the expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least 20 years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind their master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 K. ix. 26, 36, 7, and those given in 1 K. xxi. 19-25.

3. A space of three or four years now elapses (comp. 1 K. xxii. 1, xxii. 51; 2 K. i. 17), before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Naboth have been partly fulfilled. Ahab is dead, and his son and successor, Ahaziah, has met with a fatal accident, and is on his death-bed, after a short and troubled reign of less than two years (2 K. i. 1, 2; 1 K. xxii. 51). In his extremity he sends to an oracle or shrine of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is

conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the name of Jehovah—"Thus saith Jehovah, Is it because there is no God in Israel that ye go to enquire of Baalzebub, god of Ekron?" The messengers returned to the king too soon to have accomplished their mission. They were possibly strangers; at any rate they were ignorant of the name of the man who had thus interrupted their journey. But his appearance had fixed itself in their minds, and their description at once told Ahaziah, who must have seen the prophet about his father's court or have heard him described in the harem, who it was that had thus reversed the favourable oracle which he was hoping for from Ekron. The "hairy man"—the "lord of hair," so the Hebrew rendering<sup>o</sup> runs—with a belt of rough skin round his loins, who came and went in this secret manner, and uttered his fierce words in the name of the God of Israel, could be no other than the old enemy of his father and mother, Elijah the Tishbite. But ill as he was this check only roused the wrath of Ahaziah, and, with the spirit of his mother, he at once seized the opportunity of possessing himself of the person of the man who had been for so long the evil genius of his house. A captain was despatched, with a party of fifty, to take Elijah prisoner. He was sitting on the top of "the mount,"<sup>p</sup> i. e. probably of Carmel. The officer approached and addressed the prophet by the title which, as before noticed, is most frequently applied to him and Elijah—"O man of God, the king hath spoken: come down." "And Elijah answered and said, If I be a man of God, then let fire come down from heaven and consume thee and thy fifty! And there came down fire from heaven and consumed him and his fifty." A second party was sent, only to meet the same fate. The altered tone of the leader of a third party, and the assurance of God that His servant need not fear, brought Elijah down. But the king gained nothing. The message was delivered to his face in the same words as it had been to the messengers, and Elijah, so we must conclude, was allowed to go harmless. This was his last interview with the house of Ahab. It was also his last recorded appearance in person against the Baal-worshippers.

Following as it did on Elijah's previous course of action, this event must have been a severe blow to the enemies of Jehovah. But impressive as it doubtless was to the contemporaries of the prophet, the story possesses a far deeper significance for us than it could have had for them. While it is most characteristic of the terrors of the earlier dispensation under which men were then living, it is remarkable as having served to elicit from the mouth of a greater than even Elijah an exposition, so less characteristic, of the distinction between that severe rule and the gentler dispensation which He came to introduce. It was when our Lord and His disciples

<sup>m</sup> "The blood of Naboth and the blood of his sons" (2 K. ix. 26; comp. Josh. vii. 24). From another expression in this verse—yesternight (עֵרָא, A. V. "yesterday"), we may perhaps conclude that like a later trial on a similar charge, also supported by two false witnesses—the trial of our Lord—it was conducted

at night. The same word—yesternight—prompts the inference that Ahab's visit and encounter with Elijah happened on the very day following the murder.

<sup>n</sup> The Hebrew word is the same.

<sup>o</sup> See note to p. 537.

<sup>p</sup> עֵרָא (2 K. i. 9; A. V., inaccurately, "an hill."

were on their journey, through this very district, from Galilee to Jerusalem, and when smarting from the churlish inhospitality of some Samaritan villagers, that—led to it by the distant view of the heights of Carmel, or, perhaps, by some traditional name on the road—the impetuous zeal of the two “sons of thunder” burst forth—“Lord, wilt thou that we command fire to come down from heaven and consume them, even as Elijah did?” But they little knew the Master they addressed. “He turned and rebuked them, and said, Ye know not what manner of spirit ye are of. For the Son of Man is not come to destroy men’s lives but to save them” (Luke ix. 51-56). As if He had said, “Ye are mistaking and confounding the different standing points of the Old and New Covenants; taking your stand upon the Old—that of an avenging righteousness, when you should rejoice to take it upon the New—that of a forgiving love” (Trench, *Miracles*, ch. iv.).

4. It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. It is the only one of which any record remains, and its mention is the first and last time that the name of the prophet appears in the Books of Chronicles. Mainly devoted, as these books are, to the affairs of Judah, this is not surprising. The alliance between his enemy Ahab and Jehoshaphat cannot have been unknown to the prophet, and it must have made him regard the proceedings of the kings of Judah with more than ordinary interest. When, therefore, Jehoram the son of Jehoshaphat, who had married the daughter of Ahab, began “to walk in the ways of the kings of Israel, as did the house of Ahab, and to do that which was evil in the sight of Jehovah,” Elijah sent him a letter<sup>1</sup> denouncing his evil doings, and predicting his death (2 Chr. xxi. 12-15). This letter has been considered as a great difficulty, on the ground that Elijah’s removal must have taken place before the death of Jehoshaphat (from the terms of the mention of Elisha in 2 K. iii. 11), and therefore before the accession of Joram to the throne of Judah. But admitting that Elijah had been translated before the expedition of Jehoshaphat against Moab, it does not follow that Joram was not at that time, and before his father’s death, king of Judah, Jehoshaphat occupying himself during the last six or seven years of his life in going about the kingdom (2 Chr. xix. 4-11), and in conducting some important wars, amongst others that in question against Moab, while Joram was concerned with the more central affairs of the government (2 K. iii. 7, &c.). That Joram began to reign during the lifetime of his father Jehoshaphat is stated in 2 K. viii. 16. According to one record (2 K. i. 17),

“מכתב,” “a writing,” almost identical with the word used in Arabic at the present day. The ordinary Hebrew word for a letter is *Sepher*, סֵפֶר, a book.

<sup>1</sup> The second statement of Jehoram’s accession to Israel (in 2 K. iii. 1) seems inserted there to make the subsequent narrative more complete. Its position there, subsequent to the story of Elijah’s departure, has probably assisted the ordinary belief in the difficulty in question.

<sup>2</sup> The ancient Jewish commentators get over the apparent difficulty by saying that the letter was written and sent after Elijah’s translation. Others believed that it was the production of Elisha, for whose name that of Elijah had been substituted by copyists. The first of these requires no answer. To the second, the severity of its tone, as above noticed,

which immediately precedes the account of Elijah’s last acts on earth, Joram was actually on the throne of Judah at the time of Elijah’s interview with Ahaziah; and though this is modified by the statements of other places<sup>2</sup> (2 K. iii. 1, viii. 16), yet it is not invalidated, and the conclusion is almost inevitable, as stated above, that Joram ascended the throne some years before the death of his father. [See JOHAM, JEHOASHAPHAT, JODAH.] In its contents the letter bears a strong resemblance to the speeches of Elijah,<sup>3</sup> while in the details of style it is very peculiar, and quite different from the narrative in which it is imbedded (Bethau, *Chronik ad loc.*).

5. The closing transaction of Elijah’s life introduces us to a locality heretofore unconnected with him. Hitherto we have found him in the neighbourhood of Samaria, Jezreel, Carmel, only leaving these northern places on actual emergency, but we now find him on the frontier of the two kingdoms, at the holy city of Bethel, with the sons of the prophets at Jeicho, and in the valley of the Jordan (2 K. ii. 1, &c.).

It was at Gilgal—probably not the ancient place of Joshua and Samuel, but another of the same name still surviving on the western edge of the hills of Ephraim<sup>4</sup>—that the prophet received the divine intimation that his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returned upon him, perhaps he wished to spare his friend the pain of a too sudden parting; in either case he endeavours to persuade Elisha to remain behind while he goes on an errand of Jehovah. “Tarry here, I pray thee, for Jehovah hath sent me to Bethel.” But Elisha will not so easily give up his master,—“As Jehovah liveth and as thy soul liveth I will not leave thee.” They went together to Bethel.<sup>5</sup> The event which was about to happen had apparently been communicated to the sons of the prophets at Bethel, and they inquire if Elisha knew of his impending loss. His answer shows how fully he was aware of it. “Yea,” says he, with all the emphasis possible, “indeed I do” know it, hold ye your peace.” But though impending, it was not to happen that day. Again Elijah attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophets at Jericho make the same unnecessary inquiries, and again he replies as emphatically as before. Elijah makes a final effort to avoid what they both so much dread. “Tarry here, I pray thee, for Jehovah hath sent me to the Jordan.” But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand, to the distant

is a sufficient reply. Josephus (*Ant.* ix. 5, §2) says that the letter was sent while Elijah was still on earth. (See Lightfoot, *Chronicles*, &c. “Jehoram.” Other theories will be found in Fabricius, *Cod. Pseudepigr.* 1075, and Otho, *Lex. Rab.* 187.)

<sup>4</sup> The grounds for this inference are given under ELISHA (p. 538). See also GILGAL.

<sup>5</sup> The Hebrew word “went down” is a serious difficulty, if Gilgal is taken to be the site of Joshua’s camp and the resting-place of the ark, since that is more than 3000 feet below Bethel. But this is avoided by adopting the other Gilgal to the N.W. of Bethel, and on still higher ground, which also preserves the sequence of the journey to Jordan. (See Stanley, *S. & P.* 308, note.) Some considerations in favour of this adoption will be found under ELISHA.

וַיֵּדַע יְרֵמְיָהּ = “Also I know it;” *Kéryn* εἶπακα.

river.—Elijah in his mantle or cape of sheep-skin, Elisha in ordinary clothes (יָגַב, ver. 12). Fifty men of the sons of the prophets ascend the abrupt heights behind the town—the same to which a late tradition would attach the scene of our Lord's temptation—and which command the plain below, to watch with the clearness of Eastern vision what happens in the distance. Talking as they go, the two reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gileadite cannot rest till he again sets foot on his own side of the river. He rolls up<sup>1</sup> his mantle as into a staff, and with his old energy strikes the waters as Moses had done before him,—strikes them as if they were an enemy;<sup>2</sup> and they are divided hither and thither, and they two go over on dry ground. What follows is best told in the simple words of the narrative. "And it came to pass when they were" gone over, that Elijah said to Elisha, "Ask what I shall do for thee before I be taken away from thee." And Elisha said, "I pray thee let a double portion of thy spirit be upon me." And he said, "Thou hast asked a hard thing: if thou see me taken from thee, it shall be so unto thee, but if not, it shall not be so." And it came to pass as they still went on and talked, that, behold, a chariot of fire and horses of fire, and parted them both asunder, and Elijah went up by the whirlwind into the skies."<sup>3</sup> Well might Elisha cry with bitterness, "My father, my father." He was gone who, to the discerning eye and loving heart of his disciple, had been "the chariot of Israel and the horsemen thereof" for so many years; and Elisha was at last left alone to carry on a task to which he must often have looked forward, but to which in this moment of grief he may well have felt unequal. He saw him no more; but his mantle had fallen, and this he took up—at once a personal relic and a symbol of the double portion of the spirit of Elijah with which he was to be clothed. Little could he have realised, had it been then presented to him, that he whose greatest claim to notice was that he had "poured water on the hands of Elijah" should hereafter possess an influence which had been denied to his master—should,

instead of the terror of kings and people, be their benefactor, adviser, and friend, and that over his death-bed a king of Israel should be found to lament with the same words that had just burst from him on the departure of his stern and silent master, "My father, my father, the chariot of Israel and the horsemen thereof!"

And here ends all the direct information which is vouchsafed to us of the life and work of this great Prophet. Truly he "stood up as a fire, and his word burnt as a lamp" (Ecclus. xlviii. 1). How deep was the impression which he made on the mind of the nation may be judged of from the fixed belief which many centuries after prevailed that Elijah would again appear for the relief and restoration of his country. The prophecy of Malachi (iv. 6)<sup>4</sup> was possibly at once a cause and an illustration of the strength of this belief. What it had grown to at the time of our Lord's birth, and how continually the great Prophet was present to the expectations of the people, we do not need the evidence of the Talmud to assure us,<sup>5</sup> it is patent on every page of the Gospels. Each remarkable person, as he arrives on the scene, be his habits and characteristics what they may—the stern John equally with his gentle Successor—is proclaimed to be Elijah (Matt. xvi. 14; Mark vi. 15; John i. 9). His appearance in glory on the Mount of Transfiguration does not seem to have startled the disciples. They were "sore afraid," but not apparently surprised. On the contrary, St. Peter immediately proposes to erect a tent for the Prophet whose arrival they had been so long expecting. Even the cry of our Lord from the Cross, containing as it did but a slight resemblance to the name of Elijah, immediately suggested him to the bystanders. "He calleth for Elijah." "Let be, let us see if Elijah will come to save him."

How far this expectation was fulfilled in John, and the remarkable agreement in the characteristics of these two men, will be considered under JOHN THE BAPTIST.

But on the other hand, the deep impression which Elijah had thus made on his nation only renders more remarkable the departure which the image conveyed by the later references to him

<sup>1</sup> יָגַב. The above is quite the force of the word.

<sup>2</sup> The word is יָגַב, used of smiting in battle; generally with the sense of wounding (Gen. 48:3).

<sup>3</sup> LXX. "As they were going over," ἐν τῷ διαβαίῃ.

<sup>4</sup> The statements of the text hardly give support to the usual conception of Elijah's departure as represented by painters and in popular discourses. It was not in the chariot of fire that he went up into the skies. The fire served to part the master from the disciple, to show that the severance had arrived, but Elijah was taken up by the fierce wind of the tempest. The word סַעַר involves no idea of whirling, and is frequently rendered in the A. V. "storm" or "tempest." The term "the skies" has been employed above to translate the Hebrew שָׁמַיִם, because we attach an idea to the word "heaven" which does not appear to have been present to the mind of the ancient Hebrews.

<sup>5</sup> פָּנָא, the word used amongst others for the "great and bitter cry" when the first-born were killed in Egypt.

<sup>6</sup> The expression in Malachi is "Elijah the Prophet." From this unusual title some have believed that another Elijah was intended. The LXX., how-

ever, either following a different Hebrew text from that which we possess, or falling in with the belief of their times, insert the usual designation, "the Tishbite." (See Lightfoot, *Exerc.* on Luke i. 17).

<sup>7</sup> He is recorded as having often appeared to the wise and good Rabbis—at prayer in the wilderness, or on their journeys—generally in the form of an Arabian merchant (Eisenmenger, i. 11; ii. 402-7). At the circumcision of a child a seat was always placed for him, that as the zealous champion and messenger of the "covenant" of circumcision (1 K. xix. 14; Mal. iii. 1) he might watch over the due performance of the rite. During certain prayers the door of the house was set open that Elijah might enter and announce the Messiah (Eisenmenger, i. 685). His coming will be three days before that of the Messiah, and on each of the three he will proclaim, in a voice which shall be heard all over the earth, peace, happiness, salvation, respectively (Eisenmenger, 698). So firm was the conviction of his speedy arrival, that when goods were found and no owner appeared to claim them, the common saying was, "Put them by till Elijah comes" (Lightfoot, *Exercit.* Matt. xvii. 10; John i. 21). The same customs and expressions are even still in use among the stricter Jews of this and other countries. (See *Revue des deux Mondes*, xxiv. 131, &c.)

evinces, from that so sharply presented in the records of his actual life. With the exception of the eulogiums contained in the catalogues of worthies in the book of Jesus the son of Sirach (xlvi.) and 1 Macc. ii. 58, and the passing allusion in Luke ix. 54, none of these later references allude to his works of destruction or of portent. They all set forth a very different side of his character to that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (James v. 17); of his kindness to the widow of Sarepta (Luke iv. 25); of his "restoring all things" (Matt. xvii. 11); "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv. 5, 6; Luke i. 17). The moral lessons to be derived from these facts must be expanded elsewhere than here; it will be sufficient in this place to call attention to the great differences which may exist between the popular and contemporary view of an eminent character, and the real settled judgment formed in the progress of time, when the excitement of his more brilliant but more evanescent deeds has passed away. Precious indeed are the scattered hints and faint touches which enable us thus to soften the harsh outlines or the discordant colouring of the earlier picture. In the present instance they are peculiarly so. That wild figure, that stern voice, those deeds of blood, which stand out in such startling relief from the pages of the old records of Elijah, are seen by us all silvered over with the "white and glistening" light of the Mountain of Transfiguration. When he last stood on the soil of his native Gilead<sup>f</sup> he was destitute, afflicted, tormented, wandering about "in sheep-skins and goat-skins, in deserts and mountains, and dens and caves of the earth." But these things have passed away into the distance, and with them has receded the fiery zeal, the destructive wrath, which accompanied them. Under that heavenly light they fall back into their proper proportions, and Ahab and Jezebel, Baal and Ashtoroth are forgotten, as we listen to the Prophet talking to our Lord—talking of that event which was to be the consummation of all that he had suffered and striven for—"talking of His decease which He should accomplish at Jerusalem."

Elijah has been canonized in both the Greek and Latin churches. Among the Greeks *Mar Elyās* is the patron of elevated spots, and many a conspicuous summit in Greece is called by his name.<sup>g</sup> The service for his day—*Ἡλίας μεγάλωνυμος*—will be found in the *Menaion* on July 20, a date recognised by the Latin church also.<sup>h</sup> The convent bearing his name, *Deir Mar Elyās*, between Jerusalem and Bethlehem, is well known to travellers in the Holy Land. It purports to be situated on the spot of his birth, as already observed. Other convents bearing his name once existed in Palestine: in *Jebel Ajlān*, the ancient Gilead (Ritter, *Syrien*, 1029, 1066, &c.); at *Ezra* in the *Haurān* (Burckhardt, *Syria*, 59), and the more famous establishment on Carmel.

<sup>f</sup> See the considerations adduced by Stanley (*S. & P.*) in favour of the mountain of the Transfiguration being on the east of Jordan.

<sup>g</sup> See this fact noticed in Clark's *Peloponnesus and Morea*, p. 190.

<sup>h</sup> See the *Acta Sanctorum*, July 20. By Cornelius a Lapide it is maintained that his ascent happened on that day, in the 19th year of Jehoshaphat (Kell, 331).

It is as connected with the great Order of the barefooted Carmelites that Elijah is celebrated in the Latin church. According to the statements of the Breviary (*Off. B. Mariæ Virginis de Monte Carmelo, Julii* 16) the connexion arose from the dedication to the Virgin of a chapel on the spot from which Elijah saw the cloud (an accepted type of the Virgin Mary) rise out of the sea. But other legends trace the origin of the order to the great Prophet himself as the head of a society of anchorites inhabiting Carmel; and even as himself dedicating the chapel in which he worshipped to the Virgin!<sup>i</sup> These things are matters of controversy in the Roman church, Baronius and others having proved that the Order was founded in 1181, a date which is repudiated by the Carmelites (see extracts in Fabricius, *Cod. Pseudepigr.* 1077).

In the Mahometan traditions *Ilyās* is said to have drunk of the Fountain of Life, "by virtue of which he still lives, and will live to the day of Judgment." He is by some confounded with St. George and with the mysterious *el-Khidr*, one of the most remarkable of the Muslim saints (see Lane's *Arabian Nights*, Intro. note 2; also *Selections from the Kuran*, 221, 222). The Persian *Sofis* are said to trace themselves back to Elijah (Fabricius, 1077).

Among other traditions it must not be omitted that the words "Eye hath not seen," &c., 1 Cor. ii. 9, which are without doubt quoted by the Apostle from Isaiah lxiv. 4, were, according to an ancient belief, from "the Apocalypse, or mysteries of Elijah," τὰ Ἡλίας ἀποκρύφα. The first mention of this appears to be Origen (*Hom. on Matt.* xxvii. 9), and it is noticed with disapproval by Jerome, *ad Pammachium* (see Fabricius, 1072).

By Epiphanius, the words "awake, thou that sleepest," &c., Eph. v. 14, are inaccurately alleged to be quoted "from Elijah," i. e. the portion of the O. T. containing his history—*παρὰ τῷ Ἡλῷ* (comp. Rom. xi. 2).

Two monographs on Elijah must not be overlooked: (1.) that of Frischmuth, *De Eliae Prophetæ Nom., &c.*, in the *Critici Sacri*; and (2.) *Elias Thesbites*, by Aegidius Camartus, 4to. Paris, 1631. There are also dissertations of great interest on the ravens, the mantle, and Naboth, in the *Critici Sacri*. [G.]

**ELIKA** (עֲלִיקָא; Alex. *Evand*; *Elicia*), a Harodite, i. e. from some place called Harod; one of David's guard (2 Sam. xxiii. 25). The name is omitted in the corresponding list of 1 Chr. xi.—to account for which see Kennicott's conjecture (*Dissertation, &c.*, 182).

**ELIM** (אֵילֵּימ; *Ailaim*), mentioned Ex. xv. 27; Num. xxxii. 9, as the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having had "twelve wells (rather "fountains," מְיֻנוֹת) of water, and three-score and ten palm-trees." Laborde (*Geographical Commentary on Exod. xv. 27*) supposed *Wady*

<sup>i</sup> S. John of Jerusalem, as quoted by Mislin, *Lives Saints*, ii. 49; and the Bulls of various Popes enumerated by Quaresmius, vol. ii.

<sup>a</sup> Root עָלָה, or עָלָה, "to be strong," hence "a strong tree," properly either an "oak" or "terebinth," but also generally "tree;" here in plur. as "the trees of the desert" (Stanley, *S. & P.* 315, §76). *Eloth* or *Eath* is another plur. form of name.

*Useit* to be Elim, the second of four wadys lying between 29° 7', and 29° 20',<sup>b</sup> which descend from the range of et Tih (here nearly parallel to the shore), towards the sea, and which the Israelites, going from N.W. to S.E. along the coast would come upon in the following order:—*W. Ghurundel* (where the "low hills" begin, Stanley, *S. & P.* 35), *W. Useit*, *W. Thál*, and *W. Shubeikeh*; the last being in its lower part called also *W. Taiyibeh*, or having a junction with one of that name. Between *Useit* and *Taiyibeh*, the coast-range of these hills rises into the *Gebel Hummam*, "lofty and precipitous, extending in several peaks along the shore, apparently of chalky limestone, mostly covered with flints . . . its precipices . . . cut off all passage alongshore from the hot springs (lying a little W. of S. from the mouth of *Wady Useit*, along the coast) to the mouth of *W. Taiyibeh*" (Rob. i. 102; comp. Stanley, *S. & P.* 35). Hence, between the courses of these wadys the track of the Israelites must have been inland. Dr. Stanley says "Elim must be *Ghurundel*, *Useit*, or *Taiyibeh*," 35; elsewhere, 66, that "one of two valleys, or perhaps both, must be Elim;" these appear from the sequel to be *Ghurundel* and *Useit*, "fringed with trees and shrubs, the first vegetation he had met with in the desert;" among these are "wild palms," not stately trees, but dwarf or savage, "tamarisks," and the "wild acacia." Lepsius takes another view, that *Ghurundel* is Mara, by others identified with Howara (2½ hours N.W. from *Ghurundel*, and reached by the Israelites, therefore, before it), and that Elim is to be found in the last of the four above named, *W. Shubeikeh* (Lepsius, *Travels*, Berlin, 1845, 8. 1. 27 ff.) [WILDERNESS OF THE WANDERING.] [H. H.]

**ELIM'ELÉCH** (עֲלִמֶלֶךְ, 'Elimélek), a man of the tribe of Judah, and of the family of the Hezronites and the kinsman of Boaz, who dwelt in Bethlehem-Ephrath in the days of the Judges. In consequence of a great dearth in the land he went with his wife Naomi, and his two sons, Mahlon and Chilion, to dwell in Moab, where he and his sons died without posterity. Naomi returned to Bethlehem with Ruth, her daughter-in-law, whose marriage with Boaz, "a mighty man of wealth, of the family of Elimelech," "her husband's kinsman," forms the subject of the book of Ruth. (Ruth i. 2, 3, ii. 1, 3, iv. 3, 9.) [A. C. H.]

**ELIOENAI** (עֲלִיֹּנָאִי; 'Eliōnna; Alex. 'Eliōnna; and —η). 1. Head of one of the families of the sons of Becher, the son of Benjamin (1 Chr. vii. 8).

2. Head of a family of the Simeonites (1 Chr. iv. 36).

3. (accr. ELIHOENAI, עֲלִיֹּנָאִי). Seventh son of Meshelemiah, the son of Hare, of the sons of Asaph, a Korhite Levite, and one of the doorkeepers of the "house of Jehovah" (1 Chr. xxvi. 3). It appears from ver. 14 that the lot fell to Meshelemiah (Shelemiah) to have the east-gate; and as we learn from ver. 9 that he had eighteen strong men of his sons and brethren under him, we may conclude that all his sons except Zechariah the first-

born (ver. 14) served with him, and therefore Elioenai likewise. There were six Levites daily on guard at the east-gate, whose turn would therefore come every third day.

4. Eldest son of Neurah, the son of Shemaiah, 1 Chr. iii. 23, 24. According to the present Heb. text he is in the seventh generation from Zerubbabel, or about contemporary with Alexander the Great; but there are strong grounds for believing that Shemaiah is identical with Shimei (ver. 19), Zerubbabel's brother. (See *Geneal. of our Lord*, 107-109, and ch. vii.)

5. A priest of the sons of Pashur, in the days of Ezra, one of those who had married foreign wives, but who, at Ezra's instigation, put them away with the children born of them, and offered a ram for a trespass offering (Ezr. x. 22). He is possibly the same as is mentioned in Neh. xii. 41, as one of the priests who accompanied Nehemiah with trumpets at the dedication of the wall of Jerusalem. He is called ELIONAS, 1 Esdr. ix. 22.

6. (עֲלִיֹּנָאִי). An Israelite, of the sons of Zattu, who had also married a strange wife (Ezr. x. 27). From the position of Zattu in the lists, Ezr. ii. 8; Neh. vii. 13, x. 14, it was probably a family of high rank. ELIOENAI is corrupted to ELIADAS, 1 Esdr. ix. 28. [A. C. H.]

**ELIONAS**. 1. ('Eliōnna; Alex. 'Eliōnna; Vulg. omits), 1 Esdr. ix. 22. [ELIOENAI.]

2. ('Eliōnna; Noncas), 1 Esdr. ix. 32. [ELIEZER.]

**ELIPHAL** (עֲלִיפָאֵל; 'Eliφat, Alex. 'Eliφad; *Eliphai*), son of Ur; one of the members of David's guard (1 Chr. xi. 35). In the parallel list in 2 Sam. xxiii. the name is given ΕΛΙΦΕΛΕΓ, and the names in connexion with it are much altered. [U.]

**ELIPHAIAT** ('Eliφαλάτ; *Eliphulach*), 1 Esdr. ix. 33. [ELIPHELET.]

**ELIPHAIET** (עֲלִיפָאֵת; 'Eliφad, and 'Eliφal; *Eliphath*). 1. The last of the thirteen sons born to David, by his wives, after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. xiv. 7). Elsewhere, when it does not occur at a pause, the name is given with the shorter vowel—ELIPHELET (1 Chr. iii. 8). Equivalent to Eliphath are the names ELPALET and PHALFIEL.

2. 1 Esdr. vii. 39. [ELIPHELET, 5.]

**ELIPHAZ** (עֲלִיפָאֵז; 'Eliφas; *Eliphaz*). 1. The son of Esau and Adah, and father of Teman (Gen. xxvi. 4; 1 Chr. i. 35, 36).

2. The chief of the "three friends" of Job. He is called "the Temanite;" hence it is naturally inferred that he was a descendant of Teman (the son of the first Eliphaz), from whom a portion of Arabia Petraea took its name, and whose name is used as a poetical parallel to Edom in Jer. xlix. 20. On him falls the main burden of the argument, that God's retribution in this world is perfect, and certain, and that consequently suffering must

<sup>b</sup> Seetzen (*Reisen*, 1854, iii. 114-117) traversed them all, and reached Howara in about a six hours' ride. He was going in the opposite direction to the routes of Robinson and Stanley; and it is interesting to compare his notes of the local features, caught in the inverse order, with theirs.

<sup>c</sup> Seetzen alleges that the scanty quantity of water at Howara is against this identity,—a weak reason, for the water supply of these regions is highly variable. He also rejects Ghurundel as the site of Elim (iii. 117).

be a proof of previous sin (Job iv. v. xv. xxi.). His words are distinguished from those of Bildad and Zophar by greater calmness and elaboration, and in the first instance by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impute to him special sins. The great truth brought out by him is the unapproachable majesty and purity of God (iv. 12-21, xv. 12-16). [JOB, BOOK OF.] But still, with the other two friends, he is condemned for having, in defence of God's providence, spoken of Him "the thing that was not right," i. e. by refusing to recognise the facts of human life, and by contenting himself with an imperfect retribution as worthy to set forth the righteousness of God. On sacrifice and the intercession of Job all three are pardoned. [A. B.]

**ELIPHELEH** (עֲלִיפְהֵלֶיךָ, i. e. *Eliphelchu*; 'Ελιφελᾶ, 'Ελιφαλού, Alex. 'Ελιφαλδ; *Eliphale*), a Merarite Levite; one of the gatekeepers (דְּשָׁרְיָו, A. V. "porters") appointed by David to play on the harp "on the Sheminith" on the occasion of bringing up the Ark to the city of David (1 Chr. xv. 18, 21).

**ELIPHELET** (עֲלִיפְהֵלֶיךָ; 'Ελιφαλέτ; *Eliphaleth, Eliphelct*).

1. ('Ελιφαλήθ, Alex. 'Ελιφαλέτ). The name of a son of David, one of the children born to him, by his wives, after his establishment in Jerusalem (1 Chr. iii. 6). In the list in 2 Sam. v. 15, 16, this name and another are omitted; while in another list in 1 Chr. xiv. 5, 6, it is given as **ELPALET**.

2. ('Ελιφαλδ), another son of David, belonging also to the Jerusalem family, and apparently the last of his sons (1 Chr. iii. 8). In the other list, occurring at the pause, the vowel is lengthened and the name becomes **ELIPHALET**.

It is believed by some that there were not two sons of this name; but that, like Nogah, one is merely a transcriber's repetition. The two are certainly omitted in Samuel, but on the other hand they are inserted in two separate lists in Chronicles, and in both cases the number of sons is summed up at the close of the list.

3. ('Αλιφαλέτ), son of Ahushai, son of the Maachathite. One of the thirty warriors of David's guard (2 Sam. xxiii. 34). In the list in 1 Chr. xi. the name is abbreviated into **ELIPHAL**.

4. Son of Eshek, a descendant of king Saul through Jonathan (1 Chr. viii. 39).

5. One of the leaders of the Bene-Adonikam, who returned from Babylon with Ezra (Ezr. viii. 13). [**ELIPHALET**, 2.]

6. A man of the Bene-Hashum in the time of Ezra who had married a foreign wife and had to relinquish her (Ezr. x. 33). [**ELIPHALAT**.]

**ELISABETH** ('Ελισάβετ, Luke i. 5 ff.), the wife of Zacharias and mother of John the Baptist. She was herself of the priestly family, ἐκ τῶν θυγατέρων 'Ααρών, and a relation (συγγενής, Luke i. 36) of the mother of our Lord. [MARY, 1.] She

is described as a person of great piety, and was the first to greet Mary, on her coming to visit her, as the mother of her Lord (Luke i. 42 ff.). [H. A.]

**ELISEUS** ('Ελισαί; N. T. Rec. Text with B C, 'Ελισσαίον; Lachm. with A D, 'Ελισαίον; *Eliseus*, but in Cod. Amiat. *Helisaeus*): the form in which the name **ELISHA** appears in the A. V. of the Apocrypha and the N. T. (Ecclus. xlviii. 12; Luke iv. 27).

**ELI'SHA** (עֲלִישָׁא; 'Ελισαί; Alex. 'Ελισσαι; Joseph. 'Ελισσαίος; *Elisaeus*), son of Shaphat of Abel-meholah. The attendant and disciple (καὶ μαθητὴς καὶ διάκονος, Jos. Ant. viii. 13, §7) of Elijah, and subsequently his successor as prophet of the kingdom of Israel.

The earliest mention of his name is in the command to Elijah in the cave at Horeb (1 K. xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place. Abel-meholah—the "meadow of the dance"—was probably in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. [ABEL.] Elijah, on his way from Sinai to Damascus by the Jordan valley, lights on his successor engaged in the labours of the field, twelve yoke before him, i. e. either twelve ploughs at work in other parts of the field, or more probably twelve "yokes" of land already ploughed, and he himself engaged on the last. To cross to him, to throw over his shoulders the rough mantle—a token at once of investiture with the prophet's office, and of adoption as a son—was to Elijah but the work of an instant, and the prophet strode on as if what he had done were nothing<sup>b</sup>—"Go back again, for what have I done unto thee?"

So sudden and weighty a call, involving the relinquishment of a position so substantial, and family ties so dear, might well have caused hesitation. But the parley was only momentary. To use a figure which we may almost believe to have been suggested by this very occurrence, Elisha was not a man who, having put his hand to the plough, was likely to look back; he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road to become to him what in the earlier times of his nation Joshua<sup>d</sup> had been to Moses.

Of the nature of this connexion we know hardly anything. "Elisha the son of Shaphat, who poured water on the hands of Elijah," is all that is told us. The characters of the two men were thoroughly dissimilar, but how far the lion-like daring and courage of the one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, reserved master had engendered in his gentle and pliant disciple.

Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing

<sup>a</sup> The story in the *Chron. Paschale* and Epiphanius is that when Elisha first saw the light the golden calf at Bethel roared, so loud as to be heard at Jerusalem, "He shall destroy their graven and their molten images" (Fabricius, 1071).

<sup>b</sup> So our translation, and so the latest Jewish rendering (Zunz). Other versions interpret the passage differently.

<sup>c</sup> According to Josephus (*Ant.* viii. 13, §7) he began to prophesy immediately.

<sup>d</sup> The word עֲלִישָׁא (A. V. "ministered to him") is the same that is employed of Joshua. Gehazi's relation to Elisha, except once, is designated by a different word, עֲלִישָׁא = "lad" or "youth."

of him. But when that period had elapsed he reappears, to become the most prominent figure in the history of his country during the rest of his long life. In almost every respect Elisha presents the most complete contrast to Elijah. The copious collection of his sayings and doings which are preserved in the 3rd to the 9th chapter of the 2nd book of Kings, though in many respects deficient in that remarkable vividness which we have noticed in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedouin child of the desert. The clefts of the Cherith, the wild shrubs of the desert, the cave at Horeb, the top of Carmel, were his haunts and his resting-places. If he enters a city, it is only to deliver his message of fire and be gone. Elisha, on the other hand, is a civilised man, an inhabitant of cities. He passed from the translation of his master to dwell (עָשָׂה, A. V. "tarry") at Jericho (2 K. ii, 18); from thence he "returned" to Samaria (ver. 25). At Samaria (v. 3, vi. 32, comp. ver. 24) and at Dothan (vi. 14) he seems regularly to have resided in a house (v. 9, 24, vi. 32, xiii. 17) with "doors" and "windows," in familiar intercourse with the sons of the prophets, with the elders (vi. 32), with the lady of Shuam, the general of Damascus, the king of Israel. Over the king and the "captain of the host" he seems to have possessed some special influence, capable of being turned to material advantage if desired (2 K. iv. 13). And as with his manners so with his appearance. The touches of the narrative are very slight, but we can gather that his dress was the ordinary garment of an Israelite, the *beyed*, probably similar in form to the long *albayeh* of the modern Syrians (2 K. ii. 12), that his hair was worn trimmed behind, in contrast to the disordered locks of Elijah (ii. 23, as explained below), and that he used a walking-staff (iv. 29) of the kind ordinarily carried by grave or aged citizens (Zech. viii. 4). What use he made of the rough mantle of Elijah, which came into his possession at their parting, does not anywhere appear, but there is no hint of his ever having worn it.

If from these external peculiarities we turn to the internal characteristics of the two, and to the results which they produced on their contemporaries, the differences which they present are highly instructive. Elijah was emphatically a destroyer. His mission was to slay and to demolish whatever opposed or interfered with the rights of Jehovah, the Lord of Hosts. The nation had adopted a god of power and force, and they were shown that he was feebleness itself compared with the God whom they had forsaken. But after Elijah the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the proclamation of the one. "There shall not be from thence any dearth or barren land" is the first miracle of the other. What may have been the disposition of Elijah when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most

men of strong stern character, he had probably affections no less strong. But it is impossible to conceive that he was accustomed to the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable,—in communication, for example, with Nauman or Hazael; in the one case calming with a word of peace the scruples of the new proselyte, anxious to reconcile the due homage to Rimmon with his allegiance to Jehovah; in the other case contemplating with tears, but still with tears only, the evil which the future king of Syria was to bring on his country. That Baal-worship was prevalent in Israel even after the efforts of Elijah, and that Samaria was its chief seat, we have the evidence of the narrative of Jehu to assure us (2 K. x. 18-27), but yet not one act or word in disapproval of it is recorded of Elisha. True, he could be as zealous in his feelings and as cutting in his words as Elijah. "What have I to do with thee?" says he to the son of Ahab—"this son of a murderer," as on another occasion he called him—"What have I to do with thee? get thee to the prophets of thy father and to the prophets of thy mother. As the Lord of hosts liveth before whom I stand"—the very formula of Elijah—"surely were it not that I regard the presence of Jehoshaphat king of Judah I would not look toward thee nor see thee!" But after this expression of wrath he allows himself to be calmed by the music of the minstrel, and ends by giving the three kings the counsel which frees them from their difficulty. So also he smites the host of the Syrians with blindness, but it is merely for a temporary purpose; and the adventure concludes by his preparing great provision for them, and sending these enemies of Israel and worshippers of false gods back unharmed to their master.

In considering these differences the fact must not be lost sight of that, notwithstanding their greater extent and greater detail, the notices of Elisha really convey a much more imperfect idea of the man than those of Elijah. The prophets of the nation of Israel—both the predecessors of Elisha, like Samuel and Elijah, and his successors, like Isaiah and Jeremiah—are represented to us as preachers of righteousness, or champions of Jehovah against false gods, or judges and deliverers of their country, or counsellors of their sovereign in times of peril and difficulty. Their miracles and wonderful acts are introduced as means towards these ends, and are kept in the most complete subordination thereto. But with Elisha, as he is pictured in these narratives, the case is completely reversed. With him the miracles are everything, the prophet's work nothing. The man who was for years the intimate companion of Elijah, on whom Elijah's mantle descended, and who was gifted with a double portion of his spirit,\* appears

\* The ordinary meaning put upon this phrase (see, for example, J. H. Newman, *Subj. of the Day*, p. 191) is that Elisha possessed double the power of Elijah. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from S. Ephraem Syrus to Pastor Krummacker, would appear not to be the real force of the words.

פִּי שְׁנַיִם, literally "a mouth of two"—a double mouthful—is the phrase employed in Dent. xxi. 17 to denote the amount of a seller's goods which were

the right and token of a firstborn son. Thus the gift of the "double portion" of Elijah's spirit was but the legitimate conclusion of the act of adoption which began with the casting of the mantle at Abel-meholah years before. This explanation is given by Grotius and others. (See Keil *ad loc.*) Ewald (*Genes. iii. 507*) gives it as *nur Zweidrittel, und auch dies kaum*—two-thirds, and hardly that. For a curious calculation by S. Peter Damianus, that Elijah performed 12 miracles and Elisha 24, see the *Acta Sanctorum*, July 20.

in these records chiefly as a worker of prodigies, a predictor of future events, a revealer of secrets, and things happening out of sight or at a distance. The working of wonders seems to be a natural accompaniment of false religions, and we may be sure that the Baal-worship of Samaria and Jezreel was not free from such arts. The story of 1 K. xxii. shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to foretell how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to accommodate itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true.<sup>f</sup> And thus Elisha appears to have fallen in with the habits of his fellow-countrymen. He wrought, without reward and without ceremonial, the cures and restorations for which the sooth-sayers of Baalzebub at Ekron were consulted in vain: he warned his sovereign of dangers from the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that no less signally than Elijah he vanquished the false gods on their own field. But still even with this allowance it is difficult to help believing that the anecdotes of his life (if the word may be permitted, for we cannot be said to possess his biography) were thrown into their present shape at a later period, when the idea of a prophet had been lowered from its ancient elevation to the level of a mere worker of wonders. A biographer who held this lower idea of a prophet's function would regard the higher duties above alluded to as comparatively unworthy of notice, and would omit all mention of them accordingly. In the eulogium of Elisha contained in the catalogue of worthies of Eccles. xlviii. 12-14—the only later mention of him save the passing allusion of Luke iv. 27—this view is more strongly brought out than in the earlier narrative:—"Whilst he lived, he was not moved by the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvellous."

But there are other considerations from which the incompleteness of these records of Elisha may be inferred:—(1.) The absence of marks by which to determine the dates of the various occurrences. The "king of Israel" is continually mentioned, but we are left to infer what king is intended (2 K. v. 5, 6, 7, &c., vi. 8, 9, 21, 26, vii. 2, viii. 3, 5, 6, &c.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are iii. 12 (comp. 6), and the narrative

of the visit of Jehoshaphat (xiii. 14, &c.), but this latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehoshaphat (ver. 13), and being followed by an account of occurrences in the reign of Jehoshaphat his father (ver. 22, 23). (2.) The absence of chronological sequence in the narratives. The story of the Shunammite embraces a lengthened period, from before the birth of the child till he was some years old. Gehazi's familiar communication with the king, and therefore the story which precedes it (viii. 1, 2), must have occurred before he was struck with leprosy, though placed long after the relation of that event (v. 27). (3.) The different stories are not connected by the form of words usually employed in the consecutive narrative of these books. (See Keil, *Kings*, 348, where other indications will be found.)

With this preface we pass to the consideration of the several occurrences preserved to us in the life of the prophet.

The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the grandson of Jehu. This embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (2 K. v. 8).<sup>g</sup>

1. After the departure of his master, Elisha returned to dwell<sup>h</sup> at Jericho (2 K. ii. 18). The town had been lately rebuilt (1 K. xvi. 34), and was the residence of a body of the "sons of the prophets" (2 K. ii. 5, 15). No one who has visited the site of Jericho can forget how prominent a feature in the scene are the two perennial springs which, rising at the base of the steep hills of Quarantain behind the town, send their streams across the plain towards the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over what would otherwise be a bare tract of sandy soil. At the time in question part at least of this charm was wanting. One of the springs was noxious—had some properties which rendered it unfit for drinking, and also prejudicial to the land (ii. 19, רַעֲוִי = bad, A. V. "naught").

At the request of the men of Jericho Elisha remedied this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (*B. J.* iv. 8, §3) to the present (Sæwulf, *Mod. Trav.* 17; Mandeville; Maundrell; Rob. i. 554, 5), the tradition of the cure has been attached to the large spring N.W. of the present town, and which now bears, probably in reference to some later event, the name of *Ain es-Sultân*.<sup>i</sup>

2. We next meet with Elisha at Bethel, in the heart of the country, on his way from Jericho to Mount Carmel (2 K. ii. 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii. 2). Sons of the prophets resided there, but still it was the seat of

Out of the above Elijah lived probably 9 years; the 4 of Ahab, the 2 of Ahaziah, and say 3 of Joram: which leaves 56 years from the ascent of Elijah to the death of Elisha.

<sup>h</sup> Hebr. בְּיָשָׁן; A. V. generally "dwelt," but here "tarried."

<sup>i</sup> This, or *Ain Hasya*, in the same neighbourhood, is probably the spring intended by Scott in the opening chapter of the *Talesman*, under the name of the "Diamond of the Desert." But his knowledge of the topography is evidently most imperfect.

<sup>f</sup> See Stanley's, *Canterbury Sermons*, p. 320.

<sup>g</sup> The figures given above are arrived at as follows:—

Ahab's reign after Elisha's call, say	4 years.
Ahaziah's do. . . . .	2 "
Joram's do. . . . .	12 "
Jehu's do. . . . .	28 "
Jehoshaphat's do. . . . .	17 "
Joash, before Elisha's death, say	2 "

the calf-worship, and therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the *Wady Suweinit*, under the hill which still bears what in all probability are the ruins of Ai, and which, even now retaining some trees, was at that date shaded by a forest, thick, and the haunt of savage animals.<sup>k</sup> Here the boys of the town were clustered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the short-trimmed locks of Elisha, how were they to recognise the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So with the license of the Eastern children they scoff at the new comer as he walks by—"Go up,<sup>m</sup> roundhead! go up, roundhead!" For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the name of Jehovah, and we all know the catastrophe which followed. The destruction of these children has been always felt to be a difficulty. It is so entirely different from anything elsewhere recorded of Elisha—the one exception of severity in a life of mildness and beneficence—that it is perhaps allowable to conclude that some circumstances have been omitted in the narrative, or that some expression has lost its special force, which would have explained and justified the apparent disproportion of the punishment to the offence.

3. Elisha extricates Jehoram king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (in. 4-27). The revolt of Moab occurred very shortly after the death of Ahab (iii. 5, comp. i. 1), and the campaign followed immediately—"the same day" (iii. 6; A. V. "time"). The prophet was with the army; according to Josephus (*Ant.* ix. 3, §1), he "happened to be in a tent (ἐν τῇ κατακκηνωσκάς) outside the camp of Israel." Joram he refuses to hear except out of respect for Jehoshaphat the servant of the true God; but a minstrel is brought, and at the sound of music the hand of Jehovah comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connexion therewith which results in the complete discomfiture of Moab. This incident probably took place at the S.E. end of the Dead Sea.

4. The widow of one of the sons of the prophets—according to Josephus, of Obadiah, the steward of Ahab—is in debt, and her two sons are about to be taken from her and sold as slaves. She has no property but a pot of oil. This Elisha causes (in his absence, iv. 5) to multiply, until the widow has filled with it all the vessels which she could borrow. No invocation of Jehovah is mentioned, nor any place or date of the miracle.

5. The next occurrence is at Shunem and Mount Carmel (iv. 8-37). The story divides itself into two parts, separated from each other by several

years. (a.) Elisha, probably on his way between Carmel and the Jordan valley, calls accidentally at Shunem, now *Sokam*, a village on the southern slopes of *Jebel ed Duhy*, the little Hermon of modern travellers. Here he is hospitably entertained by a woman of substance, apparently at that time ignorant of the character of her guest. There is no occasion here to quote the details of this charming narrative, or the manner in which, as a recompense for her care of the prophet, she was saved from that childless condition which was esteemed so great a calamity by every Jewish wife, and permitted to "embrace a son."

(b.) An interval has elapsed of several years. The boy is now old enough to accompany his father to the corn-field, where the harvest is proceeding. The fierce rays of the morning sun are too powerful for him, and he is carried home to his mother only to die at noon. She says nothing of their loss to her husband, but depositing her child on the bed of the man of God, at once starts in quest of him to Mount Carmel. The distance is fifteen or sixteen miles, at least four hours' ride; but she is mounted on the best ass<sup>n</sup> in the stable, and she does not slacken rein. Elisha is on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (עליו) he recognises in the distance the figure of the regular attendant at the services which he holds here at "new moon and sabbath" (comp. ver. 23). He sends Gehazi down to meet her, and inquire the reason of her unexpected visit. But her distress is for the ear of the master, and not of the servant, and she presses on till she comes up to the place where Elisha himself is stationed,<sup>o</sup> then throwing herself down in her emotion she clasps him by the feet. Misinterpreting this action, or perhaps with an ascetic feeling of the unholiness of a woman, Gehazi attempts to thrust her away. But the prophet is too profound a student of human nature to allow this—"Let her alone, for her soul is vexed within her; and Jehovah hath hid it from me, and hath not told me." "And she said"—with the enigmatical form of Oriental speech—"did I desire a son of my lord? did I not say to do I deceive me?" No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no delay in taking the necessary steps, and Gehazi is at once despatched to run back to Shunem with the utmost speed.<sup>p</sup> He takes the prophet's walking-staff in his hand which he is to lay on the face of the child. The mother and Elisha follow in haste. Before they reach the village the sun of that long, anxious, summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give, the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, "and he shut the door on them twain, and prayeth unto Jehovah."

<sup>k</sup> The "lion" and the "bear" are mentioned as not uncommon by Amos (v. 19), who resided certainly for some time in the neighbourhood of Bethel (see vii. 10; also iv. 4; v. 5, 6). The word used for the "forest" is עֵץ, *ya'ar*, implying a denser growth than *chorrah*, more properly a "wood" (Stanley, *S. & P.* App. §73).

<sup>m</sup> עֲלֶה, "go up," can hardly, as Abarbanel would have it, be a scoff at the recent ascent of Elijah. The word rendered above by "roundhead" (קִרְיָה) is a

peculiar Hebrew term for shortness of hair at the back of the head, as distinguished from קִרְיָה, bald in front; A. V. "forehead-bald." This is due to Ewald (iii. 512).

<sup>n</sup> שֶׁאֲסָהּ = "the she-ass." She-asses were, and still are, most esteemed in the East.

<sup>o</sup> The A. V. in iv. 27, perversely renders קִרְיָה "the mount," by "the hill," thus obscuring the connexion with ver. 25, "Mount Carmel."

<sup>p</sup> "Gird up thy loins and go."

It was what Elijah had done on a similar occasion, and in this and his subsequent proceedings Elisha was probably following a method which he had heard of from his master. The child is restored to life, the mother is called in, and again falls at the feet of the prophet, though with what different emotions—"and she took up her son and went out."

There is nothing in the narrative to fix its date with reference to other events. We here first encounter Gehazi the "servant" of the man of God.<sup>3</sup> It must of course have occurred before the events of viii. 1-6, and therefore before the cure of Naaman, when Gehazi became a leper.

6. The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv. 38-41). The sons of the prophets are sitting round him. It is a time of famine, possibly the same seven years' scarcity which is mentioned in viii. 1, 2, and during which the Shunammite woman of the preceding story migrated to the Philistine country. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket (נָדָה; not "lap" as in A. V.) full of such wild vegetables as he has collected, and empties it into the pottage. But no sooner have they begun their meal than the taste betrays the presence of some noxious herb,<sup>4</sup> and they cry out, "there is death in the pot, oh man of God!" In this case the cure was effected by meal which Elisha cast into the stew, in the caldron. Here again there is no invocation of the name of Jehovah.

7. (iv. 42-44). This in all probability belongs to the same time, and also to the same place as the preceding. A man from Baal-shalisha brings the man of God present of the first-fruits, which under the law (Num. xviii. 8, 12, Deut. xviii. 3, 4) were the perquisite of the ministers of the sanctuary—20 loaves of the new barley, and some delicacy, the exact nature of which is disputed, but which seems most likely to have been roasted ears of corn not fully ripe,<sup>5</sup> brought with care in a sack or bag.<sup>6</sup> This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men.

This is one of the instances in which Elisha is the first to anticipate in some measure the miracles of Christ.

The mention of Baal-shalisha gives great support to the supposition that the Gilgal mentioned here (ver. 38) as being frequented by the sons of the prophets, and therefore the same place with that in ii. 1, was not that near Jericho; since Baal-shalisha or Beth-shalisha is fixed by Eusebius at

fifteen Roman miles north of Lydda, the very position in which we still find the name of Gilgal lingering as *Jiljilich*. [GILGAL.]

8. The simple records of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (v. 1-27).

The chief captain of the army of Syria, to whom his country was indebted for some signal success,<sup>7</sup> was afflicted with leprosy, and that in its most malignant form, the white variety (v. 27). In Israel this would have disqualified him from all employment and all intercourse (2 K. xv. 5; 2 Chr. xxvi. 20, 21). But in Syria no such practice appears to have prevailed; Naaman was still a "great man with his master," "a man of countenance." One of the members of his establishment is an Israelite girl, kidnapped by the marauders<sup>8</sup> of Syria in one of their forays over the border, and she brings into that Syrian household the fame of the name and skill of Elisha. "The prophet in Samaria," who had raised the dead, would, if brought "face to face" with the patient, have no difficulty in curing even this dreadful leprosy. The news is communicated by Naaman himself<sup>9</sup> to the king. Benhadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later—"I say to this one, go, and he goeth, and to my servant do this, and he doeth it." "And now"—so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication—"and now, when this letter is come unto thee, behold I have sent Naaman, my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics,<sup>10</sup> for which Damascus has been always in modern times so famous, form a conspicuous feature, and with a full retinue of attendants (13, 15, 25), Naaman proceeds to Samaria. The king of Israel—his name is not given, but it was probably Joram—is dismayed at the communication. He has but one idea, doubtless the result of too frequent experience—"Consider how this man seeketh a quarrel against me!" The occurrence soon reaches the ears of the prophet, and with a certain dignity he "sends" to the king—"Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman goes with his whole cavalcade, the "horses and chariot" of the Syrian general fixing themselves particularly in the mind of the chronicler. Elisha

<sup>3</sup> נָעֲרָ, i. e. the lad or youth, a totally different term to that by which the relation of Elisha to Elijah is designated—see above; though the latter is also occasionally applied to Gehazi.

<sup>4</sup> For a full discussion of the nature of this herb see the article "Pakyoth" by the late Dr. Forbes Royle in *Kitt's Cyclop.* One kind of small gourd has received the name *Cucumis prophetarum* in allusion to this circumstance; but Dr. R. inclines to favour *C. colocynthis*, the colocynth, or *Momordica elaterium*, the squirting cucumber. This is surely impossible.

<sup>5</sup> The Hebrew expression פֶּרֶךְ נֶאֱמָר seems to be elliptical for פֶּרֶךְ נֶאֱמָר (Lev. ii. 14; A. V. "green ears of corn"). The same ellipsis occurs in Lev. xxiii. 14 (A. V. "green ears"). The old Hebrew interpretation is "tender and fresh ears." Gesenius (*Thez.* 713)

makes it out to be grains or grits. The passage in Lev. ii. 14, compared with the common practice of the East in the present day, suggests the meaning given above.

<sup>6</sup> עֲקָלֹן; LXX. *ῥίπα*. The word occurs only here. The meaning given above is recognized by the majority of the versions and by Gesenius, and is stated in the margin of A. V.

<sup>7</sup> The tradition of the Jews is that it was Naaman who killed Ahab (*Midrash Tehillim*, p. 29 b, on Ps. lxxviii).

<sup>8</sup> Hebr. גִּזְדָּנִים, i. e. plunderers, always for irregular parties of marauders.

<sup>9</sup> So the Hebrew. A. V. "with."

<sup>10</sup> A. V. "one went in" is quite gratuitous.

<sup>11</sup> The word used is כְּבוֹשֶׁת = a dress of ceremony.

still keeps in the background, and while Naaman stands at the doorway, contents himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behaviour of the prophet, and the simplicity of the prescription—not only devoid of any ceremonial, but absolutely insulting to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East, all combined to outrage Naaman. His slaves, however, knew how to deal with the quick but not ungenerous temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, “and his flesh came again like the flesh of a little child, and he was clean.” His first business after his cure is to thank his benefactor. He returns with his whole following (חֲנִיכָיו, i. e. “host,” or “camp”), and this time he will not be denied the presence of Elisha, but making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he has brought from Damascus. But Elisha is firm, and refuses the offer, though repeated with the strongest adjuration. Naaman, having adopted Jehovah as his God, begs to be allowed to take away some of the earth of His favoured country, of which to make an altar. He then consults Elisha on a difficulty which he foresees. How is he, a servant of Jehovah, to act when he accompanies the king to the temple of the Syrian god Rimmon? He must bow before the god; will Jehovah pardon this disloyalty? Elisha’s answer is “Go in peace,” and with this farewell the caravan moves off. But Gehazi, the attendant of Elisha, cannot allow such treasures thus to escape him. “As Jehovah liveth!”—an expression, in the lips of this vulgar Israelite, exactly equivalent to the oft-repeated *Wallah—*“by God”—of the modern Arabs, “I will run after this Syrian and take somewhat of him.” So he frames a story by which the generous Naaman is made to send back with him to Elisha’s house a considerable present in money and clothes. He then went in and stood before his master as if nothing had happened. But the prophet was not to be so deceived. His heart had gone after his servant through the whole transaction, even to its minutest details, and he visits Gehazi with the tremendous punishment of the leprosy, from which he has just relieved Naaman.

This cure of leprosy—the only one which he effected (Luke iv. 27)—is a second miracle in which Elisha, and Elisha only, anticipated our Lord.<sup>b</sup>

The date of the transaction must have been at least seven years after the raising of the Shunammite’s son. This is evident from a comparison of viii. 4, with 1, 2, 3. Gehazi’s familiar conversation with the king must have taken place before he was a leper.

9. (vi. 1-7). We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Whether from the increase of the scholars consequent on the estimation in which the

master was held, or from some other cause, their habitation had become too small—“the place in which we sit before thee is too narrow for us.” They will therefore move to the close neighbourhood of the Jordan, and cutting down beams—each man one, as with curious minuteness the text relates—make there a new dwelling-place. Why Jordan was selected is not apparent. Possibly for its distance from the distractions of Jericho—possibly the spot was one sanctified by the crossing of Israel with the ark, or of Elijah, only a few years before. Urged by his disciples the man of God consents to accompany them. When they reach the Jordan, descending to the level of the stream, they commence felling the trees<sup>c</sup> of the dense belt of wood in immediate contact with the water. [JORDAN.] As one of them was cutting at a tree overhanging the stream, the iron of his axe (a borrowed tool) flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is moreover so turbid that search would be useless. But the place at which the lost axe entered the water is shown to Elisha; he breaks off<sup>d</sup> a stick and casts it into the stream, and the iron appears on the surface, and is recovered by its possessor. No appeal to Jehovah is recorded here.

10. (vi. 8-23). Elisha is now residing at Dothan, halfway on the road between Samaria and Jezreel. The incursions of the Syrian marauding bands<sup>e</sup> (comp. v. 2) still continue: but apparently with greater boldness, and pushed even into places which the king of Israel is accustomed to frequent.<sup>f</sup> But their manoeuvres are not hid from the man of God, and by his warnings he saves the king “not once nor twice.” So baffled were the Syrians by these repeated failures, as to make their king suspect treachery in his own camp. But the true explanation is given by one of his own people—possibly one of those who had witnessed the cure wrought on Naaman, and could conceive no power too great to ascribe to so gifted a person: “Elisha, the prophet in Israel, telleth the king of Israel the words that thou speakest in thy bed-chamber.” So powerful a magician must be seized without delay, and a strong party with chariots is despatched to effect his capture: They march by night, and before morning take up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha’s servant—not Gehazi, but apparently a new comer, unacquainted with the powers of his master—is the first to discover the danger. But Elisha remains unmoved by his fears; and at his request the eyes of the youth are opened to behold the spiritual guards which are protecting them, horses and chariots of fire filling the whole of the mountain. But this is not enough. Elisha again prays to Jehovah, and the whole of the Syrian warriors are struck blind. He then descends, and offers to lead them to the person and the place which they seek. He conducts them to Samaria. There, at the prayer of the prophet, their sight is restored, and they find

<sup>b</sup> The case of Miriam (Num. xii. 10-15) is different. Human agency appears to have done nothing towards her cure.

<sup>c</sup> So the Hebrew, חֲנִיכָיו.

<sup>d</sup> The Hebrew word שָׁבַע occurs only once besides this place. Its exact force is not clear, but the LXX. render it *detached*, “he pinched off.”

<sup>e</sup> חֲנִיכָיו, always with the force of irregular ravaging. See ver. 23.

<sup>f</sup> The expression is peculiar—“beware thou person not by such a place.” Josephus (ix. 4, §9) says that the king was obliged to give up hunting in consequence.

themselves not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel is eager to destroy them. "Shall I slay? shall I slay, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not slay. Thou mayest slay those whom thou hast taken captive in lawful fight, but not these: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased.

11. (vi. 24—vii. 2). But the king of Syria could not rest under such dishonour. He abandons his marauding system, and gathers a regular army, with which he lays siege to SAMARIA. The awful extremities to which the inhabitants of the place were driven need not here be recalled. Roused by an encounter with an incident more ghastly than all, and which remained without parallel in Jewish records till the unspeakable horrors of the last days of Jerusalem (Joseph. *B. J.* v. 10, §3; 13, §7, &c.), the king vents his wrath on the prophet, probably as having by his share in the last transaction,<sup>a</sup> or in some other way not recorded, provoked the invasion; possibly actuated by the spite with which a weak bad man in difficulty often regards one better and stronger than himself. The king's name is not stated in the Bible, but there can be no doubt that Josephus is correct in giving it as Joram; and in keeping with this is his employment of the same oath which his mother Jezebel used on an occasion not dissimilar (1 K. xix. 2), "God do so to me and more also, if the head of Elisha the son of Shaphat stand on him this day." No sooner is the word out of the king's mouth than his emissary starts to execute the sentence. Elisha is in his house, and round him are seated the elders of Samaria, doubtless receiving some word of comfort or guidance in their sore calamity. He receives a miraculous intimation of the danger. Ere the messenger could reach the house, he said to his companions, "See how this son of a murderer<sup>b</sup> hath sent to take away my head! Shut the door, and keep him from entering: even now I hear the sound of his master's feet behind him, hastening to stay the result of his rash exclamation!"<sup>c</sup> As he says the words the messenger arrives at the door, followed immediately, as the prophet had predicted, by the king and by one of his officers, the lord on whose hand he leaned. What follows is very graphic. The king's hereditary love of Baal bursts forth, and he cries, "This evil is from Jehovah," the ancient enemy of my house, "why should I wait for Jehovah any longer?" To this Elisha answers: "Hear the word of Jehovah"—"He who has sent famine can also send plenty"—"to-morrow at this time shall a measure of fine flour be sold for a shekel, and two measures of barley for a shekel, in the gate of this very city."

<sup>a</sup> This interpretation is that of the Targum, De Wette, and others, and gives a better sense than that of the A. V. The original will perhaps bear either.

<sup>b</sup> Josephus, *Ant.* ix. 4, §4.

<sup>c</sup> Surely an allusion to Ahab (Joram's father) and Naboth.

<sup>d</sup> Josephus (*Ant.* ix. 4, §4).

<sup>e</sup> Instances of this are frequent in the *Arabian Nights*. Ibrahim Pacha, the famous son of Mehmet Ali, used to hold an open court in the garden of his

"This is folly," says the officer: "even if Jehovah were to make windows in heaven and pour down the provisions, it could not be." "It can, it shall," replies Elisha; "and you, you shall see it all, but shall not live even to taste it."

12. (viii. 1-6). We now go back several years to an incident connected with the lady of Shunem, at a period antecedent to the cure of Naaman and the transfer of his leprosy to Gehazi (v. 1, 27).

Elisha had been made aware of a famine which Jehovah was about to bring upon the land for seven years; and he had warned his friend the Shunammite thereof that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines, that is in the rich corn-growing plain on the seacoast of Judah, where secure from want she remained during the dearth. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it—the corn-fields of the former story—had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest of their subjects to a degree inconceivable to the inhabitants of the Western world.<sup>a</sup> To the king therefore the Shunammite had recourse, as the widow of Tekoah on a former occasion to King David (2 Sam. xiv. 4). And now occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment the entrance of the woman and her son—clamouring, as Oriental suppliants alone clamour,<sup>b</sup> for her home and her land—the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating—the restoration to life of the boy of Shunem. The woman was instantly recognized by Gehazi. "My lord, O king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence.

13. (viii. 7-15). Hitherto we have met with the prophet only in his own country. We now find him at Damascus.<sup>c</sup> He is there to carry out the command given to Elijah on Iloreb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (comp. vi. 24). The memory of the cure of Naaman, and of the subsequent disinterestedness of the prophet, were no doubt still fresh in Damascus; and no sooner does he enter the city than the intelligence is carried to the king—"the man of God is come hither." The king's first desire is naturally to ascertain his own

palace at Akka (Acre), for complaints of all kinds and from all classes.

<sup>a</sup> פִּיִּי (A. V. "cry"); a word denoting great vehemence.

<sup>b</sup> The traditional spot of his residence on this occasion is shown in the synagogue at Jobar (J. Hobah), a village about 2 miles E. of Damascus. The same village, if not the same building, also contains the cave in which Elijah was fed by ravens and the tomb of Gehazi (Stanley, 412; Quaracmius, ii. §61—"cave et mendacia Hebraeorum").

fate; and Hazael, who appears to have succeeded Naaman, is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I recover of this disease?" The present is one of royal dimensions; a caravan of 40 camels,<sup>p</sup> laden with the riches and luxuries which that wealthy city could alone furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence had addressed Elisha himself. "Thy son Benhadad hath sent me to thee, saying, 'Shall I recover of this disease?'" The reply, probably originally ambiguous, is doubly uncertain in the present doubtful state of the Hebrew text; but the general conclusion was unmistakable:—"Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who now stood before him? The prospect was one which drew forth the tears of the man of God. This man was no rash and imprudent leader, who could be baffled and deceived as Benhadad had so often been. Behind that "steelfast" impenetrable countenance was a steady courage and a persistent resolution, in which Elisha could not but foresee the greatest danger to his country. Here was a man who, give him but the power, would "oppress" and "cut Israel short," would "thresh Gilead with threshing instruments of iron," and "make them like the dust by threshing" as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request Elisha confesses the reason of his tears. But the prospect is one which has no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt is the possibility of such good fortune for one so mean. "But what is thy slave," dog that he is, that he should do this great thing?" To which Elisha replies, "Jehovah hath showed me that thou wilt be king over Syria."

Returning to the king, Hazael tells him only half the dark saying of the man of God—"He told me that thou shouldst surely recover." But that was the last day of Benhadad's life. From whose hand he received his death, or what were the circumstances attending it, whether in the bath as has been recently suggested, we cannot tell. The general inference, in accordance with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear that interpretation; and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse.

14. (ix. 1-10). Two of the injunctions laid on

<sup>p</sup> Josephus, *Ant.* ix. 4, §6.

<sup>q</sup> The A. V., by omitting, as usual, the definite article before "dog," and by its punctuation of the sentence, completely misrepresents the very characteristic turn of the original—given above—and also differs from all the versions. In the Hebrew the word "dog" has the force of *meanness*, in the A. V. of *cruelty*. For a long comment founded on the reading of the A. V., see *II. Blunt*, Lectures on Elisha, p. 222, &c.

<sup>r</sup> The word דָּוָם, A. V. "a thick cloth," has been variously conjectured to be a carpet, a mosquito-net (Michæalis), and a bath-mattress. The last is Ewald's suggestion (iii. 523, note), and, taken in con-

nexion with the "water," and with the inference to be drawn from the article attached to the Hebrew word, is more probable than the others. Abbas Pacha is said to have been murdered in the same manner. As to the person who committed the murder, Ewald justly remarks that as a high officer of state Hazael would have no business in the king's bath. Some suppose that Benhadad killed himself by accident, having laid a wet towel over his face while sleeping. See Kell, *ad loc.*

Elijah had now been carried out; the third still remained. Hazael had begun his attacks on Israel by an attempt to recover the stronghold of Ramoth-Gilead (viii. 28), or Ramah, among the mountains on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance, and though the Syrians had wounded the king of Israel, they had not succeeded in capturing the place (viii. 28, ix. 15). One of the captains of the Israelite army in the garrison was Jehu, the son of Jehoshaphat, the son of Nimshi. At the time his name was mentioned to Elijah on Horeb he must have been but a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidkar he attended Ahab to take possession of the field of Naboth, and the scene of that day and the words of the curse then pronounced no subsequent adventure had been able to efface (ix. 25, 38). The time was now come for the fulfilment of that curse by his being anointed king over Israel. Elisha's personal share in the transaction was confined to giving directions to one of the sons of the prophets, and the detailed consideration of the story will therefore be more fitly deferred to another place. [JENU.]

15. Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his deathbed in his own house (xiii. 14-19). Joash, the grandson of Jehu, is now king, and he is come to weep over the approaching departure of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away—"My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for weeping. One thought fills the mind of both king and prophet. Syria is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is opened towards the hated country, the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shot, "the arrow of Jehovah's deliverance, the arrow of deliverance from Syria," is discharged. This done, the king takes up the bundle of arrows, and at the command of Elisha beats them on the ground. But he does it with no energy, and the successes of Israel, which might have been so prolonged as completely to destroy the foe, are limited to three victories.

16. (xiii. 20-23). The power of the prophet, however, does not terminate with his death. Even

in connexion with the "water," and with the inference to be drawn from the article attached to the Hebrew word, is more probable than the others. Abbas Pacha is said to have been murdered in the same manner.

As to the person who committed the murder, Ewald justly remarks that as a high officer of state Hazael would have no business in the king's bath. Some suppose that Benhadad killed himself by accident, having laid a wet towel over his face while sleeping. See Kell, *ad loc.*

<sup>s</sup> The connexion and the contrast between Elisha and Jehu are well brought out by Maurice (*Prophets and Kings*, serm. ix.).

in the tomb<sup>1</sup> he restores the dead to life. Moab had recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 K. iii.), and her marauding bands had begun again the work of depredation which Syria so long pursued (2 K. v. 2, vi. 23). The text perhaps infers that the spring—that is, when the early crops were ripening—was the usual period for these attacks; but, be this as it may, on the present occasion they invaded the land “at the coming in of the year.” A man was being buried in the cemetery which contained the sepulchre of Elisha. Seeing the Moabite spoilers in the distance, the friends of the dead man hastened to conceal his corpse in the nearest hiding-place. They chose—whether by design or by accident is not said—the tomb of the prophet, and as the body was pushed<sup>2</sup> into the cell, which formed the receptacle for the corpse in Jewish tombs, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his lifetime had cost Elisha both prayers and exertions—the man “revived and stood up on his feet.” Other miracles of the prophet foreshadow, as we have remarked, the acts of power and goodness of our Saviour, but this may be rather said to recall the marvels of a later period—of the early ages of the Christian Church. It is in the story of SS. Gervasius and Protasius,<sup>3</sup> and not in any occurrence in the life of our Lord or of the Apostles, that we must look for a parallel to the last recorded miracle of Elisha.

Before closing this account of Elisha we must not omit to notice the parallel which he presents to our Lord—the more necessary because, unlike the resemblance between Elijah and John the Baptist, no attention is called to it in the New Testament. Some features of this likeness have already been spoken of.<sup>7</sup> But it is not merely because he healed a leper, raised a dead man, or increased the loaves, that Elisha resembled Christ, but rather because of that loving gentle temper and kindness of disposition—characteristic of him above all the saints of the O. T.—ever ready to soothe, to heal, and to conciliate, which attracted to him women and simple people, and made him the universal friend and “father,” not only consulted by kings and generals, but resorted to by widows and poor prophets in their little troubles and perplexities. We have spoken above of the fragmentary nature of the records of Elisha, and of the partial conception of his work as a prophet which they evince. Be it so. For that very reason we should the more gladly welcome those engaging traits of personal goodness which are so often to be found even in those fragments, and which give us a reflection, feeble it is true, but still a reflection, in the midst of the sternness of the Old dispensation, of the love and mercy of the New.

Elisha is canonized in the Greek Church; his day is the 14th June. Under that date his life, and a collection of the few traditions concerning him—few

<sup>1</sup> Josephus says that Elisha had a magnificent funeral (*ταφὴς μεγαλοπρεποῦς*, *Ant.* ix. 8, §6). Is this implied in the expression (xiii. 20), “they buried him”? The rich man in the Gospel is also particularly said to have been “buried” (Luke xvi. 22) i. e. probably in a style befitting his rank.

<sup>2</sup> The expression of the A. V. “let down” is founded on a wrong conception of the nature of an Eastern sepulchre, which is excavated in the vertical face of a rock, so as to be entered by a door; not sunk below the

indeed when compared with those of Elijah—will be found in the *Acta Sanctorum*. In the time of Jerome a “mausoleum” containing his remains was shown at Samaria (Reland, 980). Under Julian the bones of Elisha were taken from their receptacle and burnt. But notwithstanding this his relics are heard of subsequently, and the church of S. Apollinaris at Ravenna still boasts of possessing his head. The Carmelites have a special service in honour of Elisha. [G.]

ELI'SHAH (עִלְיָשָׁה; 'Ελισά, 'Ελίσαι; Joseph. 'Ελισᾶς; *Elisa*), the eldest son of Javan (*Gen.* x. 4). The residence of his descendants is described in *Ex.* xxvii. 7, as the “isles of Elisha” (דִּישָׁן = *maritime regions*), whence the Phoenicians obtained their purple and blue dyes. Josephus identified the race of Elishah with the Æolians ('Ελισᾶς μὲν 'Ελίσαιος ἐκάλειεν, ὃν ἄρχεν, Αἰολεῖς δὲ νῦν εἰσὶν, *Ant.* i. 6, §1). His view is adopted by Knobel (*Völkertafel*, pp. 81 ff.) in preference to the more generally received opinion that Elisha = Elis, and in a more extended sense Peloponnesus, or even Hellas. It certainly appears correct to treat it as the designation of a *race* rather than of a locality; and if Javan represents the Ionians, then Elisha the Æolians, whose name presents considerable similarity (Αἰολεῖς having possibly been Αἰλεῖς), and whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the Æolians were settled in various parts of Greece, Thessaly, Boeotia, Actolia, Locris, Elis, and Messenia: from Greece they emigrated to Asia Minor, and in Ezekiel's age occupied the maritime district in the N.W. of that country, named after them Æolis, together with the islands Lesbos and Tenedos. The purple shell-fish was found on this coast, especially at Abydos (*Virg. Georg.* i. 207), Phœnea (*Ovid. Metam.* vi. 9), Sigeum and Lectum (Athenæus, iii. p. 88). Not much, however, can be deduced from this as to the position of the “isles of Elishah,” as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Laconia (*Pausan.* iii. 21, §6). [W. L. B.]

ELISH'AMA (עִלְיָשָׁא; 'Ελισάμα, 'Ελισαμαί, 'Ελίσασ, κτλ.), the name of several men.

1. Son of Ammihud, the “prince” or “captain” (both עִלְיָשָׁא) of the tribe of Ephraim in the Wilderness of Sinai (*Num.* i. 10, ii. 18, vii. 48, x. 22). From the genealogy preserved in 1 Chr. vii. 26, we find that he was grandfather to the great Joshua.

2. A son of King David. One of the thirteen, or, according to the record of Samuel, the eleven, sons born to him of his wives after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8, xiv. 7).

3. ('Ελίσά). By this name is also given (in the Heb. text) in 1 Chr. iii. 6, another son of

surface of the ground like our graves. The Hebrew word עָלַי is simply “went,” as in the margin.

<sup>7</sup> Augustine's *Confessions* (ix. §16).

<sup>8</sup> These resemblances are drawn out, with great beauty, but in some instances rather fancifully, by J. H. Newman (*Sermons on Subj. of the Day*, Elisha a Type of Christ, &c.). See also Rev. Isaac Williams (*Old Test. Characters*).

the same family, who in the other lists is called ELISHUA.

4. A descendant of Judah; the son of Jekamiah (1 Chr. ii. 41). In the Jewish traditions preserved by Jerome (*Qu. Hebr.* on 1 Chr. ii. 41), he appears to be identified with

5. The father of Nethaniah and grandfather of Ishmael "of the seed royal," who lived at the time of the great captivity (2 K. xiv. 25; Jer. xli. 1).

6. Scribe to King Jehoiakim (Jer. xxxvi. 12, 20, 21).

7. A priest in the time of Jehoshaphat, one of the party sent by that king through the cities of Judah, with the book of the law, to teach the people (2 Chr. xvii. 8).

**ELISHAPHAT** (עֲלִישָׁפָת; ὁ Ελισαφάν, Alex. 'Ελισαφάτ; *Elisaphat*), son of Zichri; one of the "captains of hundreds," whom Jehoiada the priest employed to collect the Levites and other principal people to Jerusalem before bringing forward Josiah (2 Chr. xxiii. 1).

**ELISHEBA** (עֲלִישֶׁבָּה; 'Ελισαβέθ; *Elisabeth*), the wife of Amnon (Ex. vi. 23). She was the daughter of Amminadab, and sister of Nalshon the captain of the host of Judah (Num. ii. 3), and her marriage to Aaron thus united the royal and priestly tribes. [W. A. W.]

**ELISHUA** (עֲלִישֻׁא; 'Ελισούε, 'Ελισά, Alex. 'Ελισαύ; *Elisua*), one of David's family by his later wives; born after his settlement in Jerusalem (2 Sam. v. 15; 1 Chr. xiv. 5). In the list of 1 Chr. iii. 6, the name is given with a slight difference as ELISHAMA.

**ELISIMUS** ('Ελίσσιμος; *Lisimus*), 1 Esd. ix. 28. [ELIASHUB.]

**ELI'U** (Ἠλιοῦ = Hebr. *Elilu*), one of the forefathers of Judith (Jud. viii. 1), and therefore of the tribe of Simeon.

**ELI'UD** (Ἠλιοὺδ, from the Heb. *Elilu*), which however does not occur, *God of the Jews*, son of Achin in the genealogy of Christ (Matt. i. 15), four generations above Joseph. His name is of the same formation as Abiud, and is probably an indication of descent from him. [A. C. H.]

**ELIZAPHIAN** (Ἠλισταφάν; 'Ελισαφάν; *Elisaphan*). 1. A Levite, son of Uzziel, chief of the house of the Kohathites at the time of the census in the Wilderness of Sinai (Num. iii. 30). His family was known and represented in the days of King David (1 Chr. xv. 8), and took part in the revivals of Hezekiah (2 Chr. xxix. 13). His name is also found in the contracted form of ELIZAPHIAN.

2. Son of Parnach; "prince" (נָשִׂיךְ) of the tribe of Zebulun, one of the men appointed to assist Moses in apportioning the land of Canaan (Num. xxxiv. 25).

**ELI'ZUR** (עֲלִיזֹר; 'Ελισόρ; *Elisur*), son of Shedeir; "prince" (נָשִׂיךְ) of the tribe, and over the host of Reuben, at the time of the census in the Wilderness of Sinai (Num. i. 5, ii. 10, vii. 30, 35, x. 18).

**ELKANAH** (עֲלִקָנָה; Ἐλκανά; *Elcana*). 1. Son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Ex. vi. 24, where his brothers are represented as being Assir

and Abinaph. But in 1 Chr. vi. 22, 23 (Hebr. 7, 8) Assir, Elkanah, and Eliassaph are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson, respectively; and this seems to be undoubtedly correct. If so, the passage in Exodus must be understood as merely giving the families of the Korhites existing at the time the passage was penned, which must, in this case, have been long subsequent to Moses. In Num. xxvi. 58, "the family of the Korhites" (A. V. "Korathites") is mentioned as one family. As regards the fact of Korah's descendants continuing, it may be noticed that we are expressly told in Num. xxvi. 11, that when Korah and his company died, "the children of Korah died not."

2. A descendant of the above in the line of Ahimoth, otherwise Mahath, 1 Chr. vi. 26, 35 (Hebr. 11, 20). (See Hervey, *Genealogies*, 210, 214, *note*.)

3. Another Kohathite Levite, in the line of Heman the singer. He was son of Jeroham, and father of Samuel the illustrious Judge and Prophet (1 Chr. vi. 27, 34). All that is known of him is contained in the above notices and in 1 Sam. i. 1, 4, 8, 19, 21, 23, and ii. 2, 20, where we learn that he lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramah; that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We learn also that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man who went up yearly from Ramathaim-Zophim to Shiloh, in the tribe of Ephraim, to worship and sacrifice at the tabernacle there; but it does not appear that he performed any sacred functions as a Levite; a circumstance quite in accordance with the account which ascribes to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks made when Samuel was brought to the House of the Lord at Shiloh. After the birth of Samuel, Elkanah and Hannah continued to live at Ramah (where Samuel afterwards had his house, 1 Sam. vii. 7), and had three sons and two daughters. This closes all that we know about Elkanah.

4. A Levite (1 Chr. ix. 16).

5. Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chr. xii. 6). From the terms of ver. 2 it is doubtful whether this can be the well-known Levitical family of Korhites. Perhaps the same who afterwards was one of the doorkeepers for the ark, xv. 23.

6. An officer in the household of Ahaz, king of Judah, who was slain by Zichri the Ephraimite, when Pekah invaded Judah. He seems to have been the second in command under the prefect of the palace (2 Chr. xxviii. 7). [A. C. H.]

**ELKOSH** (עֲלִקֹשׁ), the birthplace of the prophet Nahum, hence called "the Elkoshite," Nah. i. 1 (ὁ Ἐλκωσιώτης; *Elcosenus*). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. The ruins of some old buildings were pointed out to this father by his guide as the remains of the ancient Elkosh (Jerome, *on Nah.* i. 1). Cyril of Alexandria (*Comm. on Nahum*) says that the

village of Elkosh was somewhere or other in the country of the Jews. Pseudo Epiphanius (*de Vitis prophetarum*, Op. ii. 247) places Elkosh on the east of the Jordan, at Bethnabar (*ἐἰς Βηθαβάρ*, *Chron. Pasch.* p. 150, Cod. B. has *ἐἰς Βηθαβαρὴν*), where he says the prophet died in peace. According to Schwartz (*Descr. of Palestine*, p. 188), the grave of Nahum is shown at *Kefr Tinchum*, a village 2½ English miles north of Tiberias. But mediaeval tradition, perhaps for the convenience of the Babylonian Jews, attached the fame of the prophet's burial place to Alkush, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about two miles north of Mosul. Benjamin of Tudela (p. 53, ed. Asher) speaks of the synagogues of Nahum, Obadiah, and Jonah at Asshur, the modern *Mosul*. R. Petachia (p. 35, ed. Benisch) was shown the prophet's grave, at a distance of four parasangs from that of Baruch, the son of Nariah, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Asseman (*Bibl. Orient.* i. 525). Jews from the surrounding districts make a pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shiel, who visited it in his journey through Kurdistan (*Journ. Geog. Soc.* viii. 93). Rich evidently believed in the correctness of the tradition, considering the pilgrimage of the Jews as almost sufficient test (*Kurdistan*, i. 101). The tradition which assigns Elkosh to Galilee is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria. [W. A. W.]

EL'LASAR (עֲלָסָר; 'Ελλάσαρ; *Pontus*) has been considered the same place with the Thelassar (תֵּלֶסָר) of 2 K. xix. 12, but this is very improbable. Ellasar—the city of Arioch (Gen. xiv. 1)—seems to be the Hebrew representative of the old Chaldean town called in the native dialect *Larsa* or *Larancha*, and known to the Greeks as *Larissa* (Λάρισσα) or *Larachôn* (Λαράχων). This emplacement suits the connexion with Elam and Shinar (Gen. xiv. 1); and the identification is orthographically defensible, whereas the other is not. *Larsa* was a town of Lower Babylonia or Chaldaea, situated nearly half-way between Ur (*Mugheir*) and Erech (*Warka*), on the left bank of the Euphrates. It is now *Senkerah*. The inscriptions show it to have been one of the primitive capitals—of earlier date, probably, than Babylon itself; and we may gather from the narrative in Gen. xiv. that in the time of Abraham it was the metropolis of a kingdom distinct from that of Shinar, but owing allegiance to the superior monarchy of Elam. That we hear no more of it after this time is owing to its absorption into Babylon, which took place soon afterwards. [G. R.]

ELM (עֵלֶם). Only once rendered *elms* in Hos. iv. 13. See OAK.

ELMO'DAM ('Ελωμόδαμ, or 'Ελωμάδαμ, apparently the same as the Heb. עֲמֹדָם, Gen. x. 26; 'Ελωμόδαμ, LXX.), son of Er, six generations above Zerubbabel, in the genealogy of Joseph (Luke iii. 28). [ALMO'DAD.] [A. C. H.]

EL'NAAM (עֲנָאִם; 'Ελλαδάμ, Alex. 'Ελανάμ; *Elnaem*), the father of Jeribai and Joshaviah, two of David's guard, according to the extended list in 1 Chr. xi. 46. In the LXX, the second

warrior is said to be the son of the first, and Elnaam is given as himself a member of the guard.

ELNATHAN (עֲלִנָּתָן; 'Ελνασθάν, 'Ιωνάθαν, *Ndhan*; *Elnathan*). 1. The maternal grandfather of Jehoiachin, distinguished as "E. of Jerusalem" (2 K. xxiv. 8). He is doubtless the same man with "Elnathan the son of Achbor," one of the leading men in Jerusalem in Jehoiakim's reign (Jer. xxvi. 22, xxxvi. 12, 25). The variations in the LXX. arise from the names Elnathan, Jonathan, and Nathan having the same sense, *God's gift* (Theodore). 2. The name of three persons, apparently Levites, in the time of Ezra (Ezr. viii. 16). In 1 Esdr. they are corrupted to ALNATHAN, and EUNATAN. [W. L. B.]

EL'ON, 1. (עֵלֹן; 'Ελών, *Alalóm*, Alex. 'Ελώμ; *Elon*), a Hittite, whose daughter was one of Esau's wives (Gen. xxvi. 34, xxxvi. 2). For the variation in the name of his daughter, see BASHEMATH.

2. (עֵלֹן; 'Αλλάων, Alex. 'Ασρών; *Elon*), the second of the three sons attributed to Zebulun (Gen. xli. 14; Num. xxvi. 26); and the founder of the family (תַּרְבִּיטִי) of the ELONITES (עֲלֹנִיתִים). From this tribe came

3. *Elon* the (not "a") Zebulonite (עֵלֹן; *Alalóm*; Joseph. 'Ηλων; *Ahalion*), who judged Israel for ten years, and was buried in Ajalon in Zebulun (Judg. xii. 11, 12). The names "Elon" and "Ajalon" in Hebrew, are composed of precisely the same letters, and differ only in the vowel points, so that the place of *Elon's* burial may have been originally called after him. It will be remarked that the Vulgate does assimilate the two.

ELON (עֵלֹן; 'Ελών; *Elon*), one of the towns in the border of the tribe of Dan (Josh. xix. 43). To judge from the order of the list, its situation must have been between Ajalon (*Yálo*), and Ekron (*Áktr*); but no town corresponding in name has yet been discovered. The name in Hebrew signifies a great oak or other strong tree, and may therefore be a testimony to the wooded character of the district. It is possibly the same place as

EL'ON-BETH'-HANAN (עֵלֹן-בֵּית-חָנָן = "oak of the house of grace;" 'Ελών τῶς Βηθανάν, Alex. *Alalóm* & B.), which is named with two Danite towns as forming one of Solomon's commissariat districts (1 K. iv. 9). For "Beth-hanan" some Hebrew MSS. have "Ben-hanan," and some "and Beth-hanan;" the latter is followed by the Vulgate. [G.]

ELONITES, THE. Num. xxvi. 26. [ELON, 2.] ELOTH. 1 K. ix. 26; 2 Chr. viii. 17; xxvi. 2. [ELATH.]

EL'PAAL (עֲלֵפָאֵל; 'Αλφαάλ; *Elphaal*), a Benjaminite, son of Hushim and brother of Abitub (1 Chr. viii. 11). He was the founder of a numerous family. The Bene-Elpaal appear to have lived in the neighbourhood of Lydda (*Lod*), and on the outposts of the Benjamite hills as far as Ajalon (*Yálo*) (viii. 12-18), near the Danite frontier. Hushim was the name of the principal Danite family. If the forefather of Elpaal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

EL'PALET (עֲלֵפָאֵל; 'Ελφαλάθ; *Eliphalet*), one of David's sons born in Jerusalem (1 Chr.

xiv. 5). In the parallel list, 1 Chr. iii. 6, the name is given more fully as ELIPHELET.

EL'TEKEH (עֶלְתֶּכֶּה; Ἀλκαθᾶ, and ἡ Ἐλκαθαίμ, Alex. Ἐλθεκᾶ; *Elthece*), one of the cities in the border of Dan (Josh. xix. 44), which with its "suburbs" (עֲרֻבֵּי) was allotted to the Kohathite Levites (xvi. 23). It is however omitted from the parallel list of 1 Chr. vi. No trace of the name has yet been discovered. [G.]

EL'TEKON (עֶלְתֶּקֶן; Θέκουμ, Alex. Ἐλθεκέν, *Eltecon*), one of the towns of the tribe of Judah, in the mountains (Josh. xv. 59). From its mention in company with HALHUL and BETH-ZUR, it was probably about the middle of the country of Judah, 3 or 4 miles north of Hebron; but it has not yet been identified. [G.]

EL'TOLAD (עֶלְתֹּלַד; Ἐλθωλᾶδ and Ἐρθωλᾶ, Alex. Ἐλθωλᾶδ and Ἐλθωλᾶδ; *Eltholaf*), one of the cities in the south of Judah (Josh. xv. 30) allotted to Simeon (Josh. xix. 4); and in possession of that tribe until the time of David (1 Chr. iv. 29). It is named with Beersheba and other places which we know to have been in the extreme south, on the border of the country; but it has not yet been identified. In the passage of Chronicles above quoted, the name is given as TOLAD. [G.]

EL'UL (עֶלּוּל; δ' Ἐλῶλ, *Elul*), Neh. vi. 15; 1 Macc. xiv. 27. [MONTHS.]

EL'UZAI (עֶלְיָזַי; Ἀΐζαί, Alex. Ἐλῳζί; *Eluzai*), one of the warriors of Benjamin, who joined David at Ziklag while he was being pursued by Saul (1 Chr. xii. 5).

ELYMAE'ANS (Ἐλυμαῖος), Jud. i. 6. [ELYMITES.]

ELYMAS (Ἐλῡμας), the Arabic name of the Jewish mage or sorcerer Barjesus, who had attached himself to the proconsul of Cyprus, Sergius Paulus, when St. Paul visited the island (Acts xiii. 6 ff.). On his attempting to dissuade the proconsul from embracing the Christian faith, he was struck with miraculous blindness by the Apostle. The name Elymas, "the wise man," is from the same root as the Arabic "Ulema." On the practice generally then prevailing, in the decay of faith, of consulting Oriental impostors of this kind, see Conybeare and Howson, *Life of St. Paul*, i. 177-180, 2nd ed. [H. A.]

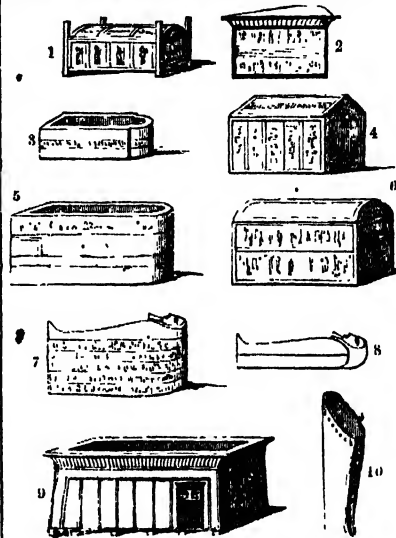

EL'ZABAD (עֶלְזָבָד; Ἐλῑζᾶβῆρ, Ἐλζαβᾶδ, Alex. Ἐλζαβᾶδ; *Elzabad*). 1. The ninth of the eleven Gadite heroes who came across the Jordan to David when he was in distress in the wilderness of Judah (1 Chr. xii. 12).

2. A Korhite Levite, son of Shemaiah and of the family of Obed-edom; one of the doorkeepers of the "house of Jehovah" (1 Chr. xxvi. 7).

EL'ZAPHAN (עֶלְזָפָן; Ἐλῑζαφᾶν; *Elzaphan*), second son of Uzziel, who was the son of Kohath son of Levi (Ex. vi. 22). He was thus cousin to Moses and Aaron, as is distinctly stated. Elzaphan assisted his brother Mithael to carry the unhappy Nadab and Abihu in their priestly tunics out of the camp (Lev. x. 4). The name is a contracted form of ELIZAPHAN, in which it most frequently occurs.

EMBALMING, the process by which dead bodies are preserved from putrefaction and decay.

The Hebrew word מִןחַ (chánat), employed to denote this process, is connected with the Arabic *hina*, which in conj. 1 signifies "to be red," as leather which has been tanned; and in conj. 2, "to preserve with spices." In the 1st and 4th conjugations it is applied to the ripening of fruit, and this meaning has been assigned to the Hebrew root in Cant. ii. 13. In the latter passage, however, it probably denotes the fragrant smell of the ripening figs. The word is found in the Chaldee and Syriac dialects, and in the latter *chánatto* is the equivalent of *μύγμα*, the confection of myrrh and aloes brought by Nicodemus (John xix. 39).

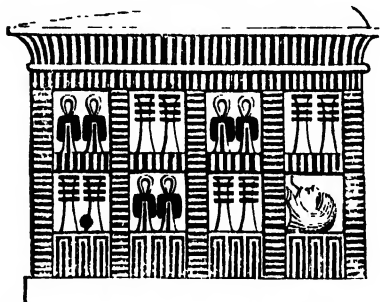

Different forms of mummy cases. (Wilkinson.)  
1, 2, 4. Of wood. 5, 6, 7, 8. Of stone.  
9. Of wood, and of early time—before the 18th dynasty.  
10. Of burnt earthenware.

The practice of embalming was most general among the Egyptians, and it is in connexion with this people that the two instances which we meet with in the O. T. are mentioned (Gen. i. 2, 26). Of the Egyptian method of embalming there remain two minute accounts, which have a general kind of agreement, though they differ in details.

Herodotus (ii. 86-89) describes three modes, varying in completeness and expense, and practised by persons regularly trained to the profession, who were initiated into the mysteries of the art by their ancestors. The most costly mode, which is estimated by Diodorus Siculus (i. 91) at a talent of silver, was said by the Egyptian priests to belong to him whose name in such a matter it was not lawful to mention, viz. Osiris. The embalmers first removed part of the brain through the nostrils, by means of a crooked iron, and destroyed the rest by injecting caustic drugs. An incision was then made along the flank with a sharp Ethiopian stone, and the whole of the intestines removed. The cavity was rinsed out with palm-wine, and afterwards scoured with pounded perfumes. It was then filled with pure myrrh pounded, cassia, and other aromatics, except frank-

incense. This done, the body was sewn up and steeped in natron for seventy days. When the seventy days were accomplished, the embalmers washed the corpse and swathed it in bands of linen, cut in strips and smeared with gum. They then gave it up to the relatives of the deceased, who provided for it a wooden case, made in the shape of a man, in which the dead was placed, and deposited in an erect position against the wall of the sepulchral chamber. Diodorus Siculus gives some particulars of the process which are omitted by Herodotus. When the body was laid out on the ground for the purpose of embalming, one of the operators, called the scribe (*γραμματεὺς*), marked out the part of the left flank where the incision was to be made. The dissector (*ραπαρχιτρὴς*) then, with a sharp Ethiopian stone (black flint, or Ethiopian agate, Rawlinson, *Herod.* ii. 141), hastily cut through as much flesh as the law enjoined, and fled, pursued by curses and volleys of stones from the spectators. When all the embalmers (*ραπίχευται*) were assembled, one of them extracted the intestines, with the exception of the heart and kidneys; another cleansed them one by one, and rinsed them in palm-wine and perfumes. The body was then washed with oil of cedar, and other things worthy of notice, for more than thirty days (according to some MSS. forty), and afterwards sprinkled with myrrh, cinnamon, and other substances, which possess the property not only of preserving the body for a long period, but also of communicating to it an agreeable smell. This process was so effectual that the features of the dead could be recognised. It is remarkable that Diodorus omits all mention of the steeping in natron.

The mummy's head, seen at an open panel of the coffin. (Wilkinson.)

The second mode of embalming cost about 20 minae. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in natron for the appointed number of days. On the last day the oil was withdrawn, and carried off with it the stomach and intestines in a state of solution, while the flesh was consumed by the natron, and nothing was left but the skin and bones. The body in this state was returned to the relatives of the deceased.

The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out the intestines with syrmene, an infusion of senna and cassia (Pettigrew, p. 69), and steeping the body for the usual number of days in natron.

Porphyry (*De Abst.* iv. 10) supplies an omission of Herodotus, who neglects to mention what was

done with the intestines after they were removed from the body. In the case of a person of respectable rank they were placed in a separate vessel and thrown into the river. This account is confirmed by Plutarch (*Sept. Sup. Conv.* c. 16).

Although the three modes of embalming are so precisely described by Herodotus, it has been found impossible to classify the mummies which have been discovered and examined under one or other of these three heads. Dr. Pettigrew, from his own observations, confirms the truth of Herodotus' statement that the brain was removed through the nostrils. But in many instances, in which the body was carefully preserved and elaborately ornamented, the brain had not been removed at all; while in some mummies the cavity was found to be filled with resinous and bituminous matter.

M. Rouyer, in his *Notice sur les Embaumements des Anciens Egyptiens*, quoted by Pettigrew, endeavoured to class the mummies which he examined under two principal divisions, which were again subdivided into others. These were—I. Mummies with the ventral incision, preserved, 1. by balsamic matter, and 2. by natron. The first of these are filled with a mixture of resin and aromatics, and are of an olive colour—the skin dry, flexible, and adhering to the bones. Others are filled with bitumen or asphaltum, and are black, the skin hard and shining. Those prepared with natron are also filled with resinous substances and bitumen. II. Mummies without the ventral incision. This class is again subdivided, according as the bodies were, 1. salted and filled with pissasphaltum, a compound of asphaltum and common pitch; or 2. salted only. The former are supposed to have been immersed in the pitch when in a liquid state.

The medicaments employed in embalming were various. From a chemical analysis of the substances found in mummies, M. Rouelle detected three modes of embalming—1. with asphaltum, or Jew's pitch, called also *funeral gum*, or *gum of mummies*; 2. with a mixture of asphaltum and cedar, the liquor distilled from the cedar; 3. with this mixture together with some resinous and aromatic ingredients. The powdered aromatics mentioned by Herodotus were not mixed with the bituminous matter, but sprinkled into the cavities of the body.

It does not appear that embalming, properly so called, was practised by the Hebrews. Asa was laid "in the bed which was filled with sweet odours and divers kinds of spices prepared by the apothecaries' art" (2 Chr. xvi. 14); and by the tender care of Nicodemus the body of Jesus was wrapped in linen cloths, with spices, "a mixture of myrrh and aloes, about an hundred pound weight . . . as the manner of the Jews is to bury" (John xix. 39, 40).

The account given by Herodotus has been supposed to throw discredit upon the narrative in Genesis. He asserts that the body is steeped in natron for seventy days, while in Gen. i. 3 it is said that only forty days were occupied in the whole process of embalming, although the period of mourning extended over seventy days. Diodorus, on the contrary, omits altogether the steeping in natron as a part of the operation, and though the time which, according to him, is taken up in washing the body with cedar oil and other aromatics is more than thirty days, yet this is evidently only a portion of the whole time occupied in the complete process. Hengstenberg (*Egypt and the Books of Moses*,

p. 69, Eng. tr.) attempts to reconcile this discrepancy by supposing that the seventy days of Herodotus include the whole time of embalming, and not that of steeping in natron only. But the differences in detail which characterize the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points with the results of scientific observation, lead to the natural conclusion that, if these descriptions be correct in themselves, they do not include every method of embalming which was practised, and that, consequently, any discrepancies between them and the Bible narrative cannot be fairly attributed to a want of accuracy in the latter. In taking this view of the case it is needless to refer to the great interval of time which elapsed between the date claimed for the events of Genesis and the age of Herodotus, or between the latter and the times of Diodorus. If the four centuries which separated the two Greek historians were sufficient to have caused such changes in the mode of embalming as are indicated in their different descriptions of the process, it is not unreasonable to conclude that the still greater interval by which the celebration of the funeral obsequies of the patriarch preceded the age of the father of history might have produced changes still greater both in kind and in degree.

It is uncertain what suggested to the Egyptians the idea of embalming. That they practised it in accordance with their peculiar doctrine of the transmigration of souls we are told by Herodotus. The actual process is said to have been derived from "their first merely burying in the sand, impregnated with natron and other salts, which dried and preserved the body" (Rawlinson, *Herod.* ii. p. 142). Drugs and bitumen were of later introduction, the latter not being generally employed before the 18th dynasty. When the practice ceased entirely is uncertain.

The subject of embalming is most fully discussed, and the sources of practical information well nigh exhausted, in Dr. Pettigrew's *History of Egyptian Mummies*. [W. A. W.]

**EMBROIDERER.** This term is given in the A. V. as the equivalent of *rokem* (רֹקֵם), the productions of the art being described as "needle-work" (רִקְמָה). In Exodus the embroiderer is contrasted with the "cunning workman," *chosheh* (חֹשֶׁה): and the consideration of one of these terms involves that of the other. Various explanations have been offered as to the distinction between them, but most of these overlook the distinction marked in the Bible itself, viz., that the *rokem* wove simply a variegated texture, without gold thread or figures, and that the *chosheh* interwove gold thread or figures into the variegated texture. We conceive that the use of the gold thread was for delineating figures, as is implied in the description of the corslet of Amasis (Her. iii. 47), and that the notices of gold thread in some instances and of figures in others were but different methods of describing the same thing. It follows, then, that the application of the term "embroiderer" to *rokem* is false; if it belongs to either it is to *chosheh*, or the "cunning workman," who added the figures. But if "embroidery" be strictly confined to the work of the needle, we doubt whether it can be applied to either, for the simple addition of gold thread, or of a figure, does not involve the use of the needle. The patterns may have been worked into the stuff

by the loom, as appears to have been the case in Egypt (Wilkinson, iii. 128; cf. Her. *loc. cit.*), where the Hebrews learned the art, and as is stated by Josephus (*ὡς ἐν ἑβραίωνται*, Ant. iii. 7, §2). The distinction, as given by the Talmudists, and which has been adopted by Gesenius (*Thesaur.* p. 1311) and Bähr (*Symbolik*, i. 266) is this—that *rikmah*, or "needlework," was where a pattern was attached to the stuff by being sewn on to it on one side, and the work of the *chosheh* when the pattern was worked into the stuff by the loom, and so appeared on both sides. This view appears to be entirely inconsistent with the statements of the Bible, and with the sense of the word *rikmah* elsewhere. The absence of the figure or the gold thread in the one, and its presence in the other, constitutes the essence of the distinction. In support of this view we call attention to the passages in which the expressions are contrasted. *Rikmah* consisted of the following materials, "blue, purple, scarlet, and fine twined linen" (Ex. xxvi. 36, xxvii. 16, xxxvi. 37, xxxviii. 18, xxxix. 29). The work of the *chosheh* was either "fine twined linen, blue, purple, and scarlet, with cherubims" (Ex. xxvi. 1, 31; xxxvi. 8, 35), or "gold, blue, purple, scarlet, and fine twined linen" (xxviii. 6, 8, 15, xxxix. 2, 5, 8). Again, looking at the general sense of the words, we shall find that *chosheh* involves the idea of invention, or designing patterns; *rikmah* the idea of texture as well as variegated colour. The former is applied to other arts which demanded the exercise of inventive genius, as in the construction of engines of war (2 Chr. xxvi. 15); the latter is applied to other substances, the texture of which is remarkable, as the human body (Isa. cxxxix. 15). Further than this, *rikmah* involves the idea of a regular disposition of colours, which demanded no inventive genius. Beyond the instances already adduced it is applied to tessellated pavement (1 Chr. xxix. 2), to the eagle's plumage (Ex. xvii. 3), and, in the Targums, to the leopard's spotted skin (Jer. xlii. 23). In the same sense it is applied to the coloured sails of the Egyptian vessels (Ex. xxvii. 16), which were either chequered or worked according to a regularly recurring pattern (Wilkinson, iii. 211). Gesenius considers this passage as conclusive for his view of the distinction, but it is hardly conceivable that the patterns were on one side of the sail only, nor does there appear any ground to infer a departure from the usual custom of working the colours by the loom. The ancient versions do not contribute much to the elucidation of the point. The LXX. varies between *ποικιλτής* and *ραβιδευτής*, as representing *rokem*, and *ποικιλτής* and *ὀφάρτης* for *chosheh*, combining the two terms in each case for the work itself, ἡ ποικιλία τοῦ ραβιδευτοῦ for the first, ἔργον ὀφάρτην ποικιλτόν for the second. The distinction, as far as it is observed, consisted in the one being needle-work and the other loom-work. The Vulgate gives generally *plumarius* for the first, and *polymitaris* for the second; but in Ex. xxvi. 1, 31, *plumarius* is used for the second. The first of these terms (*plumarius*) is well chosen to express *rokem*, but *polymitaris*, i. e. a weaver who works together threads of divers colours, is as applicable to one as to the other. The rendering in Ex. xxvii. 16, *scutulata*, i. e. "chequered," correctly describes one of the productions of the *rokem*. We have lastly to notice the incorrect rendering of the word רֹקֵם in the A. V.—"broider," "embroider" (Ex.

xxviii. 4, 39'. It means stuff worked in a *tessellated* manner, i. e. with square cavities such as stones might be set in (comp. ver. 20). The art of embroidery by the loom was extensively practised among the nations of antiquity. In addition to the Egyptians, the Babylonians were celebrated for it, but embroidery in the proper sense of the term, i. e. with the needle, was a Phrygian invention of later date (Plin. viii. 48). [W. L. B.]

**EMERALD** (הַיָּסָד; LXX., ἀσπαρξ; N. T. and Apoc., σμαραγδός), a precious stone, first in the 2nd row on the breastplate of the high-priest (Ex. xxviii. 18, xxvii. 11), imported to Tyre from Syria (Ex. xxvii. 16), used as a seal or signet (Ecclus. xxxii. 6), as an ornament of clothing and bedding (Ex. xxviii. 13; Jud. x. 21), and spoken of as one of the foundations of Jerusalem (Rev. xxi. 19; Tob. xiii. 16). The rainbow round the throne is compared to emerald in Rev. iv. 3, ὁμοίως ὁράσει σμαραγδίνην.

The etymology of הַיָּסָד is uncertain. Gesenius suggests a comparison with the word פָּחַד, a paint with which the Hebrew women stained their eye-lashes. Kalisch on Exodus xxviii. follows the LXX., and translates it *carbuncle*, transferring the meaning *emerald* to יָסָד in the same ver. 18. The Targum Jerusalem on the same ver. explains הַיָּסָד by כַּרְכַּנָּא = *carbodonius, carbuncle*. [W. D.]

**EMERODS** (עֲפָלִים; מַחֲזִוִּים; ἔμροα; ἄμνος, nates; Dr it. xxviii. 27; 1 Sam. v. 6, 9, 12, vi. 4, 5, 11). The probabilities as to the nature of the disease are mainly dependent on the probable roots of these two Hebrew words; the former of which evidently means "a swelling"; the latter, though less certain, is most probably from a Syriac verb,

ܐܡܠܓ, meaning "*anhelavit sub onere, enixus est in exonerando ventre*" (Pakhurst and Gesenius); and

the Syriac noun ܐܡܠܓ from the same root, denotes, 1. such effort as the verb implies, and, 2. the *intestinum rectum*. Also, whenever the former word occurs in the Hebrew *Cetib*, the *Keri* gives the latter, except in 1 Sam. vi. 11, where the latter stands in the *Cetib*. Now this last passage speaks of the images of the emerods after they were actually made, and placed in the ark. It thus appears probable that the former word means the disease, and the latter the part affected, which must necessarily have been included in the actually existing image, and have struck the eye as the *essential* thing represented, to which the disease was an incident. As some morbid swelling, then, seems the most probable nature of the disease, so no more probable conjecture has been advanced than that *hemorrhoidal tumours*, or bleeding piles, known to the Romans as *mariscæ* (Juv. ii. 18), are intended. These are very common in Syria at present, oriental habits of want of exercise and improper food, producing derangement of the liver, constipation, &c., being such as to cause

them. The words of 1 Sam. v. 12, "the men that died not were smitten with emerods," show that the disease was not necessarily fatal. It is clear from its parallelism with "botch," and other diseases in Deut. xviii. 27, that עֲפָלִים is a disease, not a part of the body; but the translations of it by the most approved authorities are various and vague.\* Thus the LXX. and Vulg., as above, uniformly render the word as bearing the latter sense. The mention by Herodotus (i. 105) of the malady, called by him *θήλεια νοσος*, as afflicting the Scythians who robbed the temple (of the Syrian Venus) in Ascalon, has been deemed by some a proof that some legend containing a distortion of the Scriptural account was current in that country down to a late date. The Scholiast on Aristophanes (*Acharn.* 231) mentions a similar plague (followed by a similar subsequent propitiation to that mentioned in Scripture), as sent upon the Athenians by Barchus.<sup>d</sup> The opinion mentioned by Winer (s. v. *Philister*), as advanced by Lichtenstein, that the plague of emerods and that of mice are one and the same, the former being caused by an insect (*solpuga*) as large as a field-mouse, is hardly worth serious attention. [H. H.]

**EMIM** (עִמִּים; Ὀμμαῖοι, and Ὀμμι, a tribe or family of gigantic stature which originally inhabited the region along the eastern side of the Dead Sea. It would appear, from a comparison of Gen. xiv. 5-7 with Deut. ii. 10-12, 20-23, that the whole country east of the Jordan was, in primitive times, held by a race of giants, all probably of the same stock, comprehending the Rephaim on the north, next the Zuzim, after them the Emim, and then the Horim on the south; and that afterwards the kingdom of Bashan embraced the territories of the first; the country of the Ammonites the second; that of the Moabites the third; while Edom took in the mountains of the Horim. The whole of them were attacked and pillaged by the eastern kings who destroyed Sodom and Gomorrah.

The Emim were related to the Anakim, and were generally called by the same name; but their conquerors the Moabites termed them Emin—that is "Terrible men" (Deut. ii. 11)—most probably on account of their fierce aspect. [REPHAIM; ANAKIM.] [J. L. P.]

**EMMANUEL** (Ἐμμανουήλ; *Emmanuel*), Matt. i. 23. [IMMANUEL.]

**EMMAUS** (Ἐμμαούς), the village to which the two disciples were going when our Lord appeared to them on the way, on the day of His resurrection (Luke xxiv. 13). Luke makes its distance from Jerusalem *sixty stadia* (A. V. "threescore furlongs"), or about 7½ miles; and Josephus mentions "a village called Emmaus" at the same distance (B. J. vii. 6, §6). These statements seem sufficiently definite; and one would suppose no great mistake could be made by geographers in fixing its site. It is remarkable, however, that from the earliest period of which we have any record, the opinion

\* Closely akin to it is the Arab. *جذع*, which means *tumor qui apud viros erit in postici partibus, apud mulieres in anteriore parte vulvae similis hernia virorum*.

<sup>b</sup> Pakhurst, however, s. v. עֲפָלִים, thinks, on the authority of Dr. Kennicott's *Codices*, that מַחֲזִוִּים is

in all these passages a very ancient Hebrew *varia lectio*.

<sup>c</sup> Josephus, *Ant.* vi. 1, §1, *δυσεντερά*; Aquila, τὸ τῆς φλεγμῆς ἔλκος.

<sup>d</sup> Pollux, *Onom.* iv. 25, thus describes what he calls *βομβῖν*. οἰδῶμα μετὰ φλεγμονῆς αἰμαρροδοῦ γίνεται κατὰ τὴν ἄβαν ἔντος, ἐντὶ δὲ ὁμοία μύρως ὁμοίως. comp. Bochart, *Hierozoic.* l. 381.

prevailed among Christian writers, that the Emmaus of Luke was identical with the Emmaus on the border of the plain of Philistia, afterwards called Nicopolis, and which was some 20 miles from Jerusalem. Both Eusebius and Jerome adopted this view (*Onom.* s. v. *Emmaus*); and they were followed by all geographers down to the commencement of the 14th century (Reland, p. 758). Then, for some reason unknown to us, it began to be supposed that the site of Emmaus was at the little village of *Kubeibeh*, about 3 miles west of *Noby Samwil* (the ancient *Mizpeh*), and 9 miles from Jerusalem (Sir J. Maund. in *Early Travels in Palestine*, 175; Ludolph. de Suchem, *Itin.*; Quaresmius, ii. 719). There is not, however, a shadow of evidence for this supposition. In fact the site of Emmaus remains yet to be identified.

Dr. Robinson has recently revived the old theory, that the Emmaus of Luke is identical with Nicopolis; and has supported it with his wonted learning, but not with his wonted conclusiveness. He first endeavours to cast doubts on the accuracy of the reading *ἐξήκοστα* in Luke xiv. 13, because two uncial MSS. (K and N), and a few unimportant cursive MSS. insert *ἑκατόν*, thus making the distance 160 stadia, which would nearly correspond to the distance of Nicopolis. But the best MSS. have not this word, and the best critics regard it as an interpolation. There is a strong probability that some copyist who was acquainted with the city, but not the village of Emmaus, tried thus to reconcile Scripture with his ideas of geography. The opinions of Eusebius, Jerome, and their followers, on a point such as this, are not of very great authority. When the *name* of any noted place agreed with one in the Bible, they were not always careful to see whether the *position* corresponded in like manner. [FDRLE.] Emmaus-Nicopolis being a noted city in their day, they were led somewhat rashly to confound it with the Emmaus of the Gospel. The circumstances of the narrative are plainly opposed to the identity. The two disciples having journeyed from Jerusalem to Emmaus in part of a day (Luke xxiv. 28, 29), left the latter again after the evening meal, and reached Jerusalem before it was very late (verses 33, 42, 43). Now, if we take into account the distance, and the nature of the road, leading up a steep and difficult mountain, we must admit that such a journey could not be accomplished in less than from six to seven hours, so that they could not have arrived in Jerusalem till long past midnight. This fact seems to us conclusive against the identity of Nicopolis and the Emmaus of Luke. (Robinson, iii. 147, sq.; Reland, *Pal.* 427, sq.) [J. L. P.]

EMMAUS, or NICOPOLIS (*Ἐμμαους*, 1 Macc. iii. 40; *Ἀμμαούς*, Joseph. *B. J.* ii. 20, §4), a town in the plain of Philistia, at the foot of the mountains of Judah, 22 Roman miles from Jerusalem, and 10 from Lydda (*Itin. Hieros.*; Reland, 309). The name does not occur in the O. T.; but the town rose to importance during the later history of the Jews, and was a place of note in the wars of the Asmoneans. It was fortified by Bacchides, the general of Antiochus Epiphanes, when he was engaged in the war with Jonathan Maccabæus (Joseph. *Ant.* xiii. 1, §3; 1 Macc. ix. 50). It was in the plain beside this city that Judas Maccabæus so signally defeated the Syrians with a mere handful of men, as related in 1 Macc. iii. 57, iv. 3, &c. Under the Romans Emmaus became the capital of a toparchy (Joseph. *B. J.* iii. 3, §5; Plin. v. 14).

It was burned by the Roman general Varus about A.D. 4. In the 3rd century (about A.D. 220) it was rebuilt through the exertions of Julius Africanus, the well-known Christian writer; and then received the name Nicopolis. Eusebius and Jerome frequently refer to it in defining the positions of neighbouring towns and villages (*Chron. Pas.* ad A.C. 223; Reland, p. 759). Early writers mention a fountain at Emmaus, famous far and wide for its healing virtues; the cause of this Theophaues ascribes to the fact, that Our Lord on one occasion washed His feet in it (*Chron.* 41.) The Crusaders 'confounded Emmaus with a small fortress further south, on the Jerusalem road now called *Latrôn* (Will. Tyr. *Hist.* vii. 24). A small miserable village called *'Anwās* still occupies the site of the ancient city. It stands on the western declivity of a low hill, and contains the ruins of an old church. The name Emmaus was also borne by a village of Galilee close to Tiberias; probably the ancient HAMMATH, i. e. hot springs—of which name Emmaus was but a corruption. The hot springs still remained in the time of Josephus, and are mentioned by him as giving its name to the place (*B. J.* iv. 1, §3; *Ant.* xviii. 2, §3). [J. L. P.]

EMMER (*Ἐμμήρ*; *Semmeri*), 1 Esd. ix. 21. [IMMER.]

EMMOR (Heb. Text with E, *Ἐμμόρ*; Lachm. with A B C D, *Ἐμμώρ*; *Emmor*), the father of Sychem (*Acts* vii. 16). [HAMOR.]

ENAM (with the article, *הַנֶּיֶם* = "the double spring;" Ges. *Thes.* 1019 a, *Maasari*; Alex. *Ἡναίμ*; *Enaim*, one of the cities of Judah in the *Shefelah* or lowland (*Josh.* xv. 34). From its mention with towns (Barmuth and Eshtaol for instance) which are known to have been near Timnath, this is very probably the place in the "doorway" of which Tamar sat before her interview with her father-in-law (*Gen.* xxxviii. 14). In the A. V. the words *Pathach enayim* (*פֶּתַח עֵינַיִם*) are not taken as a proper name, but are rendered "an open place," lit. "the doorway of Enayim," or the double spring, a translation adopted by the LXX. (*ταῖς πύλαις Αἰνῶν*) and now generally. In *Josh.* xv. 34, for "Tappuah and Enam," the Peschito has "Pathuch-Elam," which supports the identification suggested above. [AIN.] [G.]

ENAN (*אֶנָּן*; *Ainān*; *Enam*). Ahira ben-Enan was "prince" of the tribe of Naphtali at the time of the numbering of Israel in the wilderness of Sinai (*Num.* i. 15).

ENASIBUS (*Ἐνὰσιβος*; *Eliasib*), 1 Esd. ix. 34. [ELIASIB.]

ENCAMPMENT (*מַחֲנֶה*, *machāneh*, in all places except 2 K. vi. 8, where *לַחֲנֹת*, *luchānōth*, is used). The word primarily denoted the resting-place of an army or company of travellers at night" (*Ex.* xvi. 13; *Gen.* xxii. 21), and was hence applied to the army or caravan when on its march (*Ex.* xiv. 19; *Josh.* x. 5, xi. 4; *Gen.* xxxii. 7, 8). Among nomadic tribes war never attained to the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. The description of the camp of the Israelites, on their march from Egypt (*Num.* ii., iii.), supplies the greatest amount of

\* Whence *חַנּוּת הַיּוֹם* (*chānōth hayyōm*), "the camping-time of day," i. e. the evening, *Judg.* xix. 9.

information on the subject: whatever else may be gleaned is from scattered hints. The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre, and around and facing it (Num. ii. 1),<sup>b</sup> arranged in four grand divisions, corresponding to the four points of the compass, lay the host of Israel, according to their standards (Num. i. 52, ii. 2). On the east the post of honour was assigned to the tribe of Judah, and round its standard rallied the tribes of Issachar and Zebulun, descendants of the sons of Leah. On the south lay Reuben and Simeon, the representatives of Leah, and the children of Gad, the son of her handmaid. Rachel's descendants were encamped on the western side of the tabernacle, the chief place being assigned to the tribe of Ephraim. To this position of Ephraim, Manasseh, and Benjamin, allusions are made in Judg. v. 14, and Ps. lxxx. 2. On the north were the tribes of Dan and Naphtali, the children of Bilhah, and the tribe of Asher, Gad's younger brother. All these were encamped around their standards, each according to the ensign of the house of his fathers. In the centre, round the tabernacle, and with no standard but the cloudy or fiery pillar which rested over it, were the tents of the priests and Levites. The former, with Moses and Aaron at their head, were encamped on the eastern side. On the south were the Kohathites, who had charge of the ark, the table of shewbread, the altars and vessels of the sanctuary. The Gershonites were on the west, and when on the march carried the tabernacle and its lighter furniture; while the Merarites, who were encamped on the north, had charge of its heavier appurtenances. The order of encampment was preserved on the march (Num. ii. 17), the signal for which was given by a blast of the two silver trumpets (Num. x. 5). The details of this account supply Prof. Blunt with some striking illustrations of the undesigned coincidences of the books of Moses (*Undes. Coincid.* pp. 75-86).

In this description of the order of the encampment no mention is made of sentinels, who, it is reasonable to suppose, were placed at the gates (Ex. xxxii. 26, 27) in the four quarters of the camp. This was evidently the case in the camp of the Levites (comp. 1 Chr. ix. 18, 24; 2 Chr. xxxi. 2).

The sanitary regulations of the camp of the Israelites were enacted for the twofold purpose of preserving the health of the vast multitude and the purity of the camp as the dwelling-place of God (Num. v. 3; Deut. xxiii. 14). With this object the dead were buried without the camp (Lev. x. 4, 5); lepers were excluded till their leprosy departed from them (Lev. xiii. 46, xiv. 3; Num. xii. 14, 5), as were all who were visited with loathsome diseases (Lev. xiv. 3). All who were defiled by contact with the dead, whether these were slain in battle or not, were kept without the camp for seven days (Num. xxxi. 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi. 19; Josh. vi. 23). The ashes from the sacrifices were poured out without the camp at an appointed place, whither all uncleanness was removed (Deut. xxiii. 10, 12), and where the entrails, skins, horns, &c., and all that was not offered in sacrifice were burnt (Lev. iv. 11, 12, vi. 11, viii. 17).

<sup>b</sup> The form of the encampment was evidently circular, and not square, as it is generally represented.

The execution of criminals took place without the camp (Lev. xxiv. 14; Num. xv. 35, 36; Josh. vii. 24), as did the burning of the young bullock for the sin-offering (Lev. iv. 12). These circumstances combined explain Heb. xiii. 12, and John xix. 17, 20.

The encampment of the Israelites in the desert left its traces in their subsequent history. The temple, so late as the time of Hezekiah, was still "the camp of Jehovah" (2 Chr. xxxi. 2; cf. Ps. lxxviii. 28); and the multitudes who flocked to David were "a great camp, like the camp of God" (1 Chr. xii. 22).

High ground appears to have been uniformly selected for the position of a camp, whether it were on a hill or mountain side, or in an inaccessible pass (Judg. vii. 18). So, in Judg. x. 17, the Ammonites encamped in Gilead, while Israel pitched in Mizpeh. The very names are significant. The camps of Saul and the Philistines were alternately in Gibeah, the "height" of Benjamin, and the plains of Michmash (1 Sam. xiii. 2, 3, 16, 23). When Goliath defied the host of Israel, the contending armies were encamped on hills on either side of the valley of Elah (1 Sam. xvii. 3); and in the fatal battle of Gilboa Saul's position on the mountain was stormed by the Philistines who had pitched in Shunem (1 Sam. xxviii. 4), on the other side of the valley of Jezreel. The carelessness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi. 33, vii. 8, 12). But another important consideration in fixing upon a position for a camp was the proximity of water: hence it is found that in most instances camps were pitched near a spring or well (Judg. vii. 3; 1 Macc. ix. 33). The Israelites at Mount Gilboa pitched by the fountain in Jezreel (1 Sam. xxi. 1), while the Philistines encamped at Aphek, the name of which indicates the existence of a stream of water in the neighbourhood, which rendered it a favourite place of encampment (1 Sam. iv. 1; 1 K. xx. 26; 2 K. xiii. 17). In his pursuit of the Amalekites, David halted his men by the brook Besor, and there left a detachment with the camp furniture (1 Sam. xxx. 9). One of Joshua's decisive engagements with the nations of Canaan was fought at the waters of Merom, where he surprised the confederate camp (Josh. xi. 5, 7; comp. Judg. v. 19, 21). Gideon, before attacking the Midianites, encamped beside the well of Harod (Judg. vii. 1), and it was to draw water from the well at Bethlehem that David's three mighty men cut their way through the host of the Philistines (2 Sam. xxiii. 16).

The camp was surrounded by the *מַחֲנֶה*, *ma'-gádh* (1 Sam. xvii. 20), or *מַחֲנֶה*, *ma'-gál* (1 Sam. xxvi. 5, 7), which some, and Thenius among them, explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-waggons. The etymology of the word points merely to the circular shape of the enclosure formed by the tents of the soldiers pitched around their chief, whose spear marked his resting-place (1 Sam. xxvi. 5, 7), and it might with propriety be used in either of the above senses, according as the camp was fixed or temporary. We know that, in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Macc. xiii. 43), and drew about it a line of circumvallation (*פָּרָק*, *dâyék*, 2 K. xxv. 1), which was marked by

breastwork **סללה** *sol'lah*, Is. lxii. 10; **סללה**, *sol'lah*, Ez. xxi. 27 (22); comp. Job xix. 12), for the double purpose of preventing the escape of the besieged and of protecting the besiegers from their sallies.<sup>6</sup> But there was not so much need of a formal entrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. Gideon's expedition against the Midianites took place in the early morning (Judg. vii. 19), the time selected by Saul for his attack upon Nahash (1 Sam. xi. 11), and by David for surprising the Amalekites (1 Sam. xxx. 17; comp. Judg. ix. 33). To guard against these night attacks, sentinels (**שומרים**, *shom'rim*) were posted (Judg. vii. 20; 1 Macc. xii. 27) round the camp, and the neglect of this precaution by Zebah and Zalmunna probably led to their capture by Gideon and the ultimate defeat of their army (Judg. vii. 19).

The valley which separated the hostile camps was generally selected as the fighting ground (**שדה**, *sadeh*, "the battle-field," 1 Sam. iv. 2, xiv. 15; 2 Sam. xviii. 6), upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii. 13; Judg. vi. 33; 2 Sam. v. 22, viii. 13, &c.). When the fighting men went forth to the place of marshalling (**מערבה**, *ma'ar'abah*, 1 Sam. xvii. 20), a detachment was left to protect the camp and baggage (1 Sam. xvii. 22, xxx. 24). The beasts of burden were probably tethered to the tent pegs (2 K. vii. 10; Zech. xiv. 15).

The **מחנה**, *machaneh*, or moveable encampment, is distinguished from the **מצב**, *mitsab*, or **נציב**, *n'tsib* (2 Sam. xxiii. 14; 1 Chr. xi. 16), which appear to have been studding camps, like those which Jeho-haphat established throughout Judah (2 Chr. xvii. 2), or advanced posts in an enemy's country (1 Sam. xiii. 17; 2 Sam. viii. 6), from which skirmishing parties made their predatory excursions and ravaged the crops. It was in resisting one of these expeditions that Shammah won himself a name among David's heroes (2 Sam. xvi. 12). *Machaneh* is still further distinguished from **מבצר**, *mibtsar*, "a fortress" or "walled town" (Num. xiii. 19).

Camps left behind them a memorial in the name of the place where they were situated, as among ourselves (cf. *Chester*, *Grantchester*, &c.). Mahaneh-Dan (Judg. xiii. 25) was so called from the encampment of the Danites mentioned in Judg. xvii. 12. [MAHANAIM.] The more important camps at Gilgal (Josh. v. 10, ix. 6) and Shiloh (Josh. xvii. 9; Judg. xxi. 12, 19) left no such impress; the military traditions of these places were eclipsed by the greater splendour of the religious associations which surrounded them. [W. A. W.]

**ENCHANTMENTS**, **למים**, **לחיים**, Ex. vii. 11, 22, viii. 7; **φαρμακείαι**, LXX. (Grotius compares the word with the Greek *λατα*); secret arts, from **לבוש**, *to cover*; though others incorrectly connect it with **לחם**, *a flame*, or the glittering

<sup>6</sup> The Chaldee renders **סללה** (1 Sam. xvii. 20) and **דיוק** (2 K. xxv. 1) by the same word, **פרקום**, or **פרקומא**, the Greek *χαράτωμα*.

blade of a sword, as though it implied a sort of dazzling celerity which deceives spectators. Several versions render the word by "whisperings," *insusurrations*, but it seems to be a more general word, and hence is used of the various means (some of them no doubt of a quasi-scientific character) by which the Egyptian Chartummin imposed on the credulity of Pharaoh.

2. **כְּשָׁפִים**; **φαρμακείαι**, **φάρμακα**, LXX. (2 K. ix. 22; Mic. v. 12; Nah. iii. 4); **veneficia**, *maleficia*, Vulg.; "maleficia artes," "pnestigiae," "muttered spells." Hence it is sometimes rendered by *ερασιδαι* as in Is. xlvii. 9, 12. The belief in the power of certain formulae was universal in the ancient world. Thus there were *carmina* to evoke the tutelary gods out of a city (Macrobius, *Saturnalia* iii. 4), others to devote hostile armies (*Id.*), others to raise the dead (Maimon, *de Idol.* xi. 15; Seneca, *Oedip.* 547), or bind the gods (*θεσποιοθεων*) and men (Aesch. *Eur.* 331), and even influence the heavenly bodies (Ov. *Met.* vii. 207 sq., xii. 263; "Te quoque Luna traho," Virg. *Ecl.* viii., *Aen.* iv. 489; Hor. *Epod.* v. 45). They were a recognised part of ancient medicine, even among the Jews, who regarded certain sentences of the Law as efficacious in healing. The Greeks used them as one of the five chief remedies of pharmacy (Pind. *Pyth.* iii. 8, 9; Soph. *Aj.* 582), especially in obstetrics (Plat. *Theat.* p. 145) and mental diseases (Galen *de Similit.* *tenuia*, l. 8). Homer mentions them as used to check the flow of blood (*Od.* xiv. 456), and Cato even gives a charm to cure a dis-jointed limb (*De Re Rust.* 160; cf. Plin. *H. N.* xxviii. 2). The belief in charms is still all but universal in uncivilised nations; see Lane's *Mod. Egypt.* i. 300, 306, &c., ii. 177, &c.; Beckmann's *Voyage to Horne*, ch. ii.; Meißner's *Congo* (in Pinkerton's *Voyages*, xvi. pp. 221, 273); Hue's *China*, i. 223, ii. 326; Taylor's *New Zealand*, and Livingstone's *Africa*, passim, &c.; and hundreds of such remedies still exist, and are considered efficacious among the uneducated.

3. **כְּשָׁפִים**, Eccl. x. 11; **ψυχοπομπάς**, LXX., from **לחש**. This word is especially used of the charming of serpents, Jer. viii. 17 (cf. Is. lviii. 5; Ecclus. xii. 13, Eccl. 11, Luc. ix. 891—a parallel to "cantando rumpitur anguis," and "Viperæ rumpo verbis et carmine fauces," Ov. *Met.* l. c.). Maimonides (*de Idol.* xi. 2) expressly defines an enchanter as one "who uses strange and meaningless words, by which he imposes on the folly of the credulous. They say, for instance, that if one utter the words before a serpent or scorpion it will do no harm" (Carpov. *Annot. in Godefridum*, iv. 11). An account of the Musri who excelled in this art is given by Augustin (*ad Gen.* ix. 28), and of the Pylli by Arnobius (*ad Nat.* ii. 32); and they are alluded to by a host of other authorities (Plin. vii. 2, xlviii. 6; Aelian. *H. A.* i. 57; Virg. *Aen.* vii. 750; Sil. Ital. viii. 495). They were called *ᾠσοδοῦνται*. The secret is still understood in the East (Lane, ii. 106).

4. The word **כְּשָׁפִים** is used of the enchantments sought by Balaam, Num. xxiv. 1. It properly alludes to orphomaney, but in this place has a general meaning of endeavouring to gain omens (*εις συνδραστην τοις ολωοις*, LXX.).

5. **כַּבֵּר** is used for magic, Is. xlviii. 9, 12. It comes from **כַּבֵּר**, *to bind* (cf. *καταβέω*, *basculare*,

bannen), and means generally the process of acquiring power over some distant object or person; but this word seems also to have been sometimes used expressly of serpent charmers, for R. Sol. Jarchi on Dent. xviii. 11, defines the חֹבֵר חֹבֵר to be one "who congregates serpents and scorpions into one place."

Any resort to these methods of imposture was strictly forbidden in Scripture (Lev. xix. 26; Is. xlvii. 9, &c.), but to eradicate the tendency is almost impossible (2 K. xvii. 17; 2 Chr. xxxiii. 6), and we find it still flourishing at the Christian era (Acts xiii. 6, 8, viii. 9, 11, γοητεία; Gal. v. 20; Rev. ix. 21).

The chief sacramenta daemonica were a rod, a magic circle, dragon's eggs, certain herbs, or "insane roots," like the henbane, &c. The fancy of poets both ancient and modern has been exerted in giving lists of them (Ovid, and Hor. *ll. cc.*; Shakspeare's *Macbeth*, Act iv. 1; Kirke White's *Gondoline*; Southey's *Curse of Kehama*, Cant. iv. &c.). [WITCHCRAFTS; AMULETS; DIVINATION.] [F. W. F.]

EN-DOR (עֵינֹדֹר = "spring of Dor;" אַעֲדֹר; *Eulor*), a place which with its "daughter-towns" (בְּנוֹת) was in the territory of Issachar, and yet possessed by Manasseh (Josh. xvii. 11). This was the case with five other places which lay partly in Asher, partly in Issachar, and seem to have formed a kind of district of their own called "the three, or the triple, *Nepheth*."

Endor was long held in memory by the Jewish people as connected with the great victory over Sisera and Jabin. Tanaach, Megiddo, and the tower Kishon all witnessed the discomfiture of the huge host, but it was emphatically to Endor that the tradition of the death of the two chiefs attached itself (Ps. lxxxiii. 9, 10). Possibly it was some recollection of this, some fame of sanctity or good omen in Endor, which drew the unhappy Saul thither on the eve of his last engagement with an enemy no less hateful and no less destructive than the Midianites (1 Sam. xxviii. 7). Endor is not again mentioned in the Scriptures; but it was known to Eusebius, who describes it as a large village 4 miles S. of Tabor. Here to the north of *Jebel Duhy* (the "Little Hermon" of travellers), the name still lingers, attached to a considerable but now deserted village. The rock of the mountain, on the slope of which *Endôr* stands, is hollowed into caves, one of which may well have been the scene of the incantation of the witch (Van de Velde, ii. 383; Rob. ii. 360; Stanley, 345). The distance from the slopes of Gilboa to Endor is 7 or 8 miles, over difficult ground. [G.]

EN-EGLA'IM (עֵינֵי עֵגְלַיִם = "spring of two heifers;" Ἐνγαλλεῖα; *Engallim*), a place named only by Ezekiel (xlvi. 10), apparently as on the Dead Sea; but whether near to or far from Engedi, on the west or east side of the Sea, it is impossible to ascertain from the text. In his comment on the passage, Jerome locates it at the embouchure of the Jordan; but this is not supported by other evidence. By some (e.g. Gesenius, *Thes.* 1019) it is thought to be identical with EGLAIM, but the two words are different, En-eglam containing the *Ain*, which is rarely changed for any other aspirate. [G.]

ENEMES'SAR (Ἐνεμίσσαρ, Ἐνεμίσσαρος) is the name under which Shalmaneser appears in the book of Tobit (i. 2, 15, &c.). This book is not of any historical authority, being a mere work of

imagination composed probably by an Alexandrian Jew, not earlier than B.C. 300. The change of the name is a corruption—the first syllable *Shal* being dropped (compare the Bupalussor of Abydenus, which represents Nabopolassar), and the order of the liquids *m* and *n* being reversed. The author of Tobit makes Enemessar lead the children of Israel into captivity (i. 2), following the apparent narrative of the book of Kings (2 K. xvii. 3-6, xviii. 9-11). He regards Sennacherib not only as his successor but as his son (i. 15), for which he has probably no authority beyond his own speculations upon the text of Scripture. As Sennacherib is proved by the Assyrian inscriptions to be the son of Sargon, no weight can be properly attached to the historical statements in Tobit. The book is, in the fullest sense of the word, *apocryphal*. [G. L.]

ENE'NIUS (Ἐννεύς; *Emmanius*), one of the leaders of the people who returned from captivity with Zerobabel (1 Esdr. v. 8). There is no name corresponding in the lists of Ezra and Nehemiah.

ENGAD'DI (ἐν αἰγιάλοις; *in Cades*), Ecclus. xxiv. 14. [ENGEDI.]

EN-GAN'NIM (עֵינֵי גַנִּים = "spring of gardens"). 1. A city in the low country of Judah, named between Zanoah and Tappuah (Josh. xv. 34). The LXX. in this place is so different from the Hebrew that the name is not recognizable. Vulg. *Aen-Gannim*.

2. A city on the border of Issachar (Josh. xix. 21; Ἰσάκ καὶ Τορμάδ, Alex. ἡ Γαννίμ; *En-Gannim*); allotted with its "suburbs" to the Gershonite Levites (xxi. 29; Πηγὴ γαρμύδων; *En-Gannim*). These notices contain no indication of the position of Engannim with reference to any known place, but there is great probability in the conjecture of Robinson (ii. 315) that it is identical with the Ginnia of Josephus (*Ant.* xx. 6, §1), which again, there can be little doubt, survives in the modern *Jenin*, the first village encountered on the ascent from the great plain of Esdraelon into the hills of the central country. *Jenin* is still surrounded by the "orchards" or "gardens" which interpret its ancient name, and the "spring" is to this day the characteristic object in the place (Rob. ii. 315; Stanley, 349, note; Van de Velde, 359). The position of *Jenin* is also in striking agreement with the requirements of Beth-hag-Gan (A. V. "the garden-house;" Βαθγάδ) in the direction of which Ahaziah fled from Jehu (2 K. ix. 27). The rough road of the ascent was probably too much for his chariot, and keeping the more level ground he made for Megiddo, where he died (see Stanley, 349).

In the lists of Levitical cities in 1 Chr. vi. ANEM is substituted for Engannim. Possibly it is merely a contraction. [G.]

ENGEDI (עֵינֵי הַיַּד, "the fountain of the kid;"

Ἐγγεδδὶ and Ἐγγαδδὶ; Arabic, عَيْن جَدِي), a town in the wilderness of Judah (Josh. xv. 62), on the western shore of the Dead Sea (Ezek. xlvi. 10). Its original name was Hazazon-Tamar (חֲזָזֹן תַּמָּר, "the pruning of the palm"), doubtless, as Josephus says, on account of the palm groves which surrounded it (2 Chr. xx. 2; Ecclus. xxiv. 14; Joseph. *Ant.* ix. 1, §2). Some doubt seems to have existed in the early centuries of our era as to its true position. Stephanus places it near

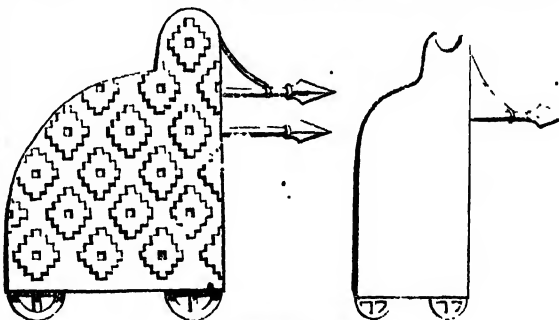

Sodom (Steph. B. s. v.); Jerome at the south end of the Dead Sea (*Comm. in Ezek. xlvii.*); but Josephus more correctly, at the distance of 300 stadia from Jerusalem (*Ant. ix. 1, §2*). Its site is now well known. It is about the middle of the western shore of the lake. Here is a rich plain, half a mile square, sloping very gently from the base of the mountains to the water, and shut in on the north by a lofty promontory. About a mile up the western acclivity, and at an elevation of some 400 feet above the plain, is the fountain of *Ain Jidy*, from which the place gets its name. The water is sweet, but the temperature is 81° Fah. It bursts from the limestone rock, and rushes down the steep descent, fretted by many a rugged crag, and joining its spray over verdant borders of acacia, mimosa, and lotus. On reaching the plain, the brook crosses it in nearly a straight line to the sea. During a greater part of the year, however, it is absorbed in the thirsty soil. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. The soil is exceedingly fertile, and in such a climate it might be made to produce the rarest fruits of tropical climes. Traces of the old city exist upon the plain and lower declivity of the mountain, on the south bank of the brook. They are rude and uninteresting, consisting merely of foundations and shapeless heaps of unhewn stones. A sketch by M. Baily, taken from the fountain, and embracing the plain on the shore, and the southwest border of the Dead Sea, will be found in the Atlas of Plates accompanying the original edition of De Sauley's *Voyage*, pl. viii.

The history of Engedi, though it reaches back nearly 4000 years, may be told in a few sentences. It was immediately after an assault upon the "Amorites, that dwelt in Hazazon-Tamar," that the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (*Gen. xiv. 7; comp. 2 Chr. xx. 2*). It is probable that the fountain was always called Engedi, and that the ancient town built on the plain below it got in time the same name. Saul was told that David was in the "wilderness of Engedi;" and he took "3000 men, and went to seek David and his men upon the rocks of the wild goats" (*1 Sam. xxiv. 1-4*). These animals still frequent the cliffs above and around the fountain; the Arabs call them *Beden*. At a later period Engedi was the gathering-place of the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Berachah (*2 Chr. xx. 2*). It is remarkable that this is the usual route taken in the present day by such predatory bands from Moab as make incursions into Southern Palestine. They pass round the southern end of the Dead Sea, then up the road along its western shore to Ain Jidy, and thence toward Hebron, Tekoa, or Jerusalem, as the prospects of plunder seem most inviting.

The vineyards of Engedi were celebrated by Solomon (*Cant. i. 14*); its balsam by Josephus (*Ant. ix. 1, §2*), and its palms by Pliny—"Engadda oppidum fuit, secundum ab Hierosolymis

fertilitate palmeturumque nemoribus" (*v. 17*). But vineyards no longer clothe the mountain-side, and neither palm-tree nor balsam is seen on the plain. In the fourth century there was still a large village at Engedi (*Onom. s. v.*); it must have been abandoned very soon afterwards, for there is no subsequent reference to it in history, nor are there any traces of recent habitation (*Porter's Handbook, 242; Rob. i. 507*). There is a curious reference to it in Mandeville (*Early Trav. 179*), who says that the district between Jericho and the Dead Sea is "the land of Dengudda" (*Fr. d'Engudda*), and that the balm trees were "still called vines of Gady." [*J. L. P.*]

ENGINE, a term exclusively applied to military affairs in the Bible. The Hebrew *חֶשְׁבֹן* (*2 Chr. xxvi. 15*) is its counterpart in etymological meaning, each referring to the *ingenuity* (engine, from *ingenium*) displayed in the contrivance. The engines to which the term is applied in *2 Chr.* were designed to propel various missiles from the walls of a besieged town; one, like the *b-distu*, was for stones, consisting probably of a strong spring and a tube to give the right direction to the stone; another, like the *catapult*, for arrows, an enormous stationary bow. The invention of these is assigned to Uzziah's time—a statement, which is supported both by the absence of such contrivances in the representations of Egyptian and Assyrian warfare, and by the traditional belief that the *balista* was invented in Syria (*Pliny, vii. 56*). Luther gives *brustschutzen*, i. e. "parapets," as the meaning of the term. Another war-engine, with which the Hebrews were acquainted, was the battering-ram, described in *Ez. xxvi. 9*, as *מָחִי קֶבֶל*, lit. a beating of that which is in front, hence a ram for

Assyrian war-engines, from Holin, pl. 160.

striking walls; and still more precisely in *Ez. iv. 2, xxi. 22*, as *רָמָה*, a ram. The use of this instrument was well known both to the Egyptians (*Wilkinson, i. 359*) and the Assyrians. The references in Ezekiel are to the one used by the latter people, consisting of a high and stoutly built framework on four wheels, covered in at the sides in order to protect the men moving it, and armed with one or two pointed weapons. Their appearance was very different from that of the Roman *aries* with which the Jews afterwards became acquainted (*Joseph. B. J. iii. 7, §19*). No notice is taken of the *testudo* or the *vineu* (*cf. Ez. xxvi. 9, Vulg.*); but it is not improbable that the Hebrews were acquainted with them (*cf. Wilkinson, i. 361*). The marginal rendering "engines of shot" (*Jer. vi. 6, xxiii. 24; Ez. xxvi. 8*) is incorrect. [*W. L. B.*]

**ENGRAVER.** The term חָרֵשׁ, so translated in the A. V., applies broadly to any *artificer*, whether in wood, stone, or metal: to restrict it to the *engraver* in Ex. xxxv. 35, xxxviii. 23, is improper: a similar latitude must be given to the term חָרֵשׁ, which expresses the operation of the artificer: in Zech. iii. 9, ordinary stone-cutting is evidently intended. The specific description of an *engraver* was חָרֵשׁ אֶבֶן (Ex. xxviii. 11), and his chief business was cutting names or devices on rings and seals; the only notices of engraving are in connexion with the high-priest's dress—the two onyx-stones, the twelve jewels, and the mitre-plate having inscriptions on them (Ex. xxviii. 11, 21, 36). The previous notices of signets (Gen. xxxviii. 18, xli. 42) imply engraving. The art was widely spread throughout the nations of antiquity, particularly among the Egyptians (Diod. i. 78; Wilkinson, iii. 373), the Aethiopians (Her. vii. 69), and the Indians (Von Bohlen. *Indien*, ii. 122). [W. L. B.]

**EN-HAD'DAH** (עֵין הַדָּהַד) = "sharp, or swift spring;" Gesen. *Aimadik*; Alex. *ἤν Ἀδδα*, one of the cities on the border of Issachar named next to Engannim (Josh. xix. 21). Van de Velde (i. 315) would identify it with *Ain-haud* on the western side of Carmel, and about 2 miles only from the sea. But this is surely out of the limits of the tribe of Issachar, and rather in Asher or Manasseh. [G.]

**EN-HAK-KORE** (עֵין הַקֹּרֶה) = "the spring of the crier;" *πηγή τοῦ ἐκκαλουμένου*, the spring which burst out in answer to the "cry" of Samson after his exploit with the jawbone (Judg. xv. 19). The name is a pun founded on the word in verse 18, *yikera* (יִקְרָה, A. V. "he called"). The word *Muktesh*, which in the story denotes the "hollow place" (literally, the "moor") in the jaw, and also that for the "jaw" itself, *Lechi*, are both names of places. Van de Velde (*Memoir*, 343) endeavours to identify Lechi with *Tell-el-Lechiyeh* 4 miles N. of Beersheba, and Enhakkore, with the large spring between the Tell and *Khewefseh*. But Samson's adventures appear to have been confined to a narrow circle, and there is no ground for extending them to a distance of some 30 miles from Gaza, which *Lechiyeh* is, even in a straight line. [G.]

**EN-HA'ZOR** (עֵין הָצוֹר) = "spring of the village;" *πηγή Ἀσὺρ*; *En-Asor*, one of the "fenced cities" in the inheritance of Naphtali, distinct from Hazor, named between Edrei and Iron, and apparently not far from Kedesh (Josh. xix. 37). It has not yet been identified. [G.]

**EN-MISHPAT** (עֵין מִשְׁפָּט) = *ἡ πηγή τῆς κρισεως*, Gen. xiv. 7. [KADESH.]

**EN-RIMMON** (עֵין רִמּוֹן); Vnt. omits, Alex. *ἐν Ῥεμμὼν*; *et in Rimmon*), one of the places which the men of Judah re-inhabited after their return from the Captivity (Neh. xi. 29). From the towns in company with which it is mentioned, it seems very probable that the name is the same which in the earlier books is given in the Hebrew and A. V. in the separate form of "Ain and Rimmon" (Josh. xv. 32), "Ain, Remmon" (xix. 7; and see 1 Chr. iv. 32), but in the LXX. combined, as in *Nehe-miah*. [AIN; 2.] [G.]

**ENOCH**, and once **HE'NOCH** (הֵנוֹחַ = *Chando*; Philo, *de Post. Caini*, §11, *ἐμπροθέρας*

*Ἐνὼχ χάρις σου*; *Ἐνὼχ*; Joseph. *Ἀνωχος*; *Henoch*). 1. The eldest son of Cain (Gen. iv. 17), who called the city which he built after his name (18). Ewald (*Gesch.* i. 35*i note*) fancies that there is a reference to the Phrygian Iconium, in which city a legend of *"Anvachos"* was preserved, evidently derived from the Biblical account of the father of Methuselah (Steph. Byz. s. v. *Ἰκόνιον*, Suid. s. v. *Νάννακος*). Other places have been identified with the site of Enoch with little probability; e.g. *Amuchta* in Susiana, the *Heniochi* in the Caucasus, &c.

2. The son of Jared (יָרֵד, a *descent*, cf. *Jordan*), and father of Methuselah (מֶתוֹשֶׁלַח, a *man of arms*, Philo. l. c. §12, *Μαθουσαλὴν ἑξαποστολὴ θαντροῦ* (Gen. v. 21 ff.; Luke iii. 28). In the Epistle of Jude (v. 14, cf. Enoch, ix. 9) he is described as "the seventh from Adam," and the number is probably noticed as conveying the idea of divine completion and rest (cf. August. c. *Fiust.* xii. 14), while Enoch was himself a type of perfected humanity, "a man raised to heaven by pleasing God, while angels fell to earth by transgression" (Iren. iv. 16, 2). The other numbers connected with his history appear too symmetrical to be without meaning. He was born when Jared was 162 (9×6×3) years old, and after the birth of his eldest son in his 65th (5×6+7) year he lived 300 years. From the period of 365 years assigned to his life, Ewald (i. 358), with very little probability, regards him as "the god of the new-year," but the number may have been not without influence on the later traditions which assigned to Enoch the discovery of the science of astronomy (*ἀστρολογία*, Eusebius ap. Euseb. *Præp. Ev.* ix. 17, where he is identified with Atlas). After the birth of Methuselah it is said (Gen. v. 22-4) that Enoch "walked with God 300 years . . . and he was not; for God took him" (חָפָץ, *μετέθηκεν*, LXX. (here only); *tulit*, Vulg.). The phrase "walked with God" (חָפָץ אֱלֹהִים) is elsewhere only used of Noah (Gen. vi. 9; cf. Gen. xvii. 1, &c.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world (Enoch, xii. 2. "All his action was with the holy ones, and with the watchers during his life"). There is no further mention of Enoch in the O. T., but in Ecclesiasticus (xlix. 14) he is brought forward as one of the peculiar glories (*οὐδὲ εἰς ἐκτίσθη ὅλος ἔ.ε.*) of the Jews, for he was taken up (*ἀνελήφθη*, Alex. *μετετέθη*) from the earth. "He pleased the Lord and was translated [into Paradise, Vulg.] being a pattern of repentance" (Eccles. xlv. 14). In the epistle to the Hebrews the spring and issue of Enoch's life are clearly marked. "By faith Enoch was translated (*μετετέθη*, *translatus est*, Vulg.) that he should not see death . . . for before his translation (*μεταθέσεως*) he had this testimony, that he pleased God." The contrast to this divine judgment is found in the constrained words of Josephus: "Enoch departed to the Deity (*ἀνεχώρησε πρὸς τὸ θεῖον*), whence [the sacred writers] have not recorded his death" (*Ant.* 1, 3, 4).

The biblical notices of Enoch were a fruitful source of speculation in later times. Some theologians disputed with subtilty as to the place to which he was removed; whether it was to paradise or to the immediate presence of God (cf. *Pevarien-tius ad Iren.* v. 5), though others more wisely

declined to discuss the question (Thilo, *Cod. Apoc. N. T.*, p. 758). On other points there was greater unanimity. Both the Latin and Greek fathers commonly coupled Enoch and Elijah as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory (Iren. iv. 5, 1; Tertull. *de Resurr. Carn.* 58; Hieron. c. *Joan. Hierosol.* §§29, 32, pp. 437, 440); and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi. 3 ff.) who should fall before "the beast," and afterwards be raised to heaven before the great judgment (Hippol. *Frag. in Dan.* xxii.; *de Antichr.* xliii. Cosmas Indic. p. 75, ap. Thilo, *κατὰ τὴν ἐκκλησιαστικὴν παράδοσιν*; Tertull. *de Anima*, 59; Ambros. in *Psalm.* xlv. 4; Eoang. Nicod. c. xxv. on which Thilo has almost exhausted the question: *Cod. Apoc. N. T.* pp. 765 f.). This belief removed a serious difficulty which was supposed to attach to their translation; for thus it was made clear that they would at last discharge the common debt of a sinful humanity, from which they were not exempted by their glorious removal from the earth (Tertull. *de Anima*, l. c.; August. *Op. imp. c. Jul.* vi. 30).

In later times Enoch was celebrated as the inventor of writing, arithmetic, and astronomy (Euseb. *Præp. Ev.* ix. 17). He is said to have filled 300 books with the revelations which he received, and is commonly identified with *Edris* (i. e. the learned), who is commemorated in the Koran (cap. 19) as one "exalted [by God] to a high place" (cf. Sala, l. c.; Hottinger, *Hist. Orient.* pp. 30 ff.). But these traditions were probably due to the apocryphal book which bears his name (cf. Fabric. *Cod. Pseudep. V. T.* i. 215 ff.).

Some (Buttm. *Mythol.* i. 176 ff.; Ewald, l. c.) have found a trace of the history of Enoch in the Phrygian legend of Anaxakos (*Ἀναξῶκος, Νάννακος*), who was distinguished for his piety, lived 300 years, and predicted the deluge of Deucalion. [ENOCH, 1.] In the A. V. of 1 Chr. i. 3, the name is given as HENOCH.

3. The third son of Midian, the son of Abraham by Keturah (Gen. xxv. 4, A. V. *Hanoch*; 1 Chr. i. 33, A. V. *Henoch*).

4. The eldest son of Reuben (A. V. *Hanoch*; Gen. xlv. 9; Ex. vi. 14; 1 Chr. v. 3), from whom came "the family of the Hanochites" (Num. xvi. 5).

5. In 2 Esdr. vi. 49, 51, *Enoch* stands in the Latin (and Eng.) Version for *Behemoth* in the Ethiopic. [B. F. W.]

ENOCH, THE BOOK OF, is one of the most important remains of that early apocalyptic literature of which the book of Daniel is the great prototype. From its vigorous style and wide range of speculation the book is well worthy of the attention which it received in the first ages; and recent investigations have still left many points for further inquiry.

1. The history of the book is remarkable. The first trace of its existence is generally found in the Epistle of St. Jude (14, 15; cf. Enoch, i. 9), but the words of the Apostle leave it uncertain whether he derived his quotation from tradition (Hofmann, *Schriftbeweis*, i. 420) or from writing (*ἡ προφῆτευς* . . . *Ἐνὸς λέγων*), though the wide spread of the book in the second century seems almost decisive in favour of the latter supposition. It appears to have been known to Justin (*Apol.* ii. 5), Irenæus

(*Adv. Hæc.* iv. 16, 2), and Anatolius (Euseb. *H. F.* vii. 32). Clement of Alexandria (*Eclog.* p. 801) and Origen (yet comp. c. *Cels.* v. p. 267, ed. Spenc.) both make use of it, and numerous references occur to the "writing," "books," and "words" of Enoch in the Testaments of the XII. Patriarchs, which present more or less resemblance to passages in the present book (Fabr. *Cod. Pseudep. V. T.* i. 161 ff.; Gfrörer, *Proph. Pseudep.* 273 f.). Tertullian (*De Cult. Fem.* i. 3; cf. *De Idol.* 4) expressly quotes the book as one which was "not received by some, nor admitted into the Jewish canon" (in *armarium Judaicum*), but defends it on account of its reference to Christ (*legimus omnem scripturam aedificationi habilem divinitus inspirari*). Augustine (*De Civ.* xv. 23, 4) and an anonymous writer whose work is printed with Jerome's (*Brev. in Psalm.* cxxii. 2; cf. Hil. *ad Psalm.* l. c.) were both acquainted with it; but from their time till the revival of letters it was known in the Western Church only by the quotation in St. Jude (Dillmann, *Eint.* lvi.). In the Eastern Church it was known some centuries later. Considerable fragments are preserved in the *Chronographia* of Georgius Syncellus (c. 792 A.D.), and these, with the scanty notices of earlier writers, constituted the sole remains of the book known in Europe till the close of the last century. Meanwhile, however, a report was current that the entire book was preserved in Abyssinia; and at length, in 1773, Bruce brought with him on his return from Egypt three MSS., containing the complete Ethiopic translation. Notwithstanding the interest which the discovery excited, the first detailed notice of this translation was given by Silvestre de Sacy in 1800, and it was not published till the edition of Archbishop Lawrence in 1838 (*Libri Enoch versio Aethiopica* . . . Oxon.). But in the interval Lawrence published an English translation, with an introduction and notes, which passed through three editions (*The Book of Enoch*, &c. by R. Lawrence. Oxford, 1821, 1833, 1838). The translation of Lawrence formed the basis of the German edition of Hoffmann (*Des Buch Henoch*, . . . A. E. Hoffmann, Jena, 1833-38); and Gfrörer, in 1840, gave a Latin translation constructed from the translations of Lawrence and Hoffmann (*Prophetæ veteres Pseudepigraphi* . . . ed. A. F. Gfrörer, Stuttgartiae, 1840). All these editions were superseded by those of Dillmann, who edited the Ethiopic text from five MSS. (*Liber Henoch, Aethiopice*, Lipsiae, 1851), and afterwards gave a German translation of the book with a good introduction and commentary (*Das Buch Henoch*, . . . von Dr. A. Dillmann, Leipzig, 1853). The work of Dillmann gave a fresh impulse to the study of the book. Among the essays which were called out by it the most important were those of Ewald (*Ueber das Aethiopischen Buches Henoch Entstehung*, &c., Göttingen, 1836) and Hilgenfeld (*D. Jüdische Apokalyptik*, Jena, 1857). The older literature on the subject is reviewed by Fabricius (*Cod. Pseudep. V. T.* i. 199 ff.).

2. The Ethiopic translation was made from the Greek, and it was probably made about the same time as the translation of the Bible with which it was afterwards connected, or in other words, towards the middle or close of the fourth century. The general coincidence of the translation with the patristic quotations of corresponding passages shows satisfactorily that the text from which it was derived was the same as that current in the early

Church, though one considerable passage quoted by Georg. Syncell. is wanting in the present book (Dillm. p. 85). But it is still uncertain whether the Greek text was the original, or itself a translation. One of the earliest references to the book occurs in the Hebrew *Book of Jubilees* (Dillm. in Ewald's *Jahrb.* 1850, p. 90), and the names of the angels and winds are derived from Aramaic roots (cf. Dillm. pp. 236 ff.). In addition to this a Hebrew book of Enoch was known and used by Jewish writers till the thirteenth century (Dillm. *Eint.* lvii.), so that on these grounds, among others, many have supposed (J. Scaliger, Lawrence, Hofmann, Dillmann) that the book was first composed in Hebrew (Aramaean). In such a case no stress can be laid upon the Hebraizing style, which may be found as well in an author as in a translator; and in the absence of direct evidence it is difficult to weigh mere conjectures. On the one hand, if the book had been originally written in Hebrew it might seem likely that it would have been more used by Rabbinical teachers; but, on the other hand, the writer certainly appears to have been a native of Palestine,\* and therefore likely to have employed the popular dialect. If the hypothesis of a Hebrew original be accepted, which as a hypothesis seems to be the more plausible, the history of the original and the version finds a good parallel in that of the Wisdom of Sirach. [ECCLIASTICUS.]

3. In its present shape the book consists of a series of revelations supposed to have been given to Enoch and Noah, which extend to the most varied aspects of nature and life, and are designed to offer a comprehensive vindication of the action of Providence. [ENOCII.] It is divided into five parts. The *first part* (Cc. 1-36 Dillm.), after a general introduction, contains an account of the fall of the angels (Gen. vi. 1) and of the judgment to come upon them and upon the giants, their offspring (6-16); and this is followed by the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed to him many of the great mysteries of nature, the treasure-houses of the storms and winds, and fires of heaven, the prison of the fallen and the land of the blessed (17-36). The *second part* (37-71) is styled "a vision of wisdom," and consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (38-44) gives chiefly a picture of the future blessings and manifestation of the righteous, with further details as to the heavenly bodies: the second (45-57) describes in splendid imagery the coming of Messiah and the results which it should work among "the elect" and the gainsayers: the third (58-69) draws out at further length the blessedness of "the elect and holy," and the confusion and wretchedness of the sinful rulers of the world. The *third part* (72-82) is styled "the book of the course of the lights of heaven," and deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the journey of Enoch closes. The *fourth part* (83-91) is not distinguished by any special name, but contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the

final establishment of the throne of Messiah. The *fifth part* (92-105) contains the last addresses of Enoch to his children, in which the teaching of the former chapters is made the ground-work of earnest exhortation. The signs which attended the birth of Noah are next noticed (106-7); and another short "writing of Enoch" (108) forms the close to the whole book (cf. Dillm. *Eint.* i. ff.; Lücke, *Versuch einer vollständ. Eint.* &c., i. 93 ff.).

4. The general unity which the book possesses in its present form marks it, in the main, as the work of one man. The several parts, while they are complete in themselves, are still connected by the development of a common purpose. But internal coincidence shows with equal clearness that different fragments were incorporated by the author into his work, and some additions have been probably made afterwards. Different "books" are mentioned in early times, and variations in style and language are discernible in the present book. To distinguish the original elements and later interpolations is the great problem which still remains to be solved, for the different theories which have been proposed are barely plausible. In each case the critic seems to start with preconceived notions as to what was to be expected at a particular time, and forms his conclusions to suit his prejudices. Hofmann and Weiss place the composition of the whole work after the Christian era, because the one thinks that St. Jude could not have quoted an apocryphal book (Hofmann, *Schriftbeweis*, i. 420 ff.), and the other seeks to detach Christianity altogether from a Jewish foundation (Weisse, *Evangelienfrage*, 214 ff.). Stuart (*American Bibl. Repert.* 1840) so far anticipated the argument of Weiss as to regard the Christology of the book as a clear sign of its post-Christian origin. Ewald, according to his usual custom, picks out the different elements with a daring confidence, and leaves a result so complicated that no one can accept it in its details, while it is characterised in its great features by masterly judgment and sagacity. He places the composition of "the ground-work of the book at various intervals between 144 B.C. and cir. 120 B.C., and supposes that the whole assumed its present form in the first half of the century before Christ. Lücke (2nd ed.) distinguishes two great parts, an older part including cc. 1-36, and 72-105, which he dates from the beginning of the Maccabean struggle, and a later, cc. 37-71, which he assigns to the period of the rise of Herod the Great (141, &c.). He supposes, however, that later interpolations were made without attempting to ascertain their date. Dillmann upholds more decidedly the unity of the book, and assigns the chief part of it to an Aramaean writer of the time of John Hyrcanus (c. 110 B.C.). To this, according to him, "historical" and "Noachian additions" were made, probably in the Greek translation (*Eint.* lii.). Köstlin (quoted by Hilgenfeld, 96, &c.) assigns cc. 1-16, 21-36, 72-105, to about 110 B.C.; cc. 37-71 to c. B.C. 100-64; and the "Noachian additions" and c. 108 to the time of Herod the Great. Hilgenfeld himself places the original book (cc. 1-16; 20-36; 72-90; 91, 1-19; 93; 94-105) about the beginning of the first century before Christ (a. a. O. p. 145 n.). This book he supposes to have passed through the hands of a

\* The astronomical calculations by which Lawrence endeavoured to fix the locality of the writer in the

neighbourhood of the Caspian are inconclusive. Cf. Dillm. p. li.

Christian writer who lived between the times "of Saturninus and Marcion" (p. 181), who added the chief remaining portions, including the great Messianic section, cc. 37-71. In the face of these conflicting theories it is evidently impossible to dogmatize, and the evidence is insufficient for conclusive reasoning. The interpretation of the Apocalyptic histories (cc. 56, 57; 85-90), on which the chief stress is laid for fixing the date of the book, involves necessarily minute criticism of details, which belongs rather to a commentary than to a general Introduction; but notwithstanding the arguments of Hlilgenfeld and Jost (*Gesch. Jud.* ii. 218 n.), the whole book appears to be distinctly of Jewish origin. Some inconsiderable interpolations may have been made in successive translations, and large fragments of a much earlier date were undoubtedly incorporated into the work, but as a whole it may be regarded as describing an important phase of Jewish opinion shortly before the coming of Christ.

5. In doctrine the Book of Enoch exhibits a great advance of thought within the limits of revelation in each of the great divisions of knowledge. The teaching on nature is a curious attempt to reduce the scattered images of the O. T. to a physical system. The view of society and man, of the temporary triumph and final discomfiture of the oppressors of God's people, carries out into elaborate detail the pregnant images of Daniel. The figure of the Messiah is invested with majestic dignity as "the Son of God" (c. 105, 2 only), "whose name was named before the sun was made" (48, 3), and who existed "foretime in the presence of God" (62, 6; cf. Lawrence, *Prel. Diss.* li. f.). And at the same time His human attributes as "the son of man," "the son of woman" (c. 62, 5 only), "the elect one," "the righteous one," "the anointed," are brought into conspicuous notice. The mysteries of the spiritual world, the connexion of angels and men, the classes and ministries of the hosts of heaven, the power of Satan (40, 7; 65, 6), and the legions of darkness, the doctrines of resurrection, retribution, and eternal punishment (c. 22, cf. Dillm. p. xix.), are dwelt upon with growing earnestness as the horizon of speculation was extended by intercourse with Greece. But the message of the book is emphatically one of "faith and truth" (cf. Dillm. p. 32), and while the writer combines and repeats the thoughts of scripture, he adds no new element to the teaching of the prophets. His errors spring from an undisciplined attempt to explain their words, and from a proud exultation in present success. For the great characteristic by which the book is distinguished from the later apocalypse of Ezra [*ESDRAS, 2ND BOOK*] is the tone of triumphant expectation by which it is pervaded. It seems to repeat in every form the great principle that the world, natural, moral, and spiritual, is under the immediate government of God. Hence it follows that there is a terrible retribution reserved for sinners, and a glorious kingdom prepared for the righteous, and Messiah is regarded as the divine mediator of this double issue (c. 90, 91). Nor is it without a striking fitness that a patriarch translated from earth, and admitted to look upon the divine majesty, is chosen as "the herald of wisdom, righteousness, and judgment to a people who, even in suffering, saw in their tyrants only the victims of a coming vengeance."

6. Notwithstanding the quotation in St. Jude, and the wide circulation of the book itself, the

apocalypse of Enoch was uniformly and distinctly separated from the canonical scriptures. Tertullian alone maintained its authority (l. c.), while he admitted that it was not received by the Jews, Origen, on the other hand (*c. Cels.* v. p. 267, cf. Spenc.), and Augustine (*de Civ.* xv. 23, 4), definitively mark it as apocryphal, and it is reckoned among the apocryphal books in the Apostolic Constitutions (vi. 16), and in the catalogues of the *Synopsis S. Scripturæ*, Nicphorus (Crodner, *Zur Gesch. d. Kan.* 145), and Montfaucon (*Bibl. Coislin.* p. 193).

7. The literature of the subject has been already noticed incidentally. The German edition of Dillmann places within the reach of the student all the most important materials for the study of the book. Special points are discussed by Gfrörer, *Das Jahrh. d. Heils.* i. 3 ff.; C. Wieseler, *Die 70 Wochen des Daniel*, 1839. An attempt was made by the Rev. E. Murray (*Enoch restitutus*, &c., Lond. 1838) to "separate from the books of Enoch the book quoted by St. Jude," which met with little favour. [B. F. W.]

ENOCH, CITY. [ENOCH, No. 1.]

ENON. [AENON.]

EN-ROGEL (עֵן רֹגֵל; *πηγή Ρωγήλ*; *Fons Rogel*), a spring which formed one of the landmarks on the boundary-line between Judah (Josh. xv. 7) and Benjamin (xviii. 16). It was the point next to Jerusalem, and at a lower level, as is evident from the use of the words "ascended" and "descended" in these two passages. Here, apparently concealed from the view of the city, Jonathan and Ahimaz remained, after the flight of David, awaiting intelligence from within the walls (2 Sam. xvii. 17), and here, "by the stone Zoheleth, which is 'close to' (עֵן) En-rogel," Adonijah held the feast, which was the first and last act of his attempt on the crown (1 K. i. 9). These are all the occurrences of the name in the Bible. By Josephus on the last incident (*Ant.* vii. 14, §4) its situation is given as "without the city, in the royal garden," and it is without doubt referred to by him in the same connexion, in his description of the earthquake which accompanied the miracle of Uzziah (*Ant.* ix. 10, §4), and which, "at the place called Eroge," "shook down a part of the Eastern hill, "so as to obstruct the roads, and the royal gardens."

In the Targum, and the Arabic and Syriac versions, the name is commonly given as "the spring of the fuller" (עֵן רֹגֵל), and this is generally

accepted as the signification of the Hebrew name—*Rogel* being derived from *Ragal*, to tread, in allusion to the practice of the Orientals in washing linen.

In more modern times, a tradition, apparently first recorded by Brocardus, would make En-rogel the well of Job or Nehemiah (*Bir Eyub*), below the junction of the valleys of Kedron and Hinnom, and south of the Pool of Siloam. In favour of this is the fact that in the Arabic version of Josh. xv. 7 the name of Ain-Eyub, or "spring of Job," is given for En-rogel, and also that in an early Jewish Itinerary (Uri of Biel, in Hottinger's *Cippi Hebraici*) the name is given as "well of *Joab*," as if retaining the memory of Joab's connexion with Adonijah—a name

\* This natural interpretation of a name only slightly corrupt appears to have first suggested itself to Stanley (S. & P. 184).

which it still retains in the traditions of the Greek Christians (Williams, *Holy City*, 490). Against this general belief, some strong arguments are urged by Dr. Bouar in favour of identifying En-rogel with the present "Fountain of the Virgin," *Ain Ummud-Daraj* = "spring of the mother of steps"—the perennial source from which the Pool of Siloam is supplied (*Land of Promise*, App. v.). These arguments are briefly as follows:—

1. The *Bir Eyub* is a well and not a spring (En), while, on the other hand, the "Fountain of the Virgin" is the only real spring close to Jerusalem. Thus if the latter be not En-rogel, the single spring of this locality has escaped mention in the Bible.

2. The situation of the Fountain of the Virgin agrees better with the course of the boundary of Benjamin than that of the *Bir Eyub*, which is too far south.

3. *Bir Eyub* does not suit the requirements of 2 Sam. xvii. 17. It is too far off both from the city, and from the direct road over Olivet to the Jordan; and is in full view of the city (Van de Velde, i. 475), which the other spot is not.

4. The martyrdom of St. James was effected by casting him down from the temple wall into the valley of Kedron, where he was finally killed by a fuller with his washing-stick. The natural inference is that St. James fell near where the fullers were at work. Now *Bir Eyub* is too far off from the site of the temple to allow of this, but it might very well have happened at the Fountain of the Virgin. (See Stanley's *Sermons on the Apost. Age*, p. 333-4.)

5. *Daraj* and *Rogel* are both from the same root, and therefore the modern name may be derived from the ancient one, even though at present it is taken to allude to the "steps" by which the reservoir of the Fountain is reached.

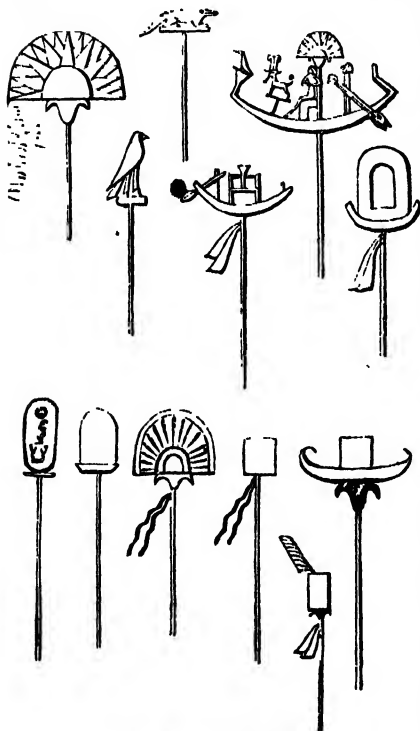

Add to these considerations (what will have more significance when the permanence of Eastern habits is recollected)—6. That the Fountain of the Virgin is still the great resort of the women of Jerusalem for washing and treading their clothes; and also—7. That the level of the king's gardens must have been above the *Bir Eyub*, even when the water is at the mouth of the well—and it is generally seventy or eighty feet below; while they must have been lower than the Fountain of the Virgin, which thus might be used without difficulty to irrigate them. (See Robinson, i. 331-334; and for the best description of the *Bir Eyub*, see Williams, *Holy City*, ii. 489-495.) [JERUSALEM.] [G.]

EN-SHEMESH (שֶׁמֶשׁ) = "spring of the sun;" ἡ πηγή τοῦ ἡλίου, πηγή Βαρθολομαῖος; *En-semes*, *id est*, *Fons Solis*), a spring which formed one of the landmarks on the north boundary of Judah (Josh. xv. 7) and the south boundary of Benjamin (xviii. 17). From these notices it appears to have been between the "ascent of Adummim"—the road leading up from the Jordan valley south of the *Wady Kelt*—and the spring of En-rogel, in the valley of Kedron. It was therefore east of Jerusalem and of the Mount of Olives. The only spring at present answering to this position is the *Ain-Haud* or *Ain-Chôt*—the "Well of the Apostles,"—about a mile below Bethany, the traveller's first halting-place on the road to Jericho. Accordingly this spring is generally identified with En-Shemesh. The aspect of *Ain-Haud* is such that the rays of the sun are on it the whole day. This is not inappropriate in a fountain dedicated to that luminary. [G.]

ENSIGN (עֲנִיָּן; in the A. V. generally "ensign," sometimes "standard;" עֲנִיָּן, "standard," with the exception of Cant. ii. 4, "banner;" עֲנִיָּן, "ensign"). The distinction between these three Hebrew terms is sufficiently marked by their respective uses: *nes* is a *signal*; *degel* a *military standard for a large division of an army*; and *oth*, the same for a *small* one. Neither of them, however, expresses the idea which "standard" conveys to our minds, viz., a *flag*; the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole. (1.) The notices of the *nes* or "ensign" are most frequent; it consisted of some well understood signal which was exhibited on the top of a pole from a bare mountain top (Is. xlii. 2, xviii. 3)—the very emblem of conspicuous isolation (Is. xxx. 17). Around it the inhabitants mustered, whether for the purpose of meeting an enemy (Is. v. 26, xviii. 3, xxxi. 9), which was sometimes notified by the blast of a trumpet (Jer. iv. 21, li. 27); or as a token of rescue (Ps. lx. 4; Is. xl. 10; Jer. iv. 6); or for a public proclamation (Jer. l. 2); or simply as a gathering point (Is. xlix. 22, lxii. 10). What the nature of the signal was, we have no means of stating; it has been inferred from Is. xxxii. 23, and Ez. xxvii. 7, that it was a flag; we do not observe a flag depicted either in Egyptian or Assyrian representations of vessels (Wilkinson, iii. 211; Bonomi, pp. 166, 167); but, in lieu of a flag, certain devices, such as the phoenix, flowers, &c., were embroidered on the sail; whence it appears that the device itself, and perhaps also the sail bearing the device, was the *nes* or "ensign." It may have been sometimes the name of a leader, as implied in the title which Moses gave to his altar "Jehovah-nissi" (Ex. xvii. 15). It may also have been, as Michaelis (*Suppl.* p. 1648) suggests, a blazing torch. The important point, however, to be observed is, that the *nes* was an occasional signal, and not a military standard, and that *elevation* and *conspicuity* are implied in the use of the term; hence it is appropriately applied to the "pole" on which the brazen serpent hung (Num. xxi. 8), which was indeed an "ensign" of deliverance to the pious Israelite; and again to the censers of Korah and his company, which became a "sign" or beacon of warning to Israel (Num. xvi. 38). (2.) The term *degel* is used to describe the standards which were given to each of the four divisions of the Israelite army at the time of the Exodus (Num. i. 52, ii. 2 ff., x. 14 ff.). Some doubt indeed exists as to its meaning in these passages, the LXX. and Vulgate regarding it not as the standard itself, but as a certain military division annexed to a standard, just as *velitum* is sometimes used for a body of soldiers (Tac. *Hist.* i. 70; Liv. viii. 8). The sense of *compact* and *martial array* does certainly seem to lurk in the word; for in Cant. vi. 4, 10, the brilliant glances of the bride's eyes are compared to the destructive advance of a well-arranged host, and a similar comparison is employed in reference to the bridegroom (Cant. v. 10); but on the other hand, in Cant. ii. 4, no other sense than that of a "banner" will suit, and we therefore think the rendering in the A. V. correct. No reliance can be placed on the term in Ps. xx. 5, as both the sense and the text are matters of doubt (see Olshausen and Hengstenberg, *in loc.*). A standard implies, of course, a standard-bearer; but the supposed notice to that officer in Is. x. 18, is incorrect,

the words meaning rather "as a sick man pineth away;" in a somewhat parallel passage (Is. lix. 19) the marginal version is to be followed, rather than the text. The character of the Hebrew military standards is quite a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem such as an animal, a boat, or the king's name (Wilkinson, i. 294). Rabbinical writers state the devices to have been as follows: for the tribe of Judah a lion; for Reuben a man; for Ephraim an ox; and for Dan an eagle (Cuzov, *Crit. App.* p. 667); but no reliance can be placed on this. As each of the four divisions, consisting of three tribes, had its standard, so had each tribe its "sign" (*oth*) or "ensign," probably in imitation of the Egyptians, among whom not only each battalion, but even each company had its particular ensign (Wilkinson, *l. c.*). We know nothing of its nature. The word occurs figuratively in Ps. lxxiv. 4, apparently in reference to the images of idol gods.

[W. L. B.]

Egyptian Standards, from Wilkinson.

**EN-TAPPUAH** (עֲנַתְּפֻאָה) = "spring of apple," or "citron;" עֲנַתְּפֻאָה *En-tappuah*. The boundary of Manasseh went from facing Shechem "to the inhabitants of En-tappuah" (Josh. xvii. 7). It is probably identical with Tappuah, the position of which will be elsewhere examined. [TAPPUAH.] This place must not be confounded with BETH-TAPPUAH in the mountain of Judah. [G.]

**EPHÆNETUS** (*Ἐφαηνέτος*), a Christian at Rome, greeted by St. Paul in Rom. xvi. 5, and

designated as his beloved, and the first fruit of Asia (so the majority of ancient MSS., and the critical editors: the received text has 'Ἀχάτας) unto Christ. The Synopsis of the Pseudo-Dorotheus makes him first bishop of Carthage, but Justinian remarks that the African churches do not recognise him. [H. A.]

**EP'APHRAS** (*Ἐπαφρᾶς*), a fellow-labourer with the Apostle Paul, mentioned Col. i. 7, as having taught the Colossian church the grace of God in truth, and designated a faithful minister (*διδάσκων*) of Christ on their behalf. (On the question whether Epaphras was the founder of the Colossian church, see the prolegomena to the Epistle, in Alford's *Greek Testament*, iii. 35 ff.) He was at that time with St. Paul at Rome (Col. iv. 12), and seems by the expression *ὁ ἐξ ὁμῶν*, there used, to have been a Colossian by birth. We find him again mentioned in the Epistle to Philemon (ver. 23), which was sent at the same time as that to the Colossians. St. Paul there calls him *ὁ συναρχμαρτύρος μου*, but whether the word represents matter of fact, or is only a tender and delicate expression of Epaphras's attention to the Apostle in his imprisonment (cf. Rom. xvi. 13), we cannot say.

Epaphras may be the same as Epaphroditus, who is called, in Phil. ii. 25, the Apostle of the Philippians, and having come from Philippi to Rome with contributions for St. Paul, was sent back with the Epistle. It has been supposed by many, and among them by Grotius. In all probability the name Epaphras is an abbreviation of Epaphroditus: but on the question of the identity of the persons, the very slight notices in the N. T. do not enable us to speak with any confidence. The name Epaphroditus was sufficiently common: see Tacit. *Ann.* xv. 55; Sueton. *Domit.* 14; Joseph. *Life*, §76. The martyrologies make Epaphras to have been first bishop of Colossae, and to have suffered martyrdom there. [H. A.]

**EPAPHRODITUS** (*Ἐπαφρόδιτος*, Phil. ii. 25, iv. 18). See above under EPAPHRAS. [H. A.]

**EPHAH** (עֶפְאָה; *Ἐφέα, Γαιφά, Ephā*), the first, in order, of the sons of Midian (Gen. xxv. 4, 1 Chr. i. 33), afterwards mentioned by Isaiah in the following words:—"The multitude of camels shall cover thee, the dromedaries of Midian and Ephah; all they from Sheba shall come: they shall bring gold and incense; and they shall shew forth the praises of the Lord. All the flocks of Kedar shall be gathered together unto thee, the rams of Nebaioth shall minister unto thee; they shall come up with acceptance on mine altar, and I will glorify the house of my glory" (Is. lx. 6, 7). This passage clearly connects the descendants of Ephah with the Midianites, the Keturahite Sheba, and the Ishmaelites, both in the position of their settlements, and in their wandering habits; and shows that, as usual, they formed a tribe bearing his name. But no satisfactory identification of this tribe has been discovered. The

Arabic word *عَفْهَة* (*Gheyyfeh*), which has been supposed to be the same as Ephah, is the name of a town, or village, near *Bulbeys* (the modern Bilbey), a place in Egypt, in the province of the Sharkeyeh, not far from Cairo: but the tradition that Ephah settled in Africa does not rest on sufficient authority. [MIDIAN; SHEBA.] [E. S. P.]

**EPHAH** (עֶפְאָה; *Ἐφέα, Ephā*). 1. Cubit of Caleb, in the line of Judah (1 Chr. ii. 46).

2. Son of Jahdal; also in the line of Judah (1 Chr. ii. 47).

### EPHAIH. [MEASURES.]

E'PHAI (following the *Keri*, עִפְי; but the original text is עִפְי = OPHAI; and so LXX. Ὀφεί; *Ophi*), a Netophathite, whose sons were among the "captains" (מְצָנִים) of the forces" left in Judah after the deportation to Babylon (Jer. xl. 8). They submitted themselves to Gedaliah, the Babylonian governor, and were apparently massacred with him by Ishmael (xii. 3, comp. xl. 13).

E'PHER (עִפְר; 'Apher, 'Opher; *Opher*, *Epher*), the second, in order, of the sons of Midian (Gen. xxv. 4, 1 Chr. i. 33), not mentioned in the Bible except in these genealogical passages. His settlements have not been identified with him by probability. According to Gesenius, the name is

equivalent to the Arabic *Ghifir*, غِفْر, signifying

"a calf;" and "a certain little animal, or insect, or animalcule." Two tribes bear a similar appellation,

*Ghifur* (غِفْر); but one was a branch of the first

Amalek, the other of the Ishmaelite Kināneh (cf. Causin, *Essai sur l'Hist. des Arabes*, i. 20, 297, and 298; and Abulfedā, *Hist. Antislamica*, ed. Fleischer, 196); neither is ascribed to Midian. The first settled about Yethrib (El-Medeenah); the second, in the neighbourhood of Mekkeh. [E. S. P.]

### EPHER (עִפְר; 'Apher, Alex. Γαφέρ; *Epher*).

1. A son of Ezra, among the descendants of Judah; possibly, though this is not clear, of the family of the great Caleb (1 Chr. iv. 17).

2. ('Opher). One of the heads of the families of Manasseh on the east of Jordan (1 Chr. v. 24). The name may be compared with that of Ophrah, the native place of Gideon, in Manasseh, on the west of Jordan. In the original the two are identical except in termination (עִפְר, עִפְרָה); and according to the LXX. (as above) the vowel-points were once the same. [G.]

### EPHES-DAM MIM (עִפְרִי דָמִימ; 'Epherēm; Alex. Ἐφεσδομμειν; in *finibus Dommin*), a place

between Socoh and Azekah, at which the Philistines were encamped before the affray in which Goliath was killed (1 Sam. xvii. 1). The meaning of the word is uncertain, but it is generally explained as the "epi" or "boundary of blood," in that case probably derived from its being the scene of frequent sanguinary encounters between Israel and the Philistines. Under the shorter form of PAS-DAMMIM it occurs once again in a similar connexion (1 Chr. xi. 13). For the situation of the place see ELATH, VALLEY OF. [G.]

EPHESIANS, THE EPISTLE TO THE, was written by the apostle St. Paul during his first captivity at Rome (Acts xxviii. 16), apparently immediately after he had written the epistle to the Colossians [COLOSSIANS, EP. TO], and during that period (perhaps the early part of A.D. 62) when his imprisonment had not assumed the severer character which seems to have marked its close.

This sublime epistle was addressed to the Christian church at the ancient and famous city of

### EPHESIANS, EPISTLE TO THE

Ephesus (see below), that church which the apostle had himself founded (Acts xix. 1 sq., comp. xviii. 19), with which he abode so long (τρίτην, Acts xx. 31), and from the elders of which he parted with such a warm-hearted and affecting farewell (Acts xx. 18-35). It does not seem to have been called out by any special circumstances, nor even to have involved any distinctly precautionary teaching (comp. Schneckenburger, *Beiträge*, p. 135 sq.), whether against Oriental or Judaistic theosophy, but to have been suggested by the deep love which the apostle felt for his converts at Ephesus, and which the mission of Tychicus, with an epistle to the Church of Colossae, afforded him a convenient opportunity of evincing in written teaching and exhortation. The epistle thus contains many thoughts that had pervaded the nearly contemporaneous epistle to the Colossians, reiterates many of the same practical warnings and exhortations, bears even the tinge of the same diction, but at the same time enlarges upon such profound mysteries of the divine counsels, displays so fully the *origin and developments of the Church in Christ*, its union, communion, and aggregation in Him, that this majestic epistle can never be rightly deemed otherwise than one of the most sublime and consolatory outpourings of the Spirit of God to the children of men. To the Christian at Ephesus dwelling under the shadow of the great temple of Diana, daily seeing its outward grandeur, and almost daily hearing of its pompous ritualism, the allusions in this epistle to that mystic building of which Christ was the corner-stone, the apostles the foundations, and himself and his fellow Christians portions of the august superstructure (ch. ii. 19-22), must have spoken with a force, an appropriateness, and a reassuring depth of teaching that cannot be over estimated.

The contents of this epistle easily admit of being divided into two portions, the first mainly *doctrinal* (ch. i.—iii.), the second *hortatory and practical*.

The doctrinal portion opens with a brief address to the saints in Ephesus (see below), and rapidly passes into a sublime ascription of praise to God the Father, who has predestinated us to the adoption of sons, blessed and redeemed us in Christ, and made known to us His eternal purpose of uniting all in Him (ch. i. 3-14). This not unnaturally evokes a prayer from the apostle that his converts may be enlightened to know the hope of God's calling, the riches of His grace, and the magnitude of that power which was displayed in the resurrection and transcendent exaltation of Christ,—the Head of His body, the Church (ch. i. 15-23). Then, with a more immediate address to his converts, the apostle reminds them how, dead as they had been in sin, God had quickened them, raised them, and even enthroned them with Christ,—and how all was by grace, not by works (ch. ii. 1-10). They were to remember, too, how they had once been alienated and yet were now brought nigh in the blood of Christ; how He was their Peace, how by Him both they and the Jews had access to the Father, and how on Him as the corner-stone they had been built into a spiritual temple to God (ch. ii. 11-22). On this account, having heard, as they must have done, how to the apostle was revealed the profound mystery of this call of the Gentile world, they were not to faint at his troubles (ch. iii. 1-13): nay, he prayed to the great Father of all to give them inward strength to teach them with the love of Christ and fill them with the fulness of God (ch. iii. 13-19). The prayer is concluded by

a sublime doxology (ch. iii. 20, 21), which serves to usher in the more directly practical portion.

This the apostle commences by entreating them to walk worthy of this calling, and to keep the unity of the Spirit: there was but one body, one Spirit, one Lord, and one God (ch. iv. 1-6). Each too had his portion of grace from God (ch. iv. 7-10), who had appointed ministering orders in the Church, until all come to the unity of the faith, and grow up and become united with the living Head, even Christ (ch. iv. 11-16). Surely then they were to walk no longer as darkened, feelingless heathen; they were to put off the old man, and put on the new (ch. iv. 17-24). This too was to be practically evinced in their outward actions; they were to be truthful, gentle, honest, pure, and forgiving; they were to walk in love (ch. iv. 25-v. 2). Fornication, covetousness, and impurity, were not even to be named; they were once in heathen darkness, now they are light, and must reprove the deeds of the past (ch. v. 3-14). Thus were they to walk exactly, to be filled with joy, to sing, and to give thanks (ch. v. 15-21). Wives were to be subject to their husbands, husbands to love and cleave to their wives (ch. v. 22-33); children were to honour their parents, parents to bring up holily their children (ch. vi. 1-4); servants and masters were to perform to each other their reciprocal duties (ch. vi. 5-9).

With a noble and vivid exhortation to arm themselves against their spiritual foes with the armour of God (ch. vi. 10-20), a brief notice of the coming of Tychicus (ch. vi. 21, 22), and a twofold doxology (ch. vi. 23, 24), this sublime epistle comes to its close.

With regard to the *authenticity* and *genuineness* of this epistle, it is not too much to say that there are no just grounds for doubt. The testimonies of antiquity are unusually strong. Even if we do not press the supposed allusions in Ignatius, *Eph.* ch. 12, and Polycarp, *Philipp.* ch. 12, we can confidently allude Irenæus, *Haer.* v. 2, 3, v. 14, 3, Clem. Alex. *Pædagog.* i. p. 108 (ed. Pott.), *Strom.* iv. p. 592 (ed. Pott.), Origen, *Contr. Cels.* iii. 20, Tertull. *de Præscr. Haer.* ch. 36, and after them the constant and persistent tradition of the ancient Church. Even Marcion did not deny that the epistle was written by St. Paul, nor did heretics refuse occasionally to cite it as confessedly due to him as its author; comp. Irenæus, *Haer.* i. 8, 5. In recent times, however, its genuineness has been somewhat vehemently called in question. De Wette, both in the introductory pages of his *Commentary* on this Ep. (ed. 2, 1847), and in his *Introduction to the N. T.* (ed. 5, 1848), labours to prove that it is a mere spiritless expansion of the Ep. to the Colossians, though compiled in the Apostolic age: Schwieger (*Nachapost. Zeitalt.* ii. 330 sq.); Baur (*Paulus*, p. 418 sq.), and others advance a step further and reject both epistles as of no higher antiquity than the age of Montanism and early Gnosticism. Without here entering into the details, it seems just to say that the adverse arguments have been urged with a certain amount of specious plausibility, but that the replies have been so clear, satisfactory, and in some cases crushing, as to leave no reasonable and impartial inquirer in doubt as to the authorship of the epistle. On the one hand we have mere subjective judgments, not unmarked by arrogance, relying mainly on supposed divergences in doctrine and presumed insipidities of diction, but wholly destitute of any sound historical basis; on

the other hand we have unusually convincing counter-investigations, and the unvarying testimony of the ancient Church. If the discrepancies in matter and style are so decided as to lead a writer of the 19th century to deny confidently the genuineness of this epistle, how are we to account for its universal reception by writers of the 2nd and 3rd centuries, who spoke the language in which it was written, and who were by no means unacquainted with the phenomena of pious fraud and literary imposture?

For a detailed reply to the arguments of De Wette and Baur, the student may be referred to Meyer, *Kinleit. z. Eph.* p. 19 sq. (ed. 2), Davidson, *Introd. to N. T.* ii. p. 352 sq., and Alford, *Prolegomena*, p. 8.

Two special points require a brief notice.

(1.) The *readers* for whom this epistle was designed. In the opening words, Παῦλος ἀπόστολος Χριστοῦ Ἰησοῦ διὰ θελήματος Θεοῦ τοῖς ἁγίοις τοῖς ὁσίν ἐν Ἐφέσῳ καὶ πιστοῖς ἐν Χριστῷ Ἰησοῦ, the words ἐν Ἐφέσῳ are omitted by B. 67, Basil (expressly), and possibly Tertullian. This, combined with the somewhat noticeable omission of all greetings to the members of a Church with which the apostle stood in such affectionate relation, and some other internal objections, have suggested a doubt whether these words really formed a part of the original text. At first sight these doubts seem plausible; but when we oppose to them (a) the overwhelming weight of diplomatic evidence for the insertion of the words, (b) the testimony of all the versions, (c) the universal designation of this epistle by the ancient Church (Marcion standing alone in his assertion that it was written to the Laodiceans) as an epistle to the *Ephesians*, (d) the extreme difficulty in giving any satisfactory meaning to the isolated participle, and the absence of any parallel usage in the Apostle's writings,—we can scarcely feel any doubt as to the propriety of removing the brackets in which these words are enclosed in the 2nd edition of *Tischendorf*, and of considering them an integral part of the original text. If called upon to supply an answer to, or an explanation of the internal objections, we must record the opinion that none on the whole seems so free from objection as that which regards the Epistle as also designed for the benefit of churches either continuous to, or dependent on that of Ephesus. The counter-arguments of Meyer, though ably urged, are not convincing. Nor can an appeal to the silence of writers of the ancient church on this further destination be conceived of much weight, as their references are to the usual and titular designation of the Epistle, but do not, and are not intended to affect the question of its wider or narrower destination. It is not unnatural to suppose that the special greetings might have been separately entrusted to the bearer Tychicus, possibly himself an Ephesian, and certainly commissioned by the Apostle (ch. vi. 22) to inform the Ephesians of his state and circumstances.

(2.) The question of priority in respect of composition between this Epistle and that to the Colossians is very difficult to adjust. On the whole, both internal and external considerations seem somewhat in favour of the priority of the Epistle to the Colossians. Comp. Neander, *Planting*, i. 329 (Bohn), Schleiermacher, *Stud. u. Krit.* for 1832, p. 500, and Wieseler, *Chronol.*, p. 450, sq. On the similarity of contents, see COLOSSIANS, Ep. TO.

(3.) The opinion that this Epistle and those to the

Colossians and to Philemon were written during the Apostle's imprisonment at Cæsarea (Acts xxi. 27-xxvi. 32) has already been noticed [COLOSSIANS, Ep. to], and on deliberation rejected. The weight of probability seems distinctly on the side of the opinion of the ancient Church, that the present Epistle was written during the Apostle's first imprisonment in Rome.

The editions of this Epistle have been numerous. We may specify those of Rückert (Leipz. 1834), Haless (Eal. 1834),—an admirable edition, completely undervalued by De Wette; Olshansen (Königsb. 1840), De Wette (Leipz. 1847), Stier (Berl. 1848), Meyer (Gött. 1853); and in our own country those of Edlie (Glasg. 1854), Ellicott (Lond. 1855), and Alford (Lond. 1857). [C. J. E.]

**EPHESUS** (Ἐφεσός), an illustrious city in the district of Ionia (πόλις Ἰωνίας ἐπιφανεστάτη, Steph. Byz. s. v.), nearly opposite the island of Samos, and about the middle of the western coast of the peninsula commonly called Asia Minor. Not that this geographical term was known in the first century. The ASIA of the N. T. was simply the Roman province which embraced the western part of the peninsula. Of this province Ephesus was the capital. [EPHESIUS.]

Among the more marked physical features of the peninsula are the two large rivers, Hermus and Maeander, which flow from a remote part of the interior westward to the Archipelago, Smyrna (Rev. ii. 8) being near the mouth of one and Miletus (Acts xx. 17) of the other. Between the valleys drained by these two rivers is the shorter stream and smaller basin of the Cayster, called by the Turks *Aÿtschuk-Mendere*, or the Little Maeander. Its upper level (often called the Caystrian meadows) was closed to the westward by the gorge between Galleus and Pactyas, the latter of these mountains being a prolongation of the range of Messogis which bounds the valley of the Maeander on the north, the former more remotely connected with the range of Tmolus which bounds the valley of the Hermus on the south. Beyond the gorge and towards the sea the valley opens out again into an alluvial flat (Herod. ii. 10), with hills rising abruptly from it. The plain is now about 5 miles in breadth, but formerly it must have been smaller and some of the hills were once probably islands. Here Ephesus stood, partly on the level ground and partly on the hills.

Of the hills, on which a large portion of the city was built, the two most important were Pion and

Site of Ephesus. From Laborde.

Coreossus, the latter on the S. of the plain, and being in fact almost a continuation of Pactyas, the former being in front of Coreossus and near it, though separated by a deep and definite valley. Further to the N.E. is another conspicuous eminence. It seems to be the hill mentioned by Procopius (*de Aedif.* v. i.) as one on which a church dedicated to St. John was built; and its present name *Ayasuluk* is thought to have reference to him, and to be a corruption of ὁ ἅγιος θεόλογος. Ephesus is closely connected with this apostle, not only as being the scene (Rev. i. 11, ii. 1) of the most prominent of the churches of the Apocalypse, but also in the story of his later life as given by Eusebius. Possibly his Gospel and Epistles were written here. There is a tradition that the mother of our Lord was buried at Ephesus, as also Timothy and St. John; and Ignatius addressed one of his epistles to the church of this place (τῇ ἐκκλησίᾳ τῇ ἁγιομακαρίστῃ, τῇ οὖσῃ ἐν Ἐφέσῳ τῆς Ἀσίας, *He-fule, Pat. Apostol.* p. 154), which held a conspicuous

position during the early ages of Christianity, and was in fact the metropolis of the churches of this part of Asia. But for direct Biblical illustration we must turn to the life and writings of St. Paul, in following which minutely it is remarkable how all the most characteristic features of ancient Ephesus come successively into view.

1. *Geographical Relations.*—These may be viewed in connexion, first with the sea and then with the land.

All the cities of Ionia were remarkably well situated for the growth of commercial prosperity (Herod. i. 142), and none more so than Ephesus. With a fertile neighbourhood and an excellent climate, it was also most conveniently placed for traffic with all the neighbouring parts of the Levant. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus (Strab. xiv. p. 950): its harbour (named Panormus) at the mouth of the Cayster, was elaborately constructed; though alluvial matter caused serious hindrances

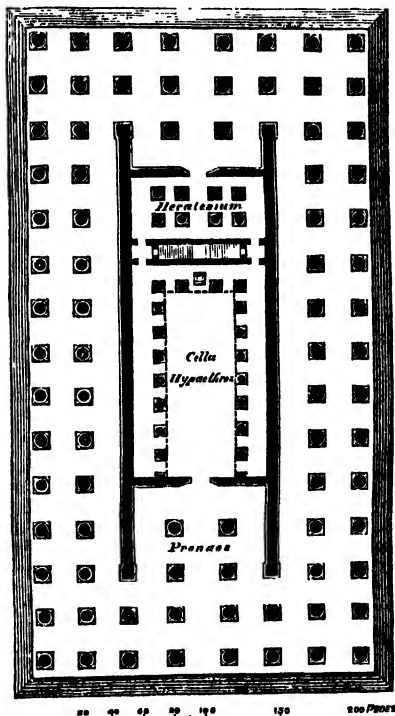

both in the time of Attalus, and in St. Paul's own time (Tac. *Ann.* xvi. 23). The Apostle's life alone furnishes illustrations of its mercantile relations with Achaia on the W., Macedonia on the N., and Syria on the E. At the close of his second missionary circuit, he sailed across from Corinth to Ephesus (Acts xviii. 19) when on his way to Syria (ib. 21, 22); and there is some reason for believing that he once made the same short voyage over the Aegean in the opposite direction at a later period [CORINTHIANS, FIRST EP. TO]. On the third missionary circuit, besides the notice of the journey from Ephesus to Macedonia (xix. 21, xx. 1), we have the coast voyage on the return to Syria given in detail (xx. xxi.) and the geographical relations of this city with the islands and neighbouring parts of the coast minutely indicated (xx. 15-17). To these passages we must add 1 Tim. i. 3; 2 Tim. iv. 12, 20; though it is difficult to say confidently whether the journeys implied there were by land or by water. See likewise Acts xix. 27, xx. 1.

As to the relations of Ephesus to the inland regions of the continent, these also are prominently brought before us in the Apostle's travels. The "upper coasts" (*τὰ ἀνωτρεπικὰ μέρη*, Acts xix. 1) through which he passed, when about to take up his residence in the city, were the Phrygian table-lands of the interior; and it was probably in the same district that on a previous occasion (Act xvi. 6) he formed the unsuccessful project of preaching the Gospel in the district of Asia. Two great roads at least, in the Roman times, led eastward from Ephesus; one through the passes of Tmolus to Sardis (Rev. iii. 1) and thence to Galatia and the N.E., the other round the extremity of Pactyas to Magnesia, and so up the valley of the Maeander to Iommum, whence the communication was direct to the Euphrates and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus corresponding to these roads respectively. There were also coast-roads leading northwards to Smyrna and southwards to Miletus. By the latter of these it is probable that the Ephesian elders travelled, when summoned to meet Paul at the latter city (Acts xx. 17, 18). Part of the pavement of the Sardian road has been noticed by travellers under the cliffs of Gallaeus. All these roads, and others, are exhibited on the map in Leake's *Asia Minor*.

2. *Temple and worship of Diana.*—Conspicuous at the head of the harbour of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. This building was raised on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the Persian war, was burnt down in the night when Alexander the Great was born; and another structure, raised by the enthusiastic co-operation of all the inhabitants of "Asia" had taken its place. Its dimensions were very great. In length it was 425 feet, and in breadth 220. The columns were 127 in number, and each of them was 60 feet high. In style too it constituted an epoch in Greek art (Vitruv. iv. 1); since it was here first that the graceful Ionic order was perfected. The magnificence of this sanctuary was a proverb throughout the civilised world. ('Ο τῆς Ἀρτέμιδος ναὸς ἐν Ἐφέσῳ μόνος ἐστὶ θεῶν οἶκος, Philo Byz. *Spect. Mund.* 7.) All these circumstances gave increased force to the architectural allegory in the great epistle which St. Paul

wrote in this place (1 Cor. iii. 9-17), to the passages where imagery of this kind is used in the epistles addressed to Ephesus (Ephes. ii. 19-22; 1 Tim. iii. 15, vi. 19; 2 Tim. ii. 19, 20), and to the words spoken to the Ephesian elders at Miletus (Acts xx. 32).

The chief points connected with the uproar at Ephesus (Acts xix. 23-41) are mentioned in the article DIANA; but the following details must be added. In consequence of this devotion the city of Ephesus was called *νεώκοπος* (ver. 35) or "warden" of Diana. This was a recognised title applied in such cases, not only to individuals, but to communities. In the instance of Ephesus, the term is abundantly found both on coins and on inscriptions. Its *neocorate* was, in fact, as the "town-clerk" said, proverbial. Another consequence of the celebrity of Diana's worship at Ephesus was, that a

Plan of the Temple of Diana at Ephesus (From Guhl's *Ephesus*.)

large manufactory grew up there of portable shrines (*ναοὶ*, ver. 24, the *ἀφιδρωματα* of Dionys. Halicarn. ii. 2, and other writers) which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (*ὁ χαλκεύς*, 2 Tim. iv. 14) was one. The case of Demetrius the "silversmith" (*ἀργυροποιός* in the Acts) is explicit. He was alarmed for his trade, when he saw the Gospel, under the preaching of St. Paul, gaining ground upon idolatry and superstition; and he spread a panic among the craftsmen of various grades, the *τέχνιται* (ver. 24) or designers, and the *ἐργάται*

(v. 25) or common workmen, if this is the distinction between them.

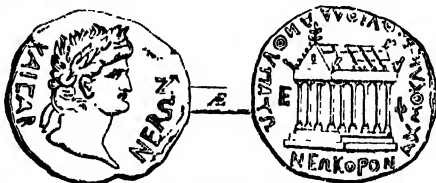

3. *The Asiarchs*.—Public games were connected with the worship of Diana at Ephesus. The month of May was sacred to her. The uproar mentioned in the Acts very probably took place at this season. St. Paul was certainly at Ephesus about that time of the year (1 Cor. xvi. 8); and Demetrius might well be peculiarly sensitive, if he found his trade failing at the time of greatest concourse. However this may be, the Asiarchs (*Ἀσιάρχαι*, A. V. "chiefs of Asia," were present (Acts xix. 31). These were officers appointed, after the manner of the aediles at Rome, to preside over the games which were held in different parts of the province of Asia, just as other provinces had their *Galatarchs*, *Lycaurachs*, &c. Various cities would require the presence of these officers in turn. In the account of Polycarp's martyrdom at Smyrna (Hefele, *Pat. Apost.* p. 286) an important part is played by the Asiarch Philip. It is a remarkable proof of the influence which St. Paul had gained at Ephesus, that the Asiarchs took his side in the disturbance. See Dr. Wordsworth's note on Acts xix. 31. [ASIAARCHÆ.]

4. *Study and practice of magic*.—Not unconnected with the preceding subject was the remarkable prevalence of magical arts at Ephesus. This also comes conspicuously into view in St. Luke's narrative. The peculiar character of St. Paul's miracles (*δυνάμεις οὐ τὰς τυχοῦσας*, ver. 11) would seem to have been intended as antagonistic to the prevalent superstition. In illustration of the magical books which were publicly burnt (ver. 19) under the influence of St. Paul's preaching, it is enough here to refer to the *Ἐφέσια γράμματα* (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were carried about as amulets. The faith in these mystic syllables continued, more or less, till the sixth century. See the Life of Alexander of Tralles in the *Dict. of Bios*.

5. *Provincial and municipal government*.—It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (*ἀνθύπατοι*, "deputies," A. V.) specially mentioned (ver. 38). Nor is it necessary to inquire here whether the plural in this passage is generic, or whether the governors of other provinces were present in Ephesus at the time. Again we learn from Pliny (v. 31) that Ephesus was an assize-town (*forum* or *conventus*); and in the sacred narrative (ver. 38) we find the court-days alluded to as actually being held (*ἀγόραισι ἄνοιγται*, A. V. "the law is open") during the uproar; though perhaps it is not absolutely necessary to give the expression this exact reference as to time (see Wordsworth). Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate (*γερονσία* or *βουλὴ*) is mentioned, not only by Strabo, but by Josephus (*Ant.* xiv. 10, §25, xvi. 6, §§4, 7); and St. Luke, in the narrative before us, speaks of the *δῆμος* (ver. 30, 33, A. V. "the people") and of its customary assemblies (*ἐκκλησίαι*, ver. 39, A. V. "a lawful assembly"). That the tumultuary meeting which was gathered on the occasion in question should take place in the theatre (ver. 29, 31) was nothing extraordinary. It was at a meeting in the theatre at Cæsarea that Agrippa I. received his death-

stroke (Acts xii. 23), and in Greek cities this was often the place for large assemblies (*Tac. Hist.* ii. 80; *Val. Max.* ii. 2). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "Town-Clerk" (*γραμματεὺς*) or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility.

It is remarkable how all these political and religious characteristics of Ephesus, which appear in the sacred narrative, are illustrated by inscriptions and coins. An *ἀρχεῖον* or state-paper office is mentioned on an inscription in Chishull. The *γραμματεὺς* frequently appears; so also the *Ἀσισάρχαι* and *ἀνθύπατοι*. Sometimes these words are combined in the same inscription: see for instance Bockh, *Corp. Insc.* 2999, 2994. The following is worth quoting at length, as containing also the words *δῆμος* and *νεώκορος*:—"Ἡ φιλοσεβαστὸς Ἐφεσίων βουλὴ καὶ ὁ νεώκορος δῆμος καθιέρωσαν ἐπὶ ἀνθυπάτου Πεδουκαίου Πρεσκέιου ψηφισαμένου Τιβ. Κλ. Ἰταλικοῦ τοῦ γραμματέως τοῦ δῆμου. 2966. The coins of Ephesus are full of allusions to the worship of Diana in various aspects. The word *νεώκορος* is of frequent occurrence. That which is given below has also the word *ἀνθύπατος*: it exhibits an image of the temple, and, bearing as it does the name and head of Nero, it must have been struck about the time of St. Paul's stay in Ephesus.

Coins of Ephesus, exhibiting the Temple of Diana

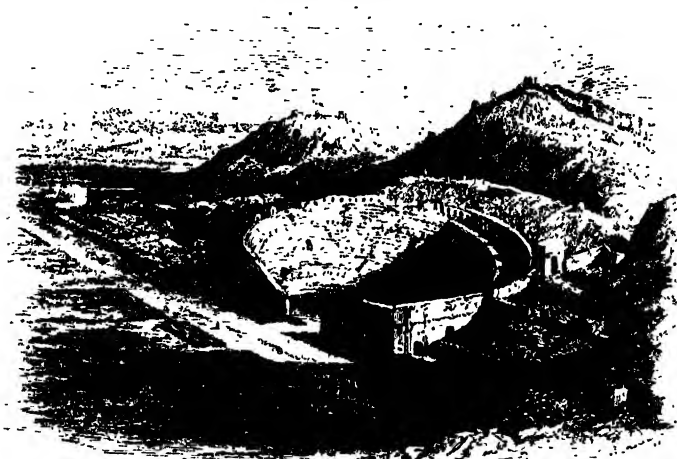

We should enter on doubtful ground if we were to speculate on the Gnostic and other errors which grew up at Ephesus in the later Apostolic age, and which are foretold in the address at Miletus, and indicated in the Epistle to the Ephesians, and more distinctly in the Epistles to Timothy. It is more to our purpose if we briefly put down the actual facts recorded in the N. T. as connected with the rise and early progress of Christianity in this city.

That Jews were established there in considerable numbers is known from Josephus (*ll. c.*), and might be inferred from its mercantile eminence; but it is also evident from Acts ii. 9, vi. 9. In harmony with the character of Ephesus as a place of concourse and commerce, it is here, and here only, that we find disciples of John the Baptist explicitly mentioned after the ascension of Christ (Acts xviii. 25, xix. 3). The case of Apollos (xviii. 24) is an exemplification further of the intercourse between this place and Alexandria. The first seeds of Christian truth were possibly sown at Ephesus immediately after the Great Pentecost (Acts ii.). Whatever previous plans St. Paul may have entertained (xvi. 6), his first visit was on his return from the second missionary circuit (xviii. 19-21); and his stay on that occasion was very short: nor is there any proof that he found any Christians at Ephesus; but he left there Aquila and Priscilla (ver. 19), who both then and at a later period (2 Tim. iv. 19) were of signal service. In St.

Paul's own stay of more than two years (xix. 8, 10, xx. 31), which formed the most important passage of his third circuit, and during which he laboured, first in the synagogue (xix. 8), and then in the school of Tyrannus (ver. 9), and also in private houses (xx. 20), and during which he wrote the First Epistle to the Corinthians, we have the period of the chief evangelization of this shore of the Aegean. The direct narrative in Acts xix. receives but little elucidation from the Epistle to the Ephesians, which was written after several years from Rome; but it is supplemented in some important particulars (especially as regards the Apostle's personal habits of self-denial, xx. 34) by the address at Miletus. This address shows that the church at Ephesus was thoroughly organised under its presbyters. At a later period TIMOTHY was set over them, as we learn from the two epistles addressed to him. Among St. Paul's other companions, two, Trophimus and Tychicus, were natives of Asia (vv. 4), and the latter probably (2 Tim. iv. 12), the former certainly (Acts xxi. 29), natives of Ephesus. In the same connexion we ought to mention Onesiphorus (2 Tim. i. 16-18) and his household (iv. 19). On the other hand must be noticed

certain specified Ephesian antagonists of the Apostle, the sons of Sceva and his party (Acts xix. 14), Hymeneus and Alexander (1 Tim. i. 20; 2 Tim. iv. 14), and Phygellus and Hermogenes (2 Tim. i. 15).

The site of ancient Ephesus has been visited and examined by many travellers during the last 200 years; and descriptions, more or less copious, have been given by Pococke, Tournefort, Spon and Wheler, Chandler, Ponsjoulat, Prokock, Beaujour, Schubert, Arundell, Follows, and Hamilton. The fullest accounts are, among the older travellers, in Chandler, and among the more recent, in Hamilton. Some views are given in the second volume of the *Ionian Antiquities*, published by the Dilettanti Society. Lenke, in his *Asia Minor*, has a discussion on the dimensions and style of the Temple. The whole place is now utterly desolate, with the exception of the small Turkish village at *Ayasuluk*. The ruins are of vast extent, both on Coressus and on the plain; but there is great doubt as to many topographical details. In Kiepert's *Hellas* is a map, more or less conjectural, the substance of which will be found in the *Dict. of Geog. s. v. Ephesus*. Guhl's plans also are mostly from Kiepert.

View of the theatre at Ephesus. (from Laborde)

It is satisfactory, however, that the position of the theatre on Mount Prion is absolutely certain. Follows says it must have been one of the largest in the world. A view of it, from Laborde, is given above. The situation of the temple is doubtful, but it probably stood where certain large masses remain on the low ground, full in view of the theatre. The disappearance of the temple may easily be accounted for, partly by the rising of the soil, and partly by the incessant use of its materials for mediæval buildings. Some of its columns are said to be in St. Sophia at Constantinople, and even in the cathedrals of Italy.

To the works above referred to must be added, Perry, *De rebus Ephesiensibus* (Gött. 1837), a slight sketch; Guhl, *Ephesiaca* (Berl. 1843), a very elaborate work; Hemsen's *Pantheus* (Gött. 1830), which contains a good chapter on Ephesus; Biscoe *On the Acts* (Oxf. 1829), pp. 274-285; Mr. Akerman's paper on the Coins of Ephesus in the *Trans.*

of the Numismatic Soc. 1841; Gronov. *Antiq. Græc.* vii. 387-401; and an article by Ampère in the *Rev. des Deux Mondes* for Jan. 1842.

An elaborate work on Ephesus is understood to be in preparation by Mr. Falkener. [J. S. H.]

**EPH'AL** (עֶפְרָא; Ἀφαῖα; Alex. Ὀφλάδ; *Ophlat*), a descendant of Judah, of the family of Hezon and of Jehuameel (1 Chr. ii. 37).

**EPHOD** (תֵּיֶשֶׁת), a sacred vestment originally appropriate to the High-priest (Ex. xxviii. 4), but afterwards worn by ordinary priests (1 Sam. xxii. 18), and deemed characteristic of the office (1 Sam. ii. 28, xiv. 3; Hos. iii. 4). For a description of the robe itself see HIGH-PRIEST. A kind of ephod was worn by Samuel (1 Sam. ii. 18), and by David, when he brought the ark to Jerusalem (2 Sam. vi. 14; 1 Chr. xv. 27); it differed from the priestly ephod in material, being made of ordinary linen (*bad*), whereas the other was of fine

linen (*shesh*); it is noticeable that the LXX. does not give *ἐπωμίδις* or *Ἐφωδὶ* in the passages last quoted, but terms of more general import, *στολή* *ἐξάλλος*, *στολή* *βυσσίνη*. Attached to the ephod of the High-priest was the breast-plate with the Urim and Thummim; this was the ephod *κατ' ἐξοχήν*, which Abiathar carried off (1 Sam. xxii. 6) from the tabernacle at Nob (1 Sam. xxi. 9), and which David consulted (1 Sam. xxiii. 9, xxx. 7). The importance of the ephod as the receptacle of the breast-plate led to its adoption in the idolatrous forms of worship instituted in the time of the Judges (Judg. viii. 27, xvii. 5, xviii. 14 ff.). The amount of gold used by Gideon in making his ephod (Judg. viii. 26) has led Gesenius (*Thesaur.* p. 135), following the Peshito version, to give the word the meaning of an idol-image, as though that and not the priest was clothed with the ephod: but there is no evidence that the idol was so invested, nor does such an idea harmonise with the general use of the ephod. The ephod itself would require a considerable amount of gold (Ex. xxviii. 6 ff., xxxix. 2 ff.); but certainly not so large a sum as is stated to have been used by Gideon; may we not therefore assume that to *make an ephod* implied the introduction of a new system of worship with its various accessories, such as the graven image, which seems from the prominence assigned to it in Judg. xvii. 31 to represent the Urim and Thummim, the molten image, and the Teraphim (xvii. 4, 5), which would require a large consumption of metal? [W. L. B.]

#### EPHOD (עֶפֹד; *Σουφί*, Alex. Ουφίδ; *Ephod*).

Hanniel the son of Ephod, as head of the tribe of Manasseh, was one of the men appointed to assist Joshua and Eleazar in the apportionment of the land of Canaan (Num. xxxiv. 23).

EPHRAIM (עִפְרַיִם; *Ἐφραΐμ*; Joseph. *Ἐφραΐμης*; *Ephraim*), the second son of JOSEPH by his wife Asenath. He was born during the seven years of plenty, and an allusion to this is possibly latent in the name, though it may also allude to Joseph's increasing family:—"The name of the second he called Ephraim (i. e. double fruitfulness), for God hath caused me to be fruitful" (עִפְרַיִם, *hiphrani*) in the land of my affliction" (Gen. xli. 52, xlv. 20).<sup>a</sup>

The first indication we have of that ascendancy over his elder brother Manasseh, which at a later period the tribe of Ephraim so unmistakably possessed, is in the blessing of the children by Jacob, Gen. xlviii.—a passage on the age and genuineness of which the severest criticism has cast no doubt (Tuch, *Genesis*, 548; Ewald, i. 534, note). Like his own father, on an occasion not dissimilar, Jacob's eyes were dim so that he could not see (xlviii. 10,

<sup>a</sup> Josephus (*Ant.* ii. 6, §1) gives the derivation of the name somewhat differently—"restorer, because he was restored to the freedom of his forefathers;" ἀποδοῦναι . . . διὰ τὸ ἀποδοῦναι εἶλα.

<sup>b</sup> "I will make thee fruitful," עִפְרַיִם, *Maphraeh*, Gen. xlviii. 4; "Be thou fruitful," עִפְרַיִם, *Phreh*, xxxv. 11; both from the same root as the name *Ephraim*.

<sup>c</sup> There seems to have been some connexion between Ephraim, or Bethlehem, and Ephraim, the clue to which is now lost (Ewald, *Genes.* i. 493, note).

The expression "Ephraimite" is generally applied to a native of Ephraim, i. e. Bethlehem; but there are some instances of its meaning an Ephraimite.

comp. xvii. 1). The intention of Joseph was evidently that the right hand of Jacob should convey its ampler blessing to the head of Manasseh, his first-born, and he had so arranged the young men. But the result was otherwise ordained. Jacob had been himself a younger brother, and his words show plainly that he had not forgotten this, and that his sympathies were still with the younger of his two grandchildren. He recalls the time when he was flying with the birthright from the vengeance of Esau; the day when, still a wanderer, God Almighty had appeared to him at "Luz in the land of Canaan," and blessed him in words which foreshadowed the name of <sup>b</sup> Ephraim; the still later day when the name of Ephraim <sup>c</sup> became bound up with the sorest trial of his life (xlviii. 7, xxxv. 16). And thus, notwithstanding the pre-arrangement and the remonstrance of Joseph, for the second time in that family, the younger brother was made greater than the elder—Ephraim was set before Manasseh (xlviii. 19, 20).

Ephraim would appear at that time to have been about 21 years old. He was born before the beginning of the seven years of famine, towards the latter part of which Jacob had come to Egypt, 17 years before his death (Gen. xlvii. 28). Before Joseph's death Ephraim's family had reached the third generation (Gen. i. 23), and it must have been about this time that the affray mentioned in 1 Chr. vii. 21 occurred, when some of the sons were killed on a plundering expedition along the sea-coast to rob the cattle of the men of Gath, and when Ephraim named a son Beriah, to perpetuate the memory of the disaster which had fallen on his house. [BERIAH.] Obscure as is the interpretation of this fragment, it enables us to catch our last glimpse of the Patriarch, mourning inconsolable in the midst of the circle of his brethren, and at last commemorating his loss in the name of the new child, who, unknown to him, was to be the progenitor of the most illustrious of all his descendants—Jehoshua, or Joshua, the son of Nun (1 Chr. vii. 27; see Ewald, i. 491). To this early period too must probably be referred the circumstance alluded to in Ps. lxxviii. 9, when the "children of Ephraim, carrying slack bows," turned back in the day of battle." Certainly no instance of such behaviour is recorded in the later history.

The numbers of the tribe do not at once fulfil the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i. 32, 33, ii. 19) its numbers were 40,500, placing it at the head of the children of Rachel—Manasseh's number being 32,200, and Benjamin's 35,400. But forty years later, on the eve of the conquest (Num. xxvi. 37), without any apparent cause, while Manasseh had advanced to 52,700, and Benjamin to 45,600, Ephraim had decreased to 32,500, the only smaller number

These are 1 Sam. i. 1, 1 K. xi. 26; in both of which the word is accurately transferred to our version. But in Judg. xii. 5, where the Hebrew word is the same, and with the definite article (עִפְרַיִמִּי), it is incorrectly rendered "an Ephraimite." In the other occurrences of the word "Ephraimite" in vers. 4, 5, 6 of the same chapter, the Hebrew is "Ephraim." This narrative raises the curious inquiry, which we have no means of satisfying, whether the Ephraimites had not a peculiar accent or *patois*—similar to that which in later times caused "the speech" of the Galileans to "betray" them to the inhabitants of Jerusalem.

<sup>d</sup> This is the rendering of Ewald.

being that of Simeon, 22:200. At this period the families of both the brother tribes are enumerated, and Manasseh has precedence over Ephraim in order of mention. During the march through the wilderness the position of the sons of Joseph and Benjamin was on the west side of the tabernacle (Num. ii. 18-24), and the prince of Ephraim was Elishama the son of Ammihud (Num. i. 10).

It is at the time of the sending of the spies that we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. The representative of Ephraim on this occasion was "Oshen the son of Nun," whose name was at the termination of the affair changed by Moses to the more distinguished form in which it is familiar to us. As among the founders of the nation Abram had acquired the name of Abraham, and Jacob of Israel, so Oshen, "help," became Jehoshua or Joshua, "the help of Jehovah" (Ewald, ii. 306).

Under this great leader, and in spite of the smallness of its numbers, the tribe must have taken a high position in the nation, to judge from the tone which the Ephraimites assumed on occasions shortly subsequent to the conquest. These will be referred to in their turn.

According to the present arrangement of the records of the book of Joshua—the "Domestic book of Palestine"—the two great tribes of Judah and Joseph (Ephraim and Manasseh) first took their inheritance; and after them, the seven other tribes entered on theirs (Josh. xv., xvi., xvii., xviii. 5). The boundaries of the portion of Ephraim are given in xvi. 1-10. The passage is evidently in great disorder, and in our ignorance of the landmarks, and of the force of many of the almost technical terms with which these descriptions abound, it is unfortunately impossible to arrive at more than an approximation to the case. The south boundary was coincident for part of its length with the north boundary of Benjamin. Commencing at the Jordan, at the reach opposite Jericho, it ran to the "water of Jericho," probably the *Ain Dik* or *Ain Sultan*; thence by one of the ravines, the *Wady Harith* or *W. Suweihil*, it ascended through the wilderness—*Middur*, the uncultivated waste hills—to Mount Bethel and Luz; and thence by Ataroth, "the Japhletite," Bethoron the lower, and Gezer—all with one exception unknown—to the Mediterranean, probably about Joppa. This agrees with the enumeration in 1 Chr. vii., in which Bethel is given as the Eastern, and Gezer—somewhere about *Ramleh*—as the Western, limit. The general direction of this line is N.E. by E. In Josh. xvi. 8, we probably have a fragment of the northern boundary (comp. xvii. 10), the torrent Kanah being the *Nahr el Akhdar* just below the ancient Caesarea. But it is very possible that there never was any definite subdivision of the territory assigned to the two brother tribes. Such is certainly the inference to be drawn from the very old fragment preserved in Josh. xvii. 14-18, in which the two are represented as complaining that only one portion had been allotted to them. At any rate if any such subdivision did exist, it is not possible now to make out what it was, except, generally, that Ephraim lay to the south and Manasseh to the north. Among the towns named as Manasseh's were Bethshean in the Jordan Valley, Endor on

the slopes of the "Little Hermon," Taanach on the north side of Carmel, and Dor on the sea-coast south of the same mountain. Here the boundary—the north boundary—joined that of Asher, which dipped below Carmel to take in an angle of the plain of Sharon: N. and N.W. of Manasseh lay Zebulun and Issachar respectively. The territory thus allotted to the "house of Joseph" may be roughly estimated at 55 miles from E. to W. by 70 from N. to S., a portion about equal in extent to the counties of Norfolk and Suffolk combined. But though similar in size, nothing can be more different in its nature from those level counties than this broken and hilly tract. Central Palestine consists of an elevated district which rises from the flat rungs of the wilderness on the south of Judah, and terminates on the north with the slopes which descend into the great plain of Esdraelon. On the west a flat strip separates it from the sea, and on the east another flat strip forms the valley of the Jordan. Of this district the northern half was occupied by the great tribe we are now considering. This was the *Har-Ephraim*, the "Mount Ephraim," a district which seems to extend as far south as Lunnah and Bethel (1 Sam. i. 1, vii. 17; 2 Chr. xxi. 4, 19, compared with xv. 8), places but a few miles north of Jerusalem, and within the limits of Benjamin. In structure it is limestone—rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the south, about and below Jerusalem; with "wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation" (Stanley, 229). All travellers bear testimony to the "general growing richness" and beauty of the country in going northwards from Jerusalem, the "innumerable fountains" and streamlets, the villages more thickly scattered than anywhere in the south, the continuous cornfields and orchards, the moist, vapoury atmosphere (Martineau, 516, 521; Van de Velde, i. 386, 8; Stanley, 234, 5). These are the "precious things of the earth, and the fulness thereof," which are invoked on the "ten thousands of Ephraim" and the "thousands of Manasseh" in the blessing of Moses. These it is which, while Dan, Judah, and Benjamin are personified as lions and wolves, making their lair and tearing their prey among the barren rocks of the south, suggested to the Lawgiver, as they had done to the Patriarch before him, the patient "bullock" and the "bough by the spring, whose branches ran over the wall" as fitter images for Ephraim (Gen. xlix. 22; Deut. xxxiii. 17). And centuries after, when its great disaster had fallen on the kingdom of Israel, the same images recur to the prophets. The "flowers" are still there in the "olive valleys," "faded" though they be (Is. xxviii. 1). The vine is an empty unprofitable vine, whose very abundance is evil (Hos. x. 1); Ephraim is still the "bullock," now "unaccustomed to the yoke," but waiting a restoration to the "pleasant places" of his former "pasture" (Jer. xxxi. 18; Hos. ix. 13, iv. 16)—"the heifer that is taught and loveth to tread out the corn," the heifer with the "beautiful neck" (Hos. x. 11), or the "kine of Bashan on the mountain of Samaria" (Amos iv. 1).

The wealth of their possession had not the same immediately degrading effect on this tribe that it had on some of its northern brethren. [ASHER.] Various causes may have helped to avert this evil. 1. The central situation of Ephraim, in the highway of all communications from one part of the country to another. From north to south, from Jordan to the

\* The expression "Jordan-Jericho" is a common one (Num. xxvi. 3, 63; xxxiii. 48, &c.): the "by" or "near" in the A. V. has no business there.

Sea—from Galilee, or still more distant Damascus, to Philistia and Egypt—these roads all lay more or less through Ephraim, and the constant traffic along them must have always tended to keep the district from sinking into stagnation. 2. The position of Shechem, the original settlement of Jacob, with his well and his "parcel of ground," with the two sacred mountains of Ebal and Gerizim, the scene of the impressive and significant ceremonial of blessing and cursing; and of Shiloh, from whence the division of the land was made, and where the ark remained from the time of Joshua to that of Eli; and further of the tomb and patrimony of Joshua, the great hero not only of Ephraim but of the nation—the fact that all these localities were deep in the heart of the tribe, must have made it always the resort of large numbers from all parts of the country—of larger numbers than any other place, until the establishment of Jerusalem by David. 3. But there was a spirit about the tribe itself which may have been both a cause and a consequence of these advantages of position. That spirit, though sometimes taking the form of noble remonstrance and reparation (2 Chr. xxviii. 9-15), usually manifests itself in jealous complaint at some enterprise undertaken or advantage gained in which they had not a chief share. To Gideon (Judg. viii. 1), to Jephthah (xii. 1), and to David (2 Sam. xix. 41-43), the cry is still the same in effect—almost the same in words—"Why did ye despise us that our advice should not have been first had?" "Why hast thou served us thus that thou calledst us not?" The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ix.), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidable manner than by these murmurs, during the time of the Judges and the first stage of the monarchy. Samuel, though Levite, was a native of Ramah in Mount Ephraim, and Saul belonged to a tribe closely allied to the family of Joseph, so that during the priesthood of the former and the reign of the latter the supremacy of Ephraim may be said to have been practically maintained. Certainly in neither case had any advantage been gained by their great rival in the south. Again, the brilliant successes of David and his wide influence and religious zeal, kept matters smooth for another period, even in the face of the blow given to both Shechem and Shiloh by the concentration of the civil and ecclesiastical capitals at Jerusalem. Twenty thousand and eight hundred of the choice warriors of the tribe, "men of name throughout the house of their father," went as far as Hebron to make David king over Israel (1 Chr. xii. 30). Among the officers of his court we find more than one Ephraimite (1 Chr. xvii. 10, 14), and the attachment of the tribe to his person seems to have been great (2 Sam. xix. 41-43). But this could not last much longer, as the reign of Solomon, splendid in appearance but oppressive to the people, developed both the circumstances of revolt, and the leader who was to turn them to account. Solomon saw through the crisis, and if he could have succeeded in killing Rehoboam as he tried to do (1 K. xi. 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son brought the mischief to a head. Rehoboam probably selected Shechem—the old capital of the country—for his coronation, in

he hope that his presence and the ceremonial might make a favourable impression, but in this he failed utterly, and the tumult which followed shows how complete was the breach—"To your tents, O Israel! now see to thine own house, David!" Rehoboam was certainly not the last king of Judah whose chariot went as far north as Shechem, but he was the last who visited it as a part of his own dominion, and he was the last who, having come so far, returned unmolested to his own capital. Jehoahaphat escaped, in a manner little short of miraculous, from the risks of the battle of Ramoth-Gilead, and it was the fate of two of his successors, Ahaziah and Josiah—differing in everything else, and agreeing only in this—that they were both carried dead in their chariots from the plain of Esdraelon to Jerusalem.

Henceforward in two senses the history of Ephraim is the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom embraced little besides the tribe. This is not surprising, and little susceptible of explanation. North of Ephraim the country appears never to have been really taken possession of by the Israelites. Whether from want of energy on their part, or great stubbornness of resistance on that of the Canaanites, certain it is that of the list of towns from which the original inhabitants were not expelled, the great majority belong to the northern tribes, Manasseh, Asher, Issachar, and Naphtali. And in addition to this original defect there is much in the physical formation and circumstances of the upper portion of Palestine to explain why those tribes never took any active part in the kingdom. They were exposed to the inroads and seductions of their surrounding heathen neighbours—on one side the luxurious Phœnicians, on the other the plundering Bedouins of Midian; they were open to the attacks of Syria and Assyria from the north, and Egypt from the south; the great plain of Esdraelon, which communicated more or less with all the northern tribes, was the natural outlet of the no less natural high loads of the maritime plain from Egypt, and the Jordan valley for the tribes of the East, and formed an admirable base of operations for an invading army.

But on the other hand the position of Ephraim was altogether different. It was one at once of great richness and great security. Her fertile plains and well watered valleys could only be reached by a laborious ascent through steep and narrow ravines, all but impassable for an army. There is no record of any attack on the central kingdom, either from the Jordan valley or the maritime plain. On the north side, from the plain of Esdraelon, it was more accessible, and it was from this side that the final invasion appears to have been made. But even on that side the entrance was so difficult and so easily defensible—as we learn from the description in the book of Judith (iv. 6, 7)—that, had the kingdom of Samaria been less weakened by internal dissensions, the attacks even of the great Shalmaneser might have been resisted, as at a later date were those of Holofernes. How that kingdom originated, how it progressed, and how it fell, will be elsewhere considered. [ISRAEL, KINGDOM OF.] There are few things more mournful in the sacred story than the descent of this haughty and jealous tribe, from the culminating point at which it stood when it entered on the finest portion of the Land of Promise—the chief sanctuary and the chief settlement of the nation within its limits, its leader the leader of the whole people—through the distant which marked its intercourse with its fellow-

while it was a member of the confederacy, and the tumult, dissension, and ungodliness which characterised its independent existence, down to the sudden captivity and total oblivion which closed its career. Judah had her times of revival and of recurring prosperity, but here the course is uniformly downward—a sad picture of opportunities wasted and personal gifts abused. "When Israel was a child, then I loved him, and called my son out of Egypt. . . . I taught Ephraim also to go, taking them by their arms, but they knew not that I healed them. I drew them with cords of a man, with bands of love. . . . but the Assyrian shall be their king, because they refused to return. . . . How shall I give thee up, Ephraim? how shall I deliver thee, Israel? how shall I make thee as Admah? how shall I set thee as Zeboim?" (Hos. xi. 1-8). [G.]

**EPHRAIM** (עֲפְרַיִם; 'Ephraim; Ephraim). In "Baal-hazor which is 'by' Ephraim" was Absalom's sheep-farm, at which took place the murder of Amnon, one of the earliest precursors of the great revolt (2 Sam. xiii. 23). The Hebrew particle עַל, rendered above "by" (A. V. "beside"), always seems to imply actual proximity, and therefore we should conclude that Ephraim was not the tribe of that name, but a town. Ewald conjectures that it is identical with EPHRAIM, EPHRON, and OPHRAH of the O. T., and also with the EPHRAIM which was for a time the residence of our Lord (*Gesch.* iii. 219, note). But with regard to the three first names there is the difficulty that they are spelt with the guttural letter *ain*, which is very rarely exchanged for the *aleph*, which commences the name before us. There is unfortunately no clue to its situation. The LXX. make the following addition to verse 34:—"And the watchman went and told the king, and said, I have seen men on the road of the Oronen (τῆς ὄρωνης, Alex. τῶν ὄρωνης) by the side of the mountain." Ewald considers this to be a genuine addition, and to refer to Beth-horon, N.W. of Jerusalem, off the Nablús road, but the indication is surely too slight for such an inference. Any force it may have is against the identity of this Ephraim with that in John xi. 54, which was probably in the direction N.E. of Jerusalem. [G.]

**EPHRAIM** (Ἐφραΐμ; Ephrem; Cod. Amint. *Efrem*), a city (Ἐ. λεγομένη πόλις) "in the district near the wilderness," to which our Lord retired with His disciples when threatened with violence by the priests (John xi. 54). By the "wilderness" (ἐρήμος) is probably meant the wild uncultivated hill-country N.E. of Jerusalem, lying between the central towns and the Jordan valley. In this case the conjecture of Dr. Robinson is very admissible that Ophrah and Ephraim are identical, and that their modern representation is *et-Taiyibeh*, a village on a conspicuous conical hill, commanding a view "over the whole eastern slope, the valley of the Jordan and the Dead Sea" (Rob. i. 444). It is situated 4 or 5 miles east of Bethel, and 16 from Jerusalem; a position agreeing tolerably with the indications of Jerome in the *Onomasticon* (*Ephraim, Ephron*), and is too conspicuous to have escaped mention in the Bible. [G.]

**EPHRAIM, GATE OF** (שַׁעַר עֲפְרַיִם; *sha'ar 'Ephraim*; *porta Ephraim*), one of the gates of the city of Jerusalem (2 K. xiv. 13; 2 Chr. xxv. 23; Neh. viii. 16, xii. 39), doubtless, according to the Oriental practice, on the side looking towards the

locality from which it derived its name, and therefore at the north, probably at or near the position of the present "Damascus gate." [JERUSALEM.] [G.]

**EPHRAIM, THE WOOD OF** (יַעַר עֲפְרַיִם; *deruds 'Ephraim*; *saltus Ephraim*), a wood, or rather a forest (the word *yair* implying dense growth), in which the fatal battle was fought between the armies of David and of Absalom (2 Sam. xviii. 6), and the entanglement in which added greatly to the slaughter of the latter (ver. 8). It would be very tempting to believe that the forest derived its name from the place near which Absalom's sheep-farm was situated (2 Sam. xiii. 23), and which would have been a natural spot for his head-quarters before the battle, especially associated as it was with the murder of Amnon. But the statements of xvii. 24, 26, and also the expression of xviii. 3, "that thou send us out of the city," i. e. Mahanaim, allow no escape from the conclusion that the locality was on the east side of Jordan, though it is impossible to account satisfactorily for the presence of the name of Ephraim on that side of the river. The suggestion is due to Grotius that the name was derived from the slaughter of Ephraim at the fords of Jordan by the Gileadites under Jephthah (Judg. xii. 1, 4, 5); but that occurrence took place at the very brink of the river itself, while the city of Mahanaim and the wooded country must have lain several miles away from the stream, and on the higher ground above the Jordan valley. Is it not at least equally probable that the forest derived its name from this very battle? The great tribe of Ephraim, though not specially mentioned in the transactions of Absalom's revolt, cannot fail to have taken the most conspicuous part in the affair, and the reverse was a more serious one than had overtaken the tribe for a very long time, and possibly combined with other circumstances to retard materially their rising into an independent kingdom. [G.]

**EPHRAIM** (עֲפְרַיִם, Ephraim; *Keri*, עֲפְרַיִם; *'Ephraim*; *Ephron*), a city of Israel, which with its dependent hamlets (בָּנוֹת = "daughters," A. V. "towns") Abijah and the army of Judah captured from Jeroboam (2 Chr. xiii. 19). It is mentioned with Bethel and Jeshuah, but the latter not being known, little clue to the situation of Ephraim is obtained from this passage. It has been conjectured that this Ephraim or Ephron is identical with the Ephraim by which Absalom's sheep-farm of Baal-hazor was situated; with the city called Ephraim near the wilderness in which our Lord lived for some time; and with Ophrah (עֲפְרָה), a city of Benjamin, apparently not far from Bethel (Josh. xviii. 23; comp. Joseph. *B. J.* iv. 9, §9), and which has been located by Dr. Robinson (i. 447), with some probability, at the modern village of *et-Taiyibeh*. But nothing more than conjecture can be arrived at on these points. (See Ewald, *Geschichte*, iii. 219, 466, v. 365; Stanley, 214.) [G.]

**EPH'RATAH**, or EPH'RATH (אֶפְרַתָּה, or אֶפְרַת; *'Ephrath* and *'Ephd*; *Ephratha*, Jerom.). 1. Second wife of Caleb the son of Hezion, mother of Hur, and grandmother of Caleb the spy, according to 1 Chr. ii. 19, 50, and probably 24, and iv. 4. [CALEB-EPHRATAH.]

2. The ancient name of Bethlehem-Judah, as is manifest from Gen. xxxv. 16, 19, xlviii. 7, both which passages distinctly prove that it was called Ephrath or Ephratah in Jacob's time, and use the

regular formula for adding the modern name, **בֵּית לֶחֶם**, which is *Bethlehem*, comp. *e. g.* Gen. xxiii. 2, xxxv. 27; Josh. xv. 10. It cannot therefore have derived its name from Ephratah, the mother of Hur, as the author of *Quest. Hebr. in Paralip.* says, and as one might otherwise have supposed from the connexion of her descendants, Salma and Hur, with Bethlehem, which is somewhat obscurely intimated in 1 Chr. ii. 50, 51, iv. 4. It seems obvious therefore to infer that, on the contrary, Ephratah the mother of Hur was so called from the town of her birth, and that she probably was the owner of the town and district. In fact, that her name was really gentilitious. But if this be so, it would indicate more communication between the Israelites in Egypt and the Canaanites than is commonly supposed. When, however, we recollect that the land of Goshen was the border country on the Palestine side; that the Israelites in Goshen were a tribe of sheep and cattle drovers (Gen. xlvii. 3); that there was an easy communication between Palestine and Egypt from the earliest times (Gen. xii. 10, xvi. 1, xxi. 21, &c.); that there are indications of communications between the Israelites in Egypt and the Canaanites, caused by their trade as keepers of cattle, 1 Chr. vii. 21, and that in the nature of things the owners or keepers of large herds and flocks in Goshen would have dealings with the nomad tribes in Palestine, it will perhaps seem not impossible that a son of Hezron may have married a woman having property in Ephratah. Another way of accounting for the connexion between Ephratah's descendants and Bethlehem, is to suppose that the elder Caleb was not really the son of Hezron, but merely reckoned so as the head of a Hezronite house. He may in this case have been one of an Edomitish or Horite tribe, an idea which is favoured by the name of his son Hur [CALEB], and have married an Ephrathite. Caleb the spy may have been their grandson. It is singular that "Salma the father of Bethlehem" should have married a Canaanitish woman. Could she have been of the kindred of Caleb in any way? If she were, and if Salma obtained Bethlehem, a portion of Hur's inheritance, in consequence, this would account for both Hur and Salma being called "father of Bethlehem." Another possible explanation is, that *Ephratah* may have been the name given to some daughter of Benjamin to commemorate the circumstance of Rachel his mother having died close to Ephrath. This would receive some support from the son of Rachel's other son Joseph being called *Ephraim*, a word of identical etymology, as appears from the fact that **אֶפְרַיִם** means indifferently an Ephrathite, i. e. *Bethlemitate* (Ruth i. 1, 2), or an *Ephraimite* (1 Sam. i. 1). But it would not account for Ephratah's descendants being settled at Bethlehem. The author of the *Quest. Hebr. in Paralip.* derives *Ephratah* from *Ephraim*, "Ephrath, quia de Ephraim fuit." But this is not consistent with the appearance of the name in Gen. It is perhaps impossible to come to any certainty on the subject. It must suffice therefore to note, that in Gen., and perhaps in Chron., it is called *Ephrath* or *Ephrata*, in Ruth, *Bethlehem-Judah*, but the inhabitants, *Ephrathites*; in Micah (v. 2), *Bethlehem-Ephratah*; in Matt. ii. 6, *Bethlehem in the land of Juda*. Jerome, and after him Kalsch, observe that *Ephratah, fruitful*, has the same meaning as *Bethlehem, house of bread*; a view which is favoured by Stanley's description of the neighbouring

corn-fields (*Palest. & Sin.* p. 164). [BETHLEHEM.]

3. Gesenius thinks that in Ps. cxxii. 6, *Ephratah* means *Ephraim*. [A. C. H.]

**EPIHRATHITE** (אֶפְרַתִּי; *Ἐφραθαῖος; Ephrathæus*). 1. An inhabitant of Bethlehem (Ruth i. 2). 2. An Ephraimite (1 Sam. i. 1; Jud. xi. 4, &c.). [A. C. H.]

**EPHRON** (עֶפְרוֹן; *Ἐφρών; Ephron*), the son of Zohar, a Hittite; the owner of a field which lay facing Mamre or Hebron, and of the cave therein contained, which Abraham bought from him for 400 shekels of silver (Gen. xlviii. 8-17; xxv. 9; xlix. 29, 30, l. 13) By Josephus (*Ant.* i. 14) the name is given as Ephraim; and the purchase-money 40 shekels.

**EPHIRON** (Ἐφρών; *Ephron*), a very strong city (πόλις μεγάλη ὄχυρά σφόδρα) on the east of Jordan between Carnaim (Ashteroth-Karnaim) and Bethshean, attacked and demolished by Judas Macabæus (1 Macc. v. 48-52; 2 Macc. xii. 27). From the description in the former of these two passages it appears to have been situated in a defile or valley, and to have completely occupied the pass. Its site has not been yet discovered. [G.]

**EPHRON, MOUNT** (הַר עֶפְרוֹן; *δὲ ὄρος Ἐφρών; Mons Ephron*). The "cities of Mount Ephron" formed one of the landmarks on the northern boundary of the tribe of Judah (Josh. xv. 9), between the "water of Nephtoi" and Kijath-jearim. As these latter are with great probability identified with *Ain Lifta* and *Kuriet el-enab*, Mount Ephron is probably the range of hills on the west side of the *Wady Beit-Humna* (traditional valley of the Terebinth), opposite *Lifta*, which stands on the eastern side. It may possibly be the same place as **EPIHRAIN**. [G.]

**EPICUREANS, THE** (Ἐπικουρεῖοι) derived their name from Epicurus (342-271 B.C.), a philosopher of Attic descent, whose "Garden" at Athens rivalled in popularity the "Porch" and the "Academy." The doctrines of Epicurus found wide acceptance in Asia Minor (*Lampsacus, Mitylene, Tarsus*, Diog. L. x. 1, 11 ff.) and Alexandria (Diog. L. l. c.), and they gained a brilliant advocate at Rome in Lucetius (95-50 B.C.). The object of Epicurus was to find in philosophy a practical guide to happiness (*ἐνέργεια . . . τὴν εὐδαιμονία βίον περιποιούσα*, Sext. Emp. *adv. Math.* xi. 169). True pleasure and not absolute truth was the end at which he aimed; experience and not reason the test on which he relied. He necessarily cast aside dialectics as a profitless science (Diog. L. x. 30, 31), and substituted in its place (as τὸ κανονικόν, Diog. L. x. 19) an assertion of the right of the senses, in the widest acceptance of the term, to be considered as the criterion of truth (*κριτήρια τῆς ἀληθείας εἶναι τὰς αἰσθήσεις καὶ τὰς προλήψεις* (general notions) καὶ τὰ πάθη). He made the study of physics subservient to the uses of life, and especially to the removal of superstitious fears (Lucr. i. 146 ff.); and maintained that ethics are the proper study of man, as leading him to that supreme and lasting pleasure which is the common object of all.

It is obvious that a system thus framed would degenerate by a natural descent into mere materialism; and in this form Epicureism was the

popular philosophy at the beginning of the Christian era (cf. *Diog. L. x. 5, 9*). When St. Paul addressed "Epicureans and Stoics" (*Acts xvii. 18*) at Athens, the philosophy of life was practically reduced to the teaching of those two antagonistic schools, which represented in their final separation the distinct and complementary elements which the Gospel reconciled. For it is unjust to regard Epicureism as a mere sensual opposition to religion. It was a necessary step in the development of thought, and prepared the way for the reception of Christianity, not only negatively but positively. It not only weakened the hold which polytheism retained on the mass of men by daring criticism, but it maintained with resolute energy the claims of the body to be considered a necessary part of man's nature co-ordinate with the soul, and affirmed the existence of individual freedom against the Stoic doctrines of pure spiritualism and absolute fate. Yet outwardly Epicureism appears further removed from Christianity than Stoicism, though essentially it is at least as near; and in the address of St. Paul (*Acts xvii. 22 ff.*) the affirmation of the doctrines of creation (v. 24), providence (v. 26), inspiration (v. 28), resurrection, and judgment (v. 31), appears to be directed against the cardinal errors which it involved.

The tendency which produced Greek Epicureism, when carried out to its fullest development, is peculiar to no age or country. Among the Jews it led to Sadduceeism [*SADDUCEES*], and Josephus appears to have drawn his picture of the sect with a distinct regard to the Greek prototype (*Joseph. Ant. xviii. 1, §4; de B. J. ii. 8, §14; cf. Ant. x. 11, §7, de Epicureis*). In modern times the essay of Gassendi (*Syntagma Philosophiae Epicuri*, Hag. Com. 1659) was a significant symptom of the restoration of sensationalism.

The chief original authority for the philosophy of Epicurus is Diogenes Laertius (*Lib. x.*), who has preserved some of his letters and a list of his principal writings. The poem of Lucetius must be used with caution, and the notices in Cicero, Seneca, and Plutarch are undisguisedly hostile. [B. F. W.]

**EPIPHANES** (1 Macc. i. 10, x. 1). [*ANTI-CHUS EPIPHANES*.]

**EPIPHI** (Ἐπιφή, 3 Macc. vi. 38), name of the eleventh month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year: Copt.

**ΕΠΗΛ**; Arab. أَيْيَب. In ancient Egyptian it

is called "the third month [of] the season of the waters." [*EGYPT*.] The name Epiphi is derived from that of the goddess of the month, Apap-t (*Lepsius, Chron. d. Aeg. i. 141*). The supposed derivation of the Hebrew month-name Abib from Epiphi is discussed in other articles. [*CHRONOLOGY; MONTHS*.] [R. S. P.]

**EPISTLE**. The Epistles of the N. T. are described under the names of the Apostles by whom, or the churches to whom, they were addressed. It is proposed in the present article to speak of the Epistle or letter as a means of communication.

The use of written letters implies, it needs hardly be said, a considerable progress in the development of civilised life. There must be a recognised system of notation, phonetic or symbolic; men must be taught to write, and have writing materials at hand. In the early nomadic stages of society

accordingly, like those which mark the period of the patriarchs of the O. T., we find no traces of any but oral communications. Messengers are sent instructed what to say from Jacob to Esau (*Gen. xxxii. 3*), from Balak to Balaam (*Num. xxii. 5, 7, 16*), bringing back in like manner a verbal, not a written answer (*Num. xxiv. 12*). The negotiations between Jephthah and the king of the Ammonites (*Judg. xi. 12, 13*) are conducted in the same way. It is still the received practice in the time of Saul (*1 Sam. xi. 7, 9*). The reign of David, bringing the Israelites, as it did, into contact with the higher civilisation of the Phœnicians, witnessed a change in this respect also. The first recorded letter (פָּקֶד = "book;" comp. use of βιβλίον, *Herod. i. 123*) in the history of the O. T. was that which "David wrote to Joab, and sent by the hand of Uriah" (*2 Sam. xi. 14*), and this must obviously, like the letters that came into another history of crime (in this case also in traceable connexion with Phœnician influence, *1 K. xxi. 8, 9*), have been "sealed with the king's seal," as at once the guarantee of their authority, and a safeguard against their being read by any but the persons to whom they were addressed. The material used for the impression of the seal was probably the "clay" of *Job xxxviii. 14*. The act of sending such a letter is, however, pre-eminently, if not exclusively, a kingly act, where authority and secrecy were necessary. Joab, *e.g.* answers the letter which David had sent him after the old plan, and receives a verbal message in return. The demand of Ben-hadad and Ahab's answer to it are conveyed in the same way (*1 K. xx. 2, 5*). Written communications, however, become more frequent in the later history. The king of Syria sends a letter to the king of Israel (*2 K. v. 5, 6*). Elijah the prophet sends a writing (כְּתָבָא) to Jehoram (*2 Chr. xxi. 12*). Hezekiah introduces a system of couriers like that afterwards so fully organised under the Persian kings (*2 Chr. xxx. 6, 10; comp. Herod. viii. 98, and Esth. viii. 10, 14*), and receives from Sennacherib the letter which he "spreads before the Lord" (*2 K. xix. 14*). Jeremiah writes a letter to the exiles in Babylon (*Jer. xxix. 1, 3*). The books of Ezra and Nehemiah contain or refer to many such documents (*Ezr. iv. 6, 7, 11, v. 6, vii. 11; Neh. ii. 7, 9, vi. 5*). The stress laid upon the "open letter" sent by Sanballat (*Neh. vi. 5*) indicates that this was a breach of the customary etiquette of the Persian court. The influence of Persian, and yet more, perhaps, that of Greek civilisation, led to the more frequent use of letters as a means of intercourse. Whatever doubts may be entertained as to the genuineness of the Epistles themselves, their occurrence in 1 Macc. xi. 30, xii. 6, 20, xv. 1, 16; 2 Macc. xi. 16, 34, indicates that they were recognised as having altogether superseded the older plan of messages orally delivered. The two stages of the history of the N. T. present in this respect a very striking contrast. The list of the Canonical Books shows how largely Epistles were used in the expansion and organisation of the Church. Those which have survived may be regarded as the representatives of many others that are lost. We are perhaps too much in the habit of forgetting that the absence of all mention of written letters from the Gospel history is just as noticeable. With the exception of the spurious letter to Abgarus of Edessa (*Euseb. H. E. i. 13*) there are no Epistles of Jesus. The explanation of this is to be found

partly in the circumstances of one who, known as the "carpenter's son," was training as His disciples, those who, like himself, belonged to the class of labourers and peasants, partly in the fact that it was by personal, rather than by written, teaching that the work of the prophetic office, which He reproduced and perfected, had to be accomplished. The Epistles of the N. T. in their outward form are such as might be expected from men who were brought into contact with Greek and Roman customs, themselves belonging to a different race, and so reproducing the imported style with only partial accuracy. They begin (the Epistle to the Hebrews and 1 John excepted) with the names of the writer, and of those to whom the Epistle is addressed. Then follows the formula of salutation (analogous to the *εὖ πρᾶττεν* of Greek, the *S., S. D., or S. D. M., salutem, salutem dicit, salutem dicit multum*, of Latin correspondence)—generally in St. Paul's Epistles in some combination of the words *χαρίς, εἰς, εἰρήνη*; in others, as in Acts xv. 23, *Jan.* 1. 1, with the closer equivalent of *χαίρειν*. Then the letter itself commences, in the first person, the singular and plural being used, as in the letters of Cicero, indiscriminately (comp. 1 Cor. ii.; 2 Cor. i. 8, 13; 1 Thess. iii. 1, 2; and *passim*). Then when the substance of the letter has been completed, questions answered, truths enforced, come the individual messages, characteristic, in St. Paul's Epistles especially, of one who never allowed his personal affections to be swallowed up in the greatness of his work. The conclusion in this case was probably modified by the fact that the letters were dictated to an amanuensis. When he had done his work, the Apostle took up the pen or reed, and added, in his own large characters (Gal. vi. 11), the authenticating autograph, sometimes with special stress on the fact that this was his writing (1 Cor. xvi. 21; Gal. vi. 11; Col. iv. 18; 2 Thess. iii. 17), always with one of the closing formulae of salutation, "Grace be with thee"—"the Grace of our Lord Jesus Christ be with your spirit." In one instance, Rom. xvi. 22, the amanuensis in his own name adds his salutation. In the *ἔρρωσθε* of Acts xxiii. 30, the *ἔρρωσθε* of Acts xv. 29 we have the equivalents to the *vale, valete*, which formed the customary conclusion of Roman letters. It need hardly be said that the fact that St. Paul's Epistles were dictated in this way accounts for many of their most striking peculiarities, the frequent digressions, the long parentheses, the vehemence and energy as of a man who is speaking strongly as his feelings prompt him rather than writing calmly. An allusion in 2 Cor. iii. 1 brings before us another class of letters which must have been in frequent use in the early ages of the Christian Church, the *ἐπιστολαὶ συστατικαί*, by which travellers or teachers were commended by one church to the good offices of others. Other persons (there *may be* a reference to Apollos, Acts xviii. 27) had come to the Church of Corinth relying on these. St. Paul appeals to his converts, as the *ἐπιστολὴ Χριστοῦ* (2 Cor. iii. 3), written "not with ink but with the spirit of the living God." For other particulars as to the material and implements used for Epistles, see WRITING.

[E. H. P.]

**ER** (עֶר, *vachful*; *Hp*: *Iler*). 1. First-born of Judah. His mother was Bath-Shuah (daughter of Shuah), a Canaanite. His wife was Tamar, the mother, after his death, of Pharez and Zarah, by Judah. Er "was wicked in the sight of the Lord;

and the Lord slew him." It does not appear what the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan (Gen. xxxviii. 3-7; Num. xxvi. 19).

2. Descendant of Shelah the son of Judah (1 Chr. iv. 21).

3. With a final *god*, **ERİ**, perhaps designating a family, son of Gad (Gen. xli. 16).

4. Son of Jose, and father of Elmodam, in our Lord's genealogy (Luke iii. 28), about contemporary with Uziah king of Judah. [A. C. H.]

**E'ERAN** (עֶרָן; but Sam. and Syr. עֶרָן *Edan*; *E'dén*; *Ileran*), son of Shuthelah, eldest son of Ephraim (Num. xxvi. 36). The name does not occur in the genealogies of Ephraim in 1 Chr. vii. 20-29, though a name, **EZER** (עֶזֶר), is found which may possibly be a corruption of it. Eran was the head of the family of

**ERANITES**, **TIRE** (עֶרָנִי; Sam. עֶרָנִי; *E'dén*; *Hermitae*), Num. xxvi. 36.

**E'RECH** (עֶרֶךְ; *Opéx*; *Arach*), one of the cities of Nimrod's kingdom in the land of Shinar (Gen. x. 10). Until recently, the received opinion, following the authority of St. Ephrem, Jerome, and the Targumists, identified it with Edessa or Callirhoë (*Urfah*), a town in the north-west of Mesopotamia. This opinion is supported by Von Bohlen (*Introd. to Gen.* p. 233), who connects the name Callirhoë with the Biblical Erēch through the Syrian form *Eurhok*, suggesting the Greek word *ἐρρῶκος*. This identification is, however, untenable: Edessa was probably built by Seleucus, and could not, therefore, have been in existence in Ezia's time (Ezr. iv. 9), and the extent thus given to the land of Shinar presents a great objection. Erēch must be sought in the neighbourhood of Babylon: Gesenius (*Thesaur.* p. 151) identifies it with Araca on the Tigris in Susiana; but it is doubtless the same as Orchoë, 82 miles S., and 4½ E. of Babylon, the modern designation of the site, *Warka, Irki, and Irak*, bearing a considerable affinity to the original name. This place appears to have been the necropolis of the Assyrian kings, the whole neighbourhood being covered with mounds, and strewn with the remains of bricks and columns. Some of the bricks bear a monogram of "the moon," and Col. Rawlinson surmises that the name Erēch may be nothing more than a form of עֶרָךְ (Bonomi, *Ninereh*, p. 45, 508). The inhabitants of this place were among those who were transplanted to Samaria by Assuapper (Ezr. iv. 9). [W. L. B.]

**ESA'IAS** (Rec. T. *Hsaías*; Lachm. with B *Hsaías*; *Isaiás*; Cod. Amiat. *Emaiás*), Matt. iii. 3, iv. 14, xvii. 17, xii. 17, xii. 14, xv. 7; Mark vii. 6; Luke iii. 4, iv. 17; John i. 23, xii. 38, 39, 41; Acts vii. 28, 30; xxviii. 25; Rom. ix. 27, 29; x. 16, 20; xv. 12. [ISAIAH.]

**ES'AR-HA'DDON** (עֶסֶר־חַדְדֹן; *Asorodán*; *Zaxepdonós*, LXX.; *Asaridanos*, Ptol.; *Assur-akh-iddina*, Assy.; *Asur-haddon*), one of the greatest of the kings of Assyria. He was the son of Sennacherib (2 K. xiv. 37) and the grandson of Sargon who succeeded Shalmaneser. It has been generally thought that he was Sennacherib's eldest son; and this seems to have been the view of Polyhistor, who made Sennacherib place a son,

*Asordanes*, on the throne of Babylon during his own lifetime (ap. Euseb. *Chron. Can.* i. 5). The contrary, however, appears by the inscriptions, which show the Babylonian viceroys—called *Asordanes* by Polyhistor, but *Assaradadius* (Assaradadius?) by Ptolemy—to have been a distinct person from Esar-haddon. Thus nothing is really known of Esar-haddon until his succession (ab. B.C. 680), which seems to have followed quietly and without difficulty on the murder of his father and the flight of his guilty brothers (2 K. xix. 37; Is. xxxvii. 38). It may, perhaps, be concluded from this that he was at the death of his father the eldest son, Assaradadius, the Babylonian viceroy, having died previously.

Esar-haddon appears by his monuments to have been one of the most powerful—if not the most powerful—of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. Towards the east he engaged in wars with Median tribes, “of which his fathers had never heard the name;” towards the west he extended his influence over Cilicia and Cyprus; towards the south he claims authority over Egypt and over Ethiopia. In consequence of the disaffection of Babylon, and its frequent revolts from former Assyrian kings, Esar-haddon, having subdued the sons of Merodach-Baladan who headed the national party, introduced the new policy of substituting for the former government by viceroys, a direct dependence upon the Assyrian crown. He did not reduce Babylonia to a province, or attempt its actual absorption into the empire, but united it to his kingdom in the way that Hungary was, until 1848, united to Austria, by holding both crowns himself and residing now at one and now at the other capital. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. His Babylonian reign lasted thirteen years, from B.C. 680 to B.C. 667; and it was undoubtedly within this space of time that Manasseh, king of Judah, having been seized by his captains at Jerusalem on a charge of rebellion, was brought before him at Babylon (2 Chr. xxxiii. 11) and detained for a time as prisoner there. Eventually Esar-haddon, persuaded of his innocence, or excusing his guilt, restored him to his throne, thus giving a proof of clemency not very usual in an Oriental monarch. It seems to have been in a similar spirit that Esarhaddon, according to the inscriptions, gave a territory upon the Persian Gulf to a son of Merodach-Baladan, who submitted to his authority and became a refugee at his court.

As a builder of great works Esar-haddon is particularly distinguished. Besides his palace at Babylon, which has been already mentioned, he built at least three others in different parts of his dominions, either for himself or his son; while in a single inscription he mentions the erection by his hands of no fewer than thirty temples in Assyria and Mesopotamia. His works appear to have possessed a peculiar magnificence. He describes his temples as “shining with silver and gold,” and boasts of his Nineveh palace that it was “a building such as the kings his fathers who went before him had never made.” The south-west palace at Nimrud is the best preserved of his constructions. This building, which was excavated by Mr. Layard, is remarkable from the peculiarity

of its plan as well as from the scale on which it is constructed. It corresponds in its general design almost exactly with the palace of Solomon (1 K. vii. 1-12), but is of larger dimensions, the great hall being 220 feet long by 100 broad (Layard's *Nin. & Bab.* p. 634), and the porch or antechamber 160 feet by 60. It had the usual adornment of winged bulls, colossal sphinxes, and sculptured slabs, but has furnished less to our collections than many inferior buildings, from the circumstance that it had been originally destroyed by fire, by which the stones and alabaster were split and calcined. This is the more to be regretted as there is reason to believe that Phœnician and Greek artists took part in the ornamentation.

It is impossible to fix the length of Esar-haddon's reign or the order of the events which occurred in it. Little is known to us of his history but from his own records, and they have not come down to us in the shape of annals, but only in the form of a general summary. That he reigned thirteen years at Babylon is certain from the Canon of Ptolemy, and he cannot have reigned a shorter time in Assyria. He may, however, have reigned longer; for it is not improbable that after a while he felt sufficiently secure of the affections of the Babylonians to re-establish the old system of vice-regal government in their country. Sardanapalus may have been set up as ruler of Babylon by his authority in B.C. 667, and he may have withdrawn to Nineveh and continued to reign there for some time longer. His many expeditions and his great works seem to indicate, if not even to require, a reign of some considerable duration. It has been conjectured that he died about B.C. 660, after occupying the throne for twenty years. He appears to have been succeeded by his son *Assur-bani-pal*, or Sardanapalus II., the prince for whom he had built a palace in his own lifetime. [G. R.]

**ESAU**, the oldest son of Isaac, and twin-brother of Jacob. The singular appearance of the child at his birth originated the name: “And the first came out red (*אֶדְמוֹנִי*), all over like a hairy garment, and they called his name *Esau*” (*עֵשָׂו*, i. e. “hairy,” “rough,” Gen. xxv. 25). This was not the only remarkable circumstance connected with the birth of the infant. Even in the womb the twin-brothers struggled together (xxv. 22). Esau was the first-born; but as he was issuing into life Jacob's hand grasped his heel. The bitter enmity of two brothers, and the increasing strife of two great nations, were thus foreshadowed (xxv. 23, 26). Esau's robust frame and “rough” aspect were the types of a wild and daring nature. The peculiarities of his character soon began to develop themselves. Scorning the peaceful and commonplace occupations of the shepherd, he revelled in the excitement of the chase, and in the martial exercises of the Cannanites (xxv. 27). He was, in fact, a thorough *Bedawy*, a “son of the desert” (so we may translate *אִישׁ שָׂדֶה*), who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his wilful, vagrant boy; and his keen relish for savoury food being gratified by Esau's venison, he liked him all the better for his skill in hunting (xxv. 28). An event occurred which exhibited the reckless character of Esau on the one hand, and the selfish, grasping nature of his

brother on the other. The former returned from the field, exhausted by the exercise of the chase, and faint with hunger. Seeing some pottage of lentiles which Jacob had prepared, he asked for it. Jacob only consented to give the food on Esau's swearing to him that he would in return give up his birthright. There is something revolting in this whole transaction. Jacob takes advantage of his brother's distress to rob him of that which was dear as life itself to an Eastern patriarch. The birthright not only gave him the headship of the tribe, both spiritual and temporal, and the possession of the great bulk of the family property, but it carried with it the *covenant blessing* (xxvii. 28, 29, 36; Heb. xii. 16, 17). Then again whilst Esau, under the pressure of temporary suffering, despises his birthright by selling it for a mess of pottage (Gen. xxv. 34), he afterwards attempts to secure that which he had deliberately sold (xxvii. 4, 34, 38; Heb. xii. 17).

It is evident the whole transaction was public, for it resulted in a new name being given to Esau. He said to Jacob, "Feed me with that same *red* (הָאֵדֹם); therefore was his name called *Edom*" (עֲדוֹם, Gen. xxv. 30). It is worthy of note, however, that this name is seldom applied to Esau himself, though almost universally given to the country he settled in, and to his posterity. [EDOM; EDMITES.] The name "Children of Esau" is in a few cases applied to the Edomites (Deut. ii. 4; Jer. xlix. 8; Obad. 18); but it is rather a poetical expression.

Esau married at the age of 40, and contrary to the wish of his parents. His wives were both Canaanites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. xxvi. 34, 35).

The next episode in the history of Esau and Jacob is still more painful than the former, as it brings fully out those bitter family rivalries and divisions, which were all but universal in ancient times, and which are still a disgrace to Eastern society. Jacob, through the craft of his mother, is again successful, and secures irrevocably the covenant blessing. Esau vows vengeance. But fearing his aged father's patriarchal authority, he secretly congratulates himself: "The days of mourning for my father are at hand, then will I slay my brother Jacob" (Gen. xxvii.). Thus he imagined that by one bloody deed he would regain all that had been taken from him by artifice. But he knew not a mother's watchful care. Not a sinister glance of his eyes, not a hasty expression of his tongue, escaped Rebekah. She felt that the life of her darling son, whose gentle nature and domestic habits had won her heart's affections, was now in imminent peril; and she advised him to flee for a time to her relations in Mesopotamia. The sins of both mother and child were visited upon them by a long and painful separation, and all the attendant anxieties and dangers. By a characteristic piece of domestic policy Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure—"and Rebekah said to Isaac, I am weary of my life because of the daughters of Heth; if Jacob take a wife such as these, what good shall my life do me?" Her object was attained at once. The blessing was renewed to Jacob, and he received his father's commands to go to Padan-aram (Gen. xxvii. 46, xxviii. 1-5).

When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a

new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii. 8, 9). This marriage appears to have brought him into connexion with the Ishmaelitic tribes beyond the valley of Arabah. He soon afterwards established himself in Mount Seir; still retaining, however, some interest in his father's property in Southern Palestine. It is probable that his own habits, and the idolatrous practices of his wives and rising family, continued to excite and even increase the anger of his parents; and that he, consequently, considered it more prudent to remove his household to a distance. He was residing in Mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the impressions of his brother's early offences seem to have been almost completely effaced. His reception of Jacob was cordial and honest; though doubts and fears still lurked in the mind of the latter, and betrayed him into something of his old duplicity; for while he promises to go to Seir, he carefully declines his brother's escort, and immediately after his departure, turns westward across the Jordan (Gen. xxxii. 7, 8, 11; xxxiii. 4, 12, 17).

It does not appear that the brothers again met until the death of their father, about 20 years afterwards. Mutual interests and mutual fear seem to have constrained them to act honestly, and even generously towards each other at this solemn interview. They united in laying Isaac's body in the cave of Machpelah. Then "Esau took all his cattle, and all his substance, which he had got in the land of Canaan"—such, doubtless, as his father with Jacob's consent had assigned to him—"and went into the country from the face of his brother Jacob" (xxxv. 29; xxvii. 6). He now saw clearly that the covenant blessing was Jacob's; that God had inalienably allotted the land of Canaan to Jacob's posterity; and that it would be folly to strive against the Divine will. He knew also that as Canaan was given to Jacob, Mount Seir was given to himself (comp. xxvii. 39, xxiii. 3; and Deut. ii. 5); and he was, therefore, desirous with his increased wealth and power to enter into full possession of his country, and drive out its old inhabitants (Deut. ii. 12). Another circumstance may have influenced him in leaving Canaan. He "lived by his sword" (Gen. xxvii. 40); and he felt that the rocky fastnesses of Edom would be a safer and more suitable abode for such as by their habits provoked the hostilities of neighbouring tribes, than the open plains of Southern Palestine.

There is a difficulty connected with the names of Esau's wives, which is discussed under AHOLIBAMAH and BASHEMATHI. Of his subsequent history nothing is known; for that of his descendants see EDMOM and EDMITES.

[J. L. P.]

ESAU ('Həab; Sel), 1 Esd. v. 29. [ZIDAA.]

ESAY ('Həaas; Isai, Iaius), Eccles. xlviii. 20, 22; 2 Esd. ii. 18. [ISAIAH.]

ESDRAELON. This name is merely the Greek form of the Hebrew word JEZREEL. It occurs in this exact shape only twice in the A. V.—(Jud. iii. 9, iv. 6). In Jud. iii. 3 it is ESDRAELOM, and in i. 8 ESDRELOM, with the addition of "the great plain." In the O. T. the plain is called the VALLEY OF JEZREEL; by Josephus the great plain, τὸ πεδίον μέγα. The name is derived from the old royal city of JEZREEL, which occupied a

commanding site, near the eastern extremity of the plain, on a spur of Mount Gilboa.

"The Great plain of Esdraelon" extends across Central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is properly the plain of *Accho*, or *'Akka*. The main body of the plain is a triangle. Its base on the east extends from *Jenin* (the ancient Engannin) to the foot of the hills below Nazareth, and is about 15 miles long; the north side, formed by the hills of Galilee, is about 12 miles long; and the south side, formed by the Samaria range, is about 18 miles. The apex on the west is a narrow pass opening into the plain of *'Akka*. This vast expanse has a gently undulating surface—in spring all green with corn where cultivated, and rank weeds and grass where neglected—dotted with several low gray tells, and near the sides with a few olive groves. This is that *Valley of Megiddo* (מִגְדּוֹ *Megiddo*), so called from the city of *Megiddo*, which stood on its southern border), where Barak triumphed, and where king Josiah was defeated and received his death wound (Judg. v.; 2 Chr. xxxv.). Probably, too, it was before the mind of the Apostle John when he figuratively described the final conflict between the hosts of good and evil who were gathered to a place called *Armageddon* (Ἀρμαγεδδών, from the Heb. עַר מִגְדּוֹ, that is, the city of *Megiddo*; Rev. xvi. 16). The river *Kishon*—"that ancient river" so fatal to the army of Sisera (Judg. v. 21)—drains the plain, and flows off through the pass westward to the Mediterranean.

From the base of this triangular plain three branches stretch out eastward, like fingers from a hand, divided by two bleak, grey ridges—one bearing the familiar name of Mount Gilboa; the other called by Franks Little Hermon, but by natives *Jebel ed-Duhy*. The northern branch has Tabor on the one side, and Little Hermon on the other; into it the troops of Barak defiled from the heights of Tabor (Judg. iv. 6); and on its opposite side are the sites of Naun and Endor. The southern branch lies between *Jenin* and Gilboa, terminating in a point among the hills to the eastward; it was across it Ahaziah died from Jehu (2 K. ix. 27). The central branch is the richest as well as the most celebrated; it descends in green, fertile slopes to the banks of the Jordan, having Jezreel and Shuenn on opposite sides at the western end, and Bethshean in its midst towards the east. This is the "Valley of Jezreel" proper—the battle-field on which Gideon triumphed, and Saul and Jonathan were overthrown (Judg. vii. 1, sq.; 1 Sam. xxix. and xxxi.).

Two things are worthy of special notice in the plain of Esdraelon. 1. its wonderful richness. Its unbroken expanse of verdure contrasts strangely with the grey, bleak crowns of Gilboa, and the rugged ranges on the north and south. The gigantic thistles, the luxuriant grass, and the exuberance of the crops on the few cultivated spots, show the fertility of the soil. It was the frontier of Zebulun—"Rejoice, Zebulun, in thy going out" (Deut. xxxiii. 18). But it was the special portion of Issachar—"And he saw that rest was good, and the land that it was pleasant; and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix. 15). 2. its desolation. If we except the eastern branches, there is not a single inhabited village on this whole surface, and not more than one-

sixth of its soil is cultivated. It is the home of the wild, wandering Bedawin, who scour its smooth turf on their fleet horses in search of plunder; and when hard pressed can speedily remove their tents and flocks beyond the Jordan, and beyond the reach of a weak government. It has always been insecure since history began. The old Canaanite tribes drove victoriously through it in their iron chariots (Judg. iv. 3, 7); the nomad Midianites and Amalekites—those "children of the east," who were "as grasshoppers for multitude," whose "camels were without number"—devoured its rich pastures (Judg. vi. 1-6, vii. 1); the Philistines long held it, establishing a stronghold at Bethshean (1 Sam. xix. 1, xvi. 10); and the Syrians frequently swept over it with their armies (1 K. xx. 26; 2 K. xiii. 17). In its condition, thus exposed to every hasty incursion, and to every shock of war, we read the fortunes of that tribe which for the sake of its richness consented to sink into a half-nomadic state—"Rejoice, O Issachar, in thy tents. . . Issachar is a strong ass, couching down between two burdens; and he saw that rest was good, and the land that it was pleasant, and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix. 14, 15; Deut. xxxiii. 18). Once only did this tribe shake off the yoke; when under the heavy pressure of Sbeem, "the chiefs of Issachar were with Deborah" (Judg. v. 15). Their exposed position and valuable possessions in this open plain made them anxious for the succession of David to the throne, as one under whose powerful protection they would enjoy that peace and rest they loved; and they joined with their neighbours of Zebulun and Naphtali in sending to David presents of the richest productions of their rich country (1 Chr. xii. 32, 40).

The whole borders of the plain of Esdraelon are dotted with places of high historic and sacred interest. Here we group them together, while referring the reader for details to the separate articles. On the east we have *Endor*, *Naun*, and *Shuenn*, ranged round the base of the "hill of Moreh"; then *Bethshean* in the centre of the "Valley of Jezreel"; then *Gilboa*, with the "well of Hinnat," and the ruins of *Jezreel* at its western base. On the south are *Engannin*, *Tinnach*, and *Megiddo*. At the western apex, on the overhanging brow of *Carmel*, is the scene of Elijah's sacrifice; and close by the foot of the mountain below, runs the *Kishon*, on whose banks the false prophets of Baal were slain. On the north, among places of less note, are *Nazareth* and *Tabor*. The modern Syrians have forgotten the ancient name as they have forgotten the ancient history of Esdraelon; and it is now known among them only as *Merj ibn 'Amer*, "the Plain of the Son of 'Amer." A graphic sketch of Esdraelon is given in Stanley's *S. & P.* 335, sq. See also the *Handbook for Syria and Palestine*, pp. 351, sq.; Robinson, ii. 315-30, 366, iii. 113, sq. [J. L. P.]

ESDRAS (*Ἐσδρας*; *Esdra*), 1 Esd. viii. 1, 3, 7, 8, 9, 19, 23, 25, 91, 92, 96; ix. 1, 7, 16, 39, 40, 42, 45, 46, 49; 2 Esd. i. 1; ii. 10, 33, 42; vi. 10; vii. 2, 25; viii. 2, 19; xiv. 1, 38. [EZRA.]

ESDRAS, FIRST BOOK OF, the first in order of the Apocryphal books in the English Bible, which follows Luther and the German Bibles in separating the Apocryphal from the Canonical books, instead of binding them up together according to

historical order. (Walton's *Prolegom. de vers. Græc.* §9). The classification of the 4 books which have been named after Ezra is particularly complicated. In the Vatican and other quasi-modern editions of the LXX., our 1st Esdr. is called the first book of Esdras, in relation to the Canonical book of Ezra which follows it, and is called the second Esdras. But in the Vulgate, 1st Esdr. means the canonical Book of Ezra, and 2nd Esdr. means *Nehemiah*, according to the primitive Hebrew arrangement, mentioned by Jerome, in which *Ezra* and *Nehemiah* made up two parts of the one book of Ezra; and 3rd and 4th Esdr. are what we now call 1 and 2 Esdras. These last, with the prayer of Manasse, are the only apocryphal books admitted *eo nomine* into the Romish Bibles, the other apocrypha being declared canonical by the Council of Trent. The reason of the exclusion of 3rd Esdras from the Canon seems to be that the Tridentine fathers in 1546, were not aware that it existed in Greek. For it is not in the Complutensian edition (1515), nor in the Biblia Regia; Vatablus (about 1540) had never seen a Greek copy, and, in the preface to the apocryphal books, speaks of it as only existing in some MSS and printed Latin Bibles.\* Baduel also, a French Protestant divine (*Bibl. Crit.*) (about 1550), says that he knew of no one who had ever seen a Greek copy. For this reason it seems it was excluded from the Canon, though it has certainly quite as good a title to be admitted as Tobit, Judith, &c. It has indeed been stated (Bp. Marsh, *Comp. View*, ap. Soames *Hist. of Ref.* ii. 608) that the Council of Trent in excluding the 2 Books of Esdras followed Augustine's Canon. But this is not so. Augustine (*de Doctr. Christ.* lib. ii. 13) distinctly mentions among the libri Canonici, *Esdras duo*,<sup>b</sup> and that one of these was our first Esdras is manifest from the quotation from it given below from *De Civit. Dei*. Hence it is also sure that it was included among those pronounced as Canonical by the 3rd Council of Carthage A.D. 397, or 419, where the same title is given, *Esdras libri duo*: where it is to be noticed by the way that Augustine and the Council of Carthage use the term Canonical in a much broader sense than we do; and that the manifest ground of considering them Canonical in any sense, is their being found in the Greek copies of the LXX. in use at that time. In all the earlier editions of the English Bible the books of Esdras are numbered as in the Vulgate. In the 6th Article of the Church of England (first introduced in 1571) the first and second books denote Ezra and Nehemiah, and the 3rd and 4th, among the Apocrypha, are our present 1st and 2nd. In the list of revisers or translators of the *Bishops' Bible*, sent by Archbishop Parker to Sir William Cecil, with the portion revised by each, Ezra, Nehemiah, Esther, and the apocryphal books of Esdras, seem to be all comprised under the one title of ESDRAS. Barlow, Bp. of Chichester, was the translator, as also of the books of Judith, Tobias, and Sapientia (Corresp. of Archbp. Parker, Park. Soc. p. 335). The Geneva Bible first adopted the classification used in our present Bibles, in which EZRA and NEHEMIAH

give their names to the two Canonical books, and the two Apocryphal become 1 and 2 Esdras; where the Greek form of the name marks that these books do not exist in Hebrew or Chaldee.

As regards the antiquity of this book and the rank assigned to it in the early Church, it may suffice to mention that Josephus quotes largely from it, and follows its authority, even in contradiction to the canonical Ezra and Nehemiah, by which he has been led into hopeless historical blunders and anachronisms. It is quoted also by Clement Alexander (*Strom.* i.); and the famous sentence "Veritas manet, et invalescit in æternum, et vivit et obtinet in sæcula sæculorum:" is cited by Cyprian as from Esdras, prefixed by, *ut scriptum est*: (*Epist.* lxxiv.). Augustine also refers to the same passage (*De Civit. Dei*, xviii. 36), and suggests that it may be prophetic of Christ who is the truth. He includes under the name of Esdras our 1 Esdr., and the Canonical books of Ezra and Nehemiah. 1 Esdr. is also cited by Athanasius and other fathers; and perhaps there is no sentence that has been more widely divulged than that of 1 Esdr. iv. 41, "Magna est veritas et prævalebit." But though it is most strange that the Council of Trent should not have admitted this book into their wide Canon, nothing can be clearer on the other hand than that it is rightly included by us among the Apocrypha, not only on the ground of its historical inaccuracy, and contradiction of the true Ezra, but also on the external evidence of the early Church. That it was never known to exist in Hebrew, and formed no part of the Hebrew Canon, is admitted by all. Jerome, in his preface to *Ezr.* and *Neh.*, speaks contemptuously of the dreams (*somnia*) of the 3rd and 4th Esdras, and says they are to be utterly rejected. In his *Prologus Galeatus* he clearly defines the number of books in the Canon, xxi., corresponding to the xxi letters of the Hebrew alphabet, and says that all others are Apocryphal. This of course excludes 1 Esdras. Meho, Origen, Eusebius, Athanasius, Gregory Nazianzen, Hilary of Poitiers, Cyril of Jerusalem, the Council of Laodicea, and many other fathers, expressly follow the same Canon, counting as apocryphal whatever is not comprehended in it.

As regards the contents of the book, and the author or authors of it—the first chapter is a transcript of the two last chapters of 2 Chr. for the most part *verbatim*, and only in one or two parts slightly abridged and paraphrased, and showing some corruptions of the text, the use of a different Greek version, and some various readings, as e.g. 1. 5 *μεγαλειότητα*, for *διὰ χειρὸς*, indicating a various reading in the Hebrew; perhaps פְּכָדָר for מְכָתֵב, or, as Bretschneider suggests, מְכָתֵב; פְּרִוִּיּוֹן (פְּרָר), for the Heb. of 2 Chr. xxxv. 12, פְּכָר, "with the oxen," &c. Chapters iii., iv., and v., to the end of v. 6, are the *original* portions of the book, containing the legend of the three young Jews at the court of Darius; and the rest is a transcript more or less exact of the book of Ezra, with the chapters transposed and quite otherwise arranged, and a portion of Nehemiah.

\* "Oratio Manasse, necnon libri duo qui sub libri tertii et quarti Esdræ nomine circumferuntur, hoc in loco, extra scilicet seriem canoniceorum librorum, quos sancta Tridentina synodus suscepit, et pro canonice suscipiendos delevit, sepositi sunt, ne prorsus interirent, quippe qui à nonnullis sanctis Patribus

interdum citantur, et in aliquibus Bibliis Latinis, tam manuscriptis quam impressis, reperiuntur."

<sup>b</sup> Jerome, in his preface to his Latin version of *Ezra* and *Nehemiah*, says, "Unus à nobis liber editus est," etc.; though he implies that they were sometimes called 1 and 2 Esdras.

Hence a twofold design in the compiler is discernible. One to introduce and give Scriptural sanction to the legend about Zerubbabel, which may or may not have an historical base, and may have existed as a separate work; the other to explain the great obscurities of the book of Ezra, and to present the narrative, as the author understood it, in historical order, in which however he has signally failed. For, not to advert to innumerable other contradictions, the introducing the opposition of the heathen, as offered to Zerubbabel after he had been sent to Jerusalem in such triumph by Darius, and the describing that opposition as lasting "until the reign of Darius" (v. 73), and as put down by an appeal to the decree of Cyrus, is such a palpable inconsistency, as is alone sufficient quite to discredit the authority of the book. It even induces the suspicion that it is a farrago made up of scraps by several different hands. At all events, attempts to reconcile the different portions with each other, or with Scripture, is lost labour.

As regards the time and place when the compilation was made, the *original* portion is that which alone affords much clue. This seems to indicate that the writer was thoroughly conversant with Hebrew, even if he did not write the book in that language. He was well acquainted too with the books of Esther and Daniel (1 Esdr. iii. 1, 2 sqq.), and other books of Scripture (*ib.* 20, 21, 39, 41, &c.), and 45 compared with Ps. cxxvii. 7. But that he did not live under the Persian kings, and was not contemporary with the events narrated, appears by the indiscriminating way in which he uses promiscuously the phrase *Medes and Persians*, or, *Persians and Medes*, according as he happened to be imitating the language of Daniel or of the book of Esther. The allusion in ch. iv. 23 to "sailing upon the sea and upon the rivers," for the purpose of "robbing and stealing," seems to indicate residence in Egypt, and acquaintance with the lawlessness of Greek pirates there acquired. The phraseology of v. 73 savours also strongly of Greek rather than Hebrew. If, however, as seems very probable, the legend of Zerubbabel appeared first as a separate piece, and was afterwards incorporated into the narrative made up from the book of Ezra, this Greek sentence from ch. v. would not prove anything as to the language in which the original legend was written. The expressions in iv. 40, "She is the strength, kingdom, power, and majesty of all ages," is very like the doxology found in some copies of the Lord's Prayer, and retained by us, "thine is the kingdom, and the power and the glory for ever." But Lightfoot says that the Jews in the temple service, instead of saying Amen, used this antiphon, Blessed be the Name of the Glory of His Kingdom for ever and ever (vi. 427). So that the resemblance may be accounted for by their being both taken from a common source.

For a further account of the history of the times embraced in this book, see EZRA; ESDRAS 2; Joseph. *Antiq. Jud.* xi.; Hervey's *Genealog. of our L. J. Chr.* ph. xi.; Bp. Cosin on the *Canon of Scr.*; Fulke's *Defence of Transl. of Bible*; Park. Soc. p. 18 sqq.; Kitto, *Bibl. Cyclop. Esdras*; and the authorities cited in the course of this article. [A. C. H.]

ES'DRAS, THE SECOND BOOK OF, in the English Version of the Apocrypha, and so called by the author (2 Esdr. i. 1), is more commonly known, according to the reckoning of the Latin Version, as the *fourth* book of Ezra [see above, ESDRAS 1.]; but the arrangement in the Latin MSS. is not uniform, and in the Arabic and Aethiopic versions the book is called the first of Ezra. The original title, Ἀποκάλυψις Ἐσδρά (or προφητεία Ἐσδρά), "the Revelation of Ezra," which is preserved in some old catalogues of the canonical and apocryphal books (Nicephorus, ap. Fabric. *Cod. Pseud. V. T.*, ii. 176. Montfaucon, *Biblioth. Coislin.* p. 194) is far more appropriate, and it were to be wished that it could be restored.\*

1. For a long time this Book of Ezra was known only by an old Latin version, which is preserved in some MSS. of the Vulgate. This version was made by Ambrose, and, like the other parts of the *Vetus Latina*, is probably older than the time of Tertullian. A second Arabic text was discovered by Mr. Gregory about the middle of the 17th century in two Bodleian MSS., and an English version made from this by Simon Ockley was inserted by Whiston in the last volume of his *Primitive Christianity* (London, 1711). Fabricius added the various readings of the Arabic text to his edition of the Latin in 1723 (*Cod. Pseudep. V. T.* ii. 174 ff.). A third Aethiopic text was published in 1820 by [Archbp.] Lawrence with English and Latin translations, likewise from a Bodleian MS. which had remained wholly disregarded, though quoted by Ludolf in his Dictionary (*Primi Esrae libri, versio Aethiopica . . . Latine Anglicaeque redditae*. Oxon. 1820). The Latin translation has been reprinted by Gröser, with the various readings of the Latin and Arabic (*Praef. Pseudep.* Stuttg. 1840, 66 ff.); but the original Arabic text had not yet been published.

2. The three versions are all made directly from a Greek text. This is evidently the case with regard to the Latin (Lücke, *Versuch einer vollst. Einleitung*, i. 149) and the Aethiopic (Van der Vliet, *Disputatio critica de Esrae lib. apocr.* Amstel., 1839, 75 ff.), and apparently so with regard to the Arabic. A clear trace of a Greek text occurs in the Epistle of Barnabas (c. xii. = 2 Esr. v. 5), but the other supposed references in the Apostolic Fathers are very uncertain (e. g. Clem. i. 20; Herm. *Past.* i. 1, 3, &c.). The next witness to the Greek text is Clement of Alexandria, who expressly quotes the book as the work of "the prophet Ezra" (*Strom.* iii. 16. §100). A question, however, has been raised whether the Greek text was not itself a translation from the Hebrew (Brethschneider, in Henke's *Mus.* iii. 478 ff. ap. Lücke l. c.); but the arguments from language by which the hypothesis of a Hebrew (Aramaic) original is supported, are wholly unsatisfactory; and in default of direct evidence to the contrary, it must be supposed that the book was composed in Greek. This conclusion is further strengthened by its internal character, which points to Egypt as the place of its composition.

3. The common Latin text, which is followed in the English version, contains two important interpolations (Ch. i. ii.; xv. xvi.) which are not found in the Arabic and Aethiopic versions, and are sepa-

\* Gröser obtained a transcript of a Greek MS. at Paris, bearing the title, which proved to be a worthless compilation of late date. *Jahrbuch d. Hellst.* i. 70, n.;

comp. Van der Vliet, *Disp. crit. de Esrae lib. apocr.* Pref. pp. 6 ff.

rated from the genuine Apocryphse in the best Latin MSS. Both of these passages are evidently of Christian origin: they contain traces of the use of the Christian Scriptures (c. g. 1. 30, 33, 37, ii. 13, 26, 45 ff., xv. 8, 35, xvi. 54), and still more they are pervaded by an anti-Jewish spirit. Thus, in the opening chapter, Ezra is commanded to reprove the people of Israel for their continual rebellions (i. 1-25), in consequence of which God threatens to cast them off (i. 24-34) and to "give their houses to a people that shall come." But in spite of their desertion, God offers once more to receive them (ii. 1-32). The offer is rejected (ii. 33), and the heathen are called. Then Ezra sees "the Son of God" standing in the midst of a great multitude "wearing crowns and bearing palms in their hands" in token of their victorious confession of the truth. The last two chapters (xv. xvi.) are different in character. They contain a stern prophecy of the woes which shall come upon Egypt, Babylon, Asia, and Syria, and upon the whole earth, with an exhortation to the chosen to guard their faith in the midst of all the trials with which they shall be visited (? the Decian persecution. Cf. Lucke, 186, &c.). Another smaller interpolation occurs in the Latin version in vii. 28, where *Jesus meus Jesus* answers to "*My Messiah*" in the Aethiopic, and to "*My Son Messiah*" in the Arabic (cf. Lücke, 170 n. &c.). On the other hand, a long passage occurs in the Aethiopic and Arabic versions after vii. 35, which is not found in the Latin (Aethiop. c. vi.), though it bears all the marks of genuineness, and was known to Ambruse (*de bono mort.* 10, 11). In this case the omission was probably due to doctrinal causes. The chapter contains a strange description of the intermediate state of souls, and ends with a peremptory denial of the efficacy of human intercession after death. Vigilantius appealed to the passage in support of his views, and called down upon himself by this the severe reproof of Jerome (*Lib. c. Vigil.* c. 7). This circumstance, combined with the Jewish complexion of the narrative, may have led to its rejection in later times (cf. Lücke, 155 ff.).

4. The original Apocalypse (iii.-xiv.) consists of a series of angelic revelations and visions in which Ezra is instructed in some of the great mysteries of the moral world, and assured of the final triumph of the righteous. The *first revelation* (iii.-v. 15, according to the A. V.) is given by the angel Uriel to Ezra, in "the thirtieth year after the ruin of the city," in answer to his complaints (c. iii.) that Israel was neglected by God while the heathen were lords over them; and the chief subject is the unsearchableness of God's purposes, and the signs of the last age. The *second revelation* (v. 20-vi. 34) carries out this teaching yet further, and lays open the gradual progress of the plan of Providence, and the nearness of the visitation before which evil must attain its most terrible climax. The *third revelation* (vi. 35-ix. 25) answers the objections which arise from the apparent narrowness of the limits within which the hope of blessedness is confined, and describes the coming of Messiah and the last scene of Judgment. After this follow three visions.<sup>b</sup> The *first vision* (ix. 26-x. 59) is of a woman (Sion) in deep sorrow, lamenting the

death, upon his bridal day, of her only son (the city built by Solomon), who had been born to her after she had had no child for thirty years. But while Ezra looked, her face "upon a sudden shined exceedingly," and "the woman appeared no more, but there was a city builded." The *second vision* (xi.-xii.), in a dream, is of an eagle (Rome) which "came up from the sea" and "spread her wings over all the earth." As Ezra looked, the eagle suffered strange transformations, so that at one time "three heads and six little wings" remained; and at last only one head was left, when suddenly a lion (Messiah) came forth, and with the voice of a man rebuked the eagle, and it was burnt up. The *third vision* (xiii.), in a dream, is of a man (Messiah) "flying with the clouds of heaven," against whom the nations of the earth are gathered, till he destroys them with the blast of his mouth, and gathers together the lost tribes of Israel and offers Sion, "prepared and builded," to his people. The last chapter (xiv.) recounts an appearance to Ezra of the Lord who showed Himself to Moses in the bush, at whose command he receives again the law which had been burnt, and with the help of scribes writes down ninety-four books (the twenty-four canonical books of the O. T. and seventy books of secret mysteries), and thus the people is prepared for its last trial, guided by the recovered Law.

5. The date of the book is much disputed, though the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke (*Versuch einer vollst. Einl.* &c., ed. 2, i. 209) places it in the time of Caesar; Van der Vlis (*Disput. crit.* l. c.) shortly after the death of Caesar. Lawrence (l. c.) brings it down somewhat lower, to 28-25 B.C., and Hilgenfeld (*Jud. Apok.* p. 221) agrees with this conclusion, though he arrives at it by very different reasoning. On the other hand Gfrörer (*Jahrh. d. Heils.* i. 69 f.) assigns the book to the time of Domitian, and in this he is followed by Wieseler and by Baner (Lücke, p. 189, &c.), while Lücke in his first edition had regarded it as the work of a Hellenist of the time of Trajan. The interpretation of the details of the vision of the eagle, which furnishes the chief data for determining the time of its composition, is extremely uncertain from the difficulty of regarding the history of the period from the point of view of the author; and this difficulty is increased by the allusion to the desolation of Jerusalem, which may be merely suggested by the circumstances of Ezra, the imaginary author: or, on the contrary, the last destruction of Jerusalem may have suggested Ezra as the medium of the new revelation. (Cf. Fabricius, *Cod. Pseudep.* ii. pp. 189 ff. and Lücke, 187 n. &c., for a summary of the earlier opinions on the composition of the book.)

6. The chief characteristics of the "three-headed eagle," which refer apparently to historic details,<sup>b</sup> are "twelve feathered wings" (*duodecim alae pennarum*), "eight counter-feathers" (*contraive pennae*), and "three heads;" but though the writer expressly interprets these of kings (xii. 14, 20) and "kingdoms" (xii. 23), he is, perhaps intentionally, so obscure in his allusions, that the interpretation only increases the difficulties of the vision itself.

<sup>b</sup> The description of the duration of the world as "divided into twelve (*ten Aeth.*) parts, of which ten parts are gone already, and half of a tenth part"

(xiv. 11), is so uncertain in its reckoning, that no argument can be based upon it.

One point only may be considered certain,—the eagle can typify no other empire than Rome. Notwithstanding the identification of the eagle with the fourth empire of Daniel (cf. Barn. *ep.* 4; DANIEL, BOOK OF), it is impossible to suppose that it represents the Greek kingdom (Hilgenfeld; cf. Volkmar, *Das vierte Buch Esra*, pp. 36 ff. Zürich, 1858). The power of the Ptolemies could scarcely have been described in language which may be rightly applied to Rome (xi. 2, 6, 40); and the succession of kings quoted by Hilgenfeld to represent “the twelve wings” preserves only a faint resemblance to the imagery of the vision. But when it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. The second wing (*i. e.* king) rules twice as long as the other (xi. 17). This fact seems to point to Octavian and the line of the Caesars; but thus the line of “twelve” leads to no plausible conclusion. If it is supposed to close with Trajan (Lücke, *1te Aufl.*), the “three heads” receive no satisfactory explanation. If, again, the “three heads” represent the three Flavii, then “the twelve” must be composed of the nine Caesars (Jul. Caesar—Vitellius) and the three pretenders Piso, Vindex, and Nymphidius (Grörrer), who could scarcely have been brought within the range of a Jewish Apocalypse. Volkmar proposes a new interpretation, by which two wings are to represent one king, and argues that this symbol was chosen in order to conceal better from strange eyes the revelation of the secret. The twelve wings thus represent the six Caesars (Caesar—Nero); the eight “counter-fraternal,” the usurping emperors Galba, Otho, Vitellius, and Nerva; and the three heads the three Flavii. This hypothesis offers many striking coincidences with the text, but at the same time it is directly opposed to the form of interpretation given by Ezra (xii. 14 *regnabant . . . duodecim reges . . . v. 18 octo reges*), and Volkmar’s hypothesis that the *twelve* and *eight* were marked in the original MS. in some way so as to suggest the notion of division, is extremely improbable. Van der Vlis and Lücke in his later edition regard the twelve kings as only generally symbolic of the Roman power; and while they identify the three heads with the Triumvirs, seek no explanation of the other details. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon Jewish thought and history during the critical period 100 B.C.—100 A.C.

7. But while the date of the book must be left undetermined, there can be no doubt that it is a genuine product of Jewish thought. Weiss (Evangeliensfrage, 222) alone dissents on this point from the unanimous judgment of recent scholars (Hilgenfeld, 190, &c.); and the contrast between the tone and style of the Christian interpolations and the remainder of the book is in itself sufficient to prove the fact. The Apocalypse was probably written in Egypt; the opening and closing chapters certainly were.

8. In tone and character the Apocalypse of Ezra offers a striking contrast to that of Enoch [THE BOOK OF ENOCH]. Triumphant anticipations are overshadowed by gloomy forebodings of the destiny of the world. The idea of victory is lost in that of revenge. Future blessedness is reserved only for “a very few” (vii. 70, viii. 1, 3, 52–55), vii. 1–13). The great question is “not how the

ungodly shall be punished, but how the ‘righteous shall be saved, for whom the world is created’” (ix. 13). The “woes of Messiah” are described with a terrible minuteness which approaches the despairing traditions of the Talmud (v., xiv. 10 ff.; ix. 3 ff.); and after a reign of 400 years (vii. 28–35; the clause is wanting in Aeth. v. 29) “Christ,” it is said, “My Son, shall die (*Arab.* omits), and all men that have breath; and the world shall be turned into the old silence seven days, like as in the first beginning, and no man shall remain” (vii. 29). Then shall follow the resurrection and the judgment, “the end of this time and the beginning of immortality” (vii. 43). In other points the doctrine of the book offers curious approximations to that of St. Paul, as the imagery does to that of the Apocalypse (*c. g.* 2 Esdr. xiii. 43 ff.; v. 4). The relation of “the first Adam” to his sinful posterity, and the operation of the Law (iii. 20 ff., vii. 48, ix. 36); the transitoriness of the world (iv. 26); the eternal counsels of God (vi. 8); His Providence (vii. 11) and long-suffering (vii. 64); His sanctification of His people “from the beginning” (ix. 8) and their peculiar and lasting privileges (vi. 59) are plainly stated; and on the other hand the efficacy of good works (viii. 33) in conjunction with faith (ix. 7) is no less clearly affirmed.

9. One tradition which the book contains obtained a wide reception in early times, and served as a pendant to the legend of the origin of the LXX. Ezra, it is said, in answer to his prayer, that he might be inspired to write again all the Law which was burnt, received a command to take with him tablets and five men, and retire for forty days. In this retirement a cup was given him to drink, and forthwith his understanding was quickened and his memory strengthened; and for forty days and forty nights he dictated to his scribes, who wrote ninety-four books (*Latin*, 204), of which twenty-four were delivered to the people in place of the books which were lost (xiv. 20–48). This strange story was repeated in various forms by Irenaeus (*ado. Haer.* iii. 2), Tertullian (*De cult. foem.* i. 3; *omne instrumentum Judaicae literaturae per Esdram constat restauratum*), Clement of Alexandria (*Strom.* i. 22, p. 410, P. cf. p. 392), Jerome (*ado. Helv.* 7, cf. Pseudo-Augustine, *de Mirab. S. Scr.* ii. 32), and many others; and probably owed its origin to the tradition which regarded Ezra as the representative of the men of “the Great Synagogue,” to whom the final revision of the canonical books was universally assigned in early times. [CANON.]

10. Though the book was assigned to the “prophet” Ezra by Clement of Alexandria (*Strom.* iii. 16, p. 556 P.) and quoted with respect by Irenaeus (*l. c.*), Tertullian (*?* *l. c.* Cf. *adv. Marc.* iv. 16), and Ambrose (*Ep.* xxxiv. 2; *de bono Mortis*, 10 ff.), it did not maintain its ecclesiastical position in the Church. Jerome speaks of it with contempt, and it is rarely found in MSS. of the Latin Bible. Archbishop Lawrence examined 180 MSS. and the book was contained only in thirteen, and in these it was arranged very differently. It is found, however, in the printed copies of the Vulgate older than the Council of Trent, by which it was excluded from the Canon; and quotations from it still occur in the Roman services (Bassage, *ap. Fabr. Cod. Pseud.* ii. 191). On the other hand, though this book is included among those which are “read for examples of life” by the English

(church, no use of it is there made in public worship. Luther and the Reformed Church rejected the book entirely; but it was held in high estimation by numerous mystics (Fabric. l. c. 178 ff.) for whom its contents naturally had great attractions.

11. The chief literature of the subject has been noticed in the course of the article. Lücke has, perhaps, given the best general account of the book; but the essay of Van der Vlis is the most important contribution to the study of the text, of which a critical edition is still needed, though the Latin materials for its construction are abundant. [B. F. W.]

ES'EBOŃ, THEY OF (τοὺς Ἑσβεωνίτας, Alex. τοὺς Ἑσβεών; *Hesebon*), Jud. v. 15. [HESIBON.]

ES'EBRIAS (Ἑσπερίας; *Sedebias*), 1 Esd. viii. 54. [SHEREBIAH.]

ESEK (עֶשֶׂק; Ἀδία; *Adunnit*), a well (נַחַל) containing a spring of water; which the herdsmen of Isaac dug in the valley of Giear, and which received its name of Esék, or "strife," because the herdsmen of Giear "struve" (אִרְבְּעָה) with him for the possession of it\* (Gen. xvi. 20).

ESH-BAAL (עֶשְׁבָּאֵל = "Baal's man;," Ἀσβαδά, Alex. Ἰσβαδά; *Eshaut*), the fourth son of Saul, according to the genealogy of 1 Chr. viii. 33 and ix. 39. He is doubtless the same person as ISH-BOSIETH, since it was the practice to change the obnoxious name of Baal into Boseth or Besheth, as in the case of Jerub-besheth for Jerub-baal, and (in this very genealogy) of Merib-baal for Mephibosheth; compare also Hos. ix. 10, where Bosheth (A. V. "shame") appears to be used as a synonym for Baal. If Esh-baal is not identical with Ish-bosheth, the latter has been omitted entirely from these lists of Saul's descendants, which, considering his position, is not likely. Which of the two names is the earlier it is not possible to decide. [G.]

ESH'BAN (עֶשְׁבָּן; Ἀσβάν, Ἀρεβών, Alex. Ἀρεβάν; *Eschim*), a Horite, one of the four sons of DISHAN (so the Hebrew in Gen.; but A. V. has Dishon), the son of Seir the Horite (Gen. xxxvi. 26; 1 Chr. i. 41). No trace of the name appears to have been discovered among the modern tribes of Idumaea.

ESH'COL (עֶשְׂקוֹל; Ἑσχαλά; Josephus Ἑσχαλής; *Eschof*), brother of Mamre the Amorite, and of Aner; and one of Abraham's companions in his pursuit of the four kings who had carried off Lot (Gen. xiv. 13, 24). According to Josephus (*Ant.* i. 10, §2) he was the foremost of the three brothers, but the Bible narrative leaves this quite uncertain (comp. 13 with 24). Their residence was at Hebron (xiii. 18), and possibly the name of Eshcol remained attached to one of the fruitful valleys in that district till the arrival of the Israelites, who then interpreted the appellation as significant of the gigantic "cluster" (in Hebr. *Eshcol*) which they obtained there.

ESH'COL, THE VALLEY, OR THE BROOK, OF (עֶשְׂקוֹל וְנַחַל; עֶשְׂקוֹל; *φάραγξ Βότρυος*; *Nehelacool*, *id est torrens botri*), a wady in the neighbourhood of Hebron, explored by the spies who were sent by Moses from Kadesh-barnea. From

the terms of two of the notices of this transaction (Num. xxxiii. 9; Dent. i. 24) it might be gathered that Eshcol was the furthest point to which the spies penetrated. But this would be to contradict the express statement of Num. xiii. 21, that they went as far as Rehob. From this fruitful valley they brought back a huge cluster of grapes, an incident which, according to the narrative, obtained for the place its appellation of the "valley of the cluster" (Num. xiii. 23, 24). It is true that in Hebrew *Eshcol* signifies a cluster or bunch, but the name had existed in this neighbourhood centuries before, when Abraham lived there with the chiefs Aner, Eshcol, and Mamre, not Hebrews but Amorites; and this was possibly the Hebrew way of appropriating the ancient name derived from that hero into the language of the conquerors, consistently with the patronymic turns so much in favour at that time, and with a practice of which traces appear elsewhere.

In the Onomasticon of Eusebius the *φάραγξ Βότρυος* is plural, with some hesitation, at Gophna, fifteen miles north of Jerusalem, on the Neapolis road. By Jerome it is given as north of Hebron, on the road to Bethsur (*Epitaph. Pauline*). The Jewish traveller Ha-Parchi speaks of it as north of the mountain on which the (ancient) city of Hebron stood (Benjamin of Tudela, *Asher*, ii. 437); and here the name has been lately observed still attached to a spring of remarkably fine water called *Áin-Eshkoli*, in a valley which crosses the vale of Hebron N.E. and S.W., and about two miles north of the town (Van de Velde, ii. 64). It is right to say that this interesting intelligence has not been yet confirmed by other observers. [G.]

ESHT'AN (עֶשְׁתָּן; *Soud*, Alex. Ἑσάν; *Esaan*), one of the cities of Judah, in the mountainous district, and in the same group with Hebron (Josh. xv. 52). The name does not occur again, nor has it been met with in modern times. [G.]

E'SHEK (עֶשֶׁק; Ἀσθήλ, Alex. Ἑσελέκ; *Esec*), a Benjamite, one of the late descendants of Saul; the founder of a large and noted family of archers, lit. "treaders of the bow" (1 Chr. viii. 39). The name is omitted in the parallel list of 1 Chr. ix.

ESHKAL'ONITES, THE (accurately "the Eshklonite," עֶשְׂקוֹלִי, in the singular number; *τῶ Ἀσκαλωνίτῃ*; *Ascalonitas*), Josh. xiii. 3. [ASHKELON.]

ESH'TAOL (עֶשְׂתָּאֵל and עֶשְׂתָּאֵל; Ἀσταάλ, Ἀσά, Ἑσθαάλ; *Eshuol*, *Ashuol*), a town in the low country—the *Shefelah*—of Judah. It is the first of the first group of cities in that district (Josh. xv. 33) enumerated with Zoreah (Heb. *Zureah*), in company with which it is commonly mentioned. Zorah and Eshtaol were two of the towns allotted to the tribe of Dan out of Judah (Josh. xix. 41). Between them, and behind Kirjath-jearim, was situated Mahaneh-Dan, the camp or stronghold which formed the head-quarters of that little community during their constant encounters with the Philistines. Here, among the old warriors of the tribe, Samson spent his boyhood, and experienced the first impulses of the Spirit of Jehovah; and hither after his last exploit his body was brought, up the long slopes of the western hills, to its last rest

\* The word rendered "strive" (אִרְבֵּה) in the former part of ver. 20, and in 21 and 22 is not the same as that from which *Esek* derived its name, and should

be translated by a different English word. Such points, though small, are anything but unimportant in connexion with these ancient and peculiar records.

in the burying-place of Manohah his father (Judg. xiii. 25, xvi. 31, xviii. 2, 8, 11, 12). [DAN.] In the genealogical records of 1 Chron. the relationship between Eshtaul, Zareah, and Kirjath-jearim is still maintained. [ESHTAULITES.]

In the *Onomasticum* of Eusebius and Jerome Eshtaul is twice mentioned—(1) as Astaul of Judah, deified as then existing between Azotus and Ascalon under the name of *Astho*; (2) as Esthauil of Dan, ten miles N. of Elentheopolis. The latter position is quite in accordance with the indications of the Bible. In more modern times, however, the name has vanished. Zorah has been recognized as *Sārith* (Rob. ii. 14, 16, 224, iii. 153), but the identification of Eshtaul has yet to be made. Schwarz (102) mentions a village named *Stual*, west of Zorah, but, apart from the fact that this is corroborated by no other traveller and by no map, the situation is too far west to be "behind Kirjath-jearim" if *Kuryet el-enab* be Kirjath-jearim. The village marked on the maps of Robinson and Van de Velde, *Yeshāu*, and alluded to by the former (iii. 155), is nearer the requisite position; but the resemblance between the two names is too faint to admit of identification. [G.]

**ESHTAULITES, THE** (Ἐσθαυλίται, accur. "the Eshtauleite," in sing. number; *ἰδιὸν Ἐσθαυλίτου*, Alex. of Ἐσθαυλίται; *Eshtautilite*), with the Zareathites, were among the families of Kirjath-jearim (1 Chr. ii. 53). [ESHTAUL.]

**ESHTEMO'A**, and in shorter form, without the final guttural, **ESHTEMOH** (Ἐσθεμὼς and Ἐσθεμὼν; the latter occurs in Josh. xv. only; *Ἐσθεμὼς*; Alex. *Ἐσθεμὼς*; corruptly *Ἐσ καὶ Μὲν*; καὶ τῶν Τέμα, *Ἐσθιέ*; *Estemo*, *Estemo*), a town of Judah, in the mountains; one of the group containing **DEBIR** (Josh. xv. 50). With its "suburbs" Eshtemoa was allotted to the priests (xvi. 14; 1 Chr. vi. 57). It was one of the places frequented by David and his followers during the long period of their wanderings; and to his friends there he sent presents of the spoil of the Amalekites (1 Sam. xxx. 28, comp. 31). The place was known in the time of Eusebius and Jerome (*praegranda vicinis*), though their description of its locality is too vague to enable us to determine it (*Onom. Eshtemo*). But there is little doubt that it has been discovered by Dr. Robinson at *Semū'a*, a village seven miles south of Hebron, on the great road from *el-Milh*, containing considerable ancient remains, and in the neighbourhood of other villages still bearing the names of its companions in the list of Josh. xv.; Anab, Socoh, Juttir, &c. (See Robinson, i. 494, ii. 204, 5; Schwarz, 105.)

In the lists—half genealogical, half topographical—of the descendants of Judah in 1 Chron. Eshtemoa occurs as derived from Ishbah, "the father of Eshtemoa" (1 Chr. iv. 17); Gedor, Socoh, and Zanoah, all towns in the same locality being named in the following verse. Eshtemoa appears to have been founded by the descendants of the Egyptian wife of a certain Merod, the three other towns by those of his Jewish wife. See the explanations of Bertheau (*Chronik, ad loc.*). In verse 19 the name appears to belong to an actual person, **ESHTEMO'A** the Manchathite. [G.]

**ESHTON** (Ἐσθὼν; Ἀσθαθὼν; *Esthon*), a name which occurs in the genealogies of Judah (1 Chr. iv. 11, 12). Mehir was "the father of

Eshton," and amongst the names of his four children are two—Beth-rapah and Ir-nahash—which have the appearance of being names, not of persons, but of places. [G.]

**ES'LI** (Rec. T. Ἐσλί, B Ἐσλε, probably = Ἐσλί, AZALIAH; *Esli*, Cod. Amiat. *Hesli*), son of Nagge or Naggai, and father of Naum, in the genealogy of Christ (Luke iii. 25). See Hervey, *Genealogies, &c.*, 136.

**ESO'RA** (Αἰσώρα; Vulg. omits: the Peschito Syriac reads *Bethchorn*), a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Jud. iv. 4). The name may be the representative of the Hebrew word *Hazor*, or *Zorah* (Simonis, *Onom. N. T.* 19), but no identification has yet been arrived at. The Syriac reading suggests *Beth-horon*, which is not impossible.

**ES'RIL** (Ἐσρίλ, Alex. Ἐρίλ; Vulg. omits), 1 Esd. ix. 34. [AZAREEL, or SIALAL.]

**ES'ROM** (Rec. T. Ἐσρώμ; in Luke, Luchm. with B, Ἐσρώμ; *Esrom*), Matt. i. 3; Luke iii. 33. [HIZRON.]

**ESSENESES**. 1. In describing the different sects which existed among the Jews in his own time, Josephus dwells at great length and with especial emphasis on the faith and practice of the *Essenes*, who appear in his description to combine the ascetic virtues of the Pythagoreans and Stoics with a spiritual knowledge of the Divine Law. An analogous sect, marked, however, by characteristic differences, appears in the Egyptian *Therapeutae*, and from the detailed notices of Josephus (*B. J.* ii. 8; *Ant.* xiii. 5, §9, xv. 10, §4 f., xviii. 1, §2 ff.) and Philo (*Quod omni. prob.* *liber*, §12 ff. *Fragmenta*. ap. Euseb. *Præp. Eccl. De vita contemplativa*), and the casual remarks of Pliny (*H. N.* v. 17), later writers have frequently discussed the relation which these Jewish mystics occupied towards the popular religion of the time, and more particularly towards the doctrines of Christianity. For it is a most remarkable fact that the existence of such sects appears to be unrecognised both in the Apostolic writings and in early Hebrew literature.

2. The name *Essene* (Ἐσσηνοί, Joseph. *Esseni*, Plin.) or *Essæum* (Ἐσσηαῖοι Philo; *Jos. B. J.* i. 3, 5, &c.) is itself full of difficulty. Various derivations have been proposed for it, and all are more or less open to objection. Some have connected it with ἱσθίς (Ἀσθαθὼς) "puritan," or ἰσχυρῶς, "the retiring," or ἰσθίς, "the servant (of God)"; others, again, find the root in ἔσθω "to eat" (Baur), or ἔσθω "to bathe" (Grätz). Philo, according to his fashion, saw in the word a possible connexion with the Greek ἅγιος, *holy* (*Quod omni. prob. lib.* §12); and Epiphanius interpreted the collateral form Ὀσσηνοί as meaning "the stout race" (στυβαρὸν γένος, *Haec. xix. i. e.* ἱσθίς). It seems more likely that Essene represents ἰσθίς, "seers" (so Suidas = θεωρητικοί, Hilgenfeld) or ἰσθίς, "the silent, the mysterious" (Jost). Josephus represents ἰσθίς (LXX. *λογιστήρ*), "the High Priest's breastplate," by Ἐσσηνός, interpreting the word as equivalent to ἁγιώτης "ancient" (*Ant.* iii. 7, §5). Comp. Jost, *Gesch. d. Judenth.* i. 207 n.; Hilgenfeld, *Jud. Apok.* 277 f.; Ewald, *Gesch. Isr.* iv. 420 n.

2. The obscurity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organisation. The communities which were formed out of them

were a result of their practice, and not a necessary part of it. As a sect they were distinguished by an aspiration after ideal purity rather than by any special code of doctrines; and like the Chasidim of earlier times [ASSIDEANS], they were confounded in the popular estimation with the great body of the zealous observers of the Law (Pharisees). The growth of Essenism was a natural result of the religious feeling which was called out by the circumstances of the Greek dominion; and it is easy to trace the process by which it was matured. From the Maccabean age there was a continuous effort among the stricter Jews to attain an absolute standard of holiness. Each class of devotees was looked upon as practically impure by their successors, who carried the laws of purity still further; and the Essenes stand at the extreme limit of the mystic asceticism which was thus gradually reduced to shape. The associations of the "Scillites and Pharisees" (הכריתים "the companions, the wise") gave place to others bound by a more rigid rule; and the rule of the Essenes was made gradually stricter. Julius, the earliest Essene who is mentioned (c. 110 B.C.), appears living in ordinary society (Jos. B. J. i. 3, §5). Menahem, according to tradition a colleague of Hillel, was a friend of Herod, and brought upon his sect the favour of the king (Jos. Ant. xv. 10, §5). But by a natural impulse the Essenes withdrew from the dangers and distractions of business. From the cities they retired to the wilderness to realize the conceptions of religion which they formed, but still they remained on the whole true to their ancient faith. To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people. The differences lay mainly in rigour of practice, and not in articles of belief.

3. The traces of the existence of Essenes in common society are not wanting nor confined to individual cases. Not only was a gate at Jerusalem named from them (Jos. B. J. v. 4, §2, *ἑσσηνίων πύλη*), but a later tradition mentions the existence of a congregation there which devoted "one third of the day to study, one third to prayer, and one third to labour" (Frankel, *Zeitschrift*, 1846, p. 458). Those, again, whom Josephus speaks of as allowing marriage may be supposed to have belonged to such bodies as had not yet withdrawn from intercourse with their fellow-men. But the practice of the extreme section was afterwards regarded as characteristic of the whole class, and the isolated communities of Essenes furnished the type which is preserved in the popular descriptions. These were regulated by strict rules, analogous to those of the monastic institutions of a later date. The candidate for admission first passed through a year's novitiate, in which he received, as symbolic gifts, an axe, an apron, and a white robe, and gave proof of his temperance by observing the ascetic rules of the order (*τῶν ἀσκήν διατάων*). At the close of this probation, his character (*τὸ ἥθος*) was submitted to a fresh trial of two years, and meanwhile he shared in the laudal rites of the initiated, but not in their meals. The full membership was imparted at the end of this second period when the novice bound himself "by awful oaths"—though oaths were absolutely forbidden at all other times—to observe piety, justice, obedience, honesty, and secrecy, "preserving alike the books of their sect, and the names of the angels" (Joseph. B. J. ii. 8, §7).

4. The order itself was regulated by an internal

jurisdiction. Excommunication was equivalent to a slow death, since an Essene could not take food prepared by strangers for fear of pollution. All things were held in common, without distinction of property or house; and special provision was made for the relief of the poor. Self-denial, temperance, and labour—especially agriculture—were the marks of the outward life of the Essenes; purity and divine communion the objects of their aspiration. Slavery, war, and commerce were alike forbidden (Philo, *Quod om. prob. l.* §12, p. 877 M.); and, according to Philo, their conduct generally was directed by three rules, "the love of God, the love of virtue, and the love of man" (Philo, *l. c.*).

5. In doctrine, as has been seen already, they did not differ essentially from strict Pharisees. Moses was honoured by them next to God (Joseph. B. J. ii. 8, 9). They observed the Sabbath with singular strictness; and though they were unable to offer sacrifices at Jerusalem, probably from regard to purity (*διαφοροῦντι ἀγνείων*), they sent gifts thither (Jos. Ant. xvii. 2, 5); at the same time, like most ascetics, they turned their attention specially to the mysteries of the spiritual world, and looked upon the body as a mere prison of the soul. They studied and practised with signal success, according to Josephus, the art of prophecy (Joseph. B. J. ii. 8; cf. Ant. xv. 10, §5; B. J. i. 3, §5); and familiar intercourse with nature gave them an unusual knowledge of physical truths. They assented with peculiar boldness the absolute power and foreknowledge of God (Joseph. Ant. xiii. 5, §9, xviii. 1, §5); and disparaged the various forms of mental philosophy as useless or beyond the range of man (Philo, *l. c.* p. 877).

6. The number of the Essenes is roughly estimated by Philo at 4000 (Philo, *l. c.*), and Josephus says that there were "more than 4000" who observed their rule (Ant. xvii. 2, §5). Their best-known settlements were on the N.W. shore of the Dead Sea (Philo; Plin. ll. cc.), but others lived in scattered communities throughout Palestine, and perhaps also in cities (Jos. B. J. ii. 8, §4. Cf. Hippol. *Philos.* ix. 20).

7. In the Talmudic writings there is, as has been already said, no direct mention of the Essenes, but their existence is recognised by the notice of peculiar points of practice and teaching. Under the titles of "the pious," "the weakly" (i. e. with study), "the retiring," their maxims are quoted with respect, and many of the traits preserved in Josephus find parallels in the notices of the Talmud (Z. Frankel, *Zeitschrift*, Dec. 1846, pp. 451 ff. *Monatsschrift*, 1853, pp. 37 ff.). The four stages of purity which are distinguished by the doctors (*Chajim*, 18 a, ap. Frankel, *l. c.* 451) correspond in a singular manner with the four classes into which the Essenes are said to have been divided (Joseph. B. J. ii. 8, §10); and the periods of probation observed in the two cases offer similar coincidences.

8. But the best among the Jews felt the peril of Essenism as a system, and combined to discourage it. They shrank with an instinctive dread from the danger of connecting asceticism with spiritual power, and cherished the great truth which lay in the saying "Doctrine is not in heaven." The miraculous energy which was attributed to mystics was regarded by them rather as a source of suspicion than of respect; and theosophic speculations were condemned with emphatic distinctness (Frankel, *Monatsschrift*, 1853, pp. 63 ff., 68, 71).

9. The character of Essenism limited its spread. Out of Palestine, Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, where Judaism assumed a new shape from its intimate connexion with Greece. Here the original form in which it was moulded was represented not by direct copies, but by analogical forms; and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeutae. These Alexandrine mystics abjured the practical labours which rightly belonged to the Essenes, and gave themselves up to the study of the inner meaning of the Scriptures. The impossibility of fulfilling the law naturally led them to substitute a spiritual for a literal interpretation; and it was their object to ascertain its meaning by intense labour, and then to satisfy its requirements by absolute devotion. The "whole day, from sunrise to sunset, was spent in mental discipline." Bodily wants were often forgotten in the absorbing pursuit of wisdom, and "meat and drink" were at all times held to be unworthy of the light (*Philo, De vit. contempl. §4*).

10. From the nature of the case Essenism in its extreme form could exercise very little influence on Christianity. In all its practical bearings it was diametrically opposed to the Apostolic teaching. The dangers which it involved were far more clear to the eye of the Christian than they were to the Jewish doctors. The only real similarity between Essenism and Christianity lay in the common element of true Judaism; and there is little excuse for modern writers who follow the error of Eusebius, and confound the society of the Therapeutae with Christian brotherhoods. Nationally, however, the Essenes occupy the same position as that to which John the Baptist was personally called. They mark the close of the old, the longing for the new, but in this case without the promise. In place of the message of the coming "kingdom" they could proclaim only individual purity and isolation. At a later time traces of Essenism appear in the Clementines, and the strange account which Epiphanius gives of the *Osseni* (*Ὀσσηνοί*) appears to point to some combination of Essene and pseudo-Christian doctrines (*Haer. xix.*). After the Jewish war the Essenes disappear from history. The character of Judaism was changed, and ascetic Pharisaism became almost impossible.

11. The original sources for the history of the Essenes have been already noticed. Of modern essays, the most original and important are those of Frankel in his *Zeitschrift*, 1846, pp. 441-461, and *Monatsschrift*, 1853, 30 ff., taken in conjunction with the wider view of Jost, *Gesch. d. Judenth.* i. 207 ff. The account of Hilgenfeld (*Jud. Apokalypitk.* 245 ff.) is interesting and ingenious, but essentially one-sided and subservient to the writer's theory (cf. Volkmar, *Das vierte B. Ezra*, 60). Gfrörer (*Philo*, ii. 299 ff.), Dähne (*Jud.-Alox. Reliq.-Philos.* i. 467 ff.), and Ewald (*Gesch. d. Volk. Isr.* iv. 420 ff.), all contribute important sketches from their respective points of view. The earlier literature, as far as it is of any value, is embodied in these works. [B. F. W.]

**ESTHER** (**אֶסְתֵּר**, the planet Venus; **עֶשְׂתֵּר**), the Persian name of HADASSAH, daughter of Abihail the son of Shimei, the son of Kish, a Benjamite [*MORDECAI*, and cousin of Mordecai]. The explanation of her old name Hadassah, by the addition

of her new name, by which she was better known, with the formula, **אֶסְתֵּר אֵיךְ**, "that is Esther" (*Est. ii. 7*), is exactly analogous to the usual addition of the modern names of towns to explain the use of the old obsolete ones (*Gen. xxxv. 19, 27; Josh. xv. 10, &c.*). Esther was a beautiful Jewish maiden, whose ancestor Kish had been among the captives led away from Jerusalem (part of which was in the tribe of Benjamin) by Nebuchadnezzar when Jehoiachin was taken captive. She was an orphan without father or mother, and had been brought up by her cousin Mordecai, who had an office in the household of Ahasuerus king of Persia, and dwelt at "Shushan the palace." When Vashti was dismissed from being queen, and all the fairest virgins of the kingdom had been collected at Shushan for the king to make choice of a successor to her from among them, the choice fell upon Esther, and she was crowned queen in the room of Vashti with much pomp and rejoicing. The king was not aware, however, of her race and parentage; and so, with the careless profusion of a sensual despot, on the representation of Haman the Agagite, his prime minister, that the Jews scattered through his empire were a pernicious race, he gave him full power and authority to kill them all, young and old, women and children, and take possession of all their property. The means taken by Esther to avert this great calamity from her people and her kindred, at the risk of her own life, and to turn upon Haman the destruction he had plotted against the Jews, and the success of her scheme, by which she changed their mourning, fasting, weeping, and wailing, into light and gladness and joy and honour, and became for ever especially honoured amongst her countrymen, are fully related in the book of Esther. The feast of Purim, i. e. of *Iots*, was appointed by Esther and Mordecai to be kept on the 14th and 15th of the month Adar (February and March) in commemoration of this great deliverance. [*PURIM*.] The decree of Esther to this effect is the last thing recorded of her (v. 32). The continuous celebration of this feast by the Jews to the present day is thought to be a strong evidence of the historical truth of the book. [*ESTHER, BOOK OF*.]

The questions which arise in attempting to give Esther her place in profane history are—

I. Who is Ahasuerus? This question is answered under *AHASUERUS*, and the reasons there given lead to the conclusion that he was Xerxes the son of Darius Hystaspes.

II. The second inquiry is, who then was Esther? Artaxana, Atossa, and others are indeed excluded by the above decision; but are we to conclude with Scaliger, that because Ahasuerus is Xerxes, therefore Esther is Amestris? Surely not. None of the historical particulars related by Herodotus concerning Amestris make it possible to identify her with Esther. Amestris was the daughter of Otanes (Onophas in Ctesias), one of Xerxes' generals, and brother to his father Darius (*Herod. vii. 61, 82*). Esther's father and mother had been Jews. Amestris was wife to Xerxes before the Greek expedition (*Herod. vii. 61*), and her sons accompanied Xerxes to Greece (*Herod. vii. 39*), and had all three come to man's estate at the death of Xerxes in the 20th year of his reign. Darius, the eldest, had married immediately after the return from Greece. Esther did not enter the king's palace till his 7th year, just the time of Darius's marriage. These objections are conclusive, without adding the difference of character of the two queens. The truth is that his-

tory is wholly silent both about Vashti and Esther. Herodotus only happens to mention one of Xerxes' wives; Scripture only mentions two, if indeed either of them were wives at all. But since we know that it was the custom of the Persian kings before Xerxes to have several wives, besides their concubines; that Cyrus had several (Herod. iii. 3); that Cambyses had four whose names are mentioned, and others besides (iii. 31, 32, 68); that Smerdis had several (ib. 68, 69); and that Darius had six wives, whose names are mentioned (ib. passim), it is most improbable that Xerxes should have been content with one wife. Another strong objection to the idea of Esther being his one legitimate wife, and perhaps to her being strictly his wife at all, is that the Persian kings selected their wives not from the harem, but, if not foreign princesses, from the noblest Persian families, either their own nearest relatives, or from one of the seven great Persian houses. It seems therefore natural to conclude that Esther, a captive, and one of the harem, was not of the highest rank of wives, but that a special honour, with the name of queen, may have been given to her, as to Vashti before her, as the favourite concubine or inferior wife, whose offspring, however, if she had any, would not have succeeded to the Persian throne. This view, which seems to be strictly in accordance with what we know of the manners of the Persian court, removes all difficulty in reconciling the history of Esther with the scanty accounts left us by profane authors of the reign of Xerxes.

It only remains to remark on the character of Esther as given in the Bible. She appears there as a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favour with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us to infer. And there must have been a singular grace and charm in her aspect and manners, since she "obtained favour in the sight of all that looked upon her" (ii. 15). That she was raised up as an instrument in the hands of God to avert the destruction of the Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. But to impute to her the sentiments put into her mouth by the apocryphal author of ch. xiv., or to accuse her of cruelty because of the death of Haman and his sons, and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact the simplicity and truth to nature of the Scriptural narrative afford a striking contrast, both with the forced and florid amplifications of the apocryphal additions, and with the sentiments of some later commentators. It may be convenient to add that the 3rd year of Xerxes was B.C. 488, his 7th, 479, and his 12th, 474 (Clinton, *F. H.*), and that the simultaneous battles of Plataea and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi. §36) to Susa, happened, according to

Prideaux and Clinton, in September of his 7th year. For a fuller discussion of the identity of Esther, and different views of the subject, see Prideaux's *Connection*, i. 236, 243, 297, sqq., and Petav. *de doct. temp.* xii. 27, 28, who make Esther wife of Artaxerxes Longim., following Joseph. *Ant.* xi. 6, as he followed the LXX. and the apocryphal Esther; J. Scalig. (*de emend. temp.* vi. 591; *Animadv.* Euseb. 100) making Ahasuerus, Xerxes; Usher (*Annal. Vet. Test.*) making him Darius Hystaspis; Loftus, *Chaldea*, &c. Eusebius (*Canon. Chron.* 338, ed. Medioli.) rejects the hypothesis of Artaxerxes Longim., on the score of the silence of the books of Ezra and Nehemiah, and adopts that of Artaxerxes Mnemon, following the Jews, who make Darius Colomanus to be the same as Darius Hystaspis, and the son of Artaxerxes by Esther! It is most observable that all Petavius's and Prideaux's arguments against Scaliger's view apply solely to the statement that Esther is Amestris. [A. C. H.]

**ESTHER, BOOK OF**, one of the latest of the canonical books of Scripture, having been written late in the reign of Xerxes, or early in that of his son Artaxerxes Longimanus. The author is not known, but may very probably have been Mordecai himself. The minute details given of the great banquet, of the names of the chamberlains and eunuchs, and Haman's wife and sons, and of the customs and regulations of the palace, betoken that the author lived at Shushan, and probably at court, while his no less intimate acquaintance with the most private affairs both of Esther and Mordecai well suits the hypothesis of the latter being himself the writer. It is also in itself probable that as Daniel, Ezra, and Nehemiah, who held high offices under the Persian kings, wrote an account of the affairs of their nation, in which they took a leading part, so Mordecai should have recorded the transactions of the book of Esther likewise. The termination of the book with the mention of Mordecai's elevation and government, agrees also well with this view, which has the further sanction of many great names, as Aben Ezra, and most of the Jews, Vatablus, Carpzovius, and many others. Those who ascribe it to Ezra, or the men of the great Synagogue, may have merely meant that Ezra edited and added it to the canon of Scripture, which he probably did, bringing it, and perhaps the book of Daniel, with him from Babylon to Jerusalem.

The book of Esther appears in a different form in the LXX.,\* and the translations therefrom, from that in which it is found in the Hebrew Bible. In speaking of it we shall first speak of the canonical book found in Hebrew, to which also the above observations refer; and next of the Greek book with its apocryphal additions. The canonical **ESTHER** then is placed among the hagiographa or כְּתוּבֵי חִשְׁמוֹ by the Jews, and in that first portion of them which they call the five volumes, מִגִּילָה. It is sometimes emphatically called *Megillah*, without other distinction, and was held in such high repute by the Jews that it is a saying of Maimonides that in the days of Messiah the prophetic and hagiographical books will pass away, except the book of Esther, which will remain with the Pentateuch. This book is read through by the Jews in their synagogues at the feast of Purim, when it was, and

\* It is not intended by this expression to imply that the translators of the Hebrew Bible into Greek were also the authors of the apocryphal additions.

The term LXX. is used to indicate the whole Greek volume as we now have it.

is still in some synagogues, the custom at the mention of Haman's name to hiss, and stamp, and clench the fist, and cry, Let his name be blotted out, may the name of the wicked rot. It is said also that the names of Haman's ten sons are read in one breath, to signify that they all expired at the same instant of time. Even in writing the names of Haman's sons in the 7th, 8th, and 9th verses of Esth. ix., the Jewish scribes have contrived to express their abhorrence of the race of Haman. For these ten names are written in three perpendicular columns of 3, 3, 4, as if they were hanging upon three parallel cords, three upon each cord, one above another, to represent the hanging of Haman's sons (Stehelin's *Rabbia. Literat.* vol. ii. p. 349). The Targum of Esth. ix., in Walton's Polyglott,<sup>b</sup> inserts a very minute account of the exact position occupied by Haman and his sons on the gallows, the height from the ground, and the interval between each; according to which they all hung in one line, Haman at the top, and his ten sons at intervals of half a cubit under him. It is added that Zeresh and Haman's seventy sons fled, and begged their bread from door to door, in evident allusion to Ps. cix. 9, 10. It has often been remarked as a peculiarity of this book that the name of God does not once occur in it. Some of the ancient Jewish teachers were somewhat staggered at this, but others accounted for it by saying that it was a transcript, under Divine inspiration, from the Chronicles of the Medes and Persians, and that being meant to be read by heathen, the Sacred name was wisely omitted. Baxter (*Saint's Rest*, pt. iv. ch. iii.) speaks of the Jews using to cast to the ground the book of Esther, because the name of God was not in it. But Wolf (*B. H.* pt. ii. p. 90) denies this, and says that if any such custom prevailed among the Oriental Jews, to whom it is ascribed by Sanly's, it must have been rather to express their hatred of Haman. Certain it is that this book was always reckoned in the Jewish canon, and is named or implied in almost every enumeration of the books composing it, from Josephus downwards. Jerome mentions it by name in the *Prolog. Gal.*, in his Epistle to Paulinus, and in the preface to Esther; as does Augustine, *de Civit. Dei*, and *de Doctr. Christ.*, and Origen, as cited by Eusebius (*Hist. Eccles.* vi. 25), and many others. Some modern commentators, both English and German, have objected to the contents of the book as improbable; but if it be true, as Diodorus Sic. relates, that Xerxes put the Medians foremost at Thermopylae on purpose that they might be all killed, because he thought they were not thoroughly reconciled to the loss of their national supremacy, it is surely not incredible that he should have given permission to Haman to destroy a few thousand strange people like the Jews, who were represented to be injurious to his empire, and disobedient to his laws. Nor again, when we remember what Herodotus relates of Xerxes in respect to promises made at banquets, can we deem it incredible that he should perform his promise to Esther to reverse the decree in the only way that seemed practicable. It is likely too that the secret friends and adherents of Haman would be the persons to attack the Jews, which would be a reason why Ahasuerus would rather rejoice at their destruction. In all other re-

spects the writer shows such an accurate acquaintance with Persian manners, and is so true to history and chronology, as to afford the strongest internal evidences to the truth of the book. The casual way in which the author of 2 Macc. xv. 36 alludes to the feast of Purim, under the name of "Mardocheus's day," as kept by the Jews in the time of Nicanor, is another strong testimony in its favour, and tends to justify the strong expression of Dr. Lee (quoted in Whiston's *Josephus*, xi. ch. vi.), that "the truth of this history is demonstrated by the feast of Purim, kept up from that time to this very day."<sup>c</sup>

The style of writing is remarkably chaste and simple, and the narrative of the struggle in Esther's mind between fear and the desire to save her people, and of the final resolve made in the strength of that help, which was to be sought in prayer and fasting, is very touching and beautiful, and without any exaggeration. It does not in the least savour of romance. The Hebrew is very like that of Ezra and parts of the Chronicles; generally pure, but mixed with some words of Persian origin, and some of Chaldaic affinity, which do not occur in older Hebrew, such as *מִאֲמָר*, *בָּיִן*, *פְּתִיחַן*, *שְׁבִיט*.

In short it is just what one would expect to find in a work of the age which the book of Esther pretends to belong to.

As regards the LXX. version of the book (of which there are two texts, called by Dr. Fritzsche, A. and B.), it consists of the canonical Esther with various interpolations prefixed, interspersed,<sup>d</sup> and added at the close. Read in Greek it makes a complete and continuous history, except that here and there, as *e.g.* in the repetition of Mordecai's pedigree, the patch-work betrays itself. The chief additions are, Mordecai's pedigree, his dream, and his appointment to sit in the king's gate, in the second year of Artaxerxes, prefixed. Then, in the third chapter, a pretended copy of Artaxerxes's decree for the destruction of the Jews added, written in thorough Greek style, a prayer of Mordecai inserted in the fourth chapter, followed by a prayer of Esther, in which she excuses herself for being wife to the uncircumcised king, and denies having eaten anything or drunk wine at the table of Haman; an amplification of v. 1-3; a pretended copy of Artaxerxes's letter for reversing the previous decree, also of manifestly Greek origin in ch. viii., in which Haman is called a Macedonian, and is accused of having plotted to transfer the empire from the Persians to the Macedonians, a palpable proof of this portion having been composed after the overthrow of the Persian empire by the Greeks; and lastly an addition to the tenth chapter, in which Mordecai shows how his dream was fulfilled in the events that had happened, gives glory to God, and prescribes the observations of the feast of the 14th and 15th Adar. The whole book is closed with the following entry:—"In the fourth year of the reign of Ptolemaeus and Cleopatra, Dositheus, who said he was a priest and Levite, and Ptolemy his son, brought this epistle of Phnim, which they said was the same, and that Lysimachus, the son of Ptolemy, that was in Jerusalem, had interpreted it." This entry was apparently intended to give authority to this Greek version of

<sup>b</sup> There are two Targums to Esther, both of late date. See Wolf's *Bibl. Hebr.* Pars 11, 1171-81.

<sup>c</sup> Dr. W. Lee also has some remarks on the proof of the *historical* character of the book derived from

the feast of Purim, as well as on other points (*Inspir. of H.* S. 430, seq.).

<sup>d</sup> The Targum to Esther contains other copious embellishments and amplifications. [MORDECAI.]

ESTHER, by pretending that it was a certified translation from the Hebrew original. Ptolemy Philometor, who is here meant,\* began to reign B.C. 181. Though, however, the interpolations of the Greek copy are thus manifest, they make a consistent and intelligible story. But the Apocryphal additions as they are inserted in some editions of the Latin Vulgate, and in the English Bible, are incomprehensible; the history of which is this:—When Jerome translated the book of Esther, he first gave the version of the Hebrew alone as being alone authentic. He then added at the end a version in Latin of those several passages which he found in the LXX., and which were not in the Hebrew, stating where each passage came in, and marking them all with an obelus. The first passage so given is that which forms the continuation of chapter x. (which of course immediately precedes it), ending with the above entry about Dositheus. Having annexed this conclusion, he then gives the *Prooemium*, which he says forms the beginning of the Greek Vulgate, beginning with what is now verse 2 of chapter xi.; and so proceeds with the other passages. But in subsequent editions all Jerome's explanatory matter has been swept away, and the disjointed portions have been printed as chapters xi., xii., xiii., xiv., xv., xvi., as if they formed a narrative in continuance of the Canonical book. The extreme absurdity of this arrangement is nowhere more apparent than in chapter xi., where the verse (1), which closes the whole book in the Greek copies, and in St. Jerome's Latin translation, is actually made immediately to precede that (ver. 2), which is the very first verse of the *Prooemium*. As regards the place assigned to Esther in the LXX., in the Vatican edition, and most others, it comes between Judith and Job. Its place before Job is a remnant of the Hebrew order, Esther there closing the historical, and Job beginning the metrical *Megilloth*. Tobit and Judith have been placed between it and Nehemiah, doubtless for chronological reasons. But in the very ancient Codex published by Tischendorf, and called *C. Friderico-Augustanus*, Esther immediately follows Nehemiah (included under E-chas B), and precedes Tobit. This Codex, which contains the Apocryphal additions to Esther, was copied from one written by the martyr Pamphilus with his own hand, as far as to the end of Esther, and is ascribed by the editor to the fourth century.

As regards the motive which led to these additions, one seems evidently to have been to supply what was thought an omission in the Hebrew book, by introducing copious mention of the name of God. It is further evident from the other Apocryphal books, and additions to Canonical Scripture, which appear in the LXX., such as Bel and the Dragon, Susannah, the Song of the Three Children, &c., that the Alexandrian Jews loved to dwell upon the events of the Babylonish captivity, and especially upon the Divine interpositions in their behalf, probably as being the latest manifestations of God's special care for Israel. Traditional stories would be likely to be current among them, and these would be sure sooner or later to be committed to writing, with additions according to the fancy of the writers.

The most popular among them, or those which had most of an historical basis, or which were written by men of most weight, or whose origin was lost in the most remote antiquity, or which most gratified the national feelings, would acquire something of sacred authority (especially in the absence of real inspiration dictating fresh Scriptures), and get admitted into the volume of Scripture, less rigidly fenced by the Hellenistic than by the Hebrew Jews. No subject would be more likely to engage the thoughts, and exercise the pens of such writers, than the deliverance of the Jews from utter destruction by the intervention of Esther and Mordecai, and the overthrow of their enemies in their stead. Those who made the additions to the Hebrew narrative according to the religious taste and feeling of their own times, probably acted in the same spirit as others have often done, who have added florid architectural ornaments to temples which were too plain for their own corrupted taste. The account which Josephus follows seems to have contained yet further particulars, as, e.g. the name of the Eunuch's servant, a Jew, who betrayed the conspiracy to Mordecai; other passages from the Persian Chronicles read to Xanxerxes, besides that relating to Mordecai, and amplifications of the king's speech to Haman, &c. It is of this LXX. version that Athanasius (*Fest. Epist.* 39, Oxf. transl.) spoke when he ascribed the book of Esther to the non-canonical books; and this also is perhaps the reason why in some of the lists of the Canonical books, Esther is not named, as, e.g. in those of Melito of Sardis and Gregory Nazianzen, unless in these it is included under some other book, as Ruth, or Esdras<sup>f</sup> (see Whitaker, *Disput. on II. Scr. Park. Soc.* 57, 58; Cosins on the *Canon of Scr.* 49, 56). Origen, singularly enough, takes a different line in his *Ep. to Africanus* (*Oper.* i. 14). He defends the canonicity of these Greek additions, though he admits they are not in the Hebrew. His sole argument, unworthy of a great scholar, is the use of the LXX. in the churches, an argument which embraces equally all the Apocryphal books. Africanus, in his *Ep. to Origen*, had made the being in the Hebrew essential to canonicity, as Jerome did later. The Council of Trent pronounces the whole book of Esther to be canonical, and Vatablus says that prior to that decision it was doubtful whether or no Esther was to be included in the Canon, some authors affirming, and some denying it. He afterwards qualifies the statement by saying that at all events the seven last chapters were doubtful. Sixtus Senensis, in spite of the decision of the Council, speaks of these additions, after the example of Jerome, as "*laciniis hinc inde quorundam scriptorum temeritate insertis*," and thinks that they are chiefly derived from Josephus, but this last opinion is without probability. The manner and the order in which Josephus cites them (*Ant.* xi. vi.) show that they had already in his days obtained currency among the Hellenistic Jews as portions of the Book of Esther; as we know from the way in which he cites other Apocryphal books that they were current likewise; with others which are now lost. For it was probably from such that Josephus derived his stories

\* He is the same as is frequently mentioned in 1 Macc. i. c. g. x. 57, xi. 12; cf. Joseph. *A. J.* xiii. 4, § 1, and Clinton *F. H.* iii. p. 393. Dositheus seems to be a Greek version of Mattithiah; Ptolemy

was also a common name for Jews at that time.

<sup>f</sup> "This book of Esther, or sixth of Esdras, as it is placed in some of the most ancient copies of the Vulgate."—Lee's *Dissert.* on 2d Esdras, p. 25.

about Moses, about Sanballat, and the temple on Mount Gerizim, and the meeting of the High-priest and Alexander the Great. But these, not having happened to be bound up with the LXX., perished. However, the marvellous purity with which the Hebrew Canon has been preserved, under the Providence of God, is brought out into very strong light, by the contrast of the Greek volume. Nor is it uninteresting to observe how the relaxation of the peculiarity of their national character, by the Alexandrian Jews, implied in the adoption of the Greek language, and Greek names, seems to have been accompanied with a less jealous, and consequently a less trustworthy guardianship of their great national treasure, "the oracles of God."

**ETAM** (עֵתָם; *Aṭm*; *Etam*). 1. A village (עֵתָם) of the tribe of Simeon, specified only in the list in 1 Chr. iv. 32 (comp. Josh. xix. 7); but that it is intentionally introduced appears from the fact that the number of places is summed as five, though in the parallel list as four. The cities of Simeon appear all to have been in the extreme south of the country (see Joseph. *Ant.* v. 1, §22). Different from this, therefore, was:—

2. A place in Judah, fortified and garrisoned by Rehoboam (2 Chr. xi. 6). From its position in this list we may conclude that it was near Bethlehem and Tekoa; and in accordance with this is the mention of the name among the ten cities which the LXX. insert in the text of Josh. xv. 60, "Thecua and Ephratha which is Bethlehem, Phagor and Aitan (Ethan)." Reasons are shown below for believing it possible that this may have been the scene of Samson's residence, the cliff Etam being one of the numerous bold eminences which abound in this part of the country; and the spring of En-hak-kore one of those abundant fountains which have procured for Etam its chief fame. For here, according to the statements of Josephus (*Ant.* viii. 7, §3) and the Talmudists, were the sources of the water from which Solomon's gardens and pleasure-grounds were fed, and Bethlehem and the Temple supplied. (See Lightfoot, on *John* v.)

3. A name occurring in the lists of Judah's descendants (1 Chr. iv. 3), but probably referring to the place named above (2), Bethlehem being mentioned in the following verse.

**ETAM, THE ROCK** (עֵתָם הַסֵּלֶ; ἡ πέτρα; *Hētra*, for Alex. see below; Joseph. *Aṭm*; *Petra*, and *silex*, *Etam*), a cliff or lofty rock (such seems to be the special force of *Sclā*) into a cleft, or chasm (עֵתָם; A. V. "top") of which, Samson retired after his slaughter of the Philistines, in revenge for their burning the Timnite woman who was to have been his wife (*Judg.* xv. 8, 11\*). This natural stronghold (πέτρα δ' ἐστὶν ὄχυρά, *Jos. Ant.* v. 8, §8) was in the tribe of Judah; and near it, probably at its foot, was Lehi or Hamath-lehi, and En-hak-kore (*xv.* 9, 14, 17, 19). These names have all vanished; at any rate none of them have been yet discovered within that com-

paratively narrow circle to which Samson's exploits appear to have been confined. Van de Velde (ii. 141) would identify Lehi with *Lekiyeh*, a short distance north of Beersheba, but this has nothing beyond its name to recommend it. The name Etam, however, was held by a city in the neighbourhood of Bethlehem, fortified by Rehoboam (2 Chr. xi. 6), and which from other sources is known to have been situated in the extremely uneven and broken country round the modern *Urtas*. Here is a fitting scene for the adventure of Samson. It was sufficiently distant from Timnah to have seemed a safe refuge from the wrath of the Philistines, while on the other hand it was not too far for them to reach in search of him; for even at Bethlehem, still more distant from Philistia, they had a garrison, and that in the time of their great enemy king David. In the abundant springs and the numerous eminences of the district round *Urtas*, the cliff Etam, Ramath-lehi, and En-hak-kore may be yet found. [G.]

**ETHAN.** [EXODUS, THE, p. 599.]

**ETHAN** (אֵתָן; Ἰθάν; *Aṭm*; *Ethm*). The name of several persons. 1. ETHAN THE EZRAHITE, one of the four sons of Muhl, whose wisdom was excelled by Solomon (1 K. iv. 31). His name is in the title of Ps. lxxxix. There is little doubt that this is the same person who in 1 Chr. ii. 6 is mentioned—with the same brothers as before—as a son of Zerah, the son of Judah. [DARDA; EZRAHITE.] But being a son of Judah he must have been a different person from

2. Son of Kishi or Kishuiah; a Merarite Levite, head of that family in the time of king David (1 Chr. vi. 44; hebr. 29), and spoken of as a "singer." With Heman and Asaph the heads of the other two families of Levites Ethan was appointed to sound with cymbals (*xv.* 17, 19). From the fact that in other passages of these books the three names are given as Asaph, Heman, and JEDUTHUN, it has been conjectured that the two names both belonged to the one man, or are identical; but there is no direct evidence of this, nor is there any thing to show that Ethan the singer was the same person as Ethan the Ezrahite, whose name stands at the head of Ps. lxxxix., though it is a curious coincidence that there should be two persons named Heman and Ethan so closely connected in two different tribes and walks of life.

3. A Gershonite Levite, one of the ancestors of Asaph the singer (1 Chr. vi. 42, heb. 27). In the reversed genealogy of the Gershonites (ver. 1 of this chap.) Josh stands in the place of Ethan as the son of Zimnah.

**ETHANIM.** [MONTHS.]

**ETHBAAL** (עֶתְבַּאֵל; Ἐθβαλ; Joseph. *Ἰθβαλ*; *Ethbaal*), king of Sidon and father of Jezebel, wife of Ahab (1 K. xvi. 31). Josephus (*Ant.* viii. 13, §1) represents him as king of the Tyrians as well as the Sidonians. We may thus identify him with Ethobalus (Ἐθόβαλος), noticed by Menander (Joseph. c. *Apion.* i. 18), a priest of Asiate, who, after having assassinated Phelos, usurped the throne of Tyre for 32 years. As 50 years elapsed between the deaths of Hiram and Phelos, the date of Ethbaal's reign may be given as about B.C. 940-908. The variation in the name

\* There is some uncertainty about the text of this passage, the Alex. MS. of the LXX. inserting the words *παρὰ τοῦ χειμαρρῶν*, "by the torrent," before

the mention of the rock. In ver. 11 the reading agrees with the Hebrew.

is easily explained; Ethbual = *with Baul*; Ithobalus (*אֶתְבוּאֵל*) = *Baul with him*, which is preferable in point of sense to the other. The position which Ethbual held explains, to a certain extent, the blatant zeal which Jezebel displayed. [W. L. B.]

**ETHER** (*עֶתֶר*; *Ἰθέρ*, Alex. *Ἰθέρ*, Be<sup>th</sup>ér; *Éther*, *Atkar*), one of the cities of Judah in the low country, the *Shefelah* (Josh. xv. 42) allotted to Simeon (xix. 7). In the parallel list of the towns of Simeon in 1 Chr. iv. 32, TOCHEN is substituted for Ether. In his *Onomasticon* Eusebius mentions it twice, as Ether and as Jether (in the latter case confounding it with JATTIN, a city of priests and containing friends of David during his troubles under Saul). It was then a considerable place (*κώμη μεγάλη*), retaining the name of Jethira or Etera, very near Malatha in the interior of the district of Daroma, that is in the desert country below Hebron and to the east of Beersheba. The name of Ether has not yet been identified with any existing remains; but Van de Velde heard of a *Tel Athur* in this direction (*Memoir*, 311). [G.]

**ETHIOPIA** (*ἠθιοπία*; *Aithiopia*; *Aethiopia*). The country, which the Greeks and Romans described as "Aethiopia" and the Hebrews as "Cush," lay to the S. of Egypt, and embraced, in its most extended sense, the modern *Nubia*, *Sennar*, *Kordofan*, and northern *Abyssinia*, and in its more definite sense the kingdom of Meroë, from the junction of the Blue and White branches of the Nile to the border of Egypt. The only direction in which a clear boundary can be fixed is in the N., where Syene marked the division between Ethiopia and Egypt (Ez. xix. 10); in other directions the boundaries can be only generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian highlands on the S. The name "Ethiopia" is probably an adaptation of the native Egyptian name "Ethaush," which bears a tolerably close resemblance to the gentile form "Aethiops;" the Greeks themselves regarded it as expressive of a dark complexion (from *αἶθω*, "to burn," and *ῥῶψ*, "a countenance"). The Hebrews transformed the ethnical designation "Cush" into a territorial one, restricting it, however, in the latter sense to the African settlements of the Cushite race. [CUSH.] The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Ez. xix. 10); and they describe it as a well-watered country lying "by the side of" (A. V. "beyond") the waters of Cush (Is. xviii. 1; Zeph. iii. 10), being traversed by the two branches of the Nile, and by the Astaboras or *Tacaze*. The Nile descends with a rapid stream in this part of its course, forming a series of cataracts; its violence seems to be referred to in the words of Is. xviii. 2, "whose land the rivers have spoiled." The Hebrews seem also to have been aware of its tropical characteristics, the words translated in A. V. "the land shadowing with wings" (Is. xlviii. 1), admitting of the sense "the land of the shadow of both sides," the shadows falling towards the north and south at different periods of the year—a feature which is noticed by many early writers (comp. the expression in Strabo, ii. p. 133, *ἀμφεκρίσις*; Virg. *Ecl.* x. 68; Plin. ii. 75). The papyrus boats ("vessels of bulrushes," Is. xlviii. 2), which were peculiarly adapted to the navigation of the Upper Nile, admitting of being carried on

men's backs when necessary, were regarded as a characteristic feature of the country. The Hebrews carried on commercial intercourse with Ethiopia, its "merchandise" (Is. xlv. 14) consisting of ebony, ivory, frankincense and gold (Herod. iii. 97, 114), and precious stones (Job xxviii. 19; Joseph. *Ant.* viii. 6, §5). The country is for the most part mountainous, the ranges gradually increasing in altitude towards the S., until they attain an elevation of about 8000 feet in *Abyssinia*.

The inhabitants of Ethiopia were a Hamitic race (Gen. x. 6), and are described in the Bible as a dark-complexioned (Jer. xiii. 23) and stalwart race (Is. xlv. 14, "men of stature;" xviii. 2, for "scattered," substitute "tall"). Their stature is noticed by Herodotus (iii. 20, 114), as well as their handsomeness. Not improbably the latter quality is intended by the term in Is. xviii. 2, which in the A. V. is rendered "peeled," but which rather means "fine-looking." Their appearance led to their being selected as attendants in royal households (Jer. xxxviii. 7). The Ethiopians are on one occasion coupled with the Arabians, as occupying the opposite shores of the Red Sea (2 Chr. xxi. 16); but elsewhere they are connected with African nations, particularly Egypt (Ps. lxxviii. 31; Is. xx. 3, 4, xliii. 3, xlv. 14), Phut (Jer. xlv. 9), Lub and Lud (Ez. xxx. 5), and the Sukkians (2 Chr. xii. 3). They were divided into various tribes, of which the Sabeans were the most powerful. [SEBA; SUKKIIM.]

The history of Ethiopia is closely interwoven with that of Egypt. The two countries were not infrequently united under the rule of the same sovereign. The first Egyptian king who governed Ethiopia was one of the 12th dynasty, named Osirtasen I., the Sesostris of Herod. ii. 110. During the occupation of Egypt by the Hyksos, the 13th dynasty retired to the Ethiopian capital, Napata; and again we find the kings of the 18th and 19th dynasties exercising a supremacy over Ethiopia, and erecting numerous temples, the ruins of which still exist at *Senneh*, *Anada*, *Soleb*, *Abosimbel*, and *Jebel Berhel*. The tradition of the successful expedition of Moses against the Ethiopians, recorded by Josephus (*Ant.* ii. 10), was doubtless founded on the general superiority of the Egyptians over the Ethiopians at that period of their history. The 22nd dynasty still held sway over Ethiopia, as we find Ethiopians forming a portion of Shishak's army (2 Chr. xii. 3), and his successor Osorkon apparently described as Zerah "the Ethiopian" (2 Chr. xiv. 9). The kings of the 25th dynasty were certainly Ethiopians, who ruled the whole of Upper Egypt, and at one period Lower Egypt also, from their northern capital, Napata. Two of these kings are connected with sacred history, viz., So, probably *Sebichus*, who made an alliance with Hoshea king of Israel (2 K. xvii. 4), and Tirhakah, or *Tarcus*, who advanced against Sennacherib in aid of Hezekiah king of Judah (2 K. xix. 9). The prophets appear to refer to a subjection of Ethiopia by the Assyrians as occurring about this period (Is. xx. 4), and particularly to the capture of Thebes at a time when the Ethiopians were among its defenders (Nah. iii. 8, 9). We find, in confirmation of these notices, that Esarhaddon is stated in the Assyrian inscriptions to have conquered both Egypt and Ethiopia. At the time of the conquest of Egypt, Cambyes advanced against Meroë and subdued it; but the Persian rule did not take any root there, nor did the influence of the Ptolemies generally extend beyond northern Ethiopia. Shortly before our Saviour's birth, a native dynasty

of females, holding the official title of Candace (Plin. vi. 35), held sway in Ethiopia, and even resisted the advance of the Roman arms. One of these is the queen noticed in Acts viii. 27. [CANDACE.] [W. L. B.]

ETI'MA (Ἐτιμά, Alex. *Noqúd*; *Nobei*), 1 Esd. ix. 35; apparently a corruption of ΝΕΒΟ in the parallel list of Ezra x. 43.

ETH'NAN (Ἐθνάν; 'Εσθαδάμ, Alex. 'Εσθαδ; *Ethnan*), a descendant of Judah; one of the sons of Helah the wife of Ashur, "the father of Tekoa" (1 Chr. iv. 7).

ETH'NI (Ἐθνί; 'Αθανί, Alex. 'Αθαυεί; *Athanai*), a Gershonite Levite, one of the forefathers of Asaph the singer (1 Chr. vi. 41; Heb. 26).

EUBULUS (Εὐβούλος), a Christian at Rome mentioned by St. Paul (2 Tim. iv. 21).

EUERGETES (Εὐεργέτης, a benefactor; *Ptolemæus Euergetes*), a common surname and title of honour (cf. Plato, *Gorg.* p. 506 C, and Stallb. *ad loc.*) in Greek states, conferred at Athens by a public vote (Dem. p. 475), and so notorious as to pass into a proverb (Luke xii. 25). The title was borne by two of the Ptolemies, Ptol. III., Euergetes I., B.C. 247-222, and Ptol. VII., Euergetes II., B.C. (170) 146-117. The Euergetes mentioned in the prologue to *Eccelesiasticus* has been identified with each of these, according to the different views taken of the history of the book. [ECCLESIASTICUS; JESUS SON OF SIRACH.] [B. F. W.]

EUMENES II. (Εὐμένης), king of Pergamus, succeeded his father Attalus I., B.C. 197, from whom he inherited the favour and alliance of the Romans. In the war with Antiochus the Great he rendered the most important services to the growing republic; and at the battle of Magnesia (B.C. 190) commanded his contingent in person (Just. xvi. 8, 5; App. *Syr.* 34). After peace was made (B.C. 189) he repaired to Rome to claim the reward of his loyalty; and the Senate conferred on him the provinces of Mysia, Lydia, and Ionia (with some exceptions), Phrygia, Lyconia, and the Thracian Chersonese (App. *Syr.* 44; Polyb. xvii. 7; Liv. xxxviii. 56). His influence at Rome continued uninterrupted till the war with Perseus, with whom he is said to have entertained treasonable correspondence (Liv. xxiv. 24, 25); and after the defeat of Perseus (B.C. 167) he was looked upon with suspicion which he vainly endeavoured to remove. The exact date of his death is not mentioned, but it must have taken place in B.C. 159.

The large accession of territory which was granted to Eumenes from the former dominions of Antiochus is mentioned 1 Macc. viii. 8, but the present reading of the Greek and Latin texts offers insuperable difficulties. "The Romans gave him," it is said, "the country of India and Media, and Lydia and parts of his (Antiochus) fairest countries (ἀπὸ τῶν καλλίστων χωρῶν αὐτοῦ)." Various conjectures have been proposed to remove these obvious errors; but though it may be reasonably allowed that Mysia may have stood originally for Media ('מדיה' *Michaëlis*), it is not equally easy to explain the origin of *χωρῶν τῆν Ἰνδιάνην*. It is

barely possible that 'Ἰνδιάνην may have been substituted for Ἰωνικὴν after Μηδίας was already established in the text. Other explanations are given by Grimm, *Exeg. Handb. ad loc.*; Wernsdorf, *De fide Libr. Macc.* p. 50 ff., but they have little plausibility. [B. F. W.]

EUNATAN ('Εννατάν, Alex. 'Ελναθάν; *En-nathan*), 1 Esd. viii. 44. [ELNATHAN.]

EUNICE (Εὐνίκη), mother of Timotheus, 2 Tim. i. 5; there spoken of as possessing unfeigned faith; and described in Acts xvi. 1, as a *γυνὴ Ἰουδαία πιστή*. [H. A.]

EUNUCH (Εὐνοῦχος; *eunouchos*, *thalasias*; *spado*, variously rendered in the A.V. "eunuch," "officer," and "chamberlain," apparently as though the word intended a class of attendants who were not always mutilated).<sup>a</sup> The original Hebrew word (root *Arub*.

אָרַב, *impotens esse ad tenerem*, Gesen. s. v.) clearly implies the incapacity which mutilation involves, and perhaps includes all the classes mentioned in Matt. xix. 12, not signifying, as the Greek *eunouchos*, an office merely. The law, Deut. xxiii. 1 (comp. Lev. xxii. 24), is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1 Sam. viii. 13, marg.), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2 K. xx. 18, Is. xxxix. 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Herod. iii. 49, vi. 32), not only of tender age (when a non-development of beard, and feminine mould of limbs and modulation of voice ensues), but, it should seem, when past puberty, which then occurs at an early age. Physiological considerations lead to the supposition that in the latter case a remnant of animal feeling is left; which may explain Eccles. xx. 4, xxv. 20 (comp. Juv. vi. 366, and Mart. vi. 67; Philostr. *Apoll.* Tyan. i. 37; Ter. *Ecan.* iv. 3, 24), where a sexual function, though fruitless, is implied. Busbequius (*Ep.* iii. 122, Ox. 1660) seems to ascribe the absence or presence of this to the total or partial character of the mutilation; but modern surgery would rather assign the earlier or later period of the operation as the real explanation. It is total among modern Turks (Tournefort, ii. 8, 9, 10, ed. Par. 1717, *taillées à fleur de ventre*); a precaution arising from mixed ignorance and jealousy. The "officer" Potiphar (Gen. xxxvii. 36, xxxix. 1, marg. "eunuch") was an Egyptian, was married, and was the "captain of the guard;" and in the Assyrian monuments an eunuch often appears, sometimes armed, and in a warlike capacity, or as a scribe, noting the number of heads and amount of spoil, as receiving the prisoners, and even as officiating in religious ceremonies (Layard, *Nineveh*, ii. 324-6, 334). A blond beardless face and double chin is there their conventional type. Chardin (*Voyages en Perse*, ii. 283, ed. Amsterd. 1711) speaks of eunuchs having a harem of their own. If Potiphar had become such by operation for disease, by accident, or even by malice, such a marriage seems, therefore, according to Eastern notions, supposable.<sup>b</sup> (See Grotius on Deut. xxiii. 1; comp. Burekhardt, *Trav. in Arab.*

<sup>a</sup> So Whiston, *Joseph. Ant.* x. 10, §2, note.

<sup>b</sup> The Jewish tradition is that Joseph was made a eunuch on his first introduction to Egypt; and yet the accusation of Potiphar's wife, his marriage and

the birth of his children, are related subsequently without any explanation. See Targum Pseudojon. on Gen. xxxix. 1, xli. 50, and the details given at xxvix. 13.

i. 290.) Nor is it wholly repugnant to that barbarous social standard to think that the prospect of rank, honour, and royal confidence, might even induce parents to thus treat their children at a later age, if they showed an aptness for such preferment. The characteristics as regards beard, voice, &c., might then perhaps be modified, or might gradually follow. The Poti-pherah of Gen. xli. 50, whose daughter Joseph married, was "priest of On," and no doubt a different person.

The origination of the practice is ascribed to Semiramis (Amm. Marcell. xiv. 6), and is no doubt as early, or nearly so, as Eastern despotism itself. Their incapacity, as in the case of mutes, is the ground of reliance upon them (Clarke's *Travels*, part ii. §1, 13; Busheq. *Ep.* i. p. 33). By reason of the mysterious distance at which the sovereign sought to keep his subjects (Herod. i. 99, comp. Esth. iv. 11), and of the malignant jealousy fostered by the debased relation of the sexes, such wretches, detached from social interests and hopes of issue (especially when, as commonly, and as amongst the Jews, foreigners), the natural slaves of either sex (Esth. iv. 5), and having no prospect in rebellion save the change of masters, were the fittest props of a government resting on a servile relation, the most complete *δρανα ἐμψυχα* of its despotism or its lusts the surest (but see Esth. ii. 21) guardians (Xenoph. *Cyrop.* vii. 5, §15; Herod. viii. 105) of the monarch's person, and the sole confidential witnesses of his unguarded or undignified moments. Hence they have in all ages frequently risen to high offices of trust. Thus the "chief" of the cup-bearers and of the cooks of Pharaoh were eunuchs, as being near his person, though their inferior agents need not have been so (Gen. xl. 1). The complete assimilation of the kingdom of Israel, and latterly of Judah, to the neighbouring models of despotism, is traceable in the rank and prominence of eunuchs (2 K. vii. 6, ix. 32, xviii. 11, xxv. 19; Is. lvi. 3, 4; Jer. xxix. 2, xxiv. 19, xxviii. 7, xli. 16, lii. 25). They mostly appear in one of two relations, either military as "set over the men of war," greater trustworthiness possibly counterbalancing inferior courage and military vigour, or associated, as we mostly recognise them, with women and children. We find the Assyrian Rab-Saris, or chief eunuch (2 K. xviii. 17), employed together with other high officials as ambassador. Similarly, in the details of the travels of an embassy sent by the Duke of Holstein (p. 136), we find a eunuch mentioned as sent on occasion of a state-marriage to negotiate, and of another (p. 273) who was the *Mecher*, or chamberlain of Shah Abbas, who was always near his person, and had his ear (comp. Chardin, iii. 37), and of another, originally a Georgian prisoner, who officiated as supreme judge. Fryer (*Travels in India and Persia*, 1698) and Chardin (ii. 283) describe them as being the base and ready tools of licentiousness, as tyrannical in humour, and pertinacious in the authority which they exercise; Clarke (*Travels in Europe, &c.*, part ii. §1, p. 22), as eluded and ridiculed by those whom it is their office to guard. A great number of them

accompany the Shah and his ladies when hunting, and no one is allowed, on pain of death, to come within two leagues of the field, unless the king sends an eunuch for him. So eunuchs run before the closed arabahs of the sultanas when abroad, crying out to all to keep at a distance. This illustrates Esth. i. 10, 12, 15, 16, ii. 3, 8, 14. The moral tendency of this sad condition is well known to be the repression of courage, gentleness, shame, and remorse, the development of malice, and often of melancholy, and a disposition to suicide. The favourable description of them in Xenophon (*l. c.*) is overcharged, or at least is not confirmed by modern observation. They are not more liable to disease than others, unless of such as often follows the foul vices of which they are the tools. The operation itself, especially in infancy, is not more dangerous than an ordinary amputation. Chardin (ii. 285) says that only one in four survives; and Clot Bey, chief physician of the Pasha, states that two-thirds die. Buckhardt, therefore (*Nub.* 329), is mistaken, when he says that the operation is only fatal in about two out of a hundred cases.

It is probable that Daniel and his companions were thus treated, in fulfilment of 2 K. xv. 17, 18; Is. xxxix. 7; comp. Dan. i. 3, 7. The court of Herod of course had its eunuchs (Joseph. *Ant.* xvi. 8, §1, xv. 7, §1), as had also that of Queen Candace (Acts viii. 27). Michaelis (ii. 180) regards them as the proper consequence of the gross polygamy of the East, although his further remark that they tend to balance the sexual disparity which such monopoly of women causes is less just, since the countries despoiled of their women for the one purpose are not commonly those which furnish male children for the other.

In the three classes mentioned in Matt. xix. 12 the first is to be ranked with other examples of defective organisation, the last, if taken literally, as it is said to have been personally exemplified in Origena (Euseb. *Ecc. Hist.* vi. 8), is an instance of human ways and means of ascetic devotion being valued by the Jews above revealed precept (see Schöttgen, *Hor. Heb.* i. 159). But a figurative sense of *εὐνοῦχος* (comp. 1 Cor. vii. 32, 34) is also possible.

In the A. V. of Esther the word "chamberlain" (margin, "eunuch") is the constant rendering of *סרס*; and as the word also occurs in Acts xii. 20 and Rom. xvi. 23, where the original expressions are very different, some caution is required. In Acts xii. 20 *τὸν ἐπὶ τοῦ κοιτῶνος τοῦ βασιλέως* may mean a "chamberlain" merely. Such were persons of public influence, as we learn from a Greek inscription, preserved in Walpole's *Turkey* (ii. 559), in honour of P. Aelius Alcibiades, "chamberlain of the emperor" (*ἐπὶ κοιτῶνος Σεβ.*), the epithets in which exactly suggest the kind of patronage expressed. In Rom. xvi. 23 the word *ἐπίτροπος* is the one commonly rendered "steward" (*s. g.* Matt. xx. 8; Luke viii. 3), and means the one to whom the care of the city was committed. For further information, Selden, *Orig. Theol. de Eunuchis*, may be consulted. [H. H.]

\* Wilkinson (*Anc. Egypt*, ii. 61) denies the use of eunuchs in Egypt. Herodotus, indeed (ii. 92), confirms his statement as regards Egyptian monogamy; but if this as a rule applied to the kings, they seemed at any rate to have allowed themselves concubines (ib. 181). From the general beardless character of Egyptian heads it is not easy to pro-

nounce whether any eunuchs appear in the sculptures or not.

† 2 Chr. xxviii. 1, is remarkable as ascribing eunuchs to the period of David, nor can it be doubted that Solomon's polygamy made them a necessary consequence; but in the state they do not seem to have played an important part at this period.

**EUODIAS** (Εὐδία), a Christian woman at Philippi (Phil. iv. 2). The name however is correctly EUODIA, that being the nominative case of Εὐδοία. The two persons whom St. Paul there wishes to bring into accordance are both women, referred to in the following verse by *abraits* and *aitives*. [H. A.]

**EUPHRATES** (פְּרָת; Ἐϋφράτης; *Euphrates*) is probably a word of Arian origin, the initial element being 'u, which is in Sanscrit *su*, in Zend *ku*, and in Greek *eu*; and the second element being *fra*, the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its modern form of *Frāt*, which is almost exactly what the Hebrew literature expresses. But it is most frequently denoted in the Bible by the term הַנָּהָר, *han-nahar*, i. e. "the river," the river of Asia, in grand contrast to the shortlived torrents of Palestine. (For a list of the occurrences of this term, see Stanley, *S. & P. App.* §34.)

The Euphrates is the largest, the longest, and by far the most important of the rivers of Western Asia. It rises from two chief sources in the Armenian mountains, one of them at *Dumli*, 25 miles N.E. of Erzeroum, and little more than a degree from the Black Sea; the other on the northern slope of the mountain range called *Ala-Tugh*, near the village of *Diyadin*, and not far from Mount Ararat. The former, or Northern Euphrates, has the name *Frāt* from the first, but is known also as the *Haris-Su* (Black River); the latter, or Southern Euphrates, is not called the *Frāt* but the *Mural Chai*, yet it is in reality the main river. Both branches flow at first towards the west or south-west, passing through the wildest mountain-districts of Armenia; they meet at *Keblan-Maden*, nearly in long. 39° E. from Greenwich, having run respectively 400 and 270 miles. Here the stream formed by their combined waters is 120 yards wide, rapid, and very deep; it now flows nearly southward, but in a tortuous course, forcing a way through the ranges of Taurus and anti-Taurus, and still seeming as if it would empty itself into the Mediterranean; but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from it; the river at last desists from its endeavour, and in about lat. 36° turns towards the south-east, and proceeds in this direction for above 1000 miles to its embouchure in the Persian Gulf. The last part of its course, from *Hit* downwards, is through a low, flat, and alluvial plain, over which it has a tendency to spread and stagnate; above *Hit*, and from thence to *Sumcisat* (*Sumosata*), the country along its banks is for the most part open but hilly; north of *Sumcisat*, the stream runs in a narrow valley among high mountains, and is interrupted by numerous rapids. The entire course is calculated at 1780 miles, nearly 650 more than that of the Tigris, and only 200 short of that of the Indus; and of this distance more than two-thirds (1200 miles) is navigable for boats, and even, as the expedition of Col. Chesney proved, for small steamers. The width of the river is greatest at the distance of 700 or 800 miles from its mouth—that is to say, from its junction with the *Khabour* to the village of *Werau*. It there averages 400 yards, while lower down, from *Werdi* to *Lambun*, it continually decreases, until at the last named place its width is not more than 120 yards,

its depth having at the same time diminished from an average of 18 to one of 12 feet. The causes of this singular phenomenon are the entire lack of tributaries below the *Khabour*, and the employment of the water in irrigation. The river has also in this part of its course the tendency already noted, to run off and waste itself in vast marshes, which every year more and more cover the alluvial tract west and south of the stream. From this cause its lower course is continually varying, and it is doubted whether at present, except in the season of the inundation, any portion of the Euphrates water is poured into the *Shut-el-Arab*.

The annual inundation of the Euphrates is caused by the melting of the snows in the Armenian highlands. It occurs in the month of May. The rise of the Tigris is earlier, since it drains the southern flank of the great Armenian chain. The Tigris scarcely ever overflows [*Ἰνδὸκελλ*], but the Euphrates inundates large tracts on both sides of its course from *Hit* downwards. The great hydraulic works ascribed to Nebuchadnezzar (Abyden. Fr. 8) had for their great object to control the inundation by turning the waters through sluices into canals, prepared for them, and distributing them in channels over a wide extent of country.

The Euphrates has at all times been of some importance as furnishing a line of traffic between the East and the West. Herodotus speaks of persons, probably merchants, using it regularly on their passage from the Mediterranean to Babylon (*Her.* i. 185). He also describes the boats which were in use upon the stream (i. 194)—and mentions that their principal freight was wine, which he seems to have thought was furnished by Armenia. It was, however, more probably Syrian, as Armenia is too cold for the vine. Boats such as he describes, of wicker work, and coated with bitumen, or sometimes covered with skins, still abound on the river. Alexander appears to have brought to Babylon by the Euphrates route vessels of some considerable size, which he had had made in Cyprus and Phœnicia. They were so constructed that they could take to pieces, and were thus carried piecemeal to Thapsacus, where they were put together and launched (*Aristobol.* ap. Strab. xvi. 1, §11). The disadvantage of the route was the difficulty of conveying return cargoes against the current. According to Herodotus the boats which descended the river were broken to pieces and sold at Babylon, and the owners returned on foot to Armenia, taking with them only the skins (i. 194). Aristobolus however related (ap. Strab. xvi. 3, §3) that the Geræans ascended the river in their rafts not only to Babylon, but to Thapsacus, whence they carried their wares on foot in all directions. The spices and other products of Arabia formed their principal merchandise. On the whole there are sufficient grounds for believing that throughout the Babylonian and Persian periods this route was made use of by the merchants of various nations, and that by it the east and west continually interchanged their most important products. (See Layard's *Nineveh and Babylon*, pp. 536-7.)

The Euphrates is first mentioned in Scripture as one of the four rivers of Eden (*Gen.* ii. 14). Its celebrity is there sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. We next hear of it in the covenant made with Abraham (*Gen.* xv. 18), where the whole country from "the great river, the river Euphrates" to the river of

Egypt is promised to the chosen race. In Deuteronomy and Joshua we find that this promise was borne in mind at the time of the settlement in Canaan (Deut. i. 7; xi. 24; Josh. i. 4); and from an important passage in the first Book of Chronicles it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times anterior to Saul (1 Chr. v. 9). Here they came in contact with the Hagrites, who appear upon the middle Euphrates in the Assyrian inscriptions of the later empire. It is David, however, who seems for the first time to have entered on the full enjoyment of the promise, by the victories which he gained over Hadadezer, king of Zobah, and his allies, the Syrians of Damascus (2 Sam. viii. 3-8; 1 Chr. xviii. 3). The object of his expedition was "to recover his border," and "to establish his dominion by the river Euphrates;" and in this object he appears to have been altogether successful; in so much that Solomon, his son, who was not a man of war, but only inherited his father's dominions, is said to have "reigned over all kingdoms from the river (i. e. the Euphrates) unto the land of the Philistines and unto the border of Egypt" (1 K. iv. 21; compare 2 Chr. ix. 26). Thus during the reigns of David and Solomon the dominion of Israel actually attained to the full extent both ways of the original promise, the Euphrates forming the boundary of their empire to the north-east, and the river of Egypt (*torrens Aegypti*) to the south-west. This wide-spread dominion was lost upon the disruption of the empire under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Necho against the Babylonians in the reign of Josiah. The "Great River" had meanwhile served for some time as a boundary between Assyria and the country of the Hittites (see ASSYRIA), but had been repeatedly crossed by the armies of the Ninevite kings, who gradually established their sway over the countries upon its right bank. The crossing of the river was always difficult; and at the point where certain natural facilities fixed the ordinary passage, the strong fort of Carchemish had been built, probably in very early times, to command the position. [CARCHEMISH.] Hence, when Necho determined to attempt the permanent conquest of Syria, his march was directed upon "Carchemish by Euphrates" (2 Chr. xxxv. 20), which he captured and held, thus extending the dominion of Egypt to the Euphrates, and renewing the old glories of the Ramesside kings. His triumph, however, was short-lived. Three years afterwards the Babylonians—who had inherited the Assyrian dominion in these parts—made an expedition under Nebuchadnezzar against Necho, defeated his army, "which was by the river Euphrates in Carchemish" (Jer. xli. 2), and recovered all Syria and Palestine. Then "the king of Egypt came no more out of his land, for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7).

These are the chief events which Scripture distinctly connects with the "Great River." It is probably included among the "rivers of Babylon," by the side of which the Jewish captives "remembered Zion" and "wept" (Ps. cxxxvii. 1); and no doubt is glanced at in the threats of Jeremiah against the Chaldean "waters" and "springs," upon which there is to be a "drought," that shall "dry them up" (Jer. l. 38; li. 26). The fulfilment of these prophecies has been noticed under the

head of CHALDÆA. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses along which it was in former times conveyed are dry; the main channel has shrunk; and the water stagnates in unwholesome marshes.

It is remarkable that Scripture contains no clear and distinct reference to that striking occasion, when, according to profane historians (Herod. i. 191; Xen. *Cyrop.* vii. 5), the Euphrates was turned against its mistress, and used to effect the ruin of Babylon. The brevity of Daniel (v. 30-31) is perhaps sufficient to account for his silence on the point; but it might have been expected from the fulness of Jeremiah (chs. l. and li.) that so remarkable a feature of the siege would not have escaped mention. We must, however, remember, in the first place, that a clear prophecy may have been purposely withheld, in order that the Babylonians might not be put upon their guard. And secondly, we may notice, that there does seem to be at least one reference to the circumstance, though it is covert, as it was necessary that it should be. In immediate conjunction with the passage which most clearly declares the taking of the city by a surprise is found an expression, which reads very obscurely in our version—"the passages are stopped" (Jer. li. 32). Here the Hebrew term used (מַעְרָזִים) applies most properly to "fords or ferries over rivers" (comp. Judg. iii. 28); and the whole passage may best be translated, "the ferries are seized" or "occupied;" which agrees very well with the entrance of the Persians by the river, and with the ordinary mode of transit in the place, where there was but one bridge (Herod. i. 186).

(See, for a general account of the Euphrates, Col. Chesney's *Euphrates Expedition*, vol. i.; and for the lower course of the stream, compare Loftus's *Chaldea and Susiana*. See also Rawlinson's *Herodotus*, vol. i. Essay ix., and Layard's *Nineveh and Babylon*, chs. xxi. and xxii.) [G. R.]

ΕΥΡΟΙ/ΕΜΟΣ (Εὐρόλεμος), the "son of John, the son of Acos" ('Ακκός; cf. Neh. iii. 4, 21, &c.), one of the envoys sent to Rome by Judas Maccabæus, cir. B.C. 161 (1 Macc. viii. 17; 2 Macc. iv. 11; Joseph. *Ant.* xii. 10, §8). He has been identified with the historian of the same name (Euseb. *Præp. Ev.* ix. 17 ff.); but it is by no means clear that the historian was of Jewish descent (Joseph. *c. Ap.* i. 23; yet cf. Hieron. *de l. ir. Illustr.* 38). [B. F. W.]

ΕΥΡΟΚΛΥΔΟΝ (Εὐροκλύδων), the name given (Acts xxi. 14) to the gale of wind, which off the South coast of Crete seized the ship in which St. Paul was ultimately wrecked on the coast of Malta. The circumstances of this gale are described with much particularity; and they admit of abundant illustration from the experience of modern seamen in the Levant. In the first place it came down from the island (κατ' ἀνῆς), and therefore must have blown, more or less, from the Northward, since the ship was sailing along the South coast, not far from Mount Ida, and on the way from FAIR-HAVENS toward PHOENICE. So Captain Spratt, R.N., after leaving Fair-Havens with a light southerly wind, fell in with "a strong northerly breeze, blowing direct from Mount Ida" (Smith, *Voy. and Shipwreck of St. Paul*, 1856, pp. 87, 245). Next, the wind is described as being like a typhoon or whirlwind (τυφωνικός, A. V. "tempestuous"); and the same authority speaks of

such gales in the Levant as being generally "accompanied by terrific gusts and squalls from those high mountains" (*Life and Epistles of St. Paul*, 1856, ii. 401). It is also observable that the change of wind in the voyage before us (xxvii. 13, 14) is exactly what might have been expected; for Captain J. Stewart, R.N., observes, in his remarks on the Archipelago, that "it is always safe to anchor under the lee of an island with a northerly wind, as it dies away gradually, but it would be extremely dangerous with southerly winds, as they almost invariably shift to a violent northerly wind" (*Purdy's Sailing Directory*, pt. ii. p. 61). The long duration of the gale ("the fourteenth night," 27), the overclouded state of the sky ("neither sun nor stars appearing," 20), and even the heavy rain which concluded the storm (τὸν ὕεθν, xxviii. 2) could easily be matched with parallel instances in modern times (see *Voy. and Shipwreck*, p. 144; *Life and Epp.* p. 412). We have seen that the wind was more or less northerly. The context gives us full materials for determining its direction with great exactitude. The vessel was driven from the coast of Crete to TAUDA (xxvii. 16), and apprehension was felt that she would be driven into the African Syrtis (v. 17). Combining these two circumstances with the fact that she was less than half way from Fair-Havens to Phoenix when the storm began (v. 14), we come to the conclusion that it came from the N.E. or E.N.E. This is quite in harmony with the natural sense of Εὐρακῶων (*Evragiōōn*, Vulg.), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but we are disposed to adhere to the received Text, more especially as it is the more difficult reading, and the phrase used by St. Luke (ὁ καλούμενος Εὐροκλύδων) seems to point to some peculiar word in use among the sailors. Dean Alford thinks that the true name of the wind was εὐροκλύδων, but that the Greek sailors, not understanding the Latin termination, corrupted the word into εὐροκλύδων, and that so St. Luke wrote it. [WINDS.]

[J. S. II.]

EUTYCHUS (Εὐτυχῆς), a youth at TROAS (Acts xx. 9), who sitting in a window, and having fallen asleep while St. Paul was discoursing far into the night, fell from the third story, and being taken up dead, was miraculously restored to life by the Apostle. The plain statement, ἦρθη νεκρός, and the proceeding of St. Paul with the body (cf. 2 K<sup>o</sup> iv. 34), forbid us for a moment to entertain the view of De Wette, Meyer, and Olshausen, who suppose that animation was merely suspended. [H. A.]

EVANGELIST. The constitution of the Apostolic Church included an order or body of men known as Evangelists. The absence of any detailed account of the organisation and practical working of the Church of the first century leaves us in some uncertainty as to their functions and positions. The meaning of the name, "The publishers of glad tidings," seems common to the work of the Christian ministry generally, yet in Eph. iv. 11 the εὐαγγελισταὶ appear on the one hand after the ἀποστολοὶ and πρόφῃται; on the other before the ποιμένες and διδάσκαλοι. Assuming that the Apostles here, whether limited to the Twelve or not, are those who were looked on as the special delegates and representatives of Christ, and therefore higher than all others in their authority, and that the Prophets were men speaking under the immediate impulse of the Spirit words

that were mighty in their effects on men's hearts and consciences, it would follow that the Evangelists had a function subordinate to theirs, yet more conspicuous, and so far higher than that of the Pastors who watched over a church that had been founded, and of the Teachers who carried on the work of systematic instruction. This passage accordingly would lead us to think of them as standing between the two other groups—sent forth as missionary preachers of the Gospel by the first, and as such preparing the way for the labours of the second. The same inference would seem to follow the occurrence of the word as applied to Philip in Acts xxi. 8. He had been one of those who had gone everywhere, εὐαγγελίζόμενοι τὸν λόγον (Acts xviii. 4), now in one city, now in another (viii. 40); but he has not the power or authority of an Apostle, does not speak as a prophet himself, though the gift of prophecy belongs to his four daughters (xxi. 9), exercises apparently no pastoral superintendence over any portion of the flock. The omission of Evangelists in the list of 1 Cor. xii. may be explained on the hypothesis that the nature of St. Paul's argument led him there to speak of the settled organisation of a given local Church, which of course presupposed the work of the missionary preacher as already accomplished, while the train of thought in Eph. iv. 11 brought before his mind all who were in any way instrumental in building up the Church universal. It follows from what has been said that the calling of the Evangelist is expressed by the word κηρύσσειν rather than διδάσκειν, or παρακαλεῖν; it is the proclamation of the glad-tidings to those who have not known them, rather than the instruction and pastoral care of those who have believed and been baptised. And this is also what we gather from 2 Tim. iv. 2, 5, Timotheus is "to preach the word;" in doing this he is to fulfil "the work of an Evangelist." It follows also that the name denotes a *work* rather than an *order*. The Evangelist might or might not be a Bishop-Elder or a Deacon. The Apostles, so far as they evangelized (Acts viii. 25, xiv. 7; 1 Cor. i. 17), might claim the title, though there were many evangelists who were not Apostles. The brother, "whose praise was in the Gospel" (2 Cor. viii. 18), may be looked on as one of St. Paul's companions in this work, and known probably by the same name. In this, as in other points connected with the organisation of the Church in the Apostolic age, but little information is to be gained from later writers. The name was no longer explained by the presence of those to whom it had been specially applied, and came to be variously interpreted. Theodoret (on Eph. iv. 11) describes the Evangelists (as they have been described above) as travelling missionaries. Chrysostom, as men who preached the Gospel μὴ περιόχοντες πανταχοῦ. The account given by Eusebius (*H. E.* iii. 37), though somewhat rhetorical and vague, gives prominence to the idea of itinerant missionary preaching. Men "do the work of Evangelists," leaving their homes to proclaim Christ, and deliver the written Gospels to those who were ignorant of the faith." The last clause of this description indicates a change in the work, which before long affected the meaning of the name. If the Gospel was a written book, and the office of the Evangelists was to read or distribute it, then the writers of such books were κατ' ἐξοχὴν THE Evangelists. It is thus accordingly that Eusebius (*l. c.*) speaks of them,

though the old meaning of the word (as in *H. E.* v. 10, where he applies it to Pantæus) is not forgotten by him. Soon this meaning so overshadowed the old that Occumenius (Estius on Eph. iv. 11) has no other notion of the Evangelists than as those who have written a Gospel (comp. Harless on Eph. iv. 11). Augustine, though commonly using the word in this sense, at times remembers its earlier signification (*Serm.* xcix. and cclxvi.). Ambrosianus (Estius, *l. c.*) identifies them with Deacons. In later liturgical language the work was applied to the reader of the Gospel for the day. (Comp. Neander, *Pflanz. u. Leit.* iii. 5; Hooker, *E. P. Bk.* lxxviii. 7, 9.) [E. H. P.]

**EVE** (חַוָּה, i. e. *Chavvah*, LXX. in Gen. iii. 20, *Zōh*, elsewhere *Eḏa*; *Hēva*), the name given in Scripture to the first woman. It is simply a feminine form of the adjective חַי, *living*, *alive*, which more commonly makes חַיִּים; or it may be regarded as a variation of the noun חַיִּים, which means *life*. The account of Eve's creation is found at Gen. ii. 21, 22. Upon the failure of a companion suitable for Adam among the creatures which were brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which he fashioned into a woman, and brought her to the man. Various explanations of this narrative have been offered. Perhaps that which we are chiefly intended to learn from it is the foundation upon which the union between man and wife is built, viz. identity of nature and oneness of origin.

Through the subtlety of the serpent, Eve was beguiled into a violation of the one commandment which had been imposed upon her and Adam. She took of the fruit of the forbidden tree and gave it her husband (Comp. 2 Cor. xi. 3; 1 Tim. ii. 13, 14). [ADAM]. The different aspects under which Eve regarded her mission as a mother are seen in the names of her sons. At the birth of the first she said "I have gotten a man from the Lord," or perhaps, "I have gotten a man, *even* the Lord," mistaking him for the Redeemer. When the second was born, finding her hopes frustrated, she named him Abel, or *vanity*. When his brother had slain him, and she again bare a son, she called his name Seth, and the joy of a mother seemed to outweigh the sense of the vanity of life: "For God," said she, "hath appointed me another seed instead of Abel, for Cain slew him." The Scripture account of Eve closes with the birth of Seth. [S. L.]

**EVI** (עֵוִי; *Eḏi*; *Evi*, *Hevaeus*), one of the five kings or princes of Midian, slain by the Israelites in the war after the matter of Baal-peor, and whose lands were afterwards allotted to Reuben (Num. xxi. 8; Josh. xiii. 21). [MIDIAN.] [E. S. P.]

**E'VIL-MER'ODACH** (עֵוִיל מֶרֶדָּח; *Eḏial-marōdāc*. *Οὐλαιμαρδᾶχος*; Ahyden. *Ἀμιλμαρῶδοκος*; Beross. *Ἐβειλμαρδουχος*; *Eḏilmerodach*), according to Berossus and Abydenus, was the son and successor of Nebuchadnezzar. We learn from the second book of Kings (2 K. xxv. 27) and from Jeremiah (Jer. lii. 31), that in the first year of his reign this king had compassion upon his father's enemy, Jehoiachin, and released him from prison where he had languished for thirty-seven years, "spoke kindly to him," and gave him a portion at his table for the rest of his life. He reigned but a short time having ascended the throne

on the death of Nebuchadnezzar in B.C. 581, and being himself succeeded by Neriglissar in B.C. 559. (See the Canon of Ptolemy; given under BABYLON.) He thus appears to have reigned but two years, which is the time assigned to him by Abydenus (Fr. 9) and Berossus (Fr. 14). At the end of this brief space Evil-Merodach was murdered by Neriglissar [NERGAL-SHAREZER]—a Babylonian noble married to his sister—who then seized the crown. According to Berossus, Evil-Merodach provoked his fate by lawless government and intemperance. Perhaps the departure from the policy of his father, and the substitution of mild for severe measures, may have been viewed in this light. [G. R.]

#### EXECUTIONER (חַבֵּשׁ; *σπεκουλάτωρ*).

The Hebrew *ḥabbash* describes in the first instance the office of executioner, and, secondarily, the general duties of the body-guard of a monarch. Thus Potiphar was "captain of the executioners" (Gen. xxxvii. 36; see margin), and had his official residence at the public gaol (Gen. xl. 3). Nebuzaradan (2 K. xxv. 8; Jer. xxxix. 9) and Arioch (Dan. ii. 14) held the same office. That the "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 K. ii. 25, 34. Nevertheless the post was one of high dignity, and something beyond the present position of the *zabit* of modern Egypt (comp. Lane, i. 163), with which Wilkinson (ii. 45) compares it. It is still not unusual for officers of high rank to inflict corporal punishment with their own hands (Wilkinson, ii. 43). The LXX. takes the word in its original sense (cf. 1 Sam. ix. 23), and terms Potiphar *chief-cook*, ἀρχιμαγειρος.

The Greek *σπεκουλάτωρ* (Mark vi. 27) is borrowed from the Latin *speculator*; originally a military spy or scout, but under the emperors transferred to the *body-guard*, from the vigilance which their office demanded (Tac. *Hist.* ii. 11; Suet. *Claud.* 35). [W. L. B.]

#### EXILE. [CAPTIVITY.]

**EX'ODUS** (עֲצוּדָה, being the first words of the Book, or abbr. עֲצוּדָה; in the Masora to Gen. xxiv. 8 called עֲצוּדָה, see Buxt. *Lex. Tul.* p. 1325; *Ἔξοδος*; *Exodus*), the second book of the Law or Pentateuch.

A. *Contents*.—The book may be divided into two principal parts, I. Historical, i. 1—xviii. 27; and II. Legislative, xix. 1—xl. 38. The former of these may be subdivided into (1.) the preparation for the deliverance of Israel from their bondage in Egypt; (2.) the accomplishment of that deliverance.

I. (1.) The first section (i. 1—xii. 36) contains an account of the following particulars:—The great increase of Jacob's posterity in the land of Egypt, and their oppression under a new dynasty, which occupied the throne after the death of Joseph (ch. i.); the birth, education, and flight of Moses (ii.); his solemn call to be the deliverer of his people (iii. 1—iv. 17), and his return to Egypt in consequence (iv. 18—31); his first ineffectual attempt to prevail upon Pharaoh to let the Israelites go, which only resulted in an increase of their burdens (v. 1—21); a further preparation of Moses and Aaron for their office, together with the account of their genealogies (v. 22—vii. 7); the successive signs and wonders, by means of which the deliverance of Israel from the land of bondage is at length accomplished, and the institution of the Passover (vii. 8—xii. 36).

(2.) A narrative of events from the departure out of Egypt to the arrival of the Israelites at Mount Sinai. We have in this section (a.) the departure and (mentioned in connexion with it) the injunctions then given respecting the Passover and the sanctification of the first-born (xii. 37—xiii. 16); the march to the Red Sea, the passage through it, and the destruction of Pharaoh and his host in the midst of the sea, together with Moses' song of triumph upon the occasion (xiii. 17—xv. 21); (b.) the principal events on the journey from the Red Sea to Sinai, the bitter waters at Marah, the giving of quails and of the manna, the observance of the sabbath, the miraculous supply of water from the rock at Rephidim, and the battle there with the Amalekites (xv. 22—xvii. 16); the arrival of Jethro in the Israelitish camp, and his advice as to the civil government of the people (xviii.).

II. The solemn establishment of the Theocracy on Mount Sinai. The people are set apart to God as "a kingdom of priests and an holy nation" (xix. 6); the ten commandments are given, and the laws which are to regulate the social life of the people are enacted (xxi. 1—xxiii. 19); an Angel is promised as their guide to the Promised Land, and the covenant between God and Moses, Nadab and Abihu, and seventy elders, as the representatives of the people, is most solemnly ratified (xxiii. 20—xxiv. 18); instructions are given respecting the tabernacle, the ark, the mercy-seat, the altar of burnt-offering, the separation of Aaron and his sons for the priest's office, the vestments which they are to wear, the ceremonies to be observed at their consecration, the altar of incense, the laver, the holy oil, the selection of Bezaleel and Aholiab for the work of the tabernacle, the observance of the sabbath and the delivery of the two tables of the Law into the hands of Moses (xxv. 1—xxx. 18); the sin of the people in the matter of the golden calf, their rejection in consequence, and their restoration to God's favour at the intercession of Moses (xxxii. 1—xxxiv. 35); lastly, the construction of the tabernacle, and all pertaining to its service in accordance with the injunctions previously given (xxxv. 1—xl. 38).

This Book in short gives a sketch of the early history of Israel as a nation: and the history has three clearly marked stages. First we see a nation enslaved; next a nation redeemed; lastly a nation set apart, and through the blending of its religious and political life consecrated to the service of God.

B. *Integrity.* — According to von Lengerke (*Kennan*, lxxxviii. xc.) the following portions of the book belong to the original or Elohist document:—Chap. i. 1-14, ii. 23-25, vi. 2—vii. 7, vi. 1-28, 37, 38, 40-51 (xiii. 1, 2, perhaps), xvi., xix. 1, xx., xxv.—xxxi., xxxv.—xl. Stähelin (*Krit. Unters.*) and De Wette (*Eindeutung*) agree in the main with this division. Knobel, the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books still more carefully, and with regard to many passages has formed a different judgment. He assigns to the Elohist:—i. 1-7, 13, 14, ii. 23-25 from יאֲמָרוּ, vi. 2—vii. 7, except vi. 8, vii. 8-13, 19-22, viii. 1-3, 11 from לָא, and 12-15, ix. 8-12 and 35, xi. 9, 10, xii. 1-23, 28, 37 a, 40-42, 43-51, xiii. 1, 2, 20, xiv. 1-4, 8, 9, 15-18, (except מִה תַּעֲשֶׂה אֵלַי in ver. 15, and דָּרֵם אַתָּה in ver. 16), 21-23, and 26-29 (except 27 from

וַיִּשָּׁב), xv. 19, 22, 23, 27, xvi. 1, 2, 9-26, 31-36, xvii. 1, xix. 2 a, xxv.—xxxi. 11, 12-17 in the main; xxxv. 1—xl. 38.

A mere comparison of the two lists of passages selected by these different writers as belonging to the original document is sufficient to show how very uncertain all such critical processes must be. The first, that of v. Lengerke, is open to many objections, which have been urged by Hävernick (*Einal. in der Pent.* §117), Ranke, and others. Thus, for instance, chap. vi. 6, which all agree in regarding as Elohist, speaks of "great judgments" (מִשְׁפָּטִים גְּדוֹלִים in the plur.), whereas with God would redeem Israel, and yet not a word is said of these in the so-called original document. Again xii. 12, 23, 27 contains the announcement of the destruction of the first-born of Egypt, but the fulfilment of the threat is to be found, according to the critics, only in the later Jehovistic additions. Hupfeld has tried to escape this difficulty by supposing that the original documents did contain an account of the slaying of the first-born, as the institution of the Passover in xii. 12, &c., has clearly a reference to it: only he will not allow that the story as it now stands is that account. But even then the difficulty is only partially removed, for thus *one* judgment only is mentioned, not *many* (vi. 6). Knobel has done his best to obviate this glaring inconsistency. Feeling no doubt that the ground taken by his predecessors was not tenable, he retains as a part of the original work much which they had rejected. It is especially worthy of notice that he considers some at least of the miraculous portions of the story to belong to the older document, and so accounts for the expression in vi. 6. The changing of Aaron's rod into a serpent, of the waters of the Nile into blood, the plague of frogs, of mosquitoes (A. V. lice), and of boils, and the destruction of the first-born, are, according to Knobel, Elohist. He points out what he considers here links of connexion, and a regular sequence in the narrative. He bids us observe that Jehovah always addresses Moses, and that Moses directs Aaron how to act. The miracles, then, are arranged in order of importance: first there is the sign which serves to accredit the mission of Aaron; next follow three plagues, which, however, do not touch men, and these are sent through the instrumentality of Aaron; the fourth plague is a plague upon man, and here Moses takes the most prominent part; the fifth and last is accomplished by Jehovah himself. Thus the miracles increase in intensity as they go on. The agents likewise rise in dignity. If Aaron with his rod of might begins the work, he gives way afterwards to his greater brother, whilst for the last act of redemption Jehovah employs no human agency, but Himself with a mighty hand and outstretched arm effects the deliverance of his people. The passages thus selected have no doubt a sort of connexion, but it is in the highest degree arbitrary to conclude that because portions of a work may be omitted without seriously disturbing the sense, these portions do not belong to the original work, but must be regarded as subsequent embellishments and additions.

Again all agree in assigning chaps. iii. and iv. to the Jehovist. The call of Moses, as there described, is said to be merely the Jehovistic parallel to vi. 2—vii. 7. Yet it seems improbable that the Elohist should introduce Moses with the bare words, "And God spake to Moses," vi. 2, without a single word

as to the previous history of so remarkable a man. So argues Hävernick, and as it appears to us, not without reason. It will be observed that none of these critics attempt to make the Divine names a criterion whereby to distinguish the several documents. Thus in the Jehovistic portion, chap. i. 15-22, De Wette is obliged to remark, with a sort of uneasy candour, "but vers. 17, 20, *Elohim* (?)," and again chap. iii. 4, 6, 11-15, "here seven times *Elohim*." In other places there is the same difficulty as in chap. xix. 17, 19, which Stähelin, as well as Knobel, gives to the Jehovist. In the passages in chaps. vii., viii., ix., which Knobel classes in the earlier record, the name Jehovah occurs throughout. It is obvious then that there must be other means of determining the relative antiquity of the different portions of the book, or the attempt to ascertain which are earlier and which are later must entirely fail. Accordingly certain peculiarities of style are supposed to be characteristic of the two documents. Thus, for instance, De Wette (*Eint.* §151, S. 183) appeals to פרה ורבה, i. 7, הזח, בעצם ה' הזה, xii. 17, 41, וקום בית, vi. 4, the formula לא כשה לאמר, xxi. 1, xxx. 11, &c., צבאות, vi. 26, vi. 4, xii. 17, 41, 51; בין הערבים, xii. 6, xxi. 41, xxx. 8, and other expressions, as decisive of the Elohist. Stähelin also proposes on very similar grounds to separate the first from the second legislation. Wherever, he says, I find mention of a pillar of fire, or of a cloud, Ex. xxxiii. 9, 10, or an "Angel of Jehovah," as Ex. xxxiii., xxxiv., or the phrase "flowing with milk and honey," as Ex. xiii. 5, xxxiii. 3 . . . where mention is made of a coming down of God, as Ex. xix., xxxiv. 5, or where the Canaanite nations are numbered, or the tabernacle supposed to be without the camp, Ex. xxxiii. 7, I feel tolerably certain that I am reading the words of the Author of the Second Legislation (i. e. the Jehovist)." But these nice critical distinctions are very precarious, especially in a stereotyped language like the Hebrew.

Unfortunately, too, dogmatical prepossessions have been allowed some share in the controversy. De Wette and his school chose to set down every thing which savoured of a miracle as proof of later authorship. The love of the marvellous, which is all they see in the stories of miracles, according to them could not have existed in an earlier and simpler age. But on their own hypothesis this is a very extraordinary view. For the earlier traditions of a people are not generally the least wonderful, but the reverse. And one cannot, thus, acquit the second writer of a *design* in embellishing his narrative. However, this is not the place to argue with those who deny the possibility of a miracle, or who make the narration of miracles proof sufficient of later authorship. Into this error Knobel it is true has not fallen. By admitting some of the plagues into his Elohist catalogue, he shows that he is at least free from the dogmatic prejudices of critics like De Wette. But his own critical tests are not conclusive. And the way in which he cuts verses to pieces, as in viii. 11, and xiii. 15, 16, 27, where it suits his purpose, is so completely arbitrary, and results so evidently from the stern constraint of a theory, that his labours in this direction are not more satisfactory than those of his predecessors.

On the whole there seems much reason to doubt whether critical acumen will ever be able plausibly to distinguish between the original and the supplement in the book of Exodus. There is nothing in-

deed forced or improbable in the supposition, either that Moses himself incorporated in his memoirs ancient tradition whether oral or written, or that a writer later than Moses made use of materials left by the great legislator in a somewhat fragmentary form. There is an occasional abruptness in the narrative, which suggests that this may possibly have been the case, as in the introduction of the genealogy vi. 13-27. The remarks in xi. 3, xvi. 35, 36 lead to the same conclusion. The apparent confusion at xi. 1-3 may be explained by regarding these verses as parenthetical.

We shall give reasons hereafter for concluding that the Pentateuch in its present form was not altogether the work of Moses. [PENTATEUCH.] For the present it is sufficient to remark, that even admitting the hand of an editor or compiler to be visible in the book of Exodus, it is quite impossible accurately to distinguish the documents from each other, or from his own additions.

C. Credibility.—Almost every historical fact mentioned in Exodus has at some time or other been called in question. But it is certain that all investigation has hitherto tended only to establish the veracity of the narrator. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, for instance, Manetho's story of the Hyksos, questionable as much of it is, and differently as it has been interpreted by different writers, points at least to some early connexion between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that, at the time of the Israelish sojourn, Egypt was ruled by a foreign dynasty. [EGYPT.] Manetho speaks, too, of strangers from the East who occupied the eastern part of Lower Egypt. And his account shows that the Israelites had become a numerous and formidable people. According to Ex. xii. 37, the number of men beside women and children who left Egypt was 600,000. This would give for the whole nation about two millions and a half. There is no doubt some difficulty in accounting for this immense increase, if we suppose (as on many accounts seems probable) that the actual residence of the children of Israel was only 215 years. We must remember indeed that the number who went into Egypt with Jacob was considerably more than "threescore and ten souls" [see CHRONOLOGY]; we must also take into account the extraordinary fruitfulness of Egypt\* (concerning which all writers are agreed), and especially of that part of it in which the Israelites dwelt. Still it would be more satisfactory if we could allow 430 years for the increase of the nation rather than any shorter period.

According to De Wette, the story of Moses' birth is mythical, and arises from an attempt to account etymologically for his name. But the beautiful simplicity of the narrative places it far above the stories of Romulus, Cyrus, and Semiramis, with which it has been compared (Knobel, p. 14). And as regards the etymology of the name, there can be very little doubt that it is Egyptian (from the Copt. *ⲉⲙⲱ*, "water," and *ⲭⲓ* or *Ⲑⲓ*, "to take;" cf. Gesen. *Thes.* in v., and Knobel, *Comm.* in loc.); and if so, the author has either played upon the

\* Cf. Strabo, xv. p. 478; Aristot. *Hist. Anim.* vii. 4; Plin. *H. N.* vii. 3; Seneca, *Qu. Nat.* iii. 27, quoted by Hävernick.

name or is mistaken in his philology. But this does not prove that the whole story is nothing but a myth. Philology as a science is of very modern growth, and the truth of history does not stand or fall with the explanation of etymologies. The same remark applies to De Wette's objection to the etymology in ii. 22.

Other objections are of a very arbitrary kind. Thus Knobel thinks the command to destroy the male children (i. 15 ff.) extremely improbable, because the object of the king was not to destroy the people, but to make use of them as slaves. To require the midwives to act as the enemies of their own people, and to issue an injunction that every son born of Israelitish parents should be thrown into the Nile, was a piece of downright madness of which he thinks the king would not be guilty. But we do not know that the midwives were Hebrew, they may have been Egyptian; and kings, like other slave-owners, may act contrary to their interest in obedience to their fears or their passions; indeed, Knobel himself compares the story of King Bocchoris, who commanded all the unclean in his land to be cast into the sea (*Lysim. ap. Joseph. c. Apion. i. 34*), and the destruction of the Syntian Helots (*Plutarch, Lycorg. 28*). He objects further that it is not easy to reconcile such a command with the number of the Israelites at their exodus. But we may suppose that in very many instances the command of the king would be evaded, and probably it did not long continue in force.

Again, De Wette objects to the call of Moses that he *could not* have thus formed the resolve to become the saviour of his people—which, as Hävernick justly remarks, is a dogmatical, not a critical decision.

The ten plagues are physically, many of them, what might be expected in Egypt, although in their intensity and in their rapid succession, they are clearly supernatural. Even the order in which they occur is an order in which physical causes are allowed to operate. The corruption of the river is followed by the plague of frogs. From the dead frogs are bred the gnats and flies, from these came the murrain among the cattle and the boils on men, and so on.

Most of the plagues indeed, though of course in a much less aggravated form, and without such succession, are actually experienced at this day in Egypt. Of the plague of locusts it is expressly remarked that "before them were no such locusts, neither after them shall be such." And all travellers in Egypt have observed swarms of locusts, brought generally by a south-west wind (Denon, however, mentions their coming with an east wind), and in the winter or spring of the year. This last fact agrees also with our narrative. Lepsius speaks of being in a "regular snow-drift of locusts," which came from the desert in hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." And this continued for six days, indeed in weaker flights much longer. He also saw *hail* in Egypt. In January 1843, he and his party were surprised by a storm. "Suddenly," he writes, "the storm grew to a tremendous hurricane, such as I have never seen in Europe, and hail fell upon us in such masses, almost to turn day into night." He notices, too, an extraordinary cattle murrain "which carried off 40,000 head of cattle" (*Letters from Egypt, Eng. Transl. pp. 49, 27, 14*).

The institution of the Passover (ch. xii.) has been subjected to severe criticism. This has also been called a mythic fiction. The alleged circumstances are not historical it is said, but arise out of a later attempt to explain the origin of the ceremony and to refer it to the time of Moses. The critics rest mainly on the difference between the directions given for the observance of this the first, and those given for subsequent passovers. But there is no reason why, considering the very remarkable circumstances under which it was instituted, the first Passover should not have had its own peculiar solemnities, or why instructions should not then have been given for a somewhat different observance for the future. [PASSOVER.]

In minor details the writer shows a remarkable acquaintance with Egypt. Thus, for instance, Pharaoh's daughter goes to the river to bathe. At the present day it is true that only women of the lower orders bathe in the river. But Herodotus (ii. 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but apparently lived more in public than the men. To this must be added that the Egyptians supposed a sovereign virtue to exist in the Nile-waters. The writer speaks of chariots and "chosen chariots" (xiv. 7) as constituting an important element in the Egyptian army, and of the king as leading in person. The monuments amply confirm this representation. The Pharaohs lead their armies to battle, and the armies consist entirely of infantry and chariots.

Many other facts have been disputed, such as the passage of the Red Sea, the giving of the manna, &c. But respecting these it may suffice to refer to other articles in which they are discussed. [THE EXODUS; MANNA; THE RED SEA.]

D. The authorship and date of the book are discussed under PENTATEUCH. [J. J. S. P.]

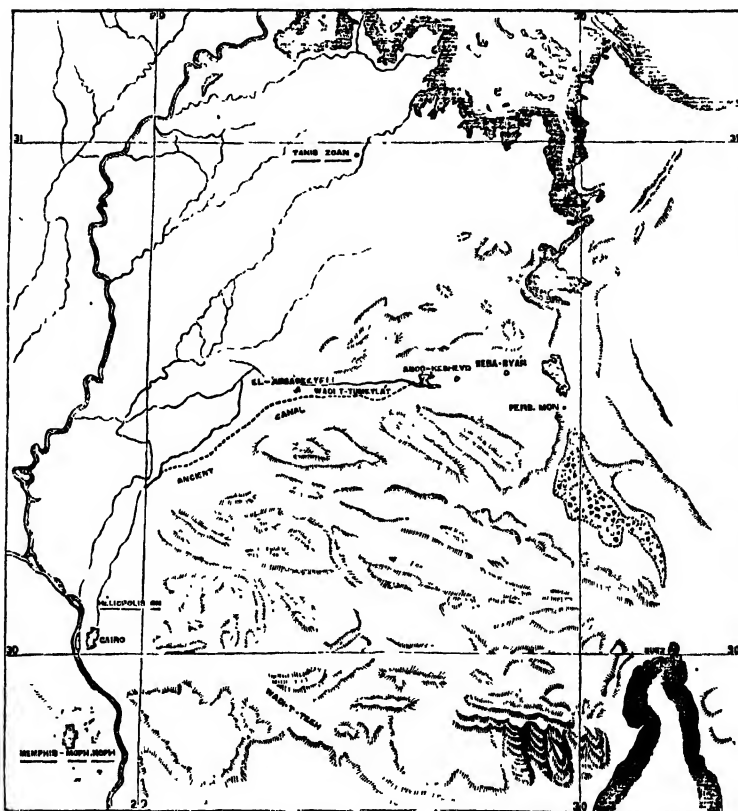

**EXODUS, THE.** The object of this article is to give a combined view of the results stated in the various articles relating or referring to the Exodus of the children of Israel from Egypt. It may be divided into three parts, treating of the chronological, the historical, and the geographical aspect of the event.

1. *Date.*—The date of the Exodus is discussed under CHRONOLOGY, where it is held that a preponderance of evidence is in favour of the year B.C. 1652. The historical questions connected with this date are noticed under EGYPT. Hales places the Exodus B.C. 1648, Usher B.C. 1491, and Bunsen B.C. 1320.

2. *History.*—The Exodus is a great turning-point in Biblical history. With it the Patriarchal dispensation ends and the Law begins, and with it the Israelites cease to be a family and become a nation. It is therefore important to observe how the previous history led up to this event. The advancement of Joseph, and the placing of his kinsmen in what was to a pastoral people, at least, "the best of the land," yet, as far as possible, apart from Egyptian influence, favoured the multiplying of the Israelites and the preservation of their nationality. The subsequent persecution bound them more firmly together, and at the same time loosened the hold that Egypt had gained upon them. It was thus that the Israelites were ready when Moses declared his mission to go forth as one man from the land of their bondage. [JOSEPH; MOSES; EGYPT.]

The history of the Exodus itself commences with the close of that of the Ten Plagues [PLAQUES OF EGYPT]. In the night in which, at midnight, the firstborn were slain (Ex. xii. 29), Pharaoh urged the departure of the Israelites (ver. 31, 32). They at once set forth from Rameses (ver. 37, 39), apparently during the night (ver. 42), but towards morning, on the 15th day of the first month (Num. xxxiii. 3). They made three journeys and encamped by the Red Sea. Here Pharaoh overtook them, and the great miracle occurred by which they were saved, while the pursuer and his army were destroyed. It has been thought by some that Pharaoh did not perish in the Red Sea, but not only does the narrative seem to forbid such a supposition (Ex. xiv. 18, 23, 28), but it is expressly contradicted

in Ps. cxxxvi. (ver. 15). Recently it has been suggested that the Israelites crossed by a ford. If, however, their safe passage could thus be accounted for, the drowning of the Egyptians would become more extraordinary than before. Obviously ordinary causes are not sufficient to explain the deliverance of the former and the destruction of the latter. But even were it so, the question would have to be asked whether the occurrence of the event at the fit time could reasonably be considered as due to such ordinary causes, and the necessary negative reply would show the fallacy of attempting a naturalistic explanation of the event on account of the use of natural means. It would be more reasonable to deny the event, but this could not be attempted in the face of the overwhelming evidence of its occurrence.

Map to illustrate the Exodus of the Israelites.

3. *Geography.*—The determination of the route by which the Israelites left Egypt is one of the most difficult questions in Biblical geography. The following points must be settled exactly or approximately:—the situation of the Land of Goshen, the length of each day's march, the position of the first station (Rameses), and the direction of the journey.

The Land of Goshen may be concluded from the Biblical narrative to have been part of Egypt, but not of what was then held to be Egypt Proper. It must therefore have been an outer eastern pro-

vince of Lower Egypt. The Israelites, setting out from a town of Goshen, made two days' journey towards the Red Sea, and then entered the wilderness, a day's journey or less from the sea. They could only therefore have gone by the valley now called the *Wādī-t-Tumeylāt*, for every other cultivated or cultivable tract is too far from the Red Sea. Rameses, as we shall see, must have lain in this valley, which thus corresponded in part at least to Goshen. That it wholly corresponded to that region is evident from its being markedly a single

valley, and from the insufficiency of any smaller territory to support the Israelites. [GOSHEN.]

It is not difficult to fix very nearly the length of each day's march of the Israelites. As they had with them women, children, and cattle, it cannot be supposed that they went more than fifteen miles daily; at the same time it is unlikely that they fell far short of this. The three journeys would therefore give a distance of about forty-five miles. There seems, however, as we shall see, to have been a deflexion from a direct course, so that we cannot consider the whole distance from the starting-point, Rameses, to the shore of the Red Sea as much more than about thirty miles in a direct line. Measuring from the ancient western shore of the Arabian Gulf due east of the *Wādī-t-Tu-meylāt*, a distance of thirty miles in a direct line places the site of Rameses near the mound called in the present day *El-'Abdaseeyeh*, not far from the western end of the valley. That the Israelites started from a place in this position is further evident from the account of the two routes that lay before them:—"And it came to pass, when Pharaoh had let the people go, that God led them not [by] the way of the land of the Philistines, although that [was] near; for God said, Lest peradventure the people repent when they see war, and they return to Egypt: but God let the people turn to the way of the wilderness of the Red Sea" (Ex. xiii. 17, 18). The expression used, *וַיִּסַּח*, does not necessarily imply a change in the direction of the journey, but may mean that God did not lead the Israelites into Palestine by the nearest route, but took them about by the way of the wilderness. Were the meaning that the people turned, we should have to suppose Rameses to have been beyond the valley to the west, and this would probably make the distance to the Red Sea too great for the time occupied in traversing it, besides overthrowing the reasonable identification of the land of Goshen. [RAMESES.] Hence it is clear that they must have started from near the eastern side of the ancient Delta, along which lies the commencement of the route to the Philistine territory.

Rameses is evidently the Raames of Ex. i. 11. It seems to have been the chief town of the land of Goshen, for that region, or possibly a part of it, is called the land of Rameses in Gen. xlvii. 11, comp. 4, 6. [RAMESES; GOSHEN.]

After the first day's journey the Israelites encamped at Succoth (Ex. xii. 37, xiii. 20; Num. xxxiii. 5, 6). This was probably a mere resting-place of caravans, or a military station, or else a town named from one of the two. Such names as the *Scenae Veteranorum* (which has been rashly identified with Succoth), and the *Scenae Maudiae* of the *Itinerary* of Antoninus, and the settlement of Ionian and Carian mercenaries called *τὰ Στρατόπεδα* (Herod. ii. 154), may be compared to this. Obviously such a name is very difficult of identification. [SUCCOTH.]

The next camping-place was Etham, the position of which may be very nearly fixed in consequence of its being described as "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6, 7). The cultivable land now extends very nearly to the western side of the ancient head of the gulf. At a period when the eastern part of Lower Egypt was largely inhabited by Asiatic settlers, there can be no doubt that this tract was under cultivation. It is therefore reasonable to place Etham where the cultivable land ceases, near the *Seba Bîâr*, or *Seven Wells*, about

three miles from the western side of the ancient head of the gulf. The *Patmos* of Herodotus and Strabo, which appears to have been the same as the Thoun or Thou of the *Itinerary* of Antoninus, is more likely to be the Pithom than the Etham of Scripture. [PITHOM.] It is too far west for the latter.

After leaving Etham the direction of the route changed. The Israelites were commanded "to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Ex. xiv. 2). Therefore it is most probable that they at once turned, although they may have done so later in the march. The direction cannot be doubted, if our description of the route thus far be correct, for they would have been entangled (ver. 3) only by turning southward, not northward. They encamped for the night by the sea, probably after a full day's journey. The place of their encampment and of the passage of the sea would therefore be not far from the Persepolitan monument, which is made in Linant's map the site of the Serapeum. We do not venture to attempt the identification of the places mentioned in the narrative with modern sites. Nothing but the discovery of ancient Egyptian names, and their positive appropriation to such sites, could enable us to do so. Something, however, may be gathered from the names of the places. The position of the Israelite encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Baal-zephon and the sea. [BAAL-ZEPHON.] Pi-hahiroth or Hahiroth is probably the name of a natural locality. The separable prefix is evidently the Egyptian masculine article, and we therefore hold the name to be Egyptian. Jablonsky proposed the Coptic etymology, *ΠΙ-ΑΧΙ-ΡΩΤ*, "the place where sedge grows," which, or a similar name, the critical sagacity of Fiesel recognised in the modern *Ghinceybet-el-boos*, "the bed of reeds." We cannot, however, hold that the *Ghinceybet-el-boos* in the neighbourhood where we place the passage of the sea is the Pi-hahiroth of the Bible: there is another *Ghinceybet-el-boos* near Suez, and such a name would of course depend for its permanence upon the continuance of a vegetation subject to change. [PI-HAHIROTH.] Migdol appears to have been a common name for a frontier watch-tower. [MIGDOL.] Baal-zephon we take to have had a similar meaning to that of Migdol. [BAAL-ZEPHON.] We should expect therefore that the encampment would have been in a depression, partly marshy, having on either hand an elevation marked by a watch-tower.

The actual passage of the sea forms the subject of another article. [RED SEA, PASSAGE OF.] There can be no doubt that the direction was from the west to the east, and that the breadth at the place of crossing was great, since the whole Egyptian army perished.

We do not propose to examine the various theories that have been put forth respecting the route of the Israelites. We have thought it enough to state all the points of evidence which can, in our judgment, lead to a satisfactory conclusion. It might, however, be thought neglectful if we did not allude to what Prof. Lepsius has written on the subject. He does not enter into any detailed exposition of the geography of the Exodus, and attempts but one identification with any modern site—that of Rameses, with the ancient Egyptian

site now called *Aboo-Kesheyd*, about eight miles from the old head of the gulf. The argument he adduces for this identification is that a monolith is found here representing Rameses II. seated between the gods Tum and Ila, and that therefore he was worshipped at the place which must have borne his name. It might equally, however, have been called Pa-tum, from Tum, and have corresponded in etymology to Patmos or else Pithon. The conclusion to which Prof. Lepsius arrives, that because *Aboo-Kesheyd* is Rameses, therefore the land of Goshen must have been within the eastern part of Lower Egypt below Heliopolis, is singularly illogical, for Rameses was in the land of Goshen, and not 20 miles east of it, and it occupied the Israelites more than two days to journey from it to the Red Sea, which makes its allocation within about eight miles of the sea absurd. The supposition involves therefore a double impossibility.

The preceding map exhibits the main features of the country in which we place the route of the Israelites, and the places referred to in this article. The best map is Linant's in the Atlas of the *Percement de l'Isthme de Suez*. [R. S. P.]

**EXORCIST** (ἐξορκιστής; *exorcista*). The verb ἐξορκίζω occurs once in the N. Test. and once in the LXX. version of the O. T. In both cases it is used, not in the sense of *exorcise*, but as a synonym of the simple verb ὀρκίζω, to *churye with an oath, to adjure*. Comp. Gen. xxiv. 3 (עֲבֹרְךָ, A. V. "I will make thee swear") with 37, and Matt. xxvi. 63, with Mark v. 7; and see 1 Thess. v. 27 (ἐξορκίζω, Lachm. Tischend.). The cognate noun, however, together with the simple verb, is found once (Acts xiv. 13) with reference to the ejection of evil spirits from persons possessed by them (cf. ἐξορκώσις, ὀρκώσις, Joseph. *Ant.* viii. 2, §5). The use of the term exorcists in that passage as the designation of a well-known class of persons, to which the individuals mentioned belonged, confirms what we know from other sources as to the common practice of exorcism amongst the Jews. That some, at least, of them not only pretended to, but possessed, the power of exorcising, appears by our Lord's admission when he asks the Pharisees, "If I by Beelzebub cast out devils, by whom do your disciples (vulgo) cast them out?" (Matt. xii. 27.) What means were employed by real exorcists we are not informed. David, by playing skilfully on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xvi. 23). Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the God of Abraham, Isaac, and Jacob. (ἀλλ' εἰ ἅπα ἐξορκίζοι τις ὁμῶν κατὰ τοῦ θεοῦ Ἀβραάμ καὶ θεοῦ Ἰσαὰκ καὶ θεοῦ Ἰακώβ, ὥσως ὑποταγήσεται [τὸ δαμόνιον].) *Dial. cum Tryph.* c. 85, p. 311, C. See also *Apol.* II. c. 6, p. 45, B, where he claims for Christianity superior but not necessarily exclusive power in this respect. Compare the statements of Iren. *adv. Haeres.* ii. 5, and the authorities quoted by Grotius on Matt. xii. 27.) But Justin goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen (Ἡδὴ μέντοι οἱ ἐξ ὁμῶν ἐπορκιστοὶ τῇ τέχνῃ, ὥσπερ καὶ τὰ ἔθνη, χρώμενοι ἐξορκίζουσι καὶ θυμιάμασι καὶ καταθέμοις χρώμενοι, εἰπον). With this agrees the account given by Josephus (*Ant.* viii. 2, §5) of an exorcism which he saw performed by Eleazar, a Jew, in the presence of Ves-

pasian and his sons, though the virtue of the cure is attributed to the mention of the name of Solomon, and to the use of a root, and of certain incantations said to have been prescribed by him. It was the profane use of the name of Jesus as a mere charm or spell which led to the disastrous issue recorded in the Acts of the Apostles (xiv. 12-16).

The power of casting out devils was bestowed by Christ while on earth upon the apostles (Matt. x. 8), and the seventy disciples (Luke x. 17-19), and was, according to His promise (Mark xvi. 17), exercised by believers after His Ascension (Acts xvi. 18); but to the Christian miracle, whether as performed by our Lord himself or by His followers, the N. T. writers never apply the terms "exorcise" or "exorcist." [T. T. P.]

### EXPIATION. [SACRIFICE.]

**EZ'BAI** (עֲזַבַּי; 'Aṣṣobai; *Asbai*), father of Naami, who was one of David's thirty mighty men (1 Chr. xi. 37). In the parallel list (2 Sam. xliii. 35) the name is given as פַּאמִי the Arbite," which Kennicott decides to be a corruption of the reading in Chronicles. (*Dissertation*, &c., 209.)

**EZ'BON** (עֲזֹבֹן; 'Esobān, and 'Esēbān, or 'Asebān; *Eschen*). 1. Son of Gad, and founder of one of the Gadite families (Gen. xlii. 16; Num. xxvi. 16). In the latter passage the name is written עֲזֹנִי (A. V. Ozni), probably by a corruption of the text of very early date, since the LXX. have 'Aṣṣel. The process seems to have been the accidental omission of the ב in the first instance (as in עֲזֹנִי, Abiezer (Josh. xvii. 2), which in Num. xxvi. is written עֲזֹנִי, Jeezer), and then, when עֲזֹנִי was no longer a Hebrew form, the changing it into עֲזֹנִי.

2. Son of Bela, the son of Benjamin, according to 1 Chr. vii. 7. It is singular, however, that while Ezbon is nowhere else mentioned among the sons of Bela, or Benjamin, he appears here in company with יִשָּׁי, Ithi, which is not a Benjamite family either, according to the other lists, but which is found in company with Ezbon among the Gadite families, both in Gen. xlii. 16 (Eri, יִשָּׁי), and Num. xxvi. 16. Were these two Gadite families incorporated into Benjamin after the slaughter mentioned Judg. xx. 7? Possibly they were from Jabesh-Gilead (comp. xxi. 12-14). [BECHEP.] 1 Chr. vii. 2, seems to fix the date of the census as in king David's time. [A. C. H.]

**EZECHIAS** (Ἐζεκίας; *Ozias*, *Ezechias*). 1. 1 Esd. ix. 14; put for JAHAZIAH in Ezr. x. 15. 2. 2 Esd. vii. 40. [HEZEKIAH.]

**EZECHIAS** (Ἐζεκίας; *Ezechias*), 1 Esd. ix. 43; for HILKIAH in the parallel passage, Neh. viii. 4.

**EZEKIAS** (Ἐζεκίας, and so Codex B in N. T.; *Ezechias*), Eccles. xlviii. 17, 22; xlix. 4; 2 Macc. xv. 22; Matt. i. 9, 10. [HEZEKIAH.]

**EZEKIEL** (עֶזְקִיֵּאל, i. e. *Yehesekel*, for עֶזְקִיֵּאל, *God will strengthen*, or from עֶזְקִי, *the strength of God*; 'Iezekīā; *Ezechiel*), one of the four greater prophets. There have been various fancies about his name; according to Abarbanel (*Praef. in Ezech.*) it implies "one who narrates the

might of God to be displayed in the future," and some (as Villalpandus, *Præf. in Ezech.* p. x.) see a play on the word in the expressions עֲבָדֶיךָ, and עֲבָדֶיךָ (iii. 7, 8, 9), whence the groundless conjecture of Sanctius (*Prolegom. in Ezech.* p. 2, n. 2) that the name was given him subsequently to the commencement of his career (Carpov. *Introd. ad Libr. Bibl. Vet. Testam.* ii. Part. iii. ch. v.). He was the son of a priest named Buzi, respecting whom fresh conjectures have been recorded, although nothing is known about him (as Archbp. Newcome observes) beyond the fact that he must have given his son a careful and learned education. The Rabbis had a rule that every prophet in Scripture was also the son of a prophet, and hence they (as R. Dav. Kimchi in his Commentary) absurdly identify Buzi with Jeremiah, who they say was so called, because he was rejected and despised. Another tradition makes Ezekiel the servant of Jeremiah (Greg. Naz. *Or.* xlvii.), and Jerome supposes that the prophets being contemporaries during a part of their mission interchanged their prophecies, sending them respectively to Jerusalem and Chaldaea for mutual confirmation and encouragement, that the Jews might hear as it were a strophe and antistrophe of warning and promise, "velut ac si duo cantores alter ad alterius vocem sese componerent" (Calvin, *Comment. ad Ezech.* i. 2). Although it was only towards quite the close of Jeremiah's lengthened office that Ezekiel received his commission, yet these suppositions are easily accounted for by the internal harmony between the two prophets, in proof of which Hävernick (*Introd. to Ezech.*) quotes Ez. xiii. as compared with Jer. xliii. 9 sq., and Ez. xxiv. with Jer. xxviii., &c. This inner resemblance is the more striking from the otherwise wide difference of character which separates the two prophets; for the elegiac tenderness of Jeremiah is the reflex of his gentle, calm, and introspective spirit, while Ezekiel in that age when true prophecy was so rare (Ez. xii. 21; Lam. ii. 9), "comes forward with all abruptness and iron consistency. Has he to contend with a people of brazen front and unbending neck? He possesses on his own part an unbending nature, opposing the evil with an unflinching spirit of boldness, with words full of consuming fire" (Hävernick's *Introd.* translated by Rev. F. W. Gotch in *Journal of S. L.* i. 23).

Unlike his predecessor in the prophetic office, who gives us the amplest details of his personal history, Ezekiel rarely alludes to the facts of his own life, and we have to complete the imperfect picture by the colours of late and dubious tradition. We shall mention both sources of information, contenting ourselves with this general caution against the latter. He was taken captive ἐκ γῆς Σαρπῶν (Isidor. *de Vit. et Ob. Sanct.* 39; Epiphani. *de Vit. et Mort. Prophet.* ix. ap. Carpov.) in the captivity (or transmigration, as Jerome more accurately prefers to render מַלְאָכָא, i. 2) of Jehoiachin (not Jehoiachim as Josephus (*Ant.* x. 6, §3) states, probably by a slip of memory) with other distinguished exiles (2 K. xxiv. 15) eleven years before the destruction of Jerusalem. Josephus (*l. c.*) says that this removal happened when he was a boy, and although we cannot consider the assertion to be refuted by Hävernick's argument from the matured vigorous priestly character of his writings, and feel still less inclined to say that he had "undoubtedly" exercised for some considerable time the function of a priest, yet the statement is

questionable, because it is improbable (as Hävernick also points out) that Ezekiel long survived the 27th year of his exile (xxix. 17), so that if Josephus be correct he must have died very young. He was a member of a community of Jewish exiles who settled on the banks of the Chebar, a "river" or stream of Babylonia, which is sometimes taken to be the *Khabour*, but which the latest investigators suppose to be the *Nahr Malcha* or Royal canal of Nebuchadnezzar. [CHEBAR.] The actual name of the spot where he resided was עֵבֶר הַגִּבּוֹר ("acervus novarum frugum," Vulg. *μετέωρος καὶ περιήλθου* (?) LXX., "the hill of grief," Syr.) a name which Jerome, as usual, allegorises; it is thought by Michaelis to be the same as Thul-laba in D'Anville's map (Rosenmüller, *Schol. in Ezech.* iii. 15). It was by this river "in the land of the Chaldeans" that God's message first reached him (i. 3); the Chalde version however interpolates the words "in the land [of Israel: and again a second time he spake to him in the land] of the Chaldeans," because the Jews had a notion that the Shechinah could not overshadow a prophet out of the Holy Land. Hence R. Jarchi thinks that ch. xvii. was Ezekiel's first prophecy, and was uttered before the captivity, a view which he supports by the Hebrew idiom הָיָה ה' (A. V. "came expressly") in i. 3. R. Kimchi, however, makes an exception to the rule in case the prophecy was inspired in some pure and quiet spot like a river's bank (cf. Ps. cxxxvii. 1). His call took place "in the fifth year of king Jehoiachin's captivity" B.C. 595 (i. 2), "in the thirtieth year in the fourth month." The latter expression is very uncertain. Most commentators take it to mean the 30th year of his age, the recognised period for assuming full priestly functions (Num. iv. 23, 30). Origen, following this assumption, makes the prophet a type of Christ, to whom also "the heavens were opened" when he was baptised in Jordan. But, as Prædix argues, such a computation would be unusual, and would not be sufficiently important or well known as a mark of genuineness, and would require some more definite addition. The Chald. paraphrase by Jon. ben Uzziel has—"30 years after Hilkiyah the high priest had found the book of the Law in the sanctuary in the vestibule under the porch at midnight after the setting of the moon in the days of Josiah, &c., in the month Thammuz, in the fifth day of the month" (cf. 2 K. xxii.). This view is adopted by Jerome, Unshier, Hävernick, &c.; but had this been a recognised era, we should have found traces of it elsewhere, whereas even Ezekiel never refers to it again. There are similar and more forcible objections to its being the 30th year from the Jubilee, as Hitzig supposes, following many of the early commentators. It now seems generally agreed that it was the 30th year from the new era of Nabopolassar, father of Nebuchadnezzar, who began to reign B.C. 625 (Rawlinson's *Herod.* i. p. 508). The use of this *Chalde* epoch is the more appropriate as the prophet wrote in Babylonia, and he gives a Jewish chronology in ver. 2. Compare the notes of time in Dan. ii. 1, vii. 1; Ez. vii. 7; Neh. ii. 1, v. 14 (Rosenmüller, *Schol.*; Poli *Synops. in loc.*; Scaliger *de emend. Temp. Prolegom.* p. xii.). The decision of the question is the less important, because in all other places Ezekiel dates from the year of Jehoiachin's captivity (xxix. 17, xxx. 20, et passim). We learn from an incidental allusion (xxiv. 18)—the only reference which he makes to

his personal history—that he was married, and had a house (viii. 1) in his place of exile, and lost his wife by a sudden and unforeseen stroke. He lived in the highest consideration among his companions in exile, and their elders consulted him on all occasions (viii. 1, xi. 25, xiv. 1, xx. 1, &c.), because in his united offices of priest and prophet, he was a living witness to “them of the captivity” that God had not abandoned them. Vitringa even says (*de Synag. Vet.* p. 332) that “in ædibus suis ut in scholâ quâdam publicâ conventus instituebat, ibique coram frequenti concione divinam interpretabatur voluntatem oratione faciendâ” (quoted by Hävernick). There seems to be little ground for Theodoriet’s supposition that he was a Nazarite. The last date he mentions is the 27th year of the captivity (xix. 17), so that his mission extended over twenty-two years, during part of which period Daniel was probably living, and already famous (Ez. xiv. 14, xxviii. 3). Tradition ascribes various miracles to him, as, for instance, escaping from his enemies by walking dry-shod across the Chebar; feeding the famished people with a miraculous draught of fishes, &c. He is said to have been murdered in Babylon by some Jewish prince (? *ὁ ἡγούμενος τοῦ λαοῦ*, called in the Roman martyrology for vi. Id. Apr. “*judex populi*,” Carpzov. *Introd.* l. c.), whom he had convicted of idolatry; and to have been buried in a *σπηλαίον διαπλοῦν*, the tomb of Schem and Arphaxad, on the banks of the Euphrates (Epiplian. *de Vit. et Mort. Prophet.*). The tomb, said to have been built by Jeholachin, was shown a few days’ journey from Bagdad (Mémusse ben Israel *de Resur. Mort.* p. 23), and was called “habitaaculum elegantine.” A lamp was kept there continually burning, and the autograph copy of the prophecies was said to be there preserved. This tomb is mentioned by Pietro de la Valle, and fully described in the Itinerary of R. Benjamin of Tudela (Hottinger, *Theo. Phil.* II. i. 3; *Cippi Hebraici*, p. 82). A curious conjecture (discredited by Clemens Alexandrinus (*Strom.* i.), but considered not impossible by Selden (*Synagoga, de Diis Syr.* ii. p. 120), Meyer, and others) identifies him with “Nazaratus the Assyrian,” the teacher of Pythagoras. We need hardly mention the ridiculous suppositions that he is identical with Zoroaster, or with the *Ἐξέκληλος ὁ τῶν Ἰουδαίων τραγωδῶν ποιητής* (Clem. Alex. *Strom.* i.; Euseb. *Præp. Evang.* iv. 28, 29) who wrote a play on the Exodus, called *Ἐξαγωγή* (Fabricius, *Bibl. Grec.* ii. 19). This Ezekiel lived B.C. 40 (Sixt. Sen. *Bibl. Sanct.* iv. p. 235).

But, as Hävernick remarks, “by the side of the scattered data of his external life, those of his internal life appear so much the richer.” We have already noticed his stern and inflexible energy of will and character; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always visible, especially in chaps. viii.—xi., xl.—xlviii., and in *iv.* 13 sq., *xx.* 12 sq., *xxii.* 8, &c. It is strange of De Wette and Gesenius to attribute this to a “contracted spirituality,” and of Ewald to see in it “a one-sided conception of antiquity which he obtained merely from books and traditions,” and “a depression of spirit (!) enhanced by the long continuance of the banishment and bondage of the people” (Hävernick’s *Introd.*). It was surely this very intensity of patriotic loyalty to a system whose partial suspension he both pre-

dicted and survived, which cheered the exiles with the confidence of his hopes in the future, and tended to preserve their decaying nationality. Mr. F. Newman is even more contemptuous than the German critics. “The writings of Ezekiel,” he says (*Hebr. Monarchy*, p. 330, 2nd ed.), “painfully show the growth of what is merely visionary, and an increasing value of hard sacerdotalism;” and he speaks of the “heavy materialism” of Ezekiel’s temple, with its priests, sacrifices, &c., as “tedious and unedifying as Leviticus itself.” His own remark that Ezekiel’s predictions “so kept alive on the minds of the next generation a belief in certain return from captivity, as to have tended exceedingly towards the result,” is a sufficient refutation of such criticisms.

We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery (except indeed ceremonial pollution, from which he shrinks with characteristic loathing, *iv.* 14), if thereby he may give any warning or lesson to his people (*iv.*, *xxiv.* 15, 16, &c.), whom he so ardently loved (*ix.* 8, *xi.* 13). On one occasion, and on one only, the feelings of the man burst, in one single expression, through the self-devotion of the prophet; and while even then his obedience is unwavering, yet the inexpressible depth of submissive pathos in the brief words which tell how in one day “the desire of his eyes was taken from him” (*xiv.* 15-18), shows what well-springs of the tenderest human emotion were concealed under his uncompromising opposition to every form of sin.

His predictions are marvellously varied. He has instances of visions (viii.—xi.), symbolical actions (as *iv.* 8), similitudes (*xii.*, *vv.*), parables (as *xvii.*), proverbs (as *xi.* 22, *xviii.* 1 sq.), poems (as *xix.*), allegories (as *xxii.*, *xxiv.*), open prophecies (as *vi.*, *vii.*, *xx.* &c.), “tantâque ubertate et figurarum varietate floret ut unus omnes prophetici sermonis numeros ac modos explevisse, jure suo sit dicendus” (Carpzov. *Introd.* ii. pt. iii. 5). It is therefore unjust to charge him with plagiarism, as is done by Michaels and others, although no doubt his language (in which several Aramaisms and *ἄρα λεγόμενα* also occur) is coloured largely both by the Pentateuch and by the writings of Jeremiah. His style is characterised by “numberless particularisms,” as may be clearly observed by contrasting his prophecy against Tyre (*xxviii.*) with that of Isaiah (*xxiii.*) (Fairbairn’s *Ezekiel*). Grotius (in *Critici Sacri*, iv. 8) compares him to Homer for his knowledge, especially of architecture, from which he repeatedly draws his illustrations; and Witsius (*Misc. Sacr.* i. 243) says, that besides his “incomparable donum prophetiæ,” he deserves high literary reputation for the learning and beauty of his style. Michaelis on the other hand is very disparaging, and Lowth (referring to the diffuseness of his details) says “he is oftener to be classed with the orators than the poets.” Few will agree with Archbishop Newcome’s depreciation of such remarks on the ground (apparently) that even the *language* of a sacred writer is a matter of inspiration; for it is clear that inspiration in no way supercedes the individualities of the divine messenger. Ewald (*Die Proph. des Alten Bundes*, ii. 212), though not enthusiastic, admits that “simply as a writer he shows great excellencies, particularly in this dismal period,” and he points out his “evenness and repose” of style to which we suppose Jerome alludes when he says “Sermo ejus nec satis disertus nec admodum rus-

ticus, sed ex utroque genere medie temperatus" (*Præf. in Ezech.*). Hävernicks seems to us too strong in saying, that "the glow of the divine indignation, the mighty rushing of the spirit of the Lord, the holy majesty of Jehovah, as the seer beheld it, are remarkably reflected in his writings. . . The lofty action, the torrent of his eloquence. . . rests on this combination of power and consistency, the one as unwearied as the other is imposing." Among the most splendid passages are chapter i. (called by the Rabbis **פְּרָקִי**), the prophecy against Tyrus (xxvi.-xxviii.), that against Assyria, "the noblest monument of Eastern history" (xxxi.), and ch. viii., the account of what he saw in the temple-porch,

—"when, by the vision led,  
His eye surveyed the dark idolatries  
Of alienated Judah."—Milton, *Par. Lost*, i.

Certain phrases constantly recur in his writings, as "Son of Man," "They shall know that I am the Lord," "the hand of the Lord was upon me," "Set thy face against," &c.

The depth of his *matter*, and the marvellous nature of his visions, make him occasionally obscure. Hence his prophecy was placed by the Jews among the **סִפְרֵי חֵזקָה** (treasures), those portions of Scripture which (like the early part of Genesis, and the Canticles) were not allowed to be read till the age of 30 (*Jer. Ep. ad Eustoch.*; *Orig. procem. homil. iv. in Cantic.*; Hottinger, *Thes. Phil.* ii. 1, 3). Hence Jerome compares the "inevtricabilis error" of his writings to Virgil's labyrinth ("Oceanus Scripturarum, mysteriorumque Dei labyrinthus"), and also to the catacumbs. The Jews classed him in the very highest rank of prophets. Gregory Naz. (*Or.* 23) calls him **ὁ προφητῶν θαυμασιώτατος καὶ ὑψηλότατος**, and again **ὁ τῶν μεγάλων ἐποπτήης καὶ ἐξηγήτης μυστηρίων**. Isidore (*de Vit. et ob. Sanct.* 39) makes him a type of Christ from the title "Son of Man," but that is equally applied to Daniel (viii. 17). Other similar testimonies are quoted by Carpzov (*Introd.* ii. 193 sq.). The Samaritani is said to have hesitated long whether his book should form part of the canon, from the occasional obscurity, and from the supposed contradiction of xviii. 20 to Ex. xx. 5, xxiv. 7; *Jer.* xxxii. 18. But in point of fact these apparent oppositions are the mere expression of truths complementary to each other, as Moses himself might have taught them (*Deut.* xxiv. 16). Although generally speaking comments on this book were forbidden, a certain R. Numanias undertook to reconcile the supposed differences. (*Spinosa, Tract. Theol. Polit.* ii. 27, partly from these considerations, infers that the present book is made up of mere **ἀπομαμαδρία**, but his argument from its commencing with a **ו**, and from the expression in i. 3 above alluded to, hardly needs refutation.)

Of the authenticity of Ezekiel's prophecy there has been no *real* dispute, although a few rash critics (as Oeder, Vogel, and Corrodi) have raised questions about the last chapters, even suggesting that they might have been written by a Samaritan, to incite the Jews to suffer the coöperation in rebuilding the Temple. There is hardly a shadow of argument in favour of this view, and absolutely none to support the anonymous objections in the Monthly Magazine for 1798 against the genuineness of other chapters; which never would have attracted any notice had not Jahn taken the super-

fluous trouble to answer them. The specific nature of some of his predictions (xii. 12, xxvii. 6, &c.; on the former passage and its apparent contradiction to *Jer.* xxxii. 4, see *Joseph. Ant.* x. 8, §2) is also in a very unhistorical manner made a ground for impugning the authenticity of the book of Ezekiel by Zunz and others. This style of criticism is very much on the increase, and we have had some audacious instances of it lately; but though it is quite true that the prophets deal far more in eternal principles than specific announcements, yet *some* show of argument must be adduced before we settle the date of a sacred book as necessarily subsequent to an event which it *professes* to foretell.

The book is divided into two great parts—of which the destruction of Jerusalem is the turning-point; chapters i.-xxiv. contain predictions delivered before that event, and xxv.-xlviii. after it, as we see from xxvi. 2. Again, chapters i.-xxxii. are mainly occupied with correction, denunciation, and reproof, while the remainder deal chiefly in consolation and promise. A parenthetical section in the middle of the book (xxv.-xxxii.) contains a group of prophecies against *seven* foreign nations, the septenary arrangement being apparently (as elsewhere in Scripture) intentional (see an art. on this subject in the *Journal of Sac. Literature*). De Wette, Carpzov, &c. have adopted various ways of grouping the prophecies, but the best synopsis is that of Hävernicks, who divides the book into nine sections distinguished by their superscriptions, as follows:—I. Ezekiel's call, i. iii. 15. II. The general carrying out of the commission, iii. 16-vii. III. The rejection of the people, because of their idolatrous worship, viii.-xi. IV. The sins of the age rebuked in detail, xii.-xix. V. The nature of the judgment, and the guilt which caused it xx.-xxiii. VI. The meaning of the now commencing punishment, xxiv. VII. God's judgment denounced on seven heathen nations (Amon, xxv. 1-7; Moab 8-14; the Philistines, 15-17; Tyre, xxvi.-xxviii. 19; Sidon, 20-24; Egypt, xxix.-xxxii.). VIII. Prophecies, after the destruction of Jerusalem, concerning the future condition of Israel, xxxiii.-xxxix. IX. The glorious consummation, xl.-xlvi.

Chronological order is followed throughout (the date of the prediction being constantly referred to), except in the section devoted to prophecies against heathen nations (xxix.-xxxii.), where it is several times abandoned (xxix. 17; cf. xxvi. 1, xxx. 1), so that in the prediction against Egypt, one uttered in the 27th year of the captivity is inserted between two uttered in the 10th and 11th years. Hence Jahn supposes a purely "accidental" order, which Eichhorn expands into an economical arrangement of the separate scrolls on which the prophecies were written. But there is no necessity to resort to such arbitrary hypotheses. The general unity of subject in the arrangement is obvious, and Jerome (although he assumes some mystery in the violation of chronology throughout the warnings addressed to Pharaoh) correctly remarks, "in prophetis nequaquam historiarum ordo servatur; neque enim narrat præterita sed futura pronuntiat, prout voluntas Spiritus Sancti fuerit" (*Com. in Ezech.* xxix. 17, where he especially alludes the instance of Jeremiah). Rosenmüller (*Scholæ in loc.*) thinks that the *causes* of the destruction of Egypt are put together (xxix. 2-21), and then the actual nature of that predicted judgment is described.

Josephus (*Ant.* x. 6) has the following passage:—**οὐ μόνον δὲ οὗτος (Jeremiah) προεθέσται ταῦτα**

ἀλλὰ καὶ ὁ προφήτης Ἰεζεκιήλ [δὲ] πρῶτος περὶ τούτων δύο βιβλία γράψας κατέλειπεν. The undoubted meaning seems to be that *Ezekiel* (although Eichhorn on various grounds applies the word to Jeremiah) left two books of prophecy; which is also stated by Zonaras, and the Latin translation of Athanasius, where, after mentioning other lost books, and two of Ezekiel, the writer continues, "nunc vero jam unum dimittat inveniri scimus. Itaque haec omnia per imperium Iudaeorum amantem et iucuriam perisaei manifestum est" (*Synops.* p. 136, but the passage does not occur in the Greek). In confirmation of this view (which is held by Maldonatus and others) we have a passage quoted in Clem. Alex. *Pedagog.* i. 20, ἐν ᾧ εὖρω σε ἐν αὐτῷ καὶ κρινῶ σε, and again τέτοκεν καὶ οὐ τέτοκεν φθισιν ἡ γραφή (*Id. Strom.* vii. p. 756); a prophecy also mentioned, as alluding to the Virgin Mary, in Tertullian, who says "Legimus apud Ezechielem de vacca illa quae peperit et non peperit" (*De Carn. Christi*, cf. *Epiphani. Haeres.* xxx. 30. The attempt to refer it by an error of memory to Job xxi. 10, seems a failure). That these passages (quoted by Fabricius, *Cod. Pseudepigr. Vet. Test. num.* 221) can come from a lost genuine book is extremely improbable, since we know from Philo and Justin Martyr the extraordinary care with which the Jews guarded the *Λόγια ῥήματα*. They may indeed come from a lost apocryphal book, although we find no other trace of its existence (Sixtus Sen. *Bibl. Sanct.* ii. p. 61). Le Moine (*Var. Sacra*, ii. p. 332 sq.) thinks that they undoubtedly belong to the collection of traditional Jewish apophthegms called *Pirke Aboth*, or "chapters of the fathers." Just in the same way we find certain *ἑξαγράφα δόγματα* attributed to our Lord by the Fathers, and even by the Apostles (Acts xx. 35), on which see a monograph by Kuinoel. The simplest supposition about the passage in Josephus is either to assume that he is in error, or to admit a former division of Ezekiel into two books, possibly at ch. xl. Le Moine adopts the latter view, and supports it by analogous cases. There is nothing which militates against it in the fact that Josephus mentions *δύο μόνα καὶ εἰκοσι βιβλία* (c. *Apion.* i. 23) as forming the canon.

There are no direct quotations from Ezekiel in the New Testament, but in the Apocalypse there are many parallels and obvious allusions to the later chapters (xl.-xlviii.). We cannot now enter into the difficulties of these or other chapters (for which we must refer to some of the commentaries mentioned below); but we will enumerate, following Fairbairn, the four main lines of interpretation, viz., 1. The Historico-literal, adopted by Villalpandus, Grotius, Lowth, &c., who make them a prosaic description intended to preserve the memory of Solomon's temple. 2. The Historico-ideal (of Eichhorn, Dathe, &c.), which reduces them "to a sort of vague and well-meaning announcement of future good." 3. The Jewish-carnal (of Lightfoot, Hofmann, &c.), which maintains that their outline was actually adopted by the exiles. 4. The Christian-spiritual (or Messianic), followed by Luther, Calvin, Cocceius, and most modern commentators, which makes them "a grand complicated symbol of the good God had in reserve for his Church." Rosenmüller, who disapproves alike of the literalism of Grotius, and the arbitrary, ambiguous allegorising of others, remarks (*Schol.* in xxviii. 26) "Nobis quidem oleum et opus perire videntur, qui huiusmodi oracula ad certos eventus

referre student, aut poetica ornamenta ad factorum fidem explorant." Other prophecies of a general Messianic character are xxiv. 11-19, and xxxvi.-xxxix.

The chief commentators on this "most neglected of the prophets" are, among the fathers, Origen, Jerome (*Comment. in Ezech. l.* xiv.), and Theodoret; among the Jews, Rabbis Dav. Kimchi and Abarbanel; of the Reformers, Oecolampadius and Calvin; and of the Romanists, Prudus and Villalpandus (Rome, 1596). More modern commentaries are those of Murek (1731), Venema (1790), Newcome, W. Greenhill, Fairbairn, Henderson, Illversnick (*Comm. über Ezechiel*), Hitzig (*Der Prophet Ezechiel erklärt*). [JHKZEKEL.] [F. W. F.]

**E'ZEL, THE STONE** (הַנֶּחֱבֵל; ὁ ἐργάβ ἐκείνο; Alex. *ἔργον*; *lapis cui nomen est Ezel*). A well-known stone in the neighbourhood of Saul's residence, the scene of the parting of David and Jonathan when the former finally fled from the court (1 Sam. xx. 19). At the second mention of the spot (verse 41) the Hebrew text (נֶחֱבֵל הַנֶּחֱבֵל; A.V. "out of a place toward the south," literally "from close to the south"), is, in the opinion of critics, undoubtedly corrupt. The true reading is indicated by the LXX., which in both cases has *Eryab* or *Argab*—in ver. 19 for the Hebrew *Eben*, "stone," and in ver. 41 for *han-negeb*, "the south." *Eryab* is doubtless the Greek rendering of the Hebrew *Argab* = a heap of stones. The true reading of ver. 41 will therefore be as follows: "David arose from close to the stone heap,"—close to which (the same preposition, נֶחֱבֵל, A.V. "by") it had been arranged beforehand that he should remain (ver. 19). The change in 41 from הַנֶּחֱבֵל, as the text stood at the time of the LXX., to הַנֶּגֶב, as it now stands, is one which might easily take place. [G.]

**E'ZEM** (עֶזֶם; Αἰσέμ, Alex. Βοσάρμ; *Asom*), one of the towns of Simeon (1 Chr. iv. 29). In the lists of Joshua (xix. 3) the name appears in the slightly different form of AZEM (the vowel being lengthened before the pause).

**E'ZER** (עֶזֶר; Ἐζέρ; *Ezer*). 1. A son of Ephraim, who was slain by the aboriginal inhabitants of Gath, while engaged in a foray on their cattle (1 Chr. vii. 21). Ewald (*Geschichte*, i. 490) assigns this occurrence to the pre-Egyptian period. 2. A prince noticed in the book of Nehemiah (xii. 42; Ἰεζούρ, LXX.). 3. 1 Chr. iv. 4. [W. L. B.]

**EZEK'AS** (ὁ Ζεχίας, Alex. ὁ Ἐζεσίας; *Azarias*), 1 Esd. vii. 1. [AZARIAH, 7.]

**EZ'AS** (ὁ Ὀζας, Alex. Ἐζας; *Azazel*), 1 Esd. vii. 2. [AZARIAH; AZIEL.]

**E'ZIONGABER**, or . . . **GE'BER** (עִזְיוֹן גַּבֶּר; = "the giant's back-bone," *Γαίω γαβέρ*; *Asiongaber*; Num. xxxiii. 35; Deut. ii. 8: 1 K. ix. 26, xxii. 48; 2 Chr. vii. 17), the last station named for the encampment of the Israelites before they came to "the wilderness of Zin, which is Kadesh," subsequently the station of Solomon's navy, described as "besides Elath, on the shore of the Red Sea, in the land of Edom;" and where that of Jehoshaphat was afterwards "broken;"—probably destroyed on the rocks which lie in "jagged ranges on each side" (Stanley, *S. & P.* 2).

Wellsted (ii. ch. ix. p. 153) would find it in Bahab [DIZAHAB], but this could hardly be regarded as "in the land of Edom" (although possibly the rocks which Wellsted describes may have been the actual scene of the wreck), nor would it accord with Josephus (*Ant.* viii. 6, §4)\* as "not far from Elath." According to the latest map of Kiepert (in Robinson, 1856), it stands at *Ain el-Ghudyân*, about ten miles up what is now the dry bed of the Arabah, but, as he supposed, was then northern end of the gulf, which may have anciently had, like that of Suez, a further extension. This probably is the best site for it. By comparing 1 K. ix. 26, 27 with 2 Chr. viii. 17, 18, it is probable that timber was floated from Tyre to the nearest point on the Mediterranean coast, and then conveyed over land to the head of the *Gulf of Akabah*, where the ships seem to have been built; for there can hardly have been adequate forests in the neighbourhood. [WILDERNESS OF THE WANDERING.] [H. H.]

**EZ'NITE, THE** (עֲזַנִּית, *Keri* עֲזַנִּית; δ' Ἀσωνίτης). According to the statement of 2 Sam. xxi. 8, "Adino the Eznite" was another name for "Johab-Iusshebeth a Tachemonite (A.V. "the Tachmonite that sate in the seat"), chief among the captains." The passage is, however, one of the most disputed in the whole Bible, owing partly to the difficulty of the one man bearing two names so distinct without any assigned reason, and partly to the discrepancy between it and the parallel sentence in 1 Chr. xi. 11, in which for the words "Adino the Eznite" other Hebrew words are found, not very dissimilar in appearance but meaning "he shook (A.V. 'lifted up') his spear." The question naturally arises whether the words in Chronicles are an explanation by a later writer of those in Samuel, or whether they preserve the original text which in the latter has become corrupted. The form of this particular word is in the original text (the *Chetib*) *Ezno*, which has been altered to *Ezni* by the Masoret scribes (in the *Keri*) apparently to admit of some meaning being obtained from it. Jerome read it *Ezno*, and taking it to be a declension of *Etz* (= "wood") has rendered the words *quasi tenerius ligni perniculus*. The LXX. and some Hebrew MSS. (see Davidson's *Heb. Text*) add the words of Chronicles to the text of Samuel, a course followed by the A.V.

The passage has been examined at length by Kennicott (*Dissertation* 1, 71-128) and Gesenius (*Thes.* 994-995), to whom the reader must be referred for details. Their conclusion is that the reading of the Chronicles is correct. Ewald does not mention it (*Gesch.* iii. 180, *note*). [G.]

**EZ'RA** (עֶזְרָא = help; Ἐσθρας). 1. The head of one of the twenty-two courses of priests which returned from captivity with Zerubbabel and Joshua, (Neh. xii. 2). But in the somewhat parallel list of Neh. x. 2-8, the name of the same person is written עֲזַרְיָה, Azariah, as it is probably in Ezr. vii. 1.

2. A man of Judah (1 Chr. iv. 17).

3. The famous Scribe and Priest, descended from Hilkiah the high-priest in Josiah's reign, from whose younger son Azariah, sprung Seraiah, Ezra's father, quite a different person from Seraiah the high-priest (Ezr. vii. 1). All that is really known of Ezra is contained in the four last chapters of the

book of Ezra and in Neh. viii. and xii. 26. From these passages we learn that he was a learned and pious priest residing at Babylon in the time of Artaxerxes Longimanus. The origin of his influence with the king does not appear, but in the seventh year of his reign, in spite of the unfavourable report which had been sent by Rehum and Shimshai, he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinim. Of these a list, amounting to 1754, is given in Ezr. vii.; and these, also, doubtless form a part of the full list of the returned captives contained in Neh. vii., and in duplicate in Ezr. ii. The journey of Ezra and his

companions from Babylon to Jerusalem took just four months; and they brought up with them a large free-will offering of gold and silver, and silver vessels, contributed, not only by the Babylonian Jews, but by the king himself and his counsellors. These offerings were for the house of God, to beautify it, and for the purchase of bullocks, rams, and the other offerings required for the temple-service. In addition to this Ezra was empowered to draw upon the king's treasurers beyond the river for any further supplies he might require; and all priests, Levites, and other ministers of the temple were exempted from taxation. Ezra had also authority given him to appoint magistrates and judges in Judaea, with power of life and death over all offenders. This ample commission was granted him at his own request (v. 6), and it appears that his great design was to effect a religious reformation among the Palestine Jews, and to bring them back to the observation of the law of Moses, from which they had grievously declined. His first step, accordingly, was to enforce a separation from their wives upon all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction Ezra's auto-biography ends abruptly, and we hear nothing more of him till, 13 years afterwards, in the 20th of Artaxerxes, we find him again at Jerusalem with Nehemiah "the Tishathath." It is generally assumed that Ezra had continued governor till Nehemiah superseded him; but as Ezra's commission was only of a temporary nature, "to inquire concerning Judah and Jerusalem" (Ezr. vii. 14), and to carry thither "the silver and gold which the king and his counsellors had freely offered unto the God of Israel" (15), and as there is no trace whatever of his presence at Jerusalem between the 8th and the 20th of Artaxerxes, it seems probable that after he had effected the above-named reformation, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. This is in itself what one would expect, and what is borne out by the parallel case of Nehemiah, and it also accounts for the abrupt termination of Ezra's narrative, and for that relapse of the Jews into their former irregularities which is apparent in the book of Nehemiah. Such a relapse, and such a state of affairs at Jerusalem in general, could scarcely have occurred if Ezra had continued there. Whether he returned to Jerusalem with Nehemiah, or separately, does not appear certainly, but as he is not mentioned in Nehemiah's narrative till after the completion of the wall (Neh. viii. 1), it is perhaps probable that he followed the latter some months later, having, perhaps, been sent for to aid

\* Ἀσωνγάβαρος, αὐτὴ Βερσινίκη καλεῖται, οὐ πάρος Αἰλαγὴς πόλεως.

him in his work. The functions he executed under Nehemiah's government were purely of a priestly and ecclesiastical character, such as reading and interpreting the law of Moses to the people during the eight days of the Feast of Tabernacles, praying in the congregation, and assisting at the dedication of the wall, and in promoting the religious reformation so happily effected by the Tirshatha. But in such he filled the first place; being repeatedly coupled with Nehemiah the Tirshatha (viii. 9, xii. 26), while Eliashib the high-priest is not mentioned as taking any part in the reformation at all. In the sealing to the covenant described Neh. x., Ezra probably sealed under the patronymic Seraiah or Azariah (v. 2). As Ezra is not mentioned after Nehemiah's departure for Babylon in the 32nd Artaxerxes, and as everything fell into confusion during Nehemiah's absence (Neh. xiii.), it is not unlikely that Ezra may have died or returned to Babylon before that year. Josephus, who should be our next best authority after Scripture, evidently knew nothing about the time or the place of his death. He vaguely says, "he died an old man, and was buried in a magnificent manner at Jerusalem" (*Ant.* xi. 5, §5), and places his death in the high-priesthood of Joachim, and before the government of Nehemiah! But that he lived under the high-priesthood of Eliashib and the government of Nehemiah is expressly stated in Nehemiah; and there was a strong Jewish tradition that he was buried in Persia. Thus Benjamin of Tudela says of Nehar-Samorah—apparently some place on the lower Tigris, on the frontier of Persia; Zamuzza according to the Talmudists, otherwise Zamzum—"The sepulchre of Ezra the priest and scribe is in this place, where he died on his journey from Jerusalem to king Artaxerxes" (vol. i. p. 116), a tradition which certainly agrees very well with the narrative of Nehemiah. This sepulchre is shown to this day (*ib.* vol. ii., note p. 116). As regards the traditional history of Ezra, it is extremely difficult to judge what portion of it has any historical foundation. The principal works ascribed to him by the Jews, and, on the strength of their testimony, by Christians also, are:—1. The institution of the Great Synagogue, of which, the Jews say, Ezra was president, and Daniel, Haggai, Zechariah, Malachi, Zoiababel, Mordecai, Jeshua, Nehemiah, &c., were members, Simon the Just, the last survivor, living on till the time of Alexander the Great! 2. The settling the canon of Scripture, and restoring, correcting, and editing, the whole sacred volume according to the threefold arrangement of the Law, the Prophets, and the Hagiographa, with the divisions of the *Pesukim*, or verses, the vowel-points handed down by tradition from Moses, and the emendations of the *Keri*. 3. The introduction of the Chaldee character instead of the old Hebrew or Samaritan. 4. The authorship of the books of Chronicles, Ezra, Nehemiah, and, some add, Esther; and, many of the Jews say, also of the books of Ezekiel, Daniel, and the 12 prophets. 5. The establishment of synagogues. Of most of these works a full account is given in Prideaux's *Connexion*, l. 308-330 and 335-376; also in Buxtorf's *Tiberias*. References to the chief rabbinical and other authorities will be found in Winer. A compendious account of the arguments by which most of these Jewish statements are proved to be fabulous is given in Stehelin's *Rabbin. Literat.* p. 5-8; of which the chief are drawn from the silence of the sacred writers themselves, of the apocryphal books, and

of Josephus—and it might be added, of Jerome. and from the fact that they may be traced to the author of the chapter in the Mishna called *Pirke Aroth*. Here, however, it must suffice to observe that the pointed description of Ezra (vii. 6) as "a ready scribe in the law of Moses," repeated in 11, 12, 21, added to the information concerning him that "he had prepared his heart to seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments" (vii. 10), and his commission "to teach the laws of his God to such as knew them not" (25), and his great diligence in rendering the Scriptures to the people, all gives the utmost probability to the account which attributes to him a corrected edition of the Scriptures, and the circulation of many such copies. The books of Nehemiah and Malachi must indeed have been added later; possibly by Malachi's authority. Some tradition to this effect may have given rise to the Jewish fable of Malachi being the same person as Ezra. But we cannot affirm that Ezra inserted in the Canon any books that were not already acknowledged as inspired, as we have no sufficient ground for ascribing to him the prophetic character. Even the books of which he was the author may not have assumed definitely the character of SCRIPTURE till they were sanctioned by Malachi. There does not, however, seem to be sufficient ground for forming a definite opinion on the details of the subject. In like manner one can only say that the introduction of the Chaldee character, and the commencement of such stated meetings for hearing the Scriptures read as led to the regular synagogue-service, are things likely to have occurred about this time. For the question of Ezra's authorship, see CHRONICLES; also EZRA, BOOK OF. [A. C. H.]

**EZRA, BOOK OF.** The book of Ezra speaks for itself to any one who reads it with ordinary intelligence, and without any prejudice as to its nature and composition. It is manifestly a continuation of the books of Chronicles, as indeed it is called by Hilary, bishop of Poitiers, *Sermone dicunt Esdræ* (ap. Cosin's *Canon of Scr.* 51). It is naturally a fresh book, as commencing the history of the returned captives after seventy years of suspension, as it were, of the national life. But when we speak of the book as a *chronicle*, we at once declare the nature of it, which its contents also abundantly confirm. Like the two books of Chronicles, it consists of the contemporary historical journals kept from time to time by the prophets, or other authorized persons, who were eye-witnesses for the most part of what they record, and whose several narratives were afterwards strung together, and either abridged or added to, as the case required, by a later hand. That later hand, in the book of EZRA, was doubtless Ezra's own, as appears by the four last chapters, as well as by other matter inserted in the previous chapters. While therefore, in a certain sense, the whole book is Ezra's, as put together by him, yet, strictly, only the four last chapters are his original work. Nor will it be difficult to point out with tolerable certainty several of the writers of whose writings the first six chapters are composed. It has already been suggested [CHRONICLES] that the chief portion of the last chapter of 2 Chr. and Ezr. i. may probably have been written by Daniel. The evidences of this in Ezr. i. must now be given more fully. No one probably can read Daniel as a genuine book, and not be struck with the very singular circumstance that, while he tells us in

ch. ix. that he was aware that the seventy years' captivity, foretold by Jeremiah, was near its close, and was led thereby to pray earnestly for the restoration of Jerusalem, and while he records the remarkable vision in answer to his prayer, yet he takes not the slightest notice of Cyrus's decree, by which Jeremiah's prophecy was fulfilled, and his own heart's desire and prayer to God for Israel was accomplished, and which must have been the most stirring event in his long life, not even excepting the incident of the den of lions. He passes over in utter silence the first year of Cyrus, to which pointed allusion is made in Dan. i. 21, and proceeds in ch. x. to the third year of Cyrus. Such silence is utterly unaccountable. But Ezr. i. supplies the missing notice. If placed between Dan. ix. and x. it exactly fills up the gap, and records the event of the first year of Cyrus, in which Daniel was so deeply interested. And not only so, but the manner of the record is exactly Daniel's. Ezr. i. 1: "And in the first year of Cyrus K. of Persia," is the precise formula used in Dan. i. 1, ii. 1, vii. 1, viii. 1, ix. 1, x. 1, xi. 1. The designation (ver. 1, 2, 8) "Cyrus king of Persia" is that used Dan. x. 1; the reference to the prophecy of Jeremiah in ver. 1 is similar to that in Dan. ix. 2, and the natural sequence to it. The giving the text of the decree, ver. 2-4 (cf. Dan. iv.), the mention of the name of "Mithredath the treasurer," ver. 8 (cf. Dan. i. 3, 11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god, ver. 7 (cf. Dan. i. 2), the giving the Chaldean name of Zerubbabel, ver. 8, 11 (cf. Dan. i. 7), and the whole *locus stultii* of the narrator, who evidently wrote at Babylon, not at Jerusalem, are all circumstances which in a marked manner point to Daniel as the writer of Ezr. i. Nor is there the least improbability in the supposition that if Ezra edited Daniel's papers he might think the chapter in question more conveniently placed in its chronological position in the *Chronicles* than in the collection of Daniel's prophecies. It is scarcely necessary to add that several chapters of the prophets Isaiah and Jeremiah are actually found in the book of Kings, as e. g. Is. xxxvi.-xxxix. in 2 K. xviii.-xx.

Ezr. i. then was by the hand of Daniel.

As regards Ezr. ii., and as far as iii. 1, where the change of name from Sheshbazzar to Zerubbabel in ver. 2, the mention of Nehemiah the Tirshatha in ver. 2 and 63, and that of Mordecai in ver. 2, at once indicate a different and much later hand, we need not seek long to discover where it came from, because it is found in *extenso, verbatim et literatim* (with the exception of clerical errors), in the 7th ch. of Nehemiah, where it belongs beyond a shadow of doubt [NEHEMIAH, BOOK OF]. This portion then was written by Nehemiah, and was placed by Ezra, or possibly by a still later hand, in this position, as bearing upon the return from captivity related in ch. i., though chronologically out of place. Whether the extract originally extended so far as iii. 1 may be doubted. The next portion extends from iii. 2 to the end of ch. vi. With the exception of one large explanatory addition by Ezra, extending from iv. 6 to 23, which has cruelly but most needlessly perplexed commentators, this portion is the work of a writer contemporary with Zerubbabel and Jeshua, and an eye-witness of the rebuilding of the Temple in the beginning of the reign of Darius Hystaspis. The minute details given of all the circumstances, such as the weeping of the old

men who had seen the first Temple, the names of the Levites who took part in the work, of the heathen governors who hindered it, the expression (vi. 15) "This house was finished," &c., the number of the sacrifices offered at the dedication, and the whole tone of the narrative, bespeak an actor in the scenes described. Who then was so likely to record these interesting events as one of those prophets who took an active part in promoting them, and a branch of whose duty it would be to continue the national *chronicles*? That it was the prophet Haggai becomes tolerably sure when we observe further the following coincidences in style.

1. The title "the prophet," is throughout this portion of Ezra attached in a peculiar way to the name of Haggai. Thus chapter v. 1 we read "Then the prophets, Haggai the prophet, and Zechariah the son of Iddo, prophesied, &c.," and vi. 14, "They prospered through the prophesying of Haggai the prophet, and Zechariah the son of Iddo." And in like manner in Hagg. i. 1, 3, 12, ii. 1, 10, he is called "Haggai the prophet."

2. The designation of Zerubbabel and Jeshua is identical in the two writers. "Zerubbabel the son of Shealtiel, and Jeshua the son of Jozadak" (comp. Ezr. iii. 2, 8, v. 2, with Hagg. i. 1, 12, 14, ii. 2, 4, 23). It will be seen that both writers usually name them together, and in the same order: Zechariah, on the contrary, does not once name them together, and calls them simply Zerubbabel, and Jeshua. Only in vi. 11 he adds "the son of Josedech."

3. The description in Ezr. v. 1, 2 of the effect of the preaching of Haggai and Zechariah upon Zerubbabel, Jeshua, and the people, is identical with that in Hagg. i., only abbreviated. And Hagg. ii. 3 alludes to the interesting circumstance recorded in Ezr. iii. 12.

4. Both writers mark the date of the transactions they record by the year of "Darius the king" (Ezr. iv. 24, vi. 15, compared with Hagg. i. 1, 15, ii. 10, &c.).

5. Ezr. iii. 8 contains exactly the same enumeration of those that worked, viz. "Zerubbabel, Jeshua, and the remnant of their brethren," as Hagg. i. 12, 14, where we have "Zerubbabel, and Jeshua, with all the remnant of the people" (comp. too Ezr. vi. 16, and Hagg. ii. 2).

6. Both writers use the expression "the work of the house of the Lord" (Ezr. iii. 8 and 9, compared with Hagg. i. 14); and both use the phrase "the foundation of the temple was laid" (Ezr. iii. 6, 10, 11, 12, compared with Hagg. ii. 18).

7. Both writers use indifferently the expressions the "house of the Lord," and the "temple of the Lord," but the former much more frequently than the latter. Thus the writer in Ezra uses the expression "the house" (בֵּית) twenty-five times, to six in which he speaks of "the temple" (מִקְדָּשׁ). Haggai speaks of "the house" seven times, of "the temple" twice.

8. Both writers make marked and frequent reference to the law of Moses. Thus comp. Ezr. ii. 2, 6, 8, vi. 14, 16-22, with Hagg. i. 8, 10, ii. 5, 17, 11-13, &c.

Such strongly marked resemblances in the contents of two such brief portions of Scripture seem to prove that they are from the pen of the same writer.

But the above observations do not apply to Ezr. iv. 6-23, which is a parenthetical addition by a much later hand, and, as the passage most clearly shows, made in the reign of Artaxerxes Longi-

manus. The compiler who inserted chapter ii., a document drawn up in the reign of Artaxerxes, to illustrate the return of the captives under Zerubbabel, here inserts a notice of two historical facts,—of which one occurred in the reign of Xerxes, and the other in the reign of Artaxerxes—to illustrate the opposition offered by the heathen to the re-building of the temple in the reign of Cyrus and Cambyses. He tells us that in the beginning of the reign of Xerxes, i.e. before Esther was in favour, they had written to the king to prejudice him against the Jews—a circumstance, by the way, which may rather have inclined him to listen to Haman's proposition; and he gives the text of letters sent to Artaxerxes, and of Artaxerxes' answer, on the strength of which Rehum and Shimshai forcibly hindered the Jews from rebuilding the city. These letters doubtless came into Ezra's hands at Babylon, and may have led to those endeavours on his part to make the king favourable to Jerusalem which issued in his own commission in the seventh year of his reign. At ver. 24 Haggai's narrative proceeds in connexion with ver. 5. The mention of Artaxerxes in chapter vi. 14, is of the same kind. The last four chapters, beginning with chapter vii., are Ezra's own, and continue the history after a gap of fifty-eight years—from the sixth of Darius to the seventh of Artaxerxes. The only history of Judaea during this interval is what is given in the above-named parenthesis, from which we may infer that during this time there was no one in Palestine to write the Chronicles. The history of the Jews in Persia for the same period is given in the book of Esther.

The text of the book of Ezra is not in a good condition. There are a good many palpable corruptions both in the names and numerals, and perhaps in some other points. It is written partly in Hebrew, and partly in Chaldee. The Chaldee begins at iv. 8, and continues to the end of vi. 18. The letter or decree of Artaxerxes vii. 12-26, is also given in the original Chaldee. There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. T. Augustine says of Ezra "magis verum gestarum scriptor est habitus quam propheta" (*De Civ. Dei*, xviii. 36). The period covered by the book is eighty years, from the first of Cyrus B.C. 536 to the beginning of the eighth of Artaxerxes B.C. 456. It embraces the governments of Zerubbabel and Ezra, the high-priesthood of Jeshua, Joiakim, and the early part of Elniabib; and the reigns of Cyrus, Cambyses, Smerdis, Darius Hystaspis, Xerxes, and part of Artaxerxes. Of these Cambyses and Smerdis are not named. Xerxes is barely named iv. 6. [ESDRAS, FIRST BOOK OF.] [A. C. H.]

**EZRAHITE**, THE (עֲזָרָה; *δ Ζαφίτης*, Alex. *Ἐζραήτης*; *Ezrahita*), a title attached to two persons—Ethan (1 K. iv. 31; Ps. lxxxix. title) and Heman (Ps. lxxxviii. title). The word is naturally derivable from Ezra, or—which is almost the same in Hebrew—Zerah, זֶרַח; and accordingly in 1 Chr. ii. 6, Ethan and Heman are both given as sons of Zerah the son of Judah. Another Ethan and another Heman are named as Levites and musicians in the lists of 1 Chr. vi. and elsewhere.

**EZRI** (עֲזִיר; *Ἐσδρῆ*, Alex. *Ἐζρά*; *Ezri*), son of Chelub, superintendent for King David of those "who did the work of the field for tillage of the ground" (1 Chr. xxvii. 26).

## F

**FABLE** (*μῦθος*; *fabula*). Taking the words fable and parable, not in their strict etymological meaning, but in that which has been stamped upon them by current usage, looking, i. e. at the Aesopic fable as the type of the one, at the Parables of the N. T. as the type of the other, we have to ask (1.) in what relation they stand to each other, as instruments of moral teaching; (2.) what use is made in the Bible of this or of that form? That they have much in common is, of course, obvious enough. In both we find "statements of facts, which do not even pretend to be historical, used as vehicles for the exhibition of a general truth" (Neander, *Loben Jesu*, p. 68). Both differ from the Mythos, in the modern sense of that word, in being the result of a deliberate choice of such a mode of teaching, not the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus. What are the characteristic marks by which one differs from the other, it is perhaps easier to feel than to define. Thus we have (comp. Trench *On Parables*, p. 2) (1.) Lessing's statement that the fable takes the form of an actual narrative, while the Parable assumes only that what is related might have happened; (2.) Herder's, that the difference lies in the fable's dealing with brute or inanimate nature, in the parable's drawing its materials exclusively from human life; (3.) Olshausen's (on Matt. xiii. 1), followed by Trench (*l.c.*), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the following extract from Neander (*l.c.*):—"The parable is distinguished from the fable by this, that, in the latter, qualities, or acts of a higher class of beings may be attributed to a lower (e.g. those of men to brutes); while in the former, the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. . . . The mere introduction of brutes as personal agents, in the fable, is not sufficient to distinguish it from the parable which may make use of the same contrivance; as, for example, Christ employs the sheep in one of his parables. The great distinction here, also, lies in what has already been remarked; brutes introduced in the parable act according to the law of their nature, and the two spheres of nature and of the kingdom of God are carefully separated from each other. Hence the reciprocal relations of brutes to each other are not made use of, as these could furnish no appropriate image of the relation between man and the kingdom of God."

Of the fable, as thus distinguished from the Parable, we have but two examples in the Bible, (1.) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix. 8-15; (2.) that of the cedar of Lebanon and the thistle, as the answer of Jehoash to the challenge of Amaziah (2 K. xiv. 9). The narrative of Ezek. xvii. 1-10, though, in common with the fable, it brings before us the lower forms of creation as representatives of human characters and destinies, differs from it, in the points above noticed, (1.) in not introducing

them as having human attributes, (2.) in the higher prophetic character of the truths conveyed by it. The great eagle, the cedar of Lebanon, the sprawling vine, are not grouped together as the agents in a fable, but are simply, like the bear, the leopard, and the lion in the visions of Daniel, symbols of the great monarchies of the world.

In the two instances referred to, the fable has more the character of the Greek *alvos* (Quintil. *Inst. Orat.* v. 11) than of the *μῦθος*; that is, is less the fruit of a vivid imagination, sporting with the analogies between the worlds of nature and of men, than a covert reproach, making the sarcasm which it alludes to hide all the sharper (Müller and Donaldson, *Hist. of Greek Literature*, vol. i. c. xi.). The appearance of the fable thus early in the history of Israel, and its entire absence from the direct teaching both of the O. and N. T. are, each of them in its way, significant. Taking the received chronology, the fable of Jotham was spoken about 1209 B.C. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The earliest Greek *alvos* is that of Hesiod (*Op. et D.* v. 202), and the prose form of the fable does not meet us till we come (about 550 B.C.) to Stesichorus and Aesop. The first example in the history of Rome is the apologue of Menenius Agrippa B.C. 494, and its genuineness has been questioned on the ground that the fable could hardly at that time have found its way to Latium (Müller and Donaldson, *l. c.*). It may be noticed too that when collections of fables became familiar to the Greeks they were looked on as imported, not indigenous. The traditions that surround the name of Aesop, the absence of any evidence that he wrote fables, the traces of Eastern origin in those ascribed to him, leave him little more than the representative of a period when the forms of teaching, which had long been familiar to the more Eastern nations, were travelling westward, and were adopted eagerly by the Greeks. The collections themselves are described by titles that indicate a foreign origin. They are Libyan (Arist. *Rhet.* ii. 20), Cyprian, Cilician. All these facts lend to the conclusion that the Hebrew mind, gifted, as it was, in a special measure, with the power of perceiving analogies in things apparently dissimilar, attained, at a very early stage of its growth, the power which does not appear in the history of other nations till a later period. Whatever antiquity may be ascribed to the fables in the comparatively later collection of the Pancha Tantra, the land of Canaan is, so far as we have any data to conclude from, the fatherland of fable. To conceive brutes, or inanimate objects as representing human characteristics, to personify them as acting, speaking, reasoning, to draw lessons from them applicable to human life, —this must have been common among the Israelites in the time of the Judges. The part assigned in the earliest records of the Bible to the impressions made by the brute creation on the mind of man when "the Lord God formed every beast of the field and every fowl of the air, and brought them unto Adam to see what he would call them" (Gen. ii. 19), and the apparent symbolism of the serpent in the narrative of the Fall (Gen. iii. 1) are at once indications of teaching adapted to men in the possession of this power, and must have helped to develop it (Herder, *Geist der Ebräischen Poesie*, *Werke*, xxiv. p. 16, ed. 1826). The large number of proverbs in which analogies of this kind are made the bases of a moral precept, and

some of which (e. g. Prov. xxvi. 11, xxx. 15, 25-28) are of the nature of condensed fables, show that there was no decline of this power as the intellect of the people advanced. The absence of fables accordingly from the teaching of the O. T. must be ascribed to their want of fitness to be the media of the truths which that teaching was to convey. The points in which brutes or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indolence, cunning, and the like, and the lessons derived from them accordingly do not rise higher than the prudential morality which aims at repressing such defects (comp. Trench on the *Parables*, l. c.). Hence the fable, apart from the associations of a grotesque and ludicrous nature which gather round it, apart too from its presenting narratives, which are "nec verae nec verisimiles" (Cic. *de Invent.* i. 19), is inadequate as the exponent of the higher truths which belong to man's spiritual life. It may serve to exhibit the relations between man and man; it fails to represent those between man and God. To do that is the office of the PARABLE, finding its outward framework in the dealings of men with each other, or in the world of nature as it is, not in any grotesque parody of nature, and exhibiting, in either case, real and not fanciful analogies. The Fable seizes on that which man has in common with the creatures below him; the Parable rests on the truths that man is made in the image of God, and that "all things are double one against another."

It is noticeable, as confirming this view of the office of the fable, that, though those of Aesop (so called) were known to the great preacher of righteousness at Athens, though a metrical paraphrase of some of them was among the employments of his imprisonment (Plato, *Phaedon*, pp. 60, 61), they were not employed by him as illustrations, or channels of instruction. While Socrates shows an appreciation of the power of such fables to represent some of the phenomena of human life, he was not, he says, in this sense of the word, *μυθολογικός*. The myths, which appear in the *Gorgias*, the *Phaedrus*, the *Phaedon*, the *Republic*, are as unlike as possible to the Aesopic fables, are (to take his own account of them) *οὐ μῦθοι ἄλλα λόγοι*, true, though figurative, representations of spiritual realities, while the illustrations from the common facts of life which were so conspicuous in his ordinary teaching, though differing in being comparisons rather than narratives, come nearer to the parables of the Bible (comp. the contrast between τὰ *Σωκρατικά*, as examples of the *παραβολή* and the *λόγοι Αἰσώπειοι*; Arist. *Rhet.* ii. 20). It may be said indeed that the use of the Fable as an instrument of teaching (apart from the embellishments of wit and fancy with which it is associated by such writers as Lessing and La Fontaine) belongs rather to childhood, and the child-like period of national life, than to a more advanced development. In the earlier stages of political change, as in the cases of Jotham, Stesichorus (Arist. *Rhet.* l. c.), Menenius Agrippa, it is used as an element of persuasion or reproach. It ceases to appear in the higher eloquence of orators and statesmen. The special excellence of fables is that they are *δημηγορικὸν* (Arist. *Rhet.* l. c.); that "ducere animos solent, præcipue rusticorum et imperitorum" (Quint. *Inst. Orat.* l. c.).

The *μῦθοι* of false teachers claiming to belong to the Christian church, alluded to by writers of the

N. T. in connexion with *γενεαλογίας ἀπέραντοι* (1 Tim. i. 4), or with epithets *Ἰουδαῖοι* (Tit. i. 14), *ἡρώδεις* (1 Tim. iv. 7), *σεσφοισμένοι* (2 Pet. i. 16), do not appear to have had the character of fables, properly so called. As applied to them, the word takes its general meaning of anything false or unreal, and it does not fall within the scope of the present article to discuss the nature of the falsehoods so referred to. [E. H. P.]

**FAIR HAVENS** (*Καλὸι Λιμένες*), a harbour in the island of CRETE (Acts xxvii. 8), not mentioned in any other ancient writing. There seems no probability that it is, as Biscoe suggested (*on the Acts*, p. 347, ed. 1829), the *Καλὴ Ἀκτὴ* of Steph. Byz.—for that is said to be a city, whereas Fair Havens is described as “a place near to which was a city called Lasaea” (*τόπος τις ὅ ἐγγὺς ᾗ πόλις Ἀ.*). Moreover Mr. Pashley found (*Travels in Crete*, vol. ii. p. 57) a district called *Acte*; and it is most likely that *Καλὴ Ἀκτὴ* was situated there; but that district is in the W. of the island, whereas Fair Havens was on the S. Its position is now quite certain. Though not mentioned by classical writers, it is still known by its old Greek name, as it was in the time of Pococke, and other early travellers mentioned by Mr. Smith (*Voy. and Shipp. of St. Paul*, 2nd ed. pp. 80-82). LASAEA too has recently been most explicitly discovered. In fact Fair Havens appears to have been practically its harbour. These places are situated four or five miles to the E. of Cape Matala, which is the most conspicuous headland on the S. coast of Crete, and immediately to the W. of which the coast trends suddenly to the N. This last circumstance explains why the ship which conveyed St. Paul was brought to anchor in Fair Havens. In consequence of violent and continuing N. W. winds she had been unable to hold on her course towards Italy from Cnidus (v. 7), and had run down, by Salmone, under the lee of Crete. It was possible to reach Fair Havens: but beyond Cape Matala the difficulty would have recurred, so long as the wind remained in the same quarter. A considerable delay took place (v. 9) during which it is possible that St. Paul may have had opportunities of preaching the Gospel at Lasaea, or even at GORTYNA, where Jews resided (1 Macc. xv. 23), and which was not far distant; but all this is conjectural. A consultation took place, at which it was decided, against the Apostle's advice, to make an attempt to reach a good harbour named PHENICE, their present anchorage being *ἀνευθέτος πρὸς παραχειμασίαν* (v. 12). All such terms are comparative; and there is no doubt that, as a safe winter harbour, Fair Havens is infinitely inferior to Phenice; though perhaps even as a matter of seamanship St. Paul's advice was not bad. However this may be, the south wind, which sprang up afterwards (v. 13), proved delusive; and the vessel was caught by a hurricane [*ΕΥΡΟΚΛΥΔΟΝ*] on her way towards Phenice, and ultimately wrecked. Besides a view (p. 81) Mr. Smith gives a chart of Fair Havens with the soundings (p. 257), from which any one can form a judgment for himself of the merits of the harbour. [J. S. H.]

**FAIRS** (*ἐπιβόησις*; *ἀγορά*; *nundinae*, *forum*), a word which occurs only in Ez. xxvii. and there no less than seven times (ver. 12, 14, 16, 19, 22, 27, 33); in the last of these verses it is rendered “wares,” and this we believe to be the true meaning of the word throughout. It will be ob-

served that the word stands in some sort of relation to *מַרְכָּא* throughout the whole of the chapter, the latter word also occurring seven times, and translated sometimes “market” (ver. 13, 17, 19), and elsewhere “merchandise” (ver. 9, 27, 33, 34). The words are used alternately, and represent the alternations of commercial business in which the merchants of Tyre were engaged. That the first of these words cannot signify “fairs” is evident from ver. 12; for the inhabitants of Tarshish did not visit Tyre, but *vice versa*. Let the reader substitute “paid” or “exchanged for thy wares,” for “occupied in thy fairs,” and the sense is much improved. The relation which this term bears to *μαραβ*, which properly means *barter*, appears to be pretty much the same as exists between exports and imports. The requirements of the Tyrians themselves, such as slaves (13), wheat (17), steel (19), were a matter of *μαραβ*; but where the business consisted in the exchange of Tyrian wares for foreign productions, it is specified in this form, “Tarshish paid for thy wares with silver, iron, tin, and lead.” The use of the terms would probably have been more intelligible if the prophet had mentioned what the Tyrians gave in exchange: as it is, he only notices the one side of the bargain, viz., what the Tyrians received, whether they were buyers or sellers. [W. L. B.]

**FALLOW-DEER** (*חֲמִיר*; *βούβαλος*; *bulbus*), mentioned among the beasts that may be eaten, in Deut. xiv. 5, and among the provisions for Solomon's table in 1 K. iv. 23. An animal of the deer tribe (probably *Cervus dama*), of a reddish colour (from *חֲמִיר*, *to be red*), shedding its hoofs every year. The *Cervus dama* is found wild in Barbary, and is still very generally spread over Western and Southern Asia (Boch. *Hieroz.* p. 910 sq., ii. 260 sq.). The female is called in the Talmud *חֲמִירָה*, and is identified by Lewysohn with the German *Damhirsch*. [W. L.]

**FAMINE.** When the sweet influences of the Pleiades are bound, and the bands of Scorpio cannot be loosed,\* then it is that famines generally prevail in the lands of the Bible. In Egypt a deficiency in the rise of the Nile, with drying winds, produces the same results. The famines recorded in the Bible are traceable to both these phenomena; and we generally find that Egypt was resorted to when scarcity afflicted Palestine. This is notably the case in the first three famines, those of Abiham, of Isaac, and of Jacob, although in the last case Egypt was involved in the calamity, and only saved from its horrors by the providential policy of Joseph. In this instance, too, the famine was widespread, and Palestine further suffered from the restriction which must have been placed on the supplies usually derived, in such circumstances, from Egypt.

In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the watersheds having few large springs, and the small rivers not being sufficient for the irrigation of even

\* That is to say, when the best and most fertilising of the rains, which fall when the Pleiades set at dawn (not exactly heliacally) at the end of autumn, fall rain scarcely ever falling at the opposite season, when Scorpio sets at dawn. *כִּסְלִי* is clearly Scorpio, or Cor Scorpionis, as Aben Ezra says.

the level lands. If therefore the heavy rains of November and December fail, the sustenance of the people is cut off in the parching drought of harvest-time, when the country is almost devoid of moisture. Further, the pastoral tribes rely on the scanty herbage of the desert-plains and valleys for their flocks and herds; for the desert is interspersed in spring-time with spontaneous vegetation, which is the product of the preceding rain-fall, and fails almost totally without it. It is therefore not difficult to conceive the frequent occurrence and severity of famines in ancient times, when the scattered population, rather of a pastoral than an agricultural country, was dependent on natural phenomena which, however regular in their season, occasionally failed, and with them the sustenance of man and beast.

Egypt, again, owes all its fertility—a fertility that gained for it the striking comparison to the “garden of the Lord”—to its mighty river, whose annual rise inundates nearly the whole land and renders its cultivation an easy certainty. But this very bounty of nature has not unfrequently exposed the country to the opposite extreme of drought. With scarcely any rain, and that only on the Mediterranean coast, and with wells only supplied by filtration from the river through a nitrous soil, a failure in the rise of the Nile almost certainly entails a degree of scarcity, although if followed by cool weather, and if only the occurrence of a single year, the labour of the people may in a great measure avert the calamity. The causes of death and famine in Egypt are occasioned by defective inundation, preceded and accompanied and followed by prevalent easterly and southerly winds. Both these winds dry up the earth, and the latter, keeping back the rain-clouds from the north, are perhaps the chief cause of the defective inundation, as they are also by their accelerating the current of the river—the northerly winds producing the contrary effects. Famines in Egypt and Palestine seem to be affected by drought extending from northern Syria, through the meridian of Egypt, as far as the highlands of Abyssinia.

The first famine recorded in the Bible is that of Abraham after he had pitched his tent on the east of Bethel: “And there was a famine in the land: and Abram went down into Egypt to sojourn there, for the famine was grievous in the land” (Gen. xii. 10). We may conclude that this famine was extensive, although this is not quite proved by the fact of Abraham’s going to Egypt; for on the occasion of the second famine, in the days of Isaac, this patriarch found refuge with Abimelech king of the Philistines in Gerar, and was warned by God not to go down into Egypt, whither therefore we may suppose he was journeying (Gen. xxvi. 1 *sq.*). We hear no more of times of scarcity until the great famine of Egypt which “was over all the face of the earth;” “and all countries came into Egypt to Joseph to buy [corn], because that the famine was [so] sore in all lands” (Gen. xli. 56, 57). “And the sons of Israel came to buy [corn] among those that came; for the famine was in the land of Canaan” (xlii. 5). Thus, in the third generation, Jacob is afflicted by the famine, and sends from Hebron to Egypt when he hears that there is corn there; and it is added in a later passage, on the occasion of his sending the second time for corn to Egypt, “and the famine was sore in the land,” *i. e.* Hebron.

The famine of Joseph is discussed in art. EGYPT, so far as Joseph’s history and policy is concerned

It is only necessary here to consider its physical characteristics. We have mentioned the chief causes of famines in Egypt: this instance differs in the providential recurrence of seven years of plenty, whereby Joseph was enabled to provide against the coming dearth, and to supply not only the population of Egypt with corn, but those of the surrounding countries: “And the seven years of plenteousness, that were in the land of Egypt, were ended. And the seven years of dearth began to come, according as Joseph had said: and the dearth was in all lands; but in all the land of Egypt there was bread. And when all the land of Egypt was famished, the people cried to Pharaoh for bread; and Pharaoh said unto all the Egyptians, Go unto Joseph, and what he saith to you, do. And the famine was over all the face of the earth: and Joseph opened all the storehouses, and sold unto the Egyptians; and the famine waxed sore in the land of Egypt. And all countries came into Egypt to Joseph for to buy [corn], because that the famine was [so] sore in all lands” (Gen. xli. 53-57).

The modern history of Egypt throws some curious light on these ancient records of famines; and instances of their recurrence may be cited to assist us in understanding their course and extent. They have not been of very rare occurrence since the Mohammedan conquest, according to the testimony of Arab historians: one of great severity, following a deficient rise of the Nile, in the year of the Flight 597 (A.D. 1200), is recorded by ‘Abd-el-Lateef, who was an eye-witness, and is regarded justly as a trustworthy authority. He gives a most interesting account of its horrors, states that the people throughout the country were driven to the last extremities, eating oil, and even their own dead, and mentions, as an instance of the dire straits to which they were driven, that persons who were burnt alive for eating human flesh were themselves, thus ready roasted, eaten by others. Multitudes fled the country, only to perish in the desert-road to Palestine.

But the most remarkable famine was that of the reign of the Fatimee Khaleefeh, El-Mustansir bilah, which is the only instance on record of one of seven years’ duration in Egypt since the time of Joseph (A.H. 457-464, A.D. 1064-1071). This famine exceeded in severity all others of modern times, and was aggravated by the anarchy which then ravaged the country. Vehement drought and pestilence (says Es-Suyootee, in his *Isos el Mohaddarah*, MS.) continued for seven consecutive years, so that they [the people] ate corpses, and animals that died of themselves; the cattle perished; a dog was sold for 5 denars, and a cat for 3 denars. . . . and an ardebb (about 5 bushels) of wheat for 100 denars, and then it failed altogether. He adds, that all the horses of the Khaleefeh, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organised bands of kidnappers who infested Cairo and caught passengers in the streets by ropes furnished with hooks and let down from the houses. This account is confirmed by El Makreezee (in his *A’hat*),<sup>b</sup> from whom we further learn that the family, and even the women of the Khaleefeh fled, by the way of Syria, on foot, to escape the peril

<sup>b</sup> Since writing the above, we find that Quatremère has given a translation of El-Makreezee’s account of this famine, in the life of El-Mustansir, contained in his *Mémoires Géographiques et Historiques sur l’Égypte*.

that threatened all ranks of the population. The whole narrative is worthy of attention, since it contains a parallel to the duration of the famine of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 K. viii. 1, 2, affords another instance of one of seven years: "Then spake Elisha unto the woman whose son he had restored to life, saying, Arise, and go thou and thy household, and sojourn wheresoever thou canst sojourn: for the Lord hath called for a famine; and it shall also come upon the land seven years. And the woman arose, and did after the saying of the man of God: and she went with her household and sojourned in the land of the Philistines seven years." Bunce (*Egypt's Placc*, &c., ii. 334) quotes the record of a famine in the reign of Sesertesen I., which he supposes to be that of Joseph; but it must be observed that the instance in point is expressly stated not to have extended over the whole land, and is at least equally likely, apart from chronological reasons, to have been that of Abraham.

In Arabia, famines are of frequent occurrence. The Arabs, in such cases, when they could not afford to slaughter their camels, used to bleed them, and drink the blood, or mix it with the shorn fur, making a kind of black-pudding. They ate also various plants and grains, which at other times were not used as articles of food. And the tribe of Haneefeh were taunted with having in a famine eaten their god, which consisted of a dish of dates mashed up with clarified butter and a preparation of dried curds of milk (*Sihah*, MS., art. **تبع**). [E. S. P.]

**FARTHING.** Two names of coins in the N. T. are rendered in the A. V. by this word.

1. **κοδράντης**, *quadrans* (Matt. v. 26; Mark xii. 42), a coin current in Palestine in the time of Our Lord. It was equivalent to two lepta (**λεπτά δύο**, *ἡ ἑστὶν κοδράντης*, Mark, l. c.). The name *quadrans* was originally given to the quarter of the Roman as, or piece of three unciae, therefore also called *truncus*. The **λεπτόν** was originally a very small Greek copper coin, seven of which with the Athenians went to the **χαλκοῦς**. The copper currency of Palestine in the reign of Tiberius was partly of Roman coins, partly of Græco-Roman (technically, *Greek Imperial*). In the former class there was no common piece smaller than the as, equivalent to the **ἀσάριον** of the N. T. (*infra*), but in the latter, there were two common smaller pieces, the one apparently the quarter of the **ἀσάριον**, and the other its eighth, though the irregularity with which they were struck makes it difficult to pronounce with certainty: the former piece was doubtless called the **κοδράντης**, and the latter the **λεπτόν**.

2. **ἀσάριον** (Matt. x. 29; Luke xii. 6), properly a small *as*, *assarium*, but in the time of Our Lord used as the Gr. equivalent of the Lat. *as*. The Vulg. in Matt. x. 29 renders it by *as*, and in Luke xii. 6, puts *dipondius* for two assaria, the *dipondius* or *dipondius* being equal to two asses. The **ἀσάριον** is therefore either the Roman *as*, or the more common equivalent in Palestine in the Græco-Roman series, or perhaps both; the last supposition we are inclined to think the most likely. The rendering of the Vulg. in Luke xii. 6 makes it probable that a single coin is intended by two assaria, and this opinion is strengthened by the occurrence, on coins

of Chios, struck during the imperial period, but without the heads of emperors, and therefore of the *Greek autonomous* class, of the words **ACCAPION** **ACCAPIA ΔΤΟ**, **ACCAPIA ΤΡΙΑ**. [R. S. P.]

**FASTS.** The word **נִסְיָה**, *nesiyah*, *jejunium*, is not found in the Pentateuch, but it often occurs in the historical books and the Prophets (2 Sam. xii. 16; 1 K. xxi. 9-12; Ezr. viii. 21; Ps. lxi. 10; Is. lviii. 5; Joel i. 14, ii. 15; Zech. viii. 19, &c.). In the Law, the only term used to denote the religious observance of fasting is the more significant one, **שָׁמַר נֶפֶשׁ**; *tapeinoun tēn psuchēn*; *affligere animam*; "afflicting the soul" (Lev. xvi. 29-31, xxiii. 27; Num. xxx. 13). The word **עָנָה**, i. e. *affliction*, which occurs Ezr. ix. 5 where it is rendered in A. V. "heaviness," is commonly used to denote fasting in the Talmud, and is the title of one of its treatises.

I. One fast only was appointed by the law, that on the day of Atonement. [ATONEMENT, DAY OF.] There is no mention of any other periodical fast in the O. T., except in Zech. vii. 1-7, viii. 19. From these passages it appears that the Jews, during their captivity, observed four annual fasts in the fourth, fifth, seventh, and tenth months. When the building of the second temple had commenced, those who remained in Babylon sent a message to the priests at Jerusalem to inquire whether the observance of the fast in the fifth month should not be discontinued. The prophet takes the occasion to rebuke the Jews for the spirit in which they had observed the fast of the seventh month as well as that of the fifth (vii. 5-6); and afterwards (viii. 19), giving the subject an evangelical turn, he declares that the whole of the four fasts shall be turned to "joy and gladness, and cheerful feasts." Zechariah simply distinguishes the fasts by the months in which they were observed; but the Mishna (*Tamith*, iv. 6) and S. Jerome (in *Zechariam* viii.) give statements of certain historical events which they were intended to commemorate:—

The fast of the fourth month.—The breaking of the tables of the law by Moses (Ex. xxxii.), and the storming of Jerusalem by Nebuchadnezzar (Jer. lii.).

The fast of the fifth month.—The return of the spies, &c. (Num. xiii., xiv.), the temple burnt by Nebuchadnezzar, and again by Titus; and the ploughing up of the site of the temple, with the capture of Bethel, in which a vast number of Jews from Jerusalem had taken refuge in the time of Hadrian.

The fast of the seventh month.—The complete sack of Jerusalem by Nebuchadnezzar and the death of Gedaliah (2 K. xxv.).

The fast of the tenth month.—The receiving by Ezekiel and the other captives in Babylon of the news of the destruction of Jerusalem.

Some other events mentioned in the Mishna are omitted as unimportant. Of those here stated several could have had nothing to do with the fasts in the time of the prophet. It would seem most probable, from the mode in which he has grouped them together, that the original purpose of all four was to commemorate the circumstances connected with the commencement of the captivity, and that the other events were subsequently associated with them on the ground of some real or fancied coincidence of the time of occurrence. As regards the fast of the fifth month, at least, it can hardly be doubted that the captive Jews applied it exclusively to the destruction of the temple, and that S. Jerome

was right in regarding as the reason of their request to be released from its observance, the fact that it had no longer any purpose after the new temple was begun. As this fast (as well as the three others) is still retained in the Jewish Calendar, we must infer either that the priests did not agree with the Babylonian Jews, or that the fast having been discontinued for a time, was renewed after the destruction of the temple by Titus.

The number of annual fasts in the present Jewish Calendar has been multiplied to twenty-eight, a list of which is given by Reimund (*Antiq.* p. 274).

If. Public fasts were occasionally proclaimed to express national humiliation on account of sin or misfortune, and to supplicate divine favour in regard to some great undertaking or threatened danger. In the case of public danger, the proclamation appears to have been accompanied with the blowing of trumpets (Joel ii. 1-15; cf. *Taanith*, i. 6). The following instances are recorded of strictly national fasts:—Samuel gathered “all Israel” to Mizpeh and proclaimed a fast, performing at the same time what seems to have been a rite symbolical of purification, when the people confessed their sin in having worshipped Baalim and Ashtaroth (1 Sam. vii. 6); Jehoshaphat appointed one “throughout all Judah” when he was preparing for war against Moab and Ammon (2 Chr. xx. 3); in the reign of Jehoiakim, one was proclaimed for “all the people in Jerusalem and all who came thither out of the cities of Judah,” when the prophecy of Jeremiah was publicly read by Baruch (Jer. xxxvi. 6-10; cf. Baruch i. 5); three days after the feast of Tabernacles, when the second temple was completed, “the children of Israel assembled with fasting and with sackclothes and earth upon them” to hear the law read, and to confess their sins (Neh. ix. 1). There are references to general fasts in the Prophets (Joel i. 14, ii. 15; Is. lviii.), and two are noticed in the books of the Maccabees (1 Macc. iii. 46-47; 2 Macc. xiii. 10-12).

There are a considerable number of instances of cities and bodies of men observing fasts on occasions in which they were especially concerned. In the days of Phinehas, the grandson of Aaron, when the men of Judah had been defeated by those of Benjamin, they fasted in making preparation for another battle (Judg. xx. 26). David and his men fasted for a day on account of the death of Saul (2 Sam. i. 12), and the men of Jabesh Gilead fasted seven days on Saul’s burial (1 Sam. xxxi. 13). Jezebel, in the name of Ahab, appointed a fast for the inhabitants of Jezreel, to render more stinking, as it would seem, the punishment about to be inflicted on Naboth (1 K. xxi. 9-12). Ezra proclaimed a fast for his companions at the river of Ahava, when he was seeking for God’s help and guidance in the work he was about to undertake (Ezr. viii. 21-23). Esther, when she was going to intercede with Ahasuerus, commanded the Jews of Shushan neither to eat nor drink for three days (Esth. iv. 16).

Public fasts expressly on account of unseasonable weather and of famine, may perhaps be traced in the first and second chapters of Joel. In later times, they assumed great importance and form the main subject of the treatise *Taanith* in the Mishna.

III. Private occasional fasts are recognised in one passage of the law (Num. xxx. 13). The instances given of individuals fasting under the influence of grief, vexation, or anxiety, are numerous

(1 Sam. i. 7, xx. 34; 2 Sam. iii. 35, xii. 16; 1 K. xxi. 27; Ezr. x. 6; Neh. i. 4; Dan. x. 3). The fasts of forty days of Moses (Ex. xxiv. 18, xxiv. 28; Deut. ix. 18) and of Elijah (1 K. xiv. 8) are, of course, to be regarded as special acts of spiritual discipline, faint though wonderful shadows of that fast in the wilderness of Judaea, in which all true fasting finds its meaning.

IV. In the N. T. the only references to the Jewish fasts are the mention of “the Fast,” in Acts xvii. 9 (generally understood to denote the Day of Atonement), and the allusions to the weekly fasts (Matt. ix. 14; Mark ii. 18; Luke v. 33, xviii. 12; Acts x. 30). These fasts originated some time after the captivity. They were observed on the second and fifth days of the week, which being appointed as the days for public fasts (*Taanith*, ii. 9), seem to have been selected for these private voluntary fasts. The Gemara states that they were chosen because Moses went up Mount Sinai on the fifth day, and came down on the second. All that can be known on the subject appears to be given by Grotius, Lightfoot, and Schoettgen on Luc. xviii. 12; and Lightfoot on Matt. ix. 14.

A time of fasting for believers in Christ is foretold Matt. ix. 15, and a caution on the subject is given Matt. vi. 16-18. Fasting and prayer are spoken of as the great sources of spiritual strength, Matt. xvii. 21; Mark ix. 29; 1 Cor. vii. 5; and they are especially connected with ordination, Acts xiii. 3, xiv. 23.

V. The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv. 16, &c.). On other occasions, there appears to have been only a restriction to a very plain diet (Dan. x. 3). Rules are given in the Talmud (both in Joma and *Taanith*) as to the mode in which fasting is to be observed on particular occasions. The fast of the day according to Josephus was considered to terminate at sun-set, and St. Jerome speaks of the fasting Jew as anxiously waiting for the rising of the stars. Fasts were not observed on the Sabbaths, the new moons, the great festivals, or the feasts of Purim and Dedication (Jud. viii. 6; *Taanith*, ii. 10).

Those who fasted, frequently dressed in sackcloth or rent their clothes, put ashes on their head and went barefoot (1 K. xxi. 27; cf. Joseph. *Ant.* viii. 13, §8; Neh. ix. 1; Ps. xxxv. 13). The rabbinical directions for the ceremonies to be observed in public fasts, and the prayers to be used in them, may be seen in *Taanith*, ii. 1-4.

VI. The sacrifice of the personal will, which gives to fasting all its value, is expressed in the old term used in the law, *afflicting the soul*. The faithful son of Israel realised the blessing of “chastening his soul with fasting” (Ps. lix. 10). But the frequent admonitions and stern denunciations of the prophets may show us how prone the Jews were in their formal fasts, to lose the idea of a spiritual discipline, and to regard them as being in themselves a means of winning favour from God, or, in a still worse spirit, to make a parade of them in order to appear religious before men (Is. lviii. 3; Zech. vii. 5, 6; Mal. iii. 14; comp. Matt. vi. 16). [S. C.]

FAT. The Hebrews distinguished between the suet or pure fat of an animal (חֵלֶב), and the fat which was intermixed with the lean (שֶׁמֶן), Neh. viii. 10). Certain restrictions were imposed upon them in reference to the former: some parts of the suet, viz., about the stomach, the entrails, the

kidneys, and the tail of a sheep, which grows to an excessive size in many eastern countries, and produces a large quantity of rich fat [SHEEP], were forbidden to be eaten in the case of animals offered to Jehovah in sacrifice (Lev. iii. 3, 9, 17, vii. 3, 23). The ground of the prohibition was that the fat was the richest part of the animal, and therefore belonged to Him (iii. 16). It has been supposed that other reasons were superadded, as that the use of fat was unwholesome in the hot climate of Palestine. There appears, however, to be no ground for such an assumption. The presentation of the fat as the richest part of the animal was agreeable to the dictates of natural feeling, and was the ordinary practice even of heathen nations, as instanced in the Homeric descriptions of sacrifices (*Il.* i. 460, ii. 423; *Od.* iii. 457), and in the customs of the Egyptians (*Her.* ii. 47), and Persians (*Strab.* xv. p. 732). Indeed, the term *cheleb* is itself significant of the feeling on which the regulation was based; for it describes the *best* of any production (*Gen.* xlv. 18; *Num.* xviii. 12; *Ps.* lxxxi. 16, cxlvii. 14; compare 2 *Sam.* i. 22; *Judg.* iii. 29; *Is.* x. 16). With regard to other parts of the fat of sacrifices or the fat of other animals, it might be consumed, with the exception of those dying either by a violent or a natural death (*Lev.* vii. 24), which might still be used in any other way. The burning of the fat of sacrifices was particularly specified in each kind of offering, whether a peace-offering (*Lev.* iii. 9), consecration offering (*viii.* 25), sin-offering (*iv.* 8), trespass-offering (*vii.* 3), or redemption-offering (*Num.* xviii. 17). The Hebrews fully appreciated the luxury of well-fatted meat, and had their stall-fed oxen and calves (1 *K.* iv. 23; *Jer.* xli. 21; *Luke.* xv. 23); nor is there any reason to suppose its use unwholesome. [W. L. B.]

**FAT, i. e. VAT.** The word employed in the A. V. to translate the Hebrew term *יֶבֶב*, *Yekob*, in Joel ii. 24, iii. 13 only. The word commonly used for *yekob*, indiscriminately with *gath*, *גַּת*, is "winepress" or "winefat," and once "pressfat" (*Isa.* ii. 16); but the two appear to be distinct—*gath* the upper receptacle or "press" in which the grapes were trod, and *yekob* the "vat," on a lower level, into which the juice or must was collected. The word is derived by Gesenius (*Thes.* 619 b) from a root signifying to hollow or dig out; and in accordance with this is the practice in Palestine, where the "winepress" and "vats" appear to have been excavated out of the native rock of the hills on which the vineyards lay. One such, apparently ancient, is described by Robinson as at *Hableh* in central Palestine (iii. 137), and another, probably more modern, in the Lebanon (603). The word rendered "winefat" in Mark xii. 1 is *δραχμίων*, which is frequently used by the LXX. to translate *yekob* in the O. T. [G.]

**FATHER** (*Ab*, *אב*, Chald. *Abba*, *אבא*, Mark xiv. 36, Rom. viii. 15; *πατήρ*; *pater*: a primitive word, but following the analogy of *אָבָה*, to show kindness, (*Gesen. Thes.* 6-8).

The position and authority of the father as the head of the family is expressly assumed and sanctioned in Scripture, as a likeness of that of the Almighty over His creatures, an authority—as Philo remarks—intermediate between human and divine (*Philo*, *περὶ γυναικὸς τριμῆς*, §1). It lies of course at the root of that so-called patriarchal government (*Gen.* iii. 16; 1 *Cor.* xi. 3), which

was introductory to the more definite systems which followed, and which in part, but not wholly, superseded it. When therefore the name of "father of nations" (*אֲבִירֵי הָעַמִּים*) was given to Abram, he was thereby held up not only as the ancestor, but as the example to those who should come after him (*Gen.* xviii. 18, 19; *Rom.* iv. 17). The father's blessing was regarded as conferring special benefit, but his malediction special injury, on those on whom it fell (*Gen.* ix. 25, 27, xlvii. 27-40, xlviii. 15, 20, xlix.); and so also the sin of a parent was held to affect, in certain cases, the welfare of his descendants (2 *K.* v. 27), though the law was forbidden to punish the son for his father's transgression (*Deut.* xxiv. 16; 2 *K.* xiv. 6; *Ex.* xviii. 20). The command to honour parents is noticed by St. Paul as the only one of the Decalogue which bore a distinct promise (*Ex.* xx. 12; *Eph.* vi. 2), and disrespect towards them was condemned by the Law as one of the worst of crimes (*Ex.* xxi. 15, 17; 1 *Tim.* i. 9; comp. *Virg. Aen.* vi. 609; *Aristoph. Rem.* 274-773). Instances of legal enactment in support of parental authority are found in *Ex.* xxii. 17; *Num.* xxx. 3, 5, xii. 14; *Deut.* xxi. 18, 21; *Lev.* xx. 9, xxi. 9, xxii. 12; and the spirit of the law in this direction may be seen in *Prov.* xiii. 1, xv. 5, xvii. 25, xix. 13, xx. 20, xxviii. 24, xxx. 17; *Is.* xlv. 10; *Mal.* i. 6. The father, however, had not the power of death over his child (*Deut.* xxi. 18-21; *Philo*, *l. c.*).

From the patriarchal spirit also the principle of respect to age and authority in general appears to be derived. Thus Jacob is described as blessing Pharaoh (*Gen.* xlvii. 7, 10; comp. *Lev.* xix. 32; *Prov.* xvi. 31; *Philo*, *l. c.* §6).

It is to this well recognised theory of parental authority and supremacy that the very various uses of the term "father" in Scripture are due. (1.) As the source or inventor of an art or practice (*Gen.* iv. 20, 21; *John* viii. 44; *Job* xxxviii. 28, xvii. 14; 2 *Cor.* i. 3). (2.) As an object of respect or reverence (*Jer.* ii. 27; 2 *K.* ii. 12, v. 13, vi. 21). (3.) Thus also the pupils or scholars of the prophetic schools, or of any teacher, are called sons (2 *K.* ii. 3, iv. 1; 1 *Sam.* x. 12, 27; 1 *K.* xx. 35; *Heb.* xii. 9; 1 *Tim.* i. 2). (4.) The term father and also mother is applied to any ancestor of the male or female line respectively (*Is.* li. 2; *Jer.* xxxv. 6, 18; *Dan.* v. 2; 2 *Sam.* ix. 7; 2 *Chr.* xv. 16). (5.) In the Talmud the term father is used to indicate the chief, e.g. the principal of certain works are termed "fathers." Objects whose contact causes pollution are called "fathers" of defilement (*Mishn. Shabb.* vii. 2, vol. ii. p. 29; *Pesach*, i. 6, vol. ii. p. 137, *Surenh.*). (6.) A protector or guardian (*Job* xxix. 16; *Ps.* lxxviii. 5; *Deut.* xxxii. 6). Many personal names are found with the prefix *אב*, as Absalom, Abishai, Abiram, &c., implying some quality or attribute possessed, or ascribed (*Gesen.* 8, 10).

"Fathers" is used in the sense of seniors (*Acts* vii. 2, xxii. 1), and of parents in general, or ancestors (*Dan.* v. 2; *Jer.* xxvii. 7; *Matt.* xxiii. 30, 32).

Among Mohammedans parental authority has great weight during the time of pupilage. The son is not allowed to eat, scarcely to sit in his father's presence. Disobedience to parents is reckoned one of the most heinous of crimes (*Burckhardt, Notes on Ber.* i. 355; *Lane, Mod. Eg.* i. 84; *Atkinson, Travels in Siberia*, &c. 559). [H. W. P.]

**FATHOM. MEASURES.]**

## FEASTS. [FESTIVALS.]

FELIX (Φῆλιξ, Acts xxiii.-xxiv.; in Tac. *Hist.* v. 9, called Antonius Felix; in Suidas, Claudius Felix; in Josephus and Acts, simply Felix: so also in Tac. *Ann.* xii. 54), a Roman procurator of Judea, appointed by the Emperor Claudius, whose freedman he was, on the banishment of Ventidius Cumanus in A.D. 53. Tacitus (*Ann.* xii. 54) states that Felix and Cumanus were joint procurators, Cumanus having Galilee, and Felix, Samaria. In this account Tacitus is directly at issue with Josephus (*Ant.* xx. 6, 2-7, 1), and is generally supposed to be in error; but his account is very circumstantial, and by adopting it we should gain some little justification for the expression of St. Paul, Acts xxiv. 10, that Felix had been judge of the nation "for many years." Those words, however, must not even thus be closely pressed; for Cumanus himself only went to Judea in the eighth year of Claudius (*Jos. Ant.* xx. 5, §2). Felix was the brother of Claudius's powerful freedman Pallas (*B. J.* ii. 12, §8; *Ant.* xx. 7, §1); and it was to the circumstance of Pallas's influence surviving his master's death (Tacit. *Ann.* xiv. 65) that Felix was retained in his procuratorship by Nero. He ruled the province in a mean, cruel, and profligate manner, "per omnem sævitiam et hildinem jus regium servili ingenio exercuit" (Tacit. *Hist.* v. 9, and *Ann.* xii. 54). With this compendious description the fuller details of Josephus agree, though his narrative is tinged with his hostility to the Jewish patriots and zealots, whom, under the name of robbers, he describes Felix as putting down and crucifying by hundreds. His period of office was full of troubles and seditions. We read of his putting down false Messiahs (*Joseph. Ant.* xx. 8, §5; *B. J.* ii. 13, §4); the followers of an Egyptian magician (*Ant.* xx. 8, §6; *B. J.* ii. 13, §5; Acts xii. 38), riots between the Jews and Syrians in Caesarea (*Ant.* xx. 8, §7; *B. J.* ii. 3, §7) and between the priests and the principal citizens of Jerusalem (*Ant.* xx. 8, §8; *Joseph. Life*, 3). He once employed the sicarii for his own purposes, to bring about the murder of the high-priest Jonathan (*Ant.* xx. 8, §5). His severe measures and cruel retributions seemed only to accelerate the already rapid course of the Jews to ruin: "intempestivis remediis delicta accendebat" (Tacit. *Ann.* xii. 54; δ πόλεμος καθ' ἡμέραν ἀνεββίμισε, *Joseph. B. J.* ii. 13, §6). St. Paul was brought before Felix in Caesarea, having been sent thither out of the way of the Jews at Jerusalem by the "chief captain" Claudius Lysias. Some effect was produced on the guilty conscience of the procurator, as the Apostle reasoned of righteousness, and temperance, and judgment to come; but St. Paul was remanded to prison and kept there, in hopes of extorting money from him, two years (Acts xxiv. 26, 27). At the end of that time Porcius Festus [FESTUS] was appointed to supersede Felix, who, on his return to Rome, was accused by the Jews in Caesarea, and would have suffered the penalty due to his atrocities, had not his brother Pallas prevailed with the Emperor Nero to spare him (*Ant.* xx. 8, §9). This was probably in the year 60 A.D. (*Anger, De temporum in Act. Apost. ratione*, &c., p. 100; Wieseler, *Chronologie der Apostelgeschichte*, pp. 66-82). The wife of Felix was Drusilla, daughter of Herod Agrippa I. the former wife of Azizus King of Emesa. [DRUSILLA.]

[H. A.]

## FENCED CITIES (מְצֻרוֹת, or מְצֻרָה, מְצֻרָה).

Dan. xi. 15, from מְצֻרָה, cut off, separate, equivalent to מְצֻרָה, Ges. 231; πόλις ὄχυρα, τεῖχ' ἔχεις, τετειχισμένης; urbes, or civitates, muratæ, munitæ, munitissimæ, firmæ). The broad distinction between a city and a village in Biblical language has been shown to consist in the possession of walls. [CITY.] The City had walls, the village was unwall'd, or had only a watchman's tower (מִגְדָּל; πύργος; turris custodum; compare Gen. 267), to which the villagers resorted in times of danger. A threefold distinction is thus obtained—1. cities; 2. unwall'd villages; 3. villages with castles or towers (1 Chr. xxvii. 25). The district east of the Jordan, forming the kingdoms of Moab and Bashan, is said to have abounded from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighbouring tribes, besides unwall'd towns (*Num. Marc.* xiv. 9; *Deut.* iii. 5; 2 Chr. xxvi. 10). Of these many remains are thought by Mr. Porter to exist at the present day (*Damascus*, ii. 197). The dangers to which unwall'd villages are exposed from the marauding tribes of the desert, and also the fortifications by which the inhabitants sometimes protect themselves are illustrated by Sir J. Malcolm (*Sketches of Persia*, c. xiv. 148; and Frazer, *Persia*, 379, 380; comp. *Judg.* v. 7). Villages in the *Haurân* are sometimes enclosed by a wall, or rather the houses being joined together form a defence against Arab robbers, and the entrance is closed by a gate (Burckhardt, *Syria*, 212).

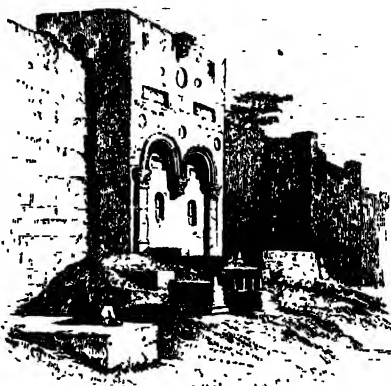

A further characteristic of a city as a fortified place is found in the use of the word מְצֻרָה, build, and also fortify. So that to "build" a city appears to be sometimes the same thing as to fortify it (*comp. Gen.* xii. 20, and 2 Chr. xvi. 6 with 2 Chr. xi. 5-10, and 1 K. xv. 17).

The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battlemented parapets, מִגְדָּל, having towers at regular intervals (2 Chr. xxii. 5; Jer. xxxi. 38), on which in later times engines of war were placed, and watch was kept by day and night in time of war (2 Chr. xxvi. 9, 15; *Judg.* ix. 45; 2 K. ix. 17). Along the oldest of the three walls of Jerusalem, there were 90 towers; in the second, 14; and in the third, 60 (*Joseph. B. J.* v. 4, §2). One such tower, that of Hannanel, is repeatedly mentioned (*Jer.* xxxi. 38; *Zech.* xiv. 10), as also others (*Neh.* iii. 1, 11, 27). The gateways of fortified towns were also fortified and closed with strong doors (*Neh.* ii. 8, iii. 3, 6, &c.; *Judg.* xvi. 2, 3; 1 Sam. xxiii. 7; 2 Sam. xviii. 24, 33; 2 Chr. xiv. 7; 1 Macc. xiii. 33, xv. 39). In advance of the wall there appears to have been sometimes an outwork (מִגְדָּל, מְצֻרָה), in A. V. "ditch" (1 K. xxi. 23; 2 Sam. xx. 15; *Gen. Thes.* 454), which was perhaps either a palisade or wall lining the ditch, or a wall raised midway within the ditch itself. Both of these methods of strengthening fortified places, by hindering the near approach of machines, were usual in earlier Egyptian fortification (*Wilkinson, Anc. Eg.* i. 408), but would generally be of less use in the hill forts of Palestine than in Egypt. In many towns there was a keep or citadel for a last resource to the defenders. Those remaining in the *Haurân* and *Leja* are

square. Such existed at Shechem and Thebez (Judg. ix. 46, 51, viii. 17; 2 K. ix. 17), and the great forts or towers of Psephinus, Hippicus, and especially Antonia, served a similar purpose, as well as that of overawing the town at Jerusalem. These forts were well furnished with cisterns (Acts xxi. 34; 2 Macc. v. 5; Joseph. *Ant.* xviii. 4, §8; *B. J.* i. 5, §4, v. 4, §2, vi. 2, §1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (Num. xiii. 28), and afterwards gave much trouble to the people in subduing them. Many of these were refortified, or, as it is expressed, rebuilt by the Hebrews (Num. xxxii. 17, 34-42; Deut. iii. 4, 5; Josh. xi. 12, 13; Judg. i. 27-33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (Josh. xii. 3, 6, xvii. 16; Judg. i. 19; 2 K. xviii. 8; 2 Chr. xxvi. 6). The strength of Jerusalem was shown by the fact that that city, or at least the citadel, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v. 6, 7; 1 Chr. xi. 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities. Solomon (1 K. ix. 17-19; 2 Chr. viii. 4-6), Jeroboam I. (1 K. xii. 25), Rehoboam (2 Chr. xi. 5, 12), Baasha (1 K. xv. 17), Omri (1 K. xvi. 24), Hezekiah (2 Chr. xxxii. 5), Asa (2 Chr. xiv. 6, 7), Jehoshaphat (2 Chr. xvii. 12), but especially Uzziah (2 K. xiv. 22; 2 Chr. xxvi. 2, 9, 15), and in the reign of Ahab, the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 K. xvi. 34). Herod the Great was conspicuous in fortifying strong positions, as Masada, Machaerus, Herodium, besides his great works at Jerusalem (Joseph. *B. J.* vii. 6, §§1, 2, and 8, §3; *B. J.* i. 21, §10; *Ant.* xiv. 13. 9).

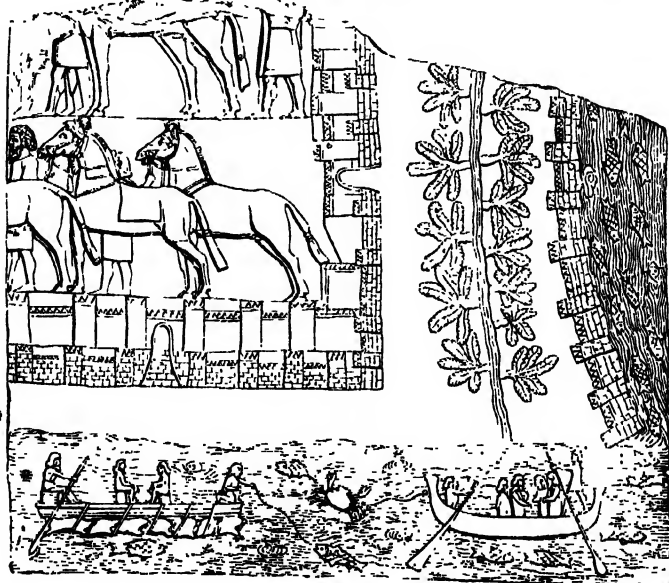

## FENCED CITIES

But the fortified places of Palestine served only in a few instances to check effectually the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 K. xviii. 10), Jerusalem (2 K. xxv. 3) for four months, and in later times of Jotapata, Gamala, Machaerus, Masada, and above all Jerusalem itself, the strength of whose defences drew forth the admiration of the conqueror Titus (Joseph. *B. J.* iii. 6, iv. 1 and 9, vii. 6, §§2-4 and 8; Robinson, i. 232).

The so-called Golden Gate of Jerusalem, showing supposed remains of the old Jewish Wall.

The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals,

Ancient Egyptian Fortifications (LAVARD.)

of the same height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant 13 or 20 feet from the main wall, and sometimes another was made of 70 or 100 feet in length, projecting at right angles from the main wall to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of ténail in the ditch itself, or a ravelin on its edge. In later times the practice of fortifying towns was laid aside, and the large temples with their enclosures were made to serve the purpose of forts (Wilkinson, *Anc. Egypt.* i. 408, 409, abridgm.).

The fortifications of Nineveh, Babylon, Ecbatana, and of Tyre and Sidon are all mentioned, either in the Canonical books or the Apocrypha. In the sculptures of Nineveh representations are found of walled towns, of which one is thought to represent Tyre, and all illustrate the mode of fortification adopted both by the Assyrians and their enemies (Jer. li. 30-32, 58; Am. i. 10; Zech. ix. 3; Ez. xxvii. 11; Nah. iii. 14; Tob. i. 17, xiv. 14, 15; Jud. i. 1, 4; Layard, *Nin.* vol. ii. 275, 279, 388, 395; *Nin. & Bab.* 211, 358; *Mon. of Nin.* pt. ii. 39, 43).

[H. W. P.]

**FERRET** (פֶּרֶט; μυγαλή; *mygale*), one of the unclean creeping things mentioned in Lev. xi. 30. The μυγαλή of Aristotle (*Hist. An.* viii. 24) is the *Mus araneus*, or shrew-mouse; but it is more probable that the animal referred to in Lev. was a reptile of the lizard tribe, deriving its name from the mournful cry, or wail, which some lizards utter. The root is פֶּרֶט, to sigh or groan. The Rabbinical writers seem to have identified this animal with the hedgehog; see Lewysohn, *Zool. des Talmuds*, §§129, 134.

[W. D.]

**FESTIVALS** (מִצְוֹת).<sup>a</sup> The object of this article is merely to give a classification of the sacred times of the Hebrews, accompanied by some general remarks. A particular account of each festival is given in its proper place.

I. The religious times ordained in the Law fall under three heads:—(1.) Those formally connected with the institution of the Sabbath; (2.) The historical or great festivals; (3.) The Day of Atonement.

(1.) Immediately connected with the institution of the Sabbath are—

- (a) The weekly Sabbath itself.
- (b) The seventh new moon or Feast of Trumpets.
- (c) The Sabbatical Year.
- (d) The Year of Jubilee.

(2.) The great feasts (מִצְוֹת מִצְוֹת); in the Talmud, מִצְוֹת, *pilgrimage feasts*) are:—

- (a) The Passover.
- (b) The Feast of Pentecost, of Weeks, of Wheat-harvest, or, of the First fruits.
- (c) The Feast of Tabernacles, or of Ingathering.

On each of these occasions every male Israelite was commanded "to appear before the Lord," that is, to attend in the court of the tabernacle or the temple, and to make his offering with a joyful heart (Deut. xxvii. 7; Neh. viii. 9-12; cf. Joseph. *Ant.* xi. 5, §5). The attendance of women was voluntary, but the zealous often went up to the

Passover. Thus Mary attended it (Luke ii. 41), and Hannah (1 Sam. i. 7, ii. 19). As might be supposed, there was a stricter obligation regarding the Passover than the other feasts, and hence there was an express provision to enable those who, by unavoidable circumstances or legal impurity, had been prevented from attending at the proper time, to observe the feast on the same day of the succeeding month (Num. ix. 10-11).

On all the days of Holy Convocation there was to be an entire suspension of ordinary labour of all kinds (Ex. xii. 16; Lev. xvi. 29, xxiii. 21, 24, 25, 35). But on the intervening days of the longer festivals work might be carried on.<sup>b</sup>

Besides their religious purpose, the great festivals must have had an important bearing on the maintenance of a feeling of national unity. This may be traced in the apprehensions of Jeroboam (1 K. xii. 26, 27), and in the attempt at reformation by Hezekiah (2 Chr. xxx. 1), as well as in the necessity which, in later times, was felt by the Roman government of mustering a considerable military force at Jerusalem during the festivals (Joseph. *Ant.* xvii. 9, §3; xvii. 10, §2; cf. Matt. xxvi. 5; Luke xiii. 1).

The frequent recurrence of the sabbatical number in the organization of these festivals is too remarkable to be passed over, and (as Ewald has observed) seems, when viewed in connexion with the sabbatical sacred times, to furnish a strong proof that the whole system of the festivals of the Jewish law was the product of one mind. Pentecost occurs seven weeks after the Passover; the Passover and the Feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the year—two at the Passover, one at Pentecost, one at the Feast of Trumpets, one on the Day of Atonement, and two at the Feast of Tabernacles; the Feast of Tabernacles, as well as the Day of Atonement, falls in the seventh month of the sacred year; and, lastly, the cycle of annual feasts occupies seven months, from Nisan to Tisri.

The agricultural significance of the three great festivals is clearly set forth in the account of the Jewish sacred year contained in Lev. xxiii. The prominence which, not only in that chapter but elsewhere, is given to this significance, in the names by which Pentecost and Tabernacles are often called, and also by the offering of "the first fruits of wheat-harvest" at Pentecost (Ex. xxiii. 22), and of "the first of the first fruits" at the Passover (Ex. xviii. 19, xxiv. 26), might easily suggest that the origin of the feasts was patriarchal (Ewald, *Alt-erthümer*, p. 385), and that the historical associations with which Moses endowed them were grafted upon their primitive meaning. It is perhaps, however, a difficulty in the way of this view, that we should rather look for the institution of agricultural festivals amongst an agricultural, than a pastoral people, such as the Israelites and their ancestors were before the settlement in the land of promise.

The times of the festivals were evidently ordained in wisdom, so as to interfere as little as possible with the industry of the people. The Passover was held just before the work of harvest commenced, Pentecost at the conclusion of the corn-harvest and before the vintage, the Feast of Tabernacles after all

<sup>a</sup> The original meaning of the word מִצְוֹת is a "dance." The modern Arabic term *Hadj* is derived from the same root (Gesen. *Thes.* 444).

<sup>b</sup> The Law always speaks of the Days of Holy Convocation as Sabbaths. But the Mishna makes a distinction, and states in detail what acts may be performed on the former, which are unlawful on the sabbath, in the treatise *Yom Tob*; while in *Mord Katan*, it lays down strange and burdensome conditions in reference to the intermediate days.

the fruits of the ground were gathered in. In winter, when travelling was difficult, there were no festivals.
